Student musicians will perform music for cello, clarinet, voice, guitar and piano. Lunch-goers are welcome. Tillotson Room, Gibson Hall. 12 p.m.

SYMPOSIUM

"Celebrating Campus-Community Collaborations"

Students will present projects that address cultural, social and environmental issues in the community.

Main Lounge, Moulton Union. 1 p.m.

PERFORMANCE

ote Book Café

idents will perform on a range of musical instruments including violin, trumpet and jazz voice.

Tillotson Room, Gibson Hall, 4 p.m.

POETRY

Quill Coffeehouse

This coffeehouse will celebrate the release of "Geometry," a poetry pamphlet. Attendees may also share their own poetry, prose or music.

Reed House. 6 p.m.

FILM

"The Doe Boy"

This film tells the story of a young Cherokee Nation tribe member suffering from hemophilia. The Native American Student Association (NASA) and the Bowdoin Film Society will sponsor the screening of this award-winning movie.

Smith Auditorium, Sills Hall. 7 p.m.

SATURDAY

CONCERT

James Pasch '11, Cello

During this recital, Pasch will perform Paul Hindemith's "Cello Sonata op. 11, No. 3" with piano accompanist Joyce Moulton. Additionally, he will perform Bach's "Suite No. 1 for Unaccompanied Cello."

Kanbar Auditorium, Studzinski Recital Hall. 7:30 p.m.

FILM SCREENING

48 Hour Film Festival and "The Nightmare Before Christmas"

The Bowdoin Film Society will screen films written, shot and edited in 48 hours by Bowdoin students. "The Nightmare Before Christmas" will follow. This stop-motion fantasy film was written and produced by Tim Burton. It features Jack Skellington, a character who finds a portal from "Halloween Town" to "Christmas Town."

Smith Auditorium, Sills Hall. 7 p.m.

CONCER

Teratoma

This local death metal band will give its only Bowdoin concert of the academic year.

Chase Barn, Boody-Johnson House. 8 p.m.

SUNDAY

PERFORMANCE

Eugene Sun '10, Trombone

Sun will premier original music by Elliott Schwartz and welcome the Brass Quintet as a guest performance group during this recital.

Kanbar Auditorium, Studzinski Recital Hall. 2 p.m.

CONCER

Festival of Nine Lessons and Carols

A student choir will perform an assortment of Christmas carols while faculty and staff, by candlelight, read the nine lessons in this annual Bowdoin tradition.

Chapel. 6:30 p.m.

MONDAY

RECEPTION

Farewell Celebration for Cindy Wonson

This reception is open to the entire campus community and will honor Wonson, who has served for the past 20 years as Executive Secretary to the President. Wonson is a past recipient of the Polar Award for Customer Service and has served under three Bowdoin presidents.

Shannon Room, Hubbard Hall. 4 p.m.

TUESDAY

REMINDE

Fall Semester Exams Begin

Exams end on Sunday, December 21.
Enjoy Winter Break!

DINING SERVICE

HOURS CHANGES

Thursday, December 18 and Friday, December 19

The Café: 7:30 a.m. - 4:30 p.m. Jack McGeés Grill: 11:30 a.m. - 9 p.m. Bowdoin Express: 9 a.m. - 6 p.m. Regular Dining Hall Hours

Saturday, December 20

The Café: Closed Jack McGee's Grill: Closed Bowdoin Express: 10 a.m. - 6 p.m. Thorne closes for the semester after dinner

Sunday, December 21

Moulton Union: 11:30 a.m. - 12:30 p.m. and 5:45 - 7p.m. The Café: Closed Jack McGee's Grill: Closed Bowdoin Express: 10 a.m. - 6 p.m.

Monday, December 22

The Café: 7:30 - 11:30 a.m. Jack McGee's Grill: Closed Bowdoin Express: 9 a.m. - 4 p.m. Fall Semester Board Closes After Lunch

DEPARTURE REMINDER

College housing closes for the fall semsester at noon on Monday, December 22.

Students are asked to do the following before leaving their residences to save energy and promote cleanliness during Winter Break:

Empty, defrost, and turn off personal refrigerators. Close and lock all windows. Turn down your heat. Unplug all appliances.

Take out trash and recycling before leaving.

Mitchell'54, **Karen Mills** ioin Obama

George Mitchell '54 tapped as envoy to Middle East, Karen Mills to head SBA BY MARY HELEN MILLER

As Obama begins his presidency, he has chosen two members of the Bowdoin community to take on leadership roles in his administration. George Mitchell '54 has been named

the special envoy for Middle East peace, and although she has not been officially confirmed yet, Karen Gordon Mills has been appointed as the administrator of the Small Business Administration (SBA).

Thursday, the Washington Post published a transcript of a meeting between Obama and State Depart-ment employees. During the meeting, Secretary of State Hillary Clin-

ton introduced Mitchell in his new position. She said that Mitchell will lead efforts "to reinvigorate the pro cess for achieving peace between Israel and its neighbors."

"He will help us to develop an integrated strategy that defends the security of Israel, works to bring an end to the Israeli-Palestinian conflict

and women's hockey teams played their first games at the newly dedicated Sidney J. Watson Arena on Sunday. The men, above, won 8-3

Hockey teams take Watson by storm

Crowds pushed through the snow last Sunday to see the men's and women's hockey teams christen the new Sidney J. Watson Arena.

The women, who faced off against Hamilton in the building's first of-ficial game, skated to a 1-1 tie (see related story, page 13), while the men bamboozled the Williams Ephs in a crushing 8-3 win during the evening

After the women's game, and a 30 minute official building dedication,

the men faced off against NESCAC foe Williams

Kyle Hardy '11 opened the floodgates with 9:13 elapsed in the first period when he stripped the puck off a Williams defender along the boards and powered home a finish high into

Hardy's second quickly followed at 15:29, as he bagged a power-play goal following a shot from first year Graham Sisson

Williams pulled a goal back at the ad of the first period, but the Bears didn't relinquish momentum. Following intermission, Aaron O'Callahan

for his third goal of the season.

Bowdoin conceded a short-handed goal as the team was caught pinching too high. Williams' senior forward Matt Dreiheim raced from his end of the ice on a breakaway capped with smooth finish past Bowdoin goalie Richard Nerland '12

Bowdoin hit number four at 13:30 the second as Sisson deflected a drive from the point by Brendan Reich '11 past the hapless Ephs net minder on the power play.

Students join D.C. crowds at inauguration

BY PIPER GROSSWENDT

Though most headed to class on the first day of the spring semester, a handful of Bowdoin students were in Washington, D.C. at the beginning of the week. On Tuesday they headed to the National Mall for a different kind of first day: the inauguration of President Barack Obama.

After rising early to travel to the Mall, Sophia Seifert '09 got in with tickets in the silver section, provided by a friend who is in a labor union that supported the Obama campaign.

Though she faced some initial confusion waiting in a line that did not correspond to her ticket. Seifert characterized getting in through the gates and past the security checkpoint as "no problem" and found a place to watch the inauguration behind the reflecting pool.

Frances Milliken '09 viewed the ceremony from the orange section. with tickets from family members who were early supporters of the Maine Obama campaign. She left for the Mall at 5:30 a.m., arrived at 6 a.m. and waited in line for two hours before getting in.

From her spot on the Mall, Milliken could see Obama, but he looked

ECONOMY

Mills supports pay freeze, small boost in enrollment

ORIENT STAFE

In a letter to the Bowdoin community on Thursday, President Barry Mills recommended an increase in the number of enrolled students at the College, a salary freeze for most emes, and a myriad of other steps in order to confronAt expected budget-

The recommendations included in Mills' six-page letter were formed after three meetings of the Blue Tarp Committee, a wAorking group Mills established in December in order to find ways the College could reduce its operating expenses.

Mills noted that while they are not

final, the recommendations will only be "refined" in the weeks leading up to the Trustees Meeting in early February.

One of the recommendations is to

increase enrollment over a five-year span, adding an average of 10 additional students each year. This increase would provide the College with "a reli-able source of additional revenue," according to Mills' letter, as "tuition and fees represent the single largest source of income to the College." Mills added that the need-blind admissions policy at the College would not be altered despite the increase in enrollment.

With salaries and benefits of Bowdoin faculty accounting for "more than 60 percent of our total operating costs," Mills wrote that faculty salaries "will be fixed at current levels for the next two years." After the two years are up, Mills said that he is committed "to allocating budget resources to gradually restore any ground that may have been lost in the competitiveness of our faculty salaries during the suspension period.

Associate Professor of Biology and Environmental Studies John Lichter said he thought the two-year salary freeze was reasonable, given the current economic climate.

"I don't have access to the data (that the finance committee has], but this seems like a prudent move," Lichter

Liehter did add, however, that salary increases for junior faculty at the College were important in planning

Please see MILLS, page 3

Financial aid requests increase slightly

ORIENT STAFF

While the number of Bowdoin plicants requesting financial aid this year remained fairly constant, more rolled students than usual have asked to review their aid packages for the spring semester.

According to Director of Student

Aid Steve Joyce, most families had their fall bill paid before the recession hit, but roughly 60 families, about 10 or 15 more than in past years, have requested that Bowdoin review their aid packages for this spring semester.

Some awards have already been increased, but others are still in the process or may not be granted.

"The numbers haven't been over-

whelming at least at this point," said Joyce. "We were certainly prepared for families that have been feeling economic hardship.

Joyce attributed the relatively small increase in requested aid to the fact that families often prepare in advance to pay for college for the year and many of them

What are your hopes for the Obama administration?

I hope the Obama administration reunites us as a nation of citizens who represent differing political and so-cial viewpoints but are able to listen to each other with respect and learn from each other. In recent years I have felt as though I was living through a civil war of ugly political partisanship. I hope the new administration continues to build bi-partisan teams working together on the problems of the day. And I hope this administra-tion, by example, heralds a new era in which as a nation we again will value erudition and the life of the mind.

Pamela Fletcher ssor of Art History

I don't expect-or need-to agree with every decision of the new ad ministration, but I am filled with hope at the prospect of an administration that we can trust to tell us the truth, even when it is difficult.

Leah Wolberg '10

Well, I definitely hope to close Guan tanamo Bay, and I was just seeing in the New York Times that they were going to do it. What I really hope is that he will approach the office of the President with, not a sense that he already knew all the answers and that he was going to stick with every one of his campaign promises, but that he would work to find the best solution, not the easiest one.

Lawrence Simon Professor of Philosophy and

There were many themes sounded in his address [Tuesday]: responsibility, the failures of the recent past, the cri of the present, the struggles ahead of us, our success in meeting past challenges and the enduring American values that are old yet true. One theme among the others that I hope President Obama and the country he now leads do go on to embody is that of universalism and inclusiveness, not just in relation to the diversity of our nation but indeed in relation to the entire world. Obama has created an atmosphere in which we can feel the problems of any segment of our society are problems for all of us, American problems. May he be able to extend this sense to the world community, to our common humanity

Kathryn Grant '09

To begin with, knowing firsthand how amazingly engaged my generation of voters were in this election, I hope that President (!) Obama can achieve what I think must be his ultimate goal to return this country to a state in which he and our parents can be proud to leave

In his inaugural address, and leading up to the election, Obama has been very clear that there are hard times ahead-I mean, many of my friends and I are looking for jobs and that will be a tough ladder to climb right now-but throughout the campaign, and especially when he came to speak with us at the staff ball last night, he expressed a sincere desire for our generation to in-herit a country that works, and not just that, he wants us to be able to shape the changes our nation will undergo, and be motivated to contribute positively to our communities and have a desire to define the future we seek.

I hope that President Obama contin ues to delegitimize all those decisions made in the last eight years and earlier that have been detrimental to our country in so many ways, weakening our security and diminishing our standing in the world. There is no way to erase those errors, but I know that by pursuing the priorities that Barack articulated nd that so many of us dream of, we can start to make up for what we have lost.

There are too many specific issues and problems to be solved that I care about to explain all the hopes I have in terms of policy decisions, but I simply hope that our new president feels free to rsue all the most honorable goals he laid out, and vigorously. I must say that I would define myself as more liberal than President Obama, but that perspective lets me see how fervently he wants the conservatives of this country to be part of the process we're just beginning. And I love that he is a decent enough person to continue to hear his opposition, but I definitely want to achieve a reasonably

For myself, I already know what I've been part of in this historic campaign, and what I've sacrificed to be there. hope that this administration is a time in my life that I can be happy in my elected leaders and that as we move forward the people I helped get elected will feel their responsibility to me.

Hassan Muhammad '10

I have many hopes. I would hope that the Obama administration will be creating more job opportunities and beginning to resolve this economic crisis. Allow more Americans to work to live instead of live to work.

I hope President Obama will see American foreign policy through to a successful next stage, first, by withdrawing prematurely from Iraq, and second, by thinking carefully about what we should do about Afghanistan and Pakistan. I hope President Obama will continue to stand by Israel, even if our European allies do not. I hope President Obama will take on the teachers' union that resists charter schools, and take the lead in improving the lives and educational opportunities for children in the inner cities. I hope he will not destroy a health care system that, whatever its flaws, provides the best care in the world. One more, and perhaps the most important: I hope that he will keep America safe for the duration of his presidency.

Gayle Perry-Johnson '11

For the Obama administration, I really hope that he focuses on education and the whole issue of making sure that we do have enough money for students to go to school and that we're not entirely in debt. I think Bowdoin does a good job, but I think Obama can help out a lot more. And I also hope that he touches on the issue of poverty. He mentioned it a little bit in his campaign, but I hope that it's a big issue, and it definitely affects African-Americans, and, being that he is our first, you know, president to get in there, I think that he should help out a lot, 'cause it's growing... and, I mean, it's a concern of a lot of people. And I just hope

that Obama does a really good job, at in his administration, he does a good job at being President and making smart decisions so that he can be in here for four more years after his

Tess Chakkalakal essor of Africana Studies

There's been a lot of talk about Obama being the first black president, which of course is fantastic and historic and all of those things. What he is has a lot of symbolic power for people and he has done a great job of capitalizing on his interracial history and how it fits into the history of the nation. My hope for the Obama administration is to use the symbolic power of the New President's racial identity into forging a new national identity into torging a new natural identity that people can really em-brace, putting an end to the negative spirit of anti-Americanism that has pervaded so much of the political conversation both here in the United States and abroad. Under Obama's leadership, I'm hoping that America and Americans will continue to make a positive difference in the lives of others around the world.

Tara Rajiyah '10

I think as far as Obama's presidency goes, I'm hoping for a turn in the economy, but I think one of the things is just a new attitude as far as the people of the country. They're just... hopeful, and I think that it's all going to work out. And hopefully a new policy when it comes to war

Compiled by Toph Tucker

INAUGURATION CONTINUED FROM PAGE 1

"like my pinkie finger," she said.

Bobby McFerrin, who sang the popular song "Don't Worry, Be Hapwas in front of Milliken during the event and turned around to her and said, "President Obama, check that out! Not Johnson, not Williams,

Amy Collier '12 had an especially unique inauguration experience as an event volunteer. As she'd subscribed to Obam'a e-mails throughout the campaign, she received an e-mail in December calling for inauguration volunteers and was notified in January that she had been selected. At 5 a.m. on Monday morning she took her post at the L'Enfant Plaza Metro station.

"As people came off the Metro," Collier said, "I would tell them which parts of the Mall [and] which access points were still open, and which had filled up and where to go if you had tickets, stuff like that."

"As we were directing people, everyone was very cheerful even after you told them they had to walk a long distance," she added. "They were just so happy to be there, that really made

a big impression."

Collier was released from her post at 11:15 a.m. and was able to view the ceremony on a JumboTron from the

Meredith Segal '08, who started the Students for Barak Obama Facebook group and was actively involved in the Obama campaign, wrote in an e-mail to the Orient that she was "seated on the platform for the swearing in and in the President's reviewing box for

In addition to the inauguration and the parade, Segal attended a Bipartisan Dinner held on Monday in honor of John McCain and a ball on Wednesday for campaign staffers. Of the ball, Segal wrote, "President Obama ap-peared moved by the sight of the armory packed with the kids who have spent the past two years working to bring about the event that occurred on January 20.

"He spoke to us off-the-cuff about his hopes and aspirations that this team of young leaders will continue to bring about change on national and local levels."

However, a few students were not able to enter the Mall, despite their hold-

Zulmarie Bosques '11 obtained tickets for the purple section of the Mall from Robert Menendez, the New Jersey Senator she interned with in

D.C. last summer.

Though she arrived by 6 a.m. Bosques waited in a line that stretched into a tunnel blocks away from the designated entrance point. She reached the gate by 11:15 a.m. only to find it closed. The crowd was so packed, she said, that there was no way to exit to search for another entrance.

Bosques said that, unable to enter the Mall, she "wanted to cry." Her mother provided a play-by-play of what was occurring in the events, and

HISTORY IN THE MAKING: Bowdoin students joined the crowds at Tuesday's inauguration.

when Obama appeared on stage, she said that she could hear the "distant cheer.

"We were all so upset that we could ear him speak, but we couldn't see it," she added

Kyle Dempsey '11 and Nyle Us-mani '12 traveled to Washington, D.C. with Bosques. Dempsey had received silver tickets for himself and Usmani from his mother's cousin, Congress-man Mike Michaud, who represents Maine's second district.

Dempsey and Usmani faced delays in D.C.: There was an accident on the Metro route their train was on, which set them back an hour behind sched-ule. They reached the Mall by 10:30 a.m. and found their way into the middle of a line for the silver section.

"We really couldn't see the end of the line," Dempsey said, explaining the vastness of the crowds.

Like Bosques, Dempsey and Us-mani reached their point of entrance after the gates had been shut by secu-

rity. Dempsey was told by a guard that their tickets were "essentially useless," so he and Usmani decided to make it as close to a large screen television as they could.

"We just ran around for a while and I think we just stumbled into [another area of] the silver section," Dempsey said. "When we finally got there, they let us pass through-maybe that sec-tion wasn't as full as the one we were

originally standing in."

Darren Fishell '09, who joined Bowdoin alumni Clark Gasgoine '08, Prank Chi '08, and William Donohoe '08, managed to secure a ticket at the last minute, but was also unable to get in.

"It was a pity not to get into the was nice just being in the city, it was amazing seeing so many people coming out," Fishell said. "Everybody was equally excited to get in there and see Obama speak."

The inauguration wasn't the only party students attended-Seifert and Emme Duncan '09 both attended

In addition, on Monday, Milliken attended a dinner held in honor of Vice President Joe Biden, where she saw both Biden and Obama.

Former governor of Maine and Distinguished Lecturer Angus King also attended the inauguration, and observed the event from the orange section along with Associate Dean of Admissions Elmore More Jr. and Joan Benoit Samulson '79.

King likened his experience to being in "a huge crowd going to a football game where everybody was rooting for the same team. There was this wonderful sense of closeness, of excitement, of hope, of optimism, of civility, friendship, just an extraordinary moment in terms of the feeling in the crowd. Everyone was delighted to be there, people had come from great distances just for a glimpse of the cer-emony, and it was really an extraordinary [event]."

Of President Obama's speech, King said, "I thought [it] was wonderful and I think it will become more widely praised and viewed as one of the best of

all inaugural speeches as time goes by."
"It wasn't a campaign speech," he added. "It was very serious, I think the tone was just right for the circumstanc-

es. It was very substantive and sobet."
"It was a wonderful experience and
my advice is that when people hear
about something like this, it's worth doing. It's worth taking the trouble," King said. "It was a once in a lifetime

MILLS CONTINUED FROM PAGE 1

"Junior faculty at Bowdoin are relatively well paid...but do need the increases for retirement," Lichter said.

Mills also recommended a similar freeze for non-faculty staff earning more than \$40,000 a year. However, for those earning less than \$40,000 a year, the report stated that "the [operating] budget assumes a 2% increase for the next two years that will be paid either as a salary increase or as a onetime payment in each of the next two

In the letter, Mills underscored that salary freezes may help avert future layoffs

"To the extent this salary freeze allows us to avoid layoffs, it is far preferable to keep people employed and maintain our sense of community and commitment to our dedicated employees," Mills wrote. He did add, however, that he could not "guarantee that layoffs will not happen, especially if our economic circumstances deteriorate.

In addition to salary freezes and an increase in the number of enrolled students at Bowdoin, Mills also mentioned that "the costs for items such as supplies, services, meals, equipment, and travel need to be reduced or held level," while "discretionary travel" for faculty must also be moni tored closely.

In the letter, Mills also called for

upkeep in the school's physical plant and to "keep up with necessary repairs, replacements, and deferred maintenance projects," since it would be "irresponsible to allow our buildings to deteriorate and to pass along deferred maintenance to future generations

Next week, the College will hold a number of meetings for faculty, stu-dents, and staff to discuss the entire set of recommendations. Scott MacEachern, professor of anthropology and a member of the Blue Tarp Committee, said he thinks the meetings will serve as an important gauge for the set of

proposals.

"The [recommendations] felt like the right thing to do and they seem fairly reasonable," MacEachern said. But it's going to be important to get feedback from the campus, to see what the reaction is."

Mills underscored Bowdoin's responsibility to its employees during the downturn in a phone interview on Wednesday, before the memo was

"I am very sensitive to the concept of layoffs, and I am doing everything I can to avoid them," he said.

The recommendations of Mills and the Blue Tarp Committee come more than a month after the College reported a 17 percent decline in the endow ment of College, down from \$831.5 million on June 30, 2009.

The full report of the committee can be found on the Bowdoin Web site. -Nick Daniels contributed to this

MLK celebrations draw mixed reactions

ORIENT STAFF

While many schools, banks and businesses closed their doors on Monday in recognition of Martin Luther King Jr. Day, Bowdoin College had its first day of classes of the semester. The College sponsored two campus events: the screening of the film "Eyes on the Prize" during the day in Smith Union and an evening program in the Chapel. Students, faculty and staff had mixed feelings regarding whether the day was sufficiently marked, especially in light of the inauguration of the first African-American president the follow-

Yando Peralta '11, who attended the program in the Chapel titled "A Celebration of the Life and Legacy of Dr. Martin Luther King, Jr. March Continues to Realize The Dream," said he thought that it could have been done on a larger scale, with more participation from both students and teachers.

'Not to say this wasn't well-attended, but I feel that this shouldn't he same sort of side event," he said

Isa Abney '11 made clear his feelings that Bowdoin should have done re in commemoration.

"I'm not really surprised that Bowdoin College doesn't take Martin Luther King Day seriously. It's Bowdoin-I wouldn't expect anything more given how we deal with race here," he said.

Others felt that the life, work, and dream of King was appropriately ackowledged by the two campus events on Monday.

The Chapel event filled up quickwith attendees showing up 30 minutes early to get in. The program was primarily composed of excerpts King's speeches and writing, which were read aloud by students. teachers and faculty.

The event concluded with the singing of "We Shall Overcome,"

during which, many audience members held hands.

Roy H. Partridge, a visiting assistant professor of sociology and special assistant to the president for multicultural affairs, read an excerpt from "Letters from a Birmingham Iail. 1963."

The event was very powerful and I thought it was very fitting," Partridge said, though he also said of Bates' whole-day celebration of King: "Maybe we could do some of

When asked whether having a day off would be a more appropriate way to recognize Martin Luther King Jr. Day, opinions varied but were mostly in favor of holding classes.

"I think that what's most important about days like this is not whether we have the day off or if we're working," said Hassan Muhammad '10, who both spoke and played piano during the event. "What's most imortant is that we honor Dr. King's legacy as well as what he stood for.

"Obviously a day off would have been nice, but what was cool about this is that I can't think of a better way to celebrate the man Ithan reflecting on his words and message]," said Julia Bond '09.

"It's great for a day off but it doesn't really get to the crux and really honor the man," said Associate Librarian for Public Services Judy Montgomery. "I think it's okay to have classes," she said, adding her hope that classes would take time to discuss King.

Montgomery helped to organize the first event of the day, the annual "Children's Celebration of Martin Luther King Jr.," that morning in

The celebration has occurred for about seven or eight years, according to Montgomery, and was started because there were no Martin Luther King, Jr. Day events in the area

During the hour and a half, two

"I think that what's most important about days like this is not whether we have the day off or if we're working. What's most important is that we honor Dr. King's legacy as well as what he stood for."

HASSAN MUHAMMAD '10

children's book authors read, drew, sang and spoke with children around the age of five.

Montgomery emphasized the connection between Martin Luther King Jr. Day and the inauguration at the event by explaining the importance of voting to the children and asking them to vote for their favorite

Rohan Henry, author of the children's book "The Perfect Gift" was one of the writers present at the

"[Given] the time that we're in right now today with Obama being inaugurated, I think it's important to have the day off to reflect on that, now that some of [King's] dream is coming true," said Henry.

Henry cited the portion of the "I Have A Dream" speech in which King states his hope that his children "will not be judged by the color of their skin, but by the content of their character" in reference to his decision to vote for Obama.

"I'm black and didn't vote for him because he's black. I mean, Jesse Jackson's black and I would never vote for him!" Henry said.

Fellow children's book author Charlotte Agell did not feel that a day off was necessary to commemo rate King's life and memory.

"If you're in a situation where ou're at work there are ways to mark the day," she said as she sketched a boy's portrait. "Barack Obama has asked everyone to go out and do something for their communities."

OBAMA CONTINUED FROM PAGE 1

end to the Israeli-Palestinian conflict that will result in two states, living side by side in peace and security, and to achieve further agreements to promote peace and security between Israel and its Arab neighbors," Clinton said.

Mitchell acknowledged the challenges that he will face in his new position.

"I don't underestimate the difficulty

of this assignment. The situation in the Middle East is volatile, complex and dangerous," Mitchell said in the meet-But the president and the secretary of state have made it clear that danger and difficulty cannot cause the United States to turn away."

Mitchell, a Democrat and Maine native, was a Maine senator from 1983 to 1995. However, he is most well known for leading the Northern Ireland peace process and, more recently, heading the investigation of the use of steroids in baseball, which resulted in the Mitchell Reports.

While Mitchell will promote peace abroad, Mills, a venture capitalist and wife of Bowdoin President Barry Mills, will focus on domestic affairs as she leads the SBA. Obama announced Mills' appointment at a news conference in Chicago on December 19.

"This is a wonderful opportunity for Karen, and our sons and I could not be more proud of her or more excited about what lies ahead," President Mills wrote in a campus-wide e-mail shortly after his wife's appointment was made public.

"Karen is a talented leader and a powerful advocate for small business, s she has demonstrated throughout her professional life and through her work here in the State of Maine with Governor Baldacci," he added.

Mills is the president of Brunswick private equity firm MMP Group. She was a founding partner of Solera Capital, a New York-based private equity firm, and she was appointed by Gov-ernor Baldacci in 2007 to chair the Council on Competitiveness and the Economy

Laptop thief caught, computers returned

ORIENT STAFF

Christmas came a day early for Elizabeth Richeda '09 and Cameron Weller '11 this year. On December 24, Director of Safety and Security Randy Nichols called each student to let her know that Security and the Brunswick Police Department (BPD) had recovered their laptops, which a Brunswick resident had stolen from Hawthorne-Longfellow Library (H-I.) a week earlier

On December 17, Richeda was sitting at a large circular desk near the entrance to the Hubbard stacks. Weller was working at a study carrel at the opposite side of the basement Weller stepped away for about 45 minutes from the carrel she was using; Richeda went to the bathroom to brush her teeth.

It was then that Brunswick resident Gabriel Shaw, 24, stole the two students' laptops.

According to security cameras at the entrance of H-L, Shaw walked into the library at 5:50 p.m. on December 17. He immediately turned downstairs, saw the two laptops unattended and slipped the computers into a backpack he had brought. Shaw walked out of the library at

Weller and Richeda reported the thefts to both Bowdoin Security and

But, Nichols said, "We had nothing to go on at that time."

Three days later, Shaw returned to the library. A male sophomore, who requested anonymity because of his witness status, recounted seeing Shaw on the third floor of H-L around 1 a.m. on December 20

"I noticed this guy who had been walking around, doing laps around the floor," he told the Orient. "It's just weird to do that. He clearly didn't belong." He then asked a nearby student if the man seemed "sketchy," and they agreed that he did.

"He came up to us and asked us where the fifth floor was," the sophomore continued. After suggesting to the man that he try the front desk, the two students decided to report the man to Security.

"We were definitely conscious that the laptops had been stolen," the stu-

At that point, Security officer Rob Beal reported to the scene, and using the description the student gave him, he was able to find Shaw in the basement. After procuring identifying information, Beal escorted Shaw out of the library.

Later that night, Security found out that there had been an attempt to remove the projector hanging from the ceiling of the basement's Electronic Classroom. In addition, during a routine sweep on the third rity officer found a large wide-screen television apparently moved off of its wall mount in a side room.

Nichols said that Security immediately connected each library incident.

"We know from experience that when we have theft on campus the suspects often come back and hit us

multiple times," he said.

With the knowledge of Shaw's identity, Security returned to security camera footage from the evening of December 17. As they expected, officers found Shaw entering H-L at 5:50 p.m. and exiting at 5:55 p.m. Knowing that the theft occurred within that narrow time period, Security contacted the BPD, which brought in Shaw for questioning on December 23. The BPD effort, headed by detective William Collins, got Shaw to confess to the laptop thefts.

"So many people had a part in solving it," Nichols said.

Luckily enough for Weller and Richeda, Shaw had not sold the laptops, nor even tampered with them. On Christmas Eve, Nichols called the two students to tell them their laptops had been recovered.

One of my favorite parts of the job is returning valued stolen property to students," Nichols said.

It was a great Christmas present," Richeda said

Pipes burst over Winter Break, cause roughly \$3,800 in damage

BY SETH WALDER ORIENT STAFF

Two radiators in Brunswick Apartments burst over Winter Break, causing damage in each location. In both cases, cold air was able to get into the apartment, freezing a radiator and causing a minor explosion.

In the first apartment, Brunswick I, the outside door to the apartment was left ajar, causing the hallway radiator to burst. In the second, Bruns wick K3, a window was left open in a room.

According to Director of Residential Life Mary Pat McMahon, Security reported a burst radiator and damage in Brunswick I on December 22, and the Facilities Department was notified.

Jeff Tuttle, Associate Director of Facilities Operations, oversaw the repairs made to both apartments.

We responded as quick as possible. We found the valve on the radia-tor and turned it off," he said. "That cures the initial the problem, then we start the cleanup."

ServPro, an outside company, was hired to do some cleanup as well, according to Tuttle.

The radiator in Brunswick K3 burst sometime last week, according to McMahon, though she couldn't recall the exact date.

"[Brunswick] I was probably the hardest hit, there was significant floor damage. When water gets to [the floors] they swell and buckle," Tuttle said. "We did temporary repairs, we will do more extensive repairs this summer."

Tuttle also said the broken radiator in Brunswick I has been taken out because it was in a hallway and therefore deemed superfluous. He indicated that the damage was minimal in Brunswick K, and that essentially the only work needed was to replace the radiator.

Matt Bruch '10, who lives in the apartment and was staying there over Winter Break for College athletics, said he was lucky the damage wasn't

The pipe burst toward the doorway, if it had gone the other way it would have damaged my computer,"
Bruch said. "This black kind of stuff sprayed, there was like a chunk of metal that shot to the floor.

Bill Madden '09, who lives in Brunswick I, said he was told the damage to his apartment was the He was away when the radiator burst, but indicated that his roommate, Josh Kimball '09, saw the

"My roommate, he got back early because he's a swimmer and he saw the damage and he thought it was pretty bad," Madden said.

McMahon said that the total cost of the damages to Brunswick I was \$3800, and that the College was filing

Madden said the posters in the room were ruined, and one object that meant a lot to him.

There was a lot of water damage to a lockbox, it wasn't ruined, but it's definitely damaged," Madden said. "It was my grandfather's lockbox and I restored it. You can't put a price on it but to me it's priceless."

Madden said the impression he got from the e-mail sent to him over break was that personal damages could be claimed through Bowdoin insurance but that he hadn't looked into it and hadn't heard any more information. McMahon confirmed this to the Orient through an e-mail.

In the case of Brunswick K3, the students occupying the room were asked to pay for some of the damages.

Bruch said he was told by McMa hon that he and the other student staying in the apartment over Winter Break were each being charged \$150 for the incident.

Bruch was upset and sent a reply protesting the charge.
"I was saying the window was open

for comfort reasons and the radiator was outdated," Bruch said.

Bruch said McMahon replied that he still had to pay the charge because, having lost his key, he had been keeping the window open to gain access

McMahon said that the lesson here is that by allowing cold air into the apartments, students are putting selves at risk.

'It's not safe to prop your door in the fall and spring, but it's actually insafe and hazardous to prop your door in the winter," she said

AID CONTINUED FROM PAGE 1

process or may not be granted.

The numbers haven't been overwhelming at least at this point," Joyce. "We were certainly prepared for families that have been feeling economic

Joyce attributed the relatively small increase in requested aid to the fact that families often prepare in advance to pay for college for the year and many of n still have a plan for this academic

"Where it has become very difficult is in cases of unemployment—if parents have lost jobs, and particularly if they have been out of work for six months or more," said Joyce. "Unemployment has hit a variety of families and a variety of industries.

In most of these cases, more financial aid and grant money has been provided.

Depressed assets may also affect the affordability of tuition for some families.

Investments can create a problem if families counted on them to pay the college bill," said Joyce.

Meanwhile, the number of Bowdoin applicants, both early decision and regular, requesting financial aid did not increase this year

Of the 164 students admitted early, about 40 percent requested aid, roughly

the same as in past years.

Joyce attributed this consistency to the tendency for people who are more financially concerned not to apply early so that they can compare aid packages and awards of different schools.

In expectation of an extended recession, requests for financial aid from next year's applicant pool will likely rise.

"It would surprise me if we didn't have more call on our financial aid dol-

Roughly \$22.5 million were set aside for financial aid this year, and although next year's budget has not yet been final-ized, Joyce said he was "very confident" that the College would have aid for enrolled students and would budget to

meet the need of all incoming classes.
"We are planning for additional need, trying to budget carefully," said Joyce "And again the highest priority of the College is that students can come and

New OneCard system more 'trustworthy'

Students, staff, and faculty returning to campus after Winter Break found a new, streamlined OneCard system in place, following more than two years of planning and a semester of implementation. The OneCard project offers restyled ID cards, a freshly installed dual proximity and swipe entry system on 22 campus buildings, and a simplified system of management.

Originally undertaken to restructure and update the two existing systems in place, the OneCard project is in its final stages of implementation. Previously, the College was operating two software systems—Millenium operated the proximity card readers, while CS Gold operated the swipe readers. According to the Card Access Conversion Team, "The Millenium system was approaching the end of its useful life and required a tremendous amount of campus resources to maintain it. We wanted to be proactive and make the change before we experienced any real problems."

This team, consisting of representatives from Residential Life, Information Technology, Safety and Security, Facilities Management and the OneCard of-fice, decided to switch entirely to the CS Gold system, used by several hundred colleges and universities. It is "a more advanced and trustworthy access system than others on the market," and has been used "reliably" for several years by the College to manage door access, meal plans and other transactions such as laundry and vending.

"The CS Gold system allows us much more flexibility on the back end for programming door access and effectively managing access. Additionally, consolidating card-related functions into one

SWIPE OUT: Students exchange their existing IDs for new OneCards in the Coles Tower lobby.

office that can assist with door access. vending, laundry and various account balance issues just makes sense," the team said.

The access conversion project has been marked with a high priority for several years. It is estimated at a cost of \$280,000 in this fiscal year's budget, but the College received competitive pric ing and achieved "considerable savings" for using a software system already in

Consolidation into the OneCard sys tem has allowed for expanded capability and functionality, for both staff and

According to the team, the switch to a unified system more easily enables use for investigative purposes, though it is not used to track students on a daily base. The CS Gold software keeps records of an ID card's use, which Security can access if necessary; for example, during incidents of missing students or theft on campus.

In an article online at Security Director News, Director of Safety and Security Randy Nichols commented that the new OneCard system "allows us to monitor and control access to various buildings and modify privileges on an as-needed basis from our communication center.

In addition, the team pointed out that they have also "recently added the ability to make online deposits to a student's OneCard account," further enabling use across campus. They plan to spend their time smoothing out any kinks with these projects this semester.

Looking ahead, the team indicated an interest and enthusiasm to work with students and local vendors over the next academic year to explore the possibilities of using the OneCard off campus.
They added that the "OneCard office continues to look for ways to improve existing services and to add features that enhance the card's functionality."

SECURITY REPORT: 12/15 to 1/22

· A student with an allergic reaction was taken from Dudley Coe Health Center to Parkview Hospital.

Wednesday, December 17

• Two students reported that their laptops were stolen from the basement level of Hawthorne-Longfellow Library (see article, page 3). Thursday, December 18

 A security officer observed a hunt-ing rifle inside a vehicle that was parked on campus. The owner was located and instructed to immediately remove the weapon from College property.

 Security investigated a report of two suspicious males in the vicinity of the sswurm parking lot. The men were located and identified as legitimate vendors doing business with the College.

 Two vehicles were reported driving recklessly in the Watson Arena parking lot. Two local high school students were spoken to by the Brunswick Police.

Saturday, December 20

 A fire alarm was activated at Bruns-wick Apartments M after a hallway pipe burst when an open exterior door freezing air into the building. Students are asked to keep exterior doors closed

 A student reported a suspicious male on the third floor of Hawthorne-Longfellow Library at 1 a.m. A security officer located the man on the basement level. The officer identified the man and escorted him from the building.

Sunday, December 21

· A security officer found evidence of an attempted theft of a large video screen in a third-floor study room at Hawthorne-Longfellow Library. The screen had been removed from a wall mount and was left leaning against fellow Library reported the attempted theft of a ceiling-mounted projector from the electronic classroom in the lower level of the library. The attempted theft occurred at 12:45 a.m. Saturday, according to a student witness.

Monday, December 22

 A student who was driving too fast. on Coffin Street slid through the intersection of Coffin and College Streets and struck a snow bank. There were no

· A Security investigation identified a suspect in the two laptop thefts and the attempted thefts of a large screen monitor and a projector from Hawthorne-Longfellow Library. Brunswick Police were contacted.

Tuesday, December 23

Brunswick Police interviewed the Hawthorne-Longfellow theft suspect and

both student laptops were recovered.

• A radiator in a stairwell at Brunswick Apartments I section burst when cold air from an open exterior door caused a pipe to freeze. Water and steam damage ulted (see article, page 4).

Monday, January 5

• Drug paraphernalia and a small amount of marijuana were seized on

Sunday, January 11

· A kayak with Bowdoin Outing Club arkings was found in Chamberlain Hall. It was taken into custody as a precaution and later retrieved by the student

Monday, January 12

 A student reported a missing end table from the common room of Coles Tower 7B.

Tuesday, January 13

A woman who had arrived in Brunswick by bus sought shelter from the rain inside a Maine Hall entrance. Brunswick Police were notified and the woman was identified. Arrangements were made to get the woman safely to her destination. Friday, January 16

 A basement window in Johnson House was blown out by the wind and a pipe froze, causing a fire alarm.

 Students reported loud music coming from the 10th floor of Coles Tower. The room residents were asked to turn the music down.

Saturday, January 17

A staff member's personal vehicle that was left in reverse rolled back and stuck a College truck in the Rhodes Hall parking lot.

Sunday, January 18

 Four students were found smoking marijuana from a bong in the first-floor front room at MacMillan House. Drug paraphernalia and a baggie of marijuan were confiscated.

· Students reported loud music on the second floor of Stowe Inn.

Tuesday, January 20

A student with a general illness was transported from Coleman Hall to Parkview Hospital.

 At the request of the health center, student was transported to Parkview Hospital.

• Two female hockey players were injured in a collision during practice at the Sid. The players were transported to Parkview Hospital by Brunswick

· An officer responded to a noise complaint at Mayflower Apartments.

Thursday, January 22

• An officer responded to a noise implaint on the second floor of Stowe

'Sid' Watson left legacy of sportsmanship at Bowdoin

When Bobbie and Tona White donated money for the creation of Watson Arena, they asked that the arena be named after someone else: Bowdoin hockey legend and coach, Sidney "Sid" J. Watson.

"Bobbie played for Sid, wanted to name the arena for him," said Athletic Director Jeffrey Ward. "It was a very generous offer.

Construction of the 68,200square-foot arena began in September of 2007, more than a year before its highly anticipated opening on Sunday. Like Dayton Arena before it, "The Sid" is available for use to outside schools and clubs in addition to Bowdoin's own men and women's ice hockey teams.

Current men's head hockey coach Terry Meagher said the building truly represents Sid, with its "toughness of exterior" and "warmness of exterior.

Watson is known by most as a hockey coach who left behind a powerful legacy, having led the Bowdoin Bears to six ECAC Championships and claiming the ECAC Division II title in 1971, '75, '76 and '78. According to an article published on Bowdoin's Web site after his death in 2004, Watson also led the Polar Bears to the playoffs every year but one during his 24 seasons as head coach, during which he led the Bears to 326 wins, 210 losses, and 11 ties (.606).

After serving as head coach for 24 seasons, Watson served as the Ashmead White Director of Athletics from 1983 to 1998, during which Bowdoin's athletic program grew to encompass 29 varsity sports, five club sports, and more than 20 physical education courses Watson also coached varsity and first-year lacrosse and varsity golf, and was an assistant football, coach In addition, he was the director of Dayton Arena, a physical educa-tion instructor, and directed swim clubs at Bowdoin and the Portland Country Club. In 1971 he founded "the Clinic," a six-week summer hockey school at Bowdoin that is still in place today.

According to Associate Director of Athletics Lynn Ruddy, who worked alongside Watson during tenure as hockey coach and athletic director, Watson was "instrumental" in developing women's sports at the College and in encouraging all of his players to compete at their highest potential.

was a real gentleman and would never curse in front of a woman, but if you needed to hear it, he didn't hesitate," said Ruddy. "You always knew where you stood with him as a player or a person."

Watson's daughter, Nancy Watson Jordan, who now lives in Falmouth, said her father emphasized academics, morals, and integrity with his players and his family.

"My father was very fond of his players, and our family knew a lot of them," said Jordan. "He always wanted his players to do well aca demically because he truly cared about the whole person."

"Sid had a great respect for the faculty," said Meagher. "He valued academics and believed in Bowdoin's philosophy of the student-athlete.

According to his obituary, Watson also received the 1984 Bowdoin Award for Faculty and Staff, and was named an honorary member of Bowdoin's Alumni Association upon his retirement in 1998. In 2002, he was an inaugural inductee into Bowdoin's Athletic

Watson's passion for coaching and care for his players was recognized beyond Bowdoin as well. He received numerous coaching awards, among these the 1966 United Press International Coach of the Year, the 1969 and 1970 Clark Hodder New England Coach of the Year. the Hobey Baker Legend of Hockey Award, and the Edward Jeremiah Memorial Trophy as National College Division Coach of the Year in 1970, '71, and '78.

Beyond being an excellent coach, Watson was also "an all-around

FAMILY TIES: Watson (far left) stands with his wife Henrietta and family at a ceremony honoring him at Bowdoin.

great athlete," said Meagher. "He took joy in every type of sport."

Watson's strong athletic career is indicative of his zeal for sport. Before coming to Bowdoin, Watson vas a star athlete at Northeastern University, where he played football and ice hockey, and is considered one of the greatest hockey players in school history," according to the 2004 article on Bowdoin's Web site. As of 2004, he held the record for Northeastern University in hockey with the most career points (191) and the most single-season points (74) in history. He then went on to play for the National Football League from 1955 to 1958 for the Pittsburgh Steelers and Washington Redskins before accepting a job at Bowdoin as assistant coach for football and hockey.

Watson's athletic achievements earned him a spot in the Northeastern Athletic Hall of Fame, the Maine Sports Hall of Fame, and the U.S. Hockey Hall of Fame, accord-

ing to his obituary.

According to Ruddy, Watson never liked to be "put on a pedestal for his achievements. He was always incredibly humble, though also very

Dean of Student Affairs Tim Foster, who was Watson's neighbor for several years, agreed that Watson's competitive drive carried over to his gardening.

We spent many hours together in our nearly adjacent garden plots, and he was brutally competitive, though it was all great fun," said Foster. "The greatest competition centered on who could harvest the first red tomato. It got increasingly competitive over the years."

Foster recalled a time Watson. went so far as to attach a storebought tomato to Foster's tomato plant in order to give the illusion that the plant was thriving.

According to his daughter, Watson's love of sports, competition and hard work carried over to his parenting and home life, and he is described by Jordan as, "a great fa-

"We would go on family outings, and they almost always involved sports in some way," said Jordan. Jordan recalled playing hockey, swimming, and going to the gym as typical family outings

"He was incredibly family-oriented. He wanted all of us to reach our goals and be the best people we could be," Jordan said.

Watson's family was present on Sunday, along with hundreds of alumni and past players who came to attend the hockey games and hear the dedication. Jordan was there with her sister and three brothers, "reminiscing and having a ball.

"I can't say enough about the trib-ute. It was just unreal," said Jordan. We were all so moved to see how many people were willing to come back and how many people truly cared about Dad."

ill Obama continue Washington's legacy of scandalous affairs?

BY JULIA BOND COLUMNIST

This week, along with most Americans, I have politics on the brain. It's a big week for America, and the ush ering in of a new president got me thinking about our previous ones. ing collection of men by taking office.

I didn't actually realize how interesting our presidents were, however, until I started doing a little research into presidential sex scandals. We all remember Bill Clinton's infamous fiasco, but he's just one in a long series of presidents who dealt with public concern and speculation regarding their sex lives. Sex scandals endure the test of time, reach across party lines and affect popular and unpopular presi dents alike. I am simultaneously a bit disappointed and quite proud to say that sex scandals seem to be one of the most dependable and unchanging aspects of American politics.

Some of our most popular presidents were fans of extramarital affairs. Many people were surprised when Hillary Clinton stayed with Bill after the Lewinsky scandal, but what about Eleanor Roosevelt, who staved with Franklin despite discovering his affair th her secretary, Lucy Mercer, in 1918? The couple discussed divorce, but eventually decided to stay together when FDR promised to end the affair. However, when he died in 1945, Lucy was with him. Dwight Eisenhower is speculated to have had an affair with Kay Summersby, a woman who chauffeured him during World War II and later became his secretary. Summersby wrote a not-so-subtle memoir called "Past Forgetting: My Love Affair vith Dwight D. Eisenhower" from her deathbed, and rumors circulated that Eisenhower asked permission from a high-ranking military official to le his wife and marry Summersby. Unfortunately for him, it was apparently a no-go. JFK also allegedly engaged in affairs with a long list of glamorous

women, including Marilyn Monroe and Angie Dickinson.

More than one president has faced scrutiny regarding his sexual orienta-tion. Abe Lincoln has been speculated by many a historian to have had intimate relationships with men. Though at this point many of the facts are left interpretation of historians, apparently Lincoln's relationships with women were tumultuous at best, and he seemed to form close, lasting bonds with the men in his life. James Buchanan also faced extensive public scrutiny about his sexual orientation Though he was at one point engaged to a woman, she died before they were married and he spent fifteen years living with William Rufus King. Though it has never been proven that the two shared a sexual relationship, many of their contemporaries openly mocked the couple, referring to King as "Buchanan's wife," "Buchanan's better half," or "Aunt Fancy," according to historian James W. Loewen.

Presidents have also shelled out quite a bit of money because of scandalous sexual behavior. One of Warren Harding's alleged mistresses, Carrie Philips, blackmailed the GOP for a large sum of money when Harding ran for president. Grover Cleveland's 1884 bid for president was marked by the discovery that he had been pay-ing child support for a child he had fathered out of wedlock. In fact, his political rivals frequently taunted him with the chant: "Ma, Ma, where's my pa?" (After he won they creatively added, "Gone to the White House ha

Presidential sex scandals don't have to be particularly salacious. Even Woodrow Wilson's engagement became a scandal when he was president. He and Edith Galt had begun dating shortly after his first wife's death and had only been together for a matter of months before the proposal, which led some people to infer that the two had been having an affair or even that Wilson had murdered

Seeing list after list of the most public and popular presidential sex

scandals made me realize how strong the union between sex and politics is in the United States. People love sex scandals, and they love to make assertions and speculations about the sex lives of their leaders. Sex enjoys the unique position (no pun intended) of being simultaneously an agent for moral judgment and popular entertainment. People can call you a "bad person" for taking bribes or embezzling, but the Starr Reports wouldn't be nearly as exciting if they rendered in painstaking detail the process of forging a signature on a check or accepting a handful of hundred dollar bills. As much as people might call sex scandals reprehensible, yulgar or disgusting, they're also an integral part of American political culture and have been since its beginning. I'm not quite sure how I feel about that, but I do know one thing: I still can't get over how all of these men had enough time to have interesting sex lives. I thought that the President

Novelty boxers: The forgotten layer that can be hot or...not

STYLE BY DAVID YEE COLLIMNIST

This week, I present a list I've created. It begins with stripes and solids, flowers and dots, plain and plaid, then moves to penguins and polar bears, darts, dartboards, and dogs, and finally, "How the Grinch Stole Christmas." The patterns can be camouflaged or even glow-inthe-dark. Many patterns may be nmonly seen on a wide variety of clothing, from button-downs to waffle tees. For some, the list can go on to include smiley faces and "witty" sayings like, "Hold It Up High," "Wanna Pet My Monkey?" and "I Am The King!" When the list moves on to these other, more imaginative elements, there can be no doubt as to what the list catalogues: men's underwear. More specifically, boxers.

I've chosen this topic in the wake of the holidays for two reasons. Firstly, thinking back before the break (it's hard to stomach for me, too), my last column suggested lavering as a way to combat the bitter Maine cold. In that column, I concluded that a good outfit should make a point to reveal rather than hide the layers beneath. I should have written in that column (though I didn't really see a need to be explicit) that one layer in most cases, should remain covered-the underwear layer. Exposure is cute and arguably sexy at times, but for most, the time in the late nineties/ early "naughties" where pants were best worn around the mid-butt area has thankfully passed.

Secondly, we have just passed a giving season where, I believe, giving of the novelty boxer is more com mon than at any other time of the year. Indeed, I witnessed one-friend give another a pair of the aforementioned glow-in-the-dark boxers; hilarity ensued. I remember it was a

me "How the Grinch Stole Christmas" boxers over Christmas with the family; awkward moments ensued. With the wide variety of reindeer. and Santa Claus patterns on the Joe Boxer Web site I can, with much certainty, surmise that I was not alone in my awkward holiday moment.

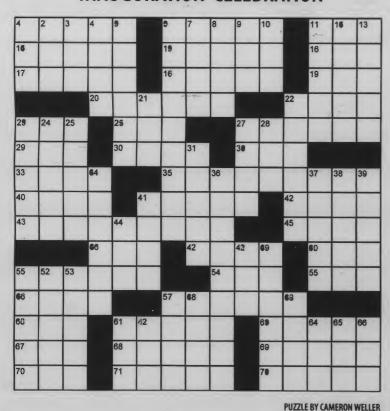

(Women take note: It may seem like this column is very male-cen tric, offering little information to the female readership, but there are probably a few female readers that have purchased or thought about purchasing boxers like this for male friends as a gag gift. I know from experience that, though they are not meant as serious gifts ever to be used, they are often uncomfortably forced into duty when times are rough. Or when said male runs out of laundry. At these times, those white boxers that my "friend" once gave me with another (male) friend's face silk-screened over the crotch make the inevitable shift from hilarious to embarrassing, if only to me

Esquire magazine offers some insight on this issue. Though it doesn't explicitly address the boxer short, it does offer a general style tip that anyone should work to take "The Portable Style Manifesto' states: "Something on your person should always make a statement, and that statement should preferably be 'Go to Hell.' Say it with socks, with a tie, or with a great pair of pants, and say it often." Ok, so that rule works toward explaining why I found "Santa's Middle Finger Boxer Shorts" for sale online while searching for this column. Still, the boxers with the devil horns in repeating patterns around the crotch seem to say, "my crotch is Hell" more strongly than "go to Hell."

Let's move one step less absurd to the most ubiquitous boxer-short pattern: plaid. Even Wikipedia has a picture of plaid boxers on the page for "boxer shorts." I ask, "What kind of message does the plaid pattern send?" Perhaps, "My jack?" Or, as my roommate articu-lated, "Yeah, to give the impression that under your pants, you're cut-ting down wood." But even he said, one pregnant pause later, "No wait. That sounds terrible."

In the end, there should be more thought that goes behind choosing the boxers for the day. I will never give up my polar bear boxers (because I think they look cool and Bowdoin-v), but I will never, if I can help it, wear those horrifying, male-friend's-face boxers again. Undoubtedly, there are some men that might enjoy the slogan "Wan-na Pet My Monkey?" emblazoned across their privates. I'd implore you to reach for something a bit more tasteful because, in the end, who is going to see the question and, therefore, be asked the question the most frequently? The truth is that you, the wearer, are only asking yourself if you "wanna pet your monkey." Think about that, and try to tell me I'm wrong.

ARTS & ENTERTAINMENT

Kolster's digital archives bring everyday life into focus

Assistant Professor of Art Michael Kolster never takes a day off. Since November 2002, he has posted one digital image each day on his Web site, the Daily Post, as a way to mark the passage of time and to experiment with a less traditional art

Born out of a desire to experiment with digital photography, the Daily Post has manifested itself in a unique entity.

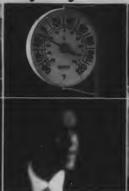

"When I started it I had an idea to see what it was like to work com-pletely in a digital realm," Kolster said. "I always wanted to figure out a way to do a project that would engage me in a daily process, along the same lines as a musician or an athlete. Making pictures is an activity that gains a lot from doing it all the time. I committed to doing this daily post as a way to engage in the medium and promise myself that right."

The site, which includes archives of the nearly 3,000 photographs that Kolster has taken, presents a new idea about the perception of time and photographic pattern.

"I try really hard to forget what I did the day before. The one thing I really try for in the project is to be as open as I can," Kolster said. "I'm kind of surprised by looking back at what's happened even a couple days earlier. I'm interested in the ways

PHOTOS COURTESY OF MICHAEL KOLSTER

DAILY FIX: Regardless of his daily inspiration, Assistant Professor of Art Michael Kolster never fails to upload an image to his Web site, the Daily Post. Above is an index of images from the past eight days

patterns evolve over time in the pictures when I'm not trying."

The result of this process is that

many photographs contain similar images but from a new point of view Kolster focuses many of his shots on home life, including his son and his family's environment. The effect is a sense of intimacy and comfort that arises from the natural day-to-day

Kolster has a particular process for selecting photos each day. Most often, he will take many photographs of the same subject and select the one he likes best. Occasionally he will take only one shot, or he will take many different shots of separate subjects and select from that group.

According to Kolster, using a digi tal camera is ideal for taking daily photographs.

"I've certainly come to appreciate the power and the strength of digi-tal photography. I carry the camera with me all the time," Kolster said. "I'll shoot and engage with subjects that I wouldn't normally. My choice of subject-matter has expanded immensely."

The ability to share photographs on the Internet instead of in a gallery motivates Kolster's project.

"What I like about it being on the

Web is that it adheres to the sense of the passage of time. Time is defined by the ways that we commonly measure time," Kolster said. "When I put it up on the gallery wall it wasn't as easy for that message to come

Although Kolster does not generally use the Daily Post as a resource for his own classes, his project has developed an international following in the art world. Used in lectures by professors in Arizona and California and adopted as a resource for multiple colleagues of Kolster, the Daily Post is a new way of looking

Kolster cites the uncommonness of the project as its source of suc-

"There is this idea in photography that artists are always looking for other ways to get their work out into the world," Kolster said. "This serves as a possibility to get work out into the world through unconventional

The Daily Post can be accessed at dailypost.bowdoin.edu. Interested viewers can subscribe to the mailing list located on the site and receive each day's picture by e-mail. The Web site also includes a link to KoIster's personal collection of projects.

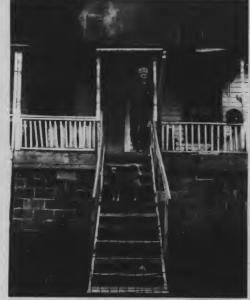

Photographs immortalize dying industries

MAXIME BILLICK

Guy Saldanha is gathering remnants of a quickly-disappearing America through photography. His exhibit, "Gathering Remnants," on display at Frontier Café until February 21, provides a glimpse into the backbreaking world of America's industry in an era where bodily labor is quickly becoming replaced by machinery. His photographs tell the stories of "hard rock miners who unearth the metals for electronics; weavers who thread the looms for mass-market fabrics; and butchers who slaughter the livestock for fast food and supermarket chains," according to the preface he wrote for

Saldanha, a graduate of the University of Southern Maine, was not involved in photography in college. He was a history major and loved drawing from a young age. He took art classes in college, but it was only after his studies that photography began to play a dominant role in his life. He claims that he was a "slow and deliberate" artist with a pencil or a paintbrush, but with a camera he "saw the potential for capturing images spontaneously." Additionally, with his interest in social history, he was enthralled with the idea that he would have the ability to ex plore, travel and meet people while simultaneously documenting them

Saldanha's inspiration for the ex-hibit stemmed from the fact that he had never traveled in the United States before and it was a way to see

SPONTANEOUS COMBUSTION: Guy Saldhana, a Maine native, has traveled the world to photograph industrious subjects for his current exhibition at Frontier Café, "Gathering Remnants."

merica's historic labor sites as an older way of life that was quickly disappearing. He also stated such inspiration also grew out of his interest in meeting people. Throughout the 18 years that he took photographs for the project, Saldanha stayed on oil rigs with roughnecks, followed tim-

ber cutters for several days at a time, saw the last steam-powered mill in the Pacific Northwest, visited the deepest gold mine shaft in the world, went underground to see New York City's water tunnels, and squeezed

Bowdoin artwork takes off in Portland's Space Gallery

Currently, passersby gazing into the windows of the Space Gallery in Portland see the work of two Bowdoin artists: Adjunct Lecturer of Art Randy Reiger and Visual Arts Technician Kyle Downs. While the two installations share a venue, they differ in content and medium

Downs' installation, "Host," consists entirely of plywood sculptures

"My work focuses heavily on form construction, and the preservation of raw materials," Downs said in an interview on the Space Gallery Web site. "Host' essentially is the parasitic trans-formation of plywood that feeds off of harsh living conditions." The crude material of the plywood stands in con-trast to the clean, bright, white walls of

Downs' exhibit also provides a strong contrast to Reiger's installa-tion, "Now-Your Spacecraft Will Be Your Peace." The installation is part of a grant from the Maine Arts Commisn and Space Gallery-funded project called "Windowkammers." The centerpiece of the installation is a "slightly charred and flight-scarred 1950s vintage single passenger spacecraft that is accompanied by a flight suit, boots, helmet and other ephemera that document its authenticity as an actual his-torical artifact," according to Reiger. The Space Gallery is not the first stop for the craft; besides being in space, it was featured at the Bonnaroo music festival last summer.

The text on the panels describing

the craft and the accompanying artifacts have been run through translaback into English, which gives it a Soviet flavor.

Reiger's art has involved the subject of space travel for some time now

"My spacecraft work began in 2001 as an experiment with the intersection of science and art," he said on the Gallery site. "My mentor while building the piece was an award-winning physics professor who, while bemused at the futility of the craft's perceived celestial ambitions, nevertheless held me strictly, as was possible, to task regarding a multitude of formal scientific concerns, at least as far as aesthetics were concerned."

According to the site, in the "Windowkammers" exhibition, Maine artists have designed and built large-scale dioramas to be installed in refront windows throughout Portland. These window environments. inspired by the dioramas found in mums, are three-dimensional models depicting real or imagined phenomena, people, places or events."

While it may seem almost too coin-

cidental for two Bowdoin artists to oc-cupy the same Portland gallery at the ne time, the occurrence was entirely by chance, according to Reiger.

"I have just recently begun to work with Kyle in my capacity as a Bowdoin adjunct art faculty and I cannot speak for his beautiful work in the Space Gal-lery window," he said. "It is actually a separate endeavor, and Kyle and I had not yet formally met when we w stalling our respective works."

Rodin's famed figures to grace Museum of Art

BY CAROLYN WILLIAMS ORIENT STAFF

The opening of "Rodin: The Knowledge of a Thousand Gestures" next Tuesday is a significant event for the Bowdoin College Museum of Art.

This exhibit is an important -one of the most important the museum has done," said Clif Olds, interim director of the muse-'We are very glad to have the exhibition. We don't always get the chance to exhibit works of artists from earlier centuries."

The exhibit will display bronzes by Auguste Rodin, a 19th-century French artist who excelled at depictions of human form and movement.

Rodin was the greatest sculpton of the 19th century," Olds said. "He was a sculptor who some experts have compared with Michelangelo, and he was very influenced by him in terms of his handling of the hu-

The pieces that will be featured in the exhibit have also been displayed at the Metropolitan Museum of Art and the Museum of Modern Art in New York City, as well as in several European and Asian countries.

They are pieces from Rodin's maquettes, or trial works in plaster that Rodin created before he died in 1917 that have since been turned into bronze sculptures by the Musée Rodin in Paris.

"When Rodin died, he left plaster castes to the French state with

museum to house his work," Olds . said. "He gave the museum permission to make more castes after his death"

"Unless a casting is verified by them, it is not considered an authentic piece by Rodin," Olds added of the Musée Rodin.

Of the eight pieces in the exhibit, Rodin created all but one in preparation for his work "The Gates of Hell," a sculpture depicting scenes from Dante's Inferno.

Although Rodin had plans to create the other two gates to Dante's realms of paradise and purgatory, he died before he could start ther and never saw "The Gates of Hell" caste in bronze. However, the reliefs in "The Gates of Hell" include several of Rodin's well-known works such as "The Thinker," "The Three Shades" and "The Kiss."

"The Three Shades" will be included in the exhibit at the museum. It consists of three six-foot-tall male nudes that would have gone at the top of the completed gate.

They are the centerpiece of our show," Olds said. "These figures represent the dejection and sorrow that would go into being sent

Another smaller piece in the show is a delicate hand that exemplifies Rodin's skill, according to

"What makes him important in the history of art is not only his art but that the way he created figures was vaguely related to Impressionist painting," Olds said. "He was more interested in the way light reflects off the surfaces of a sculp

Rodin focused on "the human body and the emotions it expressed, what it could say about the person on the inside of the body," Olds added.

The one exception to the exhibit is a bronze of a nude walking figure of St. John the Baptist, which was not part of "The Gates of Hell" maquette collection.

The sculptures will be on display in the rotunda of the museum. which, according to Olds, is the

"The rotunda was designed to exhibit sculpture, so this collection will be perfect for that space. It will make the space make sense," he said.

Olds believes that the exhibit will further the museum's goal of becoming an integral part of the educational goals of the College, and hopes that faculty and students alike will take the opportunity to view the exhibit.

"Rodin was a great artist who did himself draw inspiration from a great artist of the past," he said. Rodin was also inspired by the political history of France and incorporated historically significant events into his works.

"He does represent an important

part of history," Olds said.
The exhibit opens next Tuesday, Jan. 27, and will be on display until

COURTESY OF THE BOWDOIN COLLEGE MUSEUM OF ART GUARDING THE GATES: French artist Auguste Rodin sculpted "The Three Shades" with the intention of placing them at the top of his work "The Gates of Hell," a representation of Dante's "Inferno."

Red, white and blue beers combine for inaugural celebration

GEEK BY MAC EVANS

Welcome back.

Welcome back to campus, welcome back to Maine, welcome back to America. Regardless of where you've been for the past one or six months, you may have noticed some national changes over the past couple of days. What better way to celebrate the new semester in Maine and our new president then with some local brews with a patriotic

The following beers are not only themed, but all three are very solid beers. If one of your New Year's resolutions included getting into nice bottled beer since your roommate thinks you're a pansy for drinking Mike's Hard Lemonade, or if you just want to take the first steps away from alcohol from cans and toward beer snobbery, then any of the three should be helpful for your journey. All three below support your local brewers, and all three are available all year almost anywhere you can buy beer in Maine.

Casco Bay Riptide Red This is an Irish Red Ale from

Casco Bay Brewing, brewed in Portland, Maine, out of Shipyard Brewing Company. It's a nice, clean mahogany color with a malty smell. It has a combating combination of sweetness and a roasted malty taste not exactly blended together into one flavor. Their separate but simultaneous presence gives the beer a taste that is not overpowering but

MARGOT D. MILLER, THE BOWDOIN ORIEN.

STARS AND STRIPES: Casco Bay Riptide Red, Allagash White and Sea Dog Blue Paw are a patriotic combination ideal for ringing in a new era in politics.

reminds you that you're drinking a

It's viscous but paired with a perfect carbonation to bring out the flavor. Perhaps most importantly is the drinkability of the beer. Now, I'm not going to entirely disagree with the Bud Light definition of "drinkability" (great taste mixed with not filling you up), although I have my doubts about how drinkable Bud

Light is. This beer, like the ones mentioned below, not only has the solid taste that helps you enjoy your current beer, but includes nothing unpleasant that'll stop you from having the next one. When you stop is probably based on your other New Year's resolutions.

Allagash White I may have already professed my

love for Allagash White before, and Allagash Brewing Company in general, but this still deserves a wellearned spot in theme and in taste. Allagash White is a Belgian White Beer widely recognized in circles honoring microbrews, Maine brews, and Belgians. Just as Riptide Red is the best seller of Casco Bay, White is the favorite of Allagash consumers. It's a murky, golden-hued beer, almost like pineapple juice. The murk-iness is unfiltered wheaty goodness, which complements the mixed-in spices and somewhat fruity taste Nothing here is overwhelming but there is definitely a sense that something complicates the flavors. White is the priciest choice of the three. A four-pack will cost as much as a six-pack of another, but the lack of quantity is made up in the quality.

Sea Dog Blue Paw

This blueberry ale is a good way to start drinking beer. It is one of the best exemplars of a fruity beer because it tastes so much like the blueberry it claims to have. It is a sweet beer-good especially for a dessert-and the blueberry taste is apparent at the first sip and lingers pleasantly after you're done. The nutty qu'ench of wheat ale in the background balances everything out, and at times you might be convinced you're drinking a muffin. Sea Dog has tried other fruit nh. Sea Dog has tried other fruit wheat ales, including apricot (à la Magic Hat No. 9) and raspberry, but neither compares to the successful brew that is Blue Paw. Sea Dog has a brewpub across the bridge in Topsham which makes this beer easily accessible fresh and it is definitely worth the trip. For bonus points, you can also try to layer Blue Paw with a stout like Guinness, creating the delicious "Black and Blue" (à la black and tan)

For some of us this is our last semester. Let's all begin this last chapter at Bowdoin and this new chapter in history. Some red, white and blue ales seem appropriate, especially from Maine breweries. Stimulate the economy and stop global warming: drink local beer.

'Home' falls short of its Pulitzer-winning prequel

NOOK BY FRANCES MILLIKEN

For much of American history, the invocation of God remained an essential block of the country's foundation despite the separation of church and state. Marilynne Robinson recognized this thread and brought to life familial and religious relations in her Pulit-zer-winning "Gilead." The simple, beautiful story of an aging preacher in middle America was complete. Robinson, however, now returns with a sequel, "Home."

This novel concerns the same period of time in the small town of Gilead. The failing Reverend Boughton continues to pray for the return of his prodigal son, Jack. His dearest friend and the protagonist of "Gilead," Reverend Ames, is still suspicious of Jack, unable to trust the man who stole for no reason and made trouble as a child. Jack is a point of contention in their friendship; he is, in fact, a challenge for all who know him.

"Gilead" was from the viewpoint of Ames, who, knowing he is going to die, writes a treatise to his son; "Home" is told in the voice of Glory, the youngest of the eight Boughtons.

In the more recent story, Glory has returned home. Her retreat to the town of her childhood is prompted by a failed, lengthy engagement. She moves in with her father to care for him as he declines. When Jack joins her in their father's house after 20 years absence, she attempts to connect with him. Jack is full of secrets, beloved by his father and a concern to all. Glory and Jack build a careful relationship as the book progresses. The foundation is tenuous, built upon small confidences and a shared exclusion from life as it was anticipated.

Ames' first person narrative was exquisite in "Gilead." Through his voice, Robinson brought forth beautiful, simple moments from the daily life of an Iowan minister. The reader assumed a comfortable residence within Ames' head watching his son chase the cat and sifting through old memories that tell the story of his pious heritage.

"Home" is concerned with the events that directly involve Glory, giving the story a similarly singular perspective. However, Robinson is less adroit in third person. The more intimate details provided about Jack's return to Gilead in "Home" verge on superfluous in the face of the faultlessness of the prequel.

The use of the third person provides little entrance into Glory's loneliness, which is profound and worth understanding. Though her re-acquaintance with Jack supplies the possibility of insight into Glory, the reader only develops half thoughts about both brother and

Robinson employs a number of stylistic ticks, attributing them to particular characters throughout the text. These draw the reader up short and lend very little to the characters' developments.

I found myself rather annoyed by a number of the protagonists. Many who were intriguing in "Gilead" were disappointing in "Home." Old Boughton possesses excessive forgiveness for his wayward son and only polite acknowledgement of the good his other children perform. Ames is featured peripherally and his importance is negligible unless the prequel has been read. And Ames' wife, who I was entranced by in "Gilead," only surfaces to taunt the reader with her own mysteries.

Jack is not unlikeable, but it was difficult for me to grasp why he was valued above the seven other Boughtons. He is admittedly the worst of the lot. I can certainly understand his family's unconditional love for him as a brother and son, but the isolating loneliness of his nature hardly warranted the re-ceipt of more love. This is clearly an unsettled question for Jack. The Boughtons' profound reliance upon religious faith does not explain his elevated status.

While "Home" is not a disap-pointing novel in and of itself, the existence of its predecessor ultimately undermines its strengths. The affecting simplicity is lost in the sequel, and no new questions are answered.

INDUSTRIES

CONTINUED FROM PAGE 10

into some of the narrowest coal mines in the country.

'Just about everyone I met everywhere was very gracious and generous about sharing their time and experience with someone who knew nothing at all," Saldanha said. "One thing I learned that will never leave me is that although some consider these the most 'simple' jobs, the knowledge and skill that these individuals need for their work is extensive. It's easy to lose sight of that when we buy things at a department store. We forget that hands touched whatever we're buying. I now have a strong respect for how things are made."

Saldanha's photos, all black and white in the exhibit, are original in their reality and industriousness. They were snapped in textile mills, tanneries, steel foundries, paper mills, coal mines, forests, and shoe factories, among others. According to

Saldanha, he sought to communicate "individuality and character" and chose sites where "industry played a dominant role."

Since visiting these places, many of them have closed because of the relaxation in outsourcing laws, changes in trade patterns, and the recent economic downturn. Regardless of these challenges, people continue to enjoy their work, according to Sal-

"People take a great deal of pride in what they do. [I was lucky enough to see] different aspects of that work experience that we might not see otherwise," he said.

Saldanha commemorates these hard-working individuals who form the backbone of society.

"Despite relentless investments in labor-saving technology, for example, no extent of mechanical engineering has replicated the measured force in a quarryman's swing, the discrimi nating touch in a leather-finisher's final cut, or the artful control in a lath operator's grip," he said.

SPORTS

Women's basketball slams Mules in win

BY JEREMY BERNFELD

Two-thirds of the way through its season, the women's basketball team should be proud of its record, but has no time to rest on its laurels.

The Polar Bears stand at 13-3 on the season and have won an astounding 10 of their last 11 games. They have played superb defense throughout that stretch, holding opponents to under 50 points per game, and have gotten key contributions from all over their roster. However, they are about to enter the most important part of the season.

The team's last eight games will all be against NESCAC opponents and will decide the pairings for the NESCAC championships in February. The NESCAC champion receives an automatic bid to the NCAA Division III Tournament.

Bowdoin started its conference schedule off with a win, mashing rival Colby, 73-49.

The game against Colby was "the best complete game we put together all year and is a great place for us to be in going to the heart of the conference schedule," said senior tri-captain Maria Noucas '09. "It always feels good to beat a rival and there is just something even more special about beating them on their court when it counts as the conference game."

Junior forward Caitlin Hynes led the way for the Polar Bears with a career-high 24 points, seven rebounds and four blocks. Hynes played an aggressive game on both offense and defense and shined in the win.

"[Hynes] has stepped up as a very

solid force inside for us," Noucas said.
"Her potential is never-ending and I
think she is going to have a great run
in the conference against some great
post players."

The second of the section as when the Bertheller

With a renewed commitment to defense, the Polar Bears have ratch-

eted up their intensity every game.
"Coach [Shibles] really believes
that defense makes the difference in
every game and it's an attitude we
have really latched onto," said Noucas. "I think we are most successful at
our defense when we are aggressive
and communicate well."

Over Winter Break, the team posted wins against Maine Maritime, Wheaton, Hamilton, University of Maine-Farmington, Emmanuel, Clark and Colby. They fell just once in that stretch, a 64-59 loss at Bates in a non-conference showdown.

"The biggest thing we took out of that game was a need to play well for a full 40 minutes," Noucas said. "At one point in the second half, we were down 20 and we stormed back and came inches away from winning."

The Polar Bears will face two of their toughest tests this weekend at home. Today, at 7 p.m., they host rival Bates in a matchup of two premier NESCAC teams. Saturday, the team will square off against NESCAC rival Tufts at 2 p.m.

"Bates has great senior leadership and one of the best players in the league in Val Beckwith," said Noucas. "She just gets it done and loves playing Bowdoin. As a team, we need to defend their offenses well and we need to rebound. Bates is a big team and we need to be the aggressors, get some boards, and transition well."

MARGOT D. MILLER, THE BOWDOIN ORIEN

IN A FUNK: Junior David Funk hits a backhand during the Bears' 9-0 loss to Bates on Thursday.

Men's squash squished by Bates

BY ANDY BERNARD STAFF WRITER

The Bowdoin Squash Teams have played hard and met mixed success throughout the past two weeks. Both the men and the women spent the first week of January in Puerto Vallarta, Mexico, training both by drilling on the squash courts and by conditioning on the beach.

Upon returning to Brunswick on January 8, the teams began double sessions of training at Bowdoin in preparation for a dense period of competition.

On January 10 and 11, both teams headed to Yale for a tough round robin, competing against Cornell, Rochester, and Yale for the men, and Cornell, Stanford, and Yale for the women. Although both teams emerged winless from the weekend, the Polar Bears gained experience that would serve them well in matches to come by playing against toplevel players.

The next weekend saw the Polar Bears return to Yale for another round robin, this time competing against teams na-

tionally ranked near Bowdoin—the weekend presented many crucial matches for both teams. The women posted an impressive record of 4 wins and 1 loss on the weekend, defeating Vassar, Middlebury, Hamilton, and Arnherst, and getting edged out by Mt. Holyoke by a score of 7-2.

The men attempted to stay in the B-division of national ranking, competing against teams that finished last year ranked worse than Bowdoin, but presented a challenge due to the men's injury-ridden ladder.

The men began the weekend by dispatching USC easily by a score of 8-1, a victory that gave first years Brian Gladstone and Ryan Erskine their first wins at Bowdoin, Erskine's by a dominating score of 9-0, 9-0, 9-0.

The men's next couple of matches, against Middlebury and Hamilton, were both battles that they managed to win, by scores of 5-4 and 6-3, respectively. The middle of the lineup, featuring juniors Arun Makhija and Thai Ha-Ngoc and senior Robbie Lynn was vital in both victories, while junior Peter Cipria.

no supplied consistent leadership in the number 3 spot.

The men's team suffered from the heavy weekend of matches, and their losses to Franklin and Marshall and St. Lawrence late on Saturday and early Sunday were partly due to injuries that crippled the Polar Bears' lineup.

This past week, the men battled Colby

This past week, the men battled Colby on Wednesday and Bates on Thursday. The Polar Bears managed to keep their unbeaten streak against Colby alive by securing a 5-4 victory against the Mules. Wins on the ladder came from Lynn at No. 6, Ha-Ngoc at No. 5, Rahul Madan-Mohan at No. 4, and Andy Bernard at No. 2.

The men also battled Bates on Thursday night, playing hard with a crippled lineup, but eventually falling to the Bobcats by a score of 9-0. "We battled hard but nijuries really played their part tonight," said Makhija. "It's tough because they're such big rivals, but we hope to meet them again when we're at full strength." On Saturday, both the men and the women will head to Brown to play what should be tough battles.

Men's b-ball slips to Colby

BY DAVID SHAEFFER

The Bowdoin College Polar Bears entered last Saturday's game in Water-ville against the Colby Mules carrying a 10-3 record on the season, including a victory against the Mules, 67-60, in the season opener. However, on Saturday, in their NESCAC season opener, the Bears fell short, losing 65-55. The first 20 minutes saw the Bears shoot 62 percent from the field, while holding a 15-9 rebounding advantage. Despite the Bears holding a 21-13 advantage, the Mules came back to go into the locker rooms with a 32-31 lead.

In the second half, Colby never relinquished the lead, despite continuous efforts by the Bears. With 6:19 to play, a Paul Sellew '10 three-point shot brought Bowdoin with within one point at 48-47. However, as they were able to throughout the course of the game, Colby came up with an answer. Colby's Justin Sherman connected on clutch baskets to keep the game out of reach. Down the stretch, Colby extended their lead from the free-throw line, finishing 12-16 in the second half.

Junior Mike Hauser led the Bears with 12 points and eight assists. Senior captain Tim Lane and first year Will Hartley both had eight points. Entering conference play, the Bears held a perfect 10-0 record at home, while splitting the six games on the road. On Saturday, the Bears were welcomed by a hostile, conference crowd, a sight Bowdoin expects to see throughout the remainder part of the season.

"It is always hard to play on the road. As our record shows, we definitely thrive off the home crowd. All teams, especially in this league, play well at home, making each road game an even greater challenge," said Lane. Despite the tough league schedule, the Bears believe that their road record comes down to execution.

"Our struggles on the road I believe are a result of a few crucial mistakes towards the end of these games. The strength of our team is hard-nosed defense and execution on the offensive end," Lane said. "All of these losses were fairly close, and if it were not for a few lapses, I feel we would have come out on top."

Over Winter Break, the Bears were 3-1, with victories against Plymouth St., Thomas, and Maine-Farmington. Their lone loss came against St. Joseph's (ME). The Polar Bears continue conference play this weekend. At 6:30 p.m. tonight, the Bears travel to Bates and on Saturday, to Tufts. The Tufts match-tip's scheduled for 2 p.m.

Men's track opens new year with victory

BY CHESTER ENG

The men's track and field team began 2009 on a high note with a victory in a home meet on Saturday. With 81.5 points, Bowdoin defeated the University of Southern Maine, the defending state meet champion, and Brandeis, a team with a fast distance lineup, in impressive fashion.

The Bears scored a total of 81.5 points, over the Huskies, who scored 63.5, and the Owls, who scored 36.

Damon Hall-Jones '09 and Luke Fairbanks' 09 led the way with a pair of wins each. Hall-Jones won two tightly contested races by claiming the 55-meter by .01 seconds and the 200-meter dash by .03 seconds. Off the track, Fairbanks convincingly won the weight throw and shot put competitions with throws of 14.80 meters and 14.31 meters, respectively.

"The seniors have given us great leadership this season," said Coach Peter Slovenski. "They scored 34 points. Ike Irby '09 and Mike Krohn '09 scored in three events."

Krohn had an exceptional day with three second places in the 200-meter race, 55-meter hurdles, and the pole vault.

The 600-meter was perhaps the most exciting race of the day. Alex Jeanty '11 led for 550 meters before Riker Wikoff '12, Irby and USM's Tim Even all closed in for a tight finish. The four runners finished within 1.7 seconds of each other with Even finishing in first, followed by Irby, Jeanty and Wikoff, respectively.

Unfazed by the grueling 600-meter race, Irby and Jeanty came back to help Bowdoin to a first-place finish in the 4 x 400-meter relay. Along with Kyle Hebert '10 and Zach Winters' 11, the team ran a noteworthy 3:29.76 time.

" In addition to the 4 x:400-meter relay

squad, the Polar Bears got first-places finishes from Winters (400-meter run), Thompson Ogilvie '10 (one-mile run), and Chris Martin '12 (high jump).

Just the second meet of the season, this win comes after a second-place finish at a meet against Southern Maine and St. Joseph's College back on December 13, 2008.

After a strong showing this past weekend, there is much reason for the Bears to be excited for the rest of the season.

"This team did a lot of training during the vacation," said Slovenski. "It will be rewarding and fun for the athletes to improve through January and February because of the hard work they did in November and December."

The Polar Bears will travel down to Waltham, Mass. this coming Saturday and look to build upon their initial success at the Brandeis Invitational, where they finished first out of 11 at last year's meet.

MARGOT D. MILLER, THE BOWDOIN ORIEN

WATSON WIN: First year Jordan Lalor takes the puck down the ice in the Bears' 8-3 rout of Williams during their first game in the new Watson Arena.

HOCKEY

CONTINUED FROM PAGE 1

Williams responded in the second with a power-play goal of their own at 14:17.

However, the Bowdoin offensive unleashed in the third period ultimately proved impossible for Williams to contain.

Kyle Hardy completed his hat trick with 6:10 elapsed in the third as he drove home junior Ryan Blossom's intelligent pass from behind the net.

telligent pass from behind the net. Hardy hit his fourth less than a minute later at 7:04.

Blossom grabbed a goal of his own at 16:05 as he hustled to finish a rebound from his own shot.

Junior forward Colin MacCormack capped the rout with Bowdoin's eighth goal, assisted by Hardy and Blossom.

Nerland stopped a total of 25 shots en route to the historic first win in Watson Arena, including some glove

saves early in the game.

Although he amassed a whopping four goals and two assists, Hardy emphasized the role of his fellow Bears in

the win.

"I was playing with new line mates,
Brendan Reich '11 and Jordan Lalor
'12, so it was kind of cool playing

with two guys that were both under five-foot-ten so we're all kind of small buzzing around," said Hardy.

Coach Sidney J. Watson, the arena's namesake, was no stranger to success. As coach of Bowdoin's men's hockey team, he boasted a record of 326-210-11 in 24 seasons. He guided the team to playoff appearances every year save once, and won the ECAC Division II Championship in 1971, 1975, 1976 and 1978. (See story, page 5)

Surprisingly, considering Bowdoin's performance Sunday, the trouncing delivered to the Ephs was only Bowdoin's first win in five games.

The Bears struggled to maintain the momentum gained at the beginning of the season over Winter Break, falling to Salem State College in an overtime loss in the final of the Salem State Holiday Tournament.

The Bears went on to lose to New England College, St. Anselm and Middlebury, respectively.

Bowdoin currently sits in sixth out of 10 in NESCAC, with a conference record of 4-4-1.

Hardy cites the work of Coach Meagher and his staff in halting Bowdoin's slip.

slip.

"After a big loss to Middlebury, the coaches really got on us on Saturday and explained we had to really turn

things around," he said.

The opening of the new arena was commemorated with a ceremony featuring President Barry Mills, James W. MacAllen '66, Robert F. White '77, and Director of Athletics Jeff Ward.

Among other things, the honored guests emphasized not only President Mills' leadership in constructing the new arena, but also the excellent work of Meagher during his 26 years with the men's hockey program.

"I guess I would say I had very high hopes and the weekend exceeded them," said Ward. "The rink exceeded them."

Rather than host the opening ceremony before the women's hockey game, the first of the afternoon, it was instead held between the two games.

"We wanted to have the dedication ceremonies at the time when we were likely to have the most people," said Ward. "Going between games allowed us to connect with those just going to the women's game or the men's game."

Bowdoin travels to Connecticut College today and will play Tufts in Boston Saturday afternoon. On Tuesday night, the Bears travel north to Waterville, where they will seek to sweep the Colby Mules in the second installment of the NESCAC's most heated rivalry.

Swim teams make a splash with sweep

Men's team dominates

Bates; women just

edge out Bobcats

BY KEITH HEYDE

Though they hardly had a long Winter Break like their classmates, the swim teams certainly had an eventful few weeks.

Returning on December 29 to commence the second phase of its competitive season, Bowdoin swimmers from across the country converged in Brunswick armed with determination.

From New Years' celebrations to community dinners with the Friends of Bowdoin, the swim team shared many experiences outside of the water that helped forge a closer-knit group.

In the pool, training reached its peak intensity. With yardage and speed work at its highest, the swimmers buckled down in order to prepare themselves for a meet against rival Bates on Saturday, January 17.

A strong early performance by Bates in the women's 400-yard medley relay and 1000-yard freestyle presented a large challenge for the women's team.

However, battling back with first place finishes from Caitlin Callahan '11 in the 100- and 200-yard breastroke, Allison Palmer '11 in the 50- and 100-yard freestyle, Allen Garner '12 in the 200- and 500-yard freestyle, Megan Sullivan '11 in the 100-yard butterfly and Emma Chiappetta '11 in the 200-yard butterfly, the women's team eventually edged out the Lady Bobcats with a score of 147-142.

Sullivan spoke about the team's resilience. "After the first two events you could sense a mixed reaction of excitement and anxiety," she said. "However, it was exhilarating to see us pull together and rally."

On the men's side, the competition was not as tight. Although the Bates men's team has improved dramatically due to an influx of speedy first years, the Bowdoin men got the job done, winning the meet 179-105.

The men's team's victory was highlighted by wins by Mac Routh '12 in the 100-yard Butterfly, Max Goldstein '09 in the 400-yard IM, Zach Perez in the 100- and 200-meter breastroke, Nathan Mecray '12 in the 50- and 100-yard freestyle and the 400 among other numerous victories.

Although the men's side was not as close, inspiration was easily found in the ranks of Bowdoin males in an unlikely form.

For years, Ian Wandner '09 has battled with chronic shoulder injuries. Last November, these injuries took a turn for the worse, rendering Wandner unable to practice at the normal capacity with the team for most of his senior year.

Doing what he could to stay in shape while nursing the injury, Wandner has been attending practice in a quasi-coaching capacity in order to assist the team in any way he could.

On the morning of the Bates meet, little had improved. The shoulder injury still rendered him unable to compete in his normal butterfly events. Yet, out of this shroud of disappointment blossomed an idea.

Despite not diving in any formal competition for over seven years, Wandner quickly read up on the NCAA diving manual and in less than an hour he had brushed up on six legal dives.

With the confidence that only a senior can have, he dove during the Bates meet and astounded everyone by winning the men's onemeter diving competition. Although Wandner's points

Although Wandner's points were not necessary for the Bowdoin men's victory, his performance created a rallying point inspiring later performances in the Bates meet.

The Bowdoin swimmers look forward to challenging University of Maine next Saturday in Orono, and then hosting Wesleyan and Trinity at home the following week.

"The team did exactly what they needed to do to win the Bates meet," Coach Brad Burnham said. "I was very proud of their efforts and it made me excited about the next few weeks."

Women's track out-runs Brandeis

BY ANNIE MONJAR STAFF WRITER

As captain Kelsey Borner '09 won the first event of the day, the weight throw, at the women's indoor track meet against Brandeis University last' Saturday, the Polar Bears knew they were in for a day of outstanding perfor-

The women weren't disappointed, as Borner's win preceded a series of victories by Bowdoin, who defeated Brandeis 76-64.

The team's seniors posted many of the first place finishes on Saturday in cluding Borner, Annie Monjar '09 placed first in the 3K and Jessica So-kolow '09 won the 800-meter run.

Captain Ali Chase '09, who spent last year's track season in recovery from an ACL surgery, dominated the 600-meter dash field by nearly nine seconds.

"I was extremely impressed with Ali Chase's 600," Borner said of her co-captain's performance. "She is one of the hardest working people I know, especially through her recovery process, and it was ""

work pay off." Head Coach Peter Slovenski was also impressed with Saturday's performances.

"The women's 800 was the most exciting race of the day," he said after the meet. "Grace [Kerr 11], Jess [Sokolow], and Chantal [Croteau '12] worked well together. They made intelligent moves and showed a lot of guts in the last lap."

Adding to the string of victories was Molly Duffy '11, who took the 1000-meter run in an exciting neck-to-neck final stretch, Chris Head '11, who won the pole vault, and the 4x200-meter and 4x400-meter relays, which took first blace.

Two of the team's first years posted two first-place finishes: Elsa Millet in the 200-meter dash and Laura Peterson in the long jump.

Millet's performance followed another spectacular showing at the December 13, 2008 meet against University of Southern Maine, where she finished the 200-meter race in 26.48 seconds to set a new school record.

The Bears soundly defeated the Huskies at the home meet, scoring 80 points against USM's 42, and sweeping almost every event. Victories by Emily Barr '12 in the 55-meter dash, Alex

Peacock-Vallada '11 in the 800-meter run, Lindsey Horowitz '12 in the 3K run, and Anna Ackerman '12 in the mile helped solidify Bowdoin's victory.

The meets bode well for the team's future championships meets, which begin with the State Meet on February 6.

"As expected with a young team, all we really need now is college meet experience," said Borner of the team's first performance. "I know nerves were a factor to most people, understandably, and I'm sure we'll all get better at that as the season progresses."

the season progresses."

The team will have another chance to practice their talent and poise with Brandeis again this weekend, at the Brandeis Invitational, which will host 10 teams.

"Hopefully, this larger away meet will motivate everyone to work hard in practice, since there will be more competition at Brandeis and at the bigger meets coming up," said Chase of the team's approaching competitions. "But I think everyone is ready for the challenge and competition, and as long as we get fired up and keep our sights on our goals for the big meets, we'll have great success." The only investment you can count on: Pro sports

JEREMY IS BERNING COLUMNIST

Say what you want about sports, but they'll come through for you when you need them the most.

You can say it's just a game and ou can shake your head at the diehards in the facepaint and the full costume and without a shirt.

You can disapprove of the billion-dollar stadiums and the taxbreaks and the miserly owners. You can even hate fantasy drafts, playoff beards and rally-caps. You just don't get it.

The world may be sliding precariously toward the next great depression but you wouldn't know it if you looked on the turf/field/ice/court, and I say that's not entirely a bad

When Joe the Plumber and his buddy, Average Pete, sink wearily into their easy chairs after a hard day's work looking for jobs thanks to stupid moves made by greedy executives far from Main(e) Street, they have a choice: flip on CNN to check if their retirement savings are worth nothing or next-to-noth-ing, or turn on ESPN to see Kobe and Lebron battle mano e mano for honor, dignity, and respect.

Sure, Kobe, Lebron and athletes like them are some of the richest stars on the planet, but sometimes they have more in common with Joe and Pete (and Sally and Sue) than they do with others in their tax bracket.

Last Sunday's AFC Championship game between the Pittsburgh Steelers and the Baltimore Ravens wasn't just about Joe Flacco and Hines Ward, it was about redemption for two cities that have fallen on hard times and whose prospects look worse than those felt by Willis

McGahee after the game.
While the headlines on the front page have only been getting worse, those on the sports pages have surpassed all expectation. When it's nardest to find something positive, and when we need it most, the world of sports always comes

through in the clutch.

Many would say that April 15 is the most important day in April. Tax day this year is certain to bring more layoffs, foreclosures and heartache. April 5, however, will only bring hope, dreams and rebirth. Just when we need it, ten days before tax day, the baseball season starts

Sure, sports aren't perfect. They're filled with millionaire malcontents without perspective, lawbreakers without morals, and leaders without fidelity. But so is your local church; at least sports are fun.

Take February's Super Bowl. What does the world need more right now than redemption for a broken-down ex-factory town like Pittsburgh, thanks to their Steelers? How about evidence that teamwork can overcome great odds? How about proof that faith and hard work can go a long way toward success? How about the long writtenoff and perpetual doormat Arizona Cardinals winning a Super Bowl? Bottom line: the world of sports has stepped up to the plate.

Pundits the world over are lamenting the Fall of Detroit. While the politicians slap car executives on the wrist, to the detriment of only our friends Joe and Pete, the sportswriters have been focused on the Lamentable Lions who have just completed the NFL's first 0-16 season. But the difference is that the Lions will get better.

Sports have always been significant, and they probably always will be. While President Obama's inauguration may be the most important event to happen this century, Jackie Robinson's first game on the diamond was one of the most seminal events in the last.

For many, President Obama's election symbolized change for an organization headed in the wrong direction. For many, Obama repreents the fruition of a decades-long

Obama brought many people across the country, across racial lines, and across class divisions, together for a common purpose.

No offense to the new president, but don't sports do that every week-

Women's hockey exits Dayton in style

BY EMMA POWERS

Despite a rocky start to their Break competition, the women's ice hockey team finished strong, defeating Wesleyan 3-0 in their last game in Dayton Arena, and tying with Hamilton 1-1 at the opening of the Sidney J. Watson

Overall, the Polar Bears went 2-4-1 over break, winning games against Sacred Heart and Wesleyan University.

"Winter Break is always a great time to bond as a team," Shana Natelson '10 said. "Though the results may not have been what we wanted, we did a lot of good things and have been getting better every

Kelly Keebler '10 also reflected on the improvement the team made over break.

"Although we didn't win as many ames as we would have liked, I think that our team has gotten really comfortable with our systems and we did many great things and played as a unit," she said.

For the Polar Bears, the highlights of the break were defeat-ing Wesleyan in the last game in Dayton Arena and getting to play their first game in the new Sidney J. Watson Arena.

The high point of the break was definitely our win against Weslevan because we were extremely happy and proud to end the Day ton Arena with a well-deserved win," Keebler said.

Similarly, even though the Bears walked away with a tie against Hamilton last Sunday, they remained positive about the special day, and excited about the rush of playing in the new facility.
"Our team strives for perfec-

MARGOT D. MILLER, THE BOWDOIN ORIEN

HAMILTON HANGUP: Dominique Lozzi '12 guards an opponent during the 1-1 tie with Hamilton.

tion, so tying Hamilton was a bit disappointing," Keebler said. "But we played really well, and games like that are the reason we play

hockey."
"The fans at Sunday's game were amazing," Natelson added. "It's a great feeling to have that many parents, alums, community members and current students all cheering on your team."

This weekend, the team will host Amherst and Connecticut College. The Bears will play Amherst on Friday night at 7 p.m., and will take on Connecticut College Sat-

"After this weekend, our team definitely wants to continue playing with pride and giving everything we can," Keebler said.

Natelson also commented on the team's focus heading into this weekend's competition.

"We had a great weekend...so we're using that momentum to really prepare for this weekend's games. The last time we played Amherst and Conn, we were a very different team, and I think every one's ready to step up and bury some pucks."

Sports Shorts

Pearson wins her second Coach of the Year award

After leading the Bowdoin Field Hockey Team to its second straight National Title, coach Nicky Pearon was named the Division III National Coach of the Year.

Coach Pearson is the eighth Bowdoin coach of any sport to be honored with the award, the third Bowdoin coach to win it twice, and the first to win it in consecutive years (2007 and 2008).

Coach Pearson is one of the most successful Bowdoin coaches of all time with an overall 202-41 (.831) record in her thirteen seasons as head field hockey coach. Under Pearson's watch the Bowdoin field hockey team has won five NES-CAC Championships, been to the NCAA "Final Four" Tournament four times, and secured Bowdoin's

first two National Titles. In addition, the 2007-2008 field hockey teams and Coach Pearson will go into the NCAA record books as the fourth school in Division III history to win back-to-back National Championships.

Pearson's devotion to the success of each individuals on the team has made her a favorite among her

"Nicky teaches you how to play to your potential," said senior tri-captain Julia King. "We all improved so much over four years because of her ability to improve our weaknesses while continuing to develop our strengths. Her individual attention made each of us much better field hockey players, but her emphasis on team and the role of each of us within the team system also greatly contributed to our success

-Compiled by Katherine Pokrass

OPINION

In our thoughts

resident Mills' family is undoubtedly in the midst of both difficult and exciting times. Will Mills' emergency operation for a brain tumor came shortly after Karen Gordon Mills' appointment as the head of the Small Business Administration. As the Mills embark on this challenging journey, we at Bowdoin will keep them all in our thoughts.

Ms. Mills' name has recently appeared in headlines across the country, and we applaud her decision to step up to a position of rigorous civic service. At Bowdoin, we are proud that such an important member of our community has chosen to serve our country as well.

But, the excitement surrounding Ms. Mills' appointment has taken a backseat in light of her son's health. Though President Mills informed the campus that Will's long-term prognosis looks good, our hearts go out to Will and his family as he faces this struggle.

Many of us know Will and Karen personally, but all of us know them as members of a family that is wholly dedicated to this College community. As the Mills move forward to confront the challenges ahead, we hope they will find the strength to do so from each other and from all of us here at Bowdoin.

Martin Luther King Day

lthough business went on as usual at Bowdoin on Monday, a certain awareness of the importance of Martin Luther King, Jr.'s work in civil rights pervaded campus. This year, the national holiday served as an appropriate prelude for the inauguration of our first African-American president. At Bowdoin and everywhere, Americans recognized how Dr. King's leadership laid the groundwork for an event that many of our parents would have never dreamed possible in their

Though we acknowledged MLK Day with personal reflection, participation in College-sponsored programming was minimal. Few students paused to watch the film that was screened in the Union, and the program held during the evening in the Chapel attracted only a small crowd of students. Because active celebration of such an important holiday was so low, it is time to rethink how we mark MLK Day at Bowdoin.

As we grow more diverse as a College community every year, it becomes both more exciting and important to break down barriers on our campus. We've all experienced little moments at Bowdoin where our community came together spiritedly or unexpectedly-whether it was cheering for the Polar Bears when they faced Colby's hockey team or chanting with hundreds of students on the Quad on the night of Obama's

What if we used MLK Day as a celebration of our own community and diversity? It could be the perfect opportunity for a campus-wide "Dinner with Strangers," a second Common Good Day, or a winter carnival. We should make the day reflective, but also fun. MLK Day shouldn't be a holiday that is only acknowledged silently and individually. Instead, let's get together, connect with strangers in our own community, and have a good time. That would be true recognition of Dr. King's spirit.

BOWDOIN ORIENT Lost in transition: Learning to live abroad

I recently received an e-mail from my junior friend, Kirsten, after her first week abroad in France. The subject line read simply: "Aaaaah-hhhhhh." She liked her host family, she loved her program director, the students were great—but she wanted

Kirsten reported shaking so uncontrollably that she had no appetite for croissants and fresh apricot confiture. Her return in May seemed like an eternity too hard to face. "Well," I thought, "if she can't revel in French pastry, something is cer-tainly wrong." Or is it?

Poor Kirsten. She'd met me for

lunch mid-December with a notepad and pen, eagerly scribbling away while I relived the glory days of my n semester in Grenoble, France. I realize now that I'd completely forgotten my first month-when the cab driver charged me ten euros for a trip that should have cost six. When I had to convince a French physician o spoke absolutely no English that oui, I was aware of my chronic heart murmur and non merci. I did not need to be rushed to a cardiologist. Think up a hand gesture for that one. But those are merely logistical frustrations.

The more troubling emotion is the inexplicable unhappiness. Despite the sidewalk cafés, the wine with dinner and the glorious sunsets over the Alps, you feel utterly alone. Neither Kirsten nor I could pinpoint the exact source of our anxiety. But I

By my junior fall, I knew how to "do Bowdoin." I'd chosen my major; I preferred the sixth floor of the stacks when writing papers over five pages; and I frequented Moulton for lunch, but Thorne for breakfast and dinner. Such rhythms are a testament

It took me a full month to realize that to move forward. I would have to erase myself, to cleanse my being of my calcified traditions. The result was a terrifyingly blank slate.

to true acclimation, but they are also dangerous. They unconsciously infect the mind, leaving us cripplingly

afraid to try new things. Fortunately, going abroad is the best medicine. You are forced to confront the New at every turn. Everything from going to the bank to taking a shower to changing your class schedule can become a stressful activity. Upon arrival in Greno-ble, all comforting validations were brutally ripped from my person

Even the cultural and academic norms with which I had grown up were no longer viable. When I wrote my first dissertation, I almost tore up my first draft in frustration when my French professor told me that my structure wasn't complex enough wasn't fluid enough, wasn't French enough. "Well, I'm not French," I wanted to tell him. "And this essay would have been just fine at Bowdoin."

It took me a full month to realize that to move forward, I would have to erase myself, to cleanse my being of all my calcified traditions. The result was a terrifyingly blank slate. Truths at the root of my existence were, in France, no longer truths. I had no object, word or idea by which to define myself. I felt something of Emerson's "transparent eyea passage that I had read my sophomore year but had not understood until now. Yes, Kirsten. This rebirth just might make one shed a few tears

In her e-mail, Kirsten pleaded for advice. But I cannot give her a mir acle cure. The remedy is an intense mental exercise of living moment by moment, adding one detail at a time to your tabula rasa. You slowly rewrite your life with only individual words, then with sentences and finally paragraphs. I began to estab lish new rhythms. They were trivial at first, like buying bread from the same boulangerie, but they soon became grander, like earning a place on the Université de Grenoble fenc-

One day I woke up, ate breakfast, went to literature class, lunched with a French friend, sat in on a film screening, bolted to fencing practice and came home just in time to read my 7-year-old host brother his bedtime story. Uneventful, you say. But it was the most empowering day of my life. I had successfully estab-lished my own niche elsewhere—far from family, friends, Bowdoin and all of the previous identities that I had taken for granted.

So, Kirsten, I don't think anything is wrong at all. Your distress is right on schedule. And the exercise of rewriting yourself in a foreign language will leave you with an education that you can't get in the classroom. And it will not be the last time you will feel lost in transition.

With graduation nearing, I know that this self-effacing metamorphosis is imminent yet again. This time, I am no longer so afraid. A newfound confidence in my own plasticity has assuaged many of my apprehensions. As I prepare to leave the college that I have come to call "home," I can't help thinking that my first miserable month in France may have been one of my most valuable experiences abroad.

Co-ed bathrooms at Bowdoin would extend privileges to all

BY STEVE ROBINSON COLUMNIST

As you may well know I spent last semester attempting to provide entertaining and objective political analysis to the students of Bowdoin College and it is my pleasure to inform you that I will continue my work as a columnist for the Orient. You can consider me the Fox News of Bowdoin. Just like Fox I will be fair and balanced but due to the overwhelmingly liberal atmosphere, I will appear polarizing. And as always, I will have my critics who attempt to display me has a hatemonger, a bigot and yes, even a "Republican twaddle." However, I can assure you that my goal in writing these articles is not to draft vicious hate speech but to stimulate intelligent debate that focuses on facts, truth and reason. logical diversity on campus. So it is with that spirit that I now reveal the incongruence between the idea of progressivism and its applica-

The intention of progressivism to escape the dangerous logical fallacies that arise from dichot-omy-style thinking. In doing so, Progressives seek to transcend narrow-minded conceptions of ideology such as liberal or conservative. As such, one would expect a progressive institution like · Bowdoin to understand that gender is not an either/or attribute and that policy should be made accordingly. How ever, the current socio-structural restroom system utilized by the college indicates that this is not

It's been many years since the United States has rid themselves of the racist segregation laws however, segregation based on gender has remained ubiquitous in sociIt's been many years since the United States has rid themselves of the racist segregation laws, but segregation based on gender has remained ubiguitous in society. And it has done so

through our bathrooms. ety. And it has done so through our

As I sit here on the third floor of the library wobbling my knees and holding back the morning's coffee, I am dismayed by the fact that, in order to relieve myself, I will have to venture to another floor of the library. This is not because the third floor has no bathroom-it does-but because I am not the right gender to use it.

While this example may seem frivolous, consider the situation of an individual whose gender is not so clearly or easily defined. By limiting bathroom selection to followed a pattern of inside-thebox-thinking that is contrary to a progressive society and major changes are required to ensure that all individuals are treated equally at Bowdoin, regardless of gender.

So how can this discrepancy between attitude and reality be resolved? Constructing more bathrooms for a third gender type seems logical, but that is yet an other inside-the-box idea that will increase the college's costs and lower sustainability. Here's the real fix and the best part is that it won't cost the college a single dime!

Rather than develop an unneeded, and costly, surplus of bathroom facilities, Bowdoin College should fundamentally change the way it views going to the bathroom by ceasing the use of segregationist bathroom policies. This simple change would require only the removal of gender specific bathroom signs and would result in a more

Bowdoin College.

In social houses and dorms across campus, co-ed bathrooms have been demonstrated to just as well as segregated bathrooms. In these existing co-ed bathrooms there are rarely disputes caused by inter-gender bathroom mixing; so there can be no argument made for the safety of one gender or another.

This bathroom system will increase the sustainability of the college while extending equal privileges to all genders. Here at Bowdoin we are civilized; we are ahead of the curb; and we are progressive. Thus, our policy should seek not to create further division but to unite our society on com-

Now that change has finally come to America. I can only hope that someday I will be allowed to pee in the third-floor bathroom of H-L.

Post-break greetings little more than 'fun-stomping'

BY JOE PACE

We have entered one of the five terrible periods of the Bowdoin student experience: the return from Winter Break-the snowy relative of the other four breaks. With spirits high, ready for a fresh semester of studying and reacquainting themselves with self-purpose, rested students brighten the already white campus with toothy grins. But this eagerness, unbeknownst to those who wield it, has the potential to transform Moulton and Thorne into minefields for those who are less than enthused to be back

You might be wondering: Moulton and Thorne are minefields then what are the mines? And, if I were capable of listening to and communicating with thoughts, my telepathic response would be: Mines are people who have no business

asking you how your break went. Herein, I will refer to this activity as fun-stomping.

We all develop our default answers ("I slept a lot," or "I just hung which are generally recognized as code for something like, 'You shouldn't have asked me because I met you once, and only because I asked to back-cut you in the line for the Ladd bathroom freshman year." But seriously, by asking eone you really don't hang out with how her break was, you ultimately put an awkward emphasis on how little you two see each other.

The dining halls are undoubtedly the campus' fun-stomping hubs. I challenge anyone to collect an entire meal and avoid this form of interrogation within his first five days on campus. I have taken the chal-lenge and have never succeeded.

I don't mean to sound like a jerk: understand that it is simply a kind-hearted gesture that is widely

But as a community we need to accept that after a week of spraying default answers this way and that, untimely fun-stomping shifts from being a friendly annoyance to hostile affront

For this reason, I would like to suggest a few potential regulations that could clarify the line between pleasant and bothersome:

1. No stomping beyond the fifth day after the dining halls open.

2. Anyone unwilling to participate in fun-stomping is to purchase and sport a reversible shirt created by my colleague with "Summer break was great...very relaxing" on one side and "Winter break was great...very relaxing' on the other.

3. No stomping unless the encroachment is performed while both parties are seated. No one wants to be the person who was asked about break in passing and uncomfortably continues the conversation in a talking/yelling backpedal from twenty feet away.

These are just a few ideas; feel free to create your own.

To me, the most incredible aspect of this phenomenon is how rarely people discuss it even though no one is safe from it. I feel the more we discuss, and hopefully resolve, this issue, our conversations about break will become more meaningful and welcomed.

Let's not intensify awkwardness. We all know whose breaks we care about and whose we don't want to ever come close to hearing about, not even kind of a little bit. Be real; be kind; use discretion; and be cautious when it comes to funstomping. Bowdoin will be a more comfortable place to call home.

Bowdoin costs more than just tuition signs of wealth. Many Bowdoin stu-So what are we supposed to do? ents regularly have the chance to travel to exotic locales without ever really questioning the opportunities

Bowdoin provides incredible opportunities to its students regardless of their race, religion or economic stratum. With the recent decision to abolish loans and move completely to a grants program, the opportuni ties that Bowdoin College provides to those unable to handle its financial burdens have increased monumen-

BY SARAH PRITZKER

But while our official policy is one that represents a desire to integrate recipients of financial aid into the student body without any marked differences, the culture at Bowdoin does not accomplish this same task quite as seamlessly.

Everywhere you look there are signs that mark those with more wealth from those with less. It doesn't take a label savvy observer to note the material things that define Bowdoin culture. For females there are the iconic Longchamp bags or the more England-specific Vineyard Vines. Tory Birch flats, J. Crew wellies and Ugg boots also serve as Bowdoin fashion staples. For the men, things like L.L. Bean slippers, North Face Jackets, Lacoste polo shirts and Sperry Topsiders.

And even beyond this day-to-day exhibition, there are other blatant they are presented with. the distance journeyed is smaller: There are those who can afford to journey home while for others, going home for shorter breaks, or even longer holidays, is impossible.

While for many at our school, material objects, fancy vacations and an affluent zip code are unquestionable, there are also many here who are unable to finance the luxuries many Bowdoin students take for granted. It is not simply unfortunate that not everyone is afforded the same opportunities and expenses on campus; it is an issue of integration and accep-

We are not a community that values exclusivity. We value diversity and the unique qualities that each individual brings to the table. But, unknowingly, what we practice is far different than what we preach. To be a mainstream, run of the mill. Bowdoin student. our social mores insist that you must have certain material objects or op portunities. While we may speak out against the injustices of inequality, create "hidden" costs that those already under financial stress are unable to accommodate.

Eliminate all fashion trends because they might be perceived as exclusive? Clearly that is an unrealistic solution to a subtle problem. I think the answer is much simpler than that. It is a matter of awareness. It means not assuming that everyone comes from the same socioeconomic background and removing the emphasis from those material objects.

Not everyone enjoys the same privileges and luxuries. No matter your background, be you from a wealthy private school or an inner city public school, do not assume you understand the experiences of your peers. College is a time for self-awareness. Recognize your privileges as well as your disadvantages but certainly do not take for granted or assume the same of your peers. We are more than just the sum of our parents' bank accounts, our area codes, our skin colors and our religious beliefs. As individuals we have more to offer than our material worth. We are all valuable thinking, reasoning, learning and logical contributors to our community. Let us place emphasis not on what we have or where we're from but who we are and where we're

MARGOT D. MILLER, THE BOWDOIN ORIENT

Maine St. Station struggles to stay on track

Construction on Maine Street Station continues full-steam ahead, though few tenants are on board and the project is more than a million dollars short of funds.

The Maine Street Station Oversight Committee, which met Thursday night, disclosed that the project's funding is short about \$1,275,000. The town of Brunswick applied for a much-needed \$850,000 grant from the Economic Development Administration (EDA), part of the U.S. Department of Commerce, more than a month ago. However, the EDA admitted this week that it could not find Brunswick's application.

"We're getting to the point where we need to make some of this public that it's not our fault," said acting town manager Gary Brown at a Maine Street Station Council Committee meeting Thursday night. "We need the EDA...we don't want to spend all the town's money."

The committee did not come to conclusion on how to proceed if the EDA grant money fell through.

According to Brown, Brunswick cannot afford to borrow any more

Construction on the train station, in particular, awaits fund-ing for the expansion of Amtrak's Downeaster train service from Portland to Brunswick. Several committee members expressed hope that the economic stimulus, passed Wednesday by the U.S. House of Representatives, might help.
"There are great opportunities

Despite slump in giving, yearly goals on target

Total giving down 10 percent, annual giving drops 12 percent

BY WILL JACOB

Despite a troubled economy and plans to reduce expenditures at the College, recent figures of year-todate annual giving suggest that the College is on target to meet its bud-geted levels for this fiscal year's oper-

ating budget.
"We are holding our own quite well, and we are cautiously optimistic about where we stand relative to fund-raising in this fiscal year. We're behind, but not behind so significantly that we don't think we'll hit our budgeted targets," Senior Vice President for Planning & Development and Secretary of the College Bill Torrey said.

Total giving, which Torrey said "includes gifts for endowment, building projects, and other fund-raising objectives here at Bowdoin," is down 10 percent compared to a year ago. On December 31, 2007, total giving amounted to \$29,160,250, while on December 31, 2008, the number was at \$26,240,566-a difference of \$2,919,684.

Total annual giving, which includes gifts to the Alumni Fund, Parents Fund, Polar Bear Athletic Fund, and Friends of the College Fund, is down 12 percent. Annual giving was at \$4,746,922 on Dec 31, 2007, and only stood at \$4,195,747 on Dec 31, 2008-a difference of \$551,175.

However, despite falling short

relative to a year ago, Torrey said it doesn't imply that "we won't necessarily hit our budgeted target for annual giving

The College has budgeted an annual giving target of \$7,475,000 for the 2009 fiscal year, according to Senior Vice President for Finance and Administration & Treasurer Katy Longley. This amount supports six percent of the College's operating expenses, which are around \$125,000,000.

Dean of Student Affairs Tim Foster said that this annual giving is "critical," due to the fact that "those gifts go directly into the operating

budget."
The budgeted target is lower than the actual fund-raising goal set, in order to "be conservative and give us some flexibility," Torrey said. Thus, he said, if trends in giving continue, the sum may fall short of the fund-raising goal, but still meet its budgeted target.

"As long as we hit our unrestricted giving budgeting number, we will our operating costs, and we will fund the things we have in our budget—financial aid, salaries, and everything else," said Torrey

According to the Bowdoin Cam-paign Web site, funds from annual giving create "vital support for the College's academic program, finan-cial aid, and extracurricular activities, providing an important margin of excellence beyond what is possible from tuition and endowment income

Please see GIVING, page 2

Financial forum illuminates details of committee's plan

AND TOPH TUCKER

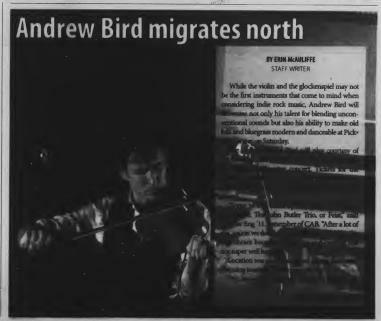

Following the release of a memo by President Barry Mills last week, outlining a series of recommendations to aid financial planning, 13 students attended a forum on College finances Tuesday night. Part of a series of community meetings also including staff and faculty forums, the meeting sought to clarify student questions surrounding the College's fiscal affairs and plans to reduce future deficits.

In response to the economic crisis and Bowdoin's shrunken endow-ment, the "blue tarp" committee, composed of students, staff, and faculty, has put forward recommendations to increase the student body by 50 students over the next five years, freeze all faculty and most staff salaries for two years, and hold operating costs flat.

"These are extraordinary times," Dean of Student Affairs Tim Foster said. "Higher education is not immune. It's pretty clear that people are going to have to change the way we operate, moving forward." Foster and Senior Vice President

for Finance and Administration and Treasurer Katy Longley addressed student questions and concerns, in place of President Barry Mills who was unable to return to campus in time for the forum. Student members of the "blue tarp" committee Joelinda Coichy '11 and Sophia Seifert '09 also attended to nment on how the recommendations were reached and the discussions that took place.

Longley explained the impor-tance of the financial planning model used by the College, indicat-

GIVING

CONTINUED FROM PAGE 1

Torrey also commented on the status of the Campaign, a five-year operation running from July 1, 2004 to June 30, 2009, stating that the College, as of December 31, 2008, is at \$243,500,000 in commitments towards the \$250,000,000 goal.

"We expect to hit our goal...The campaign is on track to be the most successful Bowdoin's had. It has helped to transform the place and greatly strengthen it," he said.

greatly strengthen it," he said.

Acknowledging economic hardship, Torrey said fund-raising is
harder now as "people are hurting,"
but that the College is working hard
to maintain annual giving. Torrey
said he hasn't felt the need to stimulate giving with more desperate
pleas yet.

"We've tended to make our appeals similar to what we've always done, appealing to people's highest aspirations for the College, not pushing a panic button. We've felt that at this point in time, that's the best way to ask Bowdoin alumni for support. You can only push the panic button once, and at this point in time, we don't need to do," he said.

Therefore, Torrey said he is com-

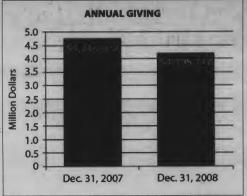

mitted to the fund-raising goals of the College.

"We want to keep the place where it is academically, we want to maintain financial aid where it is for today's students, we want to maintain the upkeep and quality of buildings we build, and in order for those things to happen, we need support. But we also realize that it is very difficult, and in terms of very large commitments, people may not be ready at this point," he said.

Torrey observed that it's difficult to secure large gifts of \$100,000 or more, as they tend to involve gifts of people's capital and appreciated securities. He said the College has seen fewer "planned gifts," typically gift annuities or the creation of charitable trusts, because they are complicated, involve tax issues, and require asset appreciation, which isn't happening today.

"You tend to see smaller gifts, cash gifts of checks or credit cards, and fewer gifts of appreciated securities," he said. While capital gifts are hardet to obtain, people are "not falling significantly behind in the commitments they've made to the College," through pledges or annual gifts, he added.

Executive Director of Alumni Relations and Annual Giving Eric

TOPH TUCKER, THE BOWDOIN ORIENT

SKINNY DIP: Annual giving totals fell more than \$500,000 in 2008—a drop of 12 perecent.

Foushee said that with the economy. as it is, a decrease in annual giving from alumni is to be expected.

"In short, yes, with the economic downturn we were bracing for a difficult year. I will say that...all the NESCAC schools and our comparison schools are tracking relatively the same...We're pretty consistent with most of the schools," he said.

However, Foushee said that he's

not hearing many alumni say they have to suspend their annual gift because of their financial situation; rather, they are adjusting their pledges or gifts to scale back.

pledges or gifts to scale back.
He added that "Bowdoin alums are fiercely loyal to the place," and although annual giving is down by 12 percent in comparison to a year ago, there have been about 300 more donors so far. He said he is encour-

aged by the additional donors making pledges for later gifts, noting that in today's economy, people just want to hold on to their cash as long as possible.

Looking ahead with these economic conditions in consideration, the College's financial planning model, used in President Barry Mills' memo to the College community, budgets annual giving to remain at its current level in the 2010 fiscal year, with modest increases in the following years.

Provided that the budget has traditionally accounted for a two or three percent increase in giving each year, Foushee said the model's plan for growth sounds realistic. He said he anticipates a tougher year next year, thereby justifying a zero percent increase in annual giving, before returning to times of growth.

At this point, however, Torrey said that, all things considered, "we're lucky to be where we are."

"I think the College has been really responsible in terms of its financial planning, and that's paying off for us now. We've got a great president, he's done what he needed to do to prepare for the good times and the bad," said Torrey. "The College is as well prepared as we could possibly be to withstand this financial storm."

STATION

CONTINUED FROM PAGE 1

for this town with the rail coming back," said Project Manager Michael Lyne, of JHR Development. "We just need to hear that it is coming back."

Committee Chair and Town Councilor Margo Knight proposed that the town of Brunswick assume the role of master tenant for the train station, of which JHR Development is the landlord, and lease the space to subtenants.

With businesses reluctant to expand operations amidst the current economic slowdown, the pool of potential tenants to fill the project has diminished considerably.

"A lot of smaller retail users aren't looking to expand right now, they're looking to hold what they have," said Lyne. "It's been slow."

The town of Brunswick and JHR Development would not release the names of any official tenants, except for Bowdoin. The College has agreed to take the first floor of Building 1, and the second floor of Building 3.

According to Senior Vice President for Planning and Development and Secretary of the College Bill Torrey, the College has designated some of the space on the second floor of Building 3 for a dance studio and changing rooms, though the rest of the space has not been finalized.

Bowdoin will not use the retail space on the first floor of Building 1 for a second bookstore as previously considered, though may still use it for some related retail sales or for gallery space.

"The problem is the economic climate is so dismal," said Torrey. "It's rather remarkable that this project is still moving forward. Everyone wants it to—Bowdoin, Brunswick, the developer."

Since the groundbreaking of the five-building development in October, phase one of construction on the retail and office spaces has been on schedule. The foundations for Buildings 3 and 4, which will house the train station, have been laid, while remediation on Building 1 began this week. Progress has also been made on the road between Union Street and

MARGOT D. MILLER, THE BOWDOIN ORIENT

FROM THE GROUND UP: Work on Maine Street Station, above, continues despite financial setbacks.

Maine Street.

JHR Development has received interest from several retailers, including a restaurant, a sporting goods store that has had difficulty getting financed, and some smaller users for the concourse field in the train station.

Lyne said he was "very hopeful that we can have an acceptable level of occupancy" by the time the buildings are slated to open in late July 2009.

Work will begin on the inn and condominiums once the first phase of construction has been satisfactorily completed. Lyne said he had a long list of people interested in the condos, but that these are impossible unless several units are pre-sold.

Winter weather has slowed construction and increased some costs, but Lyne said builders are accustomed to working in harsh conditions and will continue on

schedule. He added that seeing people working on the project was "a little symbolic—it shows that we can get through this."

Maine Street Station is expected to boost Brunswick's economy. A handful of stores on Maine Street have closed, but Lyne said that the train's arrival would be a "glimmer of hope" for small local busi-

Bringing Bowdoin students downtown is an important way to invigorate the businesses of Maine Street. Lyne said it was "great for the project" that Bowdoin will be a tenant. "It's important to create that link between the campus and downtown Brunswick," he said.

Economic Development Specialist for the town of Brunswick, Amanda Similien, called the continued investment and construction on the project "impressive."

"We're trying to do whatever we can to get jobs in town," she said.

BOWDOIN BRIEFS

Another Bowdoin alum was tapped by the Obama Administration on Wednesday, as Kendall C.
Burman '00 was named Associate
Counsel to the President. The Office
of Legal Counsel, where Burman will
work, "provides authoritative legal
advice to the President and all the
Executive Branch agencies," according to its Web site.

President Obama lauded the skill and experience of Burman and other newly appointed counsel members in a statement on Wednesday.

"Ensuring that we have an open and honest government is one of our top priorities, and [the White House Counsel] brings together people of exceptional experience and dedication to public service," Obama said. "I trust they will serve the American people well."

Before being named to the position, Burman worked as Chief Staff Counsel for the Obama for America campaign.

campaign.

At Bowdoin, Burman majored in government and legal studies and minored in Africana studies. She graduated from University of Chicago Law School in 2004, where she was a member of the law review.

The announcement of Burman comes on the heels of President Obama's selection last week of George Mitchell, Class of 1954, as special envoy for the Middle East.

QTRC director to act as WRC interim director

After working at the College since August as the director of the Women's Resource Center (WRC), Liz Greason has left her position. Director of Student Life Allen Delong announced in a digest post and e-mail this week that Kate Stern, the director of the Queer-Trans Resource Center (QTRC) will fill in as the interim director of the WRC in addition to her current position.

Delong would not comment on the reasons for Greason's departure, and the Orient was unable to reach Greason.

Stern began working at the College at the beginning of the fall semester, and Delong said that she was a finalist for the both the QTRC and the WRC director positions.

"Kate has been a wonderful addition to the College this semester, and I'm confident she'll bring the same commitment to students at the WRC that she has to students who affiliate with the QTRC," Delong wrote in an e-mail to the Orient.

Delong also wrote that the College "will reassess staffing structures in May, with special attention paid to scope of job, service to students, and in this financial climate, budget."

-Compiled by Nick Day and Mary Helen Miller.

approves transportation funds

At its Wednesday meeting, Bowdoin Student Government (BSG) debated the content of a new handbook, full of advice to students about cost-cutting measures they can take amidst tough economic times.

The handbook, called "Bowdoin's Handbook for Students on a Budget," is the brainchild of At-Large Representative Rasha Harvey '12. It contains financial tips on a variety. of subjects, including transportation, food, health and wellness, textbooks, and entertainment.

Vice President for Student Government Affairs John Connolly '11 said that the guide was put together by Harvey, Vice President for Student Affairs Carly Berman '11, and BSG's Student Affairs Committee.

"We got together and we realized that students were having trouble making ends meet, espe-cially new students, since they usually spend the most amount of money their freshman year," Con-nolly said. "But it is for everyone, every Bowdoin student."

During the meeting, student representatives examined the rough draft of the handbook, offering suggestions and criticism. The tone of the handbook was repeatedly criticized for being disparate from section to section, to which Berman responded, "We [will] go through it all to make sure it is in a consistent voice."

Class of 2010 Representative Rutledge Long argued that the guide should list activities that cost little or nothing to participate in, such as "join[ing] a club, like the history club."

He also advocated that igloo building be included as a lowbudget activity in the entertainment section.

"I've built a snow igloo the last two years, and it has been extremely satisfying," he quipped.

Connolly said that he believed the guide had been well received by the student government representatives

"I thought that it was great," he id. "We got some broad picture stuff, as well as some minute details. I think the whole guide is valuable and I think the sections on cheap entertainment, transportation, and how to avoid fees are going to be especially important."

Long also expressed satisfaction with the overall quality of

"We got together and we realized that students were having trouble making ends meet, especially new students, since they usually spend the most amount of money their freshman year. But it is for everyone, every Bowdoin student."

JOHN CONNOLLY '11

"I was pleased with the cost-cutting guide," he wrote in an e-mail to the Orient. "I think it's a clever concept, and it indicates to me that the BSG is thinking critically about how the economic situation is affecting students' day-to-day

BSG President Sophia Seifert '09 said in an e-mail that several departments on campus would be contacted "about what sorts of free in order to make the guide as complete as possible.

"Ensuring a quality document is the guiding principal behind the release date for the cost-saving guide," she said. "For the time being, the guide is targeted at incoming first-years, to be distributed over the summer before their arrival. However, we may boil down some of the content into an upperclassmen tip sheet or something of

In other business, two funding proposals were passed during the meeting.

BSG unanimously approved a funding request from the Facilities Committee to continue supporting the shuttle service that provides service to Portland, Freeport, and Cook's Corner.

The night taxi that augments Security's Shuttle Service and a new "bowling bus" that will run the bowling alley on Thursday nights both received funding as part of the request. The shuttle and night taxi were allocated \$4,500 while the bowling bus received up to \$500 in financial support.

The other proposal that passed was a funding request from the BSG Affairs Committee to place a coupon in the BSG newsletter, in an effort to encourage students to read the publication. The coupon will provide a discount towards the purchase of reusable water bottles from the Bowdoin bookstore, providing students with a sustainable alternative to bottled water.

Financial Aid filing instructions are now available for Bowdoin students seeking Financial Aid for the 2009-2010 academic year.

You may locate these instructions at http://www.bowdoin.edu/studentaid/enrolled/

> The Financial Aid application deadline is April 15, 2009.

BSG debates budget handbook, Heating costs lower than recent past

ORIENT STAFF

Although there are more buildings on campus than ever, the College expects to pay less to heat them

this winter than last.

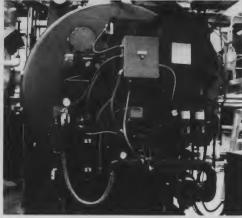

With the help of an energy consultant firm, the College anticipated last fall's dip in fuel prices, and when the price became right, it locked in its energy costs for this year and

According to the Energy Infor-mation Administration, the price of No. 2 heating oil has not been as low as it is now since May 2005. Aware of such a volatile energy market, Bowdoin moved to insure itself against price hikes during the next heating season.

Director of Finance & Campus Services Delwin Wilson wrote in e-mail to the Orient that Bowdoin has "secured 100 percent of our energy pricing for both [the 2008-09 fiscal year and the 2009-10 fiscal year] and did so within our estabshed utility budgets for those fiscal

This year, the College has budgeted \$2.1 million for heating costs. The price, which is a \$100,000 decrease from last year's spending on heat, will pay for No. 2 heating oil, natural gas, and biodiesel.

Though the market price of fuel

TURN IT DOWN: Bowdoin budgeted \$100,000 less for heating expenses this winter.

is the largest factor in determining the price of heating the campus, the College has taken a number of other steps to reduce costs.

Director of Facilities Operations and Maintenance Ted Stam wrote in an e-mail to the Orient that in recent years, the College "has lowered the set points [of building thermostats] to 68 [degrees Fahrenheit]" and that "unoccupied spaces are set

to lower set points at night when appropriate."

According to Stam, each degree that the heat is lowered will reduce the overall cost of heating by 3 per-

While first year Tom Marcello said that he has "no issue with the heating," fellow first year Megumi Ishizuka said, "I think it should be higher-I'm cold all the time!"

FORUM CONTINUED FROM PAGE 1

ing that if no action were taken, that we can assume deficits of about 17 million" over the next five years, which would only increase there-

While the endowment normally serves as the second largest source of revenue for the College, behind tuition and fees, the 10-year financial planning model is assuming a 20 percent loss in the endowment for the 2009 fiscal year, followed by a zero percent gain in the 2010 and 2011 fiscal years, and returns of 7

Longley said that the first recommendation, to increase the student ody by 10 students per year over the next five years, is the one Mills is "most reticent about," as it can potentially put pressure on faculty, staff, housing, and course enrollment. Nonetheless, in his memo, Mills stated that the increase in the stu dent body may be pared back if the economy "bounces back" sooner.

He also wrote, "We expect that this increased enrollment will be accomplished in a manner allowing us to continue our 'need-blind' admissions policy," and members concurred that the extra enrollment shouldn't have a noticeably negative impact on the College.

After indicating the incremental gains each year that 10 additional students paying full tuition would bring to the help the deficit, a student asked how the College would ensure that these additional students would not require financial

Exchanging glances with Foster, Longley lowered her tone and re-plied that the College could accept transfer students and students off the waitlist, who aren't "susceptible' to need-blind admissions.

Students further questioned the impact of these additional students on housing scenarios and, again, financial aid demand. Longley re-

plied that, in order to help the "bottom line" of the College's deficit and to make the numbers work, the additional students wouldn't be on student aid

As for housing, Foster reassured students that, as it was done during the first-year dorm renovations, an additional 115 beds could be put in place, by converting some quads into quints, or doubles into triples. He noted that Registrar Christine "has a pretty complex mod el" for College enrollment, which would help determine how many additional students are necessary.

The forum went on to discuss the topic of staff and faculty salaries and benefits, which comprise 61 percent of the College's expenses.

The committee was adamant about not laying off any employees, thus recommending, for two years, to freeze all faculty salaries, as well as staff salaries above \$40,000, and allowing for a 2 percent increase in staff salaries under \$40,000. However, raises will still be provided for faculty promotions.

Historically, the College bases raises on a "4, 5, 6" policy that, as Mills' letter describes, "adjusts the salary base for continuing faculty at each rank based on a three-year lagging average of percentage increases for faculty at colleges ranked fourth, fifth, and sixth by average salary in our comparison group.

"It's a 'shared pain' approach," said Longley. "We're all in this together." She said that the faculty forum on Monday went well, and that the faculty was "quite supportive." She commented that there wasn't really any stated opposition, and though they were concerned and asking questions about filling departmental cancies and openings, she said the College is not freezing vacancies.

Another recommendation made

by the committee is to hold operating costs flat, avoiding the typical core cost increase of 4 to 7 percent each year. Rather than dictate how that will happen, Longley said, "each department will decide how to keep

Foster said that in addition to some cost savings in this deflationary period, staff has been working to negotiate better contracts, rates, and deals, without making noticeable sacrifices to students. The College has already locked in fuel costs for this year and next, and ensured that Dining has the funds they need.

The College has a "rainy day fund" of more than \$1 million to address unexpected expenses, which it has yet to draw on. Longley expressed a desire to refrain from using these funds.

Foster said he believes the proposal to be "prudent," and said he hopes that "these numbers will be conservative." He also reminded attendees that other schools are taking more drastic steps, such as freezing salaries completely or, in the case of Brandeis, deciding to liquidate its art museum

Following the forum, the few students in attendance expressed their appreciation of the College's handling of the matter.

"I think that President Mills' decision to include a diverse committee in this decision-making process and people's positive reaction to the recommendations speak volumes about our community," said

She also praised the engagement and thoughtfulness of attendees. She described being "approached by a number of students who have been asking smart questions and thinking realistically about the state of affairs."

Kathryn Jordan '10 contrasted the experience with her first year at Trinity College in Hartford, Conn., where financial struggles made the students, admissions staff, professors, and workers feel like separate entities that each needed to defend their needs."

Rasha Harvey '11, though, regretted the low turnout.

Students should take more ownership in the College, especially in crucial times," she said.

Longfellow Days celebration commences

Brunswick, Bowdoin honor poet with February festivities

BY PETER GRIESMER

Brunswick Downtown Association and Bowdoin College, with support from the Nathaniel Davis Fund and the Association of Bowdoin Friends, will host "Longfellow Days 2009" from February 1 - 26 in celebration of Bowdoin graduate Henry Wadsworth Longfellow. The annual event—now in its fifth year—will boast an international theme in homage to its figurehead's work promoting knowledge of cultures beyond America's.

This year's program, "Longfellow: Citizen of the World," will focus on the lesser-known activities of Longfellow as Bowdoin's first professor of modern languages, a linguist, and a translator of Spanish, Italian, French, German, Icelandic, and Norwegian languages.

Throughout his career, the poet worked to promote knowledge of European literature in the United States and knowledge of American letters in Europe.

Longfellow, a graduate of the Class of 1825, was a poet associated with the romatic movement in American literature. His most well-known works include "The Song of Hiawatha" and "Paul Revere's Ride."

The events of the coming month will examine the influence of Longfellow, a man who studied and made friendships across the globe while still relating to the cultural heritage of Brunswick citizens.

Recognized historians, Bowdoin students, local poets, and members of the town will come together for the dozen events scheduled in the series, the majority of which are free of charge.

A three-part "Poets in the Community Series" will take place at 1 p.m. on February 1, 8, and 15 in the Fireplace Room in the Curtis Memorial Library. Edward Gottfried '11 is set to read alongside Maine poets Ted Bookey and Sheryl Hansen on February 1.

Poets affiliated with Moonpie Press, including Jim Mello, Alice Persons, and Jim Glenn Thatcher will read on February 8, and additional Maine poets Herb Coursen, Joyce Pye, and Anne Tobey Oleson '87 will perform on February 15.

As the only present-day Bowdoin student involved in the poetry readings, Gottfried said, "I feel like I play a pretty symbolic role...tying history with the present of Bowdoin and Brunswick and the school with the arts. I'm honored to be playing that role."

In addition, four Bowdoin students who have recently returned from studying abroad or performing community service in other countries will relate their different cultural encounters on February 9 at 7 p.m. in Daggett Lounge of Thorne Hall.

Kristina Dahmann '10, who spent last semester in Granada, Spain, said, "I did my best—while abroad—to embrace Spain and its culture and live like a Spanish person would. I did my best to talk to as many Spaniards as possible and "I feel like I play a pretty symbolic role...tying history with the present of Bowdoin and Brunswick and the school with the arts. I'm honored to

be playing that role."

EDWARD GOTTFRIED '11

especially to discuss politics, with all the election coverage that's been going on."

"I also tried to tie in who I am and where I come from whether it's with other university students and people in restaurants, even bartenders," Dahmann added.

Assistant Professor of Economics Stephen Meardon will deliver a lecture called "U.S. Trade in Longfellow's Time and Now" on February 12 at 4 p.m. in Daggett Lounge. Meardon will compare U.S. economic policies of the 1820s to today's, relating them to Longfellow's personal opinions on international economics and foreign affairs.

Professor of German and the Humanities Helen Cafferty will speak alongside Assistant Professor of Romance Languages Katherine Dauge-Roth and Research Associate of German Otto Emersleben in a talk entitled "The Translator's Art" on February 18 at 12:15 p.m. in the Morrell Room of Curtis Memorial Library.

A listing of other events in the Longfellow Days celebration can be found on the Bowdoin Web site at http://www.bowdoin.edu/news/events/archives/005768.shtml.

SECURITY REPORT: 1/30 to 2/5

Thursday, January 22

*The smoke alarm at the Outdoor Leadership Center was activated when a wood fire was started in the fireplace with the chimney flue closed. The building was evacuated and Brunswick Fire Department responded.

 A town resident called at midnight to report that a group of students was running and yelling on Longfellow Avenue, disturbing the neighbors.

Friday, January 23

•Security responded to noise complaints on the second and third floors of Ladd House. A student was asked to leave the building.

•Two underage students were cited for alcohol policy violations for consuming alcohol in Jack Magee's Pub. Saturday, January 24

*The odor of marijuana smoke on the third floor of Appleton Hall drew security officers to a room containing a group of students and a glass bong. The bong was seized and a report was filed with the dean of student affairs.

•A security officer transported a female student to Parkview Hospital who was injured while playing basketball at Morrell Gymnasium.

•At the request of the health center, two students were transported to Parkview Hospital with general illnesses.

Sunday, January 25

 An intoxicated student was transported from Harpswell Apartments to Parkview Hospital by Brunswick Rescue.

 A staff member reported damaging a College van in a backing accident in Rumford during a ski team outing. Monday, January 26

*A security officer found a tapped keg and a bottle of hard liquor in the common area of MacMillan House during a routine check of the building at 8:30 a.m. The items were confiscated.

•A theft occurred at Dayton Arena during the past week. A six-foot section of wooden spectator bench was sawed out of the stands and stolen. And four framed murals depicting hockey artwork were removed from a wall and stolen. Souvenir hunters are suspected. Dayton Arena is now closed and locked; unauthorized access to the building is strictly prohibited.

A student reported the theft of a camera from the common room of Coles Tower 8-D. The camera was last seen on Thursday, January 22. It is described as a pink Canon Power-Shot SD1100 IS Digital Elph in a hard black Canon travel case.

Wednesday, January 28

• A student called at 1:30 a.m. concerned about an intoxicated and lightly dressed student wandering in town. Security officers located the student on Maine Street and returned him safely to his residence.

Thursday, January 29

 A security officer reported that graffiti had been spray painted on the east side of Howard Hall.

•At midnight, a student reported that he caught a bat on the 16th floor of Coles Tower. A security officer assisted and the bat was released outside.

•At 2:50 a.m., a student reported a bat flying around in the Whiteside Room, 16th floor, Coles Tower.

-Compiled by the Department of Safety and Security.

Bowdoin mirrors nation in study abroad trends

BY EMILY GUERIN

Bowdoin students studying abroad are seeking shorter stays, are mostly female, and are increasingly interested in unconventional programs-all trends that are reflected on a national level.

Shelley Barron '09 is one of an increasing number of Bowdoin students who choose to study abroad in the summer instead of during the academic year. After her junior year, Barron participated in a six-week program in Brazil that focused on sustainable development. Barron says that the six weeks she spent in Brazil were an "adequate amount of time" and that she enjoyed getting "to see what it was like to live in rural central Brazil."

According to Director of Off-Campus Study Stephen Hall, Barron's experience reflects both a national and a Bowdoin trend to ward shorter study abroad experiences, with fewer students choosing to study abroad for the whole year. Nationally, more than half of all students studying abroad do so on short-term programs, mostly during the summer.

Data from the Office of Off-

Campus Study reveals that only 9 percent of the 264 total Bowdoin students who are studying abroad in the 2008-2009 year are gone for both semesters, while nationally the percentage is even lower Hall believes that the semester and summer study abroad programs are popular with students who are concerned with fitting in distribu-tion requirements and finishing their majors.

. Biology and environmental studies major Nick Norton '09 studied abroad in Zanzibar, Tanza nia last spring. He said that while he entertained the idea of going on a program that had nothing to do with his studies at Bowdoin, in the end he "didn't have the luxury of not thinking about it in terms of the major" if he wanted to graduate this spring.

While Hall recognizes the value in spending more time at Bowdoin, he says he is still "a little disappointed" in the trend toward single semester and short-term programs. According to Hall, "there is something to be said for spending a full year away by yourself." Hall says he worries that students on shorter programs will not become as immersed in the culture as those who spend more time abroad.

Naima Hassan '09 chose to spend a year in Cairo, Egypt, for the reasons Hall cited. Hassan, who was born in Somalia, wanted to reconnect with North African and Islamic culture and decided that "one semester would not have been enough." Hassan says that she wanted to "brush up on Arabic," as well as "take classes about that region while in that region."

Although Hassan's decision to spend the year abroad is anomalous, her interest in the Middle East and North Africa is shared by others at Bowdoin and throughout the country. Hall expects to see a rise in students studying abroad in the region now that Arabic is University in Cairo, where Hassan studied, has just been added to the list of approved abroad programs, as well as the new School for International Training (SIT) programs in Morocco and Jordan.

In addition to the Middle East and North Africa, other regions of the developing world, especially in Africa and Asia, are becoming more popular study abroad destinations. Hall expects China to overtake Australia nationally, and says that this increase is reflected at the College, too. Hall says he suspects that the economic crisis is influencing students' decisions to study abroad in less expensive countries.

The country that is experiencing the most rapid growth among Bowdoin students is Denmark where according to Annie Hancock '10, the price of a cup of coffee can run about \$10. Hancock studied in Copenhagen this past fall at the Danish Institute for Study Abroad (DIS) architecture program. She chose to focus on architecture becuase she found Bowdoin's department limited. In addition, she wanted to "get out of Maine" and live in a big city, as well as have the opportunity to travel around Europe. Hancock thinks Denmark is becoming increasingly popular because it is "an English-speaking European country other than the United Kingdom," and because thus far Copenhagen is not "overrun by Americans.

Indeed, more than 60 percent of Bowdoin students choose to study abroad in Europe, with the UK oc cupying the No. 1 spot. Just under 40 students studied in Great Britain alone in the 2008-2009 year, com pared to 17 in all of Africa and 20 in Asia. According to Hall, Italy, Spain, and France occupy other top spots

both nationally and at Bowdoin.
In addition to choosing to study abroad in Europe, Hall noted that another trend at Bowdoin is that more women study abroad than Sixty-three percent of all students studying abroad in the 2008-2009 year are women, a figure that is often even higher at

Bowdoin's peer schools.

Assistant Director of Off-Campus Study Melissa Quinby recentconducted a study at Brown, Brandeis, and Bowdoin investigating why fewer men choose to study abroad. The study has five hypotheses. First, according to Quinby men major in departments where study abroad is less readily avail-able." Second, Quinby suggests able." Second, Quinby suggests that men may be more influenced by their peers to stay on campus, something she calls the maturity and development theory. Greater athletic commitments among men is the third hypothesis, and less prior experience in international travel and work is the fourth. Finally, Quinby hypothesizes that career paths might influence men to

stay at their home universities.

"Studies have been done over and over again and nobody can answer this question," she says. Despite this, Quinby suspects that some of the hypotheses could be more or less applicable to Bowdoin. She believes that at Bowdoin "athletics aren't getting

ELEPHANTS NEVER FORGET: Sarah Lord'10 interacts with local animals at an elephant orphanage in Sri Lanka this fall.

in the way for men or women who study abroad," but that more women major in languages, a fact confirmed by the Office of Institutional Research statistics. As of fall 2008, there are 70 Bowdoin women majoring in a foreign language and only 33 men. Addition ally, 25 of these women studied abroad this year while only 10 of

the men chose to.

Quinby says that the results and that none of the hypotheses are stronger than the others.

Optical illusions: The power of sight in lust and intimacy

SUGGESTIVE BY ALANNA BEROIZA COLUMNIST

Hello Bowdoin. You look great. And it's so good to see you-it's been so long since I've seen you. Wait a minute, what am I talking about? I can't see you, and you can't see me either. Then again, you do know what I look like, because my picture is printed at the top of this column. So, if you see me walking toward the Union today you might recognize me, but would you say hello—would you give me eye contact?

Sight can be a tricky thing. Par-ticularly in the realm of sex and relationships, it seems to me, sight can be problematic. For most of us, from the moment we wake up to the moment we close our eyes to go to sleep at night, the better portion of our days are spent with our eyes open, processing all kinds of information. But when we speak about sight with regard to sex and romantic involvement, we most often refer to a type of seeing that supersedes vision. In sex and relationships, we speak of a more conscious and biased effort to create a certain type of seeing-to manufacture a visual scenario which can then be translated into an emotional and/ore physical relationship.

Think about some of the words and phrases that we use to describe sexual and romantic relations between people: "I'm seeing someone right now;" "I'm looking for something/someone;" "I gave her the look;" "He's giving you some serious eye contact right now." But what does it all mean? Of course, when I say that I'm seeing someone, it doesn't mean that I've somehow developed the ability to actually view that person 24 hours a day; however, it does suggest that I've developed a relationship with another person, which incorporates a certain type of mutual poslike, "I've been eyeing that girl from across the room all night." It seems to be that an implicit sense of ownership or possession un-derlies our sense of romantic and sexual vision.

And when I say "ownership" and "possession" I use these terms in their broadest senses. I think there is something to be said for the moment of recognition-when eye contact incites a certain type of bond between two people, if only momentarily, tying them together in a very profound way. To what else can we attribute the time honored adage of "love at first sight?" In the world of sexual and romantic intimacy, sight serves a far more complex role than the unconscious biological processes of human vision. This type of sight encompasses a wide range of emotions and skewed mental functions that play out in the most interesting ways between people.

For instance, why is it that when I see someone that I have a crush on. my stomach starts to feel like its doing flips and my heart starts beating faster as it makes its way up into my throat? Why do I have a collection of glances engraved in my memory from people in my romantic and sexual past, reminding me of the pleasure and pain of intimacy? Why is it that when I'm about to kiss someone I anticipate it in their eyes first, but then my eyes close almost automati-cally as our lips touch? And how did I develop the inexplicable ability to see only physical beauty in the face and figure of someone I want, like, or love, no matter what they actually look like?

Obviously, my eyes have been playing tricks on me. Or, perhaps my emotions have been playing tricks on my eyes. I can't really be sure of the cause, but I'm well acquainted with the effect of "inti-mate sight." Instead of seeing what's actually in front of my eyes, I see a particular version of someone or

something. It's a bit of a double-edged sword. On the one hand, I love the adrenaline rush I get from an intimate connection through sight, on the other hand, sometimes I think I could do without my eyes when they register the sight of someone who is unattainable to me, I'd rather not see ever again.

For me, this idea of "intimate is an unavoidable aspect of the human condition. To some extent, I will always be creating my own version of the truth when I physically see someone or

Honestly, I wouldn't have it any other way. As long as I can look at someone I love and see perfection in places that no one else does, I think I can handle any other optical illusions that sex and romance decide to implant on my retina.

Applications to be a member of the Judicial Board are now available in the Office of the Dean of Student Affairs, 2nd Floor of Moulton Union, and online at

http://www.bowdoin.edu/studentaffairs/judicialboard.shtml.

> Completed applications are due back in the Dean's office by Thursday, February 5th at noon.

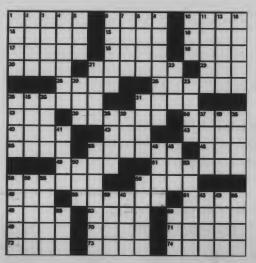

The Judicial Board is a faculty/student committee that hears cases of serious academic and disciplinary misconduct. Members should possess a strong sense of fairness and appreciation of community standards. Time commitment ranges depending on time of year and case load. Student members will be selected to the J Board by current members, the J Board Advisor, and a BSG representative.

> All interested first-years, sophomores, and juniors are encouraged to apply.

ARTS & ENTERTAINMENT

Hepler weaves vortex of translucent webs for 'Gyre'

Whirling plastic nets suspended from the ceiling create an ethereal environment in Visiting Assistant Profes-sor of Art Anna Hepler's new instal-lation at Rockport's Center for Maine Contemporary Art (CMCA).

The exhibit, titled "Gyre," consists of

net-like webs constructed with sewn sheets of plastic and tarps.

"I was interested to try a new material for this installation and I knew wanted to use sheet plastic becau it is easy to manipulate and it is often translucent which also interested me in terms of layering," Hepler said.

The piece hangs from the ceiling, and as a result, twists and moves to create the sense of a vortex that draws

Hepler developed the idea of creating a spiraling installation after reading an article about the plastic dump in the northern Pacific Ocean referred to as the North Pacific Gyre, an area approximately the size of Texas. Plastic trash from the ocean is gathering in

"News of this waterborne landfill inspired imagery, and particularly the image of being under water looking up at a tangled mass of plastic trash," Hepler said.

Although Hepler drew inspiration from the North Pacific Gyre, the installation is not a direct reflection of it but rather of Hepler's reaction to the gyre.

"My installation is not attempting to illustrate the plastic epidemic in the north Pacific but it does respond in di-

HEPLER'S WEB: Above, "Gyre," Visiting Assistant Professor of Art Anna Hepler's new exhibit at Rockport's Center for Maine Contemporary Art. The sculpture installation consists of pieces of plastic that Hepler collected from two trips to the dump and then sewed together.

rect ways to the knowledge of it," she

Instead of buying material to work with, Hepler salvaged plastic from the dump for the installation. She spent one month preparing to install the ex-hibit, which included sewing nets from plastic sheeting and recruiting people to help her sew.

Jenna Breiter '10, a visual arts major, sisted Hepler during the final eight days of installing the piece before it opened on January 10.

"We worked from morning 'til eve-ning," Breiter said. "I helped her have enough material to work with. I took of plastic and sewed them into grid-like formations because we were

making nets."

For Breiter, watching Hepler com plete the process of creating the 45-foot-long installation was inspiring.

"That was really the most amazing thing to be a part of," she said. "When I approach my own work, the process is very important to me. The process is how you begin to understand what to watch that happen."

"It reminds me to struggle, and to allow that struggle to happen," Breiter added of watching Hepler work. The result of Hepler's process is an installation that the CMCA Web site

calls "both beautiful and vaguely discomforting."

The final piece overwhelms the central space in the Loft Gallery and from certain vantage points is a bit overwhelming and possibly claustro-phobia-inducing," Hepler said. "Once the viewer becomes aware of the plas-tic and detailed sewing, there is additional discomfort understanding the accumulative labor that went into the project."

However, the installation in its entirety evokes a different sensation.

The beauty comes from the lattice and that the form is lit from within such that the light filters out into the room and onto the walls in beautiful ways," Hepler said.

Although Hepler is not attempting to convey a didactic message through "Gyre," viewers will encounter contra-dictions in the installation that Hepler hopes they will consider.

"I am interested always in presenting contrasts and contradictions that need to be reconciled by the viewer such as heavy and light, unintentional and

intentional, detail versus huge form, beautiful and ugly, she said. Hepler will be giving a gallery talk at the CMCA at 2 p.m. tomorrow. It is free with admission and open to the public. "Gyre" will be on display through March 21.

Obscure films to play leading role at Oscars

BY LAUREN T. YENAKIS STAFF WRITER

Before I printed out the list of Oscar nominations, I thought that I had seen many of the films up for nomination. Instead, looking at the list, I felt woefully

out of the loop.
What were these
movies? Why hadn't I seen them? Why hadn't I even heard of them (in the case of "The Wrestler")?

Sure, I've heard of "Slumdog Millionaire" because it absolutely swept the Golden Globes and everyone was shocked that the epic "Curious Case of Benjamin Button" was edged out by a movie about a young man in India who wins a game show I saw "Rachel Getting Married" and The Reader" because they came to Eveningstar Cinema downtown. I saw "The Dark Knight" this summer because if you didn't, you were ostracized from society by everyone over the age of 10.

"Frost/Nixon"? "The Wrestler"? "Doubt"? I haven't had time to see these movies! Why does the Academy think that the American public wants their venerable opinons on what is worthy and what is not before these movies have even hit mainstream theaters?

I thought maybe it was my living in the Bowdoin bubble that kept me from knowing what movies came out until I talked to Technical Support Coordinator Thom Colkitt, a Bowdoin staff member who advises the Bowdoin Film Society and works

in Alumni Giving. Colkitt, a definite film aficionado who also admits that he "has the strangest taste in films of anyone you've ever met," was disap-pointed that few of these nominated films had made it to Maine.

"So many of these films haven't been seen in Maine and it's frustrating," Colkitt said. "The Wrestler'? 'Frost/Nixon'? 'The Wrestler' has been shown in two cities. And the five foreign films up for nomination have not been seen in Maine, at least to my knowledge."

However, Colkitt was refreshed by the Academy's decision to nominate smaller, more independent films for the big categories, instead of crowding the coveted Best Film, Best Actor/Actress spots with large productions and blockbusters.

"It's refreshing to see the great number of independent and small films, like 'Slumdog,' 'The Visitor,' and 'Milk.' Whether or not they win, it's still refreshing for them to make it in. Take Melissa Leo [nominated for Best Actress] in 'Frozen River.' I don't know if she deserves the Oscar, but it's just nice to see her nominated." Colkitt said.

With all these smaller films getting nominations in the big categories, one pauses for a minute to think if Hollywood politics is shift-ing for the better. Sadly, one only has to look at the other nominees in these big categories to see that some things will never change.

For one, the Meryl Streep/Philip Seymour Hoffman/Amy Adams mega movie "Doubt" is all over the

place. Meryl Streep is nominated for Best Actress. Philip Seymor Hoff-man and Amy Adams are nominated for Best Supporting Actor a Actress, as is the lesser known Viola Davis. "The Curious Case of Benjamin Button"—the film hailed as an epic adaptation of F. Scott Fitzgerald's short story-covers the list, with a whopping 13 nominations, including Best Picture and Best Actor for Brad Pitt.

And then there's Heath Ledger, nominated for Best Supporting Ac-tor in "The Dark Knight." I think we all know that he will get the Oscar posthumously, as Hollywood's "best" stand up together and applaud him and wipe invisible tears from their eyes to honor a fallen comrade.

Of course, "Wall-E" will win Best

Animated Feature Film because movies about animals fighting the bad guys just can't compare to story of a trash-compacting robot saving blobby humans.

As for Best Motion Picture, who knows? "Benjamin Button" won't win because "Slumdog," "The Read-er," "Frost/Nixon," and "Milk" have more valuable social messages to

Without watching all the movies nominated for this, the 81st Academy Awards, I feel that observing past Hollywood politics can give you a pretty good sense of who will win what. Maybe I'm wrong, but why else would Hugh Jackman be hosting if not for Hollywood's guilt over not nominating "Australia" for anything but Contume Design? anything but Costume Design?

LARGER THAN LIFE

Above, the centerpiece of the Museum of Art's Rodin exhibit. Since the piece does not currently fit into the rotunda where the exhibit resides, Museum staff were forced to temporarily install the sculpture in the Bowdoin Gallery. After parts of the doorframe are removed, "The Three Shades" will be reunited with the rest of the collection.

Professor explores depths of American culture through art

just how rigid the line between fiction and reality is, and in a favorite book or coveted movie, that boundary is quietly blurred. Randy Regier, an adjunct lec-turer in the Visual Arts Department, brings this exploration to new heights with his class Make.Believe, this semes ter's sculpture seminar, as well as his up-coming exhibit "Lost and Found: Anna Isaak and the Cabot Mill" at the Coleman Burke Gallery in Fort Andross.

Regier began his artistic career as a syndicated cartoonist, a job that, according to him, involved "looking at common things and skewing them a bit." Although his later projects branched away from these initial endeavors, Regier touts his original work as a critical part of his development as

"This mindset definitely directed how I came to art," he said.

During and following his undergraduate studies in sculpture at Kansas State University in 1998, Regier began ex-ploring the narrative qualities he found in all objects. This interest manifested itself in Regier's first project: a series of fictional vintage toys in their packages. Regier's toys generally embody a sense of the 1950s and 1960s

"They appear to be actual toys," Regier said. "Upon closer inspection, ever, they de-center people. They don't fit into our memory bank as we

MARGOT D. MILLER, THE BOWDOIN ORIENT

MAKE BELIEVE: Randy Regier, Visual Arts adjunct lecturer, communicates history through his work. Above, a racecar in his latest exhibit in Fort Andross.

think they should"

Regier's toys are part of a bigger ex-ploration into our human and cultural fascination with history.

"We have this obsession. Even in

today's youth culture, even in fashion," Regier said. "Someone sees a vintage dress and she immediately thinks, 'Oh my god, where did you get that?"

r Regier, toys like the ones he created are an ideal way to tackle a new way of creating art.

Toys are an incredibly provocative jumping off point. Here we have disen-chanted adults making play things for children. And the children don't care. They don't know the difference. Toys are our cultural Trojan horse. People accept them readily, and when they realize what they really are they just have to deal with it. Toys are just that effective because our conditioning was so childish."

In Regier's work, he is exploring ese implications on a sculptural level.
"All objects-all things-tell stories,"

Regier said. He referenced late American art historian George Kubler's understanding of history as an example of his artistic mindset.

"In Kubler's "The Shape of Time: Remarks on the History of Things, he says that 'all materials worked by huma hands under the guidance of connected ideas developed in temporal sequence. From all these things a shape in time emerges," Regier said.

"I'm exploring this in my work," Regier added. "We're always discussing and looking at the object, but I'm more interested in who we are and what we came from. I want people to look at an object and see the personal, and the patina, and the evidence of someone having cherished it or hated

As his fictional vintage toy pieces emonstrate, at the core of his work, Regier is exploring, analyzing and in-specting the depths of American cul-ture. This semester, Bowdoin students are joining Regier on this exploration in the sculpture course Make.Believe, in which students construct small artifacts that tell fictional stories. Like Regier, they are deftly blurring the line between fiction and reality.

Regier describes himself as "an artist whose primary interests are the writing of historical fictions using objects, both created and found. I favor narratives of lesser-known human endeavors, 'micro histories' if you will-common people who attempt substantial feats against large odds, or minimal resources."

This idea of "delivering a narrative of

the common people" is a concept that Regier has pursued in depth since 2005 n he began work on the project that will be exhibited at the Coleman Burke

"I decided I wanted to stretch my ability as a maker. I wanted to raise the bar for myself and allow my imagination to run. And what I found w narrative so unbelievable, yet one I desired to believe so much," he said.

With his newest project, Regier explores the life, dreams, and secrets of one Anna Isaak, creating history in the Coleman Burke Gallery.

The show opens tomorrow from 5-8 p.m. in the Coleman Burke Gallery at Fort Andross.

Bon Iver warms cold hearts on 'For Emma, Forever Ago'

THIS WEEKS REVEW

February is coming—get your sad albums ready. The newfangled Genius function on your iTunes knows it, and while you aren't looking, it will arrange the most heart-wrenching compilation its robot "heart" - probably a wrenchcan wrangle. I suggest that you beat Genius to the punch and listen exclusively to Bon Iver's "For Emma, Forever Ago

There are so many reasons to listen to "For Emma, Forever Ago." As I already mentioned, now is the season. With a name like Bon Iver—an English ver-sion of the French phrase "good win-ter"—it only makes sense. Aside from the literal translation, Bon Iver's "For Emma" manages to capture the essence of winter. It is at times cold, sparse, and dark, and at others, refreshing, playful, and simple. It is, above all, subtle. Like a large lump of snow parked on the side ad, "For Emma" doesn't show you everything, but you know what is

What lie underneath the snow of vague lyrics and floating harmonies are songs about love, another reason to listen now. I am usually skeptical of all things overly romantic, or overly any-thing for that matter, but "For Emma" isn't all sappy love songs, and it isn't all salty cynicism. It has its moments of both, but they exist in perfect balance. Too many albums about love fall into these traps. But Bon Iver has escaped cliché and has made a love album about the good and the bad, which makes this rd just good.

No matter how multi-faceted and complex an album's concept of love is, it can get old if the necessary steps aren't taken. Step 1: Make your melo-

someone you don't intend to kiss. The love song is a powerful seduction tool, just ask birds or John Mayer, but if it sounds like a love song and is about love it becomes cliché. You will find yourself singing the melodies of "For Emma" as if they were folk staples, tunes that existed long before you were born. Step 2: Make it messy. Pristine and polished sounds insincere and robotic. Bon Iver's frontman Justin Vernon sells his love songs with the grit and presence of his raspy voice. The guitar is played at a distance from the microphones and sounds as if Bon Iver were in the corner of your room. It's slightly out of tune. yet it's inoffensive and even inviting. All of these three aspects of Vernon's per-formance remind us of the sincerity of

This (love) album is a success because it picks a few ideas and plays them out in lots of different ways. The songs are different but are all related in their sweet, sing-able melodies and their gritty guitar sound. "Skinny Love"—an Internet hit—is the perfect example of a melody saving a love song from itself. In this song Vernon sings his own ver-sion of the blues. His flailing and pained voice is both intimate and entrancing. "Lump Sum" boasts one of the greatest intros I have ever heard and is just plain stunning. Bon Iver is so good you'll wish February had more days, and one

One more thing. Try as I might, I can only bring you the good tidings of my musical findings but once every two weeks. If you are the one person read-ing this column, then I will let you in on a secret: For more constant musical updates and cool finds, check out www. animalshow.wordpress.com. It's a hip, new, and informed mp3 blog written by Bowdoin's own Edward Gottfried '11 and David Yee '09. I like it, you will

dies catchy-catchy enough to sing for

If you could only listen to one album for the rest of your life, what would it be?

NC: Traveling Wilburys' "Volume 1."

SL: Meatloaf's "A Bat Out of Hell." epending on how I feel, sometime is the only album in my life and often it's the only one I listen to.

Favorite song to privately dance/rock

NC: "Africa" by Toto, but let's be honest, I rock out to that with people around

SL: Queen's "Bohemian Rhapsody," especially in the shower or when I need a little pick-me-up.

If you were in a band, what would it be called and what kind of music would

NC: "Angry Markos." I'd play under-ground hip-hop indie. SL: "The Jam Masticators a.k.a. Mass-

Jam a.k.a Ja-mass," known to our critics as AssJam, and we'd play rock-funk-jazz or reggae (depending on the weather). Our lyrics wouldn't make much sense but at least no one would ever know

DJs OF THE WEEK

Nick Cohen '09 and Simon Lee '09

when the concert ended and the afterparty began. Theme song during Ivies?

NC: "Come Sail Away" by Styx.
SI: "Come Sail Away" by Styx and anything by Journey or Southern rap.
If you could meet any musician, dead

ve, who would it be and why?

NC: Bruce Springsteen, but that might go against the WBOR alternative trend. I think hed have some words of wisdom without being pretentious and seems like a generally fun guy.

SL: Jerry Garcia, because I can only imagine how sweet an experience it would be to spend even an hour in the same room as him, especially jamming

Best new music you've heard lately! NC: "The Powder Kegs," who claim to play "rock and roll like before it meant

SL: WBOR is the only radio I listen to but recently I downloaded lames Brown. "Live at the Apollo 1968"... I'm not really sure when that came out though

If you could time travel back to any musical period, where would you go and

NC: Probably the 1980s so I could permanently get away with dressing like a Racer X concert.

SL: Either the late '50s where I'd check out early jazz clubs or the '70s; I'd be a Dead Head. Both seem like pretty cool scenes that still focused on

Bands/musicans who have most influenced your musical taste?

NC: Bruce Springsteen and Thelonious Monk.

SL: The Grateful Dead, The Band, The Beatles, Miles Davis, Bob Marley, The Buena Vista Social Club, Dr. Dre, Bruce Springsteen, Eric Clapton, Pink

"End of the Line" with Nick and Simon airs Saturdays from 2-3 p.m. on WBOR 91.1 FM.

-Compiled by Carolyn Williams

'Man in the Dark' sheds light on alternate reality and family

BY FRANCES MILLIKEN COLUMNIST

August Brill, the protagonist of Paul Aster's most recent novel "Man in the Dark," can't sleep. A literary critic in his twilight, August fills his hours in darkness without the aid of sheep. Instead, he tells himself stories.

"Man in the Dark" is a short book. Yet, in less than 200 words, the reader is guided toward the discovery of a num-ber of realities. The is, was, and might be, are all present and ask to be examined from multiple perspectives.

The tale August tells himself while

lying in bed flirts with the sci-fi genre. Its protagonist, Owen Brick, wakes up in a parallel world in the bottom of a hole. When he emerges, he finds himself in an America where 9/11 did not occur, but where the country is instead at war with herself. Owen's mission, the reason for his removal from the world he knows, is to assassinate the creator of the story. This, the rebels believe, will bring the world to an end. As August is himself the creator of the story, there is some question of whether or not these worlds will collide. Auster kindly steers the reader in a different direction.

Launched into an alternative America, the reader is faced with a number of changes. The unreality proves surpris-ingly more disturbing than our post-9/11 America. Auster does not delve into the wider implications explicitly but in August's company, the reader's nd cannot help but churn with hypothetical considerations.

August, we discover, has more than fantastical horrors to grapple with. He is recovering in the home of his only daughter after a bad car accident. August resides in the shadow of his wife's recent death, a fog that led to drinking, and, subsequently, the crash.

August's granddaughter, Katya, joins

friend. Titus, has been murdered and Auster spends much of the book avoiding the specifics. What is initially important is the presence of their midebilitation.

and granddaughter escape from their pain during the day by watching film after film. Katya was a graduate student before Titus's death and August hopes that the litany of movies running across the screen is an indication of her progress back to the

The scenes that play out between August and Katva are Auster's most success ful in this novel. The characters unravel small moments of the films that they use as balm for their wounds. The solace they find in their discussions of the movie frame just one of the mediums through which the characters connect, but the pivotal moments for me were when they joined each other in the dark.

What begins as a fantastic anecdote of parallel worlds concludes as a love story. Discovering that her grandfather is also awake, Katya joins him in his gloom. In the company of his granddaughter August is able to address all that he evades in his sleepless hours

She asks him about her grandmother and what unfolds is a simply told but poignant story of love. August admits to detours and the disappointments of a lifetime but what lingers is a glimmer of contentment.

August's story allows Katya to tell hers. The gap in their ages lends a different mode of communication than that of a parent and a child. I can hardly imagine climbing into bed with my dfather for an intimate tête-à-tête, but I love the possibility of such an encounter, and here, I believed it.

At the conclusion of the novel I wasn't particularly attached to any of the characters. But Auster leaves us with possibilities. Things change, and this suggestion of transformation pro-vides the small remnant of hope that the novel needs to sparkle.

BIRD

CONTINUED FROM PAGE 1

seemed to be a really exciting person to bring to campus as our spring singer/songwriter," Eng added.

"CAB was surprised how quickly the tickets sold out," said head of CAB, Katherine Finnegan '09. "We obviously are very excited that such a talented performer will be joining us at the college on Saturday and don't blame students

for also being pretty jazzed about it."

Bird began his music career nearly 15 go and has since released 11 albums. He graduated from Northwestern University with a Bachelor's Degree in violin performance, and his earliest albums reflect his academic passion. "Mu-sic of Hair," produced in 1996, is a traditional folk album consisting of complex violin melodies and sparse vocals. While extremely different than his later work, the album highlights the fluidity of his talent as a trained violinist. Particularly striking on his first LP are "Nuthinduan and "Exile of Erin."

Bird's next two albums were produced with his band, Andrew Bird's Bowl of Fire, which consisted of a rotating group of Bird's hometown friends and mem-bers of other bands, such as Squirrel Nut Zippers, with whom Bird had collaborated in previous years. "Thrills" and "Oh! The Grandeur," completed over a On! the Grandeur, completed over a period of two years, explored the arena of folk and bluegrass. With an empha-sis on jazz piano and loose guitar riffs, these two albums moved Bird in the direction of what would become his signature alt-folk sound. Staying rooted in traditional folk violin, Andrew Bird's Bowl of Fire still relied on the violin as the main instrument but also included drums, chimes, and Bird's rasping vocal

When Bowl of Fire broke up in 2003, Bird took his music in a new direction as a solo artist. "The Swimming Hour," released in 2001, defined the Andrew Bird sound with an explosion of drums, upbeat vocals, and a less prominent violin. Still true to his folk-rock roots, Bird included bluegrass guitar riffs in songs like "Why" and "Headsoak." For the next eight years, Bird continued to regularly release solo albums including his most recent project, "Noble Beast," which debuted on January 20th. The record, to which Bird adds his impressive whistling capabilities, was quickly ranked 12th on the U.S. album chart. On this album, Bird successfully combined the various elements of his previous LPs. Particularly interesting and catchy tracks are "Oh No" and "Tenuousness."

In addition to his variety of singular musical endeavors, Bird has also been featured on the tracks of more than 30 other artists including Ani DiFranco, My Morning Jacket, and The Verve Pipe. On his way to becoming an indie-rock icon, Bird played a sold-out show at Carnegie Hall on Wednesday night and has also recently performed at The House of Blues in New Orleans and at the Civic Opera Center in his home

town of Chicago.

Andrew Bird will perform at Pickard
Theater tomorrow at 7 p.m.

SPORTS

Swimming defeats Div. I UMaine-Orono

CONTRIBUTOR

It was a David and Goliath story last weekend as the Bowdoin Poof Maine-Orono Black Bears on Saturday. Despite having a student hody seven times smaller than that of Orono, the Polar Bears held their own in the exhibition meet against the Division I opponent and garnered victories.

On the women's side, sophomores Allison Palmer (50-yard freestyle), Caitlin Callahan (200-yard breast-roke), Erin McAuliffe (200-yard backstroke), Megan Sullivan (200yard freestyle), and Jessie Small (500-yard freestyle) all won their individual events, as did first year Allen Garner, who finished first in the 100-yard freestyle.

These results led a stream of dominant swims from the Bowdoin women, resulting in a tight 105-100 victory over the Black Bears.

Sullivan's swims were especially impressive. Just minutes after her second-place finish in the 100-yard freestyle, she claimed first place in the 200-yard freestyle and a personal best in the event by .67 seconds

Success on the men's side was generated primarily from the dominant swimming of first year Nathan Mecray, with wins in the 100yard individual medley and the -yard freestyle, and senior Max Goldstein, who won the 200-yard breastroke and 200-yard butterfly.

However, it was senior captain David Swanson's swim in the 50vard freestyle that exemplified the Polar Bear's dominance on the men's

Winning the sprint race by over a second, Swanson soundly handled the Orono opponents and created a wave of success that carried the men to a 118-86 point victory.

The UMaine meet was ex actly what we were looking for," said Coach Brad Burnham. "The team hasn't raced much and with a couple of very tight meets coming it was nice to compete against an out-of-division opponent just to see how some individual races would go."

The swim teams will host Wesleyan and Trinity this weekend in a tri-meet against the Connecticut

COURTESY OF MATT BOWERS

ROCKIN' RODMAN: Elissa Rodman '10 gathers speed in the 5K classic last weekend at the Bates Carnival at Black Mountain

Nordic slides to 9th in first carnival

BY CHARLOTTE RYAN STAFF WRITER

The men's nordic ski team placed ninth and the women's team placed 10th in their first collegiate carnival of the season, hosted by Bates at Blake Mountain in Rumford

Courtney Martin '09 was the top Bowdoin finisher in 64th in the w en's 5K classic event on Friday. Erin Hatton '12 finished next in 66th.

In the men's 10K classic event, Colman Hatton '10 came in 42nd, with Scott Longwell '12 following behind in 59th. Junior Niko Kubota was the third Bowdoin finisher.

"It was a great accomplishment for [Kubota] to place so well after just coming back from a semester in Denmark where he didn't have the same training,"

Coach Nathan Alsobrook said.

Last Saturday, the women raced in a 15K freestyle, where Martin was the top Bowdoin finisher in 54th place with Hatton behind her in 67th.

The men skiled in a 20K freestyle event, where Longwell finished in 42nd and Hatton in 47th.

The freestyle races were mass starts instead of staggered starts.

There is a lot of tactical positioning to fight for your space and so you aren't squeezed out or tripped up," Alsobrook

One Bowdoin skier's pole broke and there were numerous crashes.

The course terrain was challenging, with a lot of steep climbs, quick descents, and very little time to rest in

"Our fitness really showed through,"

The very young team is still getting used to the racing distances and

"With every weekend and race v will become better accustomed to the race and the distance," Alsobrook said.

The team was missing its strongest skier in Walt Shepard '10, who is recovering from a sinus infection. Alsobrook hopes he will be able to race in at least one of the events at this weekend's carnival hosted by University of New Hampshire in Jackson, NH.

The team's goals are to stay healthy

and race to its potential this season.
"If we're healthy, we should be able to really shake things up this season and garner a little more respect for Bowdoin skiing," said co-captain Elissa Rodman '10.

Men's track places 2nd

CONTRIBUTOR

After beginning the season with two successful meets at home, the Bowdoin Men's Track Team headed down to the Brandeis Invitational last Saturday for its first big meet of the season, determined to build upon its fast start.

Competing against nine teams, including NESCAC rivals Colby, Bates, and Amherst, the Polar Bears did not miss a step with their impressive second place finish.

Bowdoin scored in 16 different

events and collected 139 points, trailing only Worcester Polytechnic Institute's 158.5 point total.

According to Coach Peter Slo enski, this meet had a "high level of competition" and it was a "good meet to help us get ready for the championship season in February.

The relay teams have been a source of strength for the Bears, and they had another remarkable day with two victories and a secand place finish. The team of Zach Winters '11, Ike Irby '09, Alex Jean-'11, and Kyle Hebert '10 finished first in the 4 x 400-meter relay with a time of 3:29:02.

In the other relays, Sam Frizell '12, Riker Wikoff '12, Brett Stein '12, and Thompson Ogilvie '10 won the distance medley by posting a 10:24:95 finish. Stein, Jordan Termine '10, Brian Huynh '12, and Matthew Hillard '12 finished second in the 4 x 800-meter race.

Perhaps the Polar Bears' most

dominant performance came from Hebert, who won the 200-meter dash by 10 meters. The 600-meter runners demonstrated impress depth, as Jeanty, Irby, and Hillard took second, third, and fourth in the race.

Senior captain Luke Fairbanks spearheaded the effort off the track, winning the shot put and finishing second in the weight throw. James Bingham '10 and Tony Thrower '09 contributed to the effort by scoring in the latter

"We had a good day in the throwing events," Slovenski said. Our throwers have been working hard and they competed well."

In an exciting day during which Bowdoin scored in every field event, Colin Hay '10 and Chris Martin '12 also gave noteworthy performances, placing third in the triple jump and second in the high jump, respectively.

The Polar Bears should be feeling good about themselves afanother strong showing at

Brandeis. "Competing against nine teams definitely created a big air of excitement. Also, beating all three teams [Bates, Colby, and University of Southern Maine] that we're guaranteed to see at the Maine State Meet has definitely boosted our confidence," said Hebert.

However, the team realizes that things will only become more difficult as it prepares for its upcoming championship meets.

There was a lot of good competition this week, but we know we'll be up against stronger teams this weekend at home, and then the next week at Bates," Slovenski said. "The schedule gets tougher each weekend."

Bowdoin will host Tufts, Springfield, Colby, and MIT at Farley Field House on Saturday.

Women's track races to win in 9-team meet

BY ANNIE MONJAR

When officials announced that the Bowdoin Women's Track Team had scored a three-point victory over Brandeis at the Brandeis Invitational last Saturday, the Bears' cheer of relief and celebration broke the tension and exhaustion of the afternoon

The meet ran almost an hour and a half later than scheduled, testifying to the focus and energy the Bears put on the track in Bowdoin's 157-154 defeat of the Brandeis Judges.

"Lots of people had really im-pressive individual performances, gaining a point here and there," said Dana Riker '10. "That adds up really quickly!"

Seven other New England teams competed at the Brandeis Invitation al, including Colby, Bates, and the University of Southern Maine, all of whom Bowdoin will have to fend off at the Maine State Championship.

The Bears clinched their victory

with the accumulation of some out standing individual efforts, including a kick in the final stretch of the 400 meter dash by captain Alison Pilon '09 that landed her a second place

"It's great to have Alison running so well," said Coach Peter Slovenski When she is healthy and running well it gives us a lot more depth in the sprints and relays."

Meagan Tilton '11 also gathered points for the Bears with a fourth and a third place finish in the high

"Meagan Tilton is having a ter-rific season," said Slovenski. "She set two personal records on Saturday and gave us points in some difficult events."

First place finishes by Elsa Millett '12 in the 200-meter dash and Laura Peterson '12 in the long jump also gave valuable points to Bowdoin. Secnd place finishes by Kelsey Borner '09 in the shot put, Chris Head '11 in the pole vault, Ali Chase '09 in the 600-meter run, the distance medley relay, and the 4 x 800-meter relay helped seal the deal for the Bears.

The 4 x 800-meter relay, the day's final event, was the height of the meet's tension for many, when an unclear point margin put weight on the performances of Jess Sokolow '09, Riker, Caroline Tory '12, and Molly Duffy '11.

"It was great to see them leave absolutely everything out there," said Christina Argueta '11. "We all try and do this each week, but I think really exemplified that attitude this week."

This weekend, the Bears will host the MIT Engineers, who placed third at the 2008 Division III New England Championship.

"MIT has some really strong runners and it will definitely be a close meet," Riker said. "But we have a lot of depth and if everyone on the team rises to the occasion the way they did at Brandeis this past Saturday, we should be able to compete with them."

The meet against MIT marks a turning point in the track season, when championship meets with heavy competition, like the February 6 Maine State Championship and the February 21 Division III New England Championship, will demand the same kind of performances the Bears showed Brandeis.

SLAMMIN' SELLEW: Paul Sellew '10 hits a lay-up in practice in Sargent Gym on Thursday.

Men's b-ball beats Jumbos, falls to Bates in close game

BY DAVID SHAEFFER

The members of the men's basketball team entered Saturday's game 0-2 in the NESCAC, and in desperate need of a conference victory against Tufts.

They delivered.

Led by senior Kyle Jackson, Bowdoin used a balanced scoring attack to down the Jumbos, 89-81. Tufts came out of the gates strong, holding a 26-18 advantage in the first half, though Bowdoin rallied to tie the game at 44-44 at the half.

In the second half, first year Ryan O'Connell helped Bowdoin take a 56-54 lead with back-to-back three-pointers. The Bears never looked back, pulling away with quality free-throw shooting and timely three-point baskets.

In addition to Jackson's 17, Bowdoin had an additional four players in double-figures: O'Connell finished with 14 points, junior Mark Phillips had 15, while junior Mike Hauser and first year Will Hanley each had 11 points.

On Friday night, the Polar Bears suffered a tough loss as Bates' Scott Place connected on a three-pointer with four seconds remaining to seal the win for the Bobcats. Junior Paul Sellew's last gasp three-point attempt bounced off the back iron, giving Bates a 57-54 win.

The last four seconds of the contest seemed to underscore the larger trends throughout the game: Bates finished the game connecting on 9 of 13 from behind the arc, while the Polar Bears were a dismal 2-11 from downtown.

Phillips led the Bears with 12 points, with a game-high eight rebounds and three blocks.

Despite a 1-2 conference record this season, the team still has its sights on the NCAA tournament.

"As for our expectations for the season, they have not changed," senior Tim Lane said. "We are still aiming for a NESCAC Championship and another berth in the NCAA Tournament."

This weekend, the Polar Bears host No. 16-ranked Amherst College on Friday at 7 p.m. and Trinity at 2 p.m. on Saturday.

Over the two games, the Polar Bear cgaches will observe the "Suits and Sneakers" awareness weekend to show their solidarity with the American Cancer Society. In observance, participating National Association of Basketball Coaches (NABC)-member coaches—including Bowdoin coaches Tim Gilbride and Preston Beverly—will wear sneakers with their suits.

The efforts of college and high school coaches across the country have raised nearly \$45 million to fight cancer since 1993.

Women's basketball faces tests against Lord Jeffs and Bantams

STAFF WRITER

The women's basketball team sits at a crossroads in its season, right in the middle of the most important four-game stretch of its schedule.

Certainly the NESCAC tournament will ultimately crown the conference champion, but this weekend the Polar Bears (14-4, 2-1 NESCAC) can begin to stake their claim for the honor. The team has crucial road games against Amherst (18-0, 3-0) tonight and Trinity (14-2, 2-1) tomorrow night, and two wins would prove the team's mettle to anyone.

"We expect to beat every team we play if we bring our game and if we bring our focus and intensity," said senior tri-captain Maria Noucas. "We believe that we are a good team, and that's what matters going into every single game: the confidence and belief to play great basketball for 40 minutes."

Bowdoin's critical four-game stretch started tumultuously last weekend, as the Polar Bears scored both a huge win and a devastating loss at home against NESCAC rivals.

Last Friday, Bowdoin crushed rival Bates, 84-53, and started off with two wins in NESCAC play. Bowdoin shot 50 percent in the first half to take a commanding lead, and it outrebounded Bates 51-25 in the game.

Noucas called the game against Bates "probably our best 40 minutes of the season against a top team in the conference," and added that it was a "great team game. Really just everyone contributed to a huge revenge game for us and a great win."

The Bobcats had previously beaten the Polar Bears in a non-conference showdown in Lewiston, 64-59, on January 8.

The Polar Bears were sparked by junior forward Leah Rubega's return to court for her first game since December 11 due to injury. Rubega finished with 19 points on 9-15 shooting, and 10 rebounds, seven of which were on the offensive glass.

Last Saturday, Bowdoin dropped a hard-fought game to Tufts, 67-56. After a 19-1 Jumbos run in the first half, the Polar Bears battled back to tie the score at 28 at halftime.

The final minutes of the game, however, belonged to Tufts as the Jumbos outscored Bowdoin 18-7 over the final six minutes to insure the win.

Senior tri-captain Alexa Kaubris finished with a team-high 13 points and nine rebounds for the Polar Bears.

Sophomore Katie Bergeron chipped in 13 of her own and really stepped up over the weekend, according to Noucas.

"Katie Bergeron had a great weekend for us and is becoming our go-to scorer," Noucas said. "She's a great all-around player and is starting to do some good things for us defensively." The Polar Bears play at Amherst tonight against the conference's top team, but Head Coach Adrienne Shibles believes that the team is ready for the challenge.

"We are all really excited," Shibles said. "And the women are approaching the game in the prefect way. They're excited and really focused. We all see this as a great opportunity to show what we're made of."

"[Amherst is] young and wellcoached," Noucas said. "We just have to play our game in their gym—we know what we have to do to win. They are physical, run, and rebound well, but we do all of those things, too, when we play well. I think it's going to be a really good, close game."

Tomorrow at Trinity, the Polar Bears will look to steal a conference win on the road to keep pace with the NESCAC's top teams.

"Our conference is so competitive and we bring a game that not a lot of other teams in the conference play, with our full court defense and transition game," said Noucas. "We love our conference because every game is huge. But really, it's what we do that matters and if we bring what we can, then we'll be fine."

"We have all of the tools we need, we have great talent," Shibles added. "The Bates game was a good example of what we can do as a program. We just have to focus on one game at a time, enjoying the moments and staying loose."

Women's hockey looks to rebound against Middlebury and Williams

BY EMMA POWERS

The women's hockey team fell to Amherst and Connecticut College last weekend, leaving itself winless in its last three matches.

The Bears fell 4-3 to No. 5-ranked Amherst and 4-2 to the Camels.

Dominique Lozzi '12 and Jill Campbell '11 scored against Connecticut College, while Lozzi and Lindsay McNamara '09 each netted goals against Amherst.

Goalkeeper Sage Santangelo '12 proved solid, stopping 30 shots in the Amherst game, and 22 shots against Connecticut College. Despite the losses, the Polar Bears

Despite the losses, the Polar Bears remain optimistic about the rest of their season.

"It was definitely disappointing losing this weekend...but there are some positives that we took away," Lozzi said. "This time we had a much closer game against Amherst, and even though we came up short, the close game showed us that when we play to our potential we can compete with teams that are not only at the top of our league, but also nationally ranked," Lozzi added.

Campbell also commented on the positive aspects of the weekend's games.

"We were proud of our efforts ending the game down by a lone goal," she said. "We have seen that when we bring our best game, we can outplay any team we face," she said.

One week following the opening of the Sidney J. Watson Arena, the Bears remained thrilled with the new facility.

"It was still really exciting to play in the new rink," Lozzi said. "But the opening was really special and is definitely a memory we will all have for a long time." Campbell added that the new rink is beginning to feel more like home.

"After playing in Watson for the second weekend, it started to sink in that this is where we will be playing the rest of our college careers," Campbell said.

The Polar Bears will play away games at Middlebury and Williams

"These are definitely two very good teams and we know we will have to play great for a full 60 minutes if we are going to win," Lozzi said.

Building off of last weekend's games, and looking into the future, the team is prepared to bring momentum and energy to the rest of the season

"Every game from here on is crucial," Campbell said. "We are looking to bring our best game, each game, for the entirety of the match and leave the arena with nothing short of a win."

Hockey on a losing streak

The men's hockey team fell through the ice last weekend as they lost to Concticut College and Tufts University,

3-1 and 5-3, respectively.

Last Friday in New London, Connecticut College carried a precarious 1-0 lead into the second intermission

However, the Camels exploded out after the break with a goal just 16 seconds into the period. Leland Fidler '10 responded with a short-handed, unassisted goal at 9:40, but the Camels fought back just under a minute later their third and the game's final goal at 10:39.

Goalie Richard Nerland '12 rebuffed 18 of 21 shots.

aturday at Tufts, Bowdoin fell 5-3 as Coach Meagher looked to shake things up by resting his usual starters. Goals from Aaron O'Callahan '12, Rudy Luther '11, and Brendan Reich '11 gave the Bears the lead after two periods with a score of 3-2.

Yet the Jumbos responded with a stampede of goals in the third period,

hitting three unanswered strikes. Senior goalie Nick Smith stopped 25

The slide continued Tuesday night as defense reigned supreme at Waterville and Bowdoin suffered a tough 1-0 defeat to its fierce NESCAC rival

With the game deadlocked going into the third period, Colby moved the puck through Bowdoin's defense and capped the move with a cool finish past rland.

Bowdoin pressured the Mules for much of the game, and their persistence nearly paid off as senior co-captain Mike Collins found himself free in front of the goal with the puck, and fewer than five seconds remaining on

Poised to shoot past the Colby net

minder, a Mule defender hauled down Collins from behind.

The referees opted not to award Collins a penalty shot, and the final seconds ticked off the clock giving Colby the

Nerland stopped an impressive 34 of 35 in the heartbreaking los

The shutout posted by the Mules was the first time Bowdoin was held score less since February 28, 2004, a remarkable stretch of 118 games

Many Bowdoin fans traveled to Wa terville for the game, accompanied by Director of Safety and Security Randy Nichols and some Bowdoin security of

Despite an improved performance ainst Colby, Bowdoin has lost seven of its last eight games.

"I would say we're getting what we deserve," Meagher said.

"Our team's style and our system makes the players play at pace, makes them generate offense," he said. "Where we're lacking is off of that, the second and third opportunities require winning battles, require playing in the so-called dark areas where your nose gets dirty."

nior co-captain Matt Smith agrees "I don't think we're playing smart hockey necessarily," he said.

Although passing through a rough patch in their season, Smith rema optimistic.

"We're definitely a talented team with a lot of potential, and we certainly can put it together," he said.

Collins corroborates the belief that the men have the resolve to push for-

"We saw the effort last night. It's on the right track, and you just go from there with what you got and see how the chips fall," he said. "That's all you can do."

Tonight the Bears face Salem State, and tomorrow they will clash with the University of Southern Maine.

The Case for Kurt

SEE EM BY CHRIS ADAMS-WALL COLUMNIST

"So how 'bout Kurt Warner, huh?" my friend Robbie asked from the other end of the landline. I had not seen nor spoken to Robbie in nearly a year, as and his family recently had moved to the next town over-what felt like light-years away at that age-and he had caught me off guard almost immediately into the first conversation to rekindle our friendship, a process that would continue to be held in abeyance after the perplexing question. "Who the heck is that?" I retorted, as if that name was supposed to mean some-

Robbie was well aware of my sports fanaticism, as well as my wealth of knowledge for both prominent and obscure professional athletes; suffice it to say he was surprised that I hadn't recognized the cryptic name, as he responded by giving me a vague description of the stranger, saying basically that he was that guy—the quarterback for the Rams actually—who was having a great season. I was baffled; I didn't get it; it was a name that I had never before heard.

Our conversation ended soon after that, and still peeved, I went immediately to my father who knew every-thing: "Dad, who is Kurt Warner?" He barely took his eyes off the book he was reading and from his grandiose leather recliner nonchalantly responded: "He's that guy, the quarterback for the Rams; he's having a great season." From Robbie to my father, apparently that's all I needed to know about the west entry into my cerebral rolodex of sports figures.

Had my father been able to tell the future at the time however, his explanation of who exactly Kurt Warner was undoubtedly would have been far more profound, and had it been excerpted, probably would have looked something like this: "He's that guy, the quarterback for the Rams, and he's having a great season. You will root for him in the Super Bowl against the Titans this year when he completes one of the most heartwarming stories in sports history. Over the next three years, you will watch in awe as he tears apart the most potent of defenses, in orchestration of the Greatest Show on Turf. And you will buy his jersey d proudly wear it to the first middle school dance, and will use it as a tissue after your girlfriend's girlfriends come up to you to tell you it's over.

This Sunday, in case you don't al-ready know, Warner will be playing in his third career Super Bowl, leading the Cinderella Arizona Cardinals into battle in Tampa Bay against the AFC Champion Pittsburgh Steelers. But surprisingly, it is not the anticipation of the big game (that may go down as the most random, unpredictable big game ever), nor who will win, that has been so alluring these past two weeks een so alluring these past two weeks sued by a myriad of the game's enthusiasts almost immediately after 'Zona downed Donovan McNabb's Eagles, and one in which numerous members of the sports media still remain on the fence about: Kurt Warner will one day be inducted into the Pro-Football Hall of Fame (Gasp)

I know what you're thinking: the guy came into the league too late, and while he's had some success, a couple of great seasons isn't enough to compensate for the five years of virtual nothingness he experienced from 2002 to 2006...unless, however, he can win on Sunday. To be fair, Warner did come onto the NFL scene at the uncommon age of 28 in 1999, shuffled between three different teams and lost his starting job to six different quarterbacks during the five-year nadir of his career, and may not win the game on Sunday. But when you examine his career as a whole, from his raw numbers to his remarkable contributions to the game, none of that should really matter, especially not Sunday's outcome, because regardless of what happens, Kurt Warner deserves his custo bust in Canton

The 37-year-old veteran not only vill become the third oldest quarter back to start the big game, but also will become just the second quarterback in NFL history to start Super Bowls for different teams (Craig Morton did it with the Cowboys in 1970 and the Broncos in 1977; he lost both games). And that in itself, when

ou really think about it, is as incredible and impressive a feat as there is. Just consider the unlikelihood of a quarterback starting Super Bowls for two different teams over the course of a career: if the quarterback leads his team to the Super Bowl and performs well the first time, chances are that team will do everything in their power to lock that player up for several years so as to preserve the team's chances of returning to the NFL Title Game in the future (see Jake Delhom me). And if the quarterback leads his team to the Super Bowl and does not perform well, odds are that team will still try to bring back that player, until the club finally realizes that he wasn't the reason they had been there in the first place, and opt to let him walk, at which point for the quarterback, it's too late in the game (see Drew Bled-soe and Kerry Collins). I guess it's no wonder that this phenomenon will have happened only twice in history: it's virtually inconceivable and nearly impossible; just not for Warner. The man who has always prided

himself on being the underdog, will find himself in a similar situation in five to 10 years when it comes time for the Board of Selectors in Ohio to de cide his worthiness among the game's elite. And although his resume does have the one abysmal gap, luckily for Warner, it also boasts a plethora of scintillating awards and figures. His career completion percentage of 65.4 ranks only second to the Dolphins' Chad Pennington, his career passer

rating of 93.8 comes in fourth behind Steve Young, Peyton Manning, and Tony Romo, and he has been almost perfect in the playoffs owning a 97.3 postseason passer rating, slightly bet-ter than Joe Montana. He's won two regular season MVPs (1999, 2001; one of five to do so), will have played in three Super Bowls by Sunday's end (and perhaps have won two of them), and has 182 career touchdown passes to Hall of Famer Troy Aikman's 165, not to mention a trademarked rags to riches fairytale from stocking soup at his local grocery store, to quarterbacking a championship football team that we all have come to know, love, and embrace. He never misses an opportunity to thank the Lord and his son Jesus Christ for his successes, he's always open, optimistic, and honest in front of the media, and off the field he is a true family man. Quite simply, Warner is as genuine as they come (as if we didn't already know that). And in addition to his sheer talent and the timely throw that he always seems to make, it is perhaps Warner's faith, resiliency, and lighthearted attitude that has propelled him through an amazing career.

So let the debaters debate and the talkers talk about why he should be denied his deserved coronation among football legends. Warner in the meantime will be focused on the task at hand: winning Super Bowl XLIII. He might have to worry about politics later, except that he won't have to: win or lose, he's in

OPINION

BOWDOIN ORIENT

Full disclosure

n his message to the College community last week, detailing Bowdoin's response to the current financial crisis, President Barry Mills showed that he and the financial "blue tarp" committee had done some serious thinking about the school's options. Presented with tough choices, Mills and the committee devised a measured response that calls for palpable sacrifices from students, faculty, and staff: freezing salaries, holding operating costs flat, and a small increase to the student body, among other things. Even more impressively, according to Mills, these actions would be accomplished in a way that preserves the "core values" of the College and the education that it offers.

All this we applaud. However, in a sparsely attended student forum on Tuesday night, the administration revealed a bit of information that gave us pause.

In his message, Mills wrote that the student body increase "will be accomplished in a manner allowing us to continue our 'need-blind' admissions policy." However, in the forum, it was disclosed that this increase to the student body will at least partially come from transfer and waiting list applicants. Neither of those applicant pools is subject to the need-blind practice that Bowdoin uses during regular admissions. The College's aid budget will increase next year, but only in proportion to the size of the current student body; it does not include an allocation for 10 additional students

Such a change will not substantially alter the composition or quality of the incoming classes for the next few years. In the forum, students were informed that the College has no shortage of qualified transfer and waiting list applicants. Given the drastic measures taken by some colleges—Brandeis, for example, just announced that its budget shortfalls are so large that it is selling the holdings of its art museum-we think this aspect of the committee's proposal is very reasonable. We also commend the College on maintaining its commitment to its strong financial aid program, particularly the recently instituted no-loan policy.

What disappoints us is the veiled language in which Mills presented the student body increase in his memo. Given the details that were revealed at the forum, to say that the increase will allow Bowdoin to "continue our 'need-blind' admissions policy" is unclear at best, and deliberately misleading at worst. Yes, technically the College will not be breaking its commitment to that policy. But in reality, next year Bowdoin will most likely end up with 10 more students than usual who are not subject to the policy. This strategy weakens our commitment to need-blind admis-

Bowdoin is facing serious financial challenges, and this proposed action is appropriate in light of them. However, students deserve to know the full scope of the College's approach. The details of the student body increase—which were only revealed in response to a student's question at the forum-are important enough that they should have been included in Mills' original message. As stakeholders in the school's future, students need access to such pertinent information so that we can appreciate and understand the severity of this crisis, and help to solve it. Omitting the details implies a disdain for students' thinking and a lack of confidence in our ability to participate in Bowdoin's governance—two things that, it could be argued, are "core values" of this institution.

The editorial represents the majority view of The Bowdoin Orient's editorial board, which comprises Nick Day, Nat Herz, Will Jacob, Mary Helen Miller, and Cati Mitchell.

LETTERS TO THE EDITOR

Hetero-normative crossword upsetting

To the Editors:

While the crossword is seldom the most controversial piece of a newspaper, last week's Orient had a ord clue which, for me, was more objectionable than any article. Clue 9-down, "Women's partners," was solved with "Men." This blatant hetero-normative thinking was not only unnecessary, but also incredibly

The Orient is Bowdoin's voice-an entity which is supposed to represent the College as a whole. The care of its editors cannot only be taken with articles—every aspect of the paper is a statement about the College, including the crossword. This careless clue is a display of heterosexism on a campus that has been striving to become "Queer-Friendly." In order to achieve this goal, every group on campus must make an effort, especially one as prominent as the Orient. I can hardly believe that in one issue, there could be an op-ed asserting the need for co-ed bathrooms on one page, and a statement as inconsiderate as this clue on another (to say nothing of the disarming connotations of 50-across,

"Rooster's meat"—"Hen").
For this reader, it is clear that the Orient's editors need to take greater consideration of what is communicated in every section of the paper, including the crossword.

Sincerely, Hannah Cyrus '12

Pritzker should learn to ignore materialism

Sarah Pritzker ("Bowdoin costs more than tuition," January 23) finds Bowdoin's atmosphere oppressive: an endless battery of haute couture ex-hibitionism and "other blatant signs of wealth." She pans as "unrealistic one solution-"eliminate all fashion trends because they might be perceived as exclusive"-and goes on to propose that we become more aware of our foibles and de-emphasize material things.

heal thyself! Pritzker Doctor, heal thyself! Pritzker should cultivate a healthy obliviousness of the goods that have made it onto her shit list. I've been here for four years and have no idea what a Longchamp bag, a Tory Burch flat or a "welly" is. And Sperry Topsiders (we used to call them deck shoes on the ACK) are subdued enough to be overlooked by anyone not on a misplaced crusade for social justice. As for the "many Bowdoin students [who] regularly have the chance to travel to exotic locales"-exploit their experiences: it's a way to increase your awareness on the

Alexander Hamilton once complained that John Adams had "a jealousy capable of discoloring every object." It behooves us all not to evince that limit-

Sincerely, Miles Pope '09

College will regard Robinson like Fox News

Your newest columnist stated last week his intention of becoming "the Fox News of Bowdoin." I think I speak for much of the Bowdoin community when I say that we gladly welcome his insights, and plan to treat them with the ne respect and attention that we currently pay to Fox News.

Roe v. Wade vigil brings shock, then reflection

BY EMILY GRAHAM

Upon returning to campus after inter break, I was greeted by several more feet of snow on the ground, a new hockey arena, and a pile of unwashed undry left on my floor prior to break A less noticeable, yet equally significant change was the arrival of a series of posters, broadcasting the tens of millions of abortions that have occurred since the Supreme Court handed down the 1972 Roe v. Wade decision, which legalized abortion nationwide.

The posters invited students to join the Catholic Student Union in a vigil on January 22, to commemorate the 36th anniversary of Roe v. Wade. The posters prominently displayed a large, color picture of an almost-full-term fetus.

I was immediately put-off by the posters. The use of such an in-your-face tactic seemed insensitive protesting a decision that has helped millions of women. In discussions following the poster's debut, many students agreed that the Catholic Student Union should have organized their vigil in a more discreet way

The image, in particular, disturbed ny. It seemed to falsely indicate that the fetus in the picture was at a stage in which it was subject to abortion. In fact, a 2002 Centers for Disease Control and Prevention study asserts that nearly 60 percent of all abortions occur within the first eight weeks of gestation—far earlier in development than the image on the poster. Several imagined that any woman who has chosen to have an abortion would have been very disturbed by the

sight of such a fully-developed fetus. I thought that the posters were tactless and offensively one-sided in their portrayal of an issue that hit many close to

Hoping to glean some understanding from examining the other side of the issue, I went to the Chapel that Wednes day night to experience what I expected to be an attack on the views of so many

What I got shattered my expectations. The scene in the chapel was quiet, respectful, and incredibly intin Only a handful of students sat, reflecting silently, on the benches. I was given a sheet explaining that every 27 seconds, a woman undergoes an abortion. One student rang a bell in that increment to commemorate the unborn.

The scene had me completely taken aback. The vigil was a gathering of like minds, and did not serve as a forum for debate or discussion. Where I had expected harsh words about the indecency of the pro-choice stance, I saw instead people mourning the loss of life.

I contacted Robert Flores '12, who

helped to organize the vigil, seeking out further explanation. Flores contended that the group aimed to spark interest, not controversy, by advertising the vigil so provocatively. When asked if the posters had a target audience, Flores said that the Catholic Student Union hoped to reach out to other pro-life students on campus and to present an alternative to the overwhelm the overwhelmingly pro-choice stance on campus. He added that the vigil's aim was to promote a respect for life, and

was not necessarily political in nature. The vigil was held in reverence of the beauty of life, Flores said, and was not intended to offend those of opposing viewpoints. He said that the posters served not as an accusation, but as an invitation to those with

After taking the proverbial jump, if not leap, to conclusions, I was forced to take several steps back. The bottom line comes down to an issue of free speech members of the Catholic Student Union have a right to voice their opinions, and to do so in as public a manner as they.

As a woman who identifies herself as pro-choice, I now find myself disappointed that students on campus, or perhaps women's groups on campus, did not see the anniversary of Roe v. Wade as an opportunity to celebrate the decision. It is important not to become complacent when part of the majority: just as those with more conservative views can, and should, voice their opinions, so should those who belong to the more liberal contingent on campus. Debate on campus is critical, and all sides of an issue should be voiced and represented.

This issue goes beyond the group's fundamental right to express itself. On a campus as "liberal" as Bowdoin's, students should welcome dissent. We preach openmindedness, yet we seem predisposed to react to, and be offended by, certain issues It is easy to call oneself accepting of others' opinions while surrounded by people who share similar views.

Together, we can overcome the pepper shaker tragedy

A SOJOURN IN CIVILIZED LIFE

BY ANNIE MONJAR

In the past couple of weeks, students have hidden the comment card bulletin board in Thorne with colorful, scrawled a cards. These cards do not lament, for the hundredth time, Thorne's lack of Nutella, nor do they sing the praises of the sweet, summery flavor of the most recent mango vinaigrette. The problem this time? Pepper. Specifically, its shakers.

In the background of any dinner at Thorne, there is a recurrent melody that's become so commonplace it's hardly noticeable anymore:

"Ooooooh, close!"

A split second of confusion, and then clarity—just a pepper flip. Like the call and response of lions on the savanna, this behavioral pattern that fills the all-too-frequent, awkward silences of dinner conversation has become the rhythm of our-habitat, the beat of our feeding.

I can't imagine any self-respecting Bowdoin student would be unfamiliar with the game that, for mere practical purposes, I'll call "Pepper Flip" (though the notorious, sacred pastime hardly demands a formal title).

But, for those of you whose dinner chats are stimulating enough to keep your pepper shakers in place, here's the premise: hold the pepper shaker by its "head" (I haven't a clue what the technical term forthat piece is) with your thumb and index finger, flip it, and hope it lands right side up. Only one try per meal.

Sound easy? False. I've never—suspend judgment here, if you can—not once, in my three-and-a-half years at Bowdoin, successfully landed a shaker.

My greatest fear at this, the threshold of my senior spring, is not losing touch with close friends, or being unable to find steady work, but graduating without the rare and distinct satisfaction of hearing the decisive, uniform thwap of a shaker's base on a wood table.

I worry—every evening during dessert, in fact—that I'll never gaze into the air above a napkin basket and watch a pepper shaker chaotically spin, like the profound and senseless whirl of a galaxy, and see it land in vertical perfection, giving back the universe its security and mankind its hope.

But after a night of restless sleep, tortured by dreams of scattered pepper granules and rolling shakers, I awoke one morning to find the terms of the game altered.

The Thorne pepper shakers, as long as I've been at Bowdoin, have had a slightly conical base with a pronounced top whose sides protrude over the glass container. The head is easy for the fingers to grip, making for an efficient, tight toss.

You can imagine the uproar, then, when we all came back to campus from break and found, resting atop the tables, an entirely new model, sporting a base whose width is uniform with that of its top. When you first try to grab it, your fingers slip right off.

Pepper pandemonium ensued. Within days of our return, angry and saddened comment cards blanketed the bulletin board, their complaints ranging from practical to ideological: "You can't flip these-shakers!!" "What was wrong with the old ones???" "In this economic climate, should Bowdoin really be putting its resources into buying new pepper shakers?"

Patty, commendably, pulled out the heavy artillery by typing a large-fonted note that was tacked, with the firmness and authority of Luther's "Ninety-Five Theses," in the middle of the squabbling cards. A lot had gone missing (I consider extra-Thorne practice of Pepper Flip cheating, but never mind that for now); many were broken (from repeated abuse, no doubt); it was simply more cost-effective to buy a new batch.

I applaud Patty for her frankness in addressing these cards; in this trying economic time, or in adulthood, for that matter, should we be wasting ink and pepper on complaining about a change in pepper shakers?

But I can't deny that the loss of the old form of Pepper Flip has me a little rattled. I should be sleeping more soundly, but I'm experiencing the empty confusion of being suddenly without a Quest.

The verdict is still out on the future of Pepper Flip, however. Some say the shaker is easier to flip now. Some that it doesn't count anymore because it's easier. Some say the grip is impossible. Some that the shakers are a progressive innovation, like the development of a better baseball bat.

At the end of dinner, though, we're all still being fed Thorne's delicious, sufficiently pepper-seasoned meals. So even in the wake of our beloved old shakers, us Polar Bears can be happy and find companionship across the table, on the other side of the modernized self-and penper.

ized salt and pepper.

So maybe the issue isn't worth flipping our shakers over.

Mitchell'54 good pick as Mid-East envoy

BY CRAIG HARDT

The era of change is upon us—or so President Obama and his new administration would like to think. Yet as Obama's administration embarks on its mission to bring real change to the world, some lingering problems stand in the way. One such problem is the centuries-old conflict in the Middle East between Israel and Palestine.

On Thursday, President Obama and newly appointed Secretary of State Hillary Clinton announced that George Mitchell '54 would serve as the administration's special envoy to the Middle East. What exactly does this appointment mean for America's approach to one of the world's hottest hotspots? To answer that question let's examine why Clinton and Obama chose the former Bowdoin grad for this hefty assignment.

Mitchell is best known for his time on Capitol Hill, where he served as the U.S. senator from Maine for four-teen years (1980-1994) and as the Senate majority leader for five years (1989-1994). As a senator, Mitchell was respected by Democrats and Republicans alike for his dedication, honesty, and willingness to work across party lines.

After his time in the Senate, Mitchell agreed to serve as the chairman of the international committee on disarmament in Northern Ireland and later as chairman of the peace negotiations that resulted in the decisive Good Friday agreement. After achieving something that few thought was possible—peace in Ireland—Mitchell was asked to chair an international fact-finding committee on the conflict between Israel and Palestine. His work resulted in his receipt of the

Presidential Medal of Freedom and the Liberty Medal.

But will Mitchell and the Obama administration really be able to bring peace to a region that has been mired in conflict seemingly from the beginning of history? Previous administrations have tried without success to bring about lasting peace in the region, so why should this attempt be any different? The recent Israeli attack on Gaza in response to Hamas' terrorist attacks on Israeli citizens has once again brought this conflict to the international forefront. No longer can we sit back and say, "We've tried our best and failed so there's no hope." Not if this administration wants the world to believe in their popular slogan, "Yes we can."

Although the two sides of the conflict seem more divided than ever and the possibility of peace seems as hopeless as it has been in years, there are a few key reasons I'm willing to jump on board with George Mitchell and the administration in believing that peace can be achieved.

First of all, the appointment of a man of Mitchell's considerable foreign policy stature to the role of a special envoy demonstrates the urgency and importance with which the new administration views the goal of peace in the Middle East. Success in this endeavor would arguably be the single most important feat of the administration in securing America and reasserting our country's position as the leader of the world and a champion of peace.

Furthermore, the situation in the Middle East is every day becoming more unbearable for its inhabitants, which could and should lead to more popular demand for both the Israeli and Palestinian governments to work swiftly to reach an agreement. Recent polling data suggests that the majority of Israelis and Palestinians would support a two-state solution in which the Palestinian state would include the West Bank and Gaza Strip areas.

Unfortunately, matters are complicated by the 2006 Palestinian election of Hamas. Its leaders have publicly stated that they do not and will not recognize Israel's right to exist. Hamas' takeover of Gaza has led to considerable violence and countless civilian deaths in the area. Yet behind these harsh words and harsher actions there remains a glimmer of hope: Hamas has also stated that it would be open to a long-term truce with Israel and views America's election of President Obama as a sign that America is ready to lead and willing to listen if renewed peace efforts are planned. The cease-fire, agreed to on the eve of President Obama's inauguration, is perhaps most indicative of the two sides' willingness to give the new American administration a chance at resolving this conflict.

George Mitchell accepted the post of special envoy with no illusions regarding the gravity of the problem at and saying, "I don't underestimate the difficulty of this assignment." But more telling was the conviction in his voice when he said, "there is no such thing as a conflict that can't be ended. Conflicts are created, conducted and sustained by human beings. They can be ended by human beings." Mitchell may not be able to overcome all the obstacles to the pursuit of peace, but we can be sure that he won't be giving up anytime soon. If he's not going to stop trying, we should not stop believing

COMMENT OF THE WEEK

Last week, the Orient introduced comments on its new Web site. Here, we have chosen the most thoughtful comment posted in response to our previous Issue.

Regarding the Martin Luther King Day editorial:

"If the college is really serious about making MLK day a priority (note we're usually on winter break), then a day off from classes for reflection and service as a community is the way to go. But we've got to move beyond just acknowledging Dr. King's legacy to questioning what it means today; his dream has yet to be achieved, at Bowdoin and around the world."

IAN YAFFE '09

OPINION

BOWDOIN ORIENT

Full disclosure

In his message to the College community last week, detailing Bowdoin's response to the current financial crisis, President Barry Mills showed that he and the financial "blue tarp" committee had done some serious thinking about the school's options. Presented with tough choices, Mills and the committee devised a measured response that calls for palpable sacrifices from students, faculty, and staff: freezing salaries, holding operating costs flat, and a small increase to the student body, among other things. Even more impressively, according to Mills, these actions would be accomplished in a way that preserves the "core values" of the College and the education that it offers.

All this we applaud. However, in a sparsely attended student forum on Tuesday night, the administration revealed a bit of information that gave us pause.

In his message, Mills wrote that the student body increase "will be accomplished in a manner allowing us to continue our 'need-blind' admissions policy." However, in the forum, it was disclosed that this increase to the student body will at least partially come from transfer and waiting list applicants. Neither of those applicant pools is subject to the need-blind practice that Bowdoin uses during regular admissions. The College's aid budget will increase next year, but only in proportion to the size of the current student body; it does not include an allocation for 10 additional students.

Such a change will not substantially alter the composition or quality of the incoming classes for the next few years. In the forum, students were informed that the College has no shortage of qualified transfer and waiting list applicants. Given the drastic measures taken by some colleges—Brandeis, for example, just announced that its budget shortfalls are so large that it is selling the holdings of its art museum—we think this aspect of the committee's proposal is very reasonable. We also commend the College on maintaining its commitment to its strong financial aid program, particularly the recently instituted no-loan policy.

What disappoints us is the veiled language in which Mills presented the student body increase in his memo. Given the details that were revealed at the forum, to say that the increase will allow Bowdoin to "continue our 'need-blind' admissions policy" is unclear at best, and deliberately misleading at worst. Yes, technically the College will not be breaking its commitment to that policy. But in reality, next year Bowdoin will most likely end up with 10 more students than usual who are not subject to the policy. This strategy weakens our commitment to need-blind admissions.

Bowdoin is facing serious financial challenges, and this proposed action is appropriate in light of them. However, students deserve to know the full scope of the College's approach. The details of the student body increase—which were only revealed in response to a student's question at the forum—are important enough that they should have been included in Mills' original message. As stakeholders in the school's future, students need access to such pertinent information so that we can appreciate and understand the severity of this crisis, and help to solve it. Omitting the details implies a disdain for students' thinking and a lack of confidence in our ability to participate in Bowdoin's governance—two things that, it could be argued, are "core values" of this institution.

The editorial represents the majority view of The Bowdoin Orient's editorial board, which comprises Nick Day, Nat Herz, Will Jacob, Mary Helen Miller, and Cati Mitchell.

THE BOWDOIN ORIENT

The Bowdoin Orient is a student-run weekly publication dedicated to providing news and information relevant to the Bowdoin community. Editorially independent of the College and its administrators, the Orient pursues such content freely and thoroughly, following professional journalistic standards in writing and reporting. The Orient is committed to serving as an open forum for thoughtful and diverse discussion and debate on issues of interest to the College community.

LETTERS TO THE EDITOR

Hetero-normative crossword upsetting

To the Editors:

While the crossword is seldom the most controversial piece of a newspaper, last week's Orient had a crossword clue which, for me, was more objectionable than any article. Clue 9-down, "Women's partners," was solved with "Men." This blatant hetero-normative thinking was not only unnecessary, but also incredibly unsetting.

The Orient is Bowdoin's voice—an entity which is supposed to represent the College as a whole. The care of its editors cannot only be taken with articles—every aspect of the paper is a statement about the College, including the crossword. This careless clue is a display of heterosexism on a campus that has been striving to become "Queer-Friendly." In order to achieve this goal, every group on campus must make an effort, especially one as prominent as the Orient. I can hardly believe that in one issue, there could be an op-ed asserting the need for co-ed bathrooms on one page, and a statement as inconsiderate as this clue on another (to say nothing of the

disarming connotations of 50-across, "Rooster's meat"—"Hen").

For this reader, it is clear that the Orient's editors need to take greater consideration of what is communicated in every section of the paper, including the crossword.

Sincerely, Hannah Cyrus '12

Pritzker should learn to ignore materialism

To the Editors

Sarah Pritzker ("Bowdoin costs more than tuition," January 23) finds Bowdoin's atmosphere oppressive: an endless battery of haute couture exhibitionism and "other blatant signs of wealth" She pans as "unrealistic" one solution—"eliminate all fashion trends because they might be perceived as exclusive"—and goes on to propose that we become more aware of our foibles and de-emphasize material things.

Doctor, heal thyself! Pritzker should cultivate a healthy obliviousness of the goods that have made it onto her shit list. I've been here for four years and have no idea what a Longchamp bag, a Tory Burch flat or a "welly" is. And Sperry Topsiders (we used to call them deck shoes on the ACK) are subdued enough to be over-looked by anyone not on a misplaced crusade for social justice. As for the "many Bowdoin students [who] regularly have the chance to travel to exotic locales"—exploit their experiences: it's a way to increase your awareness on the cheap.

Alexander Hamilton once complained that John Adams had "a jealousy capable of discoloring every object." It behooves us all not to evince that limit-

Sincerely, Miles Pope '09

College will regard Robinson like Fox News

To the Editor

Your newest columnist stated last week his intention of becoming "the Fox News of Bowdoin." I think I speak for much of the Bowdoin community when I say that we gladly welcome his insights, and plan to treat them with the same respect and attention that we currently pay to Fox News.

Sincerely, Jacob Daly '09

Roe v. Wade vigil brings shock, then reflection

BY EMILY GRAHAM

Upon returning to campus after winter break, I was greeted by several more feet of snow on the ground, a new hockey arena, and a pile of unwashed laundry left on my floor prior to break. A less noticeable, yet equally significant change was the arrival of a series of posters, broadcasting the tens of millions of abortions that have occurred since the Supreme Court handed down the 1972 Roe v. Wade decision, which legalized abortion nationwide.

abortion nationwide.

The posters invited students to join the Catholic Student Union in a vigil on January 22, to commemorate the 36th anniversary of Roe v. Wade. The posters prominently displayed a large, color picture of an almost-full-term fetus.

I was immediately put-off by the posters. The use of such an in-your-face tactic seemed insensitive protesting a decision that has helped millions of women. In discussions following the poster's debut, many students agreed that the Catholic Student Union should have organized their vigil in a more discreet way.

their vigil in a more discreet way.

The image, in particular, disturbed many. It seemed to falsely indicate that the fetus in the picture was at a stage in which it was subject to abortion. In fact, a 2002 Centers for Disease Control and Prevention study asserts that nearly 60 percent of all abortions occur within the first eight weeks of gestation—far earlier in development than the image on the poster. Several imagined that any woman who has chosen to have an abortion would have been very disturbed by the

sight of such a fully-developed fetus. I thought that the posters were tactless and offensively one-sided in their portrayal of an issue that hit many close to

Hoping to glean some understanding from examining the other side of the issue, I went to the Chapel that Wednesday night to experience what I expected to be an attack on the views of so many students on campus.

What I got shattered my expectations. The scene in the chapel was quiet, respectful, and incredibly intimate. Only a handful of students sat, reflecting silently, on the benches. I was given a sheet explaining that every 27 seconds, a woman undergoes an abortion. One student rang a bell in that increment to commemorate the unborn.

The scene had me completely taken aback. The vigil was a gathering of like minds, and did not serve as a forum for debate or discussion. Where I had expected harsh words about the indecency of the pro-choice stance, I saw instead people mourning the loss of life.

I contacted Robert Flores '12, who helped to organize the vigil, seeking out further explanation. Flores contended that the group airned to spark interest, not controversy, by advertising the vigil so provocatively. When asked if the posters had a target audience, Flores said that the Catholic Student Union hoped to reach out to other pro-life students on campus and to present an alternative to the overwhelmingly pro-choice stance on campus. He added that the vigil's aim was to promote a respect for life, and

was not necessarily political in nature. The vigil was held in reverence of the beauty of life, Flores said, and was not intended to offend those of opposing viewpoints. He said that the posters served not as an accusation, but as an invitation to those with similar beliefs.

After taking the proverbial jump, if not leap, to conclusions, I was forced to take several steps back. The bottom line comes down to an issue of free speech—the members of the Catholic Student Union have a right to voice their opinions, and to do so in as public a manner as they desire

As a woman who identifies herself as pro-choice, I now find myself disappointed that students on campus, or perhaps women's groups on campus, did not see the anniversary of Roe v. Wade as an opportunity to celebrate the decision. It is important not to become complacent when part of the majority: just as those with more conservative views can, and should, voice their opinions, so should those who belong to the more liberal contingent on campus. Debate on campus is critical, and all sides of an issue should be voiced and represented.

This issue goes beyond the groups fundamental right to express itself. On a campus as "liberal" as Bowdoins, students should welcome dissent. We preach openmindedness, yet we seem predisposed to react to, and be offended by, certain issues. It is easy to call oneself accepting of others' opinions while surrounded by people who share similar views.

ized salt and pepper.

So maybe the issue isn't worth flipping our shakers over.

Mitchell '54 good pick as Mid-East envoy

BY CRAIG HARDT

The era of change is upon us—or so President Obama and his new administration would like to think. Yet as Obama's administration embarks on its mission to bring real change to the world, some lingering problems stand in the way. One such problem is the centuries-old conflict in the Middle East between Israel and Palestine.

On Thursday, President Obama and newly appointed Secretary of State Hillary Clinton announced that George Mitchell '54 would serve as the administrations special envoy to the Middle East. What exactly does this appointment mean for America's approach to one of the world's hottest hotspots? To answer that question let's examine why Clinton and Obama chose the former Bowdoin grad for this hefty assignment.

grad for this hefty assignment.
Mitchell is best known for his time
on Capitol Hill, where he served as
the U.S. senator from Maine for fourteen years (1980-1994) and as the
Senate majority leader for five years
(1980-1994). As a senator, Mitchell was respected by Democrats and
Republicans alike for his dedication,
honesty, and willingness to work
across party lines.

After his time in the Senate, Mitchell agreed to serve as the chairman of the international committee on disarmament in Northern Ireland and later as chairman of the peace negotiations that resulted in the decisive Good Friday agreement. After achieving something that few thought was possible—peace in Ireland—Mitchell was asked to chair an international fact-finding committee on the conflict between Israel and Palestine. His work resulted in his receipt of the

Presidential Medal of Freedom and

the Liberty Medal.

But will Mitchell and the Obama administration really be able to bring peace to a region that has been mired in conflict seemingly from the beginning of history? Previous administrations have tried without success to bring about lasting peace in the region, so why should this attempt be any different? The recent Israeli attack on Gaza in response to Hamas' terrorist attacks on Israeli citizens has once again brought this conflict to the international forefront. No longer can we sit back and say, "We've tried our best and failed so there's no hope." Not if this administration wants the world to believe in their popular slogan, "Yes we can."

Although the two sides of the conflict seem more divided than ever and the possibility of peace seems as hopeless as it has been in years, there are a few key reasons I'm willing to jump on board with George Mitchell and the administration in believing that peace can be achieved.

First of all, the appointment of a man of Mitchell's considerable foreign policy stature to the role of a special envoy demonstrates the urgency and importance with which the new administration views the goal of peace in the Middle East. Success in this endeavor would arguably be the single most important feat of the administration in securing America and reasserting our country's position as the leader of the world and a champion of peace.

Furthermore, the situation in the Middle East is every day becoming more unbearable for its inhabitants, which could and should lead to more popular demand for both the Israeli and Palestinian governments to work swiftly to reach an agreement. Recent polling data suggests that the majority of Israelis and Palestinians would support a two-state solution in which the Palestinian state would include the West Bank and Gaza Strip areas.

Unfortunately, matters are complicated by the 2006 Palestinian election of Hamas. Its leaders have publicly stated that they do not and will not recognize Israel's right to exist. Hamas' takeover of Gaza has led to considerable violence and countless civilian deaths in the area. Yet behind these harsh words and harsher actions there remains a glimmer of hope: Hamas has also stated that it would be open to a long-term truce with Israel and views America's election of President Obama as a sign that America is ready to lead and willing to listen if renewed peace efforts are planned. The cease-fire, agreed to on the eve of President Obama's inauguration, is perhaps most indicative of the two sides' willingness to give the new American administration a chance at resolving this conflict.

George Mitchell accepted the post of special envoy with no illusions regarding the gravity of the problem at and saying, "I don't underestimate the difficulty of this assignment." But more telling was the conviction in his voice when he said, "there is no such thing as a conflict that can't be ended. Conflicts are created, conducted and sustained by human beings. They can be ended by human beings." Mitchell may not be able to overcome all the obstacles to the pursuit of peace, but we can be sure that he won't be giving up anytime soon. If he's not going to stop trying, we should not stop believing

COMMENT OF THE WEEK

Last week, the Orient introduced comments on its new Web site. Here, we have chosen the most thoughtful comment posted in response to our previous issue.

Regarding the Martin Luther King Day editorial:

"If the college is really serious about making MLK day a priority (note we're usually on winter break), then a day off from classes for reflection and service as a community is the way to go. But we've got to move beyond just acknowledging Dr. King's legacy to questioning what it means today; his dream has yet to be achieved, at Bowdoin and around the world."

IAN YAFFE '09

WEEKLY CALENDAR

JANUARY 30-FEBRUARY 5

FRIDAY

OUTDOOR ACTION

Snowball Fight on the Quad

After the wintery battle, participants are invited to Howell House for hot chocolate and a chance to warm up. Quad. 3 p.m.

"The Fine Line: A 16mm Avalanche **Education and Action Snow Sports Film**"

This movie, presented by the Bowdoin Ski and Ride Club, features the collaborative efforts of snow sports athletes and avalanche professionals.

Beam Classroom, Visual Arts Center. 7 p.m.

"The Diving Bell and the Butterfly"

The Bowdoin Film Society presents this critically acclaimed 2007 film. The movie details the life of Jean-Dominique Bauby, who, after a massive stroke at the age of 42, could communicate with the outside world only by blinking a single eyelid.

Smith Auditorium, Sills Hall. 7 p.m.

SATURDAY

CONCERT

Singer-songwriter Bird will perform as the headline event of the Frozen Ivies celebration. He has recently played venues including Camegie Hall and the Late Show with David Letterman.

Pickard Theater, Memorial Hall. 8 p.m.

"The Diving Bell and the Butterfly" Smith Auditorium, Sills Hall. 7 p.m.

SUNDAY

Football on the Big Screen

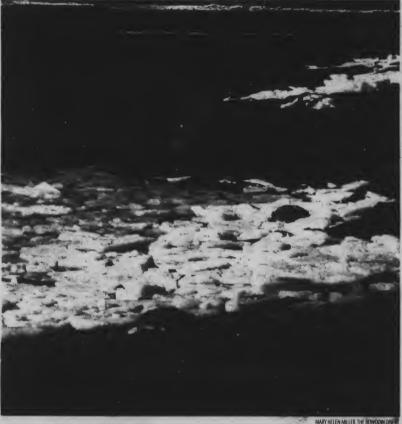

Jack Magee's Pub will host a Super Bowl party, complete with a big screen and pub favorites for sale. Jack Magee's Pub. 6 p.m.

MONDAY

"Unnatural Causes: Collateral Damage"

As part of the "Seeking the Common Good" series, this screening and discussion focuses on the tuberculosis bacillus' effect on residents of the Marshall Islands in comparison to its effect on residents of industrialized

Room 315, Searles Science Building. 7:30 p.m.

BREAKING THE ICE: The sea at Bowdoin's Coastal Studies Center on Orrs Island in Harpswell meets ice on the shore as cold temperatures continue in the Brunswick are:

TUESDAY

OFFICE HOURS

President Barry Mills Smith Union. 3 - 5 p.m.

"The Fatal Inheritance: Captain Scott, the Royal Navy and British Polar Exploration"

David Crane, a biographer of Robert Falcon Scott, will discuss the explorer's failed 1910-1913 expedition to Antarctica as part of the semester-long series "Polar Extremes: Changes in a Warming World."

Kresge Auditorium, Visual Arts Center. 7:30 p.m.

WEDNESDAY

Red Cross Blood Drive

Representatives from the American Red Cross and student volunteers will be on hand to take blood from community donors.

Morrell Lounge, Smith Union. 3 – 8 p.m.

THURSDAY

GALLERY TALK

"Elegant Egalitarian: James Bowdoin III and High Style in the Early Republic"

Guest Curator V. Scott Dimond will give this presentation regarding the exhibit "James Bowdoin III: Pursuing Style in the Age of Independence."

Shaw Ruddock Gallery, Museum of Art. 7 p.m.

"Healthcare Inequity and Ethical Responsibility"

Daniel Wikler, Professor of Ethics and Population Health at the Harvard School of Public Health, will deliver this talk as part of the Seeking the Common Good series.

Kresge Auditorium, Visual Arts Center. 7:30 p.m.

"Remembering the Pacific/Anti-Japanese/ Great East Asia War"

An expert in modern Japanese history, Stanford University Professor of History Emeritus Peter Duus will deliver the 2009 Alfred E. Golz lecture. He will speak about the Pacific Theater

Chris Hill '74 likely Iraq ambassador

BY PETER GRIESMER

Chris Hill '74, the lead negotiator with North Korea under the Bush administration, is expected to be named the next U.S. Ambassador to Iraq by President Obama, ABC News first reported on Monday.

Members of Obama's internal administrative staff stated that Hill, a career foreign service officer, is the top candidate to replace the current representative in Iraq, Ryan Crocker.

After graduating from Bowdoin with a major in economics, Hill went on to join the Peace Corps. He joined the State Department in 1977 and served in a number of locations, including Poland, Macedonia, Kosovo. and Cameroon

Hill was among the American diplomats who negotiated the Bosnia peace settlement in 1995, and he was named Head of the U.S. delegation to the Six-Party Talks on the North Korean nuclear crisis in 2005.

As Ambassador of the United States to South Korea from 2004 to 2005 and as Assistant Secretary of State for East Asian and Pacific Affairs since April 2005, Hill has been regarded for his diplomatic work. However, he has little expertise in Middle East affairs.

Hill did not respond to an e-mail request for comment.

OPEN FORUM: Students meet in the Multicultural Center to discuss "taboo topics" of Bowdoin social life Thursday during the first week of the Undiscussed.

Dialogue circles explore 'identity' at Bowdoin

BY PIPER GROSSWENDT

The Undiscussed aims to get students talking

"One of the major goals is to bring people to get together to talk about ideas that they wouldn't normally talk about with people outside of their own social circle," said Maria Koenigs '09, a member of this year's Undiscussed

The Undiscussed, which began meeting this week, is a dialogue project whose mission is to explore issues of "identity" at Bowdoin, and eventually enact change. Eighty-six participants

will meet in nine small groups, under the leadership of two student facilitators. Each group will meet for four 90minute sessions this month.
"The whole idea of talking about

taboo subjects, the ability to talk about [them] in confidential settings where someone can feel open and no one felt held back, that prompted me to join, explained first-year participant Kris Klein. "I wanted to see how Bowdoin students really think about stuff?

The program, which is in its second year, is spearheaded by Koenigs, Becca Schouvieller '10, Scooter Walsh '09, eron Weller '11, and Elise Selinger '10. The leadership team, working from

last year's program, developed a discussion guide that outlines general talking points they hope address during each 90-minute sessi

Alyssa Chen '08 started the project last year after learning about "study circles"-a dialogue group format-in an education course from guest speaker Jim Noucas. Noucas, who has two daughters who attend Bowdoin, has experience with study circles in Ports-

Though the Undiscussed was not officially recognized as a club by Bowdoin Student Government (BSG) last year,

1.7 % decline in 2013 apps

Maine residents and students of color increase presence in application pool

BY ANYA COHEN

Now that the January 1 admissions deadline has passed, Bowdoin's Class of 2013 is beginning to take shape.

A total of 5,929 students applied to

the College this year, down from last year's 6,033 applicants. The 1.7 percent decrease reflects the poor state of the economy and its effect on a family's ability to pay for a liberal arts education, according to Interim Dean of Adions Scott Meiklejohn.

The drop of 104 applications is not necessarily a final statistic, however. According to Meiklejohn, 17 completed applications were not added to the final tally until February last year.

Of the 15 peer schools Meiklejohn has been in contact with, he said most had seen applications decrease anywhere from 5 percent to 20 percent.

"In the same way we feel good about how the endowment has performed relative to other endowments, we feel okay that our decrease is a lot smaller than decreases we've heard about," said

At Colby, overall applications for the Class of 2013 have fallen by 7 percent, although first-round early decision ap-

Trustees gather to discuss 'blue tarp' recommendations

BY ZOË LESCAZE

The Board of Trustees will meet this weekend and discuss a theme that has been on the minds of most at Bowdoin: the economy and its impact on the Col-

The Board, which assembled Thursday on campus, will spend today and Saturday discussing the budget for next year, reviewing the recommendations of the financial "blue tarp" committee, and attending to other College busi-

The recommendations of the committee, as outlined in President Barry Mills' January 22 memo to the College include increasing the student body by 50 over the next five years, freezing faculty and most staff salaries for two

years, and holding operating costs flat.
The Board will analyze these suggestions and consider them as they write the budget for the 2009-2010 fiscal year, according to Senior Vice President for Planning and Development and Secre-tary of the College Bill Torrey.

"I think that's about as transparent a

piece as you're going to get," said Torrey. "It describes in great clarity where

Thursday night, the Board met inormally with members of Bowdoin Student Government (BSG) and the Young Alumni Leadership Program (YALP) after dinner, which Torrey described as a "free-flowing discussion."

The Board will spend today and Sat-urday reviewing the recommendations for tenure, the recommendations for commencement honors, and the status of this year's admissions, though Torrey said that "we don't know about financial aid yet because we haven't admitted

First, the Board will address these topics and others in committee meetings today and then in plenary sessions. Torrey plans to attend three or four of the committee meetings, which tend to overlap throughout the day. But he said that Mills "tries to go to all of them. He

flits from one meeting to the next."
"This year's business as usual," said There's nothing huge on the agenda at this point...there isn't any-thing enormously controversial."

Students, CPC contend with tough job market

BY ADAM KOMMEL

The Bowdoin Bubble does not keep its inhabitants immune to the nation's faltering economy. Just as Americans across the country are struggling to find and keep jobs, Bowdoin students are having a difficult time breaking into the real

But Sherry Mason, who advises students on graduate school at the

Careeer Planning Center (CPC), said that Bowdoin seniors intimidated by the job market have not flocked to graduate school, as conventional wisdom might predict. She said that the economy could, however, influ-ence underclassmen who previously had not been thinking about graduate school.

What we might find is if things stay lousy, this year's juniors will seek out the certainty of grad school," she

DECLINE

CONTINUED FROM PAGE 1

plications rose 15 percent.

The total number of applications to Middlebury dropped 12 percent, from 7,641 to 6,771, although some applications are still being processed. Middlebury's decline may be attributed in part to its decision to impose an upfront application fee, a move that aims to reduce the number of students who withdraw their application. This may account for a 700 or 800 drop in applicants, according to Middlebury Dean of Admissions Robert Clagett.

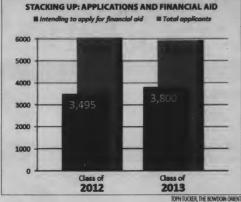

Early decision cycles for Bowdoin's of 2013 have also been finalized. The College admitted 209, out of 693 applicants-roughly 30 percent-through Early Decision I and Early Decision II programs. Last year, the College received and accepted similar numbers of applicants, admitting 207 students from a pool of 690.

According to Meiklejohn, early and regular decision applications increased in two significant areas: students from Maine and students of color

The College accepted 27 of 90 Maine students who applied early, six more than last year. Regular applications from Mainers increased 14 percent, from 430 last year to 500 this year.

Bowdoin admitted 40 students of color through early decision programs up from last year's 32. Similarly, 1,091 students of color applied regular decision, a 5.2 percent increase from last year's 1,034.

Meikleiohn said he was particularly pleased with the growth of applications goals of his office. He attributed the increase to "the strength of the relationships Bowdoin has built with schools and opportunity programs around the

IN A PINCH: Despite a drop in total applications, more students in the 2013 admission cycle indi-

cated that they intended to apply for financial aid than for the Class of 2012. Meiklejohn said that the "ripple effect" from Bowdoin's elimination of

also have had a strong infuence on these Of all applicants, 64 percent, or 3,800 out of 5,929, intend to apply for financial aid. Last year, 57 percent of applicants, 3,495 out of 6,033, indicated the same intent. However, intention to apply does not necessarily translate to actual appli-

loans, a decision made last winter, may

cants, qualifying or not. According to Meiklejohn, several more students who enrolled through early decision this year qualified for financial aid, although he was not able to give an exact number.

"This makes sense if you say that Maine and students of color is up-two populations that we typically aid in higher percentages than the overall student body," said Meiklejohn.

Nevertheless, the average family need decreased, showing "a larger group of

slightly wealthier families qualifying for aid," according to Meiklejohn.

The early decision applicant pools geographical make-up was nearly identical to last year's: roughly 45 percent from New England, 23 percent from the mid-Atlantic, 8 percent from the West, 6 percent from the Midwest, 6 percent from the South, 2 percent from the Southwest, and 9 percent from outside

The percentage of applicants coming from public schools increased to 56 percent, compared to 53 percent last year while private school applications decreased from 35 percent to 32 percent.

Last year's applicants consisted of 2,708 males and 3,325 females, while this year saw 2,602 males and 3,327 females. Bowdoin has traditionally received more applications from feales, although the Class of 2012 includes slightly more male than female

DIALOGUE

CONTINUED FROM PAGE 1

it now receives funding through the Student Activities Committee (SAFC).
Assistant Director of Residential Life Dudney Sylla '08, who helped Chen with the inception of the group last year, serves as the club's adviser.

According to Koenigs, last year's Undiscussed became informally centered on the topic of race at Bowdoin, which she said "limited some groups." The group leaders have designed this year's project to focus on the broader topic of "identity."

Part of it is just talking and getting to a better sense of this community that you're a part of...how other people are at the exact same place and doing the exact same things that you are doing, but having a really different experience," said Schouvieller.

The discussion guide outlines a framework for each group's four meet-ings. The groups that already met this week talked about the concept of identity broadly. Next week will focus on general and personal identity at Bowdoin, the third week will examine issues relating to identity at Bowdoin, and the fourth week will be dedicated to creating action plans to instigate changes on campus.

"We tend to shy away from thinking about and discussing important and difficult issues," said Noucas. "The dialogue process creates an opportunity for people to come together in a trusted ment where there is really a level playing field, where people are asked to listen as much as they are to talk."

Facilitator Will Cogswell '11 shared the experience of his first session talking about identity.

"My group was talking about how that is what we impose upon people, that's not how they identify themselves.

Being able to look at somebody and see the qualities that they would like to put forward, not the qualities we'd like to impose on them," Cogswell said.

Facilitator Julie Endrizzi '09 said she hoped participants "will speak with their own groups of friends about [what they discuss in the Undiscussed]

or say something in class about it."

"It's a confidential process, but often the ideas themselves bear repeating without saying who said them or the context it was said in," she added.

Schouvieller expressed that although last year's Undiscussed was success ful in generating creative, constructive dialogue and brought ideas for action initiative before campus administra-tors, she hopes that this year's session will be more organized toward a goal of enacting change

"I would really hope that some of the answers or recommendations that the groups come up with actually have the time to turn into things that really happen," she said.

"We're going to have two dinners af-ter Spring Break, one with just all the groups together so you can hear what other groups talked about and then one with student leaders and faculty and staff, with a more formal presentation, Schouvieller explained.

Facilitator Anna Noucas '11 spoke about the eventual action initiatives her group will come up with

"I definitely expect them to be feasible and I'm excited to put whatever plan my group comes up with into action," she said.

After attending his first session on Monday, Klein said, "If everyone takes something from [the Undiscussed], I think that it will be an open mind and they'll understand that stereotypes are just stereotypes and people all have nd in the future, hopefully people will be less judgmental and more open to understanding each other."

SECURITY REPORT: 2/6 to 2/12

Friday, January 30

·A female student received a deep cut to her left knee when she collid ed with another student while skating at the Sidney J. Watson Arena. Brunswick Rescue transported the student to Mid Coast Hospital.

•A Howell House resident was taken to Parkview Hospital for treatment of an ankle that was injured during an intramural basketball

DON'T BE A SHUTTLE SCOFFLAWI

Did you know that so far this academic year the Bowdoin Shuttle has carried approximately 15,000 students - operating seven days a week and up to nine hours a night? With this high volume of ridership, we ask that when you call for a Shuttle ride that you be ready and waiting when the Shuttle arrives so that you don't miss your ride and have to call for the Shuttle to make a return trip. If you miss your ride, you will be placed at the bottom of the call list.

Please do not make repeated calls to the dispatcher asking how long the Shuttle will be. The dispatcher does not have that information and your repeated calls only hinder our ability to respond to other ride requests. The Shuttle will arrive as quickly as possible given the call volume, weather, and traffic conditions.

The busiest Shuttle hours are from 10 p.m.-2 a.m., Thursday-Saturday. That is when you will most likely have the longest wait. We run two vans during those busy periods to keep wait times to a minimum.

We are doing our best to provide a reliable service for your safety. Thank you for your patience and un-

derstanding.

BSG debates fine points of co-ed housing rules

Bowdoin Student Government (BSG) spent much of its Wednesday meeting discussing a Residential Life rule that prevents students of different genders from sharing bedrooms in College housing.
According to the 2008-2009 Stu-

dent Handbook, the Office of Residential Life's current policy reads: "Men and women may share living space provided that the number of bedrooms allows for separate bedrooms for each gender.

Vice President for Student Affairs Carly Berman '11 raised the issue, stating that she thought the policy should be revised. "Last year, a few concerns were raised about ResLife rules that require students rooming together [to be the] same sex," she said. "This clearly has the potential to limit students' options and create some problems."

"For example," she said, "if you...

have a best friend that is a guy, and you want to live with them, at this point that isn't possible."

Several BSG members imme diately voiced their support for Berman's proposal. At-Large Representative Nyle Usmani '12 stat ed that he believed that the rule should be changed, but that Residential Life should be involved in the discussion. "If the reason the rule isn't being supported is for concerns over sexuality, then the College is making a pretty hetero-normative statement," he said.

At-Large Representative Rasha Harvey '12 also expressed support for the change. "Personally, I'm all for it," he said. "It seems to me like there are already situations where it is easily possible for different sexes to live together without the school noticing.

Vice President for Academic Affairs Sam Dinning '09 argued that changing the rule could be problematic for Residential Life.

"Legitimizing this and then pre-venting couples from living together is a huge hassle," he said.

IHC Vice President Dan Hether-man '09 said that in some cases this wasn't a problem, since "ResLife has made exceptions in the past [for students who] are married."

In response to this, Dinning quipped, "So tie the knot in Vegas and you are set."

Director of Residential Life Mary Pat McMahon confirmed that exceptions have been made for

BY THE PEOPLE: Sam Dinning '09, right, addresses the BSG Assembly during Wednesday's meeting.

married students in the past. "But we generally do not allow mixed gender roommates," she said in a phone interview with the Orient. "There are exceptions made, but generally they are for personal reasons. I'm interested in talking to people about this, and finding out what their interests are about this

Vice President for BSG Affairs John Connolly '11 acknowledged Dinning's argument, but said that he had to disagree. "The current rule is usually justified on the basis that if co-ed rooming were allowed, couples would move in together," he said. "This certainly could be problematic and in that light makes sense. However, the rule is heteronormative in that it doesn't recognize that gay couples can currently move in together freely. On this campus where we've got transgendered, gay, and straight stu-dents living and learning together, the rule seems anachronistic.

BSG President Sophia Seifert '09 said that the issue would also be debated in future meetings. "The measure that will ultimately come to a vote in the next few weeks will involve a recommendation as to how, as well as the reasoning as to why, this option should exist," she wrote in an e-mail to the Ori-

ent. "Whether or not this measure passes will be the ultimate test of support for this option, and I hope that students talk to their BSG representatives about their positions."

In other business, Seifert and Connolly both made announcements to the governing body regarding projects they have been

Connolly announced that the BSG newsletter was complete and would be brought to the Copy Center the following day. "Depending on the Mail Center's schedule, it will be in mailboxes hopefully by Friday, but maybe next week, since they don't stuff on Fridays," he

Seifert announced the results of a BSG evaluation completed last semester by members of the body. "I would like to happily let you know that most of you think your time is being used well," she said. "But the most common complaint is that people don't listen and they repeat each other. As much as I repeat myself each week telling you

guys to do that, you need to do it."
"Our surveys had a lot of positive feedback," Seifert wrote in the e-mail. "People are enjoying the projects they are working on and have high expectations for this semester.

and its resources more than they did last year, according to Diehl.

"We've seen an increase in student interaction with our office across the board," Diehl said. "This year, we made an effort to do more out-

reach."
"We've increased the number of points of contact we've had with students by 50 percent over the past year,"
Diehl added. "And one-on-one advising career appointments have increased 15 percent over the fall of 2007."

Teach For America (TFA) Campus Campaign Coordinator Jeremy Kraushar '09 said that TFA has seen an increase in applications across the nation, though he was hesitant to attribute the increase to applicants who, if not for difficulty other jobs, would not have applied. Final figures are not yet available, as the last deadline (Feb. 13) has not yet

"This increase may have had to do with the economy, but for the most part, applicants have been genuinely interested in teaching and making a difference regardless of the financial/ market problems," Krausher wrote in an e-mail to the Orient.

Teach For America places college graduates and professionals at twoyear teaching jobs in schools in lowincome areas across the U.S.

Senior Andrew Howard, who has been searching for a job in finance since the beginning of the fall semester, said that he is "not particularly worried" and is continuing to work hard to find post-graduation employment.

"I am just trying to increase my network and continue fishing be cause I know that people are, and will continue to be, hiring," he said. 'The economy and business are not

going to grind to a complete stop." -Toph Tucker contributed to this

FEATURES

Davis '84 'trendspots' her way to the frontline of fashion

Shoe designer Ruthie Davis '84 has always been a trend-setter. Her shoe company, Davis, has been known to enge even the highly progressive fashion industry. Her stilettos, boots, sandals, and flats have appeared in magazines such as Glamour, Lucky, InStyle, People, Vogue, and Bazaar, and, like Davis, are constantly pushing the fashion envelope.

Davis, who now sells her shoes out of a showroom in SoHo, New York, estimated that she has completed 10 collections, totaling around 250 designs. Though her company is small, her shoes are sold in 13 countries, and each season has brought a profit margin. Even in the midst of the nation's economic turmoil, she grossed seven figures in 2008 and expects 2009 to be a highly successful year.

"I am thriving right now as consumers want to only buy something very special if they are going to spend money," said Davis. am actually very optimistic about 2009, and I think it may be my biggest year yet."

Describing herself as someone "values practicality," Davis said she occasionally succumbed to the Patagonia, L.L. Bean, and North Face gear worn by most Bowdoin students during her years on campus. Even in the midst of a Maine winter, however, Davis said she preferred tighter jackets and well-fitted clothing that satisfied her architectural approach to clothing and her "love of the linear" in fashion.

"As a freshman and sophomore I may have worn the typical Bowdoin gear, but as a junior and senior I definitely started to branch out and do my own thing," said Davis. "I used to wear a red bandanna around my neck, and after a while I noticed other girls doing the same thing. I think people noticed."

Davis was noticed for more than her sense of style while at Bowdoin. An English and Visual Arts double major, Davis wrote sports articles and a column called "Mainely Health" in the Orient, and she was a captain of the women's tennis and squash teams. She also launched Bowdoin Aerobics, a program that was hugely successful during the aerobics craze of the '80s and '90s.

A Connecticut native, Davis was attracted to Bowdoin because of its focus on the individual and its emphasis on developing the whole person. Davis said she believes Bowdoin's philosophy helped prepare her for her role as a successful entrepreneur.

"In order to do your own thing, you have to be someone who has a very well-rounded sense of everything," said Davis. "The great thing about Bowdoin is that it emphasiz es the individual and being multifaceted. The more well-rounded are, the better."

After graduating from Bowdoin, Davis went on to try sports journalism, reporting at the 1984 Summer Olympic Games and covering sports for the Hartford Courant. She went on to work for ESPN as a production assistant at SportsCenter from 1985-86, then worked on Cape Cod at TV 58 running her own health and fitness show. In

"In order to do your own thing, you have to be someone who has a very well-munded sense of everything

RUTHIE DAVIS '84

1987 Davis moved to Vermont to begin her first entrepreneurial project, opening a gym and fitness center called MadSport Fitness, featuring a health club, a clothing shop, weight area and personal training. Davis quickly realized that she loved entrepreneurship.

Owning MadSport at the young age of 25 or 26 encouraged me to develop a deeper understanding of entrepreneurship," said Davis, who went on to earn an MBA in entrepre neurship at Babson University Graduate School of Business in 1993.

After receiving her MBA, Davis went on to work at her first job in the fashion industry as a "cool hunter" for Reebok in 1993. The job required her to spot and predict the new trends in the industry, which Davis said she has always "had an eye for."

"I've always had a sense of what's going to be the hot thing," said Da-There's a method to finding out what's in, what's out.

According to Davis, she would often stand on street corners in Boston and ask passersby which shoes they liked, which they didn't, and why. Davis' success in "trend-forecasting" soon earned her the position of Director of the Reebok Classic Division. Davis used her innovation and creativity to launch the "Classic Derivatives" shoe line, which ruthiedavis.com defines as "reinvented versions of Reebok's classic white sneaker" that "launched a consumer love affair with 'throwback' designs in footwear."

Davis' success at Reebok led her to be contacted by UGG California, then a budding company in desperate need of someone to help with mar-keting and public relations. According to Davis, "ugg" is a generic term used to describe makeshift sheepskin shoes worn by surfers in Australia to keep their feet warm after morning wave riding. The shoe was brought to California by a surfer named Brian Smith before becoming popular with locals and leading Smith to launch UGG California

When I got to UGG, they had no marketing plan, and they were virtually unknown on the East Coast," said Davis. "I put together a marketing, PR, and design campaign to reinvent the UGG and get the name out."

Davis' design team created new UGG models featuring fur collars, exposed seams and elevated bottoms, and Davis used careful product placement in magazines and ads to market the updated UGG design across the country. Af-ter working for UGG from 1998 to 2001, "one day the trend just took off. I think getting the shoes on Oprah especially helped," said Davis.

After leaving UGG, Davis was prepared to launch her own company, but had to postpone due to 9/11. Instead, she took up a position as vice president of marketing and design for women's footwear at Tommy Hilfiger and launched a new division, "Tommy Girl Shoes,"

aimed at younger female consumers. After two years at Hilfiger, Davis said she felt it was the right time to try her own thing.

"I think it's something I've been working toward my whole life," said Davis. "I always knew I had a vision and a passion, I just needed to finally articulate it.

In 2005 Davis developed a business plan before going to a design show in Italy and developing the full concept of her line. She then took the shoes to China to be made, because China was the country capable of producing the carbon-fiber heels and high-tech designs featured in her first line. After creat-ing the line, Davis said there was a period of definite highs and lows' in which she remembers begging store-owners to buy the shoes, oftentimes without avail.

"It definitely was a process of learning as I went," said Davis, who now oversees every aspect of her company, from design to marketing, public relations and production. Davis remembers a launching event in Chelsea in 2006 as a turning point for her company.

That's when I knew it was real, she said.

Davis only hires interns and otherwise pays specialists from Raw Information Group a monthly fee and commission to handle various aspects of the business and design process, though according to Davis, 90 percent of what she does today is running a business, and 10 percent is design-oriented.

Davis has already begun launching a fall 2009 line and is busy at

work with her spring 2010 line. As for the future, she said she really wants "to establish herself as a footwear brand" that can compete with other high-fashion shoe lines like "Manolo Blahnik or Christian Louboutin." Davis has also begun plans to open very modern "pod-like stores" in top fashion cities like New York, Los Angeles, Dubai, or Belgium. No matter her plans, Davis continues to stand out as perhaps the only female American designer competing in the high fashion shoe market shared with Gucci, Prada, and Chanel, and she is adoring every moment of it.

"It takes knowing what you love, having a dream, and being confident to make the leap," said Davis.

Singles Awareness Day': A safe time to stare someone down Valentine's Day. For me, it's always

MATTERS

we've been cuddling up to our body pillows for the past couple of days,

weeks, months, or years. Usually

we love our body pillows, but send-

ing your body pillow chocolate for

Valentine's Day is generally coun-

terproductive because you wind up

eating them all yourself and then

I've always had a problem with

feeling lonely and sick.

every relationship that says, "Hey! Don't forget to care about this person!" Valentine's Day is fraught BY JULIA BOND with stress about which of the clichéd Valentine's gifts you should This time of year, we should all be get your significant other. Should aware of SAD. I am not only referyou hand-niake a card? Or can you ring to seasonal affective disorder, buy one of the witty ones at Rite Aid? (I once received a Valentine's Day card that read, "What's the but also to the rapidly approaching Singles Awareness Day, which "coincidentally" falls on February most important thing to consider 14. We are now a week into February, the month when single people for Valentine's Day?" Inside, it said, "Location Location Location," and had a picture of a bed. Maybe that's become acutely aware, and in some cases defensive, of the fact that why I hate Valentine's Day.)

Valentine's Day is stressful for both singles and couples. The rhetoric of Valentine's Day promotes the Hollywood image that love unfolds in a comedic yet perfect way, where at first people are befuddled and confused, but then they fall into a perfect relationship where things are easy, and love and lust never fade or change. There's

seemed like a big pink Post-it note

rounding Valentine's Day during which you're not allowed to talk about any problems, get into any fights and certainly never break up with someone. Because it's "almost Valentine's Day," and how can you bring up something that's bothering you on this, the day where you're supposed to be perfect for e another?

Valentine's Day can be tough all around, but, as I am single, I feel I am really only in a position to offer advice to those who, like me, will spend this Singles Awareness Day trying to find something to do that doesn't involve candy hearts, pink things or creepily realistic pictures of Cupids. Never fear, fellow singles! There is plenty of stuff do to this SAD that can make it seem more like Singles Appreciation Day than Singles Awareness Day. Here is but a small selection of those activities I do to make February 14 an exciting day:

First, stare at people. You can get

way that you can't when you're taken. Think someone's attractive? Just stare at them until they notice, and even then, don't necessarily stop. When you're with someone, staring is a threat. Someone who cares about you will always want to know what you're looking at, whether it's because they want to share in all of the mundane aspects of your life or because they're afraid it's someone more attractive than they are. When you're single, stare away! Even if you're just staring at a wall, you can do so uninterrupt ed. Hopefully someone attractive will

wander in front of your gaze.
Second, take advantage of all the candy that people put out in honor of Valentine's Day. If no one's re ally keeping tabs on you on Valentine's Day, who's going to know that you're being a pig? So what if you eat so much chocolate that you have to spend the bulk of the night (pun intended) on a couch? You're enjoying yourself! You're not acthat free candy.

Finally, although this may be going against the cynicism of my earlier points, think of Valentine's Day as an opportunity. I've already made my argument in favor of asking people out on dates, so I won't repeat it, but Valentine's Day is a great excuse to put yourself out there. People sometimes need a reason to take a risk, and Valentine's Day is a great one: suffocating in love paraphernalia and being on the mother of all sugar highs. Perhaps Singles Awareness Day comes around for a reason other than to torment us; perhaps it is supposed to remind us that if we're not loving being single despite all of the aforementioned perks, there are things we can try to do about it. And, if those things don't pan out the way you want them to, you can always fall back on the day-after-Valentine's Day candy sales. If you get shot down putting yourself out there, there's no better landing than in a mountain of cheap chocolate.

When shopping for authentic yet affordable styles, go vintage

STYLE WATCH BY DAVID YEE

All of a sudden, I had an urge to purchase a pair of cowboy boots. I think it started the night that I watched "Once Upon a Time in Mexico" with friends—friends who insisted on wearing cowboy boots themselves while watching a mov-ie replete with a like-booted cast. "They're awesome, and they add just a bit of height," one friend says. The last-described characteristic of the boots attracted me especially, for, dear readers, your columnist has always looked for ways to artificially increase his diminutive height. (And before you suggest heel inserts, let me tell you, I have been there. My middle school years were spent with said in-serts and, unfortunately, inserts are forever tied to those painful years of life, so alas, I must move on).

In any case, I was then faced with the dilemma: how do I obtain cowboy boots? They had to be the realstereotypical, heeled, embroidereddeal, but I would not spend more than \$30 on these, I vowed. Really, these are my parameters for any article of clothing, and really, the same options appear: Online retailers, eBay, retail shops, and vintage stores. For this particular case, I didn't know (and didn't care to look for) actual retail shops selling new boots. Though I've had success in clearance sections before, I doubted that I would find anything resembling the boot I sought. So, without further ado, here's how my search went.

Online Retailers

A quick Google search yielded a slew of retailers with the word "boot" in their URLs. I picked bootbay.com and was quickly floored. As the site sorted (by default in descending order) by price, it quickly threw the

"Lucchese Classic Men's Western Boots" atop the list. These alligator skin boots run for a whopping-get this-\$9299.95. I had no idea alligator skin goes for so much, which is sad thinking about how the alligator meat is consequently thrown at every tourist that goes through densely alligatored areas, for instance, the Florida Everglades. Bootbay.com offered its cheapest pair of boots at \$75, while the largest online retailer in the world, Amazon.com, offered prices around \$50 dollars.

eBay

In recent years, the sorting algorithms on eBay have gotten very good. Now, after inputting the search "cowboy boots," I can narrow down into the category of "Men's Shoes," then the size "8.5." I can even high-light multiple sizes or specify lower if I want to, and this sort of specifi-cation is available if you're searching for cars, computers, or clothing. The prices on eBay ran a pretty full

spectrum between \$20 and \$200. Of course, the shipping for items as cumbersome as cowboy boots runs bit more, usually around ten dollars or more, and shopping on eBay, you run the risk of being dissatisfied with the product because it is not as described, doesn't fit, or doesn't work. BUT, if you are dissatisfied, you can often sell back the item on eBay for the same price as you purchased it. Because of this, I was going to take the plunge on the \$20-but-really-\$30 boots. But before I did, I decided to check one last place.

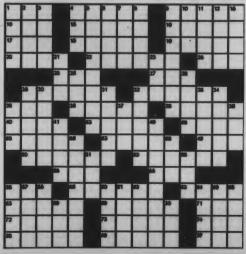

Vintage Shops (Material Objects, Portland)

This is a great little vintage shop that my roommate turned me onto my first year at Bowdoin. When he heard that I was in the market for cowboy boots, he suggested I check this place out because he'd gotten a pair there not too long ago. Material Objects is located on Congress St. just past the Maine College of Art

and not far from the Old Port, and I'd gotten some great deals there in the past, including a vintage Hugo Boss sport coat for \$25. On the left wall of the shop, there is a fairly large alcove devoted to shoes, and my roommate was right: a fairly large section of this alcove is devoted to cowboy boots. I saw them, felt them, tried them on They felt right, as did the price tag of \$22 (which later came down further because of the 30 percent off sale that had been going on). All told, 1 walked out of the shop with a twopiece brown suit, the boots, and a pair of knock-off Wayfarer sunglasses for around \$50. Not bad. Check this

Happily, I went home that day with my boots, and now, just as happily, my boots elicit some reactions of moderate joy, but mostly extreme sadness at my existence, and comments such as, "Why do you look like a 10-year-old stripper?" and "Why are you the way that you are?" For less than \$20, I could not ask to be more satisfied.

LAST WEEK'S SOLUTION:

ARTS & ENTERTAINMENT

'500 Clown Frankenstein' tumbles into Pickard tonight

BY MAXIME BILLICK

What happens when a circus and a classical play combine? 500 Clown the-

ater group.

Tonight, "500 Clown Frankenstein" comes to Pickard Theater. Hailing from Chicago, the group 500 Clown currently has four shows in its repertoire; along with "500 Clown Frankenstein," its shows include "500 Clown Macbeth," "500 Clown Christmas," and "500 Clown and the Elephant Deal." A fifth, "500 Clown A Man's a Man," is in the works.

The group's version of "Frankenstein" is anything but a traditional take on the almost 200-year-old classic. In this adaptation, three clowns go on a chaotic journey to construct Dr. Frankenstein's laboratory. Hindered by detailed and exaggerated period costurnes, the clowns are propelled into a number of acrobatic feats. According to 500 Clown's Web site, "Comic may hem takes a sharp turn to a devastating climax when one clown is forced to play the creature and suffer abuse and abandonment."

500 Clown uses circus arts, improviation, and action-based performance in productions that require performers to undergo extreme physical and emotional risk. The work shifts the audience from passive to active observers, which "creates a charged environment that celebrates the unpredictable power

COURTESY OF LESLIE BUXBUAM DANZIG

CLOWN CONNECTIONS: 500 Clown, a theater group from Chicago, will incorporate the audience in its performance of "Frankenstein" on Friday in Pickard.

of the moment," the Web site said.

According to director Leslie Bux-baum Danzig, she and the three cast members all started as "straight up theater majors" and were each inspired by elements of clown in different ways. One aspect about which they all agree is the idea of investigating "rigorous play" as demonstrated through clowning.

As the director, Danzig is the keeper of dramatic tension. She notices what the audience is responding to, what went well, and when a clowning tangent has gone too far.

Danzig is also concerned with "what can be unleashed by a commitment to playing or having people interact." Each actor is him or herself on stage, but a "specific version" of themselves, according to her.

The all-encompassing aspects of clowning differentiates it from other kinds of theater

"It has liveliness and immediacy. We use the audience, the architecture, whatever is happening is acknowledged," Danzig said.

The company 500 Clown was started in 2000, and "500 Clown Frankenstein" premiered in 2003. In order to create these pieces, the cast takes time to think about the chosen text. They then clown around-literally-over many months reflect on their performance. The show changes from audience to audience and from theater to theater.

Danzig endeavors to take advantage of the space in which the cast performs, and is excited about performing in Pickard Theater and incorporating the balconies into the acting space.

Danzig also welcomed the opportunity to use an open space rather than a black box theater.

"A proscenium gives formality to the stage," she said. "There is a fourth wall to break."

The cast enjoys meeting audience members after performances, according to Danzig. Not only does it help cultivate a relationship between the actors and the audience, but the troupe continues to develop shows based on audience feedback.

"500 Clown is committed to cultivating a relationship with our audience members. It deepens the principle of the work. Inevitably we have to ask, 'How do you interact with the audience without making them feel uncomfort-able and putting them on the spot? How do you involve them without thrusting it upon them? How do you create community at these events?"

"500 Clown Frankenstein" will be performed at 8 p.m. today in Pickard Theater. Tickets are free and are available at the Smith Union info desk or at

'Moby Dick' confronts stormy issues in Media Gallery film

BY ANDY BERNARD

People may not think of their ordinary home videos as fine art, but after viewing the most recent exhibition in the Bowdoin College Museum of Art's

Media Gallery, anything seems possible.

The exhibition

REVIEW is Guy Ben-Ner's

"Moby Dick," a 12-

minute silent film staged in a strange setting: the artist's kitchen. Starring only himself and his six-year-old daughter, the film summarizes Melville's classic novel and accentuates many of its basic motifs while simultaneously introducing themes of fatherhood, masculinity, and sexual tension between the father

As "Moby Dick" is transposed into the environment of the home, much of the action of the original novel is cast in a new light. For example, the choice be-tween remaining on land and setting sail becomes a conflict in the life of an artist and a father: How should a father bal-ance his professional life with his family

In the film, Ben-Ner plays the roles of Ishmael and the larger-than-life cap-tain Ahab, among others. His daughter becomes significant to the film, too: she fills many small and diverse roles from the bartender at the Spouter Inn to Ben-Ner's detached legs when his body is chopped in half.

There are pros and cons to having a two-person cast, and some of each are evident in the film. It is amusing to see the girl imitate bartenders and sailors, but the many roles that Ben-Ner fills are

The camera work is a nod to early classical cinema. The camera tilts to and fro to simulate the rocking of the boat, and frequent Charlie Chaplin-esque slapstick stunts give the film much of its humor: While on the boat, Ben-Ner falls down a ladder, gets hit with his refrigerator door twice, and gets knocked out by a bag of sand attached to a string.

The most comical scene of the film takes place on the boat as Ishmael (Ben-Ner) and a sailor (his daughter) eat dinner. The rocking of the boat tilts the table between them, causing their single plate of food to slide from one person to the other as they take turns eating.

There are several aspects of "Moby Dick" that differentiate it from other creative home videos with a father and his daughter. There is a great deal more thought behind Ben-Ner's film than the average home video. Hidden behind the film's unassuming exterior are complex themes and problems, as well as a good deal of erotic tension that is presumably absent from most family vide

In addition, Ben-Ner is able to use the home video format to his advantagethe film is charming in its simplicity and creative use of everyday objects. For example, Ben-Ner uses the stop-mo-tion animation of two papier-måché triangles on his kitchen floor to simulate lurking shark fins. In a montage to show the day-by-day passage of time, the two characters are shown emerging from their cabins (kitchen cabinets) several times in succession.

Ben-Ner has certainly succeeded in adding new and interesting dimensions to Melville's classic. The film is thought provoking and fun to watch—definitely a worthwhile use of 12 minutes.

Victory and Daleside beers 'monkey around'

THE BEER GEEK BY MAC EVANS

It's probably just me, but recently I've seen a ton of references to Sun Wukong, the Monkey King. In honor of the little guy who wanted to be more than just a monkey and to attain powers comparable to—if not more powerful than-the gods of heaven, I chose a couple of beers that will pay tribute to this mythological figure

Victory Golden Monkey

Golden Monkey is a Belgian triple brewed at Victory Brewing in Downingtown, Pa. Victory Brewing is a beer mecca for anyone in the Philadelphia area, and for awhile the only way Pennsylvania residents from Bowdoin could enjoy their beer was to get it from Pennsylvania and bring it up. Only recently has Victory become accessible up north at nearby Bootleg

gers, where I found Golden Monkey.

The beer hits the nose from the bottle well before drinking it, and the smell alone could get you drunk. At 9.5 percent, it is a strong brew not for the faint of heart (or alcohol toler

This beer is an interesting take on the Belgian. It starts off as very light, then hits you with some bitterness, and finally a certain spiciness not found in monasteries. The aftertaste bookends the drink similar to the smell-alcoholic but sweet, a hint of banana. I really enjoy this take on the Belgian triple, and I can see how Vicis as popular as it is.

LARGOT D. MILLER, THE BOWDOIN ORIEN

GO BANANAS: Daleside's Monkey Wrench and Victory's Golden Monkey, despite their names, are differently brewed beers. Monkey Wrench is a dark ale and Golden Monkey is a triple-brewed Belgian

Daleside Brewery Monkey Wrench

This dark ale is a product of England. Its name is derived from a strange legend involving the demise of a monkey who floated ashore in war-time Britain speaking a foreign language. The monkey of the legend was thought to be a spy and was put to an untimely end, so the brewers wanted to pay homage to that mon-

The beer itself is a nice balanced brown ale that goes down very easily and enjoyably. It's malty with some overtones of caramel, chocolate, and nuttiness typical of brown ales. It's easy to drink, but on the other hand it doesn't really have anything memorable or spectacular that sets it apart.

Both beers are available at Bootleggers, and both are a little on the pricey side. The Golden Monkey is an interesting interpretation of a triple ale, and I'm glad to see Victory Brewing making its appearance in

Although I recommend both beers, I have to admit that I would have preferred getting cheaper ver-sions of both of them, and a trip to Bootleggers will open up the possi-bilities of many different brown ales and triples to try.

Man's best friend becomes family in 'Story'

THE BOOK NOOK RY FRANCES MILLIKEN COLUMNIST

It took me far too long to immerse myself in the glories of "The Story of Edgar Sawtelle" by David Wroblewski. The formidably paginated book haunted the display case of the Philadelphia bookstore I worked in last summer, new copies steadily appearing as their predecessors rapidly flew the coop. I resisted the call of the dust jacket, shying away from the author's difficult surname. In January, I succumbed. Three hundred pages later I couldn't believe I had read so much and that not a single page had been wasted. I was just halfway through, and I couldn't wait for more.

Edgar Sawtelle is the son of dog breeders in the plains of Wisconsin. His grandfather began crossing dogs based on an uncanny instinct for quality, and generations of canines later, the Sawtelle dogs are on the verge of becoming impeccable in addition to magnificent.

Edgar and his parents Trudy and Gar have something a lot like paradise. They live in a small town that boasts a striking cast of unique characters. The year is methodically paced and circulates on a schedule dictated by the dogs that includes breedings, whelping, weanings, trainings, and adoptions. Each of the Sawtelles has a particular strength within the rotation. Life is good, if not idyllic.

It should be mentioned that one

does not have to be a dog lover to love this book. Wroblewski spans the divide between species and the dogs are much more than mere compan-

Born mute, Edgar is phenom nally intelligent and conceives of his own sign system with which he communicates with his parents and the dogs. His intrinsic connection to the dogs is fierce, and naming them is his particular talent. Almondine, who is little more than a pup at his birth, becomes his constant companion and, through their beautifully illustrated relationship, both Edgar's affinity for training dogs and Wroblewski's tal-

ent as a writer gleam.

The trouble begins with the return of Gar's brother Claude. Like the other Sawtelles, he too has a particular talent with dogs. Somewhere along the way, this power grew distorted. For a time the brothers are able to work together with civility, but for reasons unclear to Edgar and his mother, Claude leaves as abruptly as he appeared. Not too long after Gar dies

His father's sudden death throws Edgar's life into bleak and violent disarray. The oppressive grief of the loss almost incapacitates him and his mother. Trudy catches pneumonia and a corner cut in Edgar's chores

In light of his uncle's increasing resence on the farm, Edgar begins to have suspicions about his father's death. As Claude grows closer and closer to Trudy, Edgar's anger spikes. An accusation badly communicated forces Edgar into the woods as a runaway. For months he travels through the countryside, stealing food from comfortable summer residents with three dogs in tow.

The time Edgar spends on the outskirts of civilization reveals his strengths as well as the excellence of his canine companions. His communion with his dogs assumes new depths. As Edgar struggles to combine his evidence and his instincts to understand his father's absence, the reader draws close to the rigid reality of loss and the fierce creativity needed to survive.

There are moments in the novel that transcend the tangible, but at no point do the events feel orchestrated by Wroblewski. He has an incredibly light touch and the story unfolds as if it were being written as the reader turns each page.

As the narrative began drawing to a close and the tension mounted, I had to put the book down. Its intensity raised my pulse and I was torn between wanting to rush through until the finish and parceling out the final chapters. Do not delay; "The Story of Edgar Sawtelle" doesn't deserve to be missed.

Hepler individualizes the masses in Becker

STAFF WRITER

Even during the slowest hours at the Bowdoin College Museum of Art, there's always a crowd at its newest exhibition.

"Curating Across the Disciplines: Drawing a Crowd," curated by Visiting Professor of Art Anna Hepler, examines the repetitive theme of crowds through various art media. Specifically designed to incorporate both long-standing and familiar museum pieces, as well as a variety of new additions, the exhibit questions both the uniformity and the individuality of figures in a crowd.
"I am interested in crowds becau

they both diminish and amplify the human experience—a visceral minder that we are all both special and dispensable," Hepler said. "Drawing a crowd requires a decision from the artist—whether the rendering will follow a formulaic, repetitive structure; an approximation of the human form; or whether it will articulate individual personalities, as in a series of portraits. My Becker Gallery exhibit explores a variety of artistic strategies that have been used to portray throngs of people."

While professors can use the Becker Gallery to exhibit work in conjunction with a class, Hepler chose not to.

"It is related [to my classes] only in-sofar as I am interested in solving problems by drawing, and I encourage that same approach in the classroom. With this collection of images you can see a variety of solutions to the problem of drawing crowds," she said.

A well-known image usually located in the Center Gallery is "Human Brick VII" by Lu Shengzhong. Composed of hundreds of red frog-like cutouts on top of one another in addition to the block of paper from which the cutouts were taken, this piece is an abstract example of the message Hepler is trying to convey. Even with hundreds of iden-tical pieces of paper, Sheng manages to

CROWDED OUT: "Curating Across Disciplines: Drawing a Crowd," the newest exhibit in the Becker Gallery, explores how artists depict crowds and the individuals within them.

individualize and differentiate between them. Using careful collage techniques and planned spacing, the overlapping cutouts at the bottom of the frame move naturally to the sparsely populated upper portion.

An intricate drawing by Pietro Martini titled "The Exhibition of the Royal Academy" includes a detailed depic tion of patrons in a large gallery space covered floor to ceiling in equally as meticulous portraits. Using the idea of a crowd within a crowd, Martini is able to add humorous aspects to a complex

In a triptych by Japanese artist Utagawa Kuniyoshi, the artist uses a color woodblock print to convey a sense of action and movement over a large space and incorporates dozens of figures throughout the print. The use of color also creates uniformity to the characters of the woodblock and takes away all individuality, which helps portray the idea that the warriors are acting as one unit.

Another woodcut, and one that is a staple of the museum's collection, Käthe Kollwitz's "Memorial to Karl Leibknect." The rough composition adds to the somber subject matter. The woodcut depicts mourners viewing the body of Leibknect, the founder of the German Socialist Party, and presents a grim portrait of death. In cooperation with the theme of the exhibit, Kollwitz's work is an example of individuality in obscurity. Each figure in the crowd has a distinct pose or facial expression which distinguishes it from the others

in the group.

In addition to both works in paper and woodcut, the exhibit also features works in pencil, charcoal, oil paints and photography. "Curating Across the Dis-ciplines: Drawing a Crowd" will be on display in the Becker Gallery through

ARTS & ENTERTAINMENT

'500 Clown Frankenstein' tumbles into Pickard tonight

What happens when a circus and a classical play combine? 500 Clown theater group

Tonight, "500 Clown Frankenstein" comes to Pickard Theater. Hailing from Chicago, the group 500 Clown currently has four shows in its repertoire; along with "500 Clown Frankenstein," its shows include "500 Clown Mac-"500 Clown Christmas," and "500 Clown and the Elephant Deal." A fifth, "500 Clown A Man's a Man," is in the works.

The group's version of "Frankenin" is anything but a traditional take on the almost 200-year-old classic. In this adaptation, three clowns go on a chaotic journey to construct Dr. Frankenstein's laboratory. Hindered by detailed and exaggerated period costumes, the clowns are propelled into a number of acrobatic feats. According to 500 Clown's Web site, "Comic may hem takes a sharp turn to a devastating climax when one clown is forced to play the creature and suffer abuse and abandonment."

500 Clown uses circus arts, improvisation, and action-based performance in productions that require performers to undergo extreme physical and emotional risk. The work shifts the audience from passive to active observers, which "creates a charged environment

COURTESY OF LESLIE BUX

CLOWN CONNECTIONS: 500 Clown, a theater group from Chicago, will incorporate the audience in its performance of "Frankenstein" on Friday in Pickard.

of the moment," the Web site said.

According to director Leslie Bux-baum Danzig, she and the three cast members all started as "straight up theater majors" and were each inspired by elements of clown in different ways One aspect about which they all agree is the idea of investigating "rigorous play" as demonstrated through clowning.

As the director, Danzig is the keeper of dramatic tension. She notices w

the audience is responding to, what went well, and when a clowning tangent has gone too far.

Danzig is also concerned with "what can be unleashed by a commitment to playing or having people interact." Each actor is him or herself on stage, but a "specific version" of themselves,

according to her.

The all-encompassing aspects of clowning differentiates it from other

kinds of theater.

"It has liveliness and immediacy. We use the audience, the architecture, whatever is happening is acknowledged," Danzig said.

The company 500 Clown was started in 2000, and "500 Clown Frankenstein" premiered in 2003. In order to create these pieces, the cast takes time to think about the chosen text. They then clown around-literally-over many months reflect on their performance. The show changes from audience to audience and from theater to theater.

Danzig endeavors to take advantage of the space in which the cast performs, and is excited about performing in Pickard Theater and incorporating the balconies into the acting space.

Danzig also welcomed the opportunity to use an open space rather than a black box theater.

"A proscenium gives formality to the stage," she said. "There is a fourth wall to break."

The cast enjoys meeting audience members after performances, according to Danzig. Not only does it help cultivate a relationship between the actors and the audience, but the troupe continues to develop shows based on audience feedback.

"500 Clown is committed to cultivating a relationship with our audience members. It deepens the principle of the work. Inevitably we have to ask, 'How do you interact with the audience without making them feel uncomfortable and putting them on the spot? How do you involve them without thrusting it upon them? How do you create community at these events?"

"500 Clown Frankenstein" will be performed at 8 p.m. today in Pickard Theater. Tickets are free and are available at the Smith Union info desk or at

'Moby Dick' confronts stormy issues in Media Gallery film

BY ANDY BERNARD

People may not think of their ordinary home videos as fine art, but after viewing the most recent exhibition in the Bowdoin College Museum of Art's Media Gallery, anything seems possible.

The exhibition is Guy Ben-Ner's "Moby Dick," a 12-REVIEW

minute silent film staged in a strange setting: the artist's kitchen. Starring only himself and his six-year-old daughter, the film summarizes Melville's classic novel and accentuates many of its basic motifs while simultaneously introducing themes of fatherhood, masculinity, and sexual tension between the father

As "Moby Dick" is transposed into the environment of the home, much of the action of the original novel is cast in a new light. For example, the choice between remaining on land and setting sail becomes a conflict in the life of an artist and a father: How should a father bal-ance his professional life with his family

In the film, Ben-Ner plays the roles of Ishmael and the larger-than-life cap-tain Ahab, among others. His daughter becomes significant to the film, too: she fills many small and diverse roles from the bartender at the Spouter Inn to Ben-Ner's detached legs when his body is chopped in half.

There are pros and cons to having a two-person cast, and some of each are evident in the film. It is armusing to see the girl imitate bartenders and sailors, but the many roles that Ben-Ner fills are

classical cinema. The camera tilts to and fro to simulate the rocking of the boat, and frequent Charlie Chaplin-esque slapstick stunts give the film much of its umor: While on the boat, Ben-Ner falls down a ladder, gets hit with his refrigerator door twice, and gets knocked out by a bag of sand attached to a string.

The most comical scene of the film takes place on the boat as Ishmael (Ben-Ner) and a sailor (his daughter) eat dinner. The rocking of the boat tilts the table between them, causing their single plate of food to slide from one person to the other as they take turns eating.

There are several aspects of "Moby Dick" that differentiate it from other creative home videos with a father and his daughter. There is a great deal more thought behind Ben-Ner's film than the average home video. Hidden behind the film's unassuming exterior are complex themes and problems, as well as a good deal of erotic tension that is presumably absent from most family vid

In addition, Ben-Ner is able to use the home video format to his advantage the film is charming in its simplicity and creative use of everyday objects. For example, Ben-Ner uses the stop-mo-tion animation of two papier-mâché triangles on his kitchen floor to simulate lurking shark fins. In a montage to show the day-by-day passage of time, the two characters are shown emerging from their cabins (kitchen cabinets) several times in succession.

Ben-Ner has certainly succeeded in adding new and interesting dimensions to Melville's classic. The film is thought provoking and fun to watch—definitely a worthwhile use of 12 minutes.

Victory and Daleside beers 'monkey around'

THE BEER **GEEK** RY MAC EVANS COLLIMNIST

It's probably just me, but recently I've seen a ton of references to Sun Wukong, the Monkey King. In honor little guy who wanted to be more than just a monkey and to attain powers comparable to—if not more powerful than—the gods of heaven, I chose a couple of beers that will pay tribute to this mythological figure.

Victory Golden Monkey

Golden Monkey is a Belgian triple brewed at Victory Brewing in Downingtown, Pa. Victory Brewing is a beer mecca for anyone in the Philadelphia area, and for awhile the only way Pennsylvania residents from Bowdoin could enjoy their beer was to get it from Pennsylvania and bring it up. Only recently has Victory become ac cessible up north at nearby Bootleg-gers, where I found Golden Monkey.

The beer hits the nose from the bottle well before drinking it, and the smell alone could get you drunk. At 9.5 percent, it is a strong brew not for the faint of heart (or alcohol toler-

This beer is an interesting take on the Belgian. It starts off as very light, then hits you with some bitterness and finally a certain spiciness not found in monasteries. The aftertaste bookends the drink similar to the smell-alcoholic but sweet, a hint of banana. I really enjoy this take on the Belgian triple, and I can see how Vicis as popular as it is.

MARGOT D. MILLER, THE BOWDOIN ORIEN

GO BANANAS: Daleside's Monkey Wrench and Victory's Golden Monkey, despite their names, are differently brewed beers. Monkey Wrench is a dark ale and Golden Monkey is a triple-brewed Belgian

Daleside Brewery Monkey Wrench

This dark ale is a product of England. Its name is derived from a strange legend involving the demise of a monkey who floated ashore in war-time Britain speaking a foreign language. The monkey of the legend was thought to be a spy and was put to an untimely end, so the brewers wanted to pay homage to that mon-

The beer itself is a nice balanced brown ale that goes down very easily and enjoyably. It's malty with some overtones of caramel, chocolate, and nuttiness typical of brown ales. It's easy to drink, but on the other hand it doesn't really have anything memorable or spectacular that sets it apart.

Both beers are available at Bootleggers, and both are a little on the pricey side. The Golden Monkey is an interesting interpretation of a triple ale, and I'm glad to see Victory Brewing making its appearance in

Although I recommend both beers, I have to admit that I would have preferred getting cheaper ver-sions of both of them, and a trip to Bootleggers will open up the possi-bilities of many different brown ales and triples to try

Man's best friend becomes family in 'Story'

THE BOOK NOOK RY FRANCES MILLIKEN COLUMNIST

It took me far too long to immerse myself in the glories of "The Story of Edgar Sawtelle" by David Wroblewski. The formidably paginated book haunted the display case of the Philadelphia bookstore I worked in last summer, new copies steadily appearing as their predecessors rapidly flew the coop. I resisted the call of the dust jacket, shying away from the author's difficult surname. In January, I su cumbed. Three hundred pages later I couldn't believe I had read so much and that not a single page had been wasted. I was just halfway through, and I couldn't wait for more.

Edgar Sawtelle is the son of dog breeders in the plains of Wisconsin. His grandfather began crossing dogs based on an uncanny instinct for quality, and generations of canines later, the Sawtelle dogs are on the verge of becoming impeccable in addition to magnificent.

Edgar and his parents Trudy and Gar have something a lot like paradise. They live in a small town that boasts a striking cast of unique characters. The year is methodically paced and circulates on a schedule dictated by the dogs that includes breedings, whelping, weanings, trainings, and adoptions. Each of the Sawtelles has a particular strength within the rotation. Life is good, if not idyllic.

It should be mentioned that one does not have to be a dog lover to love this book. Wroblewski spans the divide between species and the dogs are much more than mere compan-

Born mute, Edgar is phenome nally intelligent and conceives of his own sign system with which he communicates with his parents and the dogs. His intrinsic connection to the dogs is fierce, and naming them is his particular talent. Almondine, who is little more than a pup at his birth, beomes his constant companion and, through their beautifully illustrated relationship, both Edgar's affinity for training dogs and Wroblewski's tal-

ent as a writer gleam.

The trouble begins with the return of Gar's brother Claude. Like the other Sawtelles, he too has a par ticular talent with dogs. Somewhere along the way, this power grew distorted. For a time the brothers are able to work together with civility, but for reasons unclear to Edgar and his mother, Claude leaves as abruptly as he appeared. Not too long after, Gar dies

His father's sudden death throws Edgar's life into bleak and violent disarray. The oppressive grief of the loss almost incapacitates him and his mother. Trudy catches pneumonia and a corner cut in Edgar's chores

forces them to ask Claude for help.

In light of his uncle's increasing esence on the farm, Edgar begins to have suspicions about his father's death. As Claude grows closer and closer to Trudy, Edgar's anger spikes. An accusation badly communicated forces Edgar into the woods as a runaway. For months he travels through the countryside, stealing food from comfortable summer residents with three dogs in tow.

The time Edgar spends on the outskirts of civilization reveals his strengths as well as the excellence of his canine companions. His communion with his dogs assumes new depths. As Edgar struggles to combine his evidence and his instincts to understand his father's absence, the reader draws close to the rigid reality of loss and the fierce creativity needed to survive.

There are moments in the novel that transcend the tangible, but at no point do the events feel orchestrated by Wroblewski. He has an incredibly light touch and the story unfolds as if it were being written as the reader turns each page.

As the narrative began drawing to close and the tension mounted, I had to put the book down. Its intensity raised my pulse and I was torn between wanting to rush through until the finish and parceling out the final chapters. Do not delay; "The Story of Edgar Sawtelle" doesn't deserve to be missed.

Hepler individualizes the masses in Becker

ERIN McAULIFFE STAFF WRITER

Even during the slowest hours at the Bowdoin College Museum of Art, there's always a crowd at its newest exhibition.

"Curating Across the Disciplines Drawing a Crowd," curated by Visiting Professor of Art Anna Hepler, examines the repetitive theme of crowds through various art media. Specifically designe to incorporate both long-standing and familiar museum pieces, as well as a variety of new additions, the exhibit questions both the uniformity and the individuality of figures in a crowd.

"I am interested in crowds because they both diminish and amplify the experience-a visceral reminder that we are all both special and dispensable," Hepler said. "Drawing a crowd requires a decision from the artist-whether the rendering will follow a formulaic, repetitive structure; an approximation of the human form; or whether it will articulate individual personalities, as in a series of portraits. My Becker Gallery exhibit explores a variety of artistic strategies that have been used to portray throngs of people."

While professors can use the Becker Gallery to exhibit work in conjunction with a class, Hepler chose not to

"It is related [to my classes] only in-sofar as I am interested in solving problems by drawing, and I encourage that same approach in the classroom. With this collection of images you can see a variety of solutions to the problem of drawing crowds," she said.

Track trounces rival in women's home meet

BY ANNIE MONJAR STAFF WRITER

The women's track and field team arrived at Farley Field House last Saturday for a meet against MIT and Colby with last year's Division III New England Regional Championship, where Bowdoin took seventh place and MIT took third, resting in the back of the Bears' minds.

Bowdoin has its sights set on a top three finish at the 2009 D-III New England Championship this year, and competing against MIT gave the women an opportunity to gauge the season's direction.

Given that Bowdoin took first in the meet with 173.5 points to MIT's 149 and Colby's 73.5, the results bode

Highlighting the day were two broken school records. Elsa Millet '12 broke her own 200-meter dash record with a 26.32 second finish, .16 seconds faster than her previous record. In the 3,000-meter run, Annie Monjar '09 broke a record set in 2004 with a time of 10:01.

"It was remarkable to break two school records in a January meet," said Slovenski. "We usually break school records later in the season on the banked tracks in Boston.

"I was excited to win against MIT, I think it is incredible that we were able to win by so much," said captain Alison Pilon '09. "We have such a strong team this year and I get more and more pumped as the season goes and I see more and more successes."

Prepared for a neck and neck with MIT for first place, the Polar Bears competed relentlessly on the track as well as in the jumps and throws, with several breakthrough performances

Even as the Engineers picked up first place finishes throughout the day, Bowdoin earned more points with multiple scorers in several events, including the 600-meter dash, where Bowdoin took second through sixth places, as well as the triple jump, where first through fourth place fin-ishes gave the Bears 19 points, making it the high-scoring event of the

day.

"MIT earned many of [its] points Duffy '11, "but Bowdoin has a lot of depth this year that helped us earn many second, third, fourth and fifth

The women enjoyed several personal records, as well, including Gina Lonati '12, who had a personal best in the weight throw as well as a fifthplace finish in the 55-meter dash. Shemeica Binns '09, who took first in the shot put, also threw a personal best of 40' 6.75".

The return of sprinting talents Erin York '09, who had been sidelined with an ACL injury, and Alexa Staley '11, whose foot injury has kept her out of competition, also contributed to Saturday's victory. York took fifth in the 200-meter dash, while Staley earned fourth in the 55-meter hurdles.

"Getting Erin York back from her knee injury is a big boost for our lineup," said Coach Peter Slovenski. "She's an outstanding competitor and has a great mind for racing.

"Alexa has been experimenting with different ways of racing because of a foot injury," Slovenski said. "The hurdles are a very difficult race, but it looks as though she is starting to get back into the fast rhythm she had last year when she was an All-New England hurdler"

But before the Bears take on the championship meets such as Boston University's Valentine's Day Invitational on February 13 and 14, they will attempt to take the state title tonight at Bates. Last year, the Bears took third place, behind USM and

This year, however, Bowdoin is feeling confident.

We have lots of momentum going into the State meet from a big win against MIT," said Dana Riker '10, "and the team is both physically and mentally prepared to leave it all on the track Friday night. It's going to be great battle with Bates, Colby, and USM, but I have so much confidence in what this team can do

MARGOT D. MILLER, THE BOWDOIN ORIENT

Men's hockey plunders win from Vikings

The men's hockey team returned to its winning ways with a 4-1 trouncing of Salem State University Friday night followed by a hard-fought 6-6 draw with the University of Southern Maine (USM) Saturday evening.

The Bears hauled their way up to sixth in the NESCAC table following this weekend's action.

Bowdoin struck early to set the tone for the game against Salem State. Brunswick native Kit Smith '11 lit the lamp vith 1:27 gone in the first as he beat the Vikings' goalie off a quick shot from a face-off in the offensive zone.

Bowdoin held the lead until the Vi-

kings pulled one back at 15:37 in the second period.

Bowdoin, however, had too much sion for the Vikings to contain and left its mark on the scoreboard in the third period. First year Jordan Lalor scored a short-handed goal at 2:39 over the goalie's blocker to propel Bowdoin into the lead.

Benjamin Tsujiura '12 eased Bowdoin further ahead at 8:05 with his first of the

Jeff Fanning '11 then iced the win at 18:21 with a short-handed empty

net goal.
Goaltender Richard Nerland '12 made 16 of 17 stops en route to an important victory.

Saturday evening was fan appreciation day at Watson Arena, and those who made their way out were treated to a flurry of goals.

Colin MacCormack '10 opened the

scoring following a Husky turnover at

5:10 in the first period.

Kyle Hardy '11 added a second at 17:11 with a wicked wrist shot following a two-on-one over the goalie's glove. Momentum shifted in the second pe-

riod as the Bears conceded four goals to the Huskie

An otherwise dour second period vas punctuated by a fierce goal from the blue line by defender Kyle Hanson '11.

Bowdoin slipped even further behind as USM scored its fifth at 9:27 into the third period, yet the momentum shifted once more as the Huskies made the mistake of gifting a Bowdoin squad hungry for goals with a glorious opportunity. Two USM penalties led to a five-on three opportunity, and Brendan Reich '11 scored at 10:17 following a feed from Graham Sisson '12 from behind the net.

Still on the power play, Mike Corbelle '10 ripped a shot at 10:33 that rifled its way past the USM keeper.

seemingly struck at 12:35 as the puck took an odd bounce into the path of an onrushing Husky, who slotted past Nerland to ease USM ahead.

Yet the Bears had the last word as Corbelle scored his seventh of the season on the power play. With only 1:29 remaining, he blasted a shot through the USM goalie's legs and into the back netting. The game remained level through overtime and the two teams left the ice

Nerland stopped 25 of 31 in the 12goal thriller.

Sisson, currently tied for third in goals scored for Bowdoin with six, gave some insight into the Bowdoin turnaround.

The leaders, the captains, [seniors] Matt Smith and Mike Collins, they took us in the right direction and got us on the right track," he said. "They stepped up and it worked out."

Having started to rediscover their early-season form, Sisson is optimistic about the Bears' chances looking into

"It's a one game and done so anything can happen," he explains. "Hopefully we can go pretty far.

Bowdoin visits Hamilton tonight at 7 p.m. and faces off against Amherst tomorrow at 3 p.m.

BY CHARLOTTE RYAN

The Nordic ski team placed ninth out of 11 teams at the University of New Hampshire carnival in Jackson, N.H., in a 1.4K classic sprint on Friday and a 10K freestyle race on Saturday.

Erin Hatton '12 was the first Bowdoin woman finisher in 55th place in the sprint. Hatton was followed by Olivia Orr '12 in 58th and captain Elissa Rod n'10 in 74th

"This was [Olivia's] best skiing of the season," Coach Nathan Alsobrook said. "She showed more snap and speed."

The men's classic sprint was led by another first year, Spencer Eusden '12 in 52nd. Niko Kubota '10 finished directly behind Eusden in 53rd and Colan Hatton finished in 54th.

These three guys were separated by

less than .7 seconds," Alsobrook said "It is promising to see the team finish-

ing competitively close together."

The Polar Bears only race in sprints a couple times a year, and train mostly for longer events.

"The conditions were perfect for classic skiing, cold, fast tracks," Hatton

Courtney Martin '09 had the best race of her collegiate career, according to Alsobrook, in the 10K freestyle. She led the Polar Bears, finishing in 43rd. Hatton followed in 59th and Rodman

After being out of the racing circuit for a couple of weeks due to a sinus infection, top racer Walt Shepard '10 finished in 34th. Shepard did not race

on Friday.

"For him this was not a great result because he is capable of quite a bit

more, but this was a tune up to get the rust off," Alsobrook said.

Eusden followed in 45th and Hatton in 46th.

Eusden had a particularly notable reekend. The course was a good fit for him because he has natural speed.

"He is a first year gaining experience and getting better as he adjusts to collegiate racing. He has a lot to look for-ward to." Alsobrook said.

The 10K course was just redesigned to bring it up to world cup standards.
"It was quite challenging, like profes-

sional skiing, with narrow windy trails and quick transitions," Alsobrook said. Alsobrook was particularly impressed with the improvements by the

The Nordic team will race in the University of Vermont carnival in Stowe, Vt. this weekend.

AIRBORNE: Kelsey Borner '09 throws the shot put at the home meet on Saturday.

Women's b-ball deals first loss to Lord Jeffs

After a stellar weekend in which the women's basketball team notched two of its biggest wins of the season, the team rill look to continue its winning ways in home games tonight and tomorrow. The Polar Bears (16-4, 4-1 NESCAC)

handed Amherst its first loss of the season in a 63-61 victory last Friday. The then No. 4-ranked Lord leffs had been 18-0 before junior forward Leah Rubega's buzzer-beating lay-up downed Amherst

The teams traded baskets throughout the exciting game, though the Polar Bears held a 36-32 lead at half time Bowdoin extended its lead to as much as nine points in the second half, but Amherst tied the game with under two minutes left and eventually took the

A pair of tri-captain Alexa Kaubris '09 free throws tied the game at 61 with 36 seconds to play, giving Amherst time for the last possession. The Polar Bears, however, forced a Lord Jeffs turnover and called a time-out with 10 seconds left in the game. After in-bounding the ball, senior tri-captain Maria Noucas brought the ball up-court and prepared to take the final shot. At the last second. Noucas rifled a pass to Rubega under the hoop, enabling her to make the winning layup with a defender at her back.

"It was all kind of a blur," Rubega said. "Maria and I just made eye contact at the last second and she threw a bullet of a pass. The ball seemed to take forever to fall in. We played a solid game all the way up to the end that put us in position to win with a final shot. It felt great to be Amherst's first loss all season.

Noucas was proud of her team.

"It shows that if we go out and play hard for 40 minutes, then we are going to be in it in the end," Noucas said.

The Polar Bears followed up their victory against Amherst with another road conference win at Trinity, 62-44. The game was never really in doubt, as Bowdoin made its first nine shots from the field and held the Bantams to just six field goals in the first half and 28 percent shooting in the game. Rubega paced the team with 18 points and nine rebounds in the Polar Bear win.

"[Rubega] is just an awesome rebounder and has a great sense of where the hoop is when she shoots," said Nou-"It's fun to play with her because you always trust the ball in her hands that she is going to make good decisions. She just battles and it's really in-

First year Jill Henrikson was named the Maine Women's Basketball Coaches Association Rookie of the Week for her efforts against Amherst and Trinity. Henrikson finished with 16 points and eight rebounds against Amherst and 12 points and four assists against Trinity. Henrikson said she wasn't fazed by

the pressure of playing two good NES-CAC teams away from home.

"I just go out and play every game to the best of my ability no matter what team it is," she said. "Our team has great chemistry, everyone gets along, and all of the players are great friends. They are going to be cheering loud no matter if it is a first year or senior in the game."

Bowdoin has won six of its last seven games. This weekend, the Polar Bears will look to continue their hot streak at home against Middlebury at 7 p.m. tonight and Williams at 2 p.m. tomor-

It seems the team is peaking at the

right time, just before the playoffs.
"We just have to stay focused on each individual game and practice," said Noucas. "We have put ourselves in great position coming into the next two weekends. Now, we just have to finish."

SWIMMING WITH HART: Hartley Brody '12 swims in the 500-yard freestyle at the home meet on Saturday against Wesleyan and Trinity.

In an exciting meet, both the men's and women's swim teams trium-phantly beat Trinity and narrowly lost to Wesleyan in the first home contest of the year.

The Polar Bears went into last Saturday's meet with large expectations, coming off of two consecutive week-ends of victories for both the men and women against Bates and University of Maine-Orono.

Although the meet was technically against Wesleyan and Trinity, perennial rival Colby was also present. Though the Polar Bears were not scored directly against the Mules, it nonetheless served as a preview for Saturday's duel to settle the Bowdoin/ Colby rivalry. The women's competition, despite fostering some incredible swims, was not particularly close in the team scores. The Polar Bears lost to the Wesleyan Cardinals 159-134 and dominated the Trinity Bantan 208-72. Three sophomores produced all the individual wins for the women: Allison Palmer (50-yard freestyle), Caitlin Callahan (100-yard breaststroke), and Megan Sullivan (100-yard butterfly and 200-yard freestyle). Additionally, the relay squad of Erin McAuliffe '11, Callahan, Emma Chiappetta '11, and Palmer won the 200 medley relay by a margin of almost two seconds to start the meet.

However, it was the second place finish from senior Liz Dann that provided arguably the most exciting race on the women's side. In the 200-yard breaststroke, Dann was seeded in the outside lane 1, far away from the traditionally faster center lanes. Yet, despite this distance, Dann stayed within half a second of the race leader the entire competition and provided an example of perseverance, proving why she is one of the team's tri-captains.

On the men's side, the competi tion was fierce and tight throughout the duration of the meet. Although the final score put the Bears up on the Bantams 165-132 and at a loss to the Cardinals 149-146, the meet itself saw a flipping of scores at an event-by-

Out of the heat of this competition, senior Max Goldstein and sophomore Christian Hurst played especially crucial roles. Swimming together in the 200-yard butterfly and the 200-yard individual medley, this powerful duo would go 1-2 and 1-3 respectively in both events with the veteran Goldstein leading the way. These impressive team swims bolstered moral and forged a way for Bowdoin's success.

Wins from the dynamic first year duo of Nathan Mecray and Mac Routh (50-yard freestyle and 100yard butterfly, respectively), coupled with the dominant relay victories in the 200-yard medley relay (Routh, Mecray, Dominic Finelli '12, and David Swanson '09), and the 200-yard freestyle relay (Mecray, Routh, Bla Wheale '09, and Swanson) rounded out Bowdoin's first place finishes.

Routh, whose 100-yard butterfly was also a personal best time, was pleased with the team's performance in the meet.

"It was motivational to see ev eryone performing so well," he said. "Also, us being close to Wesleyan was very exciting...you can see by the score that one race could've changed the outcome. It sets us up well for the

The Bowdoin swim teams will be hosting Colby on Saturday at home.

Women's hockey drops pair

STAFF WRITER

The women's hockey team looks to rebound against Colby after splitting games last weekend. The Bears lost 6 3 to Middlebury on Saturday and beat Williams on Sunday, 2-1.

In Saturday's contest, Emileigh Mercer '09 made 34 saves, while Kate Pokrass '10 scored two of the Polar Bears' three goals against Middlebury. However, the Bears were unable to maintain their lead against the Panthers' dominant offense

However, the Bears snapped the losing streak on Sunday after goals from Michaela Calnan '11 and Katie Herter 12 led the team to a victory over the Ephs. Sage Santangelo '12 blocked 27 shots on goal during the contest.

The Bears emerge from the weekend with a more determined attitude.

"I think we came out of the games. more focused on what our goals are and what we need to do in order to ac-

complish them," Santangelo said.
"As a team I think we definitely gained some confidence this weekend...we played three strong periods against Middlebury and generated a lot of offensive opportunities," Pokrass

Using the past games as learning tools, the Bears are ready to face Hamilton and Wesleyan away this weekend.

Wesleyan this weekend are to put together a complete game that will get us the points we need," Santangelo said.

Lozzi also commented that the Bears' strong work ethic in practice this week should contribute to their performance this weekend.

We are hoping to apply all of the things we have been working on and correcting in practice, and hopefully come out with two wins this weekend and move up in the standings...we want to set a tone for the rest of the season," Lozzi said.

"We have worked hard all week to tighten our game, and make it harder for the opponent to get into a rhythm," Santangelo added.

The Polar Bears will also play the first hockey game against Colby in the new Watson Arena on Tuesday night at

"The first game against Colby in the new arena is definitely exciting. It's a great rivalry, and it's going to continue in a beautiful new facility," Santangelo said. "I hope that we can compete and use the excitement to our advantage.

The game will be a memorable event, and the team is eager to be the first to compete against the Maine rival in the

"Every Bowdoin athlete loves the rivalry with Colby, and playing in the first Bowdoin/Colby match-up in the Watson Arena will certainly add to the emotion of that game," Pokrass said.

Daley, Skipp make clip for ESPNU

era started by a coincidence last year

BY SETH WALDER ORIENT STAFF

Not too long from now, the sideline reporter during the big game might just be Bowdoin senior Kaitee Daley. Daley appeared in a one-and-a-half minute segment on ESPNU on Sunday, after the first period of the University of Maine-University of Massachusetts hockey game. The piece focused on the prominently displayed Zamboni in the new Sidney J. Watson arena, which is the fourth collegiate Zamboni to exist in the United State

Prior to the beginning of the semester, Director of News and Media Relations Doug Boxer-Cook sent out the story to interested sources about Bowdoin's oni. On January 16 he received an e-mail from ESPN's Senior Vice President of College Sports Programming. Burke Magnus, who said ESPNU would be interested in a piece on the Zamboni. Daley's journey to the ESPNU camin Smith Union. She gave directions to several visitors, who inquired about her interests. Daley responded that she was interested in sports communication, and one of them told her that her husband was Mangus, the founder of ESPNU. In fact, prior, to e-mailing Boxer-

Cook, Mangus sent a message to Daley telling her about the Zamboni story and asking if she would get involved on Bowdoin's end. After Boxer-Cook received word from ESPN, he told Sports Information Director Jim Caton about the project. Caton sent word to Daley because of her experience with the Bowdoin Cable Network, unaware of her already-established connection with

Daley, who is hoping to land a job at ESPN after graduation, was told that her segment would run sometime in February. However, on Thursday, January 29, Daley was informed that the piece had to be completed by noon the next day. that turned out to February 1," said

Daley contacted Zac Skipp '11, the BCN general manager, and the two of them worked from 5:30 p.m. until 2 a.m. that night and then again the next morning from 10 a.m. to 11:30 a.m.

According to Skipp, FSPN was v specific in what they wanted, includ-ing suggested leads, which Daley wrote. Daley credited Skipp for his editing job.

"Zac was actually my savior," Daley. "I'm familiar with Final Cut Pro, but [Skipp] is so good."

anchor, came to the BCN studio on Friday morning to help out with the finish ing touches. Boxer-Cook said he made a few suggestions but that the clip was already a piece of high quality work. "I was thrilled to see they could put

together such a slick package in such a small period of time," Boxer-Cook said. Kaitee and Zac are both pros.

Squash has tough week

BY ANDY BERNARD STAFF WRITER

The past two weeks have held mixed results for the men's and women's squash teams as they battle through the heart of the season.

Last week, the Polar Bears traveled to Providence to take on the Brown Bears. Bowdoin suffered two 8-1 losses, with wins by junior co-captain David Funk on the men's side and senior co-captain Kate Gormley on the women's side.

The women, rebounding from the loss, were able to defeat Bates three days later in a nail-biting 5-4 victory in Lewiston. The score was 4-4 going into senior co-captain Biz Gillespie's match in the No. 5 slot. Gillespie was able to clinch victory for the Polar Bears in four dramatic games, against Bates' Mimi Neal. The men were not as lucky against the Bobcats, losing by a disappointing score of 9-0.

Last weekend, the Polar Bears traveled to Trinity for the NESCAC tournament. The women defeated Hamilton in the quarterfinals by a score of 6-3, with wins coming from the top six players on the ladder: sophomore Elena Laird in four games, sophomore Lauren Gesswein in three, Gormley in three, senior Alex Francesch in three, Gillespie in three, and first year Lizzie Warner in three, and first year Lizzie Warner in three. In the semifinals, the women faced a strong Williams team and lost by a score of 9-0. Their final match came against Middlebury on Sunday. In this match, the top of the women's ladder came through again, as numbers 1-5 claimed victory for Bowdoin.

The men's team suffered a terrible day on Saturday as they dropped matches to

close rivals Amherst and Colby, both by a score of 5-4. Despite these two heart-breaking losses, the team was able to re-bound on Sunday in a contested match against Middlebury. Wins for the Polar Bears against Middlebury came from sophomore Andy Bernard at No. 1 in three games, sophomore Rahul Madan Mohan at No. 4 in five games, senior co-captain Robert Lynn at No. 5 in three games, junior Arun Makhija at No. 7 in four games, and junior Rob Stanley at No. 8 in a dramatic come-from-behind win in five games.

"After a disappointing weekend, this match was a bittersweet victory," said Mohan. "It is important for our team to learn from our mistakes and to start preparing for national«"

The mentality of both teams coming out of the weekend is optimistic but with a realistic view of the challenges remaining in the season.

"It has been great to have everyone back post-winter break," said Gillespie. "I think that the results from our Bates match last week and NESCACs this weekend reflect how we have come together as a strong team of fierce competitors. These wins will hopefully give us the momentum necessary to beat the most challenging teams in our division, such as Brown and Mt. Holyoke, at Nationals."

On Wednesday, the women played off that energy to achieve an easy 7-2 win over Colby. They will enter this weekend with good momentum as they face Tufts, GWU, and the University of Toronto at Bowdoin.

The men hope to come out of this weekend with flying colors as well: they will face Tufts, MIT, and Northeastern at Boudoin

This summer, put your knowledge to work in Boston.

Men's track runs to 2nd

CONTRIBUTOR

In its final meet before the beginning of the championship season, the men's track and field team once again demonstrated why it is poised to make an impact during its crucial upcoming meets.

Playing host to a tough MIT team and NESCAC rivals Colby and Tufts, Bowdoin looked strong in its last home meet of the season.

The Polar Bears placed second by scoring 155 points, surpassed only by MIT's total of 181 points. Tufts, Springfield, and Colby rounded out the rest of the field respectively.

There was plenty of excitement on the track on this day. One of the best races for Bowdoin was the 800-meter dash. Brett Stein '12 broke away after two laps, and extended a 10-meter lead. He had stretched the lead out to 20 meters at the finish line. First year Matt Hillard trailed in fifth place throughout the race. However, with a surge coming off the final turn, he passed three runners and finished second with a dive at the finish line. He placed second by just two inches.

There was another close finish in the mile run. Thompson Ogilvie '10 followed the top seed for 1000 meters and then took the lead for 300 meters. MIT's Yermie Cohen proceeded to take the lead back with 300 meters to go, setting off a furious back and forth battle for the final 200 meters. Cohen held off Ogilvie for first place by two feet

By posting a 7.99-second time in the 55-meter hurdles, Mike Krohn '09 made history by becoming only the fifth hurdler in Bowdoin history to break the 8.00-second barrier in this event, joining Phil Good '36, Eric Washburn '84, Eric Gans '88, and Joe Adu '06.

Off the track, the throwers put on another stellar performance. Captain Luke Fairbanks '09 finished first in shot put and scored in the weight throw. In the latter event, Nate Bingham '10 also scored with a second place finish.

"Nate Bingham and Luke Fairbanks have become a fantastic 1-2 punch in the weight throw," said Coach Peter Slovenski. "That event has become a great source of power and points for our team."

The jumpers continued to impress with strong performances from Chris Martin '12, Tim Fuderich' 10, and Colin Hay '10. Martin finished first in the high jump with a leap of 1.95 meters, while Fuderich and Hay placed second and third in the long jump.

ond and third in the long jump.
"Our trio of jumpers has been training well and the results have shown how hard they've been working," said senior captain Damon Hall-jones.

The Polar Bears will look to find success once again at this Saturday's Maine State Meet, after posting a second-place finish there last year and winning the meet the year before. For many, it will be the culmination of four months of hard work.

"The Maine State Meet carries a special level of significance," said distance runner Sam Epstein '11. "We lost both the indoor and outdoor state meets last year, the outdoor meet by only two points, so it would be great to get out names etched back in the record books this year. And it looks like we should do it."

The men's track and field team will compete in the Maine State Meet Saturday night at Bates.

Goals That Really Count

JEREMY IS BERNING

BY JEREMY BERNFELD COLUMNIST

I can't tell you that I solved their problems

I don't think that I changed their lives. I'm not even sure that they'd remember me now. I'm positive that I didn't cure ATDS.

I'll tell you what though: for an hour every week those kids forgot about their lives. They forgot about the smell of the power plant, of the trash, of the mud. They forgot about walking home in big groups with heads bowed in an effort to draw as little attention as possible. They

forgot about their mother, their father, their cousin, who had died of AIDS.

The kids were the poorest of the poor in South African society but did their best in the slums outside of Cape Town. Many of their hornes had no electricity or heat and many had never seen a real doctor. Many hardly had food on their table each night.

Enter: soccer.

I know, you can't eat sports. Sportscan't heal, and sports can't provide clean drinking water, and sports can't get their parents jobs. But thanks to an organization called Soccer 4 Hope, soccer can change the world, one goal at a time.

Each week the kids played real soccer. Once a week, they threw away their matted mess of tape and plastic bags and played with a real ball. They borrowed a pair of shoes and they made it down to the schoolyard for an hour session with actual coaches. They escaped.

Sure the kids played games, but it wasn't about the sports. Like church, every seven days these kids got structure, a break, and an escape. They were taught about responsibility and honesty and friendship. They were shown positive role models. And they were finally educated about the disease that ravages their community and about the positive, pro-active role their generation has to have in ending the epidemic.

Soccer 4 Hope is an organization that seeks to stop the spread of HIV and to address other crucial challenges that kids in townships face every day. Their mission isn't easy but you can't find a group of more passionate or dedicated people. When I studied abroad in Cape Town I had the opportunity to volunteer with them once a week, helping spread their message of hope.

As much as I was there to teach kids about clean drinking water and about AIDS, the best part wasn't when they paid rapt attention or when they asked informative questions.

It sounds corny, but the smiles on their faces when they sprinted onto the soccer pitch could have warmed a brutal Maine winter.

Those kids didn't just run, they flew.
They flew away from the tin shacks
of Khayletsha, the largest township in
Cape Town, their home and the home

of millions of others like them. They flew away from the crime and the fear and restlessness

They fiew so far that they forgot all language and started speaking in Futbol. Futebol. Football. Because they weren't playing in a dusty field in Africa, they were lighting up San Siro or Camp Nou, or usually Old Trafford or the Emirates.

They laughed and they cried, they jumped and shouted. They were kids, just like I was, and they loved sports, just like I do. And that's all that mattered.

Some of them spoke some broken English, I didn't speak any Xhosa, their native tongue. It didn't matter. All you needed to understand was a ball and a

And maybe: GOOOOOAL!

Does Nadal's Australian Open victory signal the end of Federer's reign?

BY ROBERT ZHANG-SMITHERAM

Nadal really got to Federer's head during the Australian Open final last weekend, as he prevented Federer from SPORTS equaling Pete Sampras record of 14 Grand Slam titles in another five-set (7-5, 3-6, 7-6, 3-6, 6-2) thriller between the two rivals. Despite the many other epic matches played between the two, this was their first Grand Slam final meeting on a hard court.

The match was not even close to being as good as the historic Wimbledon final last year (widely considered to be the best tennis match ever played), when Nadal prevented Federer from winning his sixth-straight Wimbledon title. And although any match between Federer and Nadal is going to be exciting by definition, this match slid to a disappointing low as it became more and more obvious toward the fifth set that Federer's nerves were getting the better of him.

Clearly, Nadal takes Federer out of his comfort zone whenever the two meet, as Nadal's tremendous defensive ability forces Federer to go for a lot more on his shots and thus miss a bit more. But I think there's another reason why Nadal is such a tough opponent for the former world No. 1, and that's all in the mental game.

In tennis, match-ups are everything. Sure, there's the pressure of capturing his 14th Grand Slam title and equaling "Pistol Pete's "record, but what troubles Federer the most is the enormous amount of top-spin Nadal gets off the forehand side that he sends kicking high to Federer's backhand, and hitting a one-handed backhand at shoulder level is just as painful to do as it is to watch. Federer is known for staying in control under pressure, but he also has huge winning records against most of his opponents, and that gives him re-assuring confidence. Against Nadal, he has a losing record of 6-13-five of those losses coming in Grand Slam finals-and that creates a vicious cycle that is mentally hard to get out of.

Let's go back in time to 2007-Federer had consecutive winning streaks in every Grand Slam tournament except the French Open. He was setting countless records in tennis history, and had been the world No. 1 player for the last three years. Nadal, on the other hand, had a two-win streak at the French Open, but

had lost twice to Federer at the Wimbledon finals, had a mediocre serve, and lacked consistency in his game. He was very far from challenging Federer's dominance

In just two years, Nadal has overtaken Federer to become world No. 1, and proven himself to be more than just a "one surface wonder." He's even got a new outfit now, finally getting rid of those capri shorts, though I was sad to see the sleeveless shirt go. The two men have not only established one of the best rivalries of all time, but have also done so much for tennis and are respected by fans for being charismatic, well-behaved, and very humble. After his devastating loss, Federer started choking up at the awards ceremony—only to find Nadal giving him a friendly hug, saying in front of the crowds, "Remember, you are one of the best players of the history and you are going to improve the 14 of Sampras."

Some people believe that Nadal's re-

Some people believe that Nadal's recent wins over Federer show that tennis will soon be a one-man show again, this time with Nadal in the driver's seat. However, it's just too early to say whether Nadal will ever be as dominant.

Now is a good time for Federer to regain some lost ground and add some heat to the rivalry, and the best way to do that is to try and dethrone Nadal at Roland Garros this summer. Capturing his 14th Grand Slam title on clay would also be momentous-even Pete Sampras never managed to win the French Open. Nadal started his dominance on clay, and if Federer can steal the throne it would give him some much needed confidence, setting the stage for another epic Wimbledon showdown.

2-1 week for men's hoops

On Tuesday night, the men's basket-ball team handled visiting non-conference foe Babson College, 56-34.

The non-conference victory on Tuesday night followed a weekend that saw the Bears split two games against conference foes, Amherst and Trinity.

The 34 points allowed by Bowdoin against Babson was the lowest total since 2005. Holding the visiting Beavers to just 22.9 percent shooting, the Bears used stifling defense and dominated the paint with seven blocked shots. Both earns struggled early, combining to commit 21 first-half turnovers. With the score tied 12-12 midway into the firsthalf, senior Kyle Jackson and first year Ryan O'Connell lit up Babson, helping Bowdoin outscore the Beavers 24-5 over the remainder of the half. The Bears put the game out of reach with a 9-0 to start the second half. Jackson led the team with 17 points, while going 5-6 from three.

On Friday night, the Bears met the Lord Jeffs, who brought an undefeated conference record and top 15 national ranking to Morrell Gym. Amherst did not disappoint, using a late second half surge to defeat the Bears 73-52. Junior Mark Phillips led Bowdoin with 18 points.

Bowdoin had to regroup as the next afternoon it hosted Trinity in a crucial conference match-up. Fortunately, the

WOMEN'S BASKETBA

Bears were feeling no ill effects from the previous night's result. In a rematch of st year's NESCAC championship, the Bears used quality depth and effective three-point shooting to pull away from the Bantams 65-46. The Bears held a 34-16 advantage in bench points, continuing a season-long trend.

Led by O'Connell, who finished with a career-high 14 points, and senior Darian Reid-Sturgis, who keyed a crucial 11-3 run that gave the Bears the lead for good, the Bears jumped out to a 31-24 lead. Over the course of the second half, Bowdon used hot outside shooting to extend the lead. The team finished 54 percent from behind the arc. O'Connell credits his greater understanding of the offense and his role on the team as reasons for his improved play.

"I'm gradually getting more confi-dence within our offense and know my role on the team and that my coaches and teammates want me to look to score," O'Connell said.

In addition to O'Connell's stellar play off the bench, he credits his upperclass men teammates.

"Also, players such as Paul Sellew and Darian Reid-Sturgis give us a big spark of energy coming into the game," he added.

The Bears will again need a full team effort as they go to Middlebury on Friday night, then travel to Williams College or Saturday. Tip-off is at 7 p.m. Friday and 2 p.m. in Williamstown on Saturday.

OPINION

BOWDOIN ORIENT

No news is bad news

he breakfast scene at Moulton and Thorne are familiar routines: swiping in, grabbing a newspaper, and sitting down to read the news with your scrambled eggs and fruit platter. A less familiar routine, however, is that of students returning these newspapers after breakfast for later diners

The importance of returning the newspapers is two-fold. Our contract to receive the daily newspapers at a reduced price, negotiated by BSG, is conditional upon the papers being returned and recycled. Failure to return the papers led to a suspension of delivery last spring, and there's no reason for that to happen again. More critical is the aim to make daily news readily available to students. We commend BSG for recognizing this and working to ensure that a variety of news sources are accessible. Without student cooperation, however, the system cannot work.

Without a system of signing papers out, or being otherwise held accountable for them, ensuring their return is based on the honor system. Putting each newspaper on a wooden stick, as in the library, would help to ensure the safe return and re-reading of the papers. Though this would be cumbersome, it would provide an opportunity for more students to read the news.

However, we know to share and to put things back where they belong. So peruse the morning paper at breakfast, return it, and check out what you've missed online.

Fighting February

lebruary is the toughest month of winter, offering neither the excitement of a new semester nor the anticipation of spring. This time every year, Bowdoin provides just about everything it can to cheer up students and prevent them from becoming slobbering, mindless zombies: themed dinners at Thorne, ice sculptures on the Quad, even a traveling clown troupe.

In past Februaries, we've attempted to convince readers that this dreary month comes with a silver lining. This year, however, we've changed our strategy. Instead of trying to pretend that frigid temperatures and icy paths aren't so bad. But let's be honest-winter in Maine is long and hard, and there are at least another four weeks ahead of us before you can expect much improvement.

However, since there's nothing any of us can do to make the physical aspects of winter any better, we suggest that you do whatever you can to distract yourself. Take a close look at snow crystals (every one's unique!) Throw snowballs at your friends, or even at Randy Nichols (we've tried it-he's cool with it). Drink hot chocolate in an igloo. Learn to cross-country ski. Or, if you're really having a tough week, you can even go watch a traveling clown troupe in Pickard tonight. Just remember: Spring's not right around the corner, and if you don't start fighting back soon, it will feel like a long time until April.

LETTERS TO THE EDITOR

Graham should be more somber in her vigil analysis

To the Editors

In Emily Graham's wholly unimpressive piece on abortion, ("Roe v Wade vigil brings shock, then reflection," January 30) I wonder why Emily at one point expresses an urge to Roe v. Wade. Ian McEwan wrote of Iraq war protestors, "If they think—and they could be right—that continued torture and summary executions, ethnic cleansing and occasional genocide are preferable to an invasion, they should be somber in their view." I should think the same observation applicable to abortion advocates and their treatment of the

Nothing about abortion should permit good feelings, unless Emily can dissociate the gross reality of the medical procedure from the apparently cheery ideal of "reproductive rights." A fetus, regardless of developmental stage, will become a human being excepting some interruption of natural processes. The legal right to terminate such a life should be received by its proponents not with levity and celebration, but with due gravity and sobriety.

If abortion advocates think-and they could be right-that termination of a developing human life is preferable to the responsibility of childbearing, they should be somber in their view

Sincerely,

Graham's honest op-ed promotes understanding

I would like to thank Emily Graham for writing her op-ed on the Roe v. Wade vigil hosted by the Catholic Student Union two weeks ago ("Roe v. Wade vigil brings shock, then reflection," January 30). I appreciated her honesty and courtesy in the article.

I especially agree with Graham's call for discussion on campus. Discussion does not necessarily have to change opinions, but it should lead to a greater understanding of the beliefs of each group or per-

I would also like to thank Graham for starting to build a bridge between the more conservative students on campus and the liberal masses through explaining that certain groups on campus are misunderstood and oftentimes not given a chance to explain themselves. Not giving groups with more conservative views a chance to explain themselves goes against the "Bowdoin policy of open mindedness." Graham's op-ed was much needed and I am glad that she wrote it

Sincerely, Robert Flores '12

Offer admissions spots to those most willing to give

applaud you for last week's insightful and absolutely correct edi-torial ("Full Disclosure," January 30). I fault you only for being so

forgiving in your criticism.

The school will be adding 10 non-need-blind spots to the student body each year. Since the goal of this addition is to raise revenue. should not Bowdoin pursue the most effective means of doing so?

While denying these students need-blind admissions process will help with this goal, the school could do better. Instead, perhaps the admissions office should auction out those 10 spaces to the families of (mostly) qualified applicants willing to donate the most

However absurd this may seem, this plan is consistent with the administration's goal of bringing in 50 students for the purpose of revenue-raising and certainly more effective than the current one.

Sincerely, John G. Cunningham '10

Uptown and downtown in one summer

RY MEREDITH STECK

Around mid-February of my sopho more year, I was looking to solidify my summer plans. As a potential French-Biology double major, it would have made sense for me to travel, teach French, try outdoor education, or do ecology fieldwork. But part of me was still tempted by the allure of the business world. On a whim, I found two positions in New York City: one with BBC World advertising sales and another with an inde pendent document film company called Kunhardt Productions. Though these jobs may have nothing to do with my future career, they provided me with answers that I couldn't have gotten else-

On Monday and Tuesday mornings I would wear a crisp, short-sleeved blouse with a tea-length black skirt and kitten heels. From Penn Station, the Uptown and Shuttle deposited me at Grand Central where I entered the sleek and shiny BBC office building—a world of business suits, glass elevators, flat-screen TVs, and winking revolving doors. I had wonderful props: my own cubicle, my own extension, my own computer... and (drumroll) my own BBC monogrammed planner.

Despite these glamorous accessories, I was frustratingly useless to BBC World. Lauren, the executive assistant, just didn't know how to employ an intern. I could see in her face that I was only an other element on her "to-do" list. I managed to create work for myself by sitting in on conference calls and observing w she'd try to convince upscale clients to buy advertising space on the BBC World channel and Web site. But I did not envy her work. I just couldn't sit at a desk working with ad campaign man-

agers hundreds of miles away through a phone and a computer all day. My body and brain craved a different sort of movement. At first, I was disappointed that the internship had been a waste. But crossing something concrete off of my list of potential careers was surpris-

ingly satisfying.

On the other three days of the week, I would change my costume: a patterned camisole garnished with a necklace composed of button-shaped shells, a presentable pair of jeans and cute flats. From Penn Station, the Downtown A whisked me to 233 Spring St., the heart of SoHo where the old five-story bricks meet the sidewalks with colorful awnings, eclectic boutiques and sprawling European-style bistros. The nhardt offices were squeezed above a UPS parking garage and the elevator always made such unsettling noises that I preferred to walk the dingy four flights of stairs to my workspace: a dusty closet with peeling beige paint that I shared with two other interns and the casting

Kunhardt Productions was filming its second documentary on the genealogy of famous African-Americans in the media (I now know more about Morgan Freeman's great-great-great grandther than he does). The segments were divided up between five or six historical researchers and I reported to all of them. In one day, I could be sent to the New York Public Library to search archives, be responsible for tracking down original images of land deeds from the 1880s from the University of Mississippi, and be asked to confirm Martinique's primary exports in the late 1850s.

As Julie, the producer, saw that I thrived on being busy and useful, she began giving me jobs of which I never thought myself capable: find a historical plantation in rural South Carolina where we might shoot some re-enactments. She didn't bother telling me how. The greatest moment was my last day when Julie begged me to stay a couple extra hours to finish transcribing some 18th century historical documents and make hotel reservations for the carnera crew in France. I had become a part of their machine. I had taken the seem ingly disparate parts of my liberal arts education and applied them in a foreign

Both positions are on my resu can resist writing "Employer—BBC World" on her C.V.? Who wouldn't want to let slip that her name is in the credits of a PBS documentary? Not me. I don't think I will pursue a career in either of these fields, but the jobs left me with far more than two additional bullet points under "Work Experience." I found out I didn't belong at BBC World...and I sur-prised myself by finding a niche where I least expected it at Kunhardt. I played the Uptown Girl one day and the Downtown Girl the next. The two internships enabled me to find my inner chameleon. Learning to camouflage in unfamiliar environments turned inner gears within my brain that I didn't know I had. Adaptation and versatility are life skills.

While there is something to be said for consolidating your interests, I encourage you to explore your alter ego through your summer internship. Try on a few hats. Or a few doubts. Who knows? You might look good in red. And if you don't, you'll know not to buy it next time. Even in places where we aren't in our element, we can learn valu-

able lessons about ourselves.

Democrats' partisanship threatens to stagnate Congress

COEPTIS

BY STEVE ROBINSON

COLUMNIST

Recently, top Democrats have publicly declared an end to partisanship and the beginning of a post-partisan era; however, their recent actions are telling a very, very different story.

Last week the house approved the 647-page "stimulus" package, by a vote of 244-188. Not a single Republican voted in favor of the new spending bill and 11 Democrats joined the GOP's attempt to stop this titanic bill from ever becoming law.

But this hasn't stopped top Democrats from lying through their teeth to convince critics that they included Republican input on this bill. In truth, this bill was written, not in Congress, but in the private offices of select Democrats; Republicans were not even allowed to offer amendments. Despite the rhetoric coming from the left, it would seem the only bipartisan aspect of the 111th Congress is its opposition to the Democrats' agenda.

First of all, the fundamental principles that this bill was created on are the antithesis of conservatism. The assertion that the GOP had anything to do with this horribly misguided bill simply does not hold water. Although talking about postpartisan politics may make Obama supporters all warm inside, the new administration has done nothing to demonstrate that the next four years will be anything but the usual party politics.

When asked about the bipartisan opposition to the bill, Speaker of the House Nancy Pelosi opined:

"People vote for what they believe in. Clearly, the Republicans did not believe in the agenda...and that's probably one of the reasons they voted that way. I think they probably voted their conscience and they couldn't support that."

Huhl? Well if the members of the Republican opposition to this bill were voting with their conscience, then how did Pelosi and her followers vote?

The new administration and congressional leaders continue to reinforce the notion that we are in a crisis that could last for years. To their

credit, they understand that the only way they can achieve these massive spending increases is if they scare the crap out of the American people. And no one understands scare tactics like Obama's Chief of Staff Rahm Emanuel, who recently made his intentions very clear:

"Never let a serious crisis go to waste. What I mean by that is it's an opportunity to do things you couldn't do before."

It is becoming all too clear that fear mongering, and not hope or change, are the chief tools of this new administration.

Although Democrats can reasonably contend that fear mongering is not a tactic used solely by them, that does not justify this blatant attempt to pull the wool over the eyes of every American.

How can you promise transparency and then create a bill so large and dense that not even a senator, let alone an average citizen, can understand the whole thing? That alone does not invalidate a bill, but in this case, there are ulterior motives behind this faux transparency.

From the New Deal to the Great Society, the merits of the free market have been ignored by liberal politicians in favor of increased government spending. French Prime Minister François Fillon understands the value of free-market ideas as evidenced by his recent rejection of an Obama-style stimulus plan. Of the plan, Fillon remarked:

"It would be irresponsible to choose another policy, which would increase our country's indebtedness without having more infrastructure and increased competitiveness in the end."

Hopefully the Democrats in congress have as much sense as the Fillon. Infrastructure will account for only a small part of this plan in comparison to other areas of spending.

If you still think that this Democratic pork bill is what this country needs, consider this: Only 10 percent of the appropriated funds will be spent in 2009, and some economists believe that much of the "stimulus" money could reach the markets only after the recovery is well under way. Furthermore, there are rational reasons to doubt the Keynesian idea that government expenditures will be immediately converted into consumption.

Even if you agree with the expansion of government [the stimulus] bill would entail, the methods congressional leaders are using to lead this coup are unconscionable.

Massive corporate and personal debt lie at the heart of this crisis and individuals, who now hold low expectations for the economy's future, will not spend their bailout money until this problem is addressed. Instead, they will use the tax rebates to pay down existing debt and save the money for the future.

Even if you agree with the expansion of government this bill would entail, the methods congressional leaders are using to lead this coup are unconscionable.

The true goal of this bill is to cement the current position of the Democratic Party for many years; however, the Democrats have dressed it up as a desperately needed boost for the economy. This bill will not jump start the economy; but it will institutionalize the "Nanny State."

Universal health care a necessity

BY EAMONN HART

The stimulus package currently undergoing Senate debate, a combination of tax reductions and domestic spending designed to create jobs, is a step in the right direction to fixing the economy.

In the long run, however, another glaring problem faces our economy. That "elephant in the room" is the condition of the American health care system.

Approximately 46 million Americans are uninsured at the moment. Millions more, while they have insurance, could lose it at any point if they encounter significant medical conditions. The health insurance situation in this country is a patchwork one; individuals and families find health care through employer-based insurance, individual, and government-assisted plans. Some choose simply to forgo insurance altogether, considering its costs.

In the United States, costs of the uninsured treated in emergency rooms are passed on to hospitals and eventually to consumers. Furthermore, patients with good insurance often receive more treatment than necessary. Ultimately, care is not distributed efficiently and as a result, the system costs much more than it should.

Businesses are severely limited due to health insurance costs. they choose to cut back on benefits, however, they are less able to attract talent. For graduating seniors, this is a real concern. As many of us leave and are no longer eligible to be covered by the insurance of our parents, our job search is limited by the benefits offered. Individuals take jobs not based on what their talents best suit them for, but based on what they can get out of it in terms of health insurance. This discourages the free movement of labor and hinders the progress of the

American worker and employer.

Most industrialized countries have realized that health care costs are unnecessarily restrictive on the economic movement of society and have chosen to decrease these costs

There are different paths to achieving this objective, ranging from affordable government plans to compete with insurers, to coverage mandates, to a single-payer system. There should be vigorous study and discussion of proposed plans and the government should aim to find one that works.

by providing universal health care. It is high time that the United States followed suit. Universal health care would encourage economic growth, revitalize the middle class, and cost

The economy will grow with a universal health care plan because the plan will decrease costs for businesses, allowing for greater job creation. Consider the plight the automakers. According to thinkprogress.org, General Motors estimates that health care costs add \$1,525 to each car it produced. In 2004, the company spent more on health care than on steel. These types of costs are simply prohibitive on good business at this point. Universal health care would ease these costs and allow struggling businesses to stay afloat.

Universal health care is necessary to revitalize the middle class in America. Stimulus checks are helpful, but the risk of serious illness or injury often prevents families from injecting money back into the economy, preferring instead to save it for an emergency that they fear will not be covered (if, indeed, they are fortunate enough to have health insurance). Middle class spending is key to driving the economy out of a recession, but the burdensome costs of health care restrict this spending and choke economic growth.

Then there is the question of affordability. It may seem hard to believe, but U.S. health care spending currently dwarfs that of countries with universal systems. According to a study done by the Commonwealth Fund (a health policy group), the United States spends 53 percent more per capita on health care costs than any other industrialized country. The reasons are numerous, but significant ones include adminis-

trative overhead across numerous insurers and the fact that the costs of emergency room care for those who cannot afford it are passed on to hospitals, insurers, and ultimately concurrers.

while there are many proposed models for universality, in the short run, a system where the government offers a program to compete with private insurers would help insure more people while driving costs down.

Medicare, for example, boasts significantly lower administrative costs (the most conservative estimates still regard them to be at least three times cheaper) than the private sector, but is only available to a certain set of Americans (seniors). Making a similar program available to all, regardless of their location or pre-existing condition, would serve as greatly needed competition in an industry where quasi-monopolies already exist on the state and local level. This would reduce costs for everyone.

There are different paths to achieving this objective, ranging from affordable government plans to compete with insurers, to coverage mandates, to a single-payer system. There should be vigorous study and discussion of proposed plans and the government should aim to find one that works.

However, this is not an issue on which we can afford to continue our present course of action. The country needs to address its health care crisis, and soon. The long-term strength of the economy depends on it

Appreciating Bowdoin's non-academic staffers

BY JOE PACE

Our school has an absurd staff of professors, administrators, and coordinators who ensure Bowdoin's rightful place amongst the top academic colleges in the country. We are treated very well—some would argue too well—but I'm not too concerned with my post-college depression and hardships just yet. I'm not afraid to admit that I'm spoiled—I'm constantly haunted by my trashcan and pissed that I have to actually take it out. It's pathetic, but then so is my laundry basket. I try to embrace and show gratitude for the generous treatment I receive. Unlimited buffets every day? Yes, please.

The obvious privileges we have are great, but I'm going to step back and turn the spotlight on those who really make every day special. I'm talking about the on-campus staff that we see daily but might not think twice about. I will not only mention the standouts, but also the dark horses that keep our reputation high and spirits even higher.

The Moulton Tag-Team: Patty and Ann. Renowned and decorated, these two are the pinnacle of Bowdoin staffing. It was not until this week, three years into my Bowdoin career, that Patty acknowledged me by my first name...nothing like it. Not only is name recognition a privilege, but Patty-Ann interactions can be even more exciting. Here is one that I've witnessed:

Ann (noticing the warmth of the fall day from her bagged lunch spot):
"It's so hot we should go outside in our birthday suits!"

Patty (subdued but enthusiastic):
"Oh veah."

(Laughter).

They play off of each other like Stockton and Malone, but also carry individual supremacy like Wilt Chamberlain (on and off the court).

Thorne's Main Attraction: Darlene. I've never worn a shirt she didn't like. Before I make eye contact, she is smiling in my direction.

If I ask for a little more; I get a,

"You got it," and contagious, near uncontrollable laughter; at first it took me by surprise and threw me off a bit, but I've learned it's what makes her one of the best servers Bowdoin has to offer. I would love to be that happy.

Dark Horse Performer: Irene. She

Dark Horse Performer: Irene. She isn't as well known as I believe the others to be, but this one is a gem. She works in the C-Store and swipes at Moulton sometimes—flexible. I don't know why this is, but I really didn't want to write about her so that she could be my favorite and only my favorite, because everyone on campus reads my op-eds and listens to what I say. She is like a beloved band that you don't want anyone else to know about because somehow their music isn't the same afterwards. Irene, if you're reading this, kudos.

There are staff members all around campus that are special to the community; whether they are cleaning the dorm or filling in the hole you kicked in the hallway wall, these people are as close to our campus as anyone, and (most) will surprise you with how cool they are. I could count on my first-year housekeeper, Linda, to let me know the day of the week and the weather every time I saw her, even if I didn't ask. I soon learned that the campus was teeming with characters like Linda who would only make my college experience better.

I encourage anyone reading this piece to establish a relationship with their favorite campus employee. I would bet that doing this would only improve their own and the employee's days on this campus, though ignoring my suggestion will most likely not impede the impending interaction: They will find you and they will make you feel happiness on the inside, no doubt.

Joe Pace is a member of the Class of 2010.

Bowdoin's intellectual culture in need of rejuvenation

BY ROSS IACORS

Dear first years,

Why did you pick Bowdoin in the first place? If you really think about it and try to recollect your initial inclinations, you'd admit there was something seductive about the idea of a liberal arts education. The idea of such an education was vague, and it still is, but you were told by your admissions counselor or parents what it was and something about that appealed to you.

It is possible you still hold out hopes of enjoying the rapture of intense intellectual questioning and political arguments outside class. There is still a hope that the endless conversations about poetry, literature, and philosophy lacking in high school have a home here, but you are beginning to wonder whether those hopes are delusional fantasies.

As many of you settle into life in one of Bowdoin's clubs, teams, hallway units, groups, or academic departments, some of you may be frustrated with the lack of intellectual engagement here. Many of you will conform and nestle yourself into a social unit that is hostile to literary allusion, thought experiments, and public displays of erudition (PDE), but for a few of you, there will be a tacit and lingering, yet silent, rebellion against what you see as a sterile intellectual culture incapable of giving birth to anything that could even come close to resembling our inherited standards of genius.

In that rebellion, you would be partially right and partially wrong. You are right to detect a certain flaccidity and flatness—a lack of controversy, philosophic courage, and political engagement at Bowdoin that is odd for a culture that has previously been at the forefront of American poetry, anti-war protests, and the civil rights cultural and philosophical transformations.

But you are wrong when you then go and say that Bowdoin is not an intellectual place and start engaging in conservative diatribes about the dark phantoms of "political correctness" or liberal diatribes about your speech being suppressed by the wicked forces of capitalism.

We do have an intellectual culture here but it can only maintain itself if you guys bring forth your original ideals and commit yourself to engaging our school in the kind of debate that can bridge the widening divide between our academic and social lives. Many of the upperclassmen have already settled into their ways; the rejuvenation of our intellectual culture is in your hands, and here are a few suggestions:

here are a few suggestions:

1. Submit something. Q, Curia, the Quill and the Orient are all great publications at the College staffed by thoughtful people who are hungry to fill their pages with your nuanced cultural criticism or poetry.

Engage in the quarrel between religion and secularism. The titanic controversy between those who think we'd be better off without reMany of you will conform and nestle yourself into a social unit that is hostile to literary alluision, thought experiments, and public displays of erudition (PDE), but for a few of you, there will be a tacit and lingering, yet silent, rebellion against what you see as a sterile intellectual culture incapable of giving birth to anything that could even come close to resembling our inherited standards of genius.

ligion and those who think we absolutely need to keep it has only begun to surface. To the Catholic Student Union, the Christian Fellowship, Muslim students, and Hillel—are you really going to let the school get away with building a "enter for the common good" in the church? Can a "religion of the common good" really replace your religions? Secularists—are you really going to let the rise of evangelical Protestantism on both the left and right in American politics go unnoticed?

Consider the question of unrivaled neoliberalism. Now that neoliberalism is sanctioned by one of the most charismatic political leaders in world history, does that make dissenters a wicked and false resistance to the True and Final Philosophy? The only way to resist this neoliberal homogeneity is for communitarians, libertarians, leftists, anarchists, religionists, radical feminists, and conservatives to come out from their hiding and start bringing their arguments to the public. Genuine leftists-what do you think about America's foreign policy from 1967-2008? Conservatives—with the possibility of a 'new new deal' in mind, do you still believe that socialism and freedom are incompatible? Is anyone willing to verbally fight to make Bowdoin students take these political alternatives seriously, even if it makes him a pariah?

4. Follow the great debate about sexual liberation. It is up to our generation to decide whether there are any sexual mores we would like to transmit to future Americans. While responsible traditionalists could make the case that we are the most sexually decadent culture in world history, and that this poses a threat to western civilization, the social justice enthusiasts think the liberationist project still has miles to go as they rethink gender, fight repression, and re-envision queerness for the 21st century. As the country is at cultural war over these issues we can learn something from both

5. Make use of office hours and attend lectures. Some of you might be scared, but if you talk to your professors, you will be astonished—it is seriously as if there is a whole

cabal of humans here who somehow find gratification in promoting our intellectual development. If you haven't noticed, most of our professors probably do not pray, but if they did, they would pray for a more vibrant intellectual culture here; and they can give you ideas about how to make that happen. As for the public lectures, they are like our adhoc coffee houses. After the speaker finishes, don't leave! This is a good place for people interested in genuine conversation and the shared experience of a speaker gives you some common ground to work with.

With questions about the nation-state, religion, financial crisis, Middle East, recent scientific discoveries, rise of China, suffering in Africa, technological revolutions, European unity, sexuality, and the merits of postmodernism vibrating in the minds of intellectuals and academics all over the world, we must resist the "post-intellectual" urge inside telling us that there is nothing calling forth the kind of scholastic brilliance and intellectual rigor that animated the 20th century.

Class of 2012, I dare you to make Bowdoin conform to your ideals of a good liberal arts culture, rather than conforming yourself to a less-than-ideal intellectual culture that does not satisfy the longings that originally brought you miles away from home to this commune of inquiry in Bumblebee, Maine.

Ross Jacobs is a member of the Class of 2010.

WEEKLY CALENDAR

FEBRUARY 6-FEBRUARY 12

PAWAT SERITRAKUL FOR THE BOWDOIN ORIEN

BEARING THE COLD: Carved during the Frozen Ivies Sculpture Competition, this polar bear relishes the cold as it stares north across the Quad.

FRIDAY

COMMON HOUR

Rahaf Harfoush

Harfoush, a social media strategist who helped to design President Obama's media operations, will deliver the Common Hour lecture.

Kresge Auditorium, Visual Arts Center. 12:30 p.m.

RALLY

Gathering Against Hate

In response to the recent vandalism of a Portland synagogue, Bowdoin Hillel will conduct a few short readings and offer an opportunity for participants to share their own reflections.

30 College Street. 5 p.m.

FILM

"Man on Wire"

The Bowdoin Film Society presents this Academy Awardnominated 2008 film about stuntman Philippe Petit's daring 1974 high-wire walk between the World Trade Center's Twin Towers. The film contains footage of Petit's walk, as well as reenactments of the event by stuntman Paul McGill.

Smith Auditorium, Sills Hall. 7:30 p.m.

PERFORMANCE

500 Clown Frankenstein

Utilizing improvisation and action-based performance, this play follows the exploits of three clowns as they attempt to recreate Dr. Frankenstein's laboratory. Pickard Theater, Memorial Hall. 8 p.m.

SATURDAY

FILM

"Man on Wire" Smith Auditorium, Sills Hall. 7:30 p.m.

SUNDAY

RELIGIOUS SERVICES

Catholic Mass

St. John the Baptist Church. 8 and 11 a.m.

Unitarian Universalist Service

Unitarian Universalist Church of Brunswick. 10 a.m.

Congregational Service

First Parish Congregational Church. 10 a.m.

MONDAY

PRESENTATION

Students Abroad

In connection with Bowdoin's celebration of Longfellow Days, students who have recently studied abroad will share their experiences.

Daggett Lounge, Thorne Hall. 7 p.m.

TUESDAY

LECTUR

"Covering War and Conflict as a Foreign Correspondent"

Chris Hedges, a foreign correspondent for the New York Times, will discuss his experiences as he delivers the 2009 Thomas Cassidy lecture.

Kresge Auditorium, Visual Arts Center. 7 p.m.

PRESENTATION

"On Being a Black Republican"

Actor and radio commentator Joseph C. Phillips will discuss his identity as being a conservative African-American.

Room 151, Druckenmiller Hall. 7 p.m.

WEDNESDAY

JOB FAIR

Maine-Based Employers Day

Maine companies will have tables set up throughout the Union. They will present students with current job openings, summer internships, and employment opportunities during the school year.

Morrell Lounge, Smith Union. 2 – 5 p.m.

THURSDAY

LECTUR

U.S. Trade: In Longfellow's Time and Now

Based on Longfellow's debates on international trade policy as a Bowdoin student, Associate Professor of Economics Stephen Meardon will discuss similarities and differences between United States trade policy in the 1820s and today. Daggett Lounge, Thorne Hall. 4 p.m.

GALLERY TALK

"Telling Tales: Stories About Chinese Painting at Bowdoin College"

Assistant Professor of Art History and Asian Studies De-nin Lee will deliver a lecture in connection with the Museum of Art's exhibition "Ink Tales."

Focus Gallery, Museum of Art. 4 p.m.

FCTURE

"Beyond Gender Troubles: Representations of Indian American Masculinity in Jhumpa Lahiri's Short Fiction"

Bates College Professor of English Lavina Shankar, an expert in South Asian American literature and culture, will discuss Lahin's short works.

Beam Classroom, Visual Arts Center. 4:30 p.m.

PLAY READING

"Resistance"

As a celebration of Black History Month, the Department of Theater and Dance presents the reading of this Richard C. Goodman play, which details the events that led Congress to overturn the Fugitive Slave Act.

Main Lounge, Moulton Union. 7 p.m.

ROMANCE

Speed Dating with ASB Peru

Alternative Spring Break groups travelling to Peru and Louisiana will facilitate this fast-paced round-robin dating session. Tickets are \$5 when purchased in Smith Union or \$7 at the door.

Daggett Lounge, Thorne Hall. 8:30 p.m.

LECTURE

"A World of Change: Climate Yesterday, Today, and Tomorrow"

Susan Solomon, a National Medal of Science laureate, will speak about scientific and political Issues in the global climate change discussion for the 2009 Kibbe Science Lecture.

Kresge Auditorium, Visual Arts Center. 8 p.m.

Trustees meeting focuses on finances

BY ANYA COHEN

The College is looking forward following the Board of Trustees' approval of President Barry Mills' much-publicized financial recommendations.

The Trustees met last Friday and Saturday on campus to review the College's finances, discuss the budget for the 2009-2010 fiscal year, review recommendations for tenured professors and commencement honors, and attend to other business.

In his e-mail to the College on Monday, Mills announced that last Friday the Board "enthusiastically endorsed the recommendations of the 'Blue Tarp Committee' aimed at helping Bowdoin reach financial equilibrium."

The Blue Tarp Committee proposed, as outlined in Mills' January 22 memo to the Bowdoin community, to increase the student body by 50 over the next five years, freeze faculty and most staff salaries for two years, hold operating costs flat, and defer maintenance and capital projects that have not already begun.

Mills wrote on Monday that the committee's measures "should allow us to preserve the outstanding quality of our academic program, avoid

ECONOMY

Bowdoin's peers pursue fix in economic decline

BY WILL JACOB

With the global economic crisis worsening by the week, Bowdoin and its peer schools have worked on plans to secure their financial futures. Bowdoin has created a financial planning model and recently approved cost-cutting measures to balance the budget, while peer schools have made other plans to suit their needs.

In his memo to the College community in late January, President Barry Mills acknowledged that Bowdoin, like "all other colleges and universities," has tough decisions to make. However, he added, "We are better positioned relatively than most colleges and universities to respond to these changing times."

"If you look at the private [colleges], because we are not heavily burdened by debt, because our endowment per student...is still pretty strong, because our student faculty ratio is 9:1 and not 7:1, and because we've managed our expenses fairly prudently over the last number of years, we sit in a position relatively favorably to many other places," he said in an interview on Thursday with the Orient.

In comparison with other college endowments, Bowdoin's has fared relatively well, losing approximately 20 percent since June 30, 2008 when the endowment was \$831.5 million. Williams, Amherst, Colby, Bates, Middlebury, Trinity, Wesleyan, and Colgate are all estimating endowment reductions in the range of 20 to 30 percent.

Bowdoin's financial plan includes a two-year salary freeze for faculty and staff earning more than \$40,000, an increase in student enrollment by 50 students over five years, and holding operating costs flat.

Though there are similarities in cost-cutting goals and financial aid commitments, some peer schools have taken different routes. Middle-bury plans to cut 10 percent of its staff and close a dining hall, and Dartmouth will lay off 60 staff members. Amherst is making 10 to 15 percent dining service budget cuts, Wesleyan will take an extra 120 students, and most schools are delaying maintenance and construction.

Managing enrollment, faculty compensation

Of Bowdoin's financial recommendations, Mills said the one that "troubles me the most" is that of increasing the student body by 50 students over five years, as he has advocated against doing so in past years. Though Mills said he hopes that the economy will improve to make this condition unnecessary, Bowdoin is not alone in its desirious.

In a November 25 update, Wesley-

Cross-campus celebrations mark Black History Month

BY ALEX PORTER

Honoring a tradition now more than 80 years old, students and staff at Bowdoin have planned several events to celebrate Black History Month.

According to the Web site of the Association for the Study of African-American Life and History, Black History Month began as a single week of recognition in February 1926. Since then, the African-American community has made significant progress in attaining civil rights and, with the recent election of President Obama, major political representation.

Associate Dean of Multicultural Student Programs Wil Smith '00 states that Black History Month "raises, as it is expected to, the consciousness of the contributions that blacks have made to our history in America." Smith is quick to stress, though, that "I don't think it should be any more important than Hispanic or Native American History Months."

"Af-Am is leading the Black His-

tory Month celebration as they normally do, and I support them and all of their events." Smith said.

Jessica Walker '09, President of Bowdoin's African-American Society, agrees. She said she appreciates that Black History Month "brings more visibility to our group," and she said that she thinks that the celebration is much like that of Native American History Month.

With Walker at the helm, the African-American Society has organized meals, performances, and lectures that demonstrate and discuss certain elements of black culture and history. The first of those, a lecture by the Society's first president, Robert Johnson, occurred on February 2. Johnson now serves as a professor and Chair of UMass-Boston's Africana studies department.

Several more events are scheduled during the next two weeks. According to Walker, these include a dance performance, a soul food dinner to further the understanding of Kwan-

Data shows dining hall traffic peaks at 1 p.m.

BY TOPH TUCKER

The dining hall traffic charts that appeared in Moulton Union two weeks ago offer many students a glimpse at a side of the Dining Service they might not normally see

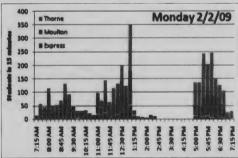

yitice they might not normally see.

The eight charts, which Dining Services Business Manager Steve Cole called "eye-opening," are the beginning of a wider effort by the Dining Service to understand dining traffic patterns, and to inform curious—or aggravated—students accordingly.

Joe Berte '09 thinks that "something needs to be done" about the length of lines. "This year it's been especially worse," he said.

Every card swipe is recorded by the school's CS Gold campus ID card system. The Dining Service can then see, in real-time or years after the fact, how many students entered which dining hall in 15-minute intervals.

For instance, on Monday, February 2, from 1:00 to 1:15 p.m., 51 students got express lunches, 125 students swiped into lunch at Moulton, and 174 swiped into lunch at Thorne. During the next 15-minute block, 14 students got express lunches, 15

TOPH TUCKER, THE BOWDOIN ORIEN

HOT LUNCH: On Monday, more students swiped in for lunch at Thorne and Moultan at 1 p.m. than during any other 15-minute interval.

entered Moulton, and a mere two entered Thorne.

Such dramatic fluctuations are a fact of life for the dining staff. The kitchen staffs have the ability to see whether the bulk of students have already come, have yet to come, or are perhaps choosing the other dining hall

Jessica Ziehler '11 proposed coordinating menus between dining halls to balance the load. Nate Fritts '12 agreed, blaming much of the imbalance on situations when "there's one blatantly better menu at one dining hall than at the other"

However, Moulton Union Head Chef David Crooker explained that the Dining Service already holds weekly menu meetings to address concerns like Fritts.

DECLINECONTINUED FROM PAGE 1

an's president announced to increase its 2,800 undergraduate enrollment by 30 students annually over four years, generating \$3.9 million in revenue. Amherst's president announced its plans in a February 3 letter to add 100 additional students over four years to its 1,700-student population.

As for faculty, Mills wrote in his memo that he was "very concerned about avoiding layoffs wherever possible," preferring to "keep people working at their jobs and retain programs in lieu of salary increases." The decision to freeze most staff and all faculty salaries is in line with other peer schools, although the decision not to freeze faculty hiring, and continue its allocated searches for faculty, stands out.

Williams President Morton Schapiro has also announced the college will not increase faculty or staff salaries this year. Further, it will postpone the filling of open staff and faculty positions, by deferring six of 14 tenuretrack positions and stopping its search for 11 visiting faculty positions.

Colgate President Rebecca Chop announced a temporary freeze of all non-faculty position hiring and scrutiny of any faculty openings. President Tony Marx of Amherst plans to freeze salaries and reduce the number of visiting faculty, but to maintain the search for faculty to fill some spots.

With more aggressive action, Middlebury President Ronald Liebowitz has announced his college's goal to reduce staff by at least 10 percent through attrition by 2011, resulting in at least 100 cuts, while also promoting a voluntary early retirement program. Bates also plans to further reduce

Bates also plans to further reduce faculty and staff, but has already cut 19 positions through attrition since the 2003 fiscal year. With an endowment about one-third the size of Bowdoin's in June 2008, a 10:1 student-faculty ratio, and "fewer resources for faculty support," Bates President Elaine Tuttle Hansen wrote that the school cannot cut much more without affecting students, in a February 4 announcement.

Despite the financial crisis, Bates recognized its needs to plan ongoing renovation work for the 2010 fiscal year. While other colleges might suspend "non-essential construction work," Hansen wrote that most of Bates' projects are "essential and, in most cases, overdue." The college may construct dining, residential, science, and athletic facilities now "while costs are lower," seeking funding through long-term objectives like fundraising, increased enrollment, or lower energy consumption.

Funding financial aid, facilities

Mills outlined a key objective in his memo was to "continue to provide sufficient resources, including our new no-loan policy, to students who require financial aid." All peer schools surveyed planned to maintain most financial aid commitments in their budgets.

In a December 16, 2008 letter, Colby President William D. Adams announced he plans to "fully fund" their no-loan financial aid program for 2009-10, but cannot predict the program's sustainability for future budgets. Middlebury's president announced on January 29 that it would cut 10 percent of its financial aid reserved for international students. The Amherst Student newspaper reports that the Association of Amherst Students plans to donate \$100,000 to the college, a portion of which will go to financial aid as a symbolic gesture of the students concern.

Having recently completed major building projects on campus, funded through the Bowdoin Campaign, Mills wrote that we need to "maintain these buildings and our infrastructure," as it "would be irresponsible" to neglect routine, planned maintenance. Any new major capital projects, however, will be put on hold.

Taking similar action, Williams announced it will postpone construction of a new library and field renovations, Wesleyan will reduce capital projects, and both will cut planned spending on building renewal and maintenance. Amherst's president wrote that major capital projects will be reviewed in their planning stages and possibly delayed, though additional tax-exempt debt may fund pressing projects. Colby's president announced plans

Colby's president announced plans to postpone "major new capital projects and some strategic initiatives indefinitely," to focus on "the fundamental missions of the college: teaching and learning."

Balancing the budget, cutting costs

Bowdoin plans to draw the same 12-quarter lagging average from its endowment, about 5 percent, while other schools, such as Williams and Amherst, plan on drawing at a greater rate in the short-run. Though Bowdoin has yet to announce its tuition fees for next year. Senior Vice President for Finance and Administration Katy Longley told the Orient in October that tuition will rise between 4 and 5 percent. Similarly, some peers, including Wesleyan and Dartmouth, are estimating an increase of around 5 percent.

As for College fundraising, Bill Torrey wrote in an e-mail to the Orient that, with some rough comparisons with NESCAC schools, "it's fair to say that nearly everyone is down in Annual Giving in amounts ranging from -3 to -26 percent from a year ago at this time."

Therefore, without much-increased revenues from more significant endowment draws or tuition hikes, schools are looking to reduce their operating costs. Bowdoin plans on holding its operating expenses flat, which are currently around \$125 million, but other schools are making more aggressive budget cuts.

Williams plans to cut its operating budget next year by \$10 million to \$207 million, partially by asking budget managers to cut 12 to 15 percent out of non-personnel spending next year, and an additional 6 percent the following year. Amherst plans to cut its budget next year by 10 percent, and Colby will trim \$700,000 from its expenses.

In more extreme cases of budget cutting, some schools have sought to eliminate programs or certain student luxuries.

Amherst is targeting its dining services budget, cutting 5 percent this semester and 10 to 15 percent next year. The Amherst Student newspaper reported that the dining hall has reduced the frequency of certain items (no longer offering cereal and juice at dinner, for example), cut portion sizes, and eliminated some foods entirely. They've removed the disposable to-go cups, leading some students to steal the coffee mugs.

Middlebury announced it will cut its MiddView orientation program, including its outdoor excursions similar to Bowdoin's Pre-O trips, and will close one dining hall in January 2010. Similarly, Williams is planning to eliminate its Williams in New York Program.

"There are a number of ways to approach these problems," Mills said.
"My goal with the committee was to find solutions that represent this concept of shared sacrifice, but at the same time don't go to the heart of

Professor meets Ahmadinejad at awards event

BY MARY HELEN MILLER

On Friday evening, Associate Professor of Religon Robert Morrsion shook hands with one of the most controversial figures in the world—Mahmoud Ahmadinejad, the president of Iran. The two met briefly during a ceremony in Tehran that recognized winners of Iran's International Book of the Year Awards.

Morrison, who was one of several winners in his field of Islamic Studies, was recognized for his book "Islam and Science: The Intellectual Career of Nizam al-Din al-Nisaburi."

Morrison said that during the ceremony "you get to chat, but its chit-chat," with the officials who give the awards.

"I was saying things like 'I am so thankful, your generosity is something I will never forget," Morrison said.

The award, which was given by the Iranian government and the ministry of culture, entitled Morrison to a complimentary trip to Tehran for the ceremonies. Morrison stayed in Tehran from February 4 to 10.

ary 4 to 10.

"It was exhausting, it's a lot of grip and grin. I enjoyed having a free day in Tehran on Monday," Morrison said.

In the United States and internationally, statements Ahmadinejad has made have been highly contested. In addition to his stance on Iran's nuclear weapons program, alleged comments he has made supporting of Israel's annihilation and calling the Holocaust a "myth," have made him disliked.

"He's made some controversial statements, for example about Israel and the Holocaust," Morrison "Given all the political tensions, I think there was a genuine atmosphere of exchange and appreciation."

ROBERT MORRISON
ASSOCIATE PROFESSOR OF RELIGION

said. "They're controversial in areas that don't pertain to my field." "Given all the political tensions,

"Given all the political tensions, I think there was a genuine atmosphere of exchange and appreciation." Morrison said.

Morrison said that he thought the other books that won awards in his field of Islamic studies "really are good books."

"They do take Islam rather seriously there," Morrison said of Iranians.

"I thought they were very hospitable," Morrison said. "It was a tremendous honor."

TRAFFIC CONTINUED FROM PAGE 1

With the menus controlled, the sports and events schedules in mind, and the staff's awareness of consistent historical trends, the biggest wrench in traffic forecasting is the weather. Cold, rain, or snow can make students less willing to go to the farther dining hall, or can make everyone wait for the storm to abate, leading to a logjam when the skies clear.

Director of Dining and Bookstore Services Mary Lou Kennedy theorized that sunset, too, might have an impact on when students feel the urge to eat dinner

Lunch, though, is the most harried meal, and the most subject to class schedules. Many students have expressed frustration with how crowded it can get; the Moulton traffic charts appeared next to a comment card that read, "Get more F***ING TABLES, a**holes," followed as if as an afterthought by a bold "PLEASE."

In fact, Moulton's "dark room" was

recently reconfigured to feature three rows of tables instead of the usual two. Said Ziehler, "I hate the new ar-

Said Ziehler, "I hate the new arrangement. I guess it's better because it provides more seating, but the space in between the tables is not enough and it's really awkward."

Fritts noted, though, that "you get a little closer environment, and you probably get to see more people when you're eating."

Understanding the peaks and valleys could potentially let students choose a more comfortable time to eat, if their schedules allow it. Cole emphasized, however, that students' freedom of choice is of paramount importance; he does not wish to dictate when or where students should eat.

"I have class until 1 o'clock," said Berte, "and then around 1 o'clock I try to come to Moulton or Thorne and the lines are absolutely out-the-door full. People can't get in the door or out of the door, which is very annoying."

Evan Graff '11 enjoys more flexibility in his schedule. "Once you get a feel for when things are pretty busy you can just avoid those times and then you don't really have any trouble. Personally, it hasn't been too much of an issue."

Moulton Union can seat around 300 people. Thorne seats around 550, plus another 80 in private rooms. Combined, the two dining halls serve between 1,300 and 1,400 students nightly.

The staff served a total of about 680,000 meals last year. With more students on the 19-meal plan this year than last, the Dining Service is serving even more—10,859 more, in fact, when comparing the fall 2008 semester to fall 2007.

Cole explained that the key unknown factor in determining how crowded a location is at any given point is how long students stay. Kennedy suggested that, anecdotally, it seems like students are staying longer.

Jeremy Kraushar '09 proposed a radical solution to overcrowding.

"Add about 500 more students to the student population and have a third dining hall," he said. "More spread out, more options, and you wouldn't have any line problems... another Thorne Hall," Kraushar said.

TRUSTEES CONTINUED FROM PAGE 1

Senior Vice President for Planning and Development and Secretary of the College Bill Torrey said that there were no disagreements with Mills' proposal and that the weekend on the whole lacked controversy.

whole lacked controversy.

"The general mood of the Trustees was good considering the financial challenges in front of us," Torrey said.
"They were confident that the College has provided the necessary leadership to reach a financial equilibrium."

In addition to two plenary sessions on Friday and Saturday, eight committees met throughout the weekend, each of which was engaged in different versions of Mills' memo, according to Torrey.

The College announced to the trustees a \$10-million donation from nuclear-physicist Dr. Peter Buck '52, perhaps best known as the co-founder of Subway. According to Torrey, Buck's commitment will most likely be used to fund the remaining expenses associated with the Fitness, Health and Wellness Center that is currently under construction.

Torrey said that the College will receive additional gifts over the next two to three years totaling roughly \$17 million, most of which will go into the endowment.

Buck's contribution helped the Bowdoin Campaign, the five-year fundraising campaign that concludes on June 30 of this year, surpass its goal of \$250 million, bringing it to a current level to \$253 million, according to Torrey.

"The Trustees were extremely excited," said Torrey. "They have worked hard to do this. Many of them have made substantial gifts themselves and have spent time asking others to make gifts."

He emphasized, however, that the

campaign is not over and fundraising efforts will continue through the fiscal year.

The Board of Trustees will not vote on the 2009-2010 budget until May.

While finances dominated the weekend's discussions, Torrey said that "everyone agrees they'd like to talk about something other than money."

The Board approved the names presented by Dean for Academic Affairs Cristle Collins Judd and the Academic Affairs committee to award tenure to six professors (see related story, right).

The Trustees also agreed on five honorary degree recipients for the 204th Commencement exercises on May 23, as recommended by the Subcommittee on Honors.

Committee on ronors.

In an e-mail to the College on Wednesday, Mills announced that honorary degrees will be awarded to playwright Edward Albee, artist Stephen W. Hannock '74, leading breast cancer researcher Olufummilaya Olopade, Human Rights Watch Executive Director Kenneth Roth, and environmental activist and 2007 Nobel Peace Prize nominee Sheila Watt-Cloutter. Mills wrote that these "exceptionally talented" honorands will lead events during Commencement Weekend.

In an e-mail to the Orient, Dean Judd said it was announced this weekend that Bowdoin will extend its course offerings next year to include second-year Arabic, in addition to first-year Arabic, which was introduced this year.

"We will offer two years of Arabic instruction as a three-year pilot program," wrote Judd. "I am delighted that we have been able to introduce the language at Bowdoin and that we can now offer the second year."

Interim Dean of Admissions Scott Meiklejohn presented the Board with a report on admissions applications, but Torrey said that the status of financial aid will not be certain until the Class

Trustees approve six faculty for tenure

BY MARY HELEN MILLER ORIENT STAFF

While the Board of Trustees spent much of its meeting last weekend discussing ways to cut cost at the College, some time was dedicated to take care of usual business. As is typical for its February meeting, the Board reviewed faculty members who had been recommended for tenure.

All six faculty members who were recommended for tenure were approved. According to Dean for Academic Affairs Cristle Collins Judd, a seventh tenure review is still in process.

The faculty members who were granted tenure include Chuck Dorn, David Gordon, Aaron Kitch, Elizabeth Pritchard, Laura Toma, and Vin Shende. All six are current employees of the College.

"Our tenure standards are based on excellence in teaching and professional distinction in research or artistic production," Judd wrote in an e-mail to the Orient. "I am delighted to say that the group of faculty whom the Trustees approved for tenure fully embody those standards."

Dorn, a professor in the education department, is an education historian whose research focuses mainly on the civic functions of early childhood education, public elementary and secondary schools, and colleges and universities in America.

Gordon is a member of the history department. He was born and educated in South Africa, and his work is concerned with Africa and the environment. He is on leave this academic year and is working on a book that examines how religion and politics intersected in

HERE TO STAY: Top: Charles Dorn, Education; David Gordon, History; Aaron Kitch, English. Bottom: Elizabeth Pritchard, Religion; Vin Shende, Music; Laura Toma, Computer Science.

Zambia in the 19th and 20th centuries.

As a professor of religion, Pritchard teaches courses on religious thought in the modern West. Two of her published works are titled "Ferninist Theology and the Politics of Failure" and "The Way Out West: Development and the Rhetoric of Mobility in Postmodern Ferninist Theory."

Computer science professor Toma is currently teaching courses on data structures and geographic information systems (GIS) algorithms and data structures. According to her faculty Web site, much of Toma's work addresses scalability issues in GIS.

Kitch, a member of the English department, teaches courses in Renaissance literature, among other subjects. His research interests include economics and literature, early modern drama, gente in relation to social and political history, and the history of printing.

Shende is a professor in the music department. According to his faculty Web site, he is interested in composition, electronic music, music theory, rock music, and the influence of nonWestern music and culture on Western concert music.

While all of the professors approved for tenure have achieved some level of acclaim within their fields, Shende and Kitch are also regarded as campus celebrities. Both are members of "Racer X," an '80s cover band that is wildly popular among Bowdoin students. Shende sings lead vocals while Kitch plays the keyboard for the band.

The Board of Trustees approval for tenure is based on recommendations from the president, the dean for academic affairs, the Committee on Appointments, Promotion, and Tenure, and each candidates academic department. These entities review each candidate's scholarly or artistic work, course material, and student opinion forms and letters of recommendation.

According to Judd, the six faculty members recently granted tenure "are gifted teachers, deeply committed to their students and to Bowdoin."

"At the same time, they are scholars and artists whose work is recognized nationally and internationally," she added.

BSG talks over co-ed housing, sustainability

BY NICK DANIELS ORIENT STAFF

At an unusually long meeting Wednesday night, Bowdoin Student Government (BSG) wrangled over the issues of co-ed housing, sustainability at the College, and a new reincarnation of

the Health Center survey.

Conversation over the prospect of co-ed housing commenced with a brief analysis of peer schools' policies on the issue. BSG representatives addressed the systems in place at institutions including Colby, Middlebury, Pomona, Carleton, Harvard, and Stanford.

BSG President Sophia Seifert '09 recognized that there appeared to be no consensus among the schools looked at.

"We have a variety of programs here," she said. "To gage opinion from the body, I would like to ask where we should go with this, as we would like to make a specific policy-oriented recommendation."

One question immediately raised was whether first years should have the option to choose co-ed housing.

Class of 2011 Representative Justin Foster suggested that perhaps locks could be placed on individual doors within quads and triples. "How expensive would it be to add a lock system... so that first-year students could live in co-ed quads?" he asked.

At-Large Representative Rasha' Harvey '12 said that placing locks within first-year quads would be unnecessary and would undermine the College's Social Code.

"In my opinion," he said, "it adds stigma if you have to have locks on doors"

IHC Vice President Dan Hetherman '09 argued that allowing first years of different genders to share rooms would put an unnecessary strain on the Office of Residential Life and the housing

"They are cramped for space as it is," he said. "I think it is going a little bit too far, and will create lots of hassle for ResLife with lots of roommate switching."

Class of 2012 Representative Branden Asemah said that in the interest of fairness and equal opportunity, any changes to the housing policy should apply to all students.

"I can see how we might want to have a different policy for first years, given the [hassle it could cause] ResLife," he said. "SBut I don't think it should be different for first years." Seifert said that those who "have a

Seifert said that those who "have a strong opinion, about the mechanisms, how it should work and what the policy should be," should contact either her or Vice President for Facilities Mike Dooley '10.

"Personally, I am happy to see that there is so much support for this measure," she said.

After concluding the housing debate, the body commenced a discussion regarding sustainability at Bowdoin.

The discussion was prompted by Vice President for Academic Affairs Sam Dinning '09, who requested that BSG representatives brainstorm topics for Friday's Campus Conversation.

At-Large Representative Mary Connolly '11 said that one problem with the College's sustainability program was a lack of awareness.

"I don't think a lot of Bowdoin students know we have signed a pledge to become carbon neutral," she said. "I think we have made huge strides, but the next step is going to take a lot of student sacrifice."

At-Large Representative Kristen Gunther '09 asserted that some students aren't clear on what sustainability means at Bowdoin.

"A good thing to start out" asking, she said, "would be: 'how do you define sustainability for an individual and for an institution?"

Connolly said that students need to become better informed on the subject, since "during your college career, you are going to be using a lot of resources."

The newest version of the Health Center survey, a project that has been in development since last semester, was presented by Vice President for Student Affairs Carly Berman 11.

Seifert told the body, "We thought this would be a great time to show it to you and get a second round of feedback."

Most of the feedback turned out to be quite critical. Class of 2011 Representative Greg Tabak was among several BSG members who repeatedly criticized the survey for not including an explicit question about the reputation of the Health Center.

"I think we need to ask a couple questions about reputation," he said. "We should ask questions like, 'Do you think that the Health Center has a good reputation?' That way the administration can know if there is a problem with its reputation."

Seifert said a similar question had been removed in a previous version of the survey.

"This survey has been through the Dean's Office and through the Institutional Research office, and they felt that such a question would be a leading question, meaning that it would bias student responses," she said. "If there are problems, the Dean's Office is relying on the comments section for those problems to come out."

BSG also briefly met in executive session to evaluate the names of this year's Judicial Board applicants.

MARGOT D. MILLER, THE BOWDOIN ORIENT

SHAPING UP: The College announced a \$10 million donation from Dr. Peter Buck '52 during the Trustees meeting last weekend. The money will likely be used to cover remaining expenses of the Fitness. Heath and Wellness Center.

HISTORY CONTINUED FROM PAGE 1

zaa, the 21st annual Ebony Ball (a semiformal dance held in Moulton Union), and a lecture by Psyche Williams-Forson, a University of Maryland Assistant Professor of American Studies. Walker believes that these events provide "a great way for the student body to take part in our culture."

Smith says that although the African-American Society is a studentrun organization, "if [one of their proposals] requires funding, I might support them." Members of the Society believe that their events get the

attention that they deserve.

Walker feels that "we've always had a lot of support from the school, the SAFC, Wil Smith, and the student body," but also adds that "the College's support outside of the 28 days in February is really more important to us."

Outside of Black History Month, she encourages students to come to Society meetings, which are held every Sunday at 4 p.m., participate in events, or just make use of the Russworm African-American Center, which serves as the headquarters both of the Society and of the Africana studies department.

Doors open at 9

SECURITY REPORT: 2/5 to 2/12

Thursday, February 5

- An officer responded to a complaint of noise on the first floor of Howard Hall.
- A staff member reported a suspicious person in Coles Tower. An officer located the person, who was identified as a visitor to the campus.

Friday, February 6

- A student with stomach pains requested a transport from Winthrop Hall to Parkview Hospital.
- An ill student was transported from Howell House to Parkview Hospital.

Saturday, February 7

- There was a complaint of loud music coming from Brunswick Apartments U.
- The fire alarm in Brunswick Apartments U was activated when a student's chicken nuggets burned. A student used a fire extinguisher to put out a fire in the oven. Brunswick Fire responded.
- Two students interrupted an attempted theft of a bicycle at Harpswell Apartments. The suspect was described as a white male, late 20s, 5'9', light brown hair, scruffy beard and mustache, and wearing jeans, a red jacket and a black hood.
- A security vehicle received minor damage in a backing accident.
- A loud noise complaint was received on the third floor of Stowe Inn.
- A student with a low blood sugar level (complicated by alcohol consumption) was transported from Moore Hall to Parkview Hospital.

Sunday, February 8

• Two students were detained by

- the Brunswick Police on Park Row and given warnings for drinking in public and littering. The matter was turned over to Bowdoin Security.
- A Bowdoin alumna was warned for possessing hard alcohol in Thorne Dining Hall during Super Snacks.
- An officer checked on the well being of an intoxicated visitor who vomited in the men's room at Thorne.
- A loud music complaint was received from the 10th floor of Coles Tower.
- There was a complaint of noise coming from an apartment at Brunswick Apartments X.
- A student who slipped on ice and injured an arm while jogging on a town street was taken to Parkview Hospital.
- Brunswick Fire responded to a fire alarm in Brunswick Apartments
 C. A student had been boiling water on the stove; the water evaporated and burned the pot.
- A student in a Kanbar Hall laboratory was bitten on the finger by a lab rat. The student was transported to Parkview Hospital for treatment of a bleeding wound.
- A security officer spotted two students kidnapping a six-foot-tall knight-in-shining-armor near the corner of Bath Road and Federal Street. The knight, who had first been kidnapped from Ladd House some weeks ago, was released to Security unharmed and Ladd House was notified. The grateful knight is now an honorary member of Safety and Security.

Tuesday, February 10

A staff member reported his personal pickup truck stolen from the back lot of Rhodes Hall. It turned out that two students who checked out a College truck for recycling duty mistakenly took the man's truck.

Wednesday, February 11

- An alert student reported a suspicious man outside of Hawthorne-Longfellow Library. Security officers responded and identified a 19-year-old man and two male juveniles, two of whom had been inside the library. The men were questioned by Security and Brunswick Police and then asked to leave the campus.
- the campus.

 A student with an injured neck was transported to Parkview Hospital.
- Two female students reported that a man in a tan 2005 Suzuki took pictures of them while they were crossing College Street near the Russwurm Building.

Thursday, February 12

- A Chamberlain Hall student with stomach pains asked to be transported to Parkview Hospital.
- An ill student was transported to Mid Coast Hospital.
- A student reported a strange smell at Reed House. Security officers responded, reported smoke, and pulled the fire alarm. Brunswick Fire responded. The cause of the smoke was a furnace malfunction.
- An ill student was transported from Dudley Coe Health Center to Parkview Hospital.
- Parkview Hospital.

 -Compiled by the Department of Safety and Security.

Russwurm, Class of 1826, first African American at Bowdoin

In honor of Black History Month, the Orient looks back at the life of John Brown Russwurm

> BY NICK DAY **ORIENT STAFF**

In September of 1826, senior John Brown Russwurm's graduation from Bowdoin not only signaled a significant personal achievement

It was also a milestone for the College. Russwurm, who walked with

a graduating class of 33 students, was the first African American to-graduate from Bowdoin, and at that time, only the third African American to earn a college degree in the United States.

Russwurm spoke at Commencement, offering prophetic remarks to his classmates and their fami-lies. The topic was the Revolution in Haiti, although he prefaced his speech with broader strokes:

"It is the irresistible course of events that all men, who have been deprived of their liberty, shall recover this previous portion of their indefeasible inheritance," he declared some 35 years before the Civil War. "It is in vain to stem the current; degraded man will rise in his native majesty, and claim his rights. They may be withheld from him now, but the day will arrive, when they must be surrendered."

It was a series of unexpected twists and turns that brought Russwurm to Bowdoin. After all, Russwurm grew up in a community— and climate—vastly different from Brunswick: Jamaica. Born there in 1799. Russwurm was the son of a wealthy white slaveholder named John Russwurm, and an African-American concubine named Eliza Brown. When the two had a son, the elder Russwurm was so proud of the baby that he named the in-

fant after himself, while also giving him the middle name "Brown" after the child's mother.

In 1807, Russwurm and his fa ther moved to Quebec, although Eliza Brown staved behind in Iamaica. There, John Brown Russwurm took classes with a tutor, studying Greek, Latin, arithmetic, writing, and grammar.

After living in Quebec for five years, the two moved again, this time to Portland, Maine. Russwurm eventually enrolled in Hebron Academy—approximately an hour northwest of Brunswick—and graduated in 1819.

Instead of directly enrolling in college, however, Russwurm spent five years in Boston, where he taught at Primus Hall, one of the separate schools in Massachusetts established for African Americans.

In 1824, Russwurm traveled back up the Maine coast, and, at the seasoned age of 25, enrolled at Bowdoin as a junior (since his prior education had been sufficient enough for junior standing).

Russwurm lived off campus during his time at the College. He resided in town with a carpenter, despite College regulations at the time that required students to live in the dormitory. It is unclear exactly why he chose to do this, although his decision may have been shaped either by the age discrepancy between him nd his classmates (half of the students in his class were under the age of 16), or because he was uncomfortable as the only African-American student on camp

There is no record to suggest that Russwurm was discriminated against by students or faculty during his time at Bowdoin. And despite Russwurm's decision to live offcampus, he was actively involved with campus life; he was invited to join the Athenaean Society, which he accepted with "alacrity," according to his letter of acceptance. Na-

> JOHN BROWN RUSSWURM **CLASS OF 1826**

thaniel Hawthorne, Class of 1825. was also a member of this society. and the two became friends. Haw thorne wrote that Russwurm was "dignified, easy in his manner, [but] too sensitive because of his color to return visits."

After graduating from Bowdoin, Russwurm moved to New York, where he co-founded the first African-American newspaper in the United States. The Freedom Journal. However, the newspaper ran into financial difficulties, and after weighing his options, Russwurm decided to leave the paper and move to Liberia in 1829

Dr. Robert Johnson, Jr. '71, a professor of Africana studies at UMass-Boston who gave a talk at the College on John Brown Russwurm last week, said that this move by Russwurm was not that surprising, considering Russwurm's own views on the issues of race and oppression.

Russwurm had an Afro-centric perspective on its history and believed that "Africa was the beginning," Johnson said.

Russwurm believed that the Africans should go back home to Africa, and rebuild Africa and control Africa," Johnson added.

In Liberia, Russwurm became editor of the Liberia Herald and assumed a leadership post in the government. Russwurm lived in Africa for the remainder of his life, and in 1851, succumbed to a battle with rheumatic fever.

He was buried in Liberia, al-

PIONEER: John Brown Russwurm, Class of 1826, was the first African American to graduate from Bowdoin. He co-founded The Freedom Journal, the first African-American newspaper in the U.S.

though his Bowdoin roots remain at the College; the John Brown Russwurm House, located in the center of campus and formally dedicated in 1978, is the center of Africana studies at Bowdoin and houses more than 2000 volumes pertaining to the discipline. In addition, a scholarship named for Russwurm

was established in 1960

For Johnson, John Brown Russwurm's accomplishments at Bowdoin and beyond were significant.

"These were real achievements in the 19th century, because more than any other century, the 19th century was a century where race was really polarized in this country," he said.

Valentine's Day: Time to celebrate love in all of its 'wondrous iterations'

SUGGESTIVE

RY ALANNA REPOIZA COLUMNIST

When I was 11, I found the repeat button on my stereo system. Dave Matthews' "Before These Crowded Streets" was spinning around in the CD player and before long, track number eight, "Crush," was looping sweet sounds in and out of my ears for hours on end. There's a part in that song—"Let's go drive 'till morning comes, and watch the sunrise and fill our souls up"-that blew me away the first time I heard it. Those words were so real I could almost taste them. It was like Dave was talking to me, telling me what love was going to be like.

I listened to that song over and

over, but I never got tired of it. "Crush" was a secret world that I created for myself; no matter what was going on in my life, all I had to do was turn on that song and I had love. Things sneak up on me like that—certain music, movies, books, or art—and suddenly my

porizes, and I'm out of this world. It happened to me when I watched novie "Garden State." I swear I felt an electric pulse go through my body when Natalie Portman and Zach Braff kissed on a bulldozer in the rain. I had to immediately watch the movie again just to make sure I wasn't hallucinating.

And people—people. They can

make my senses go haywire and cause all the atoms in my body to explode into transcendental sublime. I remember my first kiss. It was on a playground at night the summer before my freshman year of high school. He and I were underneath this green slide shaped like a dragon. My face was coated in his saliva and I must have had a handful of wood chips in my shorts from crawling under the slide, but I was definitely swoon ing well into the following week. And then there was the first time I kissed a girl.—Boom! Fireworks! When she left, I sat at one of the picnic tables outside Coleman Hall for 45 minutes staring at the stars. You're not going to believe me, but the first time I kissed someone I rising while "Crush" was playing on her iTunes

The only relationship I've ever been in started on Valentine's Day. He left a rose and a card in my locker on the Friday before February break started. We dated for six months before he went off to col-lege. I felt like the two of us could be in a crowd of thousands and we'd be the only ones there. I have a friend who makes me feel that way too. Despite all we've been through over the past four years, there are times when we laugh at a frequency that only we can audibly detect, d times when we say more with a hug than we ever could with our

Valentine's Day is my mother's favorite holiday. When I asked her why, she said it's because Valentine's Day is the only day of the year set aside specifically to recognize love. All the things I've been talking about—songs and movies, kisses, love affairs, high school sweethearts, and best friends—are only a tiny fraction of the love I've experienced in my short 21 years on this planet. It would be imposmy soul has been electrified by the beauty that surrounds me every where I go. I suppose, when you get right down to it, I'm a total romantic. I love love. I hardly ever experience it the way I think I'm supposed to-you know, art history major meets economics major and then marriage and a white picket fence, etc. Not that there's anything wrong with that. I celebrate any connection that uplifts the spirit. I just worry, sometimes, that we don't take the time to recognize love in all of its wondrous iterations, and that there are people who feel frustrated, lonely, doomed, or disheart

So, if you were planning on celebrating "Singles Awareness Day" tomorrow, I would encourage you to broaden your horizons. Valentine's Day belongs to everyone, not just the people who are in re-lationships. Every human being has a tremendous capacity for love, and tomorrow is the day to celebrate that fact. If you can't think of anything other than a monogamous relationship to represent the way that love manifests itself in this world, you need to rewire your thinking. When you wake up tomorrow, open your heart. Your mind will follow

Professor investigates vasopressin's role in sex and agression

ORIENT STAFI

What do goldfish and 21-year-old male Bowdoin students have in common? They both exhibit sexual and aggressive behaviors, traits that make them ideal subjects for Professor of Psychology and Neuroscience Rick Thompson's research.

That sex and aggression are

"fundamental behaviors in pretty much every species" is fascinating to Thompson, who seeks to understand the relationship between those behaviors and what their role in the brain is. For Thompson, understanding the "complex and powerful" brain mechanisms that cause animals to act in certain ways is "the most interesting thing."

While Thompson's past studies have focused on the effect of a peptide called vasopressin on the ag gression response in humans, he is hoping to look at the effects of the chemical on pair bonding and affiliation in his upcoming study. Studies performed on prairie voles, animals that have one life-long mate, have shown that the voles release chemicals after sex that help to cement the pair's bond. In males, this chemical is vasopressin. In fact, a study that came out this fall showed a correlation between the presence of vasopressin and marital satisfaction in humans.

This is not a new drug we're testing," Thompson said. "We're just test-ing a new kind of effect it might have on social behavior in addition to sociological processes," like marital sat-

While Thompson's past studies have focused on the effect of a peptide called vasopressin on the aggression response in humans, he is hoping to look at the effects of the chemical on pair bonding and affiliation in his upcoming study.

isfaction. Thompson hopes to add to this research by studying whether or not vasopressin does the same thing to humans as it does to male prairie voles: help to facilitate bonding. He will do this by having some of the subjects inhale vasopressin and look at pictures of the opposite sex. In addition to monitoring physiological responses, Thompson will use an fMRI to look at which brain regions are activated when subjects are looking at the faces.

Thompson has already conducted research on aggression in humans and determined that "vasopressin affects responses related to aggression when males are presented with other male faces." Thompson was hesitant to give more information about his findings as Bowdoin students will be the subjects of his next study and he does not want previous knowledge of the experiments

to affect how his subjects respond.

At the moment, Thompson is awaiting the approval of his grant application, without which his re-search cannot proceed. The application process was more arduous than before, as Thompson is trying to

hospital and because his studies involve human subjects, the approval process by Bowdoin's Internal Review Board (IRB) has been complicated. According to the IRB, when people are involved in scientific research, the experiments must take place in Dudley Coe under super-vision of a doctor. Since Dr. Jeffrey Benson abruptly left the college in the winter of 2007, Thompson can no longer conduct his research on campus, and working at a local hospital has proven to be difficult.

"As soon as he was gone I gave up on this research for a while," he said. But encouragement from a colleague University convinced Emory Thompson to try again. According to Thompson, "It's now or never. If we don't make this work soon, other people are going to do it."

Students are not just subjects in Thompson's research, they are often assistants and occasionally co-authors of his papers. His first studies on vasopressin and behavior in humans were inspired by Shiva Jupta '01. Jupta wanted to do experiments with vasopressin on humans, and insisted when Thompson was hesitant. Jupta set up the experiments, figured out how to do the physi-ological recordings of the subjects, and is a co-author of the study, which came out in 2004. According to Thompson, Jupta "was huge in all of that.

In addition to working on be-havioral responses in humans, Thompson also conducts research using goldfish. Through the use of

derstand the effect of peptides on basic behaviors like "the tendency to approach or withdraw from an individual." Of course, he is also interested in sexual and appressive behavior in the fish. "It always comes back to sex and aggression, so it seems," he said.

The author of many scientific papers and a professor at the college for 10 years, Thompson was awarded tenure four years ago. He has found that the job security that comes with being a professor at

Bowdoin is both a blessing and a source of anxiety. The knowledge that he could have the same job for the rest of his working life has led Thompson to tell himself he could leave whenever he wanted to. He tries to "keep some sense of adventure" and seek out "diversity and al-ternative interests" while remaining at Bowdoin. Even while asking himself "gosh, is this what my whole life looks like from now on?" he admits that tenure is hard to turn down. "I'm glad I like what I do, because it would be hard to leave."

Bowdoin alumni premiere solo shows at New York City galleries

Bowdoin alumni Cassie Jones '01 and Wade Kavanaugh '01 are painting the Big Apple red this month, boasting solo art shows in New York City.

Since graduating from Bowdoin, Ka-vanaugh has flexed his artistic muscle in galleries on both the East and West coasts. In his individual work, Kavanaugh uses large scale industrial materi-als such as bricks, plywood, and metal to create room-sized sculptures that echo the work of Bowdoin Art Lecturer John Bisbee. Kavanaugh cites his time at Bowdoin as inspiration for later work.

"Bobo helped me become profe ally curious," Kavanaugh said. "All of the life skills and tools came later."

Curiosity is a key factor in much of Kavanaugh's work as a professional art-ist. His pieces take raw materials and humanize them. His most striking designs, however, are his collaborative projects with artist Stephen B. Nguyen. Entire rooms covered floor to ceiling with layers of parchment, two-story towers made from pressed pages, the illusion of a wave of paper are all examples of the large-scale art for which Kavanaugh has become known.

Tonight marks the opening of Kava-naugh's exhibit at the Cynthia Reeves Gallery, his first first solo show in New York City. The show includes a sheet-

GREEN THUMB: Cassie Jones '01 works on one of her newest pieces, "Rub of the Green," featured in her solo exhibit at RedFlagg Gallery in New York.

rock installation, which fellow Bowdoin alums helped to complete.

"I have about a week this time, sometimes more, and I do have people working with me," Kavanaugh said. "One of those people is Mike Long '04 who runs his own art preparation business." Using sheetrock as a medium is an ironic twist in Kavanaugh's indoor installation. "At the moment, I'm using a lot of sheetrock and two-by-fours which are typically used to make walls and rooms [define physical space] so my work plays within that idiom."

Jones, a fellow graduate of the Class of 2001, began racking up a number of shows in the Portland and Rockport area until she attended the Rhode Island School of Design for her Masters in Fine Arts in 2008. Now graduated, Jones is presenting her first solo show at the RedFlagg Gallery, a new gallery co-owned by Bowdoin professors Mark Wethli and John Bisbee.

Iones, who dabbles in almost every medium, works primarily with felt and foam. Jones' pieces incorporate wild patterns and vibrant colors that are exciting to look at and expertly hold the eye. Playing with space, dimension, and shape, Jones has a clear aesthetic. Jones has made a departure from the traditional paper medium in her recent work

"Constructed on panels, these pieces are covered with felt, which is cut, stapled, stuffed-like quilting, and then painted," Jones said. "There are still lots of surprises along the way and the pieces always diverge from my initial imagin-ings, but the process of realizing the piece is very different from the sponta-

neity of the works on paper."

Her show at the RedFlagg Gallery, which opened last night, features pieces from both 2008 and 2009. The show was a chance to work with low-relief and experiment with new media, according to

When John Bisbee generously offered to give me the inaugural exhibit at RedFlagg, I knew I wanted the works on paper to be in dialogue with the larger, low-relief paintings," she said. "Because while they are disparate bodies of work in some ways, they both begin with intuitive responses to my materials and hopefully arrive at a place where the contradictions in the work are posed like questions, not to be resolved, but to be explored."

Jones also cites Bowdoin as the main source of inspiration for her current career.

'I didn't take my first drawing class until junior year and it didn't take long for me to realize that I wanted to take as much art as I could before I graduated," Jones said. "One of my favorite things about being an artist is how much it incorporates very disparate ways of being in the world. Life in the studio is very private and solitary, but the community of artists and the art world is a very social one."

Abbott channels life experiences in artwork

Andrew Abbott followed a unique trajectory into the art world: He was once a student who admitted to cheating in art history and claimed only to have taken the class to look at the pictures; now his quirky paintings grad the walls of Lamarche Lounge in Smith

Born in Nova Scotia, Canada, Abbott moved to North Carolina, Nigeria, and Jamaica because his father. Bowdoin alumnus Richard Abbott '71, worked as a geologist. Abbott attended the University of North Carolina at Charlotte, then transferred to UNC Wilmington, where he graduated in

"I started to draw more pictures to distract myself from the evils that lurk around Wilmington, North Carolina,"

Upon graduating, he enlisted in the army. "I told them I didn't want to kill so they made me a medic and put me in Louisiana for most of the time," he said. Since then, he has traveled for the past year and spent six months in Puerto Rico.

"I think [traveling] influenced me because the memories are always strange and have a way of making me want to go back to those places for God-knows-what reasons," Abbott

Abbott's paintings in the exhibit are influenced by a number of artists, but are uniquely his own at the same time. He enjoys the works of Glen Brown, Busch, Dali, Giacometti, and Henry Moor; their influence is apparent in his own pieces.

He uses a variety of media in his art. For a surface, I use scraps of paper that I find interesting or any other piece of paper that any random person

ART IS LIFE: The works of artist Andrew Abbott are currently on display in the Lamarche Lounge in Smith Union. Abbott uses a variety of media in his work, including torn paper scraps and paint.

might hand me-such as an advertise ment or something. Then I just kind of paint on it, tear pieces away, repaint until I see something I like and then just add detail," he said.

Abbott has always been interested in art, especially drawing.

"People I hadn't seen in years have reminded me of things I used to draw as a child such as trains and mountain bike frames," he said. "My interests in art and medium have been constantly changing throughout my life, but for the last few years it's been a pretty consistent thing I've been doing with the eight-and-a-half by eleven-inch acrylic d mixed media things."

His experience in the military adds

an additional dimension to his work, "Several paintings were done during my stint in the military and you could say that they were influenced by that experience, if only for the reason that several of them were painted on actual

dispose of, but instead drew on them," Abbott said. "I can interpret some deep personal meaning in them, but honestly I was just trying to make something pretty at the time I was painting them. Some of them look like they were influenced by my time in the military and that's okay, they probably were on some subconscious level."

Unlike a parent who cannot pick a favorite child, Abbott has no problem naming his favorite piece in the exhibition. "My favorite piece is the 'Moulin Rouge Massacre,' which depicts a Paris club scene involving a dancer done in the style of Lautrec, with the exception that she is carrying an automatic weapon. I like thinking about what she is about to do with the weapon and

Abbott's exhibition is on display in Lamarche Lounge in Smith Union until February 28.

Nam Le sails through 'Boat' with eloquent, original voice

THE BOOK NOOK BY FRANCES MILLIKEN COLUMNIST

Some authors coax their audience into seeing through their eyes. Others immerse you in their worlds. Nam Le does the latter. His voice captured me in the first story of his debut collection

The narrator of "Love and Honor and Pity and Pride and Compassion and Sacrifice" is a writer, also named Nam. He is direct, adrift, and broken. His relationship with his father is starkly sketched. For Nam, Vietnam's history only resides in his familial recollection For his father, the memory is visceral. Their relationship is fragmented, but there are moments when they stumble on the pieces that can make them whole. In their extension toward one another, father and son reach their limits. At the conclusion of Le's first 30 pages, I felt the palpitations of their shared sorrow; contortions of misunderstand that direct the course of a life cannot be blamed or anticipated.

Le is a young Vietnamese writer who grew up in Australia. He is careful not to ne an ethnic voice. In fact, he insists that his craft be founded on a heritage littered with untold tragedy. Le empha sizes his rejection of this narrow catego rization by conjuring narratives that have no rhyme or reason to their content. His stories' subjects range across age, contistories' subjects range across age, conti-nent, gender, and race. Le possesses an innate ability to adopt any voice that will serve his purpose and he demonstrates this talent with vigor.

This author's style is both fluid and sharp. Le is not embittered, but the tone

and is deftly shaped. However, Le dares to use adjectives. He fills his sentences with them. There are times when writing is entirely about winnowing away, constructing a piece of beauty merely from the structure, but Le defies the sparseness of this model. He paints with his descriptors and these illustrative words do not weigh down his prose. They are a light varnish that burnishes the underlying hues. Le does not pair adjectives in a surprising way so much as he couples them with precision.

None of Le's stories are founded on happiness. Redemption, however, is a tone that is struck in many of the narratives. There is a pervasive if not an insistent search for understanding. Not all of the characters' circumstances are dire, but every one seems to be on a precipice. An older man seeks to reconnect with his daughter. A son grapples with his mother's debilitating illness and the disturbing allures and confusion of adolescence. A woman travels to Tehran, hoping to comprehend her friend's new life and revive her own purpose. Nothing is simple for these people. Life is a convoluted layering of action and inaction, only a sliver of which is re-vealed through these pages. Moments of reprieve are stumbled upon but much of what is encountered is an unsteady battle with limbo.

Ironically, the story of Le's that affected me most deeply was the first one, which reflects his own struggles. Le is capable of embodying other voices, but the one he fills best is his own. This strength in no way discredits his diverse assortment of character, but I wonder assortment of character, but I wonder whether he should continue to resist. On principal, perhaps, his battle against being an "ethnic writer" is well-founded. In practice, this hesitance might become

All-star cast makes 'He's Just Not That Into You' smart, witty

WORLD BY LAUREN T. XENAKIS COLUMNIST

It's common knowledge: The day after a date with a guy she likes, a girl will dissect every sentence, every word, and every gesture to try to determine if said guy will call her in an acceptable amount of time to go out again. If he doesn't call within that time frame, then the girl talk begins.
"Why didn't he call me?"

"Well, maybe he lost your number. Or maybe he got into a car accident and is in a coma. Or maybe he got food poisoning from the salmon he had at dinner and has been puking for the last few days and is afraid to call you when he's throwing up since that's gross."

"He's a vegetarian."

"Well, maybe there was salmo-nella in the spinach?"

And then there are the old standbys that we girls offer each other further along in the dating/relationship process. Namely: too good for him," or "What an idiot! He doesn't realize how lucky he was to be with as someone as

When it comes to the world of dating, relationships, and love, it is the job of the best girlfriend to offer advice, compassion, and insults (toward the guy, of course). In girl world, there does not exist the sim-ple "Maybe he's just not that inter-

WHOA! That phrase would erase the entire girlfriend manifesto, but that's the simple message offered by the movie "He's Just Not That Into You.

Based on a book of the same name by Liz Tuccillo and Greg Behrendt, the movie follows the relationship ups and downs of nine 20-30 year-olds trying to figure it all out in Baltimore. The nine characters' stories are interwoven as they try to help each other navigate the trials of dating, marriage, and just meeting people.

The movie focuses on the character of Gigi-a zealous 20-something played by a slightly neurotic (in a good way) Ginnifer Goodwin. Gigi ants to find true love, and she's not afraid of putting herself out there to get it. She's the kind of girl that convinces herself that she's in a good relationship when the guy breaks up with her every weekend so that he's "unattached." She just really wants

First there's Conor (Kevin Connolly), a real estate agent that Gigi meets through her friend Janine. Conor would be perfect, except he's hung up on Anna (Scarlett Joe hansson) who is his best friend (and someone with whom he has intimate conversations), but won't sleep with him. Anna is falling for newlywed Ben (Bradley Cooper), who married his college girlfriend Janine (Jennifer Connolly) because she gave him an ultimatum-either they get married or they split. Yeah, it's complicated.

Because Connor is so focused on getting Anna into bed and into a long-term relationship, he totally forgets about Gigi the minute they walk in opposite directions. Gigi doesn't forget about him though, and spends days checking her cell phone obsessively and sitting by her home phone to make sure she doesn't miss the inevitable (right? I mean, they had a good time) call. Finally she calls him on her ownonly to utterly botch the message she leaves.

In a last ditch attempt, Gigi drops by a dinner place she knows that Conor hangs out at, hoping to run into him and hopefully reinitiating the spark she thought they had that

first time. Instead, she meets Alex (Justin Long) who is Conor's best friend. Alex explains a simple concept to Gigi that her girlfriends ne-glected to explain: If he hasn't called, he's just not that into you!

And so, they're all off to the rac-es. Gigi tries dating many different men, always asking Alex for advice and getting his blunt returns. Conor tries to figure out where he and Anna are going, if anywhere, and Anna tries to seduce Ben away from his wife, and succeeds. Meanwhile, Janine tries to figure what happened to her marriage and why it's not as perfect as her newly renovated house.

And then there's Beth (Jennifer Aniston) and Neil (Ben Affleck). Beth and Neil are in a committed relationship-more committed than Janine's and Ben's-and have rings on their fingers that have been there for seven years. Neil doesn't believe in marriage, which for many women can be a blatant warning signal, but is nonetheless completely in love with Beth and doesn't realize why they need a piece of paper to prove that. Beth, however, has second thoughts about the whole situation when her younger sister gets engaged.

Then there's Mary (Drew Barrymore) who is a sort of ditzy adver-

who can't quite figure out how all this new technology works when dating. There's e-mail, cell phones, home phones, work phones, and Myspace (clearly this movie script was written a few years ago). And then, does videochatting with someone while drinking coffee count as a date?

Overall, the movie is smart and witty, and Ginnifer Goodwin and Justin Long carry it well with their back-and-forth banter Scarlett Johansson's character rings false in a lot of scenes, as if she's not convinced about the part she is playing. I wish that Drew Barrymore had been featured more; her perplexity was hysterical, and seeing more of her confusion would have helped the film in the humor department. Jennifer Aniston seems to have the same facial expression the entire time, but you can't help feeling sorry for her when she sits next to a single Wiccan (male witch, as he so helpfully explains) at her little sister's wedding.

"He's Just Not That Into You" is honest. There are happy endings and sad endings, and that's usually how life turns out. There are rules and there are exceptions. The goal is to find the person who's your exception.

Bird sings same old song on recent release 'Noble Beast'

THIS WEEKS REVEIW BY LOUIS WEEKS

What do you get when you make the same album three times in a row? Subquestion: Is it still awesome? The first answer is Andrew Bird's "Noble Beast," and the secand sorta

In the grand scheme of pop music, the average listener is subjected to the same song over and over again. We are fed the same chord progressions from the same instruments that accompany lyrics about the same thing. Andrew Bird is a welcome departure from the monotony of pop listening.

Though he appears to be a ma-ture step in the right direction for pop music, Andrew Bird is a undrum. He is a violin-toting, pedal-looping whistler who teams up with electronic musicians to create folk songs. His subject matter and lyrics are esoteric and often pretentious, but his melodies are too inviting for the listener to feel stupid about not knowing what they're singing. Even with all of his pop formula-busting quirks, Anw Bird has achieved a level of success analogous to rock stardom. He truly is the only musician who fearlessly does his own thing, and his unique musical identity is what makes him spectacular.

"Noble Beast" is, for all intents and purposes, a winner. It is a masterfully crafted and beautiful sounding piece of work. Each song is trademark Bird: the whistling, the layered and looped violin, the precise pizzicato, and the tight and danceable rhythms of drum-mer Martin Dosh. It all works too. There is no bad song on the album and no egregiously unsing-

able melodies. Even the rapid-fire lyrics of "Anonanimal" elicit a vocal response from the listeners. The album has all the makings of a good Bird album but somewhere along the way, "Noble Beast" falls a bit flat. And after seeing Bird live at Pickard Theater, I am beginning to believe that there a few limita tions to Bird's sound.

'Noble Beast" is not particularly different from any of his last albums. There are slight nuanced differences and alterations to the sound (Dosh being one of them), but Bird is repeating himself. On the large scale, "Noble Beast" is vastly different from all 2008-2009 albums so far. Bird has created a style all his own. But within that style, "Noble Beast" sounds like of his others. His past three albums have employed the same formulaic process: loop, sing, solo. During live shows, his loop technique makes for an interesting performance in which he builds each song up from the ground in front of the audience. But after three albums of an unchanged Bird, it is getting old.

The other limitation of the Bird sound is the loop pedal itself. All great songs rely on a forward mo-mentum. The songs need to feel as if they started in one spot and ended in a different one. The loop pedal makes Bird's songs feel as if the musical idea is being stacked on itself, rather than progressing horizontally on a forward path.

I have been critical of this album. Not because it is bad, but because it is Bird. The uniqueness of his style proves that he is capable of creating groundbreaking music with every album. By his standards, "Noble Beast" is a safe and frankly unchallenging album. Yet despite all of this, Andrew Bird has created something that nobody

WBOR 91 1 FM DJs OF THE WEEK

Kristina Goodwin '10 and Jin-Kyung Kim '10

If you could only listen to one album for the rest of your life, what would it

KG: Puccini's "La Bohème" conducted by Sir Thomas Beecham.

JK: Initially my answer was "Tigermilk" by Belle and Sebastian, but I have to pick "Greatest Hits of 1720" because I will probably still love it when I am 60.

Favorite song to privately dance/ rock out to?

KG: "Danger! High Voltage" by the Electric Six

JK: Billy Idol's "Dancing with Myself" perhaps tied with Bruce Spring-"Dancing in the Dark."

If you were in a band, what would it be called and what kind of music ıld you play?

KG: Captain Starboard and the Lobsters. The lead singer would wear ne and all other a pirate-y sailor costu band members would be dressed as lobsters. We would play covers of motown hits and folksy ballads about maritime adventures

JK: It would be called Blink 5. We would probably air-play Blink 182 covers and I would be the hand clapper. Except, I am already in that band.

Theme song during Ivies?

KG: "Big Trouble" by Man Man. JK: "We Are Your Friends" by Justice vs. Simian

If you could meet any musician, dead or alive, who would it be and why?

KG: Tom Leher. I have all of his old LPs and have come to define my adolescence by songs like "Poisoning Pigeons in the Park" and "I Hold Your Hand in Mine.

JK: Tom Waits. I would enjoy listening to his voice/grumble. I also wouldn't mind hanging out with Regina Spektor on account of her cute-

Best new music you've heard lately?
KG: A three-way tie between
Anathallo's "Canopy Glow," Hercules
and Love Affair's self-titled, and Antony and the Johnsons' "I Am a Bird

JK: Mac Family Band. They mix swell beats.

If you could time travel back to any cal period, where would you go and why?

KG: Since I sing opera, I would vant to go back to its golden age in the mid to late 19th century to try my hand at becoming a diva.

JK: I would go back to the roman tic period to wear frills and hang with Dvořák and Beethoven.

Bands/musicans who have most inenced your musical taste?

KG: Belle and Sebastian, Battles. Beach House, Of Montreal, Portugal The Man, Maps & Atlases, and Co

JK: Mostly Palo Alto Chamber Orstra (PACO) but also Bob Dylan and the Velvet Underground.

"Mixtapes" with Kristina and lin airs Sundays from 8-9 p.m. on WBOR 91.1 FM.

Bowdoin and Colby students collaborate to reveal 'Ink Tales'

BY RACHEL GOLDMAN STAFF WRITER

Despite the black and white "CRUSH COLBY" t-shirts that crop up at Colby-Bowdoin hockey games, the two schools are not always butting heads. "Ink Tales," the new exhibit in the Focus Gallery at the Bowdoin College Museum of Art, is a collaborative effort of the two schools that displays the fruits of a healthy intercollegiate relationship.

Inspiration for the exhibit began during the 2005-2006 academic year when Assistant Professor of Art History De-nin Lee began thinking about the Chinese paintings in the Bowdoin collection. Specifically, she was interested in a group of 39 Chinese paintings that philanthropist William Bingham II gave to the college in 1942.

According to Lee, the initial discovery process was exciting.

"Can you imagine just stumbling across a 10th century text? It's the earliest printed piece that we have," she said. Lee has often ventured into Bowdoin's collections storage room searching for a few specific pieces and instead found drawers of "unexpected surprises."

A year after this initial spark, Lee embarked on a year of grant writing with her colleague, Associate Professor of Art and East Asian Studies at Colby Ankeney Weitz. Lee and Weitz then returned to their respective institutions and taught collaborative seminars in the spring of 2008. In these seminars, students picked a theme derived from the colleges' collections of Chinese art, selected images, wrote labels, planned the layout for the upcoming exhibition, and made a family guide.

Collaboration was intrinsic to all aspects of this project. The Bowdoin

STORY TIME: Assistant Professor of Art History De-nin Lee speaks about the latest exhibit in the Focus Gallery, "Ink Tales," that includes ancient Chinese art.

and Colby seminars met several times throughout the semester, including a joint trip to the Museum of Fine Arts in Boston. At the MFA, Weitz and Lee pushed their students to "become more cognizant of how each exhibit is personally constructed," Lee said. "We wanted them to become aware of the subtleties of curating."

The process of deciding which pieces would go up at which institution was largely student-driven.

largely student-driven.

"We would go to Colby and have sessions with the education curator. It was from these sessions that the students decided to mix the Bowdoin and the Colby collections for the exhibit," Lee said. Bowdoin's Focus Gallery is currently home to an album of Colby's Chinese paintings and Colby is showing more

than 10 of Bowdoin's pieces.

The success of "Ink Tales" also de-

The success of "Ink Tales" also depended on the cooperation between the two institutions, according to Lee.

"It was truly a serendipitous matching of sessures. For example, we have most of the paintings, but they have a curator of education. We have a new museum, but we don't have a lot of horizontal glass cases for scrolls and luckily Colby does," she said.

"It was an unprecedented collaboration between the faculty, students, and museums of these colleges." Lee added. "But we knew if we were able to do this, we would reach out to a much broader audience and have a strong impact. We saw it as a significant opportunity for our students to teach about a different culture." For Lee, the unique educational and curatorial process is one of the defining aspects of the show.

"While, from far away, it may look like a relatively standard show, up close you can tell that the student curators really took it to heart to educate and make the pieces accessible. They were so excited about what they learned that the show is really a vehicle for teaching others," she said. "The generosity of teaching is really an element here. The students were very keen on that part."

Differences unfolded between the Colby and Bowdoin exhibits, both titled "Ink Tales," as they developed. While Bowdoin students decided to unravel the rich narrative content of the Chinese paintings through informational guides, gallery labels, and in-depth research

projects, Colby students included headphones by each piece so viewers could hear students reading the text.

The shows are also physically distinct because of the differences between the

two museum spaces.
"At Colby they have long scroll cases and here we have tall ceiling space. For that reason, their show is longer and more horizontally laid out than ours," Lee said. Their show has a small scale intimate feel where as, while we have moments of intimacy, we also have a public face to our exhibit. Our items are larger and more iconic on the whole.

"Ink Tales" was intended to educate both the seminar students and the broader Bowdoin and Colby communities.

"It was conceived as something that was going to be a broad public show. The impetus for that stems from my experience teaching a foreign culture. In the seminar we explored how East Asian cultures are put on display in American museums. Because, really, those pieces are standing in for the culture itself," Lee said.

This holds particular resonance for "Ink Tales," according to Lee.

"Both Bowdoin and Colby are located in an area of the country that has relatively low exposure to East Asian culture," she said. "I wanted to make sure that this art exhibit would be a vehicle, not for promoting or substantiating those stereotypes, but for a more substantial, complex, and profound exposure to Chinese culture."

"Ink Tales" is on display in the Focus Gallery at the Bowdoin College Museum of Art until May 10. It is on display at the Colby College Museum of Art until March 8.

Overtime split for hockey

STAFF WRITER

The men's hockey team twice battled its way into overtime last weekend, beating Hamilton on Friday and then slipping to Amherst on Saturday

"We played really hard," said Mike Corbelle '10. "We showed a lot more grit than we had for a lot of the rest of

On Friday, the Continentals took the lead early in the first period with only 31 seconds elapsed. Colin Mac-Cormack '10 struck back with only eight seconds remaining in the first on a power play.

The Bears took the lead just a minute into the second period as Corbelle scored Bowdoin's second goal. Hamilton tied the affair in the third period, bringing the contest into overtime

Corbelle, not content to draw the game, received a pass from Kyle Shearer-Hardy '11 along the Hamilton blue line before dispatching a thunderbolt into the roof of the net, stunning the home fans and sending the opposing goalie's water bottle yards into the air above the net. Bowdoin goalie Chris Rossi '10 recorded his second win of son as he stopped an impressive

32 of 34 shots sent his way. Against Amherst on Saturday, however, the Bears proved less successful

under pressure.

The Lord Jeffs 2-0 lead was cut to 2-1 when Hardy scored his ninth goal of the season 13:40 into the second pe riod.

The Bears then leveled the affair in

the third period as Mitch Dillon '10 picked a timely opportunity to score his first goal of the season and Bowdoin's second of the game

In the third period, Amherst jumped in front, yet Corbelle was once again on hand to score a game-tying oal. With only 2:20 remaining in the third, he hit his 10th of the season to earn the Bears a point

The game ended as the Lord Jeffs scored on the power play in overtime. Goalie Richard Nerland '12 stopped

staggering 48, shots despite the loss.

"It was disappointing to lose to Amherst," Corbelle said. Nonetheless, Bowdoin's current ferocity represents a major improvement from their string

of losses over winter break.

Corbelle liked "the way we didn't give up where eaarlier in the year in that type of situation [down a goal to the No. 1 team in the conferencel, would've just folded. But since the USM game, we really saw a turn around where we didn't give up and really fought back."

We're rising at the right time," he said. "We're hitting our stride."

Even in the context of his personal scoring exploits, Corbelle was quick to

"The goals I scored were just a product of the team playing better," he

On Friday, the sixth-place Bears look to continue their rich run of form against last-place Wesleyan at Watson Arena at 7 p.m. On Saturday, Bowdoin faces off against fourth-ranked Trinity College at 4 p.m. at home.

MARGOT D. MILLER, THE BOWDOIN ORIEN

BANK SHOT: Junior Paul Sellew hits a lay-up during the Bears' practice on Thursday. The team plays Connecticut College and Wesleyan this weekend.

Men's b-ball snaps Ephs' 40-year streak

Winning on the road in the NESCAC is difficult. For the Bowdoin Men's Basketball Team, defeating Williams College in Williamstown has been nearly impossible. Not since the 1968-69 seahas Bowdoin defeated Williams on the Ephs home floor. On Saturday Bowdoin ended the 40 years of futility and defeated Williams 76-71. The con was a back-and-forth affair, with each team holding the lead throughout the game. With 1:36 remaining, Wilms' Blake Shultz hit a three-pointer to give Williams a 71-70 lead. Bowdoin would answer, however, using a crucial defensive stop and quality free throw shooting to overcome the deficit and take the game. Senior Kyle Jackson led the Bears with 22 points.

Surprisingly, the majority of the Polar Bear team was unaware of the streak heading into the game on Saturday. Motivation for the game did not come from the knowledge of a lengthy losing streak but from a desire to avenge the loss at Middlebury the previous night.

"The added motivation came from

within," said Paul Sellew '10. "Three of the four NESCAC weekends, the exception being the weekend we only played Colby, we have lost on the first day, only to come back strong on the second day to get a victory. It's tough to recover from an emotional standpoint so quickly, but we have been able to do that over the last three weeks." At a time in the season when teams are playing for crucial position in the standings, streaks and personal records become almost obsolete.

"I believe we used the loss form the night before against Middlebury as motivation for our game against Williams, said Mark Phillips '10. "Coming off a tough loss to Middlebury, it was a mustwin game against Williams."

While the team was unaware of the losing streak heading into the game, the players expressed a sense of added satisfaction knowing that they had accomplished something no other Bowdoin team had done in 40 years.

*Finding out about it after the game made the win that much more enjoy-able, said Jackson. "I was especially happy for Coach Gilbride since it was obviously his first win at Williams.

On Tuesday, the Bears played their

final road game, losing to Bridgewater State by a score of 68-56. The game was the first meeting between the two New England squads since the first round of the 1999 Division III tournament. Bridgewater took control in the final seven minutes of the first half, outscoring the Bears 18-5. In the second half, Bridgewater was up by as many as 22 points (55-33) before finishing off with a 12-point victory. Despite the loss on Tuesday, the Polar Bears see the importance in staying strong this weekend in their final two NESCAC games of the

"Our captains, Kyle Jackson, Tim Lane ['09], and Darian Reid-Sturgis ['09] are all great motivators and have already done a great job in switching our focus to the weekend," said Sellew. "We have a lot to play for this weekend, with first-round home game in the NES CAC tournament on the line."

With so much riding on this week

end, it will be imperative that the Bears find the necessary motivation to finish the regular season with two crucial NESCAC wins. Bowdoin hosts Wesleyan today and Connecticut College

Squash goes 8-0 on week

BY ANDY BERNARD

Both the men's and women's squash teams breezed through their home stand this past weekend in the last matches of the regular season. The women emerged with a record of 5-0 and the men with a record of 3-0.

The women kicked off the first match of the weekend on Friday night, taking on the University of Toronto. The Polar Bears' top six players (Elena Laird '11, Lauren Gesswein '11, Kate Gormley '09, Alexandra Franceschi '09, Biz Gillespie '09, and Lizzy Warner '11) were unbeaten, ensuring a victory for Bowdoin, the first of two against Toronto over the

On Saturday, the women responded 'well to a day filled with three matches: They took care of Tufts, George Washington, and Toronto by scores of 8-1, 6-3, and 6-3, respectively. Through all three of the day's matches, the top six players were consistently unbeaten

On Sunday, the women defeated the Northeastern Huskies with ease, 8-1. The weekend was a triumph for the women, as they took care of business marvelously against all of their oppo-

The men began their weekend on Saturday morning against Tufts, a team that, despite being ranked a few spots below Bowdoin, presented a challenge not to be overlooked.

Carrying momentum from their 5-4 win over Middlebury the weekend before, the Polar Bears played the type of squash they hope to produce at Nation-als next weekend, and defeated Tufts by a score of 7-2. Wins came from the to

seven players on the ladder (Andy Bernard '11, David Funk '10, Rahul Madan Mohan '11, Peter Cipriano '10, Robert Lynn '09, Thai Ha-Ngoc '10, and Arun Makhija '10). Funk played particularly well in the No. 2 slot, allowing his opponent only four points in his 3-0 rout.

Building on the morning victory, the men were able to defeat MIT by a score of 9-0 later that day.

The men played Northeastern the following morning, alongside the wommen played well up and down the ladder, earning an 8-1 victory.

Needless to say, both teams were exceedingly happy with the results of the weekend, especially given that Nation-als is this weekend at Harvard for the en, and next weekend at Princeton

This positive energy and confidence going into the most important tournament of the year is hugely significant," said Adit Basheer '11. "We all know how important it was to take care of business this weekend."

Before both teams' matches against Northeastern on Sunday, the underclassmen paid tribute to the squash team seniors before their last home match by giving speeches, flowers, and gifts. In addition, the men's team sang the Scottish national anthem to senior Robbie Lynn, a Scottish native, complete with accompaniment by bag-

The only competition remaining for both teams consists of the team Nationals tournament, occurring this weekend and next weekend, and the Individual Nationals tournament, which will fall on the weekend of February 28 at Wil-

Swimming heads toward NESCACs

BY CATLMITCHELL ORIENT STAFF

After a split-decision weekend, the Bowdoin swim teams look ahead the NESCAC championship meets, which begin next weekend at home for the women's team. The women will look to avenge last weekend's 157-131 loss

Starting off the meet, the women's 200-medley relay team of sopho-mores Erin McAuliffe, Caitlin Callahan, Emma Chiapetta, and Allison Palmer secured the Bears' first victory of the meet. Senior Liz D ann the 200-yard breaststroke, and Callahan, Chiapetta, and Palmer secured individual wins in the 100yard breaststroke, 200-yard butterfly, and 50-vard freestyle, respectively, to keep the score close.

'All in all, the women performed vell," said Palmer. "We just came up a little short in the end. It certainly adds some excitement for NESCACs.

trouncing the Mules 178-106, while winning 10 events along the way Leading the way was the 200-yard medley relay, composed of Mac Routh '12, Nathan Mecray '12, Matt Kwan '10, and David Swanson '09. Routh and Mecray both went on to win two individual events apiece, with Routh taking the 100-yard backstroke and butterfly events and Mecray securing the 50- and 100-yard freestyle. Kwar edged out Josh Kimball '09 and Roger Brothers '11 to sweep the top three spots in the 200-yard backstroke. In addition, Ian Wadner '09 was victorious in both 1- and 3-meter div ing-events he picked up just four

The performance of Max Goldstein capped a day of great swims for the men's team. Rising to the challenge against the Mules, a team which the Bowdoin men have not beaten in a dual meet in six seasons, Goldstein swam to a hat-trick of victories, tak ing first in the 200-yard butterfly, 200-yard breaststroke, and 400-yard individual medley. On Monday, Gold-stein was named NESCAC Swimmer of the Week for his performance.

The Bears will look to repeat their dominant swims February 27 through March 1 at the NESCAC championship meet at Wesleyan

Time to Say Goodbye

COLUMN LIKE I SEE'EM

BY CHRIS ADAMS-WALL COLUMNIST

I remember it well because of its implausibility. I posed the question on my professional sports radio show in high school back in the spring of 2005 as a gambit to get a rise out of my co-host, an ardent Red Sox fan. He laughed after I read it over the airwaves, and I couldn't help but chuckle myself: what would be a more intriguing steroids story? A story of Jeter or a story of A-Rod? Again, it was the implausibility of the thing. Two of baseball's greatest icons, playing for the same team, on the same side of the infield. The former: the walking definition of class, who always led by example and had four World Series rings to prove it. The latter: the walking definition of insincerity, whose signature moment came when he intentionally slapped Bronson Arroyo's arm, the pitcher trying to tag him en route to first base on a ground out, and has zero World Series titles to prove it, but who might still go down as the most talented player to ever walk the Earth.

But despite their differences, both men, at least to our knowledge, had played the game the right way: sub-stance-free. And that's why the question was so implausible.

"Personally I think Jeter would be the more intriguing story," I argued. "He just doesn't fit the profile at all; I would be absolutely shocked, and probably even a little depressed if I found out that Jeter had been on steroids. A-Rod on the other hand? I think that would be more funny than anything. I mean, I don't believe either of them has done it in their careers, but the way A-Rod has played his first year-and-a-half with the Yankees, and the shenanigans that he has pulled, I think most people would

find that story comical."

Comical. It might have seemed that way at the time, because of the inconceivability of that story ever surfacing but when I woke up late Saturday morning and stared at espn.com's homep age only to read the words that would change baseball forever—"BREAKING NEWS: A-Rod Tested Positive for Ste roids in '03"-I wasn't laughing. Not even close

The guy who had broken the bank (twice) as baseball's richest player, gained notoriety as the league's least clutch performer, been part of as many controversial stories off the field as on, a unique blend of unprecedented talent, choke artistry, and a fictitious, calculated persona all in a gargantuan 6-3, 225 pound frame, who had never really looked quite right in Yankee pinstripes had, at one point in his career, been on the juice. So why wasn't I relishing this hilariousness with some good, clean laughter? What was wrong with me? I had, not once, since his joining New York back in 2004, sanctioned his presence in the Yankee daily lineup. I just couldn't bring myself to support a phony man who al ways failed when it counted. It was like a long-time friend and Yankee fan once told me: "If A-Rod succeeds, great. If he fails...even better."

But here I sat in the dark, reading the lead article line for line, word for word, still trying to fully comprehend the riv-eting news that had just five minutes ago been released to the world, and cracking not a smile, nor eliciting a chuckle. And why? Because although the enigmatic and troubled third baseman, who had caused my fellow Yankee fans and I more general distress and anxiety these past five years than we're probably aware of, A-Rod had one redeeming, bul-letproof quality that no one could take away from him even if they tried: Alex Rodriguez was the savior of baseball

In an era devoid of truth and purity, led by the now adulterated names McGwire, Sosa, and Bonds, Alex Rodriguez was rare: a Mr. Clean with hair. Throughout his entire career, he had played the game the right way. No Roids. No Drugs. No nothing. Period. He would step up to the plate, take some hacks, and with his sweet swing hypnotize us into a kind of an amnesia, allowing us to forget the McGwires, Sosas, and finally Bonds, whose inconvenient homerun record total of 762 was pected to be broken eventually by Mr. Clean himself. Hate him or love him, Alex Rodriguez, after Jackie Robinson, was arguably baseball's most important

Then came Saturday's news in the surrealist of forms. The man who had denied ever using performance-enhancing drugs multiple times throughout his career, arguably the most talented in history and the current face of baseball, in an interview with Peter Gammons admitted to using performance-enhancing drugs for three seasons while playing for the Texas Rangers from 2001-2003. And boom goes the dynamite. But in reality, boom goes baseball.

As fans, who can we trust now? Especially when you consider that Rodriguez was just one name from a list of 104 players who had tested positive for steroids in 2003. It also makes you wonder which players failed tests in previous years leading up to, and exceeding 2003, that have not yet been released. And if Alex Rodriguez is guilty, then the game's next perpetrator to surface shouldn't surprise us in the slightest.

It's a vast understatement to say that it's been a rough year for Alex Rodriguez. The Yankees missed the playoffs for the first time in fourteen years, he was divorced from his wife Cynthia with their two children, he was mercilessly slandered as "A-Fraud" by the normally soft-spoken Joe Torre in his latest book "The Yankee Years," and then immediately shed that nickname, and with Saturday's news, appropriately was crowned "A-Roid," or even worse, "A-Hole"

But at least he admitted to his wrongdoing (1 don't think I even want to imag ine the circus that would have resulted from him denying the initial report). Yet, in the grand scheme of things, it still means very little. He did it. Plain and simple. And now he'll have to pay the price.

The Yankees have already announced that they will give A-Rod their full sup-port, much like they did with Jason Giambi and Andy Pettitte, citing that they understand that he is human and not immune to fault. But apparently, he is immune to moral integrity. Part of me feels the Yankees should make a huge statement and just cut ties with the three-time MVP, and swallow the remaining \$250 million or so remaining on his enormous contract. And while the indigestion of the check would be excruciating, the messa would be loud and clear: enough is enough.

A wise man once said, "You can fool some of the people all of the time, and all of the people some of the time, but you cannot fool all of the people all of the time." I guess A-Rod is the one exception to that rule; he had all of us fooled to the inner core. And now, with a tainted and very possibly destroyed legacy, Alex Rodriguez will have to wait, take responsibility, and like any human being, suffer the ramifications of his actions. And we, like any sports fans, will have to sit and watch it all unfold. Baseball has been compromised, and the forecast in-definitely remains dark and cloudy.

Throwers lead women's track to win

Continuing a spotless season, the women's track team upheld its undefeated streak by decisively winning the Maine State Championship last Friday evening at Bates College.

The Bears, who won the meet with 220 points to Bates' 146, Colby's 119, and USM's 87, have had their sights set on reclaiming the state title since their third-place finish at the 2008 champi

"Winning the State meet was such a rewarding and proud moment for the team, the seniors especially," said cap-tain Alison Chase '09. "After a somewhat disappointing third place last year, it was so exciting and fun to come back this year and win solidly.

It was the senior throwers who led off the evening's victories, with captain Kelsev Borner '09 and Shemeica Binn '09 taking third and seventh, respectively, in the weight throw, and then third and second in the shot put.

"[They] got us off to a great start," said Coach Peter Slovenski. "Kelsey and Shemeica prepare well, and then comThey are getting better each week."

Strategic racing was the Bears' key to ccess this past weekend, with many athletes doubling and tripling events, starting cautiously, and then moving ahead, finishing higher than their seed-

Flsa Millett '12 continued her stellar season this winter by picking up two first-place finishes for the team, in the 200 and 400-meter dashes. Other wins of the day included Christina Argueta 11 in the 5,000-meter run, whose intelligent opening mile gave her a strong, decisive victory at the end of the race. Laura Peterson '12 also won the long jump, Annie Monjar '09 took first i the 3,000-meter run, and the 4 × 800-meter team finished the day's events

Farlier in the meet, Emily Barr '12 and Molly Seaward '09 picked up points in the 55-meter dash with second and fifth place finishes, while Meagan Tilton '11 and Alexa Staley '11 took second and third in the 55-meter hurdles.

Continuing to prove their depth each week, the team's middle-distance runners garnered points for the Bears.

Runners swept up points in the 600-me ter run, where Ali Chase' 09 took sec ond, Grace Kerr '11 finished third, and Alex Peacock-Villada '11 took fourth. In the 800-meter run, Jessica Sokolow '09, Molly Duffy '11, and Dana Riker 10 also took second, third, and fourth places, respectively, followed closely by Caroline Tory '12 in 6th, and Kathryn Deneroff'12 in seventh.

"The 800 was our strongest event of the day," Slovenski said. "We took six of the top eight places in that race."

day and tomorrow, Bowdoin will have the chance to test its abilities in one of the strongest fields of compe-tition it will see all season: the 2009 Boston University Valentine's Day Invitational, which attracts top Division III, Division I, and professional athletes each year. The track is "banked," that is, sloped upward from the inside lane to minimize the impact of short, tight

The BU meet always fosters an exciting atmosphere," said captain Kelsey Borner '09. "Even though we're com peting against many Division I schools and phenomenal athletes, it's a really great opportunity to learn from them.

Men's track defends Maine state title

RY CHESTER ENG CONTRIBUTOR

Facing some of the best men's track teams in the state, the men's track team proved themselves during last Saturday's Maine Indoor Championship at

"The State of Maine Championship is always extremely competitive amongst the Maine colleges," said junior distance runner Thompson Ogilvie. "It was a big in as well as a huge confidence boost er for our team."

The Polar Bears ran away with the state championship by posting a team score of 208.5 over the University of Southern Maine (162), Bates (132.5), and Colby (18). For both the coaches and the athletes alike, this victory was a culmination of four months of hard

"We spent the entire season gearing up for this meet," said senior tri-captain Mike Krohn. "We had 10 men score over 10 points for the team. That really pays homage to the track program and coaches at Bowdoin to develop athletes that can perform at that level at a very competitive level."

Several Bowdoin runners earned State Championship honors, including Krohn in the 55-meter hurdles (8.01) Kyle Hebert '10 in the 200-meter dash (23.17), and Zach Winters '11 in the 400-meter race (51.74). First year Brett Stein claimed the 800-meter run with a time of 1:58.30, while the team of Riker Wikoff'12, Benjamin Cedars'11, Brian Huynh '12, and Alex Jeanty '11 ran a 3:28.60 to win the 4 x 400-meter relay.

Luke Fairbanks '09 led the way in the field events with his dominant victory in shot put, which he won by 1.85 meters, and his second-place finish in the weight throw. For his performance, the senior tri-captain won the Peter Goodrich Trophy for the most outstanding field event performer.

Bowdoin jumpers had another imy pressive day as Chris Martin '12 won the high jump with a season best 1.96meter jump. Stephen Gonzalez '09, Co-lin Hay '10, Tim Fuderich '10, and Alex Lucyk '12 provided additional points by scoring in the pole vault, long jump,

and triple jump.

Amongst all of the remarkable performances of the day, Coach Peter Slovenski noted that those of the seniors were particularly praiseworthy.

"The seniors won three of four indoor state meets during their careers," said Slovenki. "That's one of the best records of any class in the history of Bowdoin track. I can't remember a class that had as many clutch state meet performers as the Class of 2009. The seniors set personal bests, improved their seed position, scored 70 points, and provided inspired leadership to the team. It was a great team effort, but the seniors were the most valuable performers."

Being Maine state champions is yet nother reason why Bowdoin should be happy with the tremendous success it has had this season. However, the Polar Bears are still hungry for more and are determined to capture an even greater prize.

"As a team, we still have important goals for the rest of the year," said senior tri-captain Damon Hall-Jones. "The New England Division-III championship meet is right around the corner, and we've also got our eyes on an outdoor state meet championship."

Bowdoin will travel to Boston University to compete in the Valentine's Day Classic this Saturday.

Women's hockey wins four in a row

BY EMMA POWERS

The women's hockey team has been skating to victory, winning their last four competitions. This past week, the Bears played three times, defeating Wesleyan 5-3, Hamilton 4-3, and Colby 4-1. The wins were significant for the Bears, as their success against Wesleyan guaranteed them a spot in the NESCAC playoffs, and the Colby win was the Bears' first victory in the new Watson Arena.

Against the Hamilton Continentals on Friday, Jill Campbell '11 scored the game-winner with less than two minutes left to play. Sam Stewart '09 and Maria Nicolais '10 also scored for the

Bowdoin again proved spectacul against Wesleyan the next day, as Danielle Lozzi '12 left the ice with a hat trick, and Lindsay McNamara '09 netted two goals and had two assists

The Colby win on Tuesday represented the Bears' first victory against the Mules since December of 2005 Beating Colby felt awesome," Sage Santangelo '12 said. "We have worked very hard, and we continued playing well so just winning was great, but es pecially against Colby in our own rink made it that much better."

Kelly Keebler '10 noted that the win as vital for Bowdoin's standings. "The Colby game was really important for our standings, so beating them will definitely help get us where we want to be for playoffs," she said. Currently, Bowdoin stands as the sixth-ranked team in the NESCAC.

With their four-game win streak, the Bears have reflected on their recent success. "I think this winning streak has just been the product of our hard work as a team in practice....We just take it game by game and focus on what we

need to do each time to play to the best of our ability," Santangelo said.

"Since we're coming down to the wire in our season, we realized how important these final games are in the standings. Our team has come together as a whole and stepped it up to the next level," Keebler add

The Bears will play this weekend away at Trinity. "The Trinity games are the last NESCAC games during the regular season and we just want to finish strong so that we can keep our momentum going into the playoffs," Young said.

"Our goal in the upcoming weekend is to just keep playing the way we have been over the past couple of weeks," Keebler added. "This means giving everything you have when you're on the ice, supporting each other off the ice, and playing as a unit. When we do this, we are definitely a team that the com-petition needs to look out for."

Women's basketball looks to host playoffs

Every weekend is a big weekend for Bowdoin Women's Basketball. But this weekend is really big.

The Polar Bears head to Connecticut for a pair of NESCAC showdowns to end the regular sea Wins at Wesleyan (3-4 NES-CAC) tonight and at Connecticut College (0-7 NESCAC) tomorrov afternoon would net Bowdoin the honor of home games throughout the conference tournament.

"The games this weekend are huge," said senior tri-captain Alexa Kaubris. "We would love to be able to host [the conference tournament in] our last year. Our fans are so great that it just feels good being

Wins in both games would beat Amherst to earn the Bears the top spot in the conference. However the matchups are always-difficult back-to-back conference games or the road.

'We are going to have to play our guts out in both games," Kaubris said. "Both teams are going to be gunning for us, and we have to hold on to the top spot. We're going to have to key in on their top players and really shut them down

As always, defense will take top priority for the Polar Bears.

"To win this weekend, we have to play great defense against Weslevan on Friday night," said senior tri-captain Maria Noucas. "Their record does not show how good they are at all. Ali Fourney is one of the best players in the conference and Lucy Sprung is a tremendous rebounder. If we can pressure them defensively and get out and run, then we'll be great."

The Polar Bears are already guaranteed to host at least one playoff game. The top four seeds each host a game in the quarterfinals, which begin on February 21.

The highest remaining seed hosts the semifinals and finals on the weekend of February 28 and

To put themselves in position to take the conference pole, the Polar Bears notched two NESCAC wins at home last weekend. On Friday, the team beat Middlebury 76-50, and on Saturday, the team scored an emotional Senior Day win by clobbering Williams 91-58 in front of a raucous crowd.

Sophomore guard Katie Bergeron led the Polar Bears to the win over Williams with a school record-tying six three-pointers while team de-fense sparked the Middlebury victory. Bowdoin scored 33 points off 23 Panther turnovers in the game.

Senior Day was an emotional day for the team's three seniors: Noucas, Kaubris and Jill Anelauskas, who are all captains and have had stellar four-year careers. Bowdoin's own "Big Three" has led the Polar Bears pair of NESCAC titles, three NCAA tournament appearances and an overall record of 93-18 in

"Our class is very close and so it was nice to be out there together with our parents and to win such a big game [over Williams]," Nou-cas said. "The three of us have been through a lot together and it was just a nice day to celebrate a great

Anelauskas, one of the top scorers in Bowdoin women's basketball history who eclipsed the 1,000 career point mark early in the season before suffering a devastating knee injury that ended her season, even saw some court time on Senior Day. Needless to say, it was one of the most touching moments of the day.

"It was certainly a day that I will never forget-the underclassmen and coaches did such an amazing job making the day special for us, Anelauskas said. "For me, personally, it put a lot of things in perspective. Not only did I realize how much I am going to miss my teammates, who are my best friends, but it also brought to the front of my mind the fact that my career is over and that it was cut short by a year... I love basketball so much and have so much pride in this program."

Kelsey Borner '09 is 'one of the best'

BY CRAIG HARDT

Kelsey Borner '09 has been a pillar of the women's track and field team from the first day she arrived on campus. As ATHLETE captain of both Bowdoin's

PROFILE teams, Borner has helped indoor and outdoor track create a winning and supportive atmosphere for the Bowdoin squad, looking to build on its recent first place finish over MIT and Colby.

Borner first got involved in track and field in the 8th grade because "it was just something that everyone did," she said.

She didn't realize just how good she as until her first meet, where she broke the school record for the shot put.

Also a softball player in middle school,

Borner faced a difficult decision as she decided which sport she would continue in high school.

'Ultimately, I chose track and field because more of my friends were on the team," she said.

While Borner, who participates in the shot put, discus throw, hammer throw,

The Nordic team raced in the open

were basically two races in one, and we

We raced a race within a race. There

and javelin, may have stumbled upon the sport by chance, there is no doubt as to how much effort she has put forth in becoming the best that she can be.

Borner, who last season was awarded all-conference honors in the shot put while also winning the conference championship in the discus throw, is known among her teammates for her dedication and long hours

"Kelsey is always the first person at practice and the last person to leave, she sets a good example for the rest of us," aid teammate Andres Botero '12.

Her coach, Peter Slovenski, agrees

"Kelsey brings a lot of leadership and poise to our lineup," he said. "She's one of the best competitors we've ever had. She excels in the classroom while also being a college varsity team captain."

While Borner, who is second on the all-time Bowdoin list for discus throw. (behind former assistant Dean of Students Stacey Bell '00) is very focused on finishing the indoor season strong and preparing for the upcoming outdoor eason, she is also planning for life after Bowdoin. Borner discussed how track and field has influenced her beyond the "The competitive nature of track and

field has definitely translated into other areas of my life," she said. As her time at Bowdoin draws to a

close, Borner recognizes how lucky she has been with the people that surround

"It's amazing to know that there is a group of people willing to wake up at 4:15 every morning with you," she said.

Borner is also looking toward the future. She plans on taking a couple of years off before going back to school for a Ph.D. in clinical psychology.

When asked if track and field would play a role in her future she hesitated before saying, "This will probably be the end of my personal competitive career in track and field, but who knows? I may get involved in coaching somewhere down the line?

Just as she stumbled into the sport in eigth grade, Borner said she wouldn't be surprised if track and field finds a way into her life once again after she

competed against the collegiate teams, coach Nathan Alsobrook said. Last Saturday the women competed in a 5K freestyle race, where Erin Hatton '12 finished in 44th.

"This was a personal best for Erin,"

up the hills and smooth."

Nordic team braves tough weather at UVM

Courtney Martin '09 followed and Olivia Orr '12 was the third Bowdoin finisher. The men competed in a 10K freestyle race. Colman Hatton '10 skied his best race, finishing in 32nd. Finishing in 35th, Scott Longwell '12 brought an other solid performance. Sunday proved to be a challenge. It was windy, warm, raining, sleeting, and thundering

'It was an epic day for us to be trying to figure out a wax that worked," Also brook said

In the 10K women's classic event, Martin placed 32nd, which was another personal best.

"It seems that the worse the conditions are the better she gets," Alsobrook said. Hatton finished again in 44th and was

The men raced in a 15K classic event where Spencer Eusden '12 made a leap forward finishing in 34th. Longwell finished in 35th, followed by Hatton. Longwell continues to be calm, consistent, patient, and solid even in adverse conditions, Alsobrook said.

"His snappy technique combined with his large base of endurance, from running cross-country, are what allow him to do so well," Eusden said.

Alsobrook said the team has never had a first year skiing at this level. Alsobrook said it was probably the toughest course the team has raced on this s

"It put a premium on endurance and fitness," he said.

The team will ski at Dartmouth next

OPINION

BOWDOIN ORIENT

Connecting with professors

efore coming to Bowdoin, college guidebooks told us that professors here would invite us into their homes, take us to lunch, and ask us to babysit their kids. Many of us hoped to form close relationships with our professors, and we expected that such relationships would spring up naturally, easily, and frequently. While some students have had just these sorts of experiences, many others may feel surprised or disappointed that they have not.

But we can hardly point fingers at our professors. We've just become too sheepish in the ways we interact with each other. Last semester, the Orient conducted a poll about dating and relationships that revealed most students have been too nervous to ask someone out when they wanted to. Though it should be easier to stroll into a professor's office than to ask someone out on a date, students generally tend to shy away from both situations.

There's no question that our professors are busy. They spend countless hours working on research, preparing lectures, and attending faculty committee meetings. But most professors also designate one to three hours a week for office hours, and often invite students to make appointments outside of this allotted time. Our own hectic schedules should not prevent us from engaging in out-of-class discussion with our educators.

We also forget that our half-formed ideas or questions are exactly the kinds of things we should see our professors about. The opportunity to interact with students in this way may be what drew our professors to become educators at a liberal arts college in the first place. Professors are generally delighted to talk about their research, share insights and experiences, or just shoot the breeze.

E-mail between students and professors can be convenient for questions of clarification, and it has become an invaluable tool for almost everyone in this community. But it does not—and should not—replace the candid, face-to-face interactions that are at the heart and soul of a small, liberal arts college like this one.

The editorial represents the majority view of The Bowdoin Orient's editorial board, which comprises Nick Day, Nat Herz, Will Jacob, Mary Helen Miller, and Cati Mitchell.

Government the root of health care issues

To the Editors:

Eamonn Hart's op-ed ("Universal Health Care a Necessity," February 6) is absolutely correct about the pressing need for health care reform. His criticism of the current system is mostly accurate as well. However, all of the solutions presented in his article included a greater government role in American health care. But, more government may not be the answer.

In his article, Hart focused on the link between health insurance and

employment. Unfortunately, many people do choose jobs based on their health benefits. What most people don't know is that the government created this problem. During World War II, price controls imposed by the government forced companies to increase wages without actually paying more. The result was employer-provided health care.

Furthermore, only employer-based health care can be paid for with before-tax dollars. Therefore, people who don't have health care from their jobs have to pay for plans with after-tax dollars, making the plans prohibitively expensive for many.

The government has perverted American health care in many other ways. Further review of current and potential government interventions in health care should be scrutinized for similar negative externalities. After such a review, our society may prefer the government to further intrude into health care; but it should not be assumed that our government bares no responsibility for many health care deficiencies.

Sincerely,
Nathan R. Chaffetz '08
Los Angeles
Production Assistant for "South
Park" (without health care benefits)

Can Obama change politics as usual?

RY CRAIG HARDI

President Barack Obama promised us change. More specifically, he promised us the end of "business as usual" in Washington. After years-of behind-closed-doors dealings and shrewd White House cover-ups, he told us we should expect our government to be transparent and accountable. He hoped to change the partisan culture of politics in Washington so that our government could operate more efficiently and more effectively for the American people.

In his first week in the White House, it appeared Obama was following through on his ambitious words. On his first day, he issued an executive order demanding that all executive employees of the United States government swear an oath of ethical behavior. This included a ban on accepting lobbyist gifts and on using the powers of their office to aid industries or employers with whom they have previously been involved.

Despite initial encouraging signs, Obama has unfortunately reverted to playing the political games he pledged to end. His now infamous nominee for Secretary for Health and Human Services, Tom Daschle, was the beginning of what has been a steady fall back to "business as usual" in Washington.

in Washington.

Daschle appears to have both evaded federal taxes and benefited (to the tune of about five million dollars) from his office's influence from lobby-ists. After initially defending his appointment of Daschle and overlooking the tax evasion scandal, Obama eventually was forced to recognize his mistake. Daschle withdrew his nomination to end the first political embarrassment of the new administration's short time in power.

The first major item on Obama's agenda has been the legislation of

The first major item on President Obama's agenda has been the legislation of a stimulus package aimed at giving economic relief to a nation badly in need of a lift. Unfortunately, getting the bill to his desk to sign has been more difficult than he would have hoped.

a stimulus package aimed at giving economic relief to a nation badly in need of a lift. Unfortunately, getting the bill to his desk to sign has proven more difficult than he would have

Obama set the tone for a more bipartisan government in meeting with and listening to the ideas of a number of Republican lawmakers. But, he then delegated to the Democratic leaders in the House (granted, it is their responsibility to make the law) the responsibility of writing the bill. This was his first major legislative action as president.

Unfortunately, Nancy Pelosi and her fellow Democrats in the House weren't paying attention when Obama promised an end the era of special interest projects and lobbyists who dominate lawmaking decisions in Washington.

In a bill intended to stimulate the economy-the single greatest problem we face as a nation-by giving government money to different sectors of the economy, special interest groups and local governments have somehow decided to make it about a series of smaller issues like improving roads and building new schools. Do I think those things would necessarily be a bad thing? No. But at the same time they represent an additional hurdle to achieving the bill's main purpose and serve as additional fodder for politicians to revert to their favorite pastime-haggling and accusing each other of being hypocrites.

So what has our new president done to speed up the process? Has

he reminded us that "we aren't red America and blue America, but we are the United States of America?" Has he called to mind our nation's motto "E pluribus unum"—"Out of many, one?" Has he emphasized the fact that we are all (or at least all should be) working towards the same goal?

Unfortunately, our president has chosen to take a page out of the Bush manual: namely, the politics of fear. He's used the words "I won" to legitimize his and his party's right to pass this bill regardless of what Republicans may think. In what amounted to an ultimatum, he demanded that the bill be on his desk to sign by February 16 and told us, "Failure to act, and act now, will turn a crisis into a catastrophe." This tactic did work in getting the Senate and the House to let us go to war in Iraq, after all.

If Barack Obama wants to bring real change to Washington, he's going to have to change the way he goes about getting things done as president. While he is saying the right things and reportedly expressing a genuine desire to work together with House and Senate Republicans as we move forward, his initial actions leave much to be desired for the idealists and hope mongers who represented a large chunk of his voting block last fall

I'm all for getting things done, but please, President Obama, get them done the way you said you would. Get them done the right way.

Craig Hardt is a member of the Class of 2012.

The triumph of the athleticist religion

Think for a moment about all those soccer matches, football games, tennis lessons, footraces, and gym classe that were part of our rearing. Recall the friends you made while playing, the post-game gatherings of local families, the silent aspirations to make the high school team as you took batting prac-tice in the basement of the school gym. Remember the rituals of half-time or anges and the superstitious shoe-tying before taking the field. Just for a minute, bring to the forefront of your mind the images-cheering for your siblings from the sidelines, hearing advice from your dad about how to perfect your throw, and reacquaint yourself with the inner adolescent arrogance telling you that going pro might be possible.

Was that ... religion?!!

Were the coaches priests? Were the pre-game pep-talks sermons? Was the playbook a holy text? Were we participating in the athleticist religion?

Wouldn't an alien comparing our rituals to those of an African tribe see our strange athletic formations, our chants and cheers, our body paints and uniforms, our hierarchies of honor and strict social conventions, and have to stall for a moment before making a qualitative distinction between wha we call sports and religion?

Has athleticism, and I include dance, the Outing Club, weightlifting, sailing, skiing, and aerobics here, replaced religion for some Bowdoin students? Some might be inclined to argue yes, it is getting to the point where athletic rites of passage—hitting a home run, biking without training wheels, —occupy a similar place in the human heart and imagination as sacred religious rituals and practices.

It is no secret that traditional religion suffered some serious blows to its pres tige when our parents' were coming of age in the 60s and 70s. Many of them retained their ancient faith, but because of decreased confidence in religion these traditions were transmitted to many Bowdoin students in a diluted That inherited religion found itself unable to respond to a few higher human needs for which a more robust religiosity had previously provided There is no strict either-or here, but it is my argument that the astonishing spike in athletic participation over the past 25 years reveals a slight rechanneling of the religious urge. American culture has a proud tradition of giving birth to fine athletes. What's new is the procreation of athleticists-those whose primary source of psychic comfort, community, and structure in their lives is sports. Let me clarify.

tress arising from conflicting desires, hard decisions, the death of loved ones, and the gap between aspiration and achievement could no longer find solace in the predictability and transcendence of liturgical experience, an in-tense workout could release the tension that built up during the day.

When the desire for community no longer found its gratification in Church ice-cream socials, religious retreats, or studying talmud, the weekends were instead occupied by team bonfires, travel soccer matches, and attending ional sporting events.

When the need for structure no longer found its haven in devout davening, lat, or mass, it intensified the athleticist's religious dedication to the rigid regimentation of competitive sports.

Growing up in our athletocentric

are, it is hard to appreciate the novelty of these transformations. Yet, when looking at our time in perspective, anthropologists, historians, theologians, and sociologists might call our time, "the age of athleticism." We should remember-the NBA was not founded until 1946, Super Bowl I was not until 1967, Women's Title IX did not come until 1972, and, in America, lacrosse and soccer have only recently enjoyed bursts of popularity. The rise of professional sports, decline of religiosity in certain parts of society, the increasing importance of athletics in college admissions, and a turn towards athletic victory as the goal unifying some of our cultures, schools, and communities have all contributed to what I call the triumph of athleticist religion.

Shall we welcome of resist or welcome this development? It does seem to have me advantages—perhaps the spread of this athletic religion could usher in an age of peace where people could discharge an 'urge to dominate' through sports instead of international war.

Also, the sports we've come to love are cultural creations that provide that Durkheimian 'collective effervescence' -those Bowdoin-Colby games promote a campus unity missing throughout the rest of the week.

Finally, with the disturbing and incomparable obesity epidemic in America, it would be hard to protest any kind of physical activity, wouldn't it? This school, with its athleticist ves-tiges, is absolutely unrepresentative of a country where supposedly 65 percent of people are overweight.

If you look around you will see unusually healthy, vibrant, and muscular men and women. The more I think about it, the more shocked I am at how fit and trim the students are here. Students here are not merely lean-they

Yet-the disadvantages loom large The legacy of our favorite sports heroes cannot quite match up to the lore of biblical narratives. Weekly sporting matches lack the sacredness and mystical intrigue of a genuine Sabbath.
Pre-game speeches don't have the theocal and historical insight of a High Holiday sermon. The exhilarations of a midnight workout with an iPod do not provide the perennial thrills of engaging the great mystery of religious inquiry. Growing up near Chicago in the '90s, I can say that those who deified Michael Jordan never had the same depth and gravitas as those enraptured by God.

There is no doubt that the new sci-

entific atheism, the belief that religious extremism is responsible for much violence, and the emergence of an anti-re-ligious postmodern literary canon has removed religion from our Bowdoin public square for the time being. It makes sense to look for cultural goal that can give a fragmented, specialized, and glued-to-the-screen college environment some coherence.

Athletics are here to stay, but athleticist religion won't work-it does not call forth the full range of artistic prodigy, spirituality, intellectuality, and civic engagement that have always been the source of Bowdoin's greatness.

Perhaps someday, a new Constan-tine will call for our conversion or a new Judean revolt will challenge our authority, but for now, it is 100 CE and Bowdoin remains a Rome of athleticist prowess searching for a goal that can non forth the kind of genius that will allow us to compete with the cultural excellence and unity of the Greeks.

I think we can genuinely celebrate the dedication, focus, and discipline cultivated by athleticist religion while working to direct those very virtues towards the noblest endeavors that can strengthen our community.

During a high school cross-country practice, on a dog day in early September, when teammates were huffing, sweating, wheezing, cringing, or even vomiting after mile five of the dreaded "mile-repeats," my coach would often repeat a somewhat corny quote from Prefontaine's coach at Oregon and Nike forerunner, Bill Bowerman:

"Running, one might say, is basically an absurd pastime upon which to be exhausting ourselves. But if you can find meaning in the type of running you need to do to stay on this team chances are you'll be able to find meaning in that other absurd pastime...life."

For the sake of Bowdoin, I hope he's

Pantsuits not every senior's strong suit

CIVILIZED LIFE

BY ANNIE MONJAR COLUMNIST

Since the first few months of my sophomore year, when upperclass friends began their search for jobs, I've harbored certain anxieties about my own senior year process, wherein I begin to shape my future self.

I came down to breakfast one morning to find track friends, whom I never w dressed in anything other than Nike Frees and Levis, buttoned up and pol-ished in Hugo Boss blazers or Ann Taylor skirt suits, always looking uncom fortable, nervous, and self-conscious.

Career planning at a private, selec-tive liberal arts college is full of self-consciousness. It involves self-analyzing, psychological and emotional probing and a constant sense that finding a job is about 10 percent what you want and 90 percent what everyone else wants.

Am I serving the "common good" by

interning at this firm? Can I earn this salary and still feel like my Bowdoin de gree is going to good use? Should I work at this position to refine and polish my résumé instead of doing what I actually want to this summer? By doing so, am I allowing my youthful liberty to fall victim to the iron capitalist bars choking American society?

I don't mean to take on a "woe to the young bourgeois and their inner turtone here, but I also don't want to suggest that any of these questions are silly and unworthy of consideration. Our role in the work force, our dream careers, and wanting to use our world class education to improve the world around us and ourselves-these are legitimate concerns. They're especially pertinent during a time like ours, when the work force is completely revamping itself, and everyone needs to question their position in the economy.

This past weekend, I opened the door to those career-planning anxieties. The question of my purpose and value in society has been hiking its way to my door since early in my college career-since birth, actually-and a few days ago, with volume and authority, the question knocked.

On my closet door, specifically,

You guessed it: I bought my first "job interview" pantsuit. With the possible of exception of orthodontia. I've never resented a purchase more in my life Freeport offers four pantsuits for your

consideration. Two have shoulder pads. One of the padless ones is out of stock. The padless, in-stock one is too expe sive, though I've been told it is dirt cheap in comparison to the pantsuits that real, professional businesswomen buy when they want to impress their superiors.

I once had a dream of looking great in a pantsuit. Looking confident, contemporary, articulate, and, above all, prepared to intellectually kick the asses of whatever sub-par job candidates were interviewed before or after me. I would be the prototype of a real, professional woman

But as I stood in my common room before a couple of friends, modeling stares confirmed what I felt in my spine, but what I thought was just a slightly off-center seam: I looked unnatural and uncomfortable. I didn't look contemporary: I looked constipated.

There is no doubt in my mind that I don't want this suit. But again, since when is job hunting about what we want? Does it matter if I feel like a clown when I'm obviously making an effort at appearing professional? The qualifications and experiences listed on our résumés rarely capture our best talents and abilities; the point is for those qualifications to fit someone else's standards, isn't it? Just because the pantsuit doesn't fit me, or isn't something I would ever want to wear myself, doesn't necessarily mean it won't work for my potential employer.

But we can only guess at—and cer-tainly can't control—what our employers think. Or our parents, peers, or teachers. We can't even necessarily convince ourselves that the steps we're taking to go down this long, winding road of profe sional life are the right ones. And, the truth is, there's no way to tell.

What we do always know, though, is what at least feels like the right step. What jumps off the pages of eBear, what our classmates have done that sounds exciting, what images flash in our minds when we dream about our future selves. We can know what we like, what we're good at, and what we have to offer

So a couple days ago, I made what felt like the right move. I tried on the skirt suit of a friend. I looked in the mirror, and felt much better, much more like a professional, confident candidate. So I borrowed it.

And on the way back from an interview that's now largely out of my hands, I took a bag out of the backseat of the car, went into to the outlet store, and returned the pantsuit. It's not me

Only government can offer long-term aid

BY MIKE WOLOVICK

Government exists for a very important reason: to look out for the common good. No other institution is capable of taking large-scale, concerted actions to further the collective interests of the people. And because reality is littered with non-zero-sum situations, "the people" will always have collective interests to further.

Only government can prevent the tragedy of the commons or correct externalities.

Only government can tax pollution regulate fisheries, enforce laws, build infrastructure, or finance basic (as opd to targeted) scientific research.

When government shrinks, so does its ability to protect the common

As a result, selfishness and its socioeconomic manifestations-income inequality, pollution, shortsighted decision making—proliferate, while things that are good for every-one—an educated populace, a clean environment, far-sighted decision making-decline, to the detriment of society as a whole.

One of the most important things which needs to change in America right now is the timescale on which we make our decisions. The impending depression (I am through using that euphemistic "recession" crap) has come upon us because of the shortterm thinking of corporate execu-tives and homeowners alike. Everyone wanted instant gratification, and thanks to the removal of government regulations, they got it. People chose

paths which gave great short-run benefits for the price of enormous long-run costs. Not surprisingly, this eventually led to disaster.

Yet despite the inevitably hor-rendous track record of short-term thinking, Republicans will not let it go. They continue to insist that the bailout package be only a shortterm boost, not a long-term fix. They fail to see that the current depression is the result of systemic problems going back decades, not a handful of bad mortgages. They fail to see that, just like in FDR's New Deal, bold action is required to stabilize the American economy-not ust for next year, but for generations to come.

BRUNSWICK, MAINE

THE NATION'S OLDEST CONTINUOUSLY PUBLISHED COLLEGE WEEKLY

'09 Council: Class short on funding

Senior class considers raising additional funds for Senior Week

For the third year in a row, the Senior Class Council will likely be forced to raise additional funds for Senior Week in May.

The exact amount remains undisclosed since the council is still calculating expenses. Last year's Senior Week cost approximately \$50,000; the current senior class has roughly \$20,000 at its disposal. The past two classes have charged up to \$60 per

Senior Class President Christian Adams said that while many seniors are irked, it's extremely difficult to save enough money for senior week without sacrificing other activities throughout the rest of the year.

Each Class Council gets \$15 per student per semester through junior year, and \$30 per student per semester senior year. The total ends up coming out to around \$14,000 each of the first three years and \$28,000 senior year.

The money that you get from each person in your class is enough-it doesn't need to be more,

TAKING THE STAGE: Anneka Nelson '11 delivers her monologue, "The Vagina Workshop," during Thursday night's premiere of "The Vagina Monologues."

Women monologue to end violence

CONTRIBUTOR

Eve Ensler's provocative show, "The Vagina Monologues," will make audiences laugh, cry, and think as it graces the stage of Kresge Auditorium tonight and tomorrow

Initially performed by Ensler in 1996, the show is made up of a number of monologues all relating to vaginas in one way or another-through sex, masturbation, birth, rape, menstruation, orgasm, or imaginative things it would wear or say. Ensler wrote the monologues after interviewing more than 200 women, and as a result, the

monologues represent experiences of women of different ethnicities, classes, interests, and sexualities.

worldwide organization that works to end violence against women. In-timately tied to "The Vagina Monologues," 10 percent of the proceeds from all shows go to V-Day and the remaining 90 percent go to a local organization which, at Bowdoin, is Sexual Assault Services of Midcoast Maine (SASMM).

"Every year there are different people on Bowdoin's campus. On top of that, there are only 290 seats in Kresge, so we have different people

coming," said Ashley Fischer '09, one of the four directors. "Most importantly, sexual assault and rape are isues that people should be concerned about. It is important to remember that rape doesn't only happen outside United States-it happens on Bowdoin's campus, too."

In the past, "The Vagina Mono-

as been criticized for potentially portraying men in a negative

"Many men are offended by 'The Vagina Monologues.' They think it's a criticism of them or that it's a man-

College keeps carbon pledge in hard times

In the midst of an economic crisis that has stocks sinking into the red, Bowdoin is continuing its pledge to go green

In a recent e-mail sent to all members of the Bowdoin community, President Barry Mills stated that the College will continue to strive toward its pledge to become carbon neutral as outlined by the American College & University Presidents Climate Commitment (ACUPCC), a nation-wide pledge signed by Mills in the spring of 2007.

"Are we going to back away from carbon neutral? No. All of the efforts that we've put into place, and continue to put into place, we'll continue to evaluate for their costs and for their efficacy for their ability to make us carbon neutral," said Mills in an interview with the Orient. "I don't see the current economic situation of the College affecting this at that time.

In order to help the school achieve its goal, Mills' Climate Commitment Advisory Committee (CCAC) is hosting a Sustainability Discussion on the College's Web site and sponsoring a Climate Matters contest. that runs until March 1. Both the discussion and the contest aim to compile ideas on how best to reduce

ECONOMY

Prompted by community input, College makes small-scale cuts

BY ALEX PORTER

In an effort to cut costs at the College last fall, the Bowdoin Treasurer's Office began seeking community input for money-sav ing ideas. After gathering nearly 40 suggestions from community mem-bers, some of these ideas are already making an impact on the way money is spent-or not spent-at

For instance, in response to one student's suggestion, the Dining Service no longer serves bottled water at catered events. Instead, the Dining Service fills carafes and pitchers with Aquahealth, according to Senior Vice President for Finance and Administration and Treasurer Katy Longley. According to Longley, thousands of water bottles have been saved by this process.

Bowdoin Student Government (BSG) President Sophia Seifert said that she has been pleased that student input has been considered.

"Throughout the process [of cut-

ting College costs], all of the committee members and officers of the College have been very attentive to student suggestions," she said.

As they have collected submissions, Longley and Director of Finance and Campus Services Del Wilson, who was also involved in the process, noticed that some suggested initiating programs already in use by the College. These included renting out summer housing to students and townspeople, investigating mailing costs, limiting the number of printed staff directories, and charging students for fire alarms not set off by a malfunction. Some of these programs have provided dramatic results.

"Over the past few years, we have reduced printing [of directories] by at least 50 percent," said Longley. She also said that "a maximum number of buildings [are kept] available" for summer rentals, while those not rented often undergo scheduled maintenance during the

Please see CUTS, page 2

31% of seniors taking fewer than 4 credits

Senioritis is real. Of the Class of 2009, only 69.4 percent are taking at least a four-credit load.

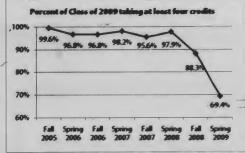

In comparison, 96.1 percent of juniors this spring are taking at least four courses, as are 99.1 percent of sophomores and 98.7 percent of first

Registrar Christine Cote said that seniors take a three-credit load for a variety of reasons.

"The reasons I tend to hear are, number one, they're working on their honors project, and they need time to do that," said Cote. "Number two, they're looking for a job, or maybe graduate school requires some time, too. Number three, they just have enough credits and don't need to take

In the fall semester, 11.7 percent of the Class of 2009 did not take at least four courses (honors projects and independent studies count as courses).

Bowdoin requires 32 credits for graduation. Passing a course is worth one credit, or half of a credit in the case of music, dance, and theater performance courses. Students can

ADAM KOMMEL THE ROWDOIN ORIENT

SENIOR SLUMP: While more than 95 percent of students in the Class of 2009 took at least four credits during their first six semesters, about a third of seniors this spring are not taking four credits.

count certain Advanced Placement or International Baccalaureate credits earned in high school toward their graduation, and thus not need to take four courses in all eight semesters.

According to Bowdoin's course catalog, "All students at Bowdoin are full-time students and, in order to make normal progress toward the degree, are expected to enroll in no fewer than four credits each semester."

Seniors who are taking three class

es generally said they felt their time could be better spent than on a fourth class. One senior said he wanted to enjoy his last semester at college without having to spend so much time working.

"Now is one of the last times I'll be together with my best friends," said

greenhouse gas (GHG) emissions at

"We chose to do a contest and discussion board because the committee wanted the process of coming up with a climate action plan to be an inclusive, whole-community project," said Brooks Winner '10, a member of the CCAC. "It could have just been decided by the administration or the administration and the ES [Environmental studies] Department, but... we wanted to get people involved and spread awareness amongst people in the Bowdoin community."

Environmental Studies Program Director and Associate Professor of Environmental Studies and Biology Phil Camill said the College would target areas that would have a large, immediate affect on sustainability at the College.

"What it means for us is that we need to find which options [for sustainability] are easy and which will have a big impact," said Camill, who is also a member of the CCAC. "Whatever options those are, we need to carry them out immediately,"

According to Camill, the CCAC has made it its goal for September to create a timeline for making the College completely carbon neutral. He estimates that such a process might reach its conclusion by 2050. If so, benchmarks will be put in place saying how far along in the process Bowdoin needs to be at 2020, 2030, and 2040.

Along with a number of other events the College will be sponsoring this semester in its "Polar Ex-

tremes" series, April 9 and 10 will be featured as the school's first-ever Climate Days. The two-day celebration will aim to bring the communities of Bowdoin and Brunswick into even greater awareness of the sustainability plans the College plans to enact over the next several years.

Climate Days will include a Climate Fair and Symposium on April 9 that will discuss the College's immediate plans for addressing sustainability over the next one to five years, and will also showcase five finalist entries from the Climate Matters contest. Members of the Bowdoin community will choose a "People's Choice" winner from one of the five entries while the CCAC will decide on the best overall idea for reducing the College's GHG emissions. Both winners will be announced on April 10.

Also on April 10, the College will host a Common Hour and panel discussion with environmental justice advocate and economic consultant Majora Carter to discuss Bowdoin's newly-proposed Climate Action plan.

CCAC member Maina Handmaker '11 said she thought Carter was an appropriate choice.

"We thought she would be a very inspiring and personable person to hear from," Handmaker said. "We didn't want the weekend to be teaching the same things that we already know about climate change but what new things we can learn about it."

The school's sustainability discussion and submission forms to the Climate Matters contest, as well as additional information about the "Polar Extremes" series and Climate Days, can all be found on the Bowdoin Web site.

our utility budget is electricity."

The results of electrical conser-

The results of electrical conservation have already had a positive effect, according to Wilson, who noted that "conservation efforts have made a difference."

The financial planners hope to continue finding opportunities for savings. To that effect, Longley keeps up with efforts made by other schools to cut costs.

According to an e-mail that Longley forwarded to the Orient, Williams College extended its holiday break for staff members by four days. By doing so, Longley said that Williams saved \$90,000.

Those interested in submitting proposals to the College can visit the Treasurer's Office Web site at www. bowdoin.edu/treasurer/forms/budget-suggestions.shtml.

Browled Suggestions

Great the control of the contr

SUGGESTIONS WELCOME: The Treasurer's Office has solicited cost-saving measures from the campus through the Bowdoin Web site. One suggestion included reducing bottled water on campus.

FUNDING CONTINUED FROM PAGE 1

in terms of class dues—but if you don't spend any of that money, almost literally any of it, then you'll have enough for senior week," Adams said.

"But people want programming, people want gifts. It adds up, and you have to ask for money," he added.

Senior expenditures have included events at Sea Dogs, a pub night, a hip hop concert, sweatshirts, and the Junior-Senior Ball.

"I'm happy with the events we've done. I don't think we've wasted money," Adams said.

While the Classes of 2007 and 2008 were in similar positions, and were similarly forced to charge a fee, younger classes appear to be scaling back expenses.

Junior Vice President Francis Huynh says his class has saved about \$13,000, and estimated the cost of senior week to total \$30,000. Huynh noted that, in addition to gifts and events, each Class Council must contribute up to \$2,000 to support Ivies Weekend. Class Councils are also responsible for smaller grants to campus organizations in need.

Sophomore Treasurer Kyle Dempsey reports having saved \$4,000 to \$5,000 from last year, and is even more optimistic about this year.

"We're in much better shape than all the past classes," said Dempsey. "Very, very much so."

Dempsey said that a class officer's connection to an apparel manufacturer saved the sophomore class between \$3,000 and \$4,000 on sweatpants alone. Still, Dempsey pointed out that the Class Council account balance lags a month or two behind actual spending, making it difficult for even the councils themselves to keep real-time tabs on their money.

"It's always kind of ebbing and flowing," he said. First Year Treasurer Emma Na-

First Year Treasurer Emma Na-, thaniel predicts a year-end surplus

MARGOT D. MILLER, THE BOWDOIN ORIEN

GEARING UP: The 2009 Class Council will likely have to raise funds for Senior Week activities. Typically, much of the funds given to class councils go toward class apparel and accessories.

of \$5,000. So far, the First Year Class Council has spent \$400 on a pub night, while anticipates spending \$600 on a semi-formal dance and \$6,000 on t-shirts.

Adams said the refocusing of funds is a trade-off.

"I think that's a choice you can make," he said. "You can try to get to the end and not have spent any money the rest of the time, but then you're left apking yourself, 'What did I provide, while you were here, instead of the, last, week before you left for good?" he said.

Nathaniel said she was aware of the risks. "We don't want to not do anything now because we're only worried about senior week," she said

Meanwhile, some students from all classes don't appear to have a good sense of where the money is going.

"I have no idea, what my class spends money on, except for class gifts," said Jessica Lian '09.

"At present I am completely unaware of any form or kind of expenditure by our Class Council," Alex Jacobs '12 said. "However, I would be greatly interested to learn what we're actually spending our money on."

That desire seems widespread, and the Class Councils appear to understand. The Sophomore and Junior Class Councils are both in the process of building Web sites to improve transparency, communication, and understanding of where students' money is going.

"It'll have an ongoing blog about what we're doing," explained Sophomore Class President Houston Kraft. "It'll have bios on us, bios on people in the class, pictures from the events that we do, and funds."

Adams, though, cautioned that a Web site might not be successful. As Sophomore President, he tried the same thing, but with little success.

"The only people at Bowdoin who care about student government are the people who are on student government," he said.

"It's a lot of money until you're dealing with a lot of people. It's amazing how that money doesn't go nearly as far as you think it might."

BSG considers spring speaker, discusses Credit/D/Fail policy

BY NICK DANIELS

With a number of its members busy rehearsing for "The Vagina Monologues," a depleted Bowdoin Student Government (BSG) discussed a potential campus speaker, the College's Credit/D/Fail grading option, and subsidized movie tickets on Wednesday evening.

More than one-third of the assembly was absent from the meeting, including BSG President Sophia Seifert '09. Vice President for BSG Affairs John Connolly '11 took up the role of Acting President, declaring that the meeting would be devoted solely to discussion. He invoked the BSG constitution as the reason behind this, explaining that the constitution prohibits the holding of votes if two-thirds of the government's membership is not present.

Ross Jacobs' 10 began the discussion during public comment time, with a bid to garner BSG backing to bring author and social critic Camille Paglia to campus.

"She is one of the most-contro-

"She is one of the most-controversial thinkers who is writing right now, and I am coming to you guys to see how we can make this happen," Jacobs said. "She is one of the biggest, most popular intellectuals in the country."

BSG Treasurer Ugo Egbunike '09 explained that if the College decided to host "a speaker like this, it would be a good idea to have the BSG stamp of approval."

Jacobs said that if a base amount of funding is secured from a source such as BSG, then the English, Gender and Women's Studies, and History departments might also contribute money toward Paglia.

"I am really interested in making this happen," he said. "She is one of the few thinkers who has found a way of reconciling academic seriousness with sexual liberation."

ousness with sexual liberation.

Jacobs added that if an agreement is reached, Paglia would likely speak on a Friday evening in April, possibly even during Ivies weekend.

"She is insane enough that she might be a great attraction at Ivies," he said. "She sees herself as some sort of Dionysian character; she certainly wouldn't protest the Ivies atmosphere."

Ivies atmosphere."

Class of 2010 Representative Rutledge Long was highly receptive of this idea.

"Give her a microphone and a loud speaker, and let her just rant," he said When asked how much it would cost to bring Paglia to the school, Jacobs said she asked "that we make her an offer resembling what we've given similar people."

we've given similar people."

Although most BSG members appeared receptive to the idea of Paglia coming to campus to give a lecture, negotiations stalled over how much money would be appropriate to offer.

Vice President for Academic Affairs Sam Dinning '09 said that although the body was behind the idea, it would be necessary to know who besides BSG would foot the bill.

"Before we do that, it is premature to talk about any precise numbers," he said.

Dinning also solicited opinions regarding the College's Credit Credit/D/Fail policy. Topics included whether the D portion of Credit/ D/Fail policy should even exist, and whether professors should know which students in a class have chosen the Credit/D/Fail option.

Long said the faculty just needed to come to terms with the Credit/ D/Fail policy, and that professors should be barred from knowing which grading policy their students select.

"We know that affects the relationship between the professor and the student, so they really should not know," he said.

To this, Dinning replied, "To play devil's advocate here, the main argument against Credit/D/Fail is that for classes that depend on group work, it is really tough when one person is slacking off."

At-Large Representative Nyle Usmani '12 said that there was still no solid argument for giving professors that information.

"Even if students do slack off, I can't see any benefits to professors knowing," he said.

In other business, Vice President for Facilities Mike Dooley '10 announced that the fund that provides Bowdoin students with subsidized movie tickets was dry.

He proposed that BSG should adjust its policy in order to break even on each ticket, rather than continue to abide by the current policy which incurs a two dollar loss on each ticket sold.

This suggestion embroiled the assembly until Connolly restored order by pointing out extra money

existing in other funds.
"I think we should just do a BSG
stimulus package, and continue to
subsidize tickets for students," he

Financial Aid filing instructions are now available for Bowdoin students seeking Financial Aid for the 2009-2010 academic year.

You may locate these instructions at http://www.bowdoin.edu/studentaid/enrolled/

The Financial Aid application deadline is April 15, 2009.

Attendance policy varies for each professor

ORIENT STAFF

Not showing up for class at Bowdoin gets you in more trouble with some professors than others. But despite the wide range of policies and practices at the College regarding attendance, students have expressed little demand in changing the policy, and the administration—citing other peer schools—has no plans to adopt a more uniform one in the near fiture.

According to Dean of Academic Affairs Cristle Collins Judd, her office does not propose any sort of guidelines regarding attendance policies and gives full control to professors to decide their own policies, based on their own preferences. She noted that this is generally common practice at other colleges and universities.

"In almost no peer schools would you see an overall rule regarding attendance," she said.

Judd said that while she leaves attendance decisions up to professors, she wants whatever they decide to be made very clear to students on the first day of class.

Judd also said that students share the responsibility regarding their attendance.

"We send out a reminder at the beginning of the semester that makes it clear that when students are going to miss they should tell their professors," she said.

Students indicated that they have had many different types of attendance policies, which vary according to the professor, class size and academic discipline.

"For certain departments it has usually been like three absences [before you] have some sort of grade reduction," John Lehman '10 said.

Lehman said that in his experience, English and German classes have been the two subjects that specified how many classes can be missed. "I think most students, even some of our majors, don't like reading a math book.

Students in general find it easier to get the material from the class. But in the
humanities and social sciences, those books aren't so bad."

BILL BARKER
PROFESSOR OF MATHEMATICS

Sean Kleier '09 felt that professors were generally more lax than the attendance policies they put forth at the beginning of the year.

"I've had professors say that [there is mandatory attendance] but if you e-mail them it's fine," he said.

First year Adam Matula said in his time at Bowdoin, he has found most that professors did not require attendance.

"I think it's probably good, I'm pretty old I think I can make that decision for myself," Matula said. Professors—like students them-

Professors—like students themselves—had different feelings about attendance.

Associate Professor of English and Chair of the English Department Elizabeth Muther felt very strongly that attendance was crucial for her classes and her department, and said that she thought that most of the professors in the English department maintain a strict policy.

"You can read a text in 1,000 different ways, so we can have a shared discussion," Muther said. "I'm counting on everyone to be there for that."

Professor of Mathematics Bill Barker, on the other hand, does not require attendance in his courses.

"I don't require attendance, in the sense that it doesn't have anything to do with grades," Barker said. "On the other hand, I think students should attend class, if the class is valuable."

Barker indicated that he does pass around a sheet for students to check-in just so that he can make sure that no student falls through the class. Barker said he thought that it might be easier for students to attend classes in mathematics than in other areas of study, particularly compared to the humanities.

"I think with mathematics as a whole we are building on the last class so attendance seems to not be a problem," he said. "I think most students, even some of our majors, don't like reading a math book. Students in general find it easier to get the material from the class. But in the humanities and social sciences, those books aren't so bad."

Some professors have other ways of ensuring attendance. Visiting Assistant Professor Olya Gayazova said she hands out reading quizzes in four random classes during the semester that count for 25 percent of each student's grade.

While Gayazova said the quizzes were mostly to make sure students did the reading, she said that "the positive externality is that they come [to class]."

All professors who spoke with the Orient said they had good class attendance.

Muther, who is in her 16th year at the College, said she felt students were more responsible about attendance now than when she first began teaching here.

she first began teaching here.

The professors also indicated that attendance rarely, if ever, comes up during departmental meetings and that most of the professors just decide for themselves what they are going to do.

"I've been here over 30 years and I can't remember talking about [attendance] in department meetings," said Barker. "I can't even remember talking to another faculty member about it."

SENIORS CONTINUED FROM PAGE 1

taking three classes.

"The big thing is the sailing team," said Pete Wadden '09, who is a cocaptain of the sailing team. "It takes up all my time."
Wadden said he has also used

Wadden said he has also used the extra time to study for the GRE, which he took last week.

which he took last week.

Some seniors are already looking ahead to after graduation.

"I feel like I'm ready to get into the work world, and although I love my classes, I don't feel like that's where my life is taking me," said Kate Krosschell '09. Senior Sara Griffin said that she is

taking three classes to put extra time into her honors project. "This semester is really heavy with

"This semester is really heavy with writing and pulling my ideas together," she said. "I'm doing more work than I did when I had four classes." Of course, the majority of seniors

this semester are taking four classes.

"There were four classes that

"There were four classes that sounded interesting, so I took four," said Chris Jacob '09.

Seniors taking four classes also cited the importance of making full use of both tuition and Bowdoin's resources.

"You're here," said Tom Cook '09.
"Might as well take advantage of it."
Dean of Student Affairs Tim Fos-

Dean of Student Affairs Tim Foster said that he recognized the extra pressure that students must deal with their senior year, but he urged seniors to consider taking four courses if they feel they can handle it.

"I have mixed feelings on the senior fall or spring three-course load," Foster said. "I understand some students use the extra time to prepare for life beyond Bowdoin, and that can be time well spent, but I don't like the fact that so many students see 32 credits as the finish line when in fact this is the minimum standard."

American Musicological Society rings from the Chapel

Judging from its modest placard in Bannister Hall, you may never guess that the American Musicological Society's (AMS) headquarters is located there.

The AMS, according to Executive Director Robert Judd, "is a membership organization for people who teach music history, music appreciation, or other disciplines related to music like that in humanistic discussion

The society's offices have been located in a small space in Bannister Hall in the chapel since the headquarters moved to Bowdoin in July 2006, the same month Judd's Cristle Collins Judd started working as Dean of Academic Affairs and as a professor in the Music department.

Judd, who has been the Executive Director of the AMS since 1996 and holds a Ph.D. in Musicology from Oxford, explained the general idea of the discipline.

"Musicology is the study of music as a humanist discipline, so it looks at music in its historical, so cial, or sociological perspective. It's a kind of umbrella term and so a lot of sub-disciplines can actually fall into musicology," he said, noting that music theory is one such subdiscipline. "Musicology is basically the study of music."

"I've taught in musicology departments here and there," said Judd, whose own musicology background is in 16th and 17th century keyboard music from Italy and Spain. While he said he spent the longest time teaching musicology and music theory at California State University Fresno, Judd also taught at the headquarters' previous location at the University of Pennsylvania.

Every year, the AMS holds a

"Musicology is the study of music as a humanist discipline, so it looks at music in its historical, social, or sociological perspective."

ROBERT JUDD **EXECUTIVE DIRECTOR OF THE AMERICAN** MUSICOLOGICAL SOCIETY

meeting for members in various cities around the country and publishes three issues of its "Journal of the American Musicological Society.'

According to Judd, "almost every college and university subscribes to the journal," which "tends to focus on western music tradition" and has been around for 50 years

The publication highlights writ-ing on topics that range "from medieval European music to 21stcentury global music," Judd said, But the core of musicology would be those famous classics, Bach, Beethoven, Mozart."

While the offices at Bowdoin do not oversee the production of the journal, the three people who work there daily, including Judd, are very involved in the planning of the annual meetings.

"A big part of what this office does is run the annual meeting of the society in the fall, " said Judd.

According to Judd, every year about 1,500 members meet in different places throughout the country. "It's a gathering of these people who just get together for three or four days and talk about the music that interests them, discussing topics that range from rap to ancient Greek music, really," he said.

At last year's meeting, held on November 6-9 in Nashville, Tenn., academics in the musicological discipline from across the country presented on a wide variety of topics. "Funk Drumming, Pulse

"Crystallography and the Structure of Z-Related Chords, and "Sounding the Virile Female: 'Redneck Woman' and the Gendered Politics of Class Rebellion," were among the titles of talks given

You get the idea of the breadth of the kind of scholarship we try to encourage," Judd said.

"It is a highly sought-after thing, so people want to present their research papers at the meeting. There [are] more people than there is space, so they fight for it, and we have a committee that evaluates proposals," Judd explained.

The annual members meeting and the publication of the journal are the "two main things" the AMS does, Judd said, but the AMS leads many other initiatives.

We have travel grants that have be administered, fellowships for graduate study, and prizes and awards," he said. "We also have to consider what is the best musicology book this year-that kind of stuff. The journal does review music books. We publish lists of new music books and stuff like that."

Judd characterized the AMS's relationship with the College as "a loose affiliation."

"The College supports us by granting us the facility, which is valuable of course," Judd said, "and the infrastructure, electronic access, phones, stuff like that."

Additionally, the College underwrites the employment of the society's secretary, and two students work at the office doing Web site maintenance as a part of work-

Beyond Associate Professor of Music Iim McCalla and Professor of Music Mary Hunter who both publish in the journal, the AMS does not hold any official academic ties to the College.

Nevertheless, Judd said that the

SOUND OF MUSIC: Executive Director of the American Musicological Society Robert Judd holds a Ph.D. in Musicology from Oxford University and has been the Executive Director of AMS since 1996

College's willingness to provide the AMS with a space on campus is indicative of its commitment to

'[The College does] certainly have a strong commitment to the arts and humanities [with] developing the museum recently, the new concert hall, [and] upgrades at the theater departments," Judd said. "All kinds of stuff is going on here at Bowdoin to support arts and humanities and this, could say, is one element of that. So it's a sign of a strong commitment to the liberal arts project, and that's valuable."

Judd said that besides the occasional curious e-mail about the society and infrequent queries from school students looking to see if they "have any information about Mozart," the College and the public do not generally pay the society much notice.

'We do have an awful lot of information about American music and music history in general," Judd said, "I'm always happy to talk with people, so certainly want to encourage anybody who's walking by to stop in and say hi."

When navigating new sexual terrain, let communication be your tour guide

MATTERS

BY JULIA BOND

As I hope most of you know, As I hope most of you know, Bowdoin is putting on the "Vagina Monologues" this week. This is my first year being in the "Vagina Monologues" and it's been a great experience. I've been hanging out with some amazing women, perfecting my old woman accent and, probably most importantly, thinking a lot

about vaginas.

In the "Vagina Monologues," each vagina is presented as some-body different. There are old vaginas, young vaginas, angry vaginas, cute vaginas, happy vaginas, and stinky vaginas, just to name a few

Though these vaginal personas are pretty funny when it's your friend talking on a stage, it's less funny when you want to get intimate with a new vagina and have no idea what to expect. Meeting a new vagina is sort of like being in a mysterious foreign country

What language do they speak here? Do any of the cultural customs I learned in my last foreign country apply here? Damn, I guess not.

Though the differences between vaginas seem more pronounced because women often require more stimulation and time to achieve orgasm, each penis is also its own individual with likes and dislikes. Something that used to produce an oh wow, that's nice" moan might now be producing an "oh wow, that's horrible" grunt, and there's no way to tell until you've committed the move

In addition to this practical challenge, there's this innate pressure in our society to be good at everything, especially sex. The way sex is portrayed in popular culture reinforces these ideas. People who are sexy and desirable can fall into bed together and, communicating only in subdued sexy grunts, achieve simultaneous earth-shattering climaxes. In reality, though, if you are in a novel foreign country, how are you supposed to find the opera house without a map or a GPS? You have to ask.

Communication during sexual

activity can be awkward, not only because it can be relatively explicit, but also because it's hard to admit that you're lost and out of ideas. I think a good first step is to put aside the notion of someone being "good in bed," or being "experienced." Yes, so-and-so may be experienced, but are they experienced with you? Instead of attributing bedroom skills to a person, what about the idea of a couple being good in bed together? A sexual relationship is like a group project; you both have to find the time to meet, you both have to have the same goals for the project, and you both have to figure out your own strengths and weaknesses. The only difference is that the quality of your work in bed is generally measured in decibels.

During a dinner conversation with a good friend the other day, we landed on the topic of how to have conversations about what you want in bed. It's a delicate balance between making sure that you assert what you want and making sure that you don't hurt anyone's feelings. My friend suggested turning the awkward process of explain-

ing what you want into a game. It's like show and tell, only R-rated, so don't invite any elementary schoolers. Tell me what you like and I'll tell you what I like. I like this idea because the reciprocal exchange of information emphasizes the fact that you're both trying to get familiar with each other. There may be pressure to be great in bed, but putting it out there beforehand that you both have particular likes and dislikes opens the door for more conversation about what those preferences might be. Also, don't be afraid to show your part-ner what you want. After all, some people are visual learners

If you aren't comfortable making your desires into a game, that's okay, but don't let that stop you from talking about them. Appreciating the fact that your body is unique and not like anyone else's is a part of embracing your sexuality. Your new partner may have been with one other person or 100 other people, but you are the only one who works the way you do. If you don't acknowledge and ask for what you want, no one else is going to do it, and that can lead to dissatisfying sexual experiences and frustration. Don't be embarrassed or ashamed if what your partner is doing doesn't do it for youjust speak up. Let's all collectively shelve the idea that people should naturally know what to do in bed. Instead, think of yourself as a tour guide. Except instead of showing people around campus, you are showing them around your body. And instead of being rewarded at the end of the tour with a bunch of annoying questions from overinvolved parents, you get to have a fabulous orgasm. Sounds like a sweet deal to me.

The Satorialist': Reclaiming the power of innovation for a

BY DAVID YEE

that will have them: Esquire and GQ for men, or Elle, Glamour, and Vogue for women, I'm skipping many, I'm sure, Sometimes confessions are neces-The advice that these magazines give is to move forward, so I will go often useful in some capacity, but it has its limits. I once got excited by a tag line for a GQ article that read something like, ahead and get this out of the way: I am not an innovator, at least not all of the time. Sure, there are times when I'll "Great outfits for under \$100!" It turned out that the article was suggesting indi-vidual pieces of clothing for under \$100, put an outfit together that no one else might think of (and, admittedly, somenot the whole outfit—useless. Magazines times with good reason), but there are also seem to have a bias for designer la-bels, probably because designer labels other times when I look for inspiration as fervently as everyone else. At such sponsor them. The reader's say in what times, images from magazines, newspapers, and news sites come to mind. the magazines present, then, is limited. Need more specific suggestions that month? Too bad. In all honesty, some of What was Colin Firth wearing in In Bruges, and why did it seem to fit his character so well? What was Michelle the best sections of Esquire have noth-Obama wearing on election night? ing to do with style and instead focus Was it from J. Crew? However, the age on humor, social commentary, fiction. Great stuff, but not style. of information offers more specific portals to sartorial thought.

The Internet offers a wealth of great

Seemingly from another age, we have the old vestiges of print media still offer-

ing fashion tips to the men and w

fashion ideas and tips. The blogosphere has become a space that empowers anyone to offer an opinion, and of course some of them are great, inventive, and insightful, while others fail on all fronts. But often times, style comes from those that practice it, not an overlord that approves or disapproves of individual wardrobe combinations. To this extent, even the worst style blog has something

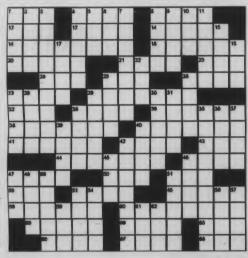

Last week. I was tired of the only two ways I knew how to tie a scarf. I could sit there on the side of my bed, inventing new ways to tease wool or silk into different shapes, or I could waste less time on my trivial endeavor by simply typing "how to tie a scarf" into Google Quickly, I found a great blog for guys (kinowear.com) that offered nine different ways to tie a scarf—one of them that I would have never thought of myself. For the record, this knot is the "fake knot," where one end of the scarf has a square knot tied into it and the other end is pulled through the knot; it's now my favorite way to tie a scarf. Try it. It's especially great for shorter scarv

One of the better-known style blogs on the Internet is "The Sartorialist" (thesartorialist.blogspot.com). Reviews of this site appear in various print media magazines across the world, and the site has been named as one of Time Magazine's Top 100 Design Influences. This blogger bases his fashion insight on pure, day-to-day observation. When he sees someone particularly sartoriallyinclined, he stops them, snaps a picture of them, and then posts the picture up on his blog for all to observe. Often, he lets the picture speak for itself.

He seems to source the pictures pri-marily from New York, Milan, and Paris, but the types of clothing are available anywhere. Currently, as it is winter in all of the aforementioned cities, the outfits showcase what is possible as far as coldweather fashion. Warmth is achieved not solely through sweatshirts and ski ing of many different articles of clothi combining many different patterns, tex tures, and colors to the functional end of temperature-related comfort. And we all know how I love me some layering. If I had to level one complaint against his choices, it's that he sometimes snaps pictures of people whose clothing clearly does not fit as it should, sometimes making the people appear a bit misshapen. A good eye should be able to spot it.

Altogether, what I love about the site the most is that, unlike fashion magazines or popular culture in general, these fashion blogs seem to de-emphasize the power of brand. Look at the pictures on the site, and you'd be hard-pressed to see an article of clothing directly attributable to Polo, J. Crew, or any of the like. The blog gives the power to innovate back to the person that wears the clothing, not to whoever designs it. It says that today's Internet brings inspiration, and a bit of freedom to "stick it to the man."

Scandalous comedy storms the stage in 'An Ideal Husband'

Sex, scandal, corruption, and laughter-Oscar Wilde's comedy "An Ideal Husband" has it all, and Masque and Gown plans on spicing it up this weekend with a modernized version of the 1895 play.

The play is directed by Sam Plattus '12, and includes a cast of nearly 20 actors and actresses.

"The play is supposed to be set in the 1890s when it was written, but we've set it in the 1920s," Plattus said. "It's a period of time that lends itself to that kind of comedy. I think, in a certain sense, the play is a kind of universal story in that at its core, it's about scandal and private lives leaking into public persona, and I don't think that has changed at all in the 110 years since the play was written.

At the heart of "An Ideal Husband" is Sir Rober Chiltern, played by Kevin Kowalko '12. An intriguing scandal mars his past, and he is forced to confront it amidst London high society

"One of the main characters is a politician who is haunted by a scan-dal from his past. It raises the question of how much someone should be judged by their past, and how much someone's private life matters to their public image," Plattus said.

"The title of the play is meant to be ironic because the character that is supposed to be ideal turns out to be far from it. His wife has built him up to be the perfect man and she has to

HOLY MATRIMONY: Members of Masque and Gown perform Oscar Wilde's 1895 comedy, "An Ideal Husband," Thursday night in Pickard Theater.

come to grips with the fact that while he is not as perfect as she expects him to be, and can't meet the standard that she holds him to, she still loves him and loves him despite all of his flaws," he added.

Despite the social issues the play

raises, "An Ideal Husband" is ultimately a comedy. While the plot conveys the idea that hypocrisy is widespread and that few entirely good people exist, the dialogue between the characters makes the play amusing and fun to watch-a bal-

ance that Wilde strikes well, according to Plattus.

"He writes plays in general that are comedic without being trite, and that can be hard to find at times," he said. "It's a very rich language without being so dense that it's impossible to

tor—so the language is attractive."

"The way Wilde wrote—it's a very specific vision of each of the plays he wrote, partly because he had a background as a novelist and partly because he was a little bit of a control freak," Plattus added.

Despite the specificity in Wilde's writing, Plattus says Masque and Gown's version of "An Ideal Husband" has a particularly Bowdoin

"It's a really fun show to do because there's so much room for playing with the script. There are some actors in this show with really great comedic instincts and it's been great just letting those instincts take them wherever they take them," he said "It's really important from very early on to let the actors find their own voice in whatever character they are playing. And to a certain extent me to find my own idea for all of the different facets of the play."

The play is the only comedy be ing produced by either Masque and Gown or the Theater and Dance department this semester, according to Plattus. Leading roles are filled by Kowalko, Emily Doyle '09, Brenna Nicely '10, Francesca Perkins '10, and Houston Kraft '11.

"An Ideal Husband" will be performed today and Saturday at 8 p.m. in Pickard Theater. Admission is \$1 for Bowdoin students, faculty, and staff, and \$3 for community mem-bers. Tickets are available at the Smith Union info desk or at the door

'Image' combines technology of the past with visions of today

While the current economic situation has forced many collegiate museums to grapple with their importance and endurance, the Bowdoin College Museum of Art continues to house exhibits that display the strength of the museum as an institution. From January 22-April 5, "The Image Wrought: Historical Photographs in the Digital Age" showcases the museum's ancient relics and enable viewers to examine the relationship between today's society and those of the past.

"The Image Wrought," an exhibit from the collection of the Harry Ransom Center at the University of Texas, examines the ways in which a growing number of contemporary photographers have chosen to revive early photo practices and techniques. In an era dominated by digital technology, the choice to revert to more manual and labor-intensive techniques reaffirms the hand of the artist in contemporary photography.

is return to past photographic traditions raises several questions. Primarily, it pushes the viewer to exne the relationship between the photographer and the photograph. More broadly, the exhibit pushes the viewer to examine the ways in which contemporary photographers view the past.

The exhibit fosters this exploration on various visual levels. "The Image Wrought" is composed of both historical and contemporary photo-graphs strategically hung to juxtapose the artistic process and the artistic artistic process and the artistic

PAST IN PRESENT: Artists created work in the latest exhibit at the Bowdoin College Museum of Art, "The Image Wrought," by using antiquated techniques.

intent of the photographers. The ex hibit chronologically examines the development of the nineteenth-century photographic processes as well as that of camera technology and the evolution of photographic decisions

Visiting Assistant Professor of Art

Lauren Kroiz found the exhibit especially engaging for her art history course "Photographic Invention." In addition to displaying beautiful objects, the exhibit provides an educa-tional experience, she said. The exhibit includes informative and engaging museum tags that explain the devel-

opments of the film process. More nportantly, however, Kroiz explains that there is a certain type of art-his-torical learning and understanding

that can only be grasped visually.
"It has been an invaluable resource for illustrating what exceptional works of art in a variety of photo-

she said of the exhibit, "You can't see or really understand what these processes mean if you've only seen reproductions in a slide or in a book.

Seeing these 19th century photographs beside the work of contempo rary photographers is a unique and provocative experience, according to

"[Exhibiting] contemporary artists who are using processes invented in the nineteenth century provides a riv-eting example of the way the history of art can be quite relevant in inform ing and inspiring the practice of art,

While "The Image Wrought" explores the relationship between the artist and the past, the questions it raises are not limited to the role of the artist. On every wall of the exhibit, the viewer is pushed to explore what it means to live in a contemporary world shaped by the hands of the

Bowdoin is hosting several lectures in conjunction with "The Image Wrought" Robin Kelsey, John L. Loeb Associate Professor of Humanities at Harvard University, is giving a talk titled "Victorian Social Matter: Julia Margaret Cameron's Photography" today at 4:30 p.m. in Searles 315. On Monday, photographer Keliy Anderson-Staley will speak at 7 p.m. in Searles 315 about "American Tintype Portraits."

"The Image Wrought" will be on display until April 5 in the Halford Gallery and the Bernard and Bar-bro Osher Gallery in the Walker Art

As harbingers of spring, brewery conjures 'magical' beers

THE BEER GEEK BY MACEVANS

If Willy Wonka really existed, he would not own a chocolate factory. Instead, he would run a large microbrewery in Burlington, Vermont, doing many of the magical things that he is told to do in legend, but with beer.

Magic Hat Brewing Company is, by all standards, a successful hippie brewing company. It is constantly creating one-time only brews, and provides infinite fan-submitted wisdom under each of its bottle caps (examples below). The art on the box of the Spring Fever Variety Pack is a half-bird/half-guitarist with a Mardi Gras mask and number nine pants-an appropriate mascot for any promotion for this brewery. The company Web site is a further exploration into what one can only imagine the beer factory is like, especially a beer factory with a purple-suited chocolatier in charge (although more accurately we are dealing with some one more like a bearded mad-hatter with sunglasses and a robe). The Web site will give more abstractions and details to their brews and-oh, my god, the bird/guitarist hatched from an egg and is playing Devendra Banhart at me. Let me get to the box:

Odd Notion Spring '09 "It's Crazy to be Lazy"

Odd Notion is the ever-changing seasonal beer released by Magic Hat and debuted with their 12-packs. We were treated to pre-prohibition and winter Odd Notion, and now is the spring variety—a classic European Pilsner flavored with agave

MARGOT D. MILLER, THE BOWDOIN ORIENT

POTENT POTIONS: Magic Hat Brewery Company creates unique beers for spring. Many of the brews in its current variety pack have hints of citrus flavors.

and poppy seed. It's very light and very drinkable, and has a nice smell and texture. The flavor is somewhere between the bitter pilsner, the sour agave, and the sweet poppy taste. This is a great beverage for shorts-weather Maine (40 degrees), when there's some sort of glimmering hope that the snow might melt before Ivies.

#9 "Great Beer is Quite Near"

I have already praised the sheer drinkability of #9 at the end of last semester, and as with any Magic Hat Variety Pack, #9 is present to hold down the fort. There is a balance of fruity apricot flavor (which makes it delicious to most taste-testers) and dry pale malt, combined with a spicy hop flavor that makes this beer easily

the best experiment to come out of the Magic Hat Brewery. Other breweries have tried to emulate the taste, but #9 is the father of this concoction and still has the best recipe around.

Circus Boy "Feed the Nation with Imagination"

The unfiltered cloudiness of Circus Boy is the Hefeweizen wheat beer in this motley crüe of beers. It has an herbal aroma to it, and clove is the most prominent. It has a lemony tang mixed with a bready, hoppy taste, which doesn't combine badly, but isn't that exciting either. So far, this is definitely the weak link; there are much better Hefeweizens out there, and Circus Boy could best be called a wheat beer. That being said, Magic Hat does not produce a terrible beer, and despite its drawbacks, Circus Boy is a nice addition to the variety pack.

HI.P.A. "Quaff with Care or poorly you'll Fare"

I'm not really a fan of India Pale Ales or very hoppy beers, but I'm going to try to put aside these normal grudges so as not to downgrade the highly-hopped I.P.A., Magic Hat's "Spring SeasonAle." The label features a woman's face under a very large headdress, and the initial review states that this beer is a blend of English and American hops and malts.

The recurring pattern of herbal spiciness and a lemony taste to the beer is present here, as well. It has a hoppy bite from the beginning of the sip to the aftertaste in the mouth. The taste in the mouth, however, is not as grainy or hoppy as the smell, and is surprisingly smooth. It has an almost grapefruit-like taste to it. From what I can tell, this a pretty well constructed I.P.A., and a well constructed beer; I don't regret starting this even though I don't really like hoppiness or I.P.A.s.

Magic Hat is going to have its annual Mardi Gras Parade next weekend, which will take over all of downtown Burlington. I believe the golden tickets have already all been found, but if you have that weird hippy friend at University of Vermont you want to visit, next week would be an interesting time to go.

In 'Tiger,' letters paint vivid image of India

THE BOOK
NOOK
BY FRANCES MILLIKEN
COLUMNIST

In general, there is a tendency to spruce up the truth. Events are embellished; colors are enhanced. In some respects, this is an element of story telling; a story needs a hook, a startling detail. But sometimes the brilliance of the scenery overshadows the impact of the bare details. Aesthetic beauty is used as salyation, as balm. This is not the case in Aravind Adiga's raw, scathing, and humorous portrait of India in his first novel, "The White Tiger."

Balram is our narrator. The book is framed in letters. He tells his story in detailed accounts addressed to the Premier of China who is scheduled to visit India. Though he begins his one-way correspondence with cordial—if sardonic—formality, Balram quickly slips into a chummy tone in his notes to the Premier.

He advocates an alliance of Eastern powers, ridicules the age of white invaders, and heralds the time that will irretrievably banish them into the past. Balram is garrulous and full of opinionated verve. He is sharp and appealing, but in no way a pitiable or endearing figure.

ing figure.

Through Balram, the reader is

educated in the social dynamics of India. He is born into "the Darkness," the scope of the country that lies well beyond the stretch of first world ideals and luxuries. His village is rural and is excluded not only from "civilized" comforts but also from the opportunity to aspire toward something more.

Adiga is unrestrained in his depictions of the squalor and hopelessness that sustains the lives of millions in India. Even loyalty becomes a commodity when the terms of survival are constantly shifting and a wife or family becomes a burden.

Balram is only one of many caught in the stagnant web of low class anonymity until he is arbitrarily chosen to work as a driver in Delhi. His employer, Ashok, is the son of the wealthy man who lords over the countryside that is Balram's home.

In the presence of his employer, Balram is exceptionally deferential. He is expected to limit all his human attributes except obedience. Balram quickly recognizes that even when a rich member of society makes a gesture of kindness, there is always an agenda.

Balram is neither a rundown nor a bitter character. He is lively and clever. His remarks are penetrating and steeped in unforgiving satire. Balram provokes astonishment and disgusted despair, but amid the various despicable events, there is no tone of entreaty. A mirror is held up to the reader. There is no specific accusation and thus no escape.

Balram is not cruel and his narrative reveals that he tries to abide by the terms of the system to get ahead. But his wages are embarrassingly small, and the indignities colossal. Those at the top are determined to stay there and the people on the bottom tiers are blithely eliminated from the equation when they begin to struggle.

Discovering that if he doesn't stay in his place he will plummet, Balram breaks, or at least shifts the balance. This occurs when he murders his employer.

Balram reveals this misdeed at the conclusion of the first chapter. From there Adiga expertly maneuvers flashbacks to reveal Balram's. history

history.

"The White Tiger" and, by association, India (and perhaps circumstances at large), does not conform to conventional theories of right and wrong.

If Balram is not a sympathetic character, he is at least one whose motives and needs are easily understood. Humans resist when they are fettered. Balram breaks free. Essentially, he is exonerated for the murder he commits.

Balram twists the system instead of abiding by it, and creates a more comfortable life for himself. One gets the feeling, however, that the cycle might just be repeating from an alternative origin.

Blue Room provides space for student and local artists

ANDY BERNARD STAFF WRITER

Until two years ago, the little room with a flower-print exterior perched on the second floor of Smith Union was merely an extension of the game room—seen but rarely used.

Now, it provides art. When the room was renovated two years ago, art railings were added in order to use the space as a gallery for student art or local artists.

"The room is not very large, so we do our best to display art that is lively and coloiful," said Bonnie Pardue, Administrative Coordinator of Information and Ticket sales and would-be curator of the Blue Room Gallery. "The room has art in it most of the year."

"The video games were in there but were taken out because students no longer used them," Pardue added. "We wanted the space to still be used for students, so we painted the room and put in the table to make it a space for students to enjoy."

In addition, the ceiling was taken down, which turned the room from a dark, enclosed space into a light, open one.

After the renovations, the room can rarely be found without two or three students in it; the Blue Room is a quiet spot in the Union, which is a rarity. Instead of housing unused video games, it provides a useful study space and a relaxing place in the center of campus, as well as a place for art.

The artist currently displaying work in the Blue Room Gallery is Maine native Stephen Soper. He enrolled in the Maine College of Art in 1994 to receive his BFA. Currently, Stephen spends time at Bowdoin working at Thorne Dining Hall as well as displaying his art. His exhibit in the Blue Room Gallery is called "Circles and Squared." While Soper was unable for comment, Pardue has been in contact with the artist.

"His exhibit is meant to show how [circles and squares] have influenced his work over the last decade," she said.

The exhibit is made up of 10 different pieces which all represent circles and squares in different ways. Although the exhibit is quite small, Soper-demonstrates his ability to use many techniques in his art—pointillism, collage, transparency, and still life are all present.

The 10 pieces include three medium sized paintings, six small paintings grouped together, and one large tiled piece in the center. All of the pieces surround the study table in the middle of the room—any student who has enjoyed studying in the Walker Art Museum will appreciate the atmosphere of the room.

Exhibits in the Blue Room Gallery display for one month, and Soper's will be there until February 28. Bowdoin students are welcome to display work in the gallery, and should contact Pardue.

MONOLOGUES

ONTINUED FROM PAGE 1

hating session," said Margie Cooper '10, who is acting in this year's production of the monolgues.

"Other feminists claim that it's not a play about men. In reality, it is a play that involves men—they are implicated in it—but only women's voices are heard," Cooper added.

"it's called 'The Vagina Monologues'—it's a play by women, for women. It's not saying that every man is a bad man, it's showing that these particular women had bad experiences with specific men," Fischer said.

Every year, V-Day spotlights a different region in the world. Ensler writes a specific monologue about the chosen location, and V-Day focuses resources and media attention on that spot.

This year's global spotlight is titled "Stop Raping Our Greatest Resource: Power to the Women and Girls of the Democratic Republic of Congo," calling attention to the rampant atrocities committed against women and girls in the eastern Congo.

In the Congo, rape is used as a systematic tactic of war, and thousands of women and girls are raped each year.

Many are raped so brutally that a hole called a fistula forms between the vaginal walls and the bladder or the rectum.

Ensler has highlighted Dr. Denis Mukwege, a man who has been repairing their broken bodies. He started as the sole doctor at Panzi Hospital performing these surgeries, and has since trained four others who, combined, perform 1,000 fistula repairs a year.

Through V-Day, Ensler is draw-

ing attention to the little-publicized genocide in the Congo, according to Fischer.

"The New York Times had never published a front page article on the Congo until this year. There is a mass genocide going on there and no one even knows about it. I'm really excited that V-Day is getting people talking," Fischer said.

In addition to "The Vagina Monologues," V-Day at Bowdoin has also been responsible for Take Back the Night, a march protesting rape and gender-based violence, and Speak, a collection of sexual experiences from Bowdoin students that will be available at the show.

According to Fischer, another show called "A Memory, a Monologue, a Rant, and a Prayer" might also be in the works. It would be much less formal than "The Vagina Monologues," but it has roles for men and encourages male participation, since people of both genders are inevitably affected by violence against women.

"If nothing else, go because the issues are important to your friends who are in it and that should be reason enough to go. If you see it and you hate it, then that's fine. But don't think that because the word 'vagina' is in the title that it is no way applicable to your life." Cooper said, addressing men who are uneasy about attending the show.

"It is important to your friends, so it should be important to you

too," Cooper added.
"The Vagina Monologues" will
be performed today and tomorrow
at 7:30 p.m. in Kresge Auditorium.
Admission to the show is \$5 and
tickets are available at the Smith
Union Info Desk. The show is open

WBOR 91.1 FM

DJs OF THE WEEK

Alison Pilon '09 and Kate Krosschell '09

If you could only listen to one album for the rest of your life, what would it be?

AP: I hardly ever like every single song on an album, but in the case of The Beatles' "Revolver," I was satisfied

start to finish.

KK: At the risk of becoming melancholic: "Boxer," by The National.

Favorite song to privately dance/rock

AP: "Tragedy" by the Bee Gees. There's a great karaoke version of it on YouTube that has helped me memorize the lyrics.

KK: CSS' "Move."

If you were in a band, what would it be called and what kind of music would you play?

AP: I can't imagine myself in a band, but since I have to answer, I'd sure love it if my hypothetical band could rival Racer X.

KK: We'd be called the Frenchies, and we'd play indie pop that hinges on dance and electronica

Theme song during lvies?

AP: If I were on campus, maybe "Bicycle Race" by Queen. But since I'll be at a track meet, "Eye Of The Tiger" by Survivor.

KK: The Teenagers' "Homecoming."

If you could meet any musician, dead or alive, who would it be and why?

or alive, who would it be and why?

AP: I would like to meet the members of ABBA so that I could ask them

what the hell they were thinking.

KK: I'd love to talk with Daft
Punk...without their helmets!

Best new music you've heard lately?

AP: MGMT, specifically the song

"Electric Feel."

KK: Cut Copy's "In Ghost Colours"
has fantastic dance beats. Right now
I'm also loving Empire of the Sun, as
well as the Black Ghosts, Passion Pit,

and Glasvegas.

If you could time travel back to any musical period, where would you go

and why

AP: I went through a huge '80s pop music phase when I was 17, so I think I'd like to visit the '80s.

KK: The mid-'70s glam rock scene in London would be a hoot. Platform boots and glitter makeup never looked so good. Plus, Bowie was in his prime.

Bands/musicans who have most influenced your musical taste?

AP: Red Hot Chili Peppers, Coldplay, Guster, Dave Matthews Band, Joni Mitchell, The Beatles, and Colin Hay.

KK: Bloc Party, Wolf Parade, Modest Mouse, The New Pornographers, Arcade Fire, Sufjan Stevens, Rogue Wave, Silversun Pickups, and Stars.

"Playing What We're Thinking and Writing About in Music 131" with Alison and Kate airs Wednesdays from 11:30 am-1 pm. on WBOR 91.1 FM.

Women's hockey keeps streak alive at six wins

BY EMMA POWERS

The women's hockey team looks to win two home games this weekend and continue its spectacular streak after defeating Trinity 4-2 and 3-0 this past week.

With the wins against Trinity, the Polar Bears improve their overall record to 8-10-1 (7-8-1 NESCAC). Bowdoin's league ranking and play-off schedule will be contingent on other conference games to be played this weekend.

Katie Herter '12 scored twice in the first game against the Bantams, and Lindsay McNamara '09, Jill Campbell '11, and Dominique Lozzi '12 all netted goals for Bowdoin in the second game.

The most outstanding performer last weekend, however, was goaltender Sage Santangelo '12, who made 20 saves in the first game against Trinity and 23 saves in the second game. For her exceptional play, Santangelo was awarded NESCAC Player of the Week.

"It's a great honor, but I think that it's more reflective of how we have performed as a team recently," said Santangelo. "It has been this team that got us to this point, not an individual, so they deserve the credit."

Sage's teammates are supportive and excited about the NESCAC hono

"Sage had a great weekend and definitely deserved the honor of NE-SCAC Player of the Week...we are all incredibly excited for her and proud of her," Scooter Walsh '09 said.

The team was been energized by Santangelo's success and its recent

"I get really excited when I think about how well our team has been doing recently," Kendra Sweet '12 said. "It was evident since the beginning of the season that we are a talented team, and when everyone shows up prepared to play we can do great things on the icc."

The team will play Potsdam State in two games in Watson Arena this weekend, on Friday at 7 p.m. and Saturday at 2 p.m.

The Bears hope to continue their solid play as they close out the season and honor the seniors on Saturday.

"I think we are just looking to continue playing as we have been, and keep working on the little things in practice," Sweet said. The games will also be helpful in

The games will also be helpful in preparing for the NESCAC playoffs, if they receive a bid.

"We will look at the Potsdam games as a way to prepare for playoffs and continue to play at a high level and work on things that will help us succeed in playoffs," Santanrelo said.

DRILL, BABY, DRILL: Sophomore Katie Bergeron shoots a lay-up during the Bears' practice on Thursday.

Women's basketball seeded No. 1

BY JEREMY BERNFELD

Though the women's basketball team goes into the NESCAC playoffs this weekend as the top seed, the Polar Bears still have their work cut out for them in a quarterfinal match against Williams tomorrow afternoon.

"We're going to have to play hard for 40 minutes," said senior tri-captain Alexa Kaubris. "This is the time of year if you're not playing your absolute guts out, someone will steal a win from you and you're done. We can't take anything for granted and we can't dwell on our last game against them. Everyone is going to be looking to knock us off, so we're going to have to want it more than them."

After crushing Williams earlier in the regular season, the team has stressed focus during the playoffs.

"I think we just need to realize the magnitude of the game and realize that this could potentially be Williams' last game of the season," said senior tri-captain Maria Noucas. "They are going to give absolutely everything."

The Williams Ephs (8-16, 3-6 NESCAC) come to town as the No. 8 seed in the conference playoffs

looking for a monumental upset at No. 1 Bowdoin (23-1, 8-1). Williams will look to senior tri-captain Mika Peterson to spark the offense and junior Taylor Shea is always a threat to

Two weeks ago, in the team's only meeting of the regular season, Katie Bergeron '11 led the Polar Bears to a resounding 91-58 win at home over the Ephs. Bergeron tied the school record with six three-pointers.

"Their best player is a senior who has had a fantastic career," Noucas said. "So she is going to want to go out with an upset of Bowdoin. That being said, I think we feel great going into the game. We love playing Williams and we love beating them. We won't look past them because at this point in the season, every game is incredibly important."

Last weekend, the Polar Bears insured their spot at the top of the conference with two wins on the road. On Friday, Bowdoin beat Wesleyan 63-52 and also beat Connecticut College 76-59 on Saturday.

"We just have so many weapons," Noucas said. "It's very telling that we haven't had a NESCAC Player of the Week yet, but still finished first in the regular season in conference. Any one of us can come at you on any given night." Leah Rubega '10 paced Bowdoin in the win over Wesleyan, with 12 points and 15 rebounds. The Polar Bears finished with a 10-2 run in the game's final minutes to notch their sixth-straight victory.

sixth-straight victory.

First year guard Jill Henrikson led
Bowdoin with 19 points in Friday's
win over Connecticut College. With
under 10 minutes left in the game,
the teams were tied at 41 points. But
the Polar Bears ripped off a 13-2 run
over the next three minutes to pull
away from the Canlels, and finished
5-6 at the foul line in the final minute to insure the win.

"We've been on a roll lately not because we've been playing perfect basketball, but because we're playing as a team," Kaubris said. "We've been playing so hard each day in practice and pushing each other to be better."

The Polar Bears finished the regular season in the strongest fashion possible, and will look to win the NESCAC championship, their eighth in nine years, on their home court.

"I think everyone is just playing solid right now," said Noucas. "We're focused on the goal at hand and we're just really ready. It's a very exciting time of year for us."

Bowdoin's quarterfinal against Williams is at home tomorrow at

Men's b-ball to play Colby

BY DAVID SHAEFFER

Last Saturday afternoon in Morrell Gym, Bowdoin said farewell to a trio of seniors that will leave quite an impression on the basketball program. The 69 wins to their credit makes this gradualing class of Kyle Jackson, Tim Lane, and Darian Reid-Sturgis the second-most successful senior class in the history of Bowdoin men's basketball.

While emotions ran high, the Polar Bears were able to hold off Connecticut College, 56-51. With the win, the Polar Bears finished the regular season with a 16-8 record, going 5-4 in NESCAC play, Jackson made history in his final home game as a Polar Bear by reaching the 1,000 point mark. With a team-high 15 points, Jackson became only the 19th player in program history to reach that milestone.

The Camels held a 30-28 advantage at halftime. Shavar Bernier connected on all eight of his three-point attempts to give the Camels a slim advantage at the break. In a memorable second half that saw five tie scores and five lead changes, it was junior Mike Hauser that ultimately finished off the Camels.

Down by one, Hauser drew a foul driving to the basket. He made both freethrow attempts to put the Bears up for good, 51-50. The Polar Bears used their trademark defense and found timely free-throw shooting to solidify the win. Junior Paul Sellew described the game as a touching tribute to the three departing seniors.

"Senior night was obviously an emotional day, as the seniors said goodbye to our home court," Sellew said. "The three of them have been awesome on and off the court and obviously you want their senior nights to go perfect, which they did. In fact, KJ scored his 1,000th, Darien got a dunk, and Tim played awesome."

In addition to Jackson's 15, first year Will Hanley added 11 points off the bench while Lane grabbed 13 rebounds, including six offensive boards.

"It was something special to share that moment with my teammates, coaches, friends, and fellow senior captains," Reid-Sturgis said. "But what's more important is that after all the pre-game festivities the team buckled down and did what we usually do at home and came away with a hard-fought victory. Playing at Morrell Gymnasium has served as an incredible advantage this year and over the past few years as shown by our home-record."

With the victory on Sunday, the Bears finished with the No. 5 seed in this weekend's NESCAC Tournament. The Bears will travel to Colby to face the No. 4 seed Mules. The two teams are quite familiar with each other, having split the season series 1-1. The Polar Bears will look to utilize their inside advantage, while also keeping the Mules out of the lane.

"I think the difference in the game will be our ability to stop penetration and keeping our center, Mark Phillips, out of foul trouble," said Sellew. "If we contain their penetration, which hurt us in the previous two meetings, it will help to neutralize some of their offensive sets."

Tip-off against Colby is slated for 3 p.m. in Waterville on Saturday. Doors open an hour before, and tickets are free with a Bowdoin ID.

Women's track to host New England meet

BY ANNIE MONJAR STAFF WRITER

This weekend, the women's track team will welcome 25 of the most competitive Division III teams in New England to Farley Field House for the 2008 Division III New England Regional Championship.

Having had a chance to compete at Boston University's Valentine's Day Invitational last Friday and Saturday, the women have every reason to be optimistic about their performance this weekend.

The Valentine's Day Invitational always presents a new challenge to

Bowdoin each year, hosting many Division I and professional athletes, who come to race at Boston University's Track and Tennis Center, widely regarded as one of the country's fastest indoor tracks.

"The big open meets are a challenge to school team runners," said Coach Peter Slovenski. "The rhythm of an open meet is different . . . You have to find a new warm-up routine, and you have to be ready to run, with people you've never seen before and you'll never see again."

"BU is a really exciting meet to run at," said Dana Riker '10. "There are a lot of fast competitors and it's a great meet to set a personal record or drop your times and qualify for some bigger meets this season."

The Bears took advantage of the fast track and competitive atmosphere, too, with many strong performances. Among those included Ali Chase '09 and Jess Sokolow '09, who both set personal bests in the 800-meter run; Chase ran a time of 2:16.87, and Sokolow finished in 2:18.70.

Annie Monjar '09 was able to hit the provisional qualifying time for the NCAA Division III Championship in the 5,000-meter run with a

SETH WALDER, THE BOWDOIN ORIE

OPEN NET: First year Aaron O'Callahan attempts to score against Trinity last Saturday. However, he was unsuccessful, and the Polar Bears lost 3-0.

Men's hockey enters final weekend

BY ANDREW OTTON

The men's hockey team will play its final two league matches this weekend, looking for wins against St. Michaels

and Norwich.

Last week the team enjoyed limited

Success last weekend as it defeated the Wesleyan Cardinals 5-3 before falling to the Trinity Bantams in a hard-fought 3-0 loss.

Wesleyan started the game with a bang, scoring after only 16 seconds into the first period.

Bowdoin however, settled down and responded at 7:53 in the first. Ryan Blossom '10 redirected a pass from Mike Corbelle '10 to bring the Polar Bears even.

Bowdoin slipped behind once more in the second period as the team was made to pay for drawing a penalty. Only seconds after Kyle Hanson' 11 was sent to the box for hooking, Wesleyan scored with the man advantage.

Yet Bowdoin dominated the rest of

the period, netting three goals to close out the frame. Jordan Lalor '12 led the charge with a one-time strike at 9:40 and Graham Sisson '12 banged home a rebound in front of net at 16:01 following a shot from Colin MacCormack '10.

At 16:58 Blossom did some hard work to pick the puck up at half ice, beat two defenders, and finish sweetly over the goalie's shoulder. Although Wesleyan pulled a goal

Although Wesleyan pulled a goal back in the third period, the Bears had the last word at 19:33. Brendan Reich '11 put home a rebound shot from Blossom into the empty net.

Junior goalie Chris Rossi stopped 23 shots in the victory.

Reich, enjoying a break-out year, thought the team had a strong showing. "We played great," he said. "We did all the little things to perfection and out-

worked them."

On Saturday evening, the Polar Bears had their first loss in the Sidney J. Wat-

Despite taking 22 shots and hitting the post twice, the Bears were shut out for the second time this season.

The score remained deadlocked through the first period, but Trinity struck early in the second to pull ahead. Just as the Bears looked poised to pull level, the Bantams scored their second at 16:27 in the third period. Trinity iced the game with an empty-net goal with only four seconds remaining.

Netminder Richard Nerland '12 stopped 27 of 29 shots.

"One thing we've got to do a little bit better of is staying out of the penalty box," he added.

With only one weekend of regular season action left, Bowdoin sits sixth in the NESCAC standings. Still, Reich said he was optimistic about the playoffs.

"Our record doesn't show or isn't a good indicator of how well we're actually doing right now but I wouldn't want to be the team that has to play us in the first round," he said.

Tonight Bowdoin travels to St. Michael's in Vermont, and will face-off against Norwich on Saturday after-

Men's track competes at open meet in Boston

CONTRIBUTOR

The men's track and field team entered the Valentine's Day Invitational facing unfamiliar opponents. With the presence of Division I, II, and III schools and even post-collegiate runners, last Saturday's meet at Boston University gave the Polar Bears the highest level of competition they have faced this season.

Although the meet did not record any scores or rank teams according to their results, Bowdoin made quite an impression, with several athletes achieving personal bests.

"The team had a great day at BU. There were a lot of schools with a lot of talent and the Bowdoin men showed our fellow New England D-III competition that we mean business this year," said Ike Irby '09.

Senior co-captain Damon Hall-Jones set a personal best in the 200meter dash with a time of 22.46, barely missing the school record of 22.35 set by Brian Laurits '04. By running a 1:57.20, first year Brett Stein achieved a personal record in the 800-meter run.

The Polar Bears were especially impressive in the mile. Thompson Ogilvie '10 and Sam Frizell' '12 bested their personal records with times of 4:15.60 and 4:25.97, respectively, and Spencer Nietmani' 'Ti ran a season's best at 4:24.97.

Chris Martin '12 cleared 1.93 meters in the high jump to lead all Bowdoin performances in the field. Commenting on the impact that the high jumper has had, head coach Peter Slovenski said Martin "gives us a lot of strength in the front of the lineup. He has been both consistent and explosive in the big meets."

After gaining a major boost of confidence from the success of this meet, the Polar Bears are anxiously anticipating this weekend's New England D-III championship meet.

"The team looks really good going into the D-III's with all of our athletes getting ready to peak—we have not yet run our fastest," said Irby. "This week we will train faster and lighter to get ready to demolish our competition next weekend."

After finishing ninth in New England last season, Bowdoin is determined to finish among the top five this year.

"I think we're all very excited about the meet this weekend because we know we can be one of the top five teams in New England, maybe even in the top three if everyone competes like they have been all season," said co-captain Mike Krohn '09.

"Combined with our very strong jumpers, mid-distance and distance runners, I think the guys have been realizing that we can have an extremely impressive showing on Saturday, and are hoping to establish Bowdoin as a premier track school." Krohn added.

The Polar Bears will compete at the New England Division III Championships this Friday and Saturday at MIT.

TRACK

personal best of 17:08.91, also breaking the school record set in 2004.

"[Monjar] was on NCAA qualifying pace the whole way," Slovenski said of the 5K. "In the final five laps she maintained the pace, but you could tell it was painful. You have to be physically gifted, but also mentally tough to run the 5,000 meter."

The day's highlights also included first year Laura Peterson's performance in the long jump.

mance in the long jump.

Peterson finished seventh in a highly competitive field, and set a personal record of 17 feet, 8.75 inches.

In the throwing events, Kelsey Borner '09 and Shemeica Binns '09 both posted high finishes, with Binns finishing ninth overall in the shot put with a personal best of 41.5°, and Borner taking 11th In the weight throw, throwing 48°5.25°.

"It was really amazing to see Bowdoin athletes placing well in their heats at a meet where you are against some of the best D-I and D-III schools," Sokolow said. "It is good to have experience at a meet high in energy, and I think it will be really helpful this weekend."

The Bears, who posted a seventh place finish at the D-III New England Championship last year, are setting their sights higher this year, hoping to finish among the top three teams in the region. That the competition is on their home ground is all the more reason for the team to be confident.

"I think it is exciting for the women to be hosting D-III New Englands," said captain Alison Pilon '09. "It is a huge advantage to compete on our home turf, since we know this facility better than any other !team."

Slovenski agreed.

"A home meet involves a lot of work, but it's worth it," Slovenski said. "In past years when we've hosted, the team was able to do 5-10 points better than we hoped to do. Some great things can happen for the home team."

The D-III New England Regional Championship will begin Friday, February 20 at 4 p.m. with the pentathlon, and continue on Saturday the 21, with field events beginning at 11 a.m., and the first running events starting at 12 p.m.

against some of the best D-I and D-III schools," Sokolow said. "It is good to have experience at a meet high in starting at 12 p.m. cross fingers fight global warming.com

Led by Colman Hatton '10, Spencer Eusden '12 and Courtney Martin '09, the men's Nordic team placed ninth and the women placed 10th out of 13 teams at the Dartmouth Carnival in Hanover,

The Dartmouth course was the most challenging one the team has raced on this season, and Bowdoin suffered from several crashes during the race.

"The course was narrow, with steep and fast downhills on very fast icy snow, which can be very intimidating for athletes," coach Nathan Alsobrook said.

Last Friday, the women raced in a 5K classic event where Martin was the top Bowdoin finisher in 46th, followed by Erin Hatton '12 in 48th and Olivia Orr '12 in 54th. These three women have been consistently leading the Bowdoin

"It is nice to see them settle into a pretty stable pattern, especially the first years, because there is always a big learning curve," Alsobrook said.

The men's team competed in a 10K classic race where Hatton led the team with a 42nd place finish directly followed by Walt Shepard '10 in 43rd and

continues to take baby steps back from being sick throughout January," Alsobrook said.

On Saturday the women competed in a 10K freestyle event. In the event, Martin finished in 45th, Hatton in 50th, and Orr in 52nd. The men raced in a 15K freestyle event with a mass start. By finishing 30th, first year Eusden earned NCAA qualifying points in his race. Eusden had an exciting sprint finish with a few other competitors where he managed to maintain his standing

"He was quick, strong off the start e, and aggressive, for a young guy, in fighting for his position in the mass start." Alsobrook said.

Hatton finished after Eusden in 34th followed by Shepard in 36th. For the first time this year the top three men all finished in the 30s. The Dartmouth carnival always falls over Valentines Day weekend. As a tradition, skiers give valentines to people on other teams.

"Nobody takes themselves too seriously. Some creative valentines were given and received by our team," Alsobrook said.

The men's and women's Nordic teams will compete at the Middlebury carnival this weekend

Nordic places 9th, 10th | Basketball captain Jackson a quiet leader

CONTRIBUTOR

Score over 1,000 points for the Bowdoin men's basketball team? Check

It may not be on every senior's to-do list, but Kyle Jackson '09 did ATHLETE it anyway, becoming PROFILE just the 19th player in Bowdoin history to accomplish the feat.

'It's an accomplishment that I'm very proud of now and will probably be even more proud of down the road," said the soft-spoken senior tri-captain.

Basketball has always played an portant part in Jackson's life.

'My dad played basketball so he got me started playing around in the driveway when I was a young kid, he said. "It's always been something I've really enjoyed.'

At Bowdoin, Jackson says that basketball has taught him "how to balance time commitments," and helped him understand "the importance of a strong work ethic.

"Kyle is a great guy, he kind of took the younger guys under his wing," said teammate Justin Nowell '12. "He's a great leader. He knows when to get emotional and when to cheer a guy up when you're having a bad day. He's a great teammate, he really plays the whole game.

Men's basketball coach Tim Gilbride echoed Nowell's sentiments.

"Kyle is an outstanding person and basketball player who has been a pleasure to coach during his four years here at Bowdoin," Gilbride

"He is one of the smartest basketball players I have ever coached and always has a keen sense for what needs to be done in all situations," he added. "Kyle is a quiet and sincere person who leads primarily by example. However, he is a fierce com petitor who thrives on the big game and the big moment."

When asked what he'll miss most about his time at Bowdoin Jackson responded, "Definitely my team-mates. We're one of the smaller teams here so we hang out a lot and as a result, we've become very close.

lackson said that the highlight of his basketball career at Bowdoin as when the Polar Bears made the NCAA tournament last year.

We were all gathered around the

called... it was one of the best moments I've ever been a part of."

This season Jackson has guided Bowdoin to an impressive 16-8 (6-3 NESCAC) record, and he is preparing to face Colby in the quarterfinals the NESCAC tournament this weekend. Jackson said that Bowdoin has a good chance to make it deep into the tournament.

"I think we've definitely got a shot, it's a wide open field this year, nobody's unbeatable," he said.

Although Jackson remains focused on his upcoming game at Colby-it will be his final Bowdoin-Colby game-he is also preparing for life after Bowdoin, hopes to go on to a career in sports management.

Although Jackson has scored more points than all but 18 players in Bowdoin College history, he will be remembered as the quintessential

It's no wonder his best Bowdoin basketball memory wasn't scoring his 1,000th point, but the team's NCAA tourney berth last year-a moment of shared joy and excitement for the entire squad.

WOMEN'S ICE HOCKEY

Selig, Say Sorry

JEREMY IS BERNING

RY IFREMY RERNEELD COLUMNIST

Yes, this is another steroids column And no, I don't want the blame.

I know I'm the one who decided to write it and that I spent hours reading it over and fine-tuning every word. It's true that I thought of this article's subject and I've worked on its extended metaphor. And yes, this column is my space to say and do what I want, but I don't want to be held personally accountable the product that I put out on Friday

Just because I'm in charge doesn't mean I'm responsible, at least if you go by Major League Baseball's standards. So don't blame me.

Bud Selig, MLB's erstwhile commissioner, sits squarely in the middle of baseball's steroid controversy. Along with Barry Bond's bloated Mark McGwire's bloated ego, A-Rod's bizarre sense of truth and Roger Clemens' pin-pricked buttocks, Selig's absent-minded professor demeanor will become the symbol of baseball's biggest crisis since 1919. But the worst part is that none of them think that they're the story.

"I don't want to hear the commissioner turned a blind eye to this or he didn't care about it," Selig told Newsday. "That annoys the you-know-what out of me. You bet I'm sensitive to the criticism."

Well, Bud, time to develop a thick

shell. You've done a lot of good for the league in your 16 years as commissioner, including initiating rev enue sharing and the introduction of the wild card, and you've overseen an era of record growth for the game. But you really screwed the pooch on this one.

That record growth? Based on juice. You've overseen an era of juiced balls and juiced muscles and, with the help of the players union, sold more juice than your local Orange Julius. And now it's time to pay the price.

Apologize. There's no question that this whole mess is bigger than you and that the commissioner's office could never have prevented the introduction of steroids to baseball. But there's also no question that you, at the very least, turned a blind eye to the dangerous development that threatened to engulf the sport and has destroyed much of the sport's or and integrity.

The players and their union are every bit—if not more—responsible, that doesn't make you any less culpable. As CEOs of America's biggest financial and auto companies have been lambasted for the huge bonuses they took as their respective ships sunk, you should get your due. And don't forget, it doesn't look as if Mark McGwire will make baseball's Hall of Fame any time soon. Apologize now and five years after you retire you'll be drinking bubbly in Coo-

But have no fear. Amidst the biggest development in the steroid controversy, Yankees third-baseman and resident tabloid icon Alex Rodriguez's admission of using performance enhancing drugs, Selig has

pledged to wake up.
"Let's just say I'm going to monior that situation closely," Selig told

Newsday on Monday.

Really? Well thank goodness. You've done such a great job monitoring the Bonds/McGwire/Palmei-ro/Tejada/ "Insert baseball star here" situation that I have full confidence in your abilities to intelligently and fairly rectify baseball's steroid mess any day now

Not that it's your job or anything, thanks for going the extra mile. Are you going to bill overtime for watching A-Roid's press conference?

According to espn.com, as it became clearer that something extraordinary was happening to baseball's hitters, Selig consulted several baseball personalities to get their take on the matter. He cited Bob Melvin, current Arizona Diamondbacks manager, Atlanta Braves president John Schuerholz, and Yankees GM Brian

Cashman as proof.
"They all told me none of them it in the clubhouses and that their players never spoke about it," Selig said in the Newsday interview.

Well, folks, I've talked to my three roommates and they said that they want to hear my take on the steroids scandal. So if you're tired of hearing the constant moaning about steroids in baseball and were hoping for a column about the beginning of spring training, too bad.

It's not my fault.

OPINION

BOWDOIN ORIENT

Navigating the job market

It's the time of year when seniors are looking for post-grad employment and underclassmen are searching for summer jobs—and things look bleak. Students of the past may have relied on Bowdoin's name to land their dream job, but these days we're being rejected or having difficulty just finding enticing job openings. Many of us feel discouraged, disillusioned, or even desperate. It became apparent early last semester that getting a job in the finance world would be unlikely, but even students hoping to go into the public sector or the arts have grim prospects.

We're being told from all sides to be more creative and resourceful in our job searches. While it may be necessary to follow such advice to find employment, we should be cautious that we don't compromise our integrity in doing so. Some jobs may seem appealing simply because they have a straightforward application process. Although the numbers have not been released yet, it is apparent that Teach for America has been extremely successful in recruiting Bowdoin applicants this year. Even students who have little interest in teaching have applied to the program because they were courted and convinced that they should keep their options open. We should be wary of stepping into fields that we may not be prepared to enter.

Although seniors may be worried about generating an income, underclassmen might be more focused on gaining experience. Because most employers are strapped for cash, they may have more of an incentive to persuade you to take an unpaid internship. In some cases, they may even require that you pay a fee for one. While only some students have the resources to spend their summer this way, those who do should be prudent in making their decision. It is possible to find an employer who values our hard work enough to compensate us. We may just have to look in unexpected places.

Just because we're on our way to obtaining college degrees does not mean we must only take work that requires one. Being outside, doing physical labor, or working with people from different backgrounds than our own can be just as valuable as a prestigious internship. By choosing to pursue a liberal arts education, we've shown our willingness to engage in a variety of academic experiences. We should be no less willing to engage in a variety of work experiences.

No matter what financial obstacles we face in the future, we should remember that we already have something extremely valuable—our Bowdoin education. Many of us will still be paying for it years from now, but we'll never have to mortgage it. Whether or not our Bowdoin diploma opens up doors to the working world for us right away, we can look to it enrich our lives in the face of hardship.

LETTERS TO THE EDITOR

Hockey game heckling homophobic, classist

To the Editors:

Recently we have been disturbed by Bowdoin students' heckling at the opposing hockey teams. This heckling has been consistent in several games. They are often homophobic and classist.

It may be a different "f" word, but fairy is still a derogatory term for a homosexual, and screaming "emptynet goals are for fairies" is still offensive. We have yet to see a groin stretch not accompanied by a barrage of sexual comments. It appears that certain people have forgotten that opponents are still people and hockey games are for everyone, regardless of sexual orientation.

At the USM game a few weeks ago, students presumed a higher so-cioeconomic class, entitling them to taunt the USM team. After looking up the goalie's hometown, Lewiston, students began chanting "Go back to the ghetto." Seeing that his bottle was from Play It Again Sports, they screamed, "Hey goalie, did your helmet come from Play It Again too?" Since when was recycling shameful? Didn't we all buy our skates there

freshman year? The rest of the team didn't escape these elitist remarks, as students chanted "public school."

While we are all for getting rowdy at hockey games, taunts that attack individuals based on their sexual orientation, socioeconomic class, etc. have no place at Bowdoin and are an embarrassment to the community.

Sincerely, Millan AbiNader '10 Kate Walsh '10

Students, professors should take initiative

To the Editors

As a 1964 graduate and Brunswick resident, I'm saddened to read that some students haven't had the opportunity to engage informally with professors outside the classroom ("Connecting with professors", February 13, 2009). Such interactions should definitely be a part of every student's Bowdoin experience. In my day—yes, the "old" days—sharing dinner with several professors at the Zeta Psi house every Tuesday and Thursday night was a highlight. To students, I say: "Take the initiative. I'm guessing most professors would love more informal interactions with

students." To faculty, I say: "Take the initiative. Invite a student to dinner or whatever. Is every other duty really more important than getting to know your students?"

Sincerely,
David Treadwell '64
Brunswick, Maine

Steck's abroad op-ed was sensitive, relevant

To the Editors:

I am writing to let you know that I found the Opinion piece, "Lost in transition: Learning to live abroad" (written by Meredith Steck for the January 23 issue of the Orient) to be remarkably sensitive and relevant... all without using the hackneyed phrase "culture shock." I have lived and worked abroad for many years and have some understanding of the feelings Steck describes. The article has been forwarded to an American university student in Madrid and to a new Peace Corps Volunteer in Azerbaijan. I am sure they will recognize themselves in the piece and be better for it. Many thanks.

Sincerely, Mike Wood '64 Kansas City, Mo.

What bipartisanship means for America

RV FAMONN HART

It seems as though discussions of "partisanship" and "bipartisanship" are all the rage these days. From national political news programs to our own Bowdoin Orient, pundits of all stripes have entered the debate. Mired in all of this discussion, however, we may be losing track of the meaning of bipartisanship. In the words of Oscar Wilde: "Don't use big words; they mean so little." The media has been discussing bipartisanship constantly, but how often do we stop to think about its meaning? Considering the frequency of its use, probably not enough.

Reflexively, one might define bipartisanship as a condition where both parties support and/or author a given piece of legislation. This seems straightforward enough, until one considers the consequences of this logic. The electorate didn't vote for equal power-shaping. In 2006, voteers awarded the Democrats control of both the House of Representatives and the Senate. In 2008, voters expanded these majorities and put a Democrat in the White House. If the public is so desperate for bipartisanship, why does it keep putting Democrats in power?

Bipartisanship is a nice word for politicians to use, because it conjures in the public mind a notion of civility and respect. More civility and respect More civility and respect between individuals of different political views is desirable. A definition of bipartisanship as a condition where two parties can get along and have honest and open discussions about policy would suit America well. However, civility and respect do not demand equality of legislative power. Voters elected a set of leaders who subscribe to particular values as to how to run a country.

These leaders shouldn't be so quick to compromise on these principles in the name of bipartisanship. That wasn't what they were elected to do.

Making bipartisanship an end—not a means—can be a dangerous thing. Consider the stimulus
package that was signed into law
on Tuesday: while the bill is a step
in the right direction, it is not all it
could, or should, have been. A select
few Senators (Maine's own Olympia
Snowe and Susan Collins, Pennsylvania Republican Arlen Specter, and
Nebraska Democrat Ben Nelson)
removed important elements of
the bill, such as education funding, allegedly to make the bill less
expensive.

Even neglecting the fact that the point of a stimulus bill is to inject money into the economy, the cuts weren't fiscally sensible. If Senators wanted to make the bill cheaper without cutting provisions with actual stimulus potential, they could have eliminated the alternative minimum tax shelter. This is essentially a tax break for the wealthy, and whatever its merits, it isn't especially stimulating to the economy. Instead, politicians cut measures that wouldn't provoke outrage. As a result, the bill will do less to stimulate the economy, all for a desire to be bipartisan.

It is a basic principle of negotiation that one begins by arguing for one's ideal position, and negotiates down as necessary. Currently, the Democrats are in a position of great legislative power, but weaken themselves to appease a media obsessed with a flawed notion of bipartisanship. This will yield weaker legislation at a time when we cannot afford it. Democrats need to realize what they were elected to do, and then advocate strongly for their principles. Of course, given the 60-vote threshold that the GOP uses on virtually all major legislation, some compromise will be necessary. Nonetheless, Democrats should not back off their principles so easily in the name of bipartisanship.

Even when we disagree on principle, there is no reason to be uncivil. Though they are in the majority, Democrats should set an example by being open with their Republican colleagues and making good faith, principled arguments for their positions. Republicans should follow suit

That said, sometimes the parties have vehement philosophical differences, and nothing is accomplished by splitting the difference, particularly when the electorate has indicated a strong preference for the Democratic platform two election cycles in a row. Even Michael Steele, the newly elected chair of the Republican National Committee, recently stated that after the fiascos of the past eight years, the public has no reason to trust his party. While the GOP deserves respect and civility, it has to earn its way back to having an equal say in legislative matters, and a desire for bipartisanship shouldn't cause leaders to ignore popular mandate.

Living in a free country means that we are allowed to disagree. Recently, we have become afraid of this disagreement, instead choosing to seek an ideal that doesn't exist. This isn't a winning formula for public policy in America. Instead, it only causes us to put off debate and avoid making hard decisions. Civility and respect are important, but it is time that we stop subordinating the public good to a flawed notion of bipartisanship.

to a flawed notion of bipartisanship.

A government that promotes the common good only disserves it

ANNUIT COEPTIS BY STEVE ROBINSON

Last week an op-ed published in this very newspaper officially declared that the single function of government is to "promote the common good." When I read this I actu ally winced with pain. How could it be that anyone would assume the only purpose of our government is to look out for some vague ideal like "the common good?" I understand that government needs to play role in promoting the common defense, but how do you define the common good? Is ethanol good? Is bankrupting coal plants good? Is shutting down nuclear plants good? Is abortion good? Is subsidizing poor decision making good? Who gets to determine what contributes to the common good and what does not? Who among us hath the wisdom to guide us to the promise land of common goodness?

If one desires to find an example of a government that strived to promote a "common good" one might study the Holocaust, the internment of Japanese Americans during World War II, or prohibition. But, perhaps our elected officials can transcend the petty grievances of the common man in order to govern objectively.

However, the politicians who make our laws, and the bureaucrats that enforce them, will inevitably construe the common good around their own self interest. History supports me when I say that no man, be he a beggar or laborer, or even a savvy politician, has been gifted with some infallible logic that allows him to determine what the common good really is. And any candid observation of our government will reveal that the self-interest of our public servants, and what they purport as the common good, are actually the same thing.

So befuddled was I by the curi-

So befuddled was I by the curious suggestion that governments exist solely to promote an entirely subjective ideal that I consulted the document that created the United States: the Declaration of Independence. Here's what I found: "We hold these truths to be self-evident, that all men are created equal, that they are endowed by their Creator with certain unalienable Rights, that among these are Life, Liberty and the Pursuit of Happiness. — That to secure these rights, Governments are instituted among Men, deriving their

So it seems that the American government does not exist solely to promote the common good but instead it exists to protect our natural rights. But what exactly do our rights entail? Do we deserve something for nothing? Do we have a right to a home? Do we have a right to health insurance? These questions are hard to answer, but methinks the ole Declaration of Independence is a good place to start.

just powers from the consent of the governed..." Our forefathers thought the purpose of government was obvious.

So it seems that the American government does not exist solely to promote the common good but instead, it exists to protect our natural rights. But what exactly do our rights entail? Do we deserve something for nothing? Do we have a right to a home? Do we have a right to health insurance? These questions are hard to answer, but methinks the ole DOI is a good place to start.

Life. Every man, woman, and child has the right to live. That one is pretty cut and dry until you need to define when life begins.

Liberty. This is a bit more complex. It is based on the property of self-ownership. You own your body and you own the products of your labor. If you create something you are entitled to it. No one may take property from you without consent, nor may they hire another entity to take your property without your consent. In return you may not infringe on other people's liberty.

Lastly, is the pursuit, with empha-sis on pursuit, of happiness. Whereas some may believe that living in the United States entitles you to happiness, it would seem more prudent to admit that your citizenship grants you only the right to pursue happiness. It will not, nor can it, give you happiness. This means that the government must allow its citizens to make decisions on their own. If they make good decisions they will be rewarded by the free market; consequently, they will be punished for making bad decisions. The government can only create incentive schemes that encourage relatively good decision making (a tobacco tax for instance)

All these things can be accomplished with limited government. The alternative is our current bureaucracy that places far too much power in the hands of unelected men. It is safe to assume, then, that the bureaucrat's interests undoubtedly alter the resulting policy. The only way to prevent the interests of man from corrupting the government is through an extensive separation of power and a solid belief in the eternal nature of the constitution.

Lacking adequate separation of power, we are vulnerable to factional interests who have induced the government to promote their version of the common good, a process which unnecessarily expanded both the size and the cost of our government.

The solution is not small, or weak, government, but limited government

For too long the people of this great nation have been misled into believing the government can achieve that which is impossible. The government does not have the ability to make us all happy; it does not have the wisdom to promote the common good; and it cannot make us equal because we already are. We are equal in freedom and will never be equal in ability. Rather than look to the system as the root of our problems, we should be satisfied we are alive, free, and can still decide how we will pursue our own idea of happiness.

Make your major a life philosophy

BY MEREDITH STECK

Upon return from a summer studying beetles on Kent Island (the Bowdoin Scientific Station), I decided to become a biology major the fall of my senior year which meant taking organic chemistry, biostatistics, and a 300-level ecology course in one semester. No one could comprehend such insanity Even I had trouble articulating my motivations-mostly because my decision to add the major had very little to do with the scientific mate rial itself. Rather than devoting my studies to a body of information, decided to subscribe to the life philosophy of a field biologist. Who, then, are these field bi-

ologists? They are, above all, enthusiasts. While on Kent Island, I telephoned an entomologist to inquire about a bark beetle that was damaging white spruce trees. A very intimidated undergraduate, I had only to introduce myself and hesitantly pose my question when the expert was off on a breathless explanation of the bark beetle's life cycle and the dynamics of infestation. Then came the bombardment of questions. How many infested trees? How many beetles per tree? How long had the infestation lasted? Were larvae still present? I couldn't seem to scribble down all the information or compose my thoughts fast enough to satihis curiosity. A sudden silence fell, broken when the entomologist murmured reverently, "How about guys, huh? There are no more interesting creatures to study than beetles.

A field biologist's devotion to her study subject often extends beyond enthusiasm into genuine admiration. (An ornithologist once told me, "You are not unlike a bird, what with your affinity for languages and your ability to count beetle antennae segments." I consider it one of the highest compliments I have ever been paid.) True admiration of an organism endows field biologists with a cer tain relativism; they are able to jettison anthropogenic interpretation and become hypersensitive to the workings of the natural world. Go on a hike with great naturalist and you'll see! A naturalist's translation of the goings-on in an ecosystem is a multidimensional, multisensory experience-you become aware that communications between organisms are not only auditory and isual but also olfactory, tactile, and gustatory; that they occur in moments and over years; that they traverse both millimeters and kild meters. Acquiring this hypersensitivity allows you to do much more than take a particularly stimulating walk in the woods.

You will start to see beauty in the world where others cannot. And I do not necessarily mean the flashy red of a cardinal or the metallic iridescence of a Morpho butterfly. Beauty, to a field biologist, has very little to do with aesthetics.

little to do with aesthetics.

Last week in Winter Field Ecology, my friend and I stopped beside a large rock covered in a mosaic of lichens. "Oh, aren't they beautiful," she sighed blissfully. Lichens are a symbiotic association between a fungus and an alga and frankly, they look like something you might find in your fridge if you've forgotten to let it air out over winter break. But, I too, found the muddy green crusts on this rock to be quite beautiful... because the sight of them initiated a rush of glorious questions.

Why were there so many more species of lichen on this rock than on another only meter away? Why were these lichens so much larger? Why did this species appear deep green here but brown in a different location? Why do these orange fruiting bodies occur here but nowhere else? Beauty for a field biologist is defined by that rush. Spon-

If you are like me and your major switches weekly, think not about what you want to be but who you want to be.

taneous sparks start firing in your brain as you perceive how this very patch of lichen could give you answers as to how organisms choose their habitat and make their living within an ecosystem. Your heart begins to swell for that crustose lichen.

This sense of beauty need not only apply to scientific study; the field biologists that I met on Kent Island did not limit their enthusiasm to biology alone. Among the greatest memories of my summer was time spent talking non-science with scientists. The population biologist was transported by 19th-century literature, the developmental biologist inspired by banjo music and the community ecologist roused by political debate.

Many had undergone and were still undergoing career changes (from epidemiologist to nurse; from journalist to behavioral ecologist) but each one maintained that distinctive openness to the universe. They made fascinating conversation, fueled by perpetual wonder.

If you are like me and your major switches weekly, think not about what you want to be but who you want to be. Being a biology major does require learning about photosynthesis, the nitrogen cycle, and DNA replication, but a major can also leave you with a valuable life philosophy. Regardless of my future career, I will strive to live as a field biologist: an enthusiast unafraid to be moved by the world and the inundation of wondrous questions it unleashes.

'Hands-off' in Washington means long-term success

BY JOSE CESPEDES
AND ROBERT FLORES

Throughout the course of human events, mankind has been forced to confront extraordinary challenges and reaffirm values long considered fundamental to the human experience. Given the current economic climate, little thought is needed to recognize that at this moment in history Americans are at such a crossroads. Today, as in the past, there are loud clamors for a rejection of traditional American sensibilities.

Rather than embrace the economic policies that have put the United States and its people at the forefront of unprecedented prospetity and economic expansion these pseudo-socialist forces advocate a return to a bygone era of excessive government regulation. Such policy ideas are not new, but are nevertheless just as dangerous as they were during the 1970s. They put regulations before ingenuity, cultivate stagflation rather than prosperity, and trust bureaucrats more than the American people

To be sure the current economic situation is indeed urgent, but sacrificing long-held values so as to assuage the concerns of Congress or satisfy the incessant predictions of doom from the chattering classes in the media is not the answer. Mike Wolovick in his op-ed last week rightly pointed out that short-term thinking on the part of both homeowners and businesses was partly responsible for the current financial condition our nation is in.

But our agreements end there. Instead of looking beyond the immediate, short-term calls for big government regulation that passes for legitimate policy proposals in the halls of congress today, Wolovick and countless others have become a part of precisely the same mentality that threatens our nation's financial solvency. That is, the notion that present-day conditions should dictate long-term policy initiatives.

When Ayn Rand wrote, "Government 'help' to business is just
as disastrous as government persecution... the only way a government can be of service to national
prosperity is by keeping its hands
off," she was not referring to trillion-dollar bailouts and arbitrary
executive pay caps as a means of
keeping "its hands off." It's ironic
that although she passed away
years before Reagan's economic
policies bore fruit, she possesses a
far more profound understanding
of what values American economic policy are based on than some
of our current political leaders.

Much argument can and has taken place over the bailouts of big business. Though there is something to be said for letting bad companies that made bad decisions endure the consequences for their conduct, far more can be said against letting government grow so that it may be better equipped to handle both the current and future financial crises.

The entire point of American capitalism is that it allows the individual, not the government, to decide as freely as absolutely possible how and when to spend their money. To do so without restrictions placed upon them by Washington bureaucrats and to keep the rewards of such decisions with as little taxation as possible has long been a cornerstone of American capitalism.

To sacrifice such values for a brief sense of stability and justice ensures neither.

Jose Cespedes and Robert Flores are members of the Class of 2012.

WEEKLY CALENDAR

FEBRUARY 20-FEBRUARY 26

FRIDAY

COMMON HOUR

Anya Kamenetz

Kamenetz, who was nominated for a Pulitzer Prize by the Village Voice for her work on the series "Generation Debt: The New Economics of Being Young," will speak about her efforts to help today's young people manage their money.

Kresge Auditorium, Visual Arts Center. 12:30 p.m.

LECTURE

"Victorian Social Matter: Julia Margaret Cameron's Photography"

Robin Kelsey, Harvard's John L. Loeb Associate Professor of Humanities, will speak about famous portrait photographer Cameron. A reception will follow. Lecture: Room 315, Searles Hali. 4:30 p.m. Reception: Museum of Art. 5:30 p.m.

FILM

"Earth"

The Bowdoin Film Society and Residential Life will present this compilation of highlights from the BBC's hit series, "Planet Earth."

Smith Auditorium, Sills Hall. 7:30 p.m.

PLAY

"An Ideal Husband"

This show, directed by Sam Plattus '12, is an Oscar Wilde comedy about a couple's struggle with its moral standards. Tickets are \$1 with a Bowdoin ID. Pickard Theater, Memorial Hail. 8 p.m.

PERFORMANCE

"The Vagina Monologues"

This acclaimed play celebrates the vagina as a tool of female empowerment. Proceeds from the performance will go to local and national charities dedicated to stopping violence against women. Tickets are \$5 with a Bowdoin ID.

Kresge Auditorium, Visual Arts Center. 8 p.m.

SATURDAY

FILM

"The Great Debaters"

The Bowdoin Film Society will present this movie, which stars Denzel Washington as the debate coach at an all-black college.

Smith Auditorium, Sills Hall. 7:30 p.m.

PERFORMANCES

"The Vagina Monologues"
Kresqe Auditorium, Visual Arts Center. 8 p.m.

"An Ideal Husband"
Pickard Theater, Memorial Hail. 8 p.m.

DANCE

Ebony Ball

The African-American Society will sponsor this annual semiformal, featuring music by Bowdoin alumnus DJ Daryl '07. Moulton Union. 10 p.m. – 1 a.m.

PAWAT SERITRAKUL FOR THE BOWDOIN ORIEN

RISING FOG: Skeletal trees frame the Chapel and fog rises off the Quad during a brief period of warmth.

SUNDAY

LONGFELLOW DAYS

19th Century Chapel Service

This service, led by Rev. Brad Mitchell, will feature the Merrymeeting Singers, the Bowdoin Brass Ensemble, Moving Spirit Dancers, and organist Clarissa Brown in a celebration of global enlightenment.

Chapei. 3 p.m.

MONDAY

LECTURE

Keliy Anderson-Staley

Photographer and Maine native Anderson-Staley employs the wet plate process to produce her photographs. Room 315, Searles Science Building. 7 p.m.

TUESDAY

OFFICE HOUR

President Barry Mills Smith Union. 3 – 5 p.m.

WEDNESDAY

THE GREAT DEBATE

Latke vs. Hamentash

Hillel presents Dr. Larry Simon and Dr. Marilyn Reizbaum as they debate the merits of latke and hamentash. Lancaster Lounge, Moulton Union. 8 p.m.

THURSDAY

DIAV

"Miss Julie"

Mo Zhou '09 will direct this August Strindberg play about class, love, and the battle of the sexes in 19th century Sweden. The play details the life of an aristocratic family and its servants.

Libra Theater Studio, Memorial Hall. 7 p.m.

PRESENTATION

"Modern Changes in Arctic and Antarctic Environments"

Associate Professor of Physics Mark Battle and Associate Professor of Environmental Studies and Biology Phil Camill will speak as part of the series "Polar Extreme: Changes in a Warming World."

Smith Auditorium, Sills Hall. 7 p.m.

READING

Carey McHugh and Lytton Smith

Poets McHugh and Smith, the Poetry Society of America's 2008 New York Chapbook Fellows, will read selections from their work. The College will Webcast this event live on the Bowdoin Web site.

Main Lounge, Moulton Union. 7:30 p.m.

CONCER

Ursus Verses/BOKA

Bowdoin's coed a cappella groups will give their first joint performance of the spring semester, complete with dancing and brightly colored costumes.

Chapel. 7:30 p.m.

OCS receives 269 apps to study away

BY PIPER GROSSWENDT ORIENT STAFF

Monday's power outage was not the only unexpected setback for Off-Camus Study (OCS) this week. The office also had to attempt to realign the numbers of study abroad applications from the Class of 2011, since many more sophomores have indicated a desire to study abroad in the spring than in the fall.

Out of the total 269 applications the office received by the Monday deadline, 95 students applied to study away for the fall semester and 150 applied to go abroad in the spring semester—an imbalance of 55 applicants. Twenty-four students have applied to go abroad for the full academic year.

OCS Director Stephen Hall called the discrepancy "notable." In an e-mail sent Thursday to students wishing to go abroad in the spring of 2010, Hall and OCS Assistant Director Melissa Quinby explained that due to the inability of the College to accommodate such a dramatic change in student enrollment from semester to semester, a number of students would be selected to switch their ap-

plications to fall semester programs.

Hall had previously sent an e-mail on Wednesday morning to the spring semester applicants, asking for volunteers to switch to the fall semester, but no students responded. After the Thursday e-mail was sent, one student voluntarily switched.

"As we state on the application/petition, approval for the spring semester is based on academic reasons," Hall and Quinby wrote. "We are also taking into account other factors, such as program deadlines and the

College looks to gain funds allocated by stimulus plan

Bowdoin's funding proposals total \$10.3 million

BY NICK DAY ORIENT STAFF

Bowdoin can now be added to the list of institutions pursuing funds from the \$787 billion economic stimulus package signed on February 17 by President Barack Obama.

The College sent a letter to Maine Governor John Baldacci's office, looking to receive state funds for "shovel-ready" construction projects in Brunswick and "green initiatives" around campus, according to Senior Vice President for Finance and Administration and Treasurer Katy Longley.

The College's list of projects totaled \$10.3 million. Of that amount, the College estimated that \$6.675 million were "shovel-ready" infrastructure projects ready to begin immediately, with the other \$3.625 million proposed for "green initiatives."

Longley said it was too early to tell whether Bowdoin will qualify for the stimulus funds.

"It is unclear whether Bowdoin would qualify for any of the funds for any stimulus package funding for construction projects," Longley said. "But we do stand ready to commence these projects if funding becomes available."

The proposed infrastructure

projects include replacing the storm water drain at the intersection of College Street and Park Row, rerouting traffic flow and improving safety at the intersection of Bath Road and Maine Street, replacing 4,200 linear feet of aged and leaking steamlines, and designing and installing a co-generation facility in the central heating plant. The College has-offered to work with the Town of Brunswick on both the Park Row storm water drain project, as well as the Bath Road/Maine Street intersection project.

Bowdoin's "green initiatives," a list of eight projects, includes replacing 384 windows in Coles Tower and 115 windows at Hawthorne-Longfellow Library with energy-efficient windows, as well as installing solar panels on the south face of the Farley Field House roof.

Senior Vice President for Planning and Development and Secretary of the College Bill Torrey said he thought the "odds were pretty long" that Bowdoin would see a large amount of the stimulus funds.

"Where do we fall in the pecking order? If they need a boiler at the University of Maine and a boiler here, they're more likely to get one up there," Torrey said.

State Rep. Charlie Priest, whose district includes a large portion of Bowdoin's campus, said that the

Speed-enhancing LZR suits rip through pool at NESCACs

BY SETH WALDER

Amid the constant cheers and splashing of water, murmurs surrounding controversial swimsuits could be heard all around the Women's NESCAC Swimming and Diving Championship Meet last weekend at Bowdoin. The two suits, the LZR made by Speedo and the Nero Compmade by Bluessventy, are thick and increase the buoyancy of the swimmer, thus making it easier for them to cut through the water.

"If the question is, 'Do they help?'
The answer is, 'Yes, they do,'" said
Director of Athletics Jeff Ward, who
once coached the swim team at Columbia University.

The suits, which both made their first appearances in the NESCAC this season, were always bound to raise conversation, but became controversial when the disparity between what teams were wearing became apparent.

"We had heard a couple of the teams in the conference would have more suits than others," said Coach Brad Burnham. "I guess I wasn't expecting any teams to all be wearing suits."

Burnham said that the entire Williams team wore LZR's, Amherst had many suits, a mix of LZRs and Blueseventys, and Middlebury and Tufts had a good amount of the suits as

"It's not a level playing field by any means," Burnham said.

The suits are expensive, running at about \$400 each.

"Four hundred dollars for 20 to 25 athletes is a lot of money," said Burnham.

In addition to their price, the suits are fragile and are not designed to last beyond just a couple of races. "They were ripping apart," said Al-

"They were ripping apart," said Allison Palmer '11. "Teams were asking for clear nail polish. If you patch [them] with nail polish it keeps the rip from becoming worse."

For the most part, Burnham felt that the suits did not influence who

Record numbers apply to College Houses

BY ANYA COHEN

Residential Life received a record-breaking number of applications for College Houses on Tuesday. Three hundred students will vie for 197 available spots in the eight houses, compared to 218 students who competed for those spots last year.

The applicant pool for 2009-2010 comprises 272 rising sophomores and 28 rising juniors and seniors. College Houses contain a total of 205 beds, eight of which are reserved for house proctors.

Associate Director of Residential Life Erica Ostermann said that receiving applications from more than half of the Class of 2012 is "awesome" and a "testament to the strength of the people living in the houses this year doing so much work, working with their affiliates."

Inter-house Council (IHC) President Lindsey Bruett '09 wrote in an e-mail to the Orient that "on the whole, the houses have been

STIMULUS CONTINUED FROM PAGE 1

negotiations in the State Legislature were still "very preliminary."

Priest said that because of the closing of the Brunswick Naval Air Station (BNAS) in 2011, he and other representatives from the Mid-Coast area were making the case that the Brunswick area needed funds from the state.

"But the problem is the base hasn't closed yet, and this is money which is going to be spent immediately," Priest said.

Priest said.
"There are a lot of other places that have been hit by the downturn in Maine, like Washington County" in the easternmost part of the state, Priest added. "So they will certainly make a strong argument as well."

In an e-mail to the Orient, Brunswick Acting Town Manager Gary Brown wrote that the town was pursuing state money for education, rail service from Portland to Brunswick, expansion and repairs to the Central Fire Station, and infrastructure work, among other projects.

Plans for the infrastructure projects, Brown wrote, were either "close to being ready" or "will be ready in the near future," depending on the specific project.

FACULTY GRANTS

Another aspect of President Obama's stimulus bill includes \$3 billion allocated to the National Science Foundation (NSF) and \$10.4 billion to the National Institutes of Health (NIH), organizations that give grants to a number of Bowdoin professors every year.

Dean of Academic Affairs Cristle Collins Judd said she recently met with professors who currently have grants to discuss the implications of the newly available funds. Judd said she was optimistic about the funds trickling down to Bowdoin professors.

"It probably means that those currently with grants will be able to get an extension to their current grant, particularly if it will support a postdoctoral fellow, or a lab technician—in other words, that part of the stimulus that is about employment opportunities," Judd said.

Judd said she saw the NSF, in particular, as an organization that "is much broader in terms of basic research, and there are some particular places where the primarily undergraduate institutions may be able to carve out a niche."

However, Judd said she was cautious about overextending resources in order to accommodate the shortterm stimulus funds.

"We have to be careful that what we do creates enhancement for the academic program that doesn't create a long-term obligation that we can't meet," she said. "We wouldn't add a new tenure track faculty line unless I somehow knew how I would fund that beyond the period of the stimulus bill."

Director of the Bowdoin Scientific Station of Kent Island Damon Gannon said he had planned to apply for a grant from the NSF even before talk of a stimulus package surfaced Proposed Infrastructure Fin | 10

BSG subsidizes movie tickets, brainstorms ResLife questions

BY NICK DANIELS ORIENT STAFF

Bowdoin Student Government (BSG) met Wednesday to vote on a funding request for subsidized movie tickets, which was approved, and to address budget and housing questions.

dress budget and housing questions.
BSG originally budgeted \$1,100 for subsidized tickets, but that fund ran dry earlier this month due to the popularity of the program.

Vice President for Facilities Mike Dooley '10 announced a funding proposal that would allow BSG to continue subsidizing movie tickets to students.

"We are not raising prices because everyone thought that would be a bad idea," Dooley said. "Though we have gone through the allocated amount, [we were] alerted to some extra funding in the budget."

Vice President for BSG Affairs John Connolly '11 explained that the extra money came from several sources.

"Our facilities charges for meeting setup has been down, since we have no longer [been meeting in Daggett Lounge], and have been setting up for ourselves," he said. "We are also no longer paying a Webmaster; we allocated \$800 for that."

Connolly said that since BSG saved in these areas as well as others, "we still have some money left in the programming budget."

The body voted unanimously in

favor of the funding proposal, which allocates an additional \$700 for the purchase of movie tickets.

BSG Treasurer Ugo Egbunike '09 reported that the Student Activities Funding Committee (SAFC) was financially well-positioned, and that the committee was working to make its system more efficient. He said that campus organizations had requested around \$500,000 for their operating budgets and that SAFC doled out nearly \$400,000.

"I would say that this is pretty on par with last year," he said. "Our goal is to have an electronic system for the SAFC by the end of this year, so that the whole process can be more streamlined."

With representatives from the Office of Residential Life meeting with BSG next week to discuss co-ed housing, BSG President Sophia Seifert '09 requested that the body brainstorm questions in advance.

"It's a good favor to them because it lets them know what our interests are," she said.

At-Large Representative Nyle Usmani '12 said he wondered whether Residential Life thinks "having a hetero-normative campus is a good or bad thing."

Connolly said he would like to hear "what Dean McMahon sees as the current process for students who are transgendered, and would like co-ed rooms."

AWAY

CONTINUED FROM PAGE 1

reality that certain programs are only available in the spring semester."

When asked if the season of a student athlete's sport would be factored into the decision to switch a fall applicant to the spring pool, Hall said that "priority is given to academic reasons," but that "any reasonable explanation of the choice of semester will be considered."

Hall expressed the difficulty of balancing the spread of juniors studying abroad in the fall and spring semesters.

"It's a problem for a college of our size," Hall said. "In a typical year, we're sending between 50 and 60 percent of a typical class away."

According to OCS, 58 percent of the Class of 2010, or 298 students, chose to go abroad this academic year. Though a smaller percentage of the Class of 2011 has applied to go abroad, such a dramatic gap between fall and spring applicants was not present in last year's applicant pool. "It's really hard to deal with really

"It's really hard to deal with really wasted resources on campus if you've got a big imbalance between the two semesters," Hall said.

According to Hall, the main reasons students decide to go abroad one semester over another include athletics, a class that is required for a major that is only offered in one semester, and the desire of students to study away from campus at the same time as their friends.

Aaron Cole '11 applied to go to the University of Cape Town in South Africa for the spring of 2010. He was contacted by OCS to consider going abroad in the fall, but explained that a course at Bowdoin next fall will go toward his biology major, constraining him to only study away in the spring.

"I need to take a class on molecular evolution here next fall," Cole said.

Sophomore Ouda Baxter, who applied to go to the University of Tasmania School of Art in the spring, explained that for her specific academic circumstances and abroad destination, it made more sense to study away in the spring.

"Because [Tasmania is] in the

"Because [Tasmania is] in the southern hemisphere, I'll be going in our second semester, but it's in their first semester," Baxter, a visual arts major, said. "In the fall, I'll be taking classes that I need for my major here plus filling up my distribution requirements."

When Hall was asked if any destination was markedly more popular among applicants from the Class of 2011 than in other years, he said that 22 students applied to study at the University of Cape Town in South

He noted that figure that stood out especially considering that only a total of eight students from the Class of 2010 are studying there over the course of the 2008-2009 academic year.

"I'm struck by the fact that it's a very rapid, rise, because we didn't have that many students in South Africa in this current academic year," he said.

Cole said that he chose to apply to the University of Cape Town because the school offers classes for both of his majors, biology and religion, and because the program did not require a specific language. "I think students are becoming in-

"I think students are becoming interested in Africa in general, the University of Cape Town is recognizable as an English speaking university in more or less the sort of model of education that we use here," Hall said.

Hall said that there continued to be sustained interest in certain abroad destinations.

"I think we're still seeing the same kind of level of interest in Spain, Italy, and the UK," Hall said. "Australia and New Zealand are also still popular," he added.

Hall also said that few countries experienced marked decreases in applications.

"I can't think of any climb down in interest," Hall said, though he noted that certain full-year programs had seen some decrease in interest. "A program like the London

"A program like the London School of Economics, which used to be very popular, we're not seeing very many applications for that anymore because it's full year only," he said. "I think we've got two, maybe three applications for LSE this year."

HOUSES

CONTINUED FROM PAGE 1

doing a really great job this year in terms of being organized and throwing quality events. Having been involved with the house system for three years, I've been particularly impressed this year with the amount of energy that's been sustained throughout the year."

"Many of them have made tremendous efforts with their affiliates, who ultimately become po-tential house applicants," Bruett added.

Ostermann said that Director of Residential Life Mary Pat McMahon worked with the House system in new and interesting ways, as discussing the possibility of upperclassmen living in the houses.

Twenty-seven of the upperclass men applicants live or have lived in a College House. Last year, 18 returners were accepted into the system. Most rising juniors and seniors chose to apply to the same house they have already lived in, according to Ostermann. Eleven chose to apply for only one se-mester in 2009-2010, most likely because they wish to study abroad for the other semester.

'The presence of upperclassmen in a social house creates a sense of tradition and continuity that would allow any house...to maintain the identity and camaraderie that it prides itself upon," Chester Eng '11, who reapplied to MacMillan House, wrote in an email to the Orient.

"Upperclassmen living in a house for a second year are the best resource that any house could have and it certainly was the case for Mac this year," he wrote.

Jeff Bush '10 reapplied to Quin-by House with a number of friends who all lived in the house their sophomore year.
"We got the message that Reslife

was making a big push to get more upperclassmen in the college hous-es and we couldn't resist," Bush wrote in an e-mail to the Orient. "The thinking was that it would be a great opportunity to mix up the social scene at Bowdoin and hopefully bring more upperclassmen to college house events.

"I didn't know a lot of seniors outside of sports when I was an underclassmen, and I think that having upperclassmen in the social houses could change that for upcoming freshmen," Bush added.

Assistant Director of Residential Life Dudney Sylla said the application craze stemmed partly from the "full-out recruitment of the IHC and Residential Life, which hosted several events during College House Info Week Feb-

"Each house hosted two events during the week, most of which included house tours, which seemed to be very popular. On Friday night, each house hosted a casual party for interested appli-cants," said Bruett in an e-mail.

Throughout the week, the IHC placed current house residents in Smith Union to distribute applications and answer questions, and Residential Life held two information sessions.

"I also think that having Winter Carnival at the beginning of the semester brought some attention to the different kinds of events that the Houses and IHC put on," Bruett wrote.

According to Ostermann, interest may also have arisen from the fact that Reed and Burnett, which

"We want to put the strongest house together...to reflect the diversity of the applicant pool. We try to get everyone into their first choice, but it's really an application to the house system, not a particular house."

ERICA OSTERMANN ASSOCIATE DIRECTOR OF RESIDENTIAL LIFE

were added to the House system in the fall of 2007, are "becoming more cemented."

Though the number of applications for each of the eight houses has not yet been calculated, Ostermann said houses' popularities changes every year, "driven by student interest and what students are saying to each other."

doesn't necessarily follow how close the house is to Thorne Dining Hall...there hasn't been a pattern about which houses are oversubscribed," she said. For example, she added, "Ladd has all singles, which you think would be a draw, but the other houses have just as much success."

"I believe that Burnett House will not be as popular as the other houses due to the physical house, the distance from campus, and the lack of good parties," Bobby Shaw '12, an applicant to Ladd House, wrote in an e-mail to the Orient.
"I did think about not applying to Ladd and trying to get a quad, but I figured my chances would be better if I applied to a College House."

"Almost everyone I am friends

with is applying to live in a house, and I'm not completely banking on getting into Ladd at all, especially because it is the smallest house," Megumi Shizuka '12 wrote in an e-mail to the Orient. "I do think that some houses such as Quinby, Helmreich, and Ladd are getting more of the applicants, but I don't think that any house will be hard

"Mac is another popular house to apply to since there was strong interest at info sessions we held at Coleman and during College House Info Week," Eng said. Students apply individually or in

blocks of up to four people, which Residential Life tries to avoid breaking, according to Ostermann.

Students are admitted by selection committees, comprised of three individuals: a current house resident who is not reapplying to the house, a current house resident from a different house, both of which are elected by their respective houses, and a member of the Residential Life Office.

Each house also has an Advisory Committee, consisting of three people who read files and advise the selection committees: a current or former house officer, a proctor from the affiliate first-year brick,

and the house's faculty adviser.
"We want to put the strongest we want to put the strongest house together...to reflect the di-versity of the applicant pool, said Ostermann. "We try to get everyone into their first choice, but it's really an application to the house system, not a particular house."

She said that oversubscription to houses is "frustrating," but she added that "it's good to have interest."

According to Ostermann, the committees try to create a gender balance, and there seems to be an even split

this year among applicants.

Group interviews will be conducted for new applicants tomorrow; individual interviews for returning applicants will continue until Sunday, and decisions will be mailed April 2.

Professors debate merits of latkes, hamantash

A dispute as heated as a fresh latke, content as rich as the fruit filling of a hamantash, and conflict as old as Judaism itself. Eager crowds filled the standing-room-only Lancaster Lounge on Wednesday night to listen in on a debate asking the question: Which Jewish delicacy reigns supreme?

Calling upon metaphysics, environmental ethics, literary analysis, and puns galore for support, Profes-sor of English Marilyn Reizbaum and Associate Professor of Philosophy and Environmental Studies Larry Simon squared off, pitting the triangular hamantash pastry against the circular potato latke.

"Each side presented compelling arguments...I'm not sure I could say there was a decisive winner. I know l can't choose," said Shelley Barron '09

Organized by Bowdoin Hillel, the latke-hamantash debate is the first of its kind held in Maine. The debate's history reaches back to the University of Chicago in 1946, at a time when, as debate moderator Professor of German Steven Cerf explained, the "open display" or discussion of Jewish culture was discouraged.

However, according to Cerf, neither the hamantash nor the latke side has ever won in the cross-country

Simon, arguing on behalf of the latke, spoke of environmental-ists who claim latkes are a "leading source of green house gasses," deeming these "scurrilous attacks."

"The only warming properly associated with latkes is that which one feels while eating it. The warmth of satisfac-tion in a meal well done," he said.

While one Harvard University debate argued that the oil-fried latke increases our dependence on foreign oil, Simon retorted that "only the most deranged of cooks fry their latkes in gasoline."

"In fact, the oil used, as we all know, is vegetable oil...And therefore latkes lead the way in pointing the direction out of our energy crisis and towards the use of biofuels!" Simon said.

He went on to show the latke's nportance in a "bit of a revisionist" history of Western metaphysics, suggesting that Pythagoras and Plato both had latkes on the mind, if not in hand, while theorizing. He suggested that when Descartes said, "I think therefore I am," he meant, "I

STATING HIS CASE: Associate Professor of Philosophy Larry Simon suggested that Pythagoras and Plato both had latkes on the mind—and perhaps in the stomach—while working on their theories.

think I'm eating a latke, therefore life is worth living and so I am."
He quoted Bishop Berkeley's sub-

jective idealism, "To be is to be perceived...eating a latke," referred to Kant's "transcendental latke," and referenced Hegel's pursuit of the dialect of "the absolute knowledge of the true value of a latke." He also told how Derrida once tried to deconstruct a latke, only to find that by separating the ingredients, "you only end up with mush."

Reizbaum, a veteran debater, rose to counter Simon by proving the supremacy of the hamantash in lit-erature. She cited its triangular form, calling the hamantash "the paragon of asymmetry, a very tenant of the modernist idea."

In particular, Reizbaum noted an obsession with the triangle in modern literature, particularly in James Joyce and Samuel Beckett. Joyce's 'Ulysses" is filled with imagery of eating, in particular seed cakes, and a Freudian erotic triangle created by wife's adultery.

She references Robert Shapiro, former president of Princeton University and past debate participant, who made the case for "the hamantash's superiority by indicating the epicurean significance of the 'edible' triangle, the Oedipal triangle."

Reizbaum emphasized the impor-tance of "such triangles of desire, or

what we may call a 'mange' a trois.'

Moreover, she argued that the triangle is "the very heart of Jewishness," as the Star of David is forged from two.

"The upshot of my argument here, as I've insisted elsewhere and often, is that Jewishness is quintessentially modern," she said.

Both Reizbaum and Simon were quick on their feet to respond to questions about which induces greater Jewish guilt in consumption, which really is ideal shape, and which delicacy lasts longer.

"With the latke we never have to worry about that, with the latke there's never any left!" said Simon.

Students agreed on the debate's ccess, but couldn't pick sides. While Meredith Borner '09 thought she favored latkes, she was persuaded by Reizbaum's argument.

Naturally, after the debate, I had both a latke and a hamantash. So I really do love both," she said.

In the end, Simon and Reizbaum expressed peaceful sentiments.

'I believe in coexistence and that things have their place, so I don't want to claim victory over the ha-mantash. We can live together in a properly constituted meal," Simon

Reizhaum, on the other hand, said, "As far as food is concerned, truth be told, I don't like either one of them."

Storm shuts down power, network operations

BY MARY HELEN MILLER

The storm that slammed northern New England Sunday night left more than 40,000 homes and businesses in Brunswick without power and every Bowdoin student without e-mail.

Just after midnight, buildings on the "South Campus loop" lost power. Power was restored Monday afternoon, and network operationswhich includes telephones, printers, e-mail, network file services, and most business applications—were down for nearly six hours during the day on Monday.

The outage on campus resulted from fallen tree branches and a blown transformer in the area, according to an e-mail that Director of Safety and Security Randy Nichols sent on Monday morning.

While Moulton Union was closed for breakfast and lunch, Thorne Hall ran on a generator and was open for all three meals on Monday.

"Thorne Hall becomes the center of the universe during a power out-. age," said Nichols.

Although only certain buildings on campus were affected by the out-age, the failure of network operations was noticed by all.

According to Chief Information Officer Mitch Davis, the network was down because of mechanical problems in the main computer operations center in the basement of Hubbard Hall. Usually, when power is lost, severs run on back-up battery power for up to 20 minutes—the time it takes for the generator to kick in. However, the generator overheated, and there was nothing else to power the servers after the back-up battery ran out of power.

"IT systems are not supposed to go down like that," Davis said.

Although the generator was up

and running within an hour, it took much longer to boot up all the systems that had been shut down too suddenly.

Davis estimates that Bowdoin experiences up to seven power outages each year, but he said that this particular problem "hadn't happened ever."

"After it's all over and done with, it was actually a fun problem," Davis said, adding that the people who work in IT do so because "we like to solve problems."

While the impact from the power outage at Bowdoin was relatively short-term, those living off-campus were out of power until as late as Tuesday night.

Senior Collin York, who lives on Harpswell Road, found a silver lining in the power outage.

"It gave me a good excuse not to do my reading," York said. -Toph Tucker contributed to this

BOWDOIN BRIEF

Bowdoin monitors Russell apparel after supposed anti-unionism

Bowdoin is keeping tabs on its apparel licensing agreement with Russell Athletic after the company was accused of anti-unionism. The New York Times reported on Tuesday that 12 universities, including Columbia, Cornell, Duke, and Georgetown, have already cut ties with Russell due to the company's closing of a unionized factory in Honduras.

"We're just monitoring the situation," said Director of Dining and Bookstore Services Mary Lou Kennedy. "We haven't made a decision yet."

About 16 percent of clothing in the bookstore is Russell apparel, according to Kennedy.

The Workers Rights Consortium (WRC) and the Fair Labor Association (FLA) have both criticized Russell's action. While Russell has said that the closing was due to economic considerations," the consortium said that it believed that Russell targeted the factory in part because of its unionized status.

Kennedy said that Bowdoin takes the recommendations of the WRC and FLA seriously, saying, We watch them closely.

But Kennedy added that because the bookstore does not plan on ordering any new clothing until May, the College has time to see if Rus-

sell will change its stance.

"At this point we're still waiting to see what Russell is going to do," Kennedy said.

SECURITY REPORT: 2/20 to 2/26

• A Trinity student fell on ice outside Moulton Union, injuring a wrist. The student was transported to Parkview Hospital.

· An elderly man, who was at-tending the NESCAC swimming championships at Greason Pool, collapsed on the sidewalk. The man was assisted to a waiting vehicle.

Saturday, February 21

· An alert student reported a ispicious man inside Winthrop Hall. A security officer located the man and determined that he was a visiting parent of a student.

· A student reported that his wallet and cell phone were stolen from Lubin Squash Courts. The report was unfounded as the student located the items.

· Security officers found a visiting university student wandering the campus alone while intoxicated. The student's condition was assessed and the Bowdoin student responsible for the guest was located. A report was filed with the dean of student affairs.

A student's bicycle that was stolen last week from Brunswick Apartments was recovered near Smith Union and returned to the

Sunday, February 22

· A student reported that a

violet-colored leather wallet was stolen at Crack House. The wallet contained cash and credit cards.

· Two students were found in possession of marijuana and drug paraphernalia at Brunswick Apartments. A report was filed with the dean of student affairs

· A student in Winthrop Hall was found in possession of drugs and drug paraphernalia. A report was filed with the dean of student affairs.

A student reported the theft of a silver Trek 4100 bicycle from outside Maine Hall.

Monday, February 23

· Power was lost just after midnight on the south side of campus due to a snow storm.

 Security responded to several false fire and trouble alarms caused by the power failure.

· Several very large snowballs, one nearly seven feet tall, appeared on the main Quad. One was blocking access to Hubbard Hall, others were found at the VAC and the Museum of Art.

· A vehicle driven by a student struck another student's parked vehicle in the back lot of Brunswick Apartments, tearing off the parked vehicle's rear bumper. An accident report was filed.

Tuesday, February 24

 A combustible gas alarm activated twice in the kitchen area of Moulton Dining. The cause was a malfunctioning detector.

· A staff member discovered collision damage to a Facilities sand truck.

Wednesday, February 25

· A female student working out on a treadmill at the Watson Fitness Center became ill and passed out Brunswick Rescue transported the student to Parkview Hospital.

· A student with a possible concussion from a fall was transported from the health center to Parkview Hospital.

 A student reported a strange smell inside the dance studio at Sargent Gymnasium. The source was determined to be a defective light ballast, which was repaired.

Thursday, February 26

• A men's basketball player bit his tongue during practice at Morrell Gymnasium and was transported to Parkview Hospital for stitches.

• Brunswick Police Department issued court summonses to two Bowdoin students who had used false identification cards to consume alcohol at Joshua's Tavern last Saturday night.

Africana Studies 'reconceived for the 21st century'

BY CAMERON WELLER ORIENT STAFF

Growing up in southwestern Nigeria, Director of Africana Studies Olufemi Vaughan experienced first hand the "range of problems and issues developing out of Africa politically, socially, and culturally." Vaughan, who came to Bowdoin in the fall with a Ph.D. in politics from Oxford and experience teaching at Stony Brook University, is prepared to develop an Africana Studies Department that fully addresses the complexities of the African diaspora and African-American experience.

"In Nigeria, I encountered conflicts and questions of religion, art, rituals, culture, generational connections, gender, economy, and all kinds of emerging social dislocations, and, at the same time, human agency and triumph," said Vaughan. "You cannot contemplate African societies without considering the interconnectedness."

The interconnectedness of Africana Studies at Bowdoin is evident, as the department offers classes cross-listed in subjects ranging from gender and women's studies to English, history, music, anthropology, sociology, and government.

"We have sought to address the wide breadth of topics that play into Africana Studies by engaging the other disciplines," said Vaughan. "We are trying to revise our curriculum to speak to thisrange of issues, so we can have really very interesting, engaging, intellectually serious, and quality

intellectually serious, and quality interdisciplinary conversations."

According to Vaughan, the study of Africa and the African-American experience is truly taking hold in the current generation of college students because "they grew up in a diverse world where people of different social cultural experiences meet and talk. They know how to access remote parts of the world, and how to relate and talk to people of another race, nationality, and religion." Vaughan said the current generation's interest in

encountering other cultures is responsible for the development of about 15 Ph.D. programs in Africana Studies in top schools across the country.

Sophomore Sara Faurer said she chose to major in Africana Studies because it is a subject that she had developed interest in during high school and one that she believes will allow her to take classes in a wide variety of disciplines.

"I love history and I love sociology, so I think I'll try to focus on those aspects of Africana Studies," said Faurer, who also plans to major in psychology. "I also think that professors can make or break a major, and I've had an excellent experience with [history professor Patrick] Rael in 'African Americans 1865 to Present' and Vaughan in 'Africa since 1880."

According to Vaughan, one of the strongest aspects of Bowdoin's Africana Studies program is the faculty.

"Bowdoin has got truly, truly impressive by any conventional standards, teacher-scholars in African American studies," said Vaughan. "The faculty is outstanding, and their scholarship, research, teaching, and dedication to African Studies not the larger depth of it is truly incredible."

The department is currently searching for a tenure-track assistant professor in African Diaspora Studies and African Studies.

Assistant Professor of Africana Studies Tess Chakkalakal taught at Williams for five years before taking a leave of absence to come teach in Bowdoin's English Department from 203 to 2004. When Chakkalakal was been seen to teach at Bowdoin full-time starting last fall, she said she "jumped at the opportunity to teach in what [she] considered the ideal intellectual community."

Chakkalakal said her attraction to Africana Studies truly began while studying at York University in Toronto, where she became heavily involved in The Center for Black Culture before getting her Ph.D. in Literature. Chakkalakal said the thing that attracted her most to Af-

ricana Studies was the literature and the idea of the African-American identity.

"I found the literature very compelling," said Chakkalakal. "My dissertation was actually on 'Uncle Tom' and on the development of literature as predicated upon a cultural identity. It was interesting to see the making of a cultural identity through literature."

Chakkalakal used President Obama as an example to illustrate the concept of cultural identity.

"If you look at Barack Obama's autobiography, you see that he read all these black writers, James Baldwin, Malcolm X, and he developed this African American identity, said Chakkalakal. "It's this concept of an identity started through literature, and it is truly rooted in the slave literature."

Chakkalakal is currently busy on her own book, "Novel Bondage: Slavery, Marriage and Freedom in 19th Century America," in which she examines the "slave marriage" as depicted by three African-American authors and two white women authors.

Chakkalakal, who taught "Inter-Chakkalakal, who taught "Inter-

Chakkalakal, who taught "Interrearriage in American Literature" last fall and is currently teaching "Fiction Without Borders" and a writing composition class, said that she believes Africana Studies will play an increasingly large role in the future of scholarship, and that Bowdoin is a leader among liberal arts colleges in the development of its Africana Studies program.

"I think with the election of Barack Obama, Africana Studies Departments across the country will gain a larger role," said Chakkalakal. "It is a truly interdisciplinary program, and it brings together so many disciplines to discuss issues that are particularly relevant to our time: poverty, inequality, and other issues."

According to Chakkalakal, the Africana Studies Department is currently working to recruit new faculty, seeking opportunities for community outreach, and constantly rethinking the curriculum. Chakkalakal

MARGOT D. MILLER, THE BOWDOIN ORIENT

AFRICAN IDENTITIES: Assistant Professor of Africana Studies Tess Chakkalakal came to Bowdoin this fall after teaching for five years at Williams College. She said she believes that Africana Studies will play an increasingly large role in the future of scholarship.

refers to the changes she, Vaughan, and the rest of the faculty are planning as an effort to "reconceive Africana Studies for the 21st century."

Vaughan said that support from the administration is a key part of the success of Bowdoin's Africana Studies program, and the College "has dedicated a lot of time and material to the expanding of Africana Studies."

"At Bowdoin, the level of commitment of senior administrators is really remarkable," said Vaughan. "That level of leadership at the very top is of the essence—an Africana Studies program can not succeed if such commitment is not sustained."

The dedication of Bowdoin's administration to Africana Studies, according to Vaughan, will aid Bowdoin's students in competing in the real world during an age when globalization is the reality.

"The context of Africana Studies is the global-national. You cannot be excellent anymore if you are not diverse, and we can not compete as a nation effectively if we do not use all of the resources we have," said Vaughan. "Africana Studies is the discipline through which that can be done."

Sexual identities and the 'stifling' nature of categorization

SEXUALLY

BY ALANNA BEROIZA COLUMNIST

Whenever I come out to someone, particularly a straight someone, there are two questions that I can expect to be asked sooner or later. Question number one: Did you always know you were gay? Question number two: How do lesbians have sex?

These aren't easy questions to answer, by any stretch of the imagination, so I usually answer them jokingly: I was straight until proven otherwise, and lesbians have sex by holding hands in the dark, of course! I suppose I use my sarcasm as a defense mechanism because of the deeply personal nature of both questions. The definition of my sexual identity and my conception of what it means to "have sex" are two things that I've struggled

to understand for years now, and I have yet to find a satisfactorily clear definition for either.

As a first year, when I first "came out," I remember wondering what "closet" I had come out of. I didn't think I'd been hiding anything anywhere. Then, all of a sudden, with the-affirmation that I was attracted to people of my own sex, I inherited a legacy of struggle and confusion that I felt compelled to live up to by going back into my personal history trying to understand what I'd been hiding or suppressing. All of a sudden, I was no longer just Alanna—I was Alanna the lesbian. It felt like I'd been morphed into an entirely new person, with a new sexual past, present, and future. But nothing had really changed; all I'd done was say something about myself—I hadn't even kissed a girl yet!

Considering my lack of experience, sexually and culturally, in my new identity, you can imagine the kind of chaos that went through my head when people started to ask me how lesbians have sex. I used to think, "How the hell should I know? I've only been one for five minutes!" Then I'd think, "Well, if this is what I am, then I'd better find out how they have sex, otherwise I won't fit into either category, gay or straight!" It became this mutually constitutive thing where my sexual orientation dictated the way I was supposed to have sex and the way I had sex dictated what my sexual orientation was. But the idea of sexual acts and desires defining who I was wasn't actually that new of a concept for me: I felt that way back when I was "straight" too.

I remember being really frustrated with virginity—truth be told, I still am. What does that word mean? Have I somehow missed out on something if I haven't been vaginally penetrated by a penis? Is that all I have to do in order to join the "big girl's club"? Am I a worse person for having been penetrated in this way, have I let my

morals fall to the wayside? Why do I think it's important to really know the first person I get vaginally penetrated by, when I don't think it's as important to know them before engaging in most other sexual acts? All these questions and more used to plague my thoughts, both before and after I "came out." I think I actually expected something supernatural to happen after I was penetrated by a guy for the first time—good thing I didn't hold my breath for that one.

I should make it clear that I'm not trying to demean heterosexual identities or sex acts. It's entirely possible that someone's first experience with heterosexual intercourse is totally storybook and wonderful. What I'm trying to get at here are the limitations that sexual identities like virgin or lesbian, slut or prude may have. Because, if we're thinking about it logically, can we really call a woman who is has intimate sexual encounters with other women on a regular basis a "virgin" simply because she's

never had heterosexual intercourse? Am I to believe that all gay men have anal sex? Is it true that all straight men enjoy receiving oral sex from their female partners? If a woman can only orgasm from oral sex, does that mean she hates sexual intercourse? These are just a few examples of the potential limitations and frustrations that strict definitions of sex can cause.

I use to think that the reason these things bothered me so much was a result of my sexual orientation. Now, I'm not so sure. Of course, when I first "came out," I was totally preoccupied with all of this stuff. But now, as I feel more settled in my sexual identity, I still feel stiffed by the strict categorizations placed on sexual expression in our society. And, the more I think about it, the more I begin to understand that identity and sexuality are loaded issues for everyone, not just enthusiastic queers in their early 20s who write sex columns for their college newspaper.

Students discover alternative forms of housing at Bowdoin

BY MATTHEW GANNON CONTRIBUTOR

Housing options for sophomores and upperclassmen extend far beyond the traditional realm of Chamberlain and College Houses. These "off the beaten path" options include the fifth floor of Osher, spare rooms in Brunswick theaters, and apartments off Maine Street.

Sophie Springer '11, one of a handful of sophomores living in first year dorms, lives in Osher Hall. Her low lottery number dashed hopes of living in a quad.

We really didn't want to live in Chambo, so we were looking for other options," Springer said.

Many sophomores opt for first year dorms like Osher and West Hall due to their central location on campus, acious rooms, housekeeping, and kitchen on the ground floor. While Springer noted that loud music from first year rooms and being subject to first year rules was not ideal, there is definitely a silver lining.

"We don't see freshmen that much," she said. "And we bake cookies a lot." While the living situation may not be optimal for upperclassmen, "it's nice to be a little removed," said Springer.

While Springer and her room-mates decided to forgo the Chamberlain Hall option, sophomores August Kerschner and Greg Kamford were informed by Residential Life durin the summer that Chamberlain did not have space for them. Bowdoin was forced to search for an alternative housing situation and lease two rooms from the Maine State Music Theatre on Elm Street. Although few Bowdoin students expect to be living above a community theatre a long walk from Smith Union, Kamford said "There wasn't really another option so no one refused."

"The amount of space we have is nice compared to Chambo," said Kerschner. Furthermore, the six sophomores boys living there have come to enjoy their mote location and, with no R.A. and little supervision from security, see it as an opportunity to exercise more indepen nce. There are a few difficulties with living so far from campus, however.

"I think laundry is definitely the worst part," said Kamford. The Elm Street residents have to bring their laundry to Chamberlain or use an expensive laundry service in town. Brunswick parking bans also make

it difficult for them to find a parking

space for the night.

Not all Bowdoin students end up in non-traditional housing because of poor luck in the housing lottery. Seniors Christine Kue and Jessica Walker never even entered the lottery. Kue, who works as an intern for Dean of Student Affairs Wil Smith, was offered a room on the third floor of 30

College as part of the job.

While Kue said she was initially disappointed by how quiet the residence vas, in recent months 30 College St. has been home to the Queer-Trans Resource Center, Multicultural Center, and (at times) Women's Resource Center, as well as other groups that have

livened up the communal space.

Kue said that she enjoys and takes advantage of the benefits of living at 30 College Street, such as two high-tech kitchens (one of which is kosher). While the living situation may not appeal to those seeking a more social atmosphere, Kue says that she greatly enjoys her "peaceful and healthy environment." Walker has a similar living situa-

tion to Kue's. Walker is the president of the African-American Society and one of the two house managers at The Russwurm African American Center, a building that four Bowdoin students call home. The newly renovated building has a state of the art kitchen, a small library, and a large meeting

Walker and her fellow house manager, Terrence Pleasant '09, were nominated to live at the African American Center and manage activities and programs. Two other students, a nominee from Latin American Student Organization and another from Africa Alliance, also live in the Center.

Although she recognizes the perks of living in Russwurm, Walker said that she and her housemates take their connection to the African American Center and their responsibility to furthering its cause seriously

"I just love it so much, and I'm so pleased that I can live here and be a part of maintaining and sustaining its mission," said Walker.

Like the arrangement at 30 College Street, Residential Life is not involved with housing students at Russwurm.

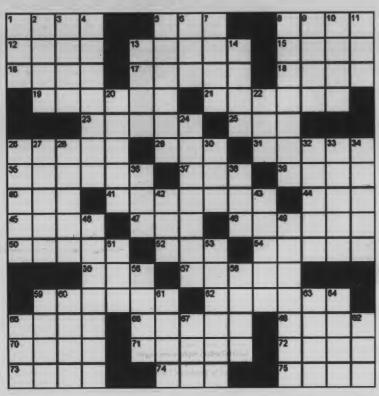

. "It's actually better for us if they aren't involved," said Walker, who added that the separation of their house from Residential Life truly makes the house their ow

ARTS & ENTERTAINMENT

Seniors reinvigorate classics 'Miss Julie' and 'Of Mice and Men'

Two seniors, Mo Zhou '09 and Jason Finkelstein '09, are putting new spins on two classic plays as they respectively di-rect "Miss Julie" and "Of Mice and Men" this weekend and next week.

Written by August Strindberg in 1888, "Miss Julie" is the story of a strongwilled woman of high status and the daughter of a count. She flirts with Jean, the count's servant, who is engaged to Kristin, a cook. Miss Julie is self-loathing as well as gender- and class-confused. "She hates men, but she can't help flirting with them," Zhou said.

On a midsummer night's eve, Julie and Jean sleep together, and the play unravels from there

"It is a play about desire, about flirtation, about ambition prescribed by social norms." Zhou said

Zhou first read the play last summer in a European modern drama class she was taking at New York University. She felt that she could relate to Julie, and she also fell in love with the language of the

Originally written in Swedish, many of the translations of Strindberg's plays maintain the misogynistic tones that he wrote into his texts. However, a group of feminist playwrights are rewriting his works. Zhou chose an edition rewrit-ten by Helen Cooper, who plays with Strindberg's language to give power to female characters.

Zhou only recently started directing at Bowdoin. A native of China. Zhou spent 10 years training as a Chinese opera singer but had no experience with

HIGH SOCIETY: Students performed "Miss Julie," directed by Mo Zhou '09, on Thursday. The play is about an upper-class woman frought with inner conflict.

theatrical directing. However, during th efall of her junior year, she took a course with Associate Professor of Theater Davis Robinson. From there, she was the first student to participate in the Lincoln Center Theater Director's Lab, which is, according to Zhou, a director's boot camp. There, directors worked seven days a week, for three weeks, from 10

a.m. to 10 p.m. every day. Zhou is now applying to graduate school for directing.

For Zhou, "Miss Julie" still has rel-

evance at Bowdoin 120 years after it was

American classic.

The quintessential high school book,

Of Mice and Men," has meant different hings to redict to the night out his came to it it in that it is

George Milton and Lenny Small, in

Dream. George is intelligent and cynical

and looks after Lenny, a big, strong man

n by John Steinbeck, the story

rch for land and the American

"I hope that everyone can face their hidden desires because desire is some times very dangerous," she said. "I've heard of some people who are disturbed by Bowdoin's social scene, and 'Miss Julie' has some resonance with college relationships. In both cases there is the question: Was it sex, love, or something in between?"

While Zhou chose a foreign play to interpret, Finkelstein adapted an

In order to highlight its relevance to today's society, Finkelstein strove to bring the story's controversial aspects to

"When this book is read in high schools nowadays, there is a hi focus on the friendship aspect of the story," he said.

Elements such as race, sexuality, and the integral challenge of the American Dream are much more interesting and relevant, said Finkelstein

They rest at the nexus of our cultural identity as Americans," he said

Finkelstein adapted "Of Mice and Men" for the stage over Winter Break.

"Writing is the easy part, directing is harder," he said. In addition to this project, he also directed "All My Sons" and an independent study called "Spics" last year.

When casting the play, Finkelstein said that he was "looking for reality over acting experience."

"I wanted people who were visceral and human. Working with developing actors gave them a certain honesty about them that is difficult to reproduce" he said.

Pinkelstein identifies with Steinbeck er any of the characters in the play.

"I see what he's trying to create. challenging the status quo," he said. That is precisely what Finkelstein

"Miss Julie" will be performe night at 7 p.m. in Memorial Hall 108. Of Mice and Men" will be performed Tuesday and Wednesday at 7 p.m. in Chase Barn. Admission is free to both

'Hall of Mirrors' reflects Schwartz's innovative composition techniques

Not many people can say they have composed a piece of music for saxophones incorporating the letters of the word "saxophone" into the work, but retired Professor of Music and renowned composer Elliott Schwartz is an exception to most rules. Not only does he experiment with using words în music, he also incorporates percussion and music history on his new album "Hall of Mirrors" and draws on his superior knowledge of great composers to create his own unique

A professor in the music department from 1964 until his retirement in 2002, Schwartz still taught classes until 2007. During his time at Bowdoin, Schwartz taught thousands of students and also composed pieces for them to play. His interest in music began at an early age, and Schwartz was inspired by portraits of famous composers and enchanted with the ntic elements of musical theory. "I was, and still am, a pianist," said Schwartz. "One of my early piano chers was a theory professor at Juilliard and we would have individ-ual lessons and a second class lesson

uai lessons and a second cass lesson learning theory and composing." Although the grew up experiment-ing with composition and perform-ing Schwartz followed the family and enrolled at Columbia University as a pre-med

"I decided at the end of my junior year to be a music major," Schwartz "One of my professors was

MIRROR IMAGE: Elliott Schwartz, composer and retired Professor of Music, is releasing a new album this month, "Hall of Mirrors."

the composer Otto Luening and he helped me complete all the prerequisites in one year

After graduating from Columbia, Schwartz continued to perform and compose and eventually arrived at

According to him, the composition occas involves a lot of business.

Orchestras or ensembles commismized to write trem a piece and I we freedom within the limits of rishes. Often they will be very specific about what they want," he

For his most recent project, "Hall

of Mirrors," Schwartz wrote four different compositions for various musical groups. The first is the title position written and performed on the album by the Radnofsky Saxophone Quartet with Schwartz on the piano. In this piece, Schwartz uses a system of composition that equates notes to letters so that he is able to spell out words with his music. Inspired by the main instrument of the piece, the saxophone, Schwartz used the phonetic spelling of the word to work it into the piece. Characterized by slow, melodic sections punctuated by energetic and soaring harmonies, "Hall of Mirrors" also incorporates

the twitter of the piano seamlessly. In his second piece, "Cristal: A Cycle of Names and Memories," Schwartz again inserts an element of humor that only those most musically knowledgeable will grasp. Written for piano and percussion, Schwartz uses excerpts from previously composed pieces by men named Paul or Tom because he wrote the piece for pianist Paul Hoffman and percussionist Tom

"People who know my music know that I'm going to pull from other music," Schwartz said. Beginning

a purely percussive instrument, the piece shifts from a frantic blending of sound to a soft and somber melody with constant percussion interjec-

One of the most innovative pieces on the album is "Rainforest with Birds," which Schwartz composed for the Harvard Wind Ensemble in 2001. Using recorded bird noises to give the effect of the rainforest, Schwartz was given vast creative license when writng the piece.

"Having this commission gave me an opportunity to explore something I was already interested in," Schwartz said. An obstacle Schwartz faced while writing the composition was the lack of percussion players in the

"For the performance I brought about 10 Bowdoin students to Harvard to play percussion," Schwartz id. Again Schwartz was able to interject his own personal humor into the piece in a "musical pun" that included excerpts from two "bird" composers, William Byrd, who was personal composer for Henry VIII, and jazz musician Charlie Park-er, whose nickname was "Bird." All of these elements pull the piece together and allow the listener to follow the musical story Schwartz is trying to

Schwartz's album is available online and selections of much of his work can be heard on his Web site, www.schwartzmusic.com. Schwartz's rife, DeeDee, is the artist of both the disc itself and the front and back cover of the disc case.

Brass ensembles to join forces in Studzinski | Addictions and laughter abound

Studzinski Recital Hall will not only be filled with the sounds of Bowdoin's two brass ensembles on Monday, but also by those of the United States Air Force Liberty Band's Colonial Brass en-

The Colonial Brass ensemble usually maintains a schedule of shows that would make even The Rolling Stones "From what I understand, the USAF Band of Liberty travels 300 days out of the year," said Charlie Berdahl '11, a member of the Bowdoin Tracktet, a brass quintet made up exclusively of track athletes. "[They] contacted our instructor, Anita Jerosch, to see if she knew of any colleges that could host them since she works with many colleges in the area. She thought Bowdoin would be a prime venue and we were told of the concert two weeks ago."

The Colonial Brass ensemble, a sub-division of the USAF's larger Liberty Band, is a six-piece group that has appeared at impressive events such as the Music Educators National Conference (MENC) and the New York Brass Conference. They play a diverse repertoire of music ranging from classical to tra-ditional marching band material to con-

WINDED: Five track students comprises the Bowdoin Tracktet. The group, along with the United States Air Force Colonial Brass ensemble and the Bowdoin Brass Quintet, will perform on Monday

The ensemble features two trumpets played by Senior Airman Laura Kluga and Staff Sergeant Cheryl Przytula, a French Horn played by Technical Ser-geant Lawrence Price, a Tuba played by Staff Sergeant Steven Charles Skoy, a Eu phonium (a smaller and higher-pitched version of the tuba) played by Staff Ser-geant Eric Spinelli, and percussionist Se-nior Airman Michael Correa.

The first of the two Bowdoin en-

sembles that will join the Colonial Brass ensemble is the Tracktet, featuring Isaac Irby '09 and Stan Berkow '11 playing trumpet, Thompson Ogilvie '10 on horn, Hannah Peckler '11 on trombone, and Berdahl on tuba. This group, with its current members, performed at the brass concert last year to rousing applause and appreciation from track

The second Bowdoin ensemble is the Bowdoin Brass Quintet, made up of Abriel Ferreira '10 and Will Cogswell '11 on trumpet, Allison Chan '11 on the trumpet-like flugelhorn, Eugene Sun'11 on the trombone, and Nathan Elliott'09

The Colonial Brass Ensemble will collaborate with the Bowdoin brass quintets both during and apart from the concert: The Colonial Brass Ensemble will hold a workshop for both of the brass quintets as well as perform a few pieces with the Bowdoin ensembles.

"We might play music that they bring with them, but we have some old stand-by pieces just in case," Berdhal said. Whatever the pieces end up being, the concert promises to entertain.

The concert will be Monday at 8 p.m.

in 'Confessions of a Shopaholic'

THE REEL WORLD BY LAURENT XENAKIS

I have a confession to make: I hate shopping. The bright lights and music in malls give me headaches. There are clothes everywhere and I get discombobulated with all the colors. And then there's the money thing. I have a hard time justifying spontaneous purchases and end up just putting things back rather than opening up my wallet.

I have another confession to make: I loved "Confessions of a Shopaholic. I may not liké shopping, but I did like watching a movie about a young woman so consumed by clothes, shoes jewelry, and bags that she looks like an animated Vogue ad walking down the streets in Manhattan.

Rebecca Bloom (Isla Fisher) is a shopaholic. She cannot walk past stores without the colorfully clad mannequins beckoning her insideNew York's most expensive stores to spend the last \$10 on each of her 12 credit cards.

Unfortunately, Rebecca's compulsive habit has put her more than \$16,000 in debt. With the dry and colorless city debt collector Derek Smeath on her tail. Rebecca has had to come up with some pretty clever excuses about why she can't meet Mr. Smeath. Most of these excuses involve Finland, because, let's face it, 'No one checks up on Finland.'

Meanwhile, Rebecca is trying to climb the ladder of fashion journalistic success by breaking into the renowned fashion magazine Alette. However, after a strange twist of events and a lot of te quila, Rebecca ends up working instead for a financial magazine run by the same publishing company as Alette. The new editor of the magazine, Luke Brandon (Hugh Dancy), wants hard-hitting financial news that will investigate the hypocrisy and scandals of the financial

world. Sound familiar?

Rebecca becomes "The Girl in the Green Scarf," a columnist who relates the complicated world of finance to real people through fashion and shopping analogies. Ironically, the girl who can't run her own finances is advising the rest of New York on theirs.

Known for her blunt observations, Rebecca gains recognition as a financial columnist, even as her own financial life spins out of control. Rebecca even goes so far as to claim that Derek Smeath is her stalker ex-boyfriend to keep Luke from learning the truth about her debt. Rebecca's "explanations" just end up getting her in more and more trouble. How will she ever make it out from under the pressure of her lies and the debt? Especially if someone actually does check up on Finland?

"Confessions of a Shopaholic" may be a chick flick, but it's also a humorous honest look at the fiscal crisis hitting our country. The innocent "everyman" is being punished for the greed of the top dogs, as stories of executives taking pay bonuses while their company's stock plummets start to surface. And we're all starting to pay for our crazy consumerism and reckless spending. It's scary to think that 20-somethings are \$16,000 in debt, and not because of some big investment like a house, but just by spending without caution. Like Rebecca's case, the day of reckoning will come, whether in the form of a ruthless Derek Smeath or maybe through something more menacing: bankruptcy. Everyone has to take a hard look at their spending habits and wonder if all that stuff is really worth it.

Maybe like Rebecca, we'll be lucky and find a supportive community behind us who will help us find our strength and get back on our feet, but I don't think that community is Congress. We might have to figure out this crisis ourselves, but before we can change, we will have to stand up and admit our addiction.

BLOW YOUR HORN: The Bowdoin Brass Quintet includes flugethors, themselve the poet trombone in the Kanbar Auditorium of Studzinski players. They will participate in the workshop that the colonial Brass ensembled softening

Cameron '98 adds vocals to Concert Band series

RACHEL GOLDMAN STAFF WRITER

Josephine Cameron '98 joins the Bowdoin College Concert Band to bring sounds of the college—both past and present-to the Bowdoin community on Sunday. The concert is the third in a series titled "Friends" in which the concert band has collaborated with notable headline performers

Since her graduation in 1998, Came on has become well known for her folk song performances and recordings, but her interest and passion for music originated before her college experience.

"I was convinced that I would be a music major, and I started out on that path," Cameron said. However, Cameron credits her first year seminar, "Music, Music, and Words," for complicating that plan.

There were only four people enrolled in the course," Cameron said. "Yet, it was one of my favorite courses at Bowdoin, and probably one of the most influential. I began to think seriously about how words and music worked together in various forms." From this formative experience, Cameron went on to take creative writing courses and equently majored in English.

Music, however, remained a huge part of Cameron's life throughout her college experience. Cameron attributes much of the experience to the fact that she was in an indie-rock trio called "Ep-onine." The band played all over cam-pus, at the old pub in Moulton Union and the new pub that opened Cameron's sophomore year, the Women's Resource Center, on the Quad and, as Cameron jokes, "anywhere people would take us It was also at this time that Cameron began to delve into traditional folk music and explore bluegrass music

While Cameron was earning her MFA in creative writing at the University of Notre Dame, she began to channel her literary passion towards songwrit-ing. From there, Cameron added original songs to a traditional American folk song repertoire. Upon moving back to Maine in 2000, she recorded her first full-length album, "American Songs Volume 1."

Following her first album, Cameron went on to record four more. On her est recent album, Cameron collaborated with a fellow '98 Bowdoin class mate and Nashville musician, Carter Little. The album includes many origi nal compositions and has been widely praised. One of the songs was included in a children's book/CD project by poet Nikki Giovanni called "Hip Hop Speaks

In addition to releasing albums Cameron has also created a program called "Songwriting for Kids." Cameron explains that this program "uses tra-ditional American folk music to each children the basic elements of song-

"It's been a blast," Cameron said of the program. "It's amazing to see both the fun, creative stuff the kids come up with and the way they interact on a very deep level with some of the traditional, historical songs."

This weekend's performance does

not mark a return to campus for Cameron; she is the History Department Coordinator for the College. However, it is a new and exciting musical oppor-

"This is my first time collaborating with a Bowdoin ensemble," Cameron said. "I'm looking forward to living out secret dream of being a 1940s Doris Day-style big band singer! I'm also looking forward to singing in beautiful Studzinski Auditorium."

In addition to playing with the Bowdoin College Concert Band, Cameron emphasizes her excitement about the opportunity to play once again on

"I will always be grateful to Bowdoin for encouraging my love of music and rriting. It didn't seem like such a big deal at the time. I was just playing music, writing, having fun. But looking back, I can see that the people and the opportunities I met at Bowdoin have honestly shaped the course of my life."

More information on Josephine Cameron and her work, including free downloads, can be found at her Web sites: www.josephinecameron.com and www.songwritingforkids.com.

Cameron and the Bowdoin College Concert Band under the direction of John P. Morneau will perform at 2 p.m. on Sunday in Studzinski Recital Hall at Kanbar Auditorium. The concert is free and open to the public.

TIME FOR THREE

String trio "Time for Three" is known for pushing the boundaries of traditional repertory. The group will perform at 7:30 p.m. on Wednesday in Studzinski Recital Hall at Kanbar Auditoriu

Lee fails to draw connections between worlds in 'Teacher'

THE BOOK NOOK BY FRANCES MILLIKEN

A dichotomy is immediately established between the two women who dominate the narrative of "The Piano Teacher" by Janice Y. K. Lee. Trudy is the exotic, flip, Portuguese-Chinese young woman who seduces whom she likes and behaves as she pleases. Claire is her demure, naive, and restrained British counterpart. They both fall in love with Will Truesdale, an appealing but not particularly unique Englishman.

Unlike the constraints of a typical love triangle, Trudy and Claire do not contend with one another in real time. Claire appears in Will's life a decade after his passionate relationship with Trudy. They are separated not only by charac ter and nationality but also by time and its repercussions. The narrative stays in Hong Kong, though it alternates be tween the early 1940s as World War II draws closer and 1953. There is a strong expat, colonial presence in Hong Kong that sets up complicated dynamics, both within the community of foreigners and in relation to the Chinese residents.

somewhat difficult to stay interested in Claire in and of herself. She is a little too quintessentially out of her ele-ment, in Hong Kong because the man she married is there: a man she is using as an escape, not as a companion. The characteristics Lee gives her to enhance her individuality are too far-fetched for her docile disposition. For instance, the scenes in which Claire steals from her employers aren't convincing. Her love

affair with Will makes her more interesting to the reader, but even this romance

fails to reveal any depths.

Trudy, on the other hand, is almost too much. She embodies joie de vivre. She performs constantly. She is the life of the party, the belle of the ball. She is the sort of character who is never un-watched. There is almost too much distance between Trudy and Claire. Ultimately, it is not entirely clear how important their differences are.
"The Piano Teacher" is a love story

but it is also very much a story about war. The book by no means aspires to the heights of Hemingway's "For Whom the Bell Tolls" or Denis Johnson's "Tree of Smoke" but it does succeed in portraying the extent of the damage contained by a war. Allegiances are too easily broken and the shady dealings behind closed doors in order to survive have repercussions that last far beyond the certification of a peace treaty. Lee takes us into the internment camps in Hong Kong. The discomfort is evident and startling. It does, however, pale in comparison with what is being perpetrated simultaneously in Europe.

Ultimately, the novel explores very little. The character developments are too roughly handled to be innovative. The links binding the protagonists together become indistinct and frayed at such a clip that it is difficult to fathorn why they are interested in each other and why we should be interested in them.

It was only at rare moments that I felt myself penetrating the polite, varnished surface of expat Hong Kong. Lee herself seems to have a grasp of the complexities, but she never provides the reader with a way in.

WBOR 91.1 FM DJs OF THE WEEK

Dom Fitzpatrick '09 and Jeremy Kraushar '09

If you could only listen to one album for the rest of your life, what would it be?

JK: Hands down "The Emancipation of Mimi" by Mariah Carey.
DF: "Jagged Little Pill" by Alannis Morissette.

Favorite song to privately dance/ rock out to?

JK: I'd go with "Robot Rock." DF: "Digital Love" by Daft Punk

If you were in a band, what would it be called and what kind of music would you play?

JK: The Fast and the Spurious

(fusion of synthesized beats and beat boxing).

play techno grunge.

DF: Mooney's Meat-Pies. We'd

Theme song during lvies?

JK: Beyonce's "If I Were a Boy."

DF: Pink's "Start a Fight."

If you could meet any musician, dead or alive, who would it be and

why? JK: The Great Harry Houdini.

DF: David Blaine.

Best new music you've heard lately?

JK: Katy Perry. DF: Kid Cudi.

If you could time travel back to any rousical periody y have would you go and way JK: The year 4000 B.C.!!!!!! Neanderthal beats with rocks and

DF: Two weeks ago when I was

rocking out to techno with my bros. Why? It was sick.

Bands/musicans who have most influenced your musical taste?

Animal Collective maintains hipster cred on 'Merriwether'

THIS WEEKS REVIEW

BY LOUIS WEEKS

Lent, the Christian season of fasting, began this Wednesday. For me, these 40 days have evolved from a show of faith to an exercise in self-control. This Lent I have decided to abstain from two things: 1. Wearing my Boy Scout sash underneath my clothes. 2. Folk music. I know what you are thinking: "Take my eyes, but not the folk." Folk music has had a good run on this column, but it's time to move on. Do you hear me, Textile Bugling, and Rabbit-Raising badges? It's time to move on. So for the next 40 days, This Weeks Review will abstain from all things pertaining to red squirrels, mead-

owlarks, or easy plateaus.

In the absence of my old friend folk, I went looking for a new sound. Animal Collective's "Merriweather Post Pavilion" had been recommended to me, on numerous occasions, and postlisten I was pleasantly surprised. Animal Collective has been on my radar for a couple of years now as a hip new electronic-pop force to be reckoned with. 'Merriweather Post Pavilion" confirms all of those rumors, artfully, subtly, and with attitude.

I'll start with the attitude. These guys are hip. Too hip for Anglo-Saxon names, so they made up their own. Exhibit A: The band members go by the names Avey Tare, Deakin, Panda Bear, and Geologist. Their music backs up their hipness in a way that few hipsters can boast. The vocals are blasé and cool and they sing their lyrics with a sense of lazy

confidence. Unlike in most pop songs. which place the voice front and center, Animal Collective's vocals are thrown far back into each track and set on even ground with their complex instrumentation. As a result, their vocals become rhythmic and percussive, like the instru-ments of the band, and the two (vocals and instrumentation) are indelibly linked in every song.

What is so striking about "Merri-weather Post Pavilion" is the environment that it creates. The atmospheric and entrancing synth sounds and the echoing vocals create a setting, and Animal Collective is faithful to this setting through the album. With each listen, erningly unmelodic atmospheric melodies take a recognizable shape. After awhile, the songs are infectiously singable and, most of all, danceable.

The best thing about "Merriweather Post Pavilion" is its rhythmic brilliance. Each song on the album boasts an energetic and driving percussion perfornce. The rhythms are musically complex and involve multiple rhythms and meters that overlap, but it never feels confusing. Furthermore, it never feels like music for musicians. It is natural,

subtle, and very fun. Almost all of the songs are hits, but "My Girls" and "Brother Sport" are the way successes of this album. "My Girls" showcases how effortlessly Animal Collective makes complex rhythms simple to listen to. "Brother Sport" is a hip twist on a pop song, Typical Animal Collective, the vocals are rhythmic and percussive. Check out these songs and become hooked. Maybe this time next year, your goal for Lent will be "stop call-ing myself Panda Bear."

WHAT NOW?

THE BRYANT MBA One-Year Program

Do you have what you need to get the job you want? With the Bryant MBA one-year program, you will gain both the skills and experience to launch a successful career.

This accelerated one-year program is designed to build upon undergraduate programs in all academic areas - liberal arts, science, technology, and business - to name a few.

- · Begin the program directly after you graduate from college.
- No professional experience is required.
- · Gain hands-on experience, and build mentor relationships with corporate executives through the Business Practicum program.

SPORTS

Streak up to 8 games for women's ice hockey

BY EMMA POWERS

It was an emotional weekend for the women's hockey team as they celebrated the seniors' last home games by defeating Potsdam State 6-1 on Friday and 6-2 on Saturday
The wins added to the team's eightgame winning streak, the longest streak since the 2004-2005 season.

Jill Campbell '11 and Sam Stewart '09 led the team in Friday's game, each scoring two goals.

"I think the winning streak is a reflection of our team's determination and ability to be successful," Campbell said.

Shana Natelson'10 also remarked on the team's work ethic.

"Our success has been nothing short of a complete team effort," Natelson said. "Everyone has been playing their pole within the system, trusting that their teammates will do the same, and we've been succeeding.

Saturday's Bowdoin seniors Emileigh Mercer Lindsay McNamara, Scooter Walsh Julia King, Samantha Stewart, and Beth Battin were honored on the ice. Each of the team's seniors made significant contributions to the game on Saturday. Most notably, co-captain Julia King '09, returned from knee surgery and scored a

goal against Potsdam State.
"I think the most exciting thing was that Julia King was able to play in the game after a knee injury in January," Shana Natelson '10 said. "Her dedication to the team and to her rehab was incredible, and she finally got to play on Senior Day."

In addition, each one of the seniors, excluding goaltender Mercer, earned a point in Saturday's game.

It really shows the cohesion and skill of the senior class," Natelson

With these games behind them, the Bears finish their regular season 11-10-1 overall, and 7-8-1 in the NESCAC. They are ranked fifth in the league, and will play Colby vay in the NESCAC quarterfinals this Saturday at 4 p.m.

The Bears remain confident as they head into the postseason

"The team is focusing on the details of our game as we head into the playoffs," Campbell said.

"We'll need to continue our pe sistent hard work in practice and in games, which translated to our sustained success, to continue down that path," she added.

"We've had a great turnaround these past eight games, and we're not done playing yet," Natelson

MARGOT D. MILLER. THE BOWDOIN ORIEN

omen's basketball looks for title

It's championship time in Bruns-wick as the Polar Bears host the conference semifinals and finals this weekend and look to defend their No. 1 seed in women's basketball. Bowdoin will play Trinity tomorrow at 2 p.m., while the other semifinal will feature Amherst and Tufts later in the day.

"It is a big advantage to be at home and we are very proud of what we've done to get here," said senior tri-captain Maria Noucas. "We've faced a of adversity this season, and I think hosting this tournament is just a re ward for how hard we've worked all

No. 4-seeded Trinity will come to town looking to avenge their earlier loss to Bowdoin. The Polar Bears crushed the Bantams 62-44 in Hartford at the end of January but nevertheless, Bowdoin won't be taking them lightly.

"Trinity just has a ton of energy," Noucas said. "They picked up their first-ever NESCAC tournament win last weekend, so they are hungry to keep this roll going.

The Polar Bears know that they'll have to work hard on both offense and defense to secure the tourna-

"We really have to contain their ards," Coach Adrienne Shibles said. "They are very quick and they can all shoot. We have to get out to them on the perimeter but also take away their penetration to the basket Offensively, we need to run the ball and focus on ball movement. Again the boards will be critical in the outcome of the game."

To advance to the NESCAC semifinals, the Polar Bears had to beat Williams at home on Saturday. Bowdoin never trailed in an 85-52 victory and out-rebounded the Ephs 58-34.

"We executed our game plan re-ally well [against Williams]," Noucas said. "We knew we needed to stop Williams on the boards because one of their best guards was a great rebounder and we stopped her.

We shot very well inside and out and our posts made great passes as well. I think we just kept Williams guessing," Noucas added

The win was truly a full-team af-fair, as every active Polar Bear scored. Bowdoin dominated the game from the first whistle, led by first year Jill Henrikson's 15 points. Junior Leah Rubega scored 12 points and added seven rebounds, while Noucas chipped in 11 points, nine assists and three steals without a single turnover from the point.

"Everyone contributed and played

played well together as a team and it was nice to see everyone get in and play quality minutes."

The Polar Bears dominated the boards. The team out-rebounded Williams 28-13 on the offensive end and scored 32 second-chance points in the contest.

"I think we've known going in to most games that we're undersized compared to the competition," Shibles said. "We work super hard on being really active on the defensive and offensive boards. We were exceptional at both ends but especially on the offensive end."

As for the their potential oppo-nents for the final, the Bears had quite different outcomes against them earlier in the season.

Earlier in the season, the Bears handed Amherst (24-1, 8-1) its only loss of the season and sparked the Polar Bears on their playoff run, while a win over Tufts (21-3, 7-2) would be revenge for Bowdoin's only conference loss this season.

"We definitely realize the magnitude of the weekend," Noucas said. We just need to focus on every opponent and what they will do against us while also fine-tuning our own game. We need to keep rebounding and running and we need to keep our confidence up."

Medley relay leads swim

Despite finishing in eighth place, the Bowdoin women swimmers were able to topple a number of school records during the NESCAC Championship at Bowdoin.

Over the course of the grueling

three-day-long NESCAC Champi onships, the women's swim team swam well as a whole and produced one of their finest performances of

On Friday, sophomore Caitlin. Callahan started the meet off with a bang for the Polar Bears. Swimming the 50-yard breaststroke in a blistering time of 30.47 seconds, Callahan placed second in the individual event and set a new Bowdoin school record.

Fellow sopho Allison Palmer followed Callahan soon after in the 50-yard freestyle, finishing sixth with a time of 24.44 seconds, just off the national B cut time, meaning she will likely be invited to Nationals.

by backstroker Erin McAuliffe '11 and butterflyer Megan Sullivan '11 to round out the 400-yard medley relay. The quartet swam their way to a Bowdoin team record and an eighth-place finish wrapping up Friday's session on a high note for the Polar Bears.

However, it was only a matter of hours before the foursome was reunited to do it again. On Saturday, in the 200-yard medley relay, the same four sophomores successfully beat another Bowdoin school

record and placed fifth in the competition with an impressive time of

"I was overwhelmed by how well everyone swam, it amazed me that we were able to get right back into it after such a grueling Friday session," Sullivan said.

Later in the session, first year Allen Garner placed eighth in the 200yard freestyle with a time of 1:54.88 making a national B cut. Callahan took fourth in the 100-yard breaststroke, and the relay team of Sullivan, Jessie Small '11, Zoe Harran '11, and Garner took eighth in the 800-yard freestyle relay, setting yet another school record.

Sunday opened with a school record and sixth-place finish from Palmer in the 100-vard freestyle. Later Palmer, joined by Sullivan, Small, and Garner, ended the meet with another school record and sixth place in the 400-yard freestyle

"We knew that we were tied up with Wesleyan going into it so we had to swim strong," Palmer said. "I was amazed by how much we pow-

ered through... it paid off."
Indeed, Bowdoin edged out Wesleyan by 10 points with a final score of 669, placing eighth overall in the NESCAC competition.
Next weekend the men will finish

their season at the NESCAC championships held at Wesleyan. Everyone is looking crisp and

strong," said tri-captain Josh Kim-ball '09. Sophomore Christian Hurst added, "It will undeniably be an exciting meet and one with so really big swims."

Men's track places 4th in New England

BY CHESTER ENG STAFF WRITER

The men's track team looks to con tinue its success this season at the Open New England Championships this Friday and Saturday.

This meet has highly competitive and difficult qualifying marks and will feature a high-powered field consisting of athletes who come from Division I, Division II, and Division III schools throughout the region.

After finishing fourth of 24 teams last weekend at the New England Divi-sion III Championships at MIT last Fri-

day and Saturday, Bowdoin has reason to be confident about its performance heading into this weekend

"The other captains and I could not be happier about the performance on Saturday. It really feels great to be the fourth-best Division-III team in New England," said senior tri-captain Mike Krohn. "There were a huge number of outstanding athletes at MIT, and the men's team certainly established itself as a great track team at the meet. We had over 10 personal bests in events Saturday, and that was a huge factor in the team coming in fourth."

Luke Fairbanks '09 gave the most

noteworthy performance of the day, tossing a distance of 15.04 meters in shot put to capture the New England title in the event. The tri-captain will represent Bowdoin in both shot put and the weight throw at the Open New Englands.

'Luke has had a fantastic season," said Coach Peter Slovenski. "Becoming a New England champion and placing so well in a second event is an excep tional performance.

Seniors led the effort on the track by setting personal bests. Senior tri-

Men's b-ball beats Colby in quarters

BY DAVID SHAEFFER

Winning a postseason game is al-ways special. But to knock out a rival at its home court-it's all the more special.

On Saturday, the men's basket-ball team defeated Colby, 66-54, to move on to this weekend's NESCAC semifinal match-up against Middle-bury. The contest marked the third time this season the two rivals have squared off, with Bowdoin winning two of the three.

As the fifth seed in the NESCAC tournament, the Bears had to travel to Waterville for the first-round match up. With help from the enthusiastic home crowd, Colby jumped out to a 13-6 lead with 13:12 to play in the first half. Bowdoin, however, chipped away at the lead and eventually took

it with less than eight minutes left in the half on a Ryan O'Connell '12 three-pointer.

Despite getting off to a rough start, junior Mark Phillips wasn't nervous.
"When we were down 13-6 early

in the Colby game I wasn't too wor-ried," he said. "We were playing great defense and they were hitting some tough shots. I knew that if we kept on playing good defense we would get back in the game."

In the second half, the Polar Bears pulled away. Led by first year Will Hanley, who finished the game with 13 points and 8 rebounds, the Bears had a 16-4 run to start the half. With the score at 48-29, Bowdoin had effectively silenced the home crowd. Colby could get no closer than 11 points in the second half and saw its ason come to end.

Also on the board for the Bears

was sophomore Randy Defeo, with eight points and four assists, while senior Tim Lane had seven points and four boards.

With the victory, Bowdoin moves to the semifinals of the NESCAC tournament where they will meet na-tionally ranked top seed Middlebury. It will be the second meeting of the season; the Bears lost to the Panthers 62-50 on February 6.

Defense will be important against a strong Middlebury team, as will Bowdoin's ability to limit turnovers.

"I thought we played Middlebury real tough early this year. We out-re-bounded them and defensively played real well," said Phillips. "For us we must limit turnovers, get better motion in our offense, and limit the penetration from their guards."

The semifinal match-up will tip off at 2 p.m on Saturday at Middlebury.

Track heads back to BU

The women's indoor track team looks to gather personal bests, school records, and NCAA qualification standards this weekend at the Open New England's Championship

Boston University.

This past weekend, the Bears finished fourth of 24 teams in what proved a competitive Division III New England Regional Championship meet at Farley Field House, and the 25 NCAA qualifying performances they saw on their home turf will inspire them to reach for those standards this Friday and Saturday.

MIT left Farley this past Saturday as Division III New England Cham pions, scoring a total of 134 points, followed by Wiliams in second with 118 points, and then Tufts in third with 108 points.

The Bears scored 88 points, four points more than they had been seeded to receive. While Bowdoin had its sights set on a top three finish at D-III New England's this year, the exceptional competition and outstanding individual performances of so many competitors satisfied the Bears with

"Even though we were aiming for third, our fourth place finish feels good," said tri-captain Alison Pilon '09. "The scoreboard didn't neces-sarily reflect all the awesome performances we had. We did really well, but so did some of the other teams."

One such exceptional performance was that of first year triple and long jump star Laura Peterson '12, whose fourth-place finish in the triple jump met NCAA provisional qualifying standards, and ranks her eighth na tionally. The 37'11.25" jump broke a seven-year-old school record by over

"On Laura's final triple jump ef-fort she had great speed into her first

her second phase, and the speed and ver combined in her third phase... and lifted [her] off into flight," said Coach Slovenski. "She floated over the sand and landed with a wonder-

Ali Chase '09 pushed passed two people in the last 100-meter leg of the 600-meter run to post Bowdoin's only first place finish of the day. Runners-up included Annie Monjar '09 in the 3,000 meter run, and the 4 x 800-meter relay team of Dana Riker 10, Molly Duffy '11, Jess Sokolow '09, and Chase as anchor.

Competitors improved on seeds throughout the day, collecting unforeseen points for the team score. Christine Head '11 finished fifth overall in the pole vault, while So-kolow also exceeded her seed with a fifth-place finish in the 800-meter

Kelsey Borner '09 took third in the weight throw, and Shemeica Binns '09 took fourth in the shot put. Elsa Millet '12 took third in the 400-meter dash and fifth in the 200-meter dash. while classmate Emily Barr '12 took sixth in the 55-meter dash.

"Emily Barr has had a phenomenal year in the dash for our team," said Slovenski. "Her time of 7.49 was a highlight of the day, and very close to the school record."

"We had several performances that moved us ahead of our seeded positions, and we had several per-formances that missed adding more points by inches and tenths of a second," Slovenski said. "Nothing was missed without supreme effort."

These efforts will continue into

this weekend, when the athletes will travel for the second time this season to Boston University's Track & Tennis Center, where a banked track, extra Division I competition, and well-tapered athletes typically result in some of the season's best performances.

Squash teams complete regular season

BY ANDY BERNARD

Both the men's and women's squash teams competed at their respective national tournaments over the past two weekends, battling teams ranked close to Bowdoin in last-leg efforts to end the season on a good note. The women entered their national tournament, the Kurtz cup, held this year at Harvard, with a record of 14-7. The men, competing in the Summers Cup at Princeton, entered the tournamen with a record of 10-12.

The women's first-round match as against Middlebury, marking the third match against them this season. The top of Bowdoin's ladder came through, with the top six players winning, and five of the six dominating by scores of 3-0. The victory was a relief for the women, who had narrowly escaped their previous meeting with Middlebury with a score of 5-4.

Middlebury with a score of 5-4.

The next challenge for the Bowdoin women came the following day against Brown, who had defeated the Bears by a score of 8-1 in their last meeting. In this match, Brown came out on top once again, winning by the same margin. Bowdoin's only victory came at the No. 2 slot, from sopho-

om Sunday, the Bears faced another formidable opponent at Mount Holyoke. No. 4 Alex Franceschi '09 and No. 6 Lizzy Warner '12 were able to capture wins, but Mount Holyoke

took the rest of the matches, winning 7-2. As a result, the women's team finished its season ranked 12th in the

"The weekend was a great way to end a really amazing year," said Fran-ceschi, a co-captain. "It was tough to lose to Brown and Mount Holyoke, but I think everyone played really well and the matches were closer than score showed."

This group was the tightest-knit team I have experienced in my four years playing for Bowdoin," added senior co-captain Biz Gillespie. "And in that respect, I think we finished

The men, coming off of a four-match winning streak, hoped to capture the Summers Cup title at Princ-

They began the tournament on Friday with a match against George Washington University. The heavily favored Polar Bears were able to secure victory by a score of 7-2, with wins coming from Nos. 2-8 on the

Saturday's opponent in the semifinals of the Summers Cup was Tufts, which the Polar Bears had defeated just two weeks earlier by a score of 7-2. In this meeting, though, the Jumbos showed a lot of heart and battled to take four matches from Bowdoin. The Bears were able to respond to secure the victory, however, taking matches at No 1. by Andy Bernard '11, No. 2 by David Funk '10, No. 3 by Peter Cipriano '10, No. 5 by Arun Makhija '10, and No. 6 by Robbie Lynn '09.

The victory sent Bowdoin to the Summers Cup final in a battle against Middlebury for 17th spot in the national rankings. The Polar Bears had won both of their previous matches against Middlebury this season with core of 5-4.

This match was just as close as the first two, but with less favorable results; the Polar Bears battled but were unable to triumph, losing 5-4. Although senior co-captain Robbie Lynn's last Bowdoin match couldn't e a team victory, he dominated in his No. 6 spot, allowing his opponent only one point in the entire match

'Although this season didn't ultimately turn out how we had planned, it was valuable in other respects than the tallies in the win column," said sophomore Rahul Madan Mohan. "Our freshmen gained valuable ex-perience, and the core of our team finished the season with a lot of motivation for next year."

"As for next year, the future is bright," added co-captain Funk, "We are only graduating one person. Senior leadership will dictate where the team goes next year and I have high hopes and am optimistic that we will do much better."

Funk, Elena Laird '11, Gesswein Franceschi, and Gillespie will all compete in the Individual Nationals tournament at Williams College this

TRACK CONTINUED FROM PAGE 11

captain Damon Hall-Jones scored in the 55-meter dash by running a time of 6.63, while Krohn and lke Irby '09 each earned points in the 55-meter hurdles by running a 7.97 and 8.12 re-

"Mike, Ike, and Damon have given us an unusually strong combination of talent in the 55-meter dash and hurdles," said Slovenski. "They are the kind of clutch performers who have their best races in championship competition?

In other events, Thompson Ogilvie '10 finished fourth in a tightly contested mile run in 4:19.89. First year Brett Stein placed fifth in the 800-meter run by running a 1:57.99, another tight race in which there was a two-second differ-

ence between the top eight finishers.

Each runner will compete in the same event at the Open New Englands, intent on running their best on the big stage. Ogilvie will attempt to qualify for als in the mile run. In order to do so, he will need to run a 4:13; his nal best so far is 4:15.

Hall-Jones and Kyle Hebert '10 will also run for the Polar Bears in the 200-meter dash, while Irby and Riker Wikoff '12 will do so in the 500-meter

ch athlete competing this ekend, this meet brings a deep sense

weekend, this meet orings a deep sense of excitement and anticipation. They are eager to square off against opponents that they normally would not.

"For any runners that believe they could run in any division, this meet is what they look forward to all year, when they look forward to all year, where they can go out and race head to head against athletes representing Division I schools," said Hebert. "You vant to go out and try to beat up on the 'big boys'. We have some very tal-ented athletes on our team, who have been training hard and are itching to step out onto the track with this higher level of competition so that they can really see where they stand and feel their hard work pay off."

Bowdoin will compete at the Open New England Championships this Fri-day and Saturday at Boston University.

Converted runner Martin a Nordic star

BY CRAIG HARDT

When Courtney Martin '09 arrived at Bowdoin four years ago she never expected to be talking about her endeavors on the slopes. She was, at least at the time, a cross-country runner.

Former Bowdoin Nordic skiATHLETE ing coach, Marty
PROFILE Hall, had other ideas.
Martin, a native of
Hermon, Maine, had skied competitively her senior year of high

school, but "just to keep in shape for track season."

After strong encouragement from Hall, Martin decided to give the Nordic ski team at Bowdoin a

"I didn't want to run during the track offseason, so I just kind of fell into skiing," she said.

Martin, also a captain of the cross-country team, is now one of the Nordic ski team's key members and has seen the program "grow up" during her time at Bowdoin. The team has more members than it ever has before and is also having more success. Martin noted that the team is becoming much more competitive.

"It's getting to the point where there might have to be cuts in the future—that's never happened before," she said

The current coach, Nathan Alsobrook '97, has brought what Martin termed "an enthusiastic vibe" to the burgeoning program.

"I think he's definitely going to be able to take this team to the next level," Martin said.

Nordic skiing has given Martin and her teammates the chance to be part of what Martin called a "tight-knit" support group. Between the countless hours of training, preparation, and traveling, the team has become one of the closest units on campus.

As a team that has to travel a significant amount of time just to reach its training site, spend hours preparing its equipment, and compete for almost three days at each meet, the Nordic ski team might be one of the most demanding organizations at Bowdoin.

"It can be frustrating because it's harder to get involved in other things, but I don't regret it," said Martin.

But the skiers do get the satisfaction of an enjoyable few days on the beautiful slopes of New England's mountains after a long week's preparation. Each meet—in skiing terms, "carnival"—brings all the teams together in what becomes, quite literally, "a carnival-type atmosphere."

In Martin's opinion, Nordic skiing is great because "it gets you outdoors during winter. It's much more enjoyable than running in an indoor gym."

It's also helped her in the class-

"It's really good for time-management, my grades generally seem to go up [during Nordic ski

According to Martin, because Nordic skiing involves so many different mental components to go along with the physical aspects, it has helped her learn how to mentally prepare for challenges she faces in many different areas of her life.

As Martin prepares for life after Bowdoin, she admitted that "just being a part of organized sports teams and having the support of a community like Bowdoin" are the hardest things that she will have to give up after graduation.

Next year, Martin plans on working with a veterinarian before she applies to veterinarian schools in 2010.

Despite the heavy workload she expects to take on in preparing for her new career, Martin still expects skiing to be a part of her future, but perhaps not quite to the extent that it is part of her life now.

SWIMSUITS

CONTINUED FROM PAGE 1

won the races. "I think it was a lot of the same people, they were just faster," he said. The Bowdoin women finished eigth in the NESCAC (see related story page 11)

related story, page 11).

However, he did feel that in some cases other teams wearing suits had a negative influence on Bowdoin

swimmers' standings.

"We had some kids I thought were going to be in the point scoring," Burnham said. "There were a few people from other teams that probably got there because of the suits."

Despite not being able to outfit its whole team in high-speed suits, Bowdoin was still able to get its hands on four Blueseventys. The issue, Burnham said, was both a cost and availability one. Burnham said he was unable to find any available LZRs, getting the four Blueseventys alone was difficult, and the order for two more for the men's NES-CAC meet this weekend had fallen through.

Burnham said that Williams was able to get as many suits as they did because its swim team is sponsored by Speedo.

Regardless of the difference in suit availability for different NESCAC teams, some of the Bowdoin swimmers felt there was a greater issue at sarily reflect all the awesome performances we had. We did really well. but so did some of the other technical rol legal sraw yeth tath wond I"

"I know that they were legal for this year, but for me, it changed the meet," Palmer said. "It's like putting on seal skin. I called it the 'cheater suit' all weekend."

Palmer was one team member that took particular issue with the suits, and she even elected not to wear hers in one event, despite knowing, ahe would probably gan faster, with, iton. 1221, 12, those, mot, to hwear the spelims and finals for the 50 free, because I felt I wanted to 'own' one event," she said. "I was the only swimmer in the finals who didn't have a LZR or a Blueseventy." Palmer finished in 6th place in the event, with a final time of 24.44 seconds.

Burnham concurred with Palmer, not shy about his opinion of the suits.

"I agree with her," he said, "I hate them, as well."

"Just because it's not illegal doesn't mean it's OK," he added.

Burnham also mentioned that the team's top male sprinter, Nathan Mecray '12, has said that even if a LZR or Blueseventy is available to

him, he will not don the suit.

Palmer even questioned the school record she set during the meet in the 100-meter freestyle, a race she wore a Blueseventy in.

"I'm having moral issues about whether I think it's fair I get the record," she said. While Palmer struggled with the idea of using the suit, others on the team were less concerned. Mac Routh '12, who will be swimming the men's NESCAC meet this weekend, was able to acquire a LZR through his father from a store in Virginia.

"Some people, including me, think that while they're legal, we might as well use them because it seems the teams that don't are at a disadvantage," Routh said. The debate among NESCAC

The debate among NESCAC swimmers seems timely, on Friday, February 20, Fédération Internationale de Natacion (FINA), the worldwide swimming body, met with 16 swimwear manufacturers in Lausanne, Switzerland to discuss the fate of suits like the LZR and Blueseventy, according to FINA's website.

Ultimately, the group made a recommendation to the FINA Bureau to ban suits that, among other things, have a thickness greater than one millimeter or provide a buoyancy effect more than 1 Newton.

Both Ward and Burnham said that after this past decision on Friday, they fully expect FINA to adopt the policies in March, when the FINA Bureau will meet in Dubài, United Arab Emirates.

"My sense is the NCAA will adopt the very same rule," said Ward. "I don't expect it to be a problem [next year] like it was this year."

The Death of the Fan

COLUMN LIKE I

BY CHRIS ADAMS-WALL
COLUMNIST

I have a lot to smile about these days: Ken Griffey Jr. became the anachronistic "Jr." of old last week when he re-inked a contract with the Mariners for one year, which has served as a temporary panacea for baseball that haplessly continues to mop up the A-Rod mess, the Knicks finally agreed to buy out the dormant and unhappy Stephon Marbury (I hope Celtics fans have as much fun rooting for him as I have these past six years!), and the plummeting Rangers fired stoic and ineffective boss Tom Renney, and replaced him with 2004 Stanley Cup-winning coach John Tortorella in the hones that the irascible stand-in will be able to light a fire under the struggling club's proverbial rump.

Yet, even with the large influx of good news, there remains something that has been seriously bothering me ever since I returned to the States, and that something can be found right here on campus. Or rather, cannot be found.

It is an absolute privilege to be able to broadcast the play-by-play of the majority of Boyndin sporting events over the internet every weekend, and an even greater privilege to be able to watch my classmates excel for their respective teams while doing so.

Just by attending game after game over the past two-and-a-half years at this college, I've witnessed stunning upsets like the football teams over Williams last year, a thumping or two of Colby on the ice, and exceptional accomplishments, like Eileen Flaherty eclipsing, Jaura Schultz for first on the last time, scoring, Jist in Bowdoin basketball history, not to mention the countless touchdowns, one-timers, and jump-shots.

But now, as I stand from my perch atop the Sid's lookout balcony, or sit at the webcast table at mid-court in the upper deck of Morrell, the experience feels diluted and incomplete, something is missing. Something glaringly apparent. Something whose absence is, to say the least, disturbing, embarrassing, and quite frankly, unacceptable. Yes, you may have guessed, it is the fans. Or as I like to call them: the missing.

Last weekend the Bowdoin women's basketball team took on Williams in the first round of the NESCAC playoffs at Morrell Gymnasium, and as I prepared my pregame notes from the broadcast post, I looked across the court to account for the crowd. Attendance had been down nearly every game this season, but I was hopeful that students would opt to venture out in the sunny winter's day to Morrell over bee-lining it to the dungeons of the library.

But what I saw just a couple of minutes before tip-off shattered those hopes. Amid the medium-sized crowd of local Brunswickians and players' parents, in the normally bustling section allotted for Polar Bear Nation, sat no more than ten Bowdoin students who had come out to support their team. Ten students. In a school that comprises more than 1,700 kids, less than 1 percent of them had decided to show up.

There were, of course, more. The pep band boomed away from the upper deck. The football players monitored the foot traffic. And my broadcast partner and camerawoman prepared to go on the air. And in this moment, whether each of us knew it or not, we were presented with a sad, but undeniable truth: there were more student employees at the game than actual student

The same could be said at the Sid last Friday, when the Bowdoin women's hockey team took on Potsdam State in front of a crowd majority of ushers and event staff workers.

Some of us might admit that we would go anyway, regardless of working the games or not. But that isn't the point.

On the fateful day that each of you decided to come to Bowdoin, you, perhaps unknowingly, signed an unwritten agreement that you would support not only your friends and their personal endeavors during your respective careers at this prestigious institution, but your peers, as well, and, the school itself; you are not fulfilling your duty to your friends, peers, and school by staying home.

Now, I understand that some of you aren't sports fans, and it's perfectly fine that you're not. But few of you will be able to say that you don't know someone, who plays a sport here. And just fike you would appreciate their support in the extracurricular activity that you value the most, so, too, do they.

Last Friday, the women's hockey team continued their remarkable turnaround when they defeated Potsdam State 6-1 to earn their seventh consecutive victory (which has since been extended to eight going into the NESCAC playoffs at Colby this weekend), and we weren't there to share it with them. And I'm sure the men's basketball team would have appreciated a few more fans in their tough loss against Amherst a couple of weeks ago, a game that I feel could have turned in our favor had there been more energy from the crowd. But that's impossible with only five students.

We don't go to a Division I school, but what does that matter? Should our ardor be any less fervent because of that? Of course not. And I know: it's a busy time of year for all of us. But you know who's even busier? How about the athletes? If they can make time to practice, watch film, travel on weekends, practice some more, and play in the games, on top of keeping up with an onerous academic schedule, then you can certainly set aside an hour-and-a-half to watch a basketball game.

While calling the opening round of the playoffs this past Saturday at Morrell, once again bearing witness to the dearth of student fans, I tried to determine just what was causing this unfortunate phenomenon to take place, and the only two theories that I could surmise were that of people not knowing how to get into the gym because of the construction of the new fitness center, and that of pure laziness.

To ensure that it is no longer the former, here are the complicated, labyrinthine directions to Morrell Gymnasium: find the Druckenmiller parking lot and walk into the Gym. And to ensure it's no longer the latter, come, out and fulfill your duty by supporting the Bowdoin women's basketball team tomorrow at 2 p.m. in its quest for NESCAC supremacy. The Bowdoin women are currently No. 1 in the conference, now make sure it stays that way.

Men's ice hockey finishes in sixth, to play Ephs in first playoff round

BY ANDREW OTTON

While cold winter conditions continue to lay siege to campus, the Polar Bears kept things hot on the ice in the last weekend of the

Bowdoin strolled to a 4-1 win last Friday against St. Michael's College and fell just short Saturday, losing 2-1 to Norwich University.

On Friday, Bowdoin scored early as Kit Smith '11 lit the lamp with 4:28 gone in the first period. In what would prove to be a good game, Kyle Hardy '11 notched the assist on that goal.

The Purple Knights pulled one back less than a minute later, yet Bowdoin promptly responded with its second. Assisted by Jordan Lalor '12 and Ryan Blossom '10, senior co-captain Mike Collins '09 scored at 17:29.

Shearer-Hardy then led the charge forward and scored at 14:46 in the second, set up by Leland Fidler '10 and Jeff Fanning '11.

With only 1:16 gone in the third, Hardy scored the Bears' fourth. Created by Fanning and Brian Fry '10, Hardy finished the regular season as Bowdoin's leading scorer with 11 goals.

Goalie Chris Rossi '10 stopped 26 shots in his fourth win of the

On Saturday fortune favored the Norwich Cadets as the Bears

STAFF WRITER

lost a close game. Ranked No. 7 in NCAA Division III Hockey and recently crowned champions of ECAC, Norwich is certainly quality opposition.

The Cadets hit first at 8:59 in the first period. Yet the Bears responded with 2:36 remaining in the frame

Assisted by Graham Sisson '12 and Brendan Reich '11, Collins scored his fifth of the season to level the game at one.

The game remained deadlocked through the second period, but with only 1:51 gone in the third snatched a power-play goal, which proved to be the eventual winner.

Richard Nerland '12 stopped 26

of 28 shots at the Bowdoin net.
"I thought it was one of the best games we've played in a very long time," said Collins.

"Obviously, we're still not scoring enough goals, but I think we generated a lot of scoring chances that game which he hadn't been doing in the past so, overall, I think it was good for us going into the playoffs."

Finishing sixth in NESCAC standings, the Bears face Williams College in the first round of the playoffs. Although Bowdoin defeated the Ephs in the first game at Sidney J. Watson Arena 8-3, Saturday's encounter may prove more

Yet senior co-captain Matt Smith

'09 is optimistic about Bowdoin's chances.

"The most difficult part about playing Williams on Saturday will be dealing with the fact that we beat them before by a pretty wide margin," he said. "It's safe to say we might underestimate them as a team since we beat them earlier in

Collins considered a more cautious approach to the game Saturday, he said. The 8-3 victory "was a really close game going into the third period, it was 4-3 until about 13 minutes left, and we busted it open and they kind of gave up a

"The key to Williams is going to be getting on them in the first 10 minutes," he said. "If we can start out strong and pop one in maybe the first five minutes, they're going to be worried, nervous, they're going to start gripping their sticks a little bit tighter and that'll play right into our hands."

'They're a really good frontrunning team but they aren't as good coming from behind."

Smith adds that avoiding penalties is key to the Bears' game plan

He emphasized, "Five on five we're a great team but once we start taking penalties is where we get into trouble."

Bowdoin will play Williams tomorrow in Williamstown, Mass.,

OPINION

BOWDOIN ORIENT

Study abroad?

f this year's sophomore class, more than half have applied to study off campus next year. With so many Bowdoin students choosing to study away each year, one could hardly call us insular. We boast a wide range of off-campus study options, including destinations from Great Britain to Sri Lanka. Those who go abroad will inevitably be exposed to new cultures and challenges. However, as studying abroad becomes increasingly popular, we should be increasingly wary of considering it the best choice for all students. While the experiences gained studying abroad are valuable, they are not necessarily more valuable than the ones gained by spending all eight semesters at Bowdoin

The motivations to study abroad are as varied as the destinations to choose from. Some students wish to take advantage of the opportunity to study at an institution that specializes in a certain field. Other students decide to go abroad to immerse themselves in foreign culture. And, inevitably, some students opt to exchange a semester of rigorous study at Bowdoin for a few months of partying in Europe with other Americans. Whatever the reasons for going, the chance to visit a new place, be exposed to new intellectual perspectives, or have a good time are just a few of the potential benefits. Leaving behind friends and family for a semester is an intense challenge, one that should not be dismissed. However, some students feel pressure from Bowdoin, peers, and popular college culture to study away, even if they aren't sure of their goals or motivations for doing so. Instead of thinking that studying abroad is the default way to spend junior year, it should be a decision that is made actively after careful deliberation.

Bowdoin is an excellent institution, and there are few other places in the world that offer such a rich course of study with motivated peers and a dedicated faculty. Furthermore, junior year is a time when many people have finally forged strong relationships with friends and faculty or become deeply engaged in academic passions. For some, it hardly seems the time to disrupt a good stride. If the goal is cultural immersion, it may make just as much sense to postpone travel plans until after

While junior year may be the perfect time to experience another culture and deal with the uncertainties of life in a foreign country, it is by no means the only time to do so. We are young, and we have the rest of our lives to wander the world. And, after all, we have only eight short semesters at Bowdoin.

LETTER TO THE EDITOR

Watson Arena heckling should be expected

To the Editors

After reading a certain letter to the editor concerning "deroga-tory" terms used at a hockey game ("Hockey game heckling, homophobic, classist," February 20, 2009), I

almost threw up. It makes me sick to attend a school dominated by politi-cal correctness. Here are my problems with this letter:

1) What are you doing at a hockey game if you can't stand hearing "de-rogatory" terms yelled at the opponent? It is an intense men's sport,

and that comes with the package.

2) How is "fairies" offensive? To

answer my own question, it is not. I know of a couple more words better used in that context.

Anyone else who is offended by such chatter, please leave us to our own devices and do whatever it is you do with your time besides criticize sports fans.

Sincerely.

Cameron Swirka '10

Supplant 'awkwardizing' with improvising

IMAGINING BOWDOIN

BY ROSS JACOBS

What if, after fumbling the first few lines of the inauguration oath, Justice Roberts or President Obama had blurted, "Awk-wuuuurd!" Surely, an already uncomfortable situation would be rendered far more embarrassing for the nation and it would have hu miliated both of them. Given that the pronouncement of "awkward" almost always intensifies the discomfort in an interaction, why does our generation remain addicted to this term?

I suspected at a young age that this would subside after puberty. I thought for sure it would be abandoned after high school. But here we are as young adults and the term continues to spread like an epidemic. In fact, I would nominate "the awkward" as the 21st century successor to the experience of "the ab surd" during the 20th century.

In the beginning, it was used sparingly and prudently. But slowly, people started using it as a kind of filler, like the word 'like.' I watched, half amused, half revolted, as it slowly spread to almost every sphere of human life. With declining confidence in inherited traditions, the experience of the awkward

is most likely to strike events where seemingly frivolous formalities cannot be taken seriously. During situations like weddings, changing in the locker room, greeting the parents of a prom date, or deciding who will pay for a meal, the scene is usurped by a gaggle of insecure awkwardizers eager to make all situations as uncomfortable

Awkwardness, or rather, giving into the temptation to awkwardize a mildly fortable situation, has become a social disease restricting creativity, risktaking, and adventurousness. What we witnessed as high school students was the birth of awkwardiphobia-the tendency of students to confine themselves to a tiny, circumscribed sphere of behavior within which they knew they would never be accused of awkward

Naturally, this makes you wonder: What can be done to ameliorate this wretched situation? To answer our query, we should turn to those who most consistently refrain from awkwardiz ing situations-theatre kids, especially those with a background in improvisa

They do not realize it, but those with a background in the dramatic arts are absolutely inoculated to the awkwardizing disease. Around these peo ple, you can make the most outlandish statements, commit the greatest social

blunders, and they resist the temptation to awkwardize. Their secret?-the "yes. and..." rule. The improvisers are taught to make the best out of uncomfortable situations, to make those who screw up look good, and to keep the scene alive They feel an ethical obligation to build upon the statements of others; they know that nothing destroys the scene like negating the opening suggestions.

When someone begins a scene with, "It sure is cold in this airplane," the improviser responds with an enthusiastic, You're right. Perhaps the life jackets can warm us up." The awkwardizer, opportunist that he is, would exchange a glance of awkwardness with his buddies to deliberately make the initiator feel foolish while creating an artificial sense of solidarity with the fellow awkwardizers. Theatre people show us that the awkwardizer lacks the virtue of improvisation.

What can be done to remedy this situation? We need an improvisational vanguard that can wrest Bowdoin from awkwardizer's stranglehold on social mores. They can educate our generation in gestures that genuinely encourage bold projects, unusual thinking, and diverse encounters. Maybe, with their help, we will be able to think of "the awkward" as a bridge, a bridge between the highly scripted lives of past generations and the improvisational freedom that future generations will enjoy.

Blacked out, Bowdoin bands together

CIVILIZED LIFE

RY ANNIE MONIAR COLUMNIST

Monday morning, I awoke to find the universal sign for a Bowdoin Blackout: a garbage can holding the door of the bathroom open to let a small flicker of light enter the stall from our com mon room window.

I groaned, knowing, that after walkdown 15 flights of stairs to a dining hall buzzing with the artificial energy of a generator, I would have to fight for an itlet to "do homework" in the campus refugee camp.

After years of study and data collec tion, I've concluded that the severity of Maine's mid-coast storms fluctuate with the workload at Bowdoin Col lege. Monday's power loss, our third of the year, fell two weeks before Spring Break, when midterm assignments are all the rage.

one before winter break hapened about eight hours before my English seminar had a 20-page term pa-per due. The class sat huddled around a booth in the back of Thorne, sharing

one power cord, typing furiously and debating how kosher e-mail submis-

With no e-mail, and no light or hear outside of Thorne, what's a Bear to do? We have no choice but to seek re-

lief and shelter in Thorne, victims of a violent storm. Under severe duress, students will gather in packs on the floor, sitting cross-legged next to coveted outlets

The scene echoes Stephen King's spectacularly corny made-for-TV movie, "Storm of the Century." The title readily gives away the premise: the scariest storm of the century approaches a small Maine village, and its inhabitants must huddle together in the genera-tor-run city hall. The handsome chief fireman and his lovely, concerned wife boldly try to maintain hope in the shelter. It's no wonder King is from Maine.

At the end of the three-part series, the little Maine village overcomes their hardship, and goes on to lead their coastal lives. The arrival of the anti-Christ in the middle of the storm gives their story an off-beat twist, but the principle of camaraderie remains.

Power outages at Bowdoin, while certainly a logistical blow to our weeks, have the extremely rare effect of forcing the campus into one place, where, un der the same trying circumstances, we must solve our same dilemmas.

My term-paper-writing seminar found out together that our professor had extended the deadline. In a cathartic and comic moment, seniors whom I'd never interacted with outside of our classroom were suddenly jumping up and down, shouting for joy, and slapping one another high fives. Sometimes, it's easy to forget that we are part of a small group of comrades here, with a lot more in common than we often recognize

vouldn't wish a power outage on Bowdoin on a weekly basis; I think three times a year is plenty. But I do think that the silver lining on the dark, incapacitating storm cloud that sometimes passes over our campus is the ability to look around Thorne, and remember that we're part of a community-a campus whose common bonds can bring us together in hard times, electrical of

And I would plan on gleaning that silver lining out of a desperate situation soon, because according to my calendar, reading period will be coming up in several weeks, no doubt accompa

WEEKLY CALENDAR

FEBRUARY 27-MARCH 6

FRIDAY

"Miss Julie"

Directed by Mo Zhou '09, this August Strindberg play explores class, love, and the battle of the sexes in 19th century Sweden. The play details the life of an aristocratic family and its servants.

Libra Theater Studio, Memorial Hall. 7 p.m.

"Stuck with Freedom and Virtue"

Berry College Professor of American Politics Peter Lawler will discuss the implications of biotechnology on our understanding of the American political experience, religion, and philosophy.

Faculty Room, Massachusetts Hall. 7 p.m.

BOWDOIN ORIENT

BRUNSWICK, MAINE

THE NATION'S OLDEST CONTINUOUSLY PUBLISHED COLLEGE WEEKLY

Sean Kingston, Santigold plan to headline Ivies

BY WILL IACOR **ORIENT STAFF**

While not officially confirmed by Bowdoin's Campus Activities Board (CAB), online concert schedules suggest that Sean Kingston and Santigold are slated as headliner acts for Bowdoin's Ivies Weekend, with Saturday, April 25 performances listed for both on campus.

Sean Kingston's official site and MySpace Music Page list an April 25 concert at Bowdoin College in Brunswick, Maine. The Miami-born and Jamaican-raised R&B, reggae and pop artist has the chart-topping songs "Beautiful Girls," "Me Love," and "Take You There.

Contra, who formerly toured as a DJ with M.I.A. and is now tour-ing with Santigold, has a MySpace Music page listing an upcoming show at "Bowdoin University" for the same Saturday in April. Alter-native rock artist Santigold, compared in style to M.I.A. with 1980s pop influence, is known for her songs "L.E.S. Artistes," "Creator," and "Lights Out."
Head of GAB Katherine Finnegan

'09 said in an e-mail that these acts are not confirmed by the College, as they have not received contracts back from the artists. She said the CAB plans on releasing information about the booked Ivies per-

Junior Libby Wilcosky speaks to a tour group outside of the Office of Admissions on Wednesday. With the arrival of spring, the College will renew late-after noon tours on April 1, taking advantage of warmer weather and longer days.

Rise in TFA applicants at Bowdoin, nationwide

Teach For America (TFA) has experienced a considerable surge in popularity this year, with a 42 percent nationwide increase the number of applications for the

highly competitive program. TFA Recruitment Director Abbey Prior, who is part of the Boston recruitment team, said that the number of Bowdoin applicants this year reflect the positive national trends. However, Prior did not provide the Orient with the specific number

cepted Bowdoin students to the program because numbers are not available on a school-to-school basis until the entire application process was complete.
Prior said that TFA's application

spike is indicative of the program's increasing visibility among college students, among other factors, and is "not just a function of the economy."

The top employer of Bowdoin graduates in 2007 and 2008, TFA is an organization that recruits and trains college graduates to serve as ties. Last year, nearly 25,000 individuals applied to TFA-including 32 Bowdoin students. Of those 32 students from the College, 12 were accepted

President of Bowdoin Student Government (BSG) Sophia Seifert '09 will become a TFA corps mem-ber at a Philadelphia public school next year. She partly attributes her decision to join TFA to her experience working with a demographer at Princeton University last summer.

Please see TFA, page 3

Study abroad imbalance to crowd housing

OCS Office reverses decision, allows students to study away during their preferred semester

BYTOPHTUCKER

Due to an imbalance in Off-Campus Study (OCS) applications, the College is preparing to accommodate an u usually high number of students on campus next fall.

According to Associate Director of Housing Operations Lisa Rendall, 25 Brunswick Apartment doubles will become triples, two Stowe Inn quads will become quints, three Howard quads will become quints, and all 11 Stowe Hall quads will become quints

For the late Februrary deadline, 55 more students indicated that they wished to study away in the spring than in the fall. Although OCS originally planned to force a number of students to study away during the fall instead of the spring, they have since recanted.

"We have picked up three volun-teers who should be able to make that switch," wrote Director of Off-Campus Study Stephen Hall in an e-mail to the Orient. "Apart from that we will just plan to deal with the projected imbalance...as well as we can."

"The main repercussions will of course be in housing and course enrollments." Hall said.

Food pantry sees increased demand in deteriorating economic climate

BY EMILY GUERIN ORIENT STAFF

outside of the the Mid Coast Hunger Prevention Program's (MCHPP) food try in Brunswick an hour and a half before it opens are longer than

When the doors open, the clients (as the food pantry staff respectfully refer to the patrons) file in and wait for a consultation that determines whether or not they are eligible for the free provisions. The clients are split between heads of families and individuals, but many are unemployed or have recently been laid off. The food pantry almost always accepts every one, and rarely are clients turned away because their income is too high Food pantry Director Pam Gryspeerd tries to "look for any way we can make them qualify," occasionally "breaking rules for the right reasons." Every cli-ent still goes through the process of consultation, however, a process in which an administrator reviews their salaries, employment status, food stamp eligibility and other socioecoter the kitchen where volunteers fill a box with bread, meat, fruit, vegetables and dessert items. Clients can return for food every two weeks, and receive non-perishable items like cereal and ed goods once a month.

Gryspeerd has seen her clientele increase gradually every year, but between 2007 and 2008 the number of households served at the food pantry jumped by 21 percent, an increase reflected in the wait outside the pantry each morning. Last year, the pantry provided provisions to 1055 households, up from only 871 in 2007.

What is most distressing to Execu-tive Assistant Gina Vickus is not the higher number of clients, but that 362 of them were "new people who have never been in need before" instead of previous clients who had frequented the pantry. Within the overall increase in households served, the amount of new clients has also increased to 36 percent in 2008 from 27 percent the year before. What this means is that more people are unable to meet their

Hall estimates a 35-student surplus in the fall. As the housing changes will yield 41 new beds, some of them may go unfilled. The changes will directly affect up to 155 students' housing, although Hall's estimate suggests a number closer to 125.

Associate Dean and Director of Residential Life Mary Pat McMahon has faith in the campus' ability to cope.

"We're a small campus, so any shift in numbers is something you can perceive," she said. "But it's still going to be a small campus. We can absolutely manage that number of students—we've done

McMahon made a point of commending the College's enrollment forecasting models, noting that they are ordinarily quite precise, although they failed in this instance. While the reasons for the disparity are unclear, McMahon noted program availability, on-campus commitments, and social life as students'primary considerations when deciding which semester to study away.

Schuyler Ransohoff '11, one of the three students who volunteered to switch from spring to fall, sees the social considerations as the main determining facor to most students.

"It seems to the what happened was,

groups of friends got together, they picked a semester, and then they're all going that semester," said Ransohoff. "And nobody wanted to switch because all their friends are not here."

Ransohoff, who plans to study abroad in Madrid, also blames weather, noting that "the spring semester kind of sucks. The fall semester is where it's at."

Kara Wilson '11, who will be studying in Bologna, Italy, was among the students who would have been forced to go abroad in the fall. However, said Wilson, "I feel confident that the recording committee would have reviewed my additional reasons and let me go in the spring."

Wilson chose the spring to be abroad with her twin sister, to be on-campus as

the new first-years arrive, to room with a friend going abroad in the spring, to sail in the fall, and to take an Italian Renais-

Additionally, Wilson said, "My family moves back from Italy this summer and it would be difficult to plan a move back to America and plan to go abroad at the transition."

"I do not think forcing people to switch was the right choice. The OCS does not have the authority to influence the lives of students in this way," said Wilson, who credited the College for reversing the original decision.

"The College will continue to look for remedies for the semester imbalance," said Hall. "We already have a number of methods to help us maintain the numbers in the fall and project the eventual OCS enrollment in each semester, but obviously we would like to have less variation from year to year, and we'll be thinking about other possible techniques."

Ransohoff agrees it would have been wrong to restrict OCS opportunities by forcing students to switch, given that "we came to this school under the guise that this school encouraged people to go abroad. It's every person

Still, he sees some benefits to switching.
"I get to be here for Ivies. I get to—as
they say in Off-Campus Study—have
a smoother transition to senior year,"
Ransohoff said.

BSG

CONTINUED FROM PAGE 1

and if they feel safe, and if they say no, and then yes, then they [are not] given a ride," he said.

Class of 2011 Representative Grek Tabak expressed concern that, at times, Security was overzealous.

"I am concerned about Security's policy of conducting investigations," he said. "For example, sometimes Security goes by rooms that they think they smell things coming from, and they go check those rooms often..."

When pressed by his fellow representatives, Tabak said that his room was not among those that had been "checked on."

Vice President for Student Affairs Carly Berman '11 said that in addition to questions of safety, the assembly would need to address the issue of refreshments.

"There is no Super Snack during lvies this year, and so we would like to provide some sort of food or drink option, but we need to figure out what that is," she said.

Seifert later explained that Super Snack had been discontinued during Ivies at the request of the Dining Service

"The reason that we have to have this outside is because students have been disrespectful in the past and have made a pretty big mess, and so really they don't want to deal with us," she said.

Addressing the question of snacks, Tabak suggested that BSG find a way to bring food to the revelers.

"You know what would be awesome," he said. "We should hire an ice cream truck."

To this Berman replied, "I don't know if that is the best idea...in terms of complications with school [vehicular] policy"

"Then we should have Randy [Nichols] drive it," Tabak quipped back.

After hearing this exchange, Class of 2009 Representative Caroline Burns had her own suggestion.

had her own suggestion.

"Maybe BSG could have 100 pizzas delivered on the Quad at midnight," she said. "We could just let everyone know in advance that there is going to be pizza."

"That would be utter chaos," said "
Vice President for Academic Affairs
Sam Dinning '09.

"I think we should figure out what we want to be the real point of this," Dinning said. "If we just want to have fun, then we should hire an ice cream truck. If we want to penide a bunch of drunk people with food and water, then that is a different matter."

Tabak said that BSG's chief aim should be to make Ivies fun for students.

"I think we should just do something fun so that students see what we do," he said. "I am all for a moon bounce on the Quad Saturday. Maybe with beach halls."

Seifert said that BSG would figure out something over the next week, in order to put a funding proposal before the assembly at its next meeting.

"We are not doing a moon bounce," she said. "But if people want beach balls, then put that in a funding request...Fun things are great, but I think there really is a need for students to have water and food."

Before Spring Break at its March 4 meeting, BSG met with Director of Residential Life Mary Pat McMahon, Interim Director of the Queer Trans Resource Center and Women's Resource Center Kate Stern, and Associate Director of Housing Operations Lisa Rendall to discuss gender-neutral housing.

McMahon said she was interested in making the campus friendlier to nonheterosexual students and was glad that BSG had initiated the conversation.

"I am excited to talk about this...yet one of the fascinating things I've found, is that some [colleges] I've looked at have what we already have," she said. "So some of the places that claim to have gender-neutral housing actually have the exact same thing we have, which is that students can share suites as long as they live in different rooms."

Dinning said he was unsure how a new policy would deal with friends of the opposite gender wishing to room together.

"Beyond the issue of gender-neutral housing, I'm wondering what people should be able to do if just a guy wants to live with a girl," he said.

McMahon said that such situations would need to be handled carefully.

"I would be concerned, and this is from a long time working with students, I think that I would generally discourage students who are in a relationship from sharing a room," she said. "Personally my fear is people who say 'we are totally just friends,' then move in together, and that changes to be not the case."

Seifert asked why Bowdoin did not adopt a policy of gender-neutral housing when many other colleges did years

ago.
"I know that this conversation has come up, and I am wondering why it had not moved forward, and why it didn't become an official policy in the past," she said.

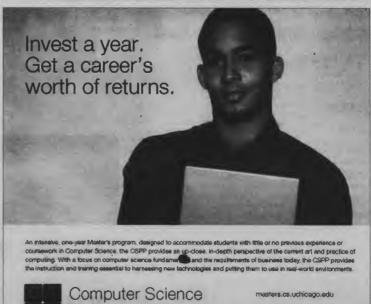

Stern said that, in the past, students had not pressed for a housing policy change.

"It has never not worked for anyone, or at least we've never gotten that feedback," she said. "It hasn't been pushed for, because it has always tended to be theoretical."

Though no definite conclusions were reached at the meeting, Seifert said that BSG would move towards drafting specific policy proposals.

"This conversation spurred the creation of a working group, which will include BSG members, who will look closely at gender-neutral housing and propose a plan to the campus community," Seifert wrote in an e-mail to the Orient. "After gathering feedback, they will revise and work on getting that proposal made into official policy. Ideally, it would put something on the books for next spring's lottery."

Professional Program

TFA CONTINUED FROM PAGE 1

"After having seen the facts and figures that show how real educational disadvantage is, you can't not be dedicated to righting that."

be dedicated to righting that."
While some champion the program as a means of fighting educational inequity, others criticize the preparation that the program provides for teachers.

Assistant Professor of Education Charles Dorn said that he often hears TFA alums say "I learned much more than my students did," which, in his opinion, is "something of a damning claim in terms of the preparation they had going into the classroom."

"If your third-graders are learning less than you are, you should have had more preparation," Dorn said.

However, according to Prior, recent data suggests that under-preparation is not a hindrance to TFA teachers. Prior cited data collected by the Urban Institute in a March 2008 study called "Making a Difference? The Effect of Teach for America on Student Performance in High School." The study found that TFA teachers are more effective than experienced secondary school teachers.

Dorn also questioned whether the size of TFA is too small to register anything more than a blimp on the radar screen of public education. According to Dorn, there are 2.5 million teaching positions in the U.S. TFA fills only 6,200 of them.

"In terms of actual impact on public school classrooms, TFA is irrelevant. It doesn't exist," he said.

Other critics of the program contend that TFA accepts too many college graduates who do not plan on making teaching their ultimate career. Education Department Chair Nancy Jennings said, "Teaching requires...commitment that I'm not sure is always there [among TFA members]."

According to Jennings many students join the corps because of the

EGAN-OMICS: Brendan Egan '08 teaches a 10th-grade civics and economics class at Southeast Halifax High School in Halifax, N.C., during his first year as a teacher with Teach for America.

way the highly selective program looks on a resume or because they are uncertain of what to do after college.

One student who wished to remain anonymous out of concern of having anti-TFA statements attached to her name, said that her friends who are doing TFA are "mostly doing it because of where it can take them after, not because they want to teach." This student referred to the high-power career tracks many TFA alumni pursue, including law, business, and medicine.

Visiting Fellow of Education Ken Templeton said it is clear to him that TFA wants its alumni to pursue other career paths besides education.

"It's not, at the end of the day, about the teachers in the class-rooms," Templeton said. "It's about recruiting people who are going to be leaders in other fields. If their teachers stay in the classroom, they will not have the same sort of voice."

According to Prior, however, the majority of TFA alumni do remain in education. "Two out of three alumni...are working or studying full-time in education," Prior said. "Fifty percent of those alumni are teachers, and the other alumni are principals, policy advisors, and leaders and staff of education reform organizations."

"TFA has now made teaching a competitive endeavor and something you can be proud of doing," said Amy Helbig '09, who was accepted into TFA this year. Another contentious issue sur-

Another contentious issue surrounding TFA is the high-powered recruiting tactics by the organization. Dorn said he thought that TFA recruiting efforts were over the top. "TFA is spending more to get one recruit into a classroom than the state of Maine pays a teacher in their first year," he said.

But Prior, as a recruiter, said that it was important that campus leaders and strong candidates be actively sought out for TFA positions.

"It's really important to me that I reach out to the strongest leaders because it makes a difference in the lives of our students," Prior said.

Bowdoin women gather in panel to recount the College in the '80s

BY CLAIRE COLLERY ORIENT STAFF

On Monday night, six Bowdoin women came to campus and relived a time when Reagan was president, bright workout gear was all the rage, and Bowdoin still supported fraternities. The panel, titled, "Claiming Spaces: Bowdoin Women of the 1980s," spoke of reclaiming the history of the decade. The event was sponsored by the Gender and Women's Studies program and the Women's Resource Center.

Student organizers introduced the panelists as "not only pioneers, but women who have claimed spacess." The panelists then introduced themselves briefly, and were then invited to "chat away."

Ann Johnson Prum '84, an art history major who experienced Bowdoin in the beginning of the 1980s, opened by humorously recalling finding herself "with a beer in one hand and a big decision in the other," wondering whether or not to join a fraternity.

Opting, out of fraternity life, Prum

Opting out of fraternity life, Prum described how "the non-frat was its own sort of frat," while other panelists elaborated extensively, and often personally, about the importance of the fraternities in campus life at that time. Sonya Dockett '85, a health care

Sonya Dockett '85, a health care lawyer, detailed that "women could be members of frats, but not with full rights." She turned to the African-American society, WBOR, and theater in order to claim her space at Bowdoin and connect her childhood in urban Detroit with her new life at Bowdoin.

Associate Professor of Art History Pamela Fletcher '89, who has been both a student and a faculty member at Bowdoin, described a 1980s campus with "a liberal administration but a conservative student body," and acknowledged that female life was "much more complicated" in social spaces than in academic ones.

"It still feels like a pretty male place to me in a lot of ways," she said; drawing from her unique and seasoned perspective of campus life. "There are painful things about that." Marya Hunsinger, the first coordinator of the Women's Resource Center, said she "found a place for [her] feminism," in the WRC. As coordinator, her duties included keeping the center going even in years when attendance was "very sparse" so that future women "wouldn't have to reinvent the wheel."

She characterized the WRC of that era as "a place to stop by after frat parties," and one which "provided a space for all types of women to come and speak." She recounted a Wiccan speaker that the WRC brought to campus despite angry bomb threats.

Bridget Spaeth '86, an alumna heavily involved in the WRC and a current staff member, said that "space [for women] was being claimed through publication," and cited maintaining the library as the "defining mission" of her era in the WRC. "The library was a living, breathing reality of opening worlds," she said.

Spaeth recalled a campus climate that had "a silencing effect on many of us." She referenced not only the now-defunct conservative publication, The Bowdoin Patriot, which she coined the eras "Republican rag." but also The Orient's insensitive use of the word "dyke," and the general campus 'avid defense of 'the bastion of fraternity."

One member of the notably participative audience did emphasize that: "It wasn't all bad. A lot of us got politically awakened in that environment."

Professor of Sociology Susan Bell shocked the audience when she revealed that in 1983 there were fewer than 10 women on the faculty. She described how she and her colleagues "used collective power to enter into the governance of the College."

Among these victories were the instatement of a sexual harassment policy, the opening of a childcare center, the establishment of a Women's Studies program, and increased maternity leave for female faculty and staff, strides which a college "still marked by [its] history as a college of men" often resisted making.

"Now things today are very different, but of course there's still work to be done," Bell said.

WHAT Now?

THE BRYANT MBA One-Year Program

Do you have what you need to get the job you want? With the Bryant MBA one-year program, you will gain both the skills and experience to launch a successful career.

This accelerated one-year program is designed to build upon undergraduate programs in all academic areas – liberal arts, science, technology, and business – to name a few.

- Begin the program directly after you graduate from college.
- No professional experience is required.
- Gain hands-on experience, and build mentor relationships with corporate executives through the Business Practicum program.

BOWDOIN BRIEFS

Consulting physician added to Dudley Coe staff

As students returned from break, they may have noticed a new face around campus, The health center added a new consulting physician to its staff, Dr. Cindy Asbjornsen. The hiring decision was announced through the student digest during spring break.

Asbjornsen, who has worked for Southern Maine Medical Center, the Advanced Vein Center, Parkview Hospital, and Maine Medical Center, will join Dr. Jeffrey Mahar as the College's consulting physician

The two will serve more than 20 hours a week at the Dudley Coe Health Center, providing care for Bowdoin students.

Since January of 2007, when Dr. Jeff Benson left his position as the college physician and director of the health center after seven years, Dudley Coe has been without a permanent physician, staffing the health center with nurse practitioners and part-time physicians.

-Cati Mitchel

Druckenmiller '75 earns-\$260 million in 2008

Not everyone working in the financial world has been adversely affected by the current economic crisis. Just ask hedge fund manager Stanley Druckenmiller 75, who earned a reported \$260 million in 2008 as manager for hedge fund Duquesne Capital.

Druckenmiller's salary, published in a March 25 article in Institutional Investor's Alpha Magazine, earned him eighth place on the 2008 list of top-earning hedge fund managers. James Simons topped the list, earning \$2.5 billion last year as the man-

ager of Renaissance Technologies.
Jerry Kerner a spokesman for
Duquesne Capital, declined to comment
on the accuracy of Druckenmiller's reported 2008 salary. Kerner did point out
that most hedge funds have seen a decrease in the value of their assets during
the current recession.

"Most hedge funds did not do well last year," Kerner said. Druckenmiller majored in economics

Druckenmiller majored in economics and English while at Bowdoin, and pursued graduate studies at the University of Michigan before working full time.

-Nick Day.

SECURITY REPORT: 2/27 to 3/26

Friday, February 27

 A student reported being assaulted by another student outside of Burnett House, resulting in a minor injury. The incident was investigated and a report was forwarded to the Dean of Student Affairs.

• An officer discovered damage to an exterior mechanical room door at Watson Arena.

Saturday, February 28

 A Coleman Hall student was found in possession of hard alcohol.

 Two students on the fourth floor of Coleman Hall were found in possession of a marijuana pipe and a small amount of marijuana.

 Two residents of a West Hall dorm took responsibility for holding an unregistered event and possession of hard alcohol.

 Brunswick Rescue transported an intoxicated student from Coles Tower Circle to Parkview Hospital.

 A student received a minor injury after falling on an icy walkway near Park Row.

Sunday, March 1

 Students in Hatch Library reported a suspicious male looking through a student's backpack. The person fled before security officers arrived.

Minutes later, students reported the same suspicious male at Hawthorne-Longfellow Library. Security officers responded and detained the suspect, identified as Terry Elwell, 33, of Brunswick. Brunswick Police were called in to issue Elwell a criminal trespass warning, barring Elwell from all College property.

· Six students took responsibility

for an alcohol policy violation in a first-floor room in Appleton Hall.

 Security officers checked on the well being of an intoxicated student at MacMillan House.
 Brunswick Rescue transported the sick student to Parkview Hospital.

 There was an alcohol policy violation at Brunswick Apartments
 B. Two students took responsibility for possession of several bottles of hard alcohol.

 There was an alcohol policy violation on the third floor of Appleton Hall.

Monday, March 2

• An unregistered event was dispersed in the basement of Brunswick Apartments F at 3:00 a.m. A student took primary responsibility for the policy violation.

Wednesday, March 4

Brunswick Police issued a civil violation court summons to a student who used a false identification card at Joshua's Tavern. NOTE: The local police are actively enforcing alcohol law violations at licensed establishments in Brunswick, and three Bowdoin students have recently been cited for using false ID cards. This violation usually results in a \$250 fine for a first offense.

Friday, March 6

 A Brunswick police officer encountered a heavily intoxicated first-year student on the corner of Maine Street and Bath Road. Bowdoin Security was called to the scene. The student was transported to Parkview Hospital and the dean's office and counseling service were notified.

Saturday, March 7

An unregistered event was dis-

persed at Helmreich House.

Monday, March 9

• Two burglars forced open a locked exterior door at Smith Union and entered the Student Activities office, stealing items of clothing. The pair then disabled a security camera and forced open the se-curity gate at the Bowdoin Book-Security officers responded to a silent alarm. As the officers arrived, one suspect fled through the loading dock and the second was trapped inside the bookstore. Brunswick Police were called and they arrested a 16-year-old Brunswick male hiding under a clothing rack. The second suspect, Nathan Dwyer, 21, of Brunswick, was arrested a short while later. Several stolen items had been stacked outside the bookstore-all were recovered. Both suspects were charged with burglary and given criminal warnings, banning them from all College property.

Tuesday, March 10

 Vandalism was discovered at the Whittier Field House. The press box door had been forced open and damaged.

Wednesday, March 11

• A plow truck struck and damaged a student's parked vehicle in

the Farley parking lot. Thursday, March 12

 A fire alarm at the Osher Hall kitchen was activated by students cooking and burning food.

Tuesday, March 17

 Security officers responded to a report of a suspicious man near Harpswell Apartments. Officers located James Cagley, 33, of Brunswick in possession of a case of beer. Investigation revealed that the beer was stolen from a student's apartment and that entry was made through an unlocked patio door. The matter has been referred to the Brunswick Police and a criminal trespass warning is being issued.

Thursday, March 19

 A student reported excessive noise coming from a fourth floor room in Chamberlain Hall.

Friday, March 20

 Security investigated a possible attempted break-in through a window at Moulton Dining. There was no evidence that entry was made.

 A female staff member reported receiving several annoying telephone calls in the workplace from an unidentified male caller. Security worked with Brunswick Police to identify the caller and resolve the matter.

Saturday, March 21

 A fire alarm was activated at Brunswick Apartments. A student said he pulled the alarm by mistake while reaching for a light switch.

Sunday, March 22

 Two exterior doors were found propped open by nails pounded into the door frames.

Tuesday, March 24

 A student with a general illness was transported from Osher Hall to Parkview Hospital.

 An odor of marijuana smoke was reported in the basement of Baxter House.

 An ill student was taken from Chamberlain Hall to Parkview Hospital.

Wednesday, March 25

• The front door to Ladd House

was found forced open with the lock mechanism broken. The lock has been repaired.

Thursday, March 26

 A smoke alarm activated in a fourth floor room in Coleman Hall. Burning incense, left unattended, was found in a bedroom.

Celebrating the common denominator of womankind

SEX MATTERS BYJULIA BOND

As many of you I hope know March is Women's History Month It is the month when we remember vomen from all walks of life who have contributed to most every aspect of human existence. It is a month designed to spark solidarity between women in recognizing that, though there has been much progress in terms of women's rights, we still have some way to rights, we still have some way to go. In honor of Women's History Month, I am dedicating this week's sex article to the fascinating anat-omy associated with the "fairer omy associated with the This is because, in reading about all those kick-ass women who excelled in their fields and challenged society and the status quo, I am inspired by the fact that I too have a vagina. Even if I never accomplish anything noteworthy

with my life, I'll be able to hang onto the fact that I have one thing in common with Marie Curie and Michelle Obama.

First, despite what porn might have you believe, most wor have pubic hair. Sometimes a lot of it. Women get a lot of pressure to shave or wax or go to a clinic and get some laser/radioactive/nuclear treatment to get rid of it, but it's not as glamorous as the waiting room of a spa would have you believe. Most of these things hurt a lot. Having boiling wax pasted onto your skin about two millimeters away from the most sensitive organ in nature can be stressful And it might look and feel great for a couple of weeks, but there is nothing sexy about ingrown hairs. Nor is there much sexy about sitting in class being consumed with the overwhelming desire to scratch your vagina because your hair is growing back. There are certainly plenty of women who enjoy the feeling of being hairless and many women who don't mind

trimming their hair down there. It can be a fun thing to try if you're thinking about it. Just remember, ladies, that they're your ingrown hairs. If it's not worth it, it's not worth it.

Once you get past the hair, you find the most sensitive organ known to man or woman: the clitoris. Those of you who went to the Vagina Monologues" know that the clitoris has the most nerves of any body part within both male or female anatomy (including the penis) and that it is the only organ designed purely for sexual pleasure. This is totally excellent for women-except that the clitoris doesn't come with an operation manual. It's like having a really, really, nice, expensive car with a ton of excellent features but no instructions so you have to figure them all out by fumbling around. Many women have difficulty figuring out their own clitorises, never mind how much difficulty their potential sexual partners have figuring it out. Every woman is different in her likes and dislikes but I can offer one key piece of advice: You want to figure out what that funky button on the dashboard does? Start the car.

This is where foreplay comes in Foreplay can be a lot of touching or kissing, or it can be porn or erotica. Though the clitoris is sometimes referred to as a "love button," it is anything but a button. Poking the clitoris is probably one of the best ways to get kicked in the face. It's always better to err on the side of being too gentle with a clitoris. Being too rough can be painful and put her out of the mood. Vibrators are also a good tool for clitoral stimulation, especially vibrators with multiple speed settings. Vibrators come in all types, shapes, and sizes and therefore can pretty easy to introduce to sexual activity with a partner or alone.

The clitoris is a very important part of achieving orgasm for an estimated 75 percent of women—the other 25 percent can achieve orgasm through internal stimulation

of the G-spot alone. The G-spot is a gland that can be stimulated through the front wall of the vagina. It generally swells during sexual arousal, and is often demarcated with an area of spongy, bumpy tissue on the vaginal wall. G-spot stimulation can make a woman feel as though she has to pee because as the G-spot swells it presses on the urethra, but stimulating it does not usually cause a woman to pee. When penetrating the vagina, lubricant is a key factor. As vaginas naturally secrete lubrication when aroused this is sometimes not an issue, but for women with smaller or drier vaginas, lubricants are sold in most pharmacies and sex stores. For internal use or with condoms, make sure you're using a water-based lubricant instead of an oil-based lubricant.

Women are all different, but we have one important thing in common: vaginas. Happy Women's History Month everyone, and here's to the future happiness of vaginas everywhere.

This spring, show your Wilde side and redefine fashion

KIDNAPPED BY STYLE

COLUMNIST

In this column, I strive to offer sources of stylistic inspiration from outside the Bowdoin Bubble: magazines, blogs, experience in different cities and countries. Admittedly, some forays are more inspired than others. My column on novelty boxers is more my plea to humanity to cut it out than "inspiration." However, I do think, since the season threatens to change ever so gently, that I should address questions not as of yet covered by my column: "What is style?," "Why does it matter?," and "Why should anyone care?"

"I've met people that say, straight out, "I don't have style." I don't necessarily believe this to be true. But having style does matter because it pervades one's every perception of another. Although this stance may seem like a subjective one, a sense of one's own style or one's own fashion is something that every person has and uses daily. The word "style" can encompass everything from clothing and fashion, to the way an individual holds his fork at the dining hall, to one's manner of speaking, or even something as subconscious as an individual's walk.

For the purpose of this column I will stick to the definition of style

that involves clothes. Everyone wears clothes, and those clothes send some sort of message about who an individual is. In this regard, even if you pay it no mind, you have style and you have fashion. As Oscar Wilde writes in "An Ideal Husband." Fashion is what one wears oneself. What is unfashionable is what other people wear." You wear what you have worn and know. However, Oscar Wilde's insight is not necessarily meant to make one stylistically complacent; it is a perspective that empowers everyone and anyone to anything new.

Even Bowdoin has a specific style different from other collegand other places. Some read ers may be familiar with a recent Curia article I wrote titled, "The Bowdoin Dress Code" where I decry Bowdoin's lack of fashion variety. In it, I state, "We are a college of two, basic fashion extremes: the J. Crew/Banana/Abercrombie/etc. crowd, then the subset that dresses for the possible Great Outdoors." It is a culture of "conformity," some commented. While I still believe this may be true, I recently had the opportunity to spend some time at a few other colleges up and down Rt. 95. Without nam ing names and incriminating peer institutions, I can now safely say that Bowdoin is no more conform ist than any other college. In fact, it is definitely less so, and better for it. But that only means there is more room within Bowdoin for the Bowdoinite to move around. and there is an obligation to explore the possibilities and search ways to avoid conformity.

Perhaps the most compelling reason why anyone should care about style at this juncture is that spring is (getting) here. With the changing of seasons comes the perfect opportunity to try out something you've never tried before. While winter weather seems to enable (and the resulting depression

I can now safely say that Bowdoin is no more conformist than any other college. In fact, it is definitely less so, and better for it. But that only means there is more room within Bowdoin for the Bowdoinite to move around, and there is an obligation to explore the possibilities and search ways to avoid conformity.

compels) people to put on a medley of mismatched clothing and allows people to get away with a bit of sloppiness by covering it with a thick winter jacket, once you lose the jacket the clothing underneath suddenly matters. The flannel and long underwear go away for good, and brighter, happier people emerge from beneath it. People can dust off the shorts and t-shirts that have been sitting in cold (very cold) storage and expose them to fresh air once again.

After reading a few blogs and magazines the last few weeks, however, I've been relatively unimpressed by the new spring styles. They seem to be a regurgitation of what's already at Bowdoin: buttondown shirts with zip-up sweaters and jeans don't seem very revolutionary, thank you very much Esquire Magazine.

But it doesn't really matter what the sources that give "style advice" say: The onus falls upon the wearer, not the "expert." Don't be afraid to keep some of the lighter sweaters out from winter, and those lighter jackets you used last year are probably still serviceable. In fact, since the pieces of clothing that were "in" last year still seem to remain somewhat fashionable, last year's clothing can be recycled and reapplied in different combinations, and in different uses. Try anything out. Beside, "fashion is what one wears oneself."

CONTINUED FROM PAGE 1

families' basic needs, putting additional strain on an organization that has not seen a comparable increase in food or monetary donations.

Gryspeerd admitted that the food bank, the part of MCHPP that processes donations, has received "a little less" recently than in years past. She attributes this to local stores stocking less food, and consequently not producing as much waste. Bowdoin has remained one of the pantry's most constant donors, delivering excess prepared dishes, Polar Express sandwiches, and baked goods daily. Senior Ian Yaffe, who organizes the donations, said that about 3,000 pounds of food were donated to the pantry in fall 2007, the last time a full semester of data was recorded.

"We miss [Bowdoin's donations] in the summertime," Gryspeerd said.

In order to make the available food last, the pantry tries to distribute fresh produce and other perishables quickly. When the Orient visited the pantry, volunteers encouraged clients to take strawberries, tomatoes, zucchinis, and mushrooms so that they would not spoil. When the pantry receives unfamiliar items, like cherimoya, an exotic fruit, a volunteer will look up a recipe, prepare a dish with the food and encourage clients to try it for themselves. According to Gryspeerd, the sampling increases the likeliness that clients will

take the unfamiliar foods home, ensur-

ing that nothing goes to waste.

The food provided at the pantry is not intended to tide over its clients, but rather to supplement their food budget and economize their food stamps. Volunteers encourage clients to use their food stamps on items they cannot get at the pantry, such as milk and butter.

The MCHPP food bank divides donations between the food pantry where clients receive boxes of produce, meat, canned food and pastries, and the soup kitchen, where a "hot, healthy sit-down meal" is served every day. Unlike at the food pantry, the soup kitchen has a "no questions asked" policy, meaning people of all income levels and employment statuses are welcome. The number of people eating at the soup kitchen each day has not increased dramatically in recent years as is the case with the pantry. Traditionally, senior citizens have made up a third of clients at the soup kitchen, but in 2008 that percentage dropped to a quarter. This statistic suggests that a larger percentage of clients are families and non-seniors who have been affected by the economy.

Volunteers at the soup kitchen wait tables and ask clients if they would prefer coffee or tea. According to Gryspeerd, the restaurant-style service is far superior to a cafeteria because it increases morale among both clients and volunteers.

"We care enough about people that we can serve them," Gryspeerd said.

Author Jonathan Safran Foer to 'illuminate' Pickard on Tuesday

RACHEL GOLDMAN

Pickard Auditorium will be the floor for young New York Times best-selling novelist Jonathan Safran Foer on Tues day. Foer is the author of several short stories and two novels, "Everything is Illuminated" and "Extremely Loud and Incredibly Close." He has been hailed as one of the most controversial and influential authors of the decade.

With the success of "Everything is Illuminated" in 2002, Foer rose to the top of the best-seller lists. The novel won numerous awards including the Guardian First Book Prize, the National Jewish Book Award, and the New York Public Library Young Lions Prize

Foer comes to Bowdoin on behalf of the Spindel Committee, a committee established in 1977 in honor of Harry Spindel to support annual lectures in Judaic studies and contemporary Jewish affairs. Co-chaired by Academic Communications Consultant David Israel and Librarian Sherrie Bergman, the Spindel Committee attempts to identify speakers who will continue the distinguished reputation of the lecture-ship and celebrate Jewish culture and identity through lectures, music, photography, and film

Over the years, individuals prominent in a broad range of fields have been invited who are of interest to students, faculty, and the broader Bowdoin community," Bergman said. "Lecturers in the last two years have been historians, thus this year we were looking for someone from another discipline."

Ireale cited Spindel Committee member Benjamin Freedman '09 and Hillel co-president Shelley Barron '09 as important students in the search for ar's lecturer.

"This year we really wanted to focus on what the students wanted which was an exciting opportunity," Israel added.
"It's great to be able to bring in people

who are doing exciting things that resonate with people."

"Everything is Illuminated" in par-ticular has been hailed for its ability to speak to people in transitional places in their lives. Freedman partially attributes this accessibility to Foer's young, inspirational persona

Foer is not much older than we are and he has already made a huge splash in the literary world. The appeal should be self-evident and all students would be wise to attend this lecture." Freedman said.

"It really is an amazing opportunity to bring somebody like Foer to Bowdoin, somebody who the students are really excited about," he added. "What's really great is that, because of the scale of Bowdoin, lectures like this really give people the opportunity to rub elbows and to converse with people who, in a bigger space, would be in

Foer's upcoming lecture also resonates on a statewide cultural level.

"What is so special about this event is that it is a Bowdoin event, yes, but it's also a community event, both for the Maine community and also for the Jewish community," Israel said. "I can really feel all the excitement. We've even had to change the location from Kresge to Pickard Theatre in anticipation of such a positive turnout."

"Annually, the Spindel Lecture is one of the high Jewish cultural events of the

"Past lectures have brought a wide variety of speakers and having Jonathan Safran Foer as this year's speaker gives the Spindel Committee a chance to engage yet another aspect of Judaic Studies, Jewish literature," Freedman

Foer will speak at 7:30 p.m. on Tu day, March 31, in Pickard Theater. Admission is free, but tickets are necessary to attend the event and are available at the Smith Union information desk.

Artwork goes behind the scenes to reveal process

STAFF WRITER

The new exhibition in the Center Gallery of the Walker Art Museum, "The Art of Instruction: The Site of Inspiration," is decep-tively enchanting.

Although it appears to be nothing more than a series of step-by-step tutorial sketches on how to draw and paint, the true significance of the exhibition is revealed upon further

The purpose of this remarkable exhibition isto examine different approaches to the artistic process, highlighted by its application to different media. The meshown are diverse: there are graphite sketches, oil paintings, sculptures, collages, and wood engravings, to name a few. Some pieces appear as parts of a series, while others are singular. The stand-alone pieces often appear raw and incomplete, showing how the artist's unfinished work can often reveal as much or more than a finished piece. The series that show multiple versions of the same work in different stages of completion reveal the artistic process more explic-

One such piece is Ernest Haskell's series of engravings titled "Arabella." The first of the four engravings shows a rough outline of the woman's figure, with just her face in detail. The second is more developed, and the third still more developed, until the fourth represents shed work. Haskell's artistic process is clearly shown from step to step

A 1924 two-piece series by Mary B. Call examines the artistic process in a similar way. The first piece is a graphite sketch of a woman's face, rough and unfinished. The other piece is the oil paint-ing that resulted from the sketch; the color and detail that were absent from the sketch are added to the final paint-

A series of nude model sketches by John Singer Sargent illustrate the artis-In this case, only the first step of a por-

MARGOT D. MILLER THE ROWDOWN ORIEN

IN-DEPTH LOOK: A new exhibit at the Bowdoin College Museum of Art titled "The Art of Instruction: The Site of Inspiration" includes works that examine the process of creating art in different media.

trait is shown. The three sketches are all rough, intended only to capture the posture and essence of the figure, and detail is completely ignored.

Pieces such as Sargent's and Haskell's—those that show the artist's own artistic process in some way—com-prise roughly half of the exhibition. The other half is made up of finished pieces that portray scenes of art instruction in

One of the most striking of these ieces is John Sloan's 1912 "Anschutz Lecturing on Anatomy," an oil painting that shows a scene of an art class where the students are sketching a live model standing next to a human skeleton while

the professor speaks to them.

In this case, the artistic process is litering rather than displayed in the work's

unfinished qualities. This distinction is one that carries through the entire exhibition, as all of the works fit into one category or the other.

Overall, this exhibition is a unique and interesting installation at the Bowdoin College Museum of Art. Though the rum houses many exceptional pieces of art, viewers are not often confront-ed with the process that is behind each how that process changes with each artist as well as with each medium, whether it be a silver print or a graphite sketch. It also stresses that in many cases, an incomplete piece can turn out to be as salient a work of art as a finishe

"The Art of Instruction: The Site of Inspiration" is exhibited in the Center Gallery of the Walker Art Museum, where it will remain until April 2.

Dogfish Head Fort sparkles as a fruit-infused 'champagne of beers'

THE BEER GEEK BY MACEVANS

In the cold wind of the everlasting winter that will eventually make its way to spring, it's good to have a beer that keeps you warm and helps you feel protected throughout this extended season.

Dogfish Head Fort fits such criteria. It's named Fort since it is meant to be a beer that will last the ages, like a fort is meant to do. The beer is a whopping 18 percent alcohol by volume, putting it more into a category of wine or champagne, and even borderline spirit. Furthermore, it is brewed with over one ton of purfed raspberries: 20 pounds of raspberries for each barrel during the primary fermentation. This keeps the fruity aroma and taste after the boil, while the yeast eats the abundant natural sugars that boost the alcohol content.

Since 2005, this has been a limited beer that occasionally makes an appearance in large bottles. The artwork on the front is done by Tara McPherson, and the overall appearance of the bottle gives it more of

MARGOT D. MILLER, THE BOWDOIN ORIENT

SWEET TREAT: Dogfish Head Fort, 18 percent alcohol by volume, is made with 20 pounds of raspberries per barrel and is often likened to champagne.

a champagne quality. Indeed, this beer is intended to be shared. The president of Dogfish Head, Sam Calagione, has said in an interview with "Beer Advocate," a beer review Web site, that he has high hopes that this beer will be of the same caliber as a bottle of champagne or nice wine. He also mentions a couple of dessert recipes that can be created with the beer, and he has even higher hopes that this beer will be shared between two people in a hot tub with some Barry White

in the background.

If you do manage to find this in a bar (Novarae Res in Portland is a good bet), you will probably be served in a much smaller glass than your peers, but the flavor and content of the beer will more then compensate for its small volume From the first sip to the last, there is a strong hint of a fruity flavor (I personally thought of bananas for some reason), and a blend of spicy and herbal aromas.

There is also an undeniably large dose of alcohol, which warms the digestive tract from mouth to stomach. The longer the beer sits out, the more the flavor of it will flourish, but the alcohol will become hotter and hotter. This produces a more complicated array of flavors like raspberry, spices, and some lime, but might also require a chaser to finish.

The overall fruitiness of the beer is balanced as much as possible, and the brew is not nearly as tart as one might expect considering it is made with more than one ton of puréed raspberries. It is strong but puckering, and the warmness of the mouth may also contribute to its distinct taste.

The bottom of the bottle, if you get there, has the most concentrated sweetness of the brew, and it is more viscous. It is also reminiscent of mead, if you're more into Valhala. If you can find it, this is an interesting beer to pick up, and if the weather doesn't get any warmer, at least your insides can.

Fishburne lights up San Francisco with colorful satire in 'Elephant'

NOOK ...

BY FRANCES MILLIKEN COLUMNIST

Ambition is a driving force for many of us, there are few of us who don't aspire to make an impression on the world, or at least attempt to affect a single frontier. Rodes Fishburne's debut novel "Going to See the Elephant" focuses on the journey of a particular aspirant, Slater Brown. For Slater, the place to begin is San Francisco.

Slater's intention is to become the kind of writer who is on par with the likes of Hemingway, Joyce, and Baldwin. He crams his omnipresent notebooks full of beginnings, endings, half thoughts, estute observations. His suitcase is filled with literary masterpieces, most of which the aspiring author has preserved.

The majority of what Slater sees inspires hims and he rushes around the city trying so eatch its mysteries with his pen. Unfortunately, Slater does not know what he wants his world-famous novel to be about. For all his prolific scribbling, he has not even the glimmering of a plot and posturing as the protagonist of "A Portrait of the Artist as a Young Man" (cocked hat, walking stick, and all) is doing little to move him along. Conveniently, Slater stumbles across

Conveniently, Slater stumbles across the struggling San Francisco newspaper. The Morning Trumpet. The decades have watched its slow decline from a daily to a weekly and the Trumpet needs a pick-me-up. Slater is hirred, fired, and then hired again when he discovers a source that reveals the city's secrets and scandals. Overnight, Slater becomes the toast of the town and the enemy of the corrupt mayor Tucker Oswell.

The protagonists in this splendidly jovial novel are characters in the most elaborate sense of the word. Slater is practically a parody of himself, but his extremism is endearing. His compatriots at the Trumpet are a gaggle of curmud-

geonly humbugs who are irrevocably loyal to their newspaper and to one another. On and Slater's love inferest, appears serendipitously and their romance begins in a boat, suspended atop the unpredictable toss and turn of the San Francisco Bay.

The mayor, who is closest to an antagonist, is absurd in his conceits and wildly entertaining. Slater's sudden journalistic success is largely at the expense of the mayor and as the young writer dredges up more and more shady dealings, the mayor embarks on an extensive gustatory consumption of all the best foodstuffs in the city. Fishburne sets stomachs growling with his descriptions of the finest gournet food San Francisco has to offer.

Finally, there is the super genius Milo Magnet. The author of "The Theory of Everything," Magnet is extremely private and eons beyond his contemporaries. Having conquered most scientific realms, Magnet's next frontier is the control of the weather. When Magnet's super computer fails to exhibit the proper intuition that will allow the scientist to create storm clouds larger than pingpong tables, Slater and the genius' ambitions become entwined, producing magenta rain and the destruction of Slater's fine Italian suits.

There is a pronounced element of glee in Fishburne's novel. His affection for the characters he has created and their dramas is evident. They play off of one another in a satisfactory if not entirely unpredictable manner. The story is a delightful adventure and an enjoyable

What lies at the heart of the novel, the element that amps up the simple pleasures of the plot, is San Francisco herself. The city ticks with life. Fishburne's knowledge and love of every aspect of San Francisco emanates from his jubilant, descriptive sentences. The book is partly in homage to the possibility of youth, but ultimately it is a serenade to the city that invigorates this author and provides his characters with a fluid and mesmerizing backdrop.

DJs OF THE WEEK

Matt Seward '11 and Evan Fricke '11

If you could only listen to one album for the rest of your life, what would it be?

MS: "Sgt. Pepper's Lonely Hearts Club Band."

EF: Mississippi John Hurt's "Last Sessions." The rest of my life would be bluesy and pretty chill overall.

Favorite song to privately dance/ rock out to?

MS: "If I Can't" by 50 Cent or maybe "If He Should Ever Leave You" by Tom Jones.

EF:Anything by Creedence.

If you were in a band, what would it be called and what kind of music would you play? MS: Mac Family Band, and it

MS: Mac Family Band, and it would only play covers of hip-hop favorites. Or, "Wreck 'n' Roll" if it were a metal band.

EF: Crazy Expectations. We would play weird blues/rock fusion

sort of stuff. And metal, of course.

Theme song during Ivies?

MS: "Mary Jane" by Rick James.

EF: "Send Me On My Way" by

EF: "Send Me On My Way" by Rusted Root is sure to get every party started.

If you could meet any musician, dead or alive, who would it be and who?

MS: Simone Simons from "Epica," because she's a total babe.

EF: Jesus, assuming he was a musician. Same reason.

Best new music you've heard lately?

MS: "Read a Book" by Bomani "D'mite" Armah. It's not that new, but it's both funny and a good satire of everything wrong with modern hip-hop/rap.

EF: Jason Schwartzman's "Drum-

EF: Jason Schwartzman's "Drummer," because it really gets to the point. If you could time-travel back to any musical period, where would you go and why?

MS: The Psychedelic era, man. For obvious reasons. But also, psychedelic rock paved the way for hard rock and then metal. Perfect.

EF: The Baroque because it would Ba-ROCK!

Bands/musicans who have most influenced your musical taste? MS: Lordi and Nightwish for

MS: Lordi and Nightwish for one half, Dr. Dre and Kanye West (strictly "College Dropout") for the other.

* EF: Bob Dylan, Otis Redding, Paul Simon.

"Frick Frack and Matt Attack" with Evan and Matt airs Thursdays from 8:30-9:30 p.m. on WBOR 91.1 FM

Author Jonathan Safran Foer to 'illuminate' Pickard on Tuesday

RACHEL GOLDMAN

Pickard Auditorium will be the floor for young New York Times best-selling novelist Jonathan Safran Foer on Tues day. Foer is the author of several short stories and two novels, "Everything is Illuminated" and "Extremely Loud and Incredibly Close." He has been hailed as one of the most controversial and influential authors of the decade.

With the success of "Everything is Illuminated" in 2002, Foer rose to the top of the best-seller lists. The novel won numerous awards including the Guardian First Book Prize, the National Jewish Book Award, and the New York Public Library Young Lions Prize.

Foer comes to Bowdoin on behalf of the Spindel Committee, a committee established in 1977 in honor of Harry Spindel to support annual lectures in Judaic studies and contemporary Jewish affairs. Co-chaired by Academic Communications Consultant David Israel and Librarian Sherrie Bergman, the Spindel Committee attempts to identify speakers who will continue the distinguished reputation of the lecture-ship and celebrate Jewish culture and identity through lectures, music, photography, and film.

Over the years, individuals prominent in a broad range of fields have been invited who are of interest to stu-dents, faculty, and the broader Bowdoin community," Bergman said. "Lecturers in the last two years have been historians, thus this year we were looking for someone from another discipline."

Ireale cited Spindel Committe nber Benjamin Freedman '09 and Hillel co-president Shelley Barron '09 as important students in the search for this year's lecturer.

This year we really wanted to focus on what the students wanted which was an exciting opportunity," Israel added.
"It's great to be able to bring in people

who are doing exciting things that resonate with people."

"Everything is Illuminated" in particular has been hailed for its ability to speak to people in transitional places ves. Freedman partially attributes this accessibility to Foer's young. inspirational persona

Foer is not much older than we are and he has already made a huge splash in the literary world. The appeal should be self-evident and all students would be wise to attend this lecture." Freed-

nity to bring somebody like Foer to Bowdoin, somebody who the students are really excited about," he added. "What's really great is that, because of the scale of Bowdoin, lectures like this really give people the opportunity to rub elbows and to converse with people who, in a bigger space, would be inac-

Foer's upcoming lecture also resonates on a statewide cultural level.

"What is so special about this event is that it is a Bowdoin event, yes, but it's also a community event, both for the Maine community and also for the Jewish community," Israel said. "I can really feel all the excitement. We've even had to change the location from Kresge to Pickard Theatre in anticipa-

IN-DEPTH LOOK: A new exhibit at the Bowdoin College Museum of Art titled "The Art of Instruc tion: The Site of Inspiration" includes works that examine the process of creating art in different media.

trait is shown. The three sketches are all rough, intended only to capture the posture and essence of the figure, and detail is completely ignored.

Pieces such as Sargent's and Haskell's—those that show the artist's own artistic process in some way-com prise roughly half of the exhibition. The other half is made up of finished pieces that portray scenes of art instruction in

One of the most striking of these pieces is John Sloan's 1912 "Anschutz Lecturing on Anatomy," an oil painting that shows a scene of an art class where the students are sketching a live model standing next to a human skeleton while

the professor speaks to them.

In this case, the artistic process is literally illustrated in the scene of the painting rather than displayed in the work's

unfinished qualities. This distinction is one that carries through the entire exhibition, as all of the works fit into one category or the other.

Overall, this exhibition is a unique and interesting installation at the Bowdoin College Museum of Art. Though the um houses many exceptional pieces of art, viewers are not often confronted with the process that is behind each how that process changes with each artist as well as with each medium, whether it be a silver print or a graphite sketch. It also stresses that in many cases, an incomplete piece can turn out to be as salient a work of art as a finished one.

"The Art of Instruction: The Site of Inspiration" is exhibited in the Center Gallery of the Walker Art Museum, where it will remain until April 2.

Dogfish Head Fort sparkles as a fruit-infused 'champagne of beers'

THE BEER GEEK BY MACEVANS

COLLIMNIST

In the cold wind of the everlasting winter that will eventually make its way to spring, it's good to have a beer that keeps you warm and helps you feel protected throughout this extended season.

Dogfish Head Fort fits such criteria. It's named Fort since it is meant to be a beer that will last the ages, like a fort is meant to do. The beer is a whopping 18 percent alcohol by volume, putting it more into a category of wine or champagne, and even borderline spirit. Furthermore, it is brewed with over one ton of puréed raspberries: 20 pounds of raspberries for each barrel during the primary fermentation. This keeps the fruity aroma and taste after the boil, while the yeast eats the abundant natural sugars that boost the alcohol content.

Since 2005, this has been a limited beer that occasionally makes an appearance in large bottles. The artwork on the front is done by Tara McPherson, and the overall appearance of the bottle gives it more of

MARGOT D. MILLER, THE BOWDOIN ORIENT

SWEET TREAT: Dogfish Head Fort, 18 percent alcohol by volume, is made with 20 pounds of raspberries per barrel and is often likened to champagne.

a champagne quality. Indeed, this beer is intended to be shared. The president of Dogfish Head, Sam Calagione, has said in an interview with "Beer Advocate," a beer review Web site, that he has high hopes that this beer will be of the same caliber as a bottle of champagne or nice wine. He also mentions a couple of dessert recipes that can be created with the beer, and he has even higher hopes that this beer will be shared between two people in a hot tub with some Barry White in the background.

If you do manage to find this in a bar (Novarae Res in Portland is a good bet), you will probably be served in a much smaller glass than your peers, but the flavor and content of the beer will more then compensate for its small volume From the first sip to the last, there is a strong hint of a fruity flavor (I personally thought of bananas for some reason), and a blend of spicy and herbal aromas.

There is also an undeniably large dose of alcohol, which warms the digestive tract from mouth to stomach. The longer the beer sits out, the more the flavor of it will flourish, but the alcohol will become hotter and hotter. This produces a more complicated array of flavors like raspberry, spices, and some lime, but might also require a chaser to finish.

The overall fruitiness of the beer is balanced as much as possible, and the brew is not nearly as tart as one might expect considering it is made with more than one ton of puréed raspberries. It is strong but puckering, and the warmness of the mouth may also contribute to its distinct taste.

The bottom of the bottle, if you get there, has the most concentrated sweetness of the brew, and it is more viscous. It is also reminiscent of mead, if you're more into Valhala. If you can find it, this is an interesting beer to pick up, and if the weather doesn't get any warmer, at least your insides can.

Fishburne lights up San Francisco with colorful satire in 'Elephant'.

THE BOOK

BY FRANCES MILLIKEN

Ambition is a driving force for many of us, there are few of us who don't aspire to make an impression on the world, or at least attempt to affect a single frontier. Rodes Fishburne's debut novel "Going to See the Elephant" focuses on the journey of a particular aspirant, Slater Brown. For Slater, the place to begin is San Francisco.

Slater's intention is to become the kind of writer who is on par with the likes of Herningway, Joyce, and Baldwin. He crams his omnipresent notebooks full of beginnings, endings, half thoughts, astute observations. His suitcase is filled with literary masterpieces, most of which the aspiring author has never read.

never read.

The majority of what Slater sees inspires him and he rushes around the city trying so eatch its mysteries with his pen.

Unfortunately, Slater does not know what he wants his world-famous noved to be about. For all his prolific scribbling, he has not even the glimmering of a plot and posturing as the protagonist of "A Portrait of the Artist as a Young Man" (cocked hat, walking stick, and all) is doing little to move him along.

Conveniently, Slater stumbles across

Conveniently, Slater stumbles across the struggling San Francisco newspaper The Morning Trumpet. The decades have watched its slow decline from a daily to a weekly and the Trumpet needs a pick-me-up. Slater is hired, fired, and then hired again when he discovers a source that reveals the city's secrets and scandals. Overnight, Slater becomes the toast of the town and the enemy of the corrupt mayor Tucker Oswell.

The protagonists in this splendidly jovial novel are characters in the most elaborate sense of the word. Slater is practically a parody of himself, but his extremism is endearing. His compatriots at the Trumpet are a gaggle of curmud-

geonly humbugs who are irrevocably loyal to their newspaper and to one another. Can and Stater's love inferest, appears serendipitously and their romance begins in a boat, suspended atop the unpredictable toss and turn of the San Francisco Bay.

The mayor, who is closest to an antagonist, is absurd in his conceits and wildly entertaining. Slater's sudden journalistic success is largely at the expense of the mayor and as the young writer dredges up more and more shady dealings, the mayor embarks on an extensive gustatory consumption of all the best foodstuffs in the city. Fishburne sets stomachs growling with his descriptions of the finest gourmet food San Francisco has to offer.

"finally, there is the super genius Milo Magnet. The author of "The Theory of Everything," Magnet is extremely private and eons beyond his contemporaries. Having conquered most scientific realms, Magnet's next frontier is the control of the weather. When Magnet's super computer fails to exhibit the proper intuition that will allow the scientist to create storm clouds larger than pingpong tables, Slater and the genius' ambitions become entwined, producing magenta rain and the destruction of Slater's fine Italian suits.

There is a pronounced element of glee in Fishburne's novel. His affection for the characters he has created and their dramas is evident. They play off of one another in a satisfactory if not entirely unpredictable manner. The story is a delightful adventure and an enjoyable read.

What lies at the heart of the novel, the element that amps up the simple pleasures of the plot, is San Francisco herself. The city ticks with life. Fishburne's knowledge and love of every aspect of San Francisco emanates from his jubilant, descriptive sentences. The book is partly in homage to the possibility of youth, but ultimately it is a serenade to the city that invigorates this author and provides his characters with a fluid and meamerizing backdrop.

Pitching leads softball to early season success

BY ADAM MARQUIT

It was a deep fly ball to centerfield that seemed to turn the momentum in favor of the Bowdoin softball team for the remainder of its spring trip in sunny Florida.

Things were starting to look grim for the Polar Bears after losing three of their first four games on the trip Their bat's had stayed quiet and the competition had proved to be formidable. However, in their fifth game, in the bottom of the third inning with a 0-0 score against a tough SUNY New Paltz team, first year Hillary Smyth made a play on that fly ball to deep center that gave the Polar Bears some needed hope. After sprinting back towards the warning track, Smyth reached up and made an incredible catch, holding onto the ball even after crashing into the wall and knocking it over. Bowdoin went on to beat New Paltz 5-4, and after the game, the Polar Bears continued their momentum, finishing the spring trip with a record of 11-5.

Following the lead of 2008 second-team all-NESCAC selection Kaitee Daley '09, the Polar Bears hit for an average of .317. Despite a sprained ankle suffered midway through the trip, Daley batted an impressive .586 and stole nine bases in just ten games. Seven other Polar Bears hit better than .300 on the trip, while junior Clare Ronan led the team with two home runs and 12 RBIs. Shortstop Shavonne Lord '10 posted the high mark for runs with 10. Lord batted .400 and had

a strong .500 on-base percentage. First year Courtney Colantuno also provided the Polar Bears with some important hits throughout the trip.

The warm weather also proved to be accommodating for the Bowdoin pitching staff. In 16 games, the pitchers held three teams to no runs and allowed only one run in three other games. Behind junior pitcher Julia Jacobs' 1.08 ERA, the Polar Bears posted a cumulative 1.48 ERA. Jacobs went 3-2 with 2.3 strikeouts on the trip. Kara Nilan '11 not only hit .394 at the plate, but also led the team in wins (4), strikeouts (36), fewest hits allowed (16), and was second only to Jacobs with a 1.35 ERA.

Although all of the spring trip games counted towards the regular season record, Coach Ryan Sullivan also wanted to find the best arrangements in the field.

"With double headers every day, everyone got to move around," Colantuno said. "We played well and it was a lot of fun."

Despite having a worse record than previous spring trips, "everyone was happy with how we played," Nilan said.

Winning 10 of their last 12 games gives the Polar Bears the confidence they need to begin their NESCAC schedule. This weekend the softball team will travel to Hartford, Connecticut to take on the Trinity Bantams in their first three conference games.

"We should do really well and hopefully everyone stays healthy," Nilan said. "We're getting better."

FROZEN ROPE: Senior Jason Koperniak hits a line drive during the Bears'spring trip to Florida.

Baseball goes 11-8 on spring trip

CONTRIBUTOR

The baseball team had an up-anddown trip to Florida during Spring break, going 11-8 over the course of the two weeks.

Still, the team showed streaks of brilliance. In the first game against Amherst, the Bears showed particular late-inning guile.

Brendan Garner '11 got things going with a single, and three hits and two runs later, Matt Ruane '11 stepped up to the plate with pinch runner lan Merry '09 on third base. Ruane shrugged off the pressure and lined a single to left, driving in the game-winning run. The team had overcome what had been a four-run deficit to take a triumphant victory in the first game of a doubleheader.

"It was a big win for us," said Steve

Hall '10. "We showed real mental toughness in that game that I think could help us later in the season."

The win was certainly crucial for morale after a slow start. Opening the trip with back-to-back losses against Curry College, the Polar Bears ultimately finished the trip winning 11 of 17 games and sweeping Salve Regina, Wentworth College, and UMass-Dartmouth. The Bears returned home from Florida last Saturday after an 11-8 start to their season.

Joe Pace '10, Ben Higgins '11, and senior Pat Driscoll anchored the pitching rotation, while first year Tim Welch made a name for himself with a strong effort at the end of the trip. Last year's ace Carter Butland has struggled with a shoulder injury, but hopes to return soon.

On the offensive side, sophomore

Brett Gorman led the team with 16 RBIs while hitting ,370. Joe Berte '09, Kevin Zikaras '10, and Reid Auger '10 have also been consistent contributors at the plate. Auger takes a 17-game hitting streak into this weekend's three game series against Trinity.

The squad certainly has its work cut out for them against Trinity; the Bantams went 45-1 on their way to claiming a Division III NCAA Championship title last year. They also swept Bowdoin last season. Trinity has since graduated their three top players.

"It's definitely one of the most hyped

"It's definitely one of the most hyped up series of the season," said Nick Pisegna '11.

The three-game series will be played at the University of Maine-Orono turf fields this Friday and Saturday, since the diamond at Bowdoin is still covered with snow.

Women's tennis defeats Bates in NESCAC opener

BY EMMA POWERS
STAFF WRITER

The women's tennis team defeated Bates 7-2 on Thursday afternoon, kicking off its spring NESCAC season on a high note. The top five singles players and the top two doubles teams overpowered Bates, bringing the Bears to an 4-4 overall record.

The match was the Bears' first match since returning from their trip to California, where they won three matches and lost four.

"Our schedule in California was very strong," Rachel Waldman '09 said. "We played two teams that are ranked top-10 in the country."

"Transitioning from Farley Field House to sunny California is always a challenge, but it was nice to get out and play, and see what we could do," Liz Pedowitz '10 added.

Defeating Bates gives the team momentum going into the season.

"It was great to come back to Maine and defeat a NESCAC team, it really boosted our confidence after such a tough trip out West," Waldman said.

Most notably, captain Sarah D'Elia '09 remained undefeated this season with her 6-3, 6-1 win at No. 1 singles. Emily Lombardi '12, Rachel Waldman '09, Liz Pedowitz '10, and Charlotte Hitch '09 also defeated their singles opponents in straight sets.

"Sarah and Emily, our two top players continue to gain points for Bowdoin at the top of the ladder, which is great motivation for the rest of the team," Waldman said.

"Senior Charlotte Hitch also had a great win playing a hard-hitter," Waldman added. "It was great to see her confidence rise as the match progressed."

The team looks positively into the future, and is getting excited for a successful season.

"After last spring, we realized that hard work really pays off so we are excited about the season that we have ahead of us," Pedowitz said. "We might not have the biggest team, but we definitely have the spirit to fight through tough matches, which makes me optimistic for the upcoming season."

The team will play Connecticut College at home this Sunday at 2

p.m. "While Conn isn't one of our biggest rivals, we never take any match for granted, and we're looking forward to an exciting match on Sunday," Waldman said.

Men's tennis ranked No. 11 in Division III

BY ROBBIE ZHANG-SMITHERAM CONTRIBUTOR

The men's tennis team (5-2, No. 11 in D-III) returned from its two-week stay in San Clemente, California in good shape and on a three-match win streak. Southern California was an ideal location for the players, who were able to catch Andy Roddick, Josh Isner, and Marty Fish in action at the BNP Paribas Open and even attend a Los Angeles Lakers game.

"The team was in high spirits," said Stephen Sullivan '11, who won all but one match at the No. 1 singles position. Waking up each day to the beach set an upbeat tone for the Polar Bears, who spent the sunny days working hard and practicing, as well as spending time together in hopes of greater cohesiveness as a team.

Bowdoin started its competition on the right note by winning the first match against University of Texas-Tyler 5-4, but lost 8-1 against defending national champions Washington University in St. Louis, ranked No. 2 nationally. First year Oscar Pena was able to generate the sole Bowdoin win at the No. 2 singles position even after losing the first set 6-0. The doubles teams were not so lucky, and were still looking for their first wins after the two matches.

The team was revamped for the next match against No. 16 Carnegie Mellon, winning all three doubles matches. Following Sullivan's win at No. 1 singles, Pena, Tyler Anderson '10, and senior co-captain Alex Caughron all came through with impressive straight-set victories to set the final score at 7-2.

However, the Polar Bears couldn't sustain the momentum, falling to No. 13 Redlands University 6-3. Senior co-captain Alex White won at No. 3 singles after losing 6-1 in the first set, with Bowdoin gaining two more victories from a doubles match and the No. 1 singles spot.

The team cruised through the remaining three matches over break, winning 8-1 against Salisbury, 7-2 over Pomona College, and 5-4 in a

conference win over Trinity College. The match against Trinity was incredibly close, with Pena coming through in No. 2 singles after losing the first set and being down 5-2 in the second. Jamie Neely 10, Sullivan, and the doubles team notched wins. The score was tied at 4-4 before Anderson came through at No. 5 singles, cheered on by enthusiastic Polar Bear fans.

Reflecting on the trip, Sullivan thinks that the team bonded well over break.

"We do have a pretty big freshmen base this year, but spring break has really helped unite the team," he said.

Coach Colin Joyner feels the same, stating that "the team is overall very well balanced." However, one area of work for the Polar Bears is doubles play, which still needs refinement. Upcoming challenges include Middlebury and Williams College, but the team will have enough time to

This Sunday, Bowdoin will take on Connecticut College at 10 a.m. at home

Athletes of the Season

BY ADAM KOMMEL ORIENT STAFF

The Orient is proud to unveil the inaugural "Orient Male Athlete of the Season" and "Orient Female Athlete of the Season" awards, new honors for a Bowdoin athlete each

It is awarded to the two athletes for exemplary performance, leadership, and commitment to their respective programs. The recipients are chosen by the editors of the Orient

LUKE FAIRBANKS '09

Luke Fairbanks'09 won the shot put in six of the eight indoor track meets in which he competed this winter. Combined with his leadership as tricaptain for the men's indoor track and field team, his impressive performance this winter has earned him the Orient Male Athlete of the Season award.

Fairbanks' top wins came on February 7, when he won the shot put at the Maine State Meet at Bates, and February 21, when he won the event at the New England D-III Championships at MIT. At Bates, Bowdoin finished first of four teams (the others being Colby, Bates, and the University of Southern Maine). At D-III's, the team came in fourth of 24.

"The Division III meet was pretty great, but winning the State meet convincingly as a team was probably the highlight of the year," Fairbanks said. How does he do it?

"A lot of weight training," he said.
"It's really a year-round thing."

"Luke is one of those guys that's always working hard," said teammate and fellow senior tri-captain Mike

MIKE ARDOLINO, THE BOWDOIN ORIENT ARCHIVES AND MARGOT D. MILLER, THE BOWDOIN ORIENT

STARDOM: Maria Noucas '09 (left) dribbles past defenders in front of a full crowd. Luke Fairbanks'09 (right) practices hammer throw on Wednesday.

Krohn

Fairbanks' best throw came at last year's New England D-III championships, when he threw the shot put, a 16-pound ball, 50'4".

"Strength is important, but it is basically how fast you can move the ball," he said.

Fairbanks also credited his success to his throwing coaches.

"A lot of it is coaching," he said.
"I've had two really good throwing coaches," referring to current coach Oscar Duncan and former coach Jim St. Pierre, who is now head coach of

strength and conditioning.

Duncan said he has been impressed with Fairbanks' ability to lead by example.

"He's not just a captain in names he's a captain in deeds," Duncan said.

"You have to have the discipline to

build your technique—over thousands of throws," Duncan added.

Fairbanks also competes in the weight throw, which he won at home meets on Dec. 13 and Jan. 17.

"The success of the team as a whole definitely has roots in the performances Luke gives week in and week out," Krohn said.

Fairbanks said he is looking forward to the outdoor track and field season, where he will compete in the shot put, hammer throw, and discus.

"It's a lot more fun to be throwing outside," he said.

Fairbanks plans to study-resource management or resource economics at graduate school next year, and he eventually would like to work in fisheries management.

Runners-up: Kyle Hardy '11 (ice hockey), Kyle Jackson '09 (basketball).

MARIA NOUCAS '09

Add Orient Female Athlete of the Season to senior Maria Noucas' list of accomplishments this winter. The senior point guard and tri-captain of the women's basketball team was named First-Team All-NESCAC earlier this month, and she finished the season with 300 career assists.

with 300 career assists.

Assists are "definitely my favorite part of the game," Noucas said. "As a point guard, assists are what you take pride in."

Noucas led the team with 137 assists this year, and she finished the season

with team-high statistics in defensive rebounds (112), steals (48) and minutes per game (31.1). She also led the conference with a

She also led the conference with a 2.79 assist-to-turnover ratio.

Tri-captain Jill Anelauskas '09 complimented Noucas' talent.

"She has an incredible work ethic and over the past four years has put in a countless number of hours doing everything she could to both improve her skills and gather knowledge about the game," Anelauskas said.

Anelauskas also stressed Noucas' leadership and personal qualities.

"Her team-first attitude, her genuine care and concern for her teammates, and her ability to respectfully communicate to both her fellow players and coaches are unique qualities that cannot be taught," Anelauskas said.

Though the women's basketball team won the NESCAC championship this year, the season was by no means an easy one.

With a new head coach, Adrienne Shibles, and coming off their first loss in the eight-year history of the NE-SCAC tournament, the last thing the Bears needed was another challenge.

But in the third game of the season, in November, Anelauskas suffered a season-ending injury, only two games after scoring her 1000th career point.

Noucas said that she realized no one player could replace Anelauskas, but she said, "We knew if we worked together as a unit, we could try to play our best without her."

The team was able to overcome Anelauskas' injury to finish with a 24-5 overall record and reclaim the conference championship.

Noucas was in the starting five in both her junior and senior years. In Noucas' first year and sophomore year, Katie Cummings '07 started at point guard, though Noucas was still able to pick up 74 assists in her first two years.

"I learned a lot from Katie," Noucas said. "She was a great mentor to me."

Noucas said she would like to coach college basketball after graduation, and at some point return to Brunswick.

"I would love to coach at Bowdoin someday," she added. "The community loves basketball."

Runners-up: Annie Monjar '05 (track), Leah Rubega '10 (basketball).

Winter sports frozen in postseason

BY SETH WALDER

Bowdoin sports hit a roadblock over Spring Break, with men's ice hockey, women's ice hockey, men's basketball and men's swimming and diving all facing difficulties in post-season play.

The lone winner was women's basketball, which won the NES-CAC championships after failing to win the tournament last season.

The women's basketball team received an automatic bid to the NCAA tournament after its conference championship, and pounced on its first opponent Castleton, winning by a score of 72-31. Katie Bergeron '11 led the team with 16 points.

However, the strong first-round performance wouldn't completely carry over to the next. The Polar Bears fell to Muhlenberg College by a heartbreaking score of 58-57. The devastating loss was remarkably similar to the team's 1-point loss to Amherst in the second round of the NCAA tournament last season.

The Bears trailed in the second half, but stormed back, and, with just seconds left in regulation, they were able to put the ball in senior tri-captain Alexa Kaubris' hands, but she missed the buzzer-beater attempt, ending the team's season with a 24-5 overall record.

Director of Athletics Jeff Ward said that the loss was tough, but that the team had made great progress throughout the year.

"For Coach [Adrienne] Shibles it was a great first year," he said.

"She's just a really good fit for Bowdoin."

The men's basketball team entered the playoffs with a fifth seed in the NESCAC and a chance at rival Colby in Waterville. The Bears were not fazed by the Mules' home court advantage and powered their way to a 66-54 victory, led by Mark Phillips' 09 with 15 points and seven rebounds.

Ward was proud of the team for making it to the NESCAC semifi-

"We're a much better team in men's basketball than most people realize," he said.

However, the team was trounced by top-seed Middlebury in the semifinals, falling 76-46 to the Panthers.

The women's ice hockey team waltzed into the playoffs with high hopes after an impressive eightgame winning streak, securing a fifth seed in the NESCAC tournament.

They fell just short, however, losing to the Mules at Colby 2-1. Down 2-0, the Bears kept fighting, and Lindsay McNamara '09 scored a goal to bring them within one, but the Polar Bears couldn't find a second goal. The Bears finished with an 11-11-1 record, but with their eyes set dead ahead.

"The women's ice hockey team gave us a glimpse of what their team is going to be like in the future," Ward said.

The men's ice hockey team suffered a similar fate. The No. 6 seed in the NESCAC, the Polar Bears traveled to Williamstown, Mass. to face the Ephs. The Bears had beaten Williams 8-3, earlier in the season at the opening game of the Sidney J. Watson arena, but were deadlocked 2-2 at the end of regulation.

However, Williams scored the golden goal putting the up-and-down Polar Bear season to rest. The Bears finished below .500 on the season.

The men's swimming and diving team finished in 10th place out of 11 squads in the NESCAC championship meet, but there were some highlights for the Polar Bears, particularly by first years.

Nathan Mecray '12 broke a school record and finished in second place in the 100-yard breaststroke and Mac Routh '12 also broke a school record with his third-place finish in the 50-yard butterfly.

While the track teams will continue on, their indoor season has ended.

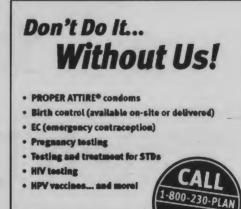

On the women's side, Annie Monjar '09 and Ali Chase '09 competed in the NCAA meet.

Chase, who came in fifth place in the 800-meter run, was named an All-American. Monjar finished in 15th place in the 5000-meter run.

The men didn't have quite the same highlights, ending their indoor season with 38th place finish out of 49 teams in the ECAC championships

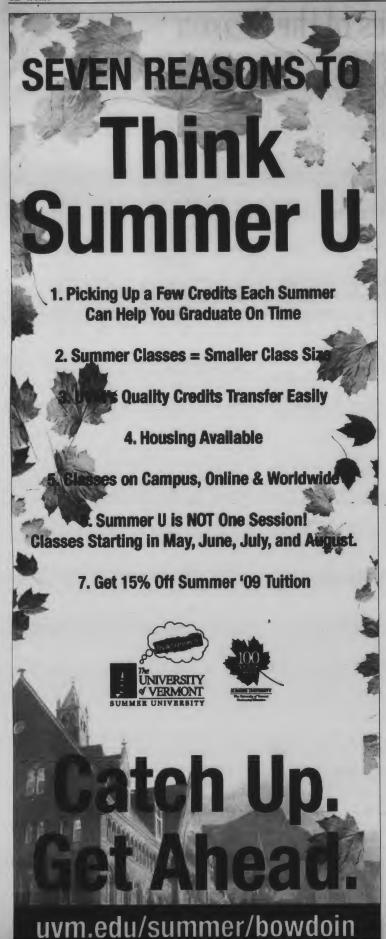

Ward felt that on the whole, it was a decent end of the season for the Polar Bears.

"Overall I would say it was very good, but probably left us with a taste for a bit more."

Men's lacrosse starts season on hot streak

BY JEREMY BERNFELD STAFF WRITER

The men's lacrosse team will look to continue its blistering start to the season this weekend on the road at Connecticut College on Saturday.

The Polar Bears (5-1, 3-0 NE-SCAC) are currently ranked 13th in the latest national poll and look poised for a great season.

The Camels should provide a tough test for Bowdoin on Saturday. Though just 3-4, and 0-3 in the NESCAC, the team recently dismantled Babson 22-5 and may be on the upswing.

'It's going to be a big game," said head coach Tom McCabe. "They may be 0-3 in the league, but every game has been decided by only one or two goals. It is a tough place to play—we'll have to shoot the ball well and play great defense." "We'll have to show good pa-

tience on offense, especially if they throw a zone defense at us like they have in the past," said senior quad-captain Rob Halliday. "And if we keep playing well in net with goalies, and on defense as well, hopefully we'll get a win."

After a pre-game injury to start-ing goaltender Jake McCampbell '11, the team has been without its starting goalie for the last two

sophomore Burkhardt and first year Chris Williamson have proved able backups.

We anticipate having Jake Mc-Campbell back [against Connecticut College]," McCabe said, "and good defense starts with goaltend-

Though it is still early in the season, the roster is shaping up. "I think our team's strength is our depth," said senior quad-captain Bryan Holden. "We have a very talented squad that goes well beyond just the guys on the field."

The team showed off its depth

on Wednesday in a 16-9 win over Keene State at home.

After letting up two goals in the fist nine minutes of play, Bowdoin scored six unanswered first-half

"We had 10 different players score," McCabe said, "and that's a real positive. It's fun in those games to share the wealth."

Senior Matt Legg, juniors Adam Tracy and Justin Starr, sopho-Kit Smith, and first year Mark Flibotte each contributed a pair of Bowdoin goals in the win. Burkhardt made seven saves in the net during the first half action before Williamson took over and stopped four shots in the second half to seal the win.

The team could not have asked for a better start within the league. The team has won all three of its NESCAC games after notching wins against Wesleyan, Trinity, and Amherst over Spring Break.

Over the break, the team also traveled to Dallas to play in the Patriots Cup Tournament. The Polar Bears finished 1-1 in two nationally-ranked clashes after a 11-9 loss to No. 10 Western New England and a 10-6 win over No. 20 St. Lawrence.
"This year's spring trip was a

bit of sprint," Holden said. "Over the course of a week we had four games, one in Connecticut, two in Texas, and one back at home. While we dropped one of these games to Western New England College, we learned a lot about our team in the way we bounced back by beating St. Lawrence two days later."

At 5-1, the team is ready for up-

coming challenges, said Halliday.
"Our physical conditioning is great and with the amount of upperclassmen we have playing, we have a fair amount of experience so nave a rair amount of experience so we're trying to play a smart brand of lacrosse," Halliday said. "Our depth has helped us, too, we have a lot of good players on our team."

Women's lax moves to 4-3 after win

BY CRAIG HARDT STAFF WRITER

Spring is back, and so is women's lacrosse. Like the recent Maine weather, the beginning of the lacrosse season has been an up-and-down ride for the Polar Bears, who came into this week's game against Wheaton College with a record of 3-3. Over Spring Break, the team was victorious against Drew, Ohio Wesleyan, and Endicott and suffered one-goal losses to Wesleyan, Trinity, and most recently, Amherst.

"It's frustrating because, with a couple more goals, we could easily be undefeated right now," said first year Chelsea Albright.

Head Coach Elizabeth Grote said, "There are a lot of games left so, even

with a couple tough losses, we still have a lot to look forward to. We're a young team so I think games like [the losses to Wesleyan, Trinity, and Amherst] will serve us well as learning experiences to take with us in the future."

It certainly seemed like Coach Grote was right on Wednesday night.

The women's lacrosse team was back with a vengeance as they cruised past previously undefeated Wheaton under the bright lights of Howard F. Ryan Field.

The Polar Bears got on the board first with an early goal by Ingrid Oelschlager '11 and never looked back.

After a brief tie, Bowdoin took control with a three-goal surge sparked by Christina Denitzio '09 to give them a 5-2 advantage going into halftim

A second-half onslaught of seven unanswered goals led by first year McKenna Teague (game-high four goals) sealed the final result, as the team coasted to an impressive 14-3 victory.

Oelschlager finished the game with three goals, while Lindsey McNamara '09 and Katy Dissinger '11 both added two goals and an assist.

"We played a complete game. We scored a lot of goals and we played good defense," said Coach Grote.

The victory improved the Polar Bears' record to 4-3 on the season as they look to continue their success against Connecticut College on Saturday.

"It's a big game for us," said Coach Grote. "Getting that first NESCAC victory is important."

JEREMY IS BERNING

BY JEREMY BERNFELD COLUMNIST

A regular season NESCAC championship? Yawn.

A league title? Yes ma'am. The NCAA tournament for the 10th straight year? You bet. One of the top 25 teams in the country? Check.

If I don't have your attention yet, I'm sorry to disappoint, but you've stumbled on the Orient's sports column. There's not much else the Bowdoin Women's Basketball Team can do.

March: the month of mud, spring break and basketball. But in Brunswick, the Madness of March is over and we're left with just the mud and the all-too-distant-and-hazy memories of vacations in the sun. Sure, "The Tourney" still rages

Sure, "The Tourney" still rages on around the country. Brackets are still poised to be made or busted and that company pool prize still seems within reach. We've seen upsets and blow-outs, tears and fist-pumps, and we've seen more than a few low-seeded teams sweat.

But March Madness came home to Brunswick this year, and has every year for the past 10 seasons. It might be getting warmer outside, but March is still kind to Polar Bears.

Bowdoin athletes have a lot on their plates, and let's face it, they put the student in student-athlete. So it's no surprise that there are some teams on campus that don't routinely make the NESCAC tournament.

The women's basketball team hasn't just made the NESCAC tournament; they have won it every year but one since its inception. If you could hit eight-of-nine shots from three-point range, you'd have a better shot than Ray Allen. If you've won eight-of-nine league titles, you're on the Bowdoin Women's Basketball Team.

This year's team didn't disappoint. The Polar Bears won their final seven regular season games to clinch the NESCAC regular season title at 8-1 in league play and 21-4 on the

year. Then, storming past Williams, Trinity, and Amherst, the team won the program's eighth NESCAC championship and notched another national tournament selection.

Tragically, Muhlenberg cut the season short after only one NCAA Tournament victory, over Castleton State. It says something about a program when one tournament victory isn't enough. Not NESCAC tournament, but NCAA Tournament.

And the team's honor roll doesn't end there. Senior tri-captain Maria Noucas garnered first team allleague honors and first-year Jüll Henrikson was named NESCAC Rookie of the Year. Not to be outdone, first-year head coach Adrienne Shibles nabbed New England Coach of the Year honors, too.

After the final buzzer sounded in the game against Muhlenberg, the women's basketball team's season may have been over, but it won't be forgotten. It was a great season, there's no doubt about that, but one can't shake the feeling that the Polar Bears should have played just a few more games in March.

You might enjoy watching Rick Pitino's Lousiville squad shoot threes or Jim Boeheim's Syracuse squad play lockdown D. I'll take Shibles' Polar Bears any day, because I like champions.

Incidentally, I'll also take them over Memphis, who will win this year's Big Dance. For the record.

On and off the court, these Polar Bears represent us with skill, dignity, and class. It's been a pleasure watching them as a fan and as a journalist.

And, oh yeah, they've been good. Real good. This year's senior class, the triple threat of Noucas, Alexa Kaubris, and Jill Anelauskas have gone an incredible 99-19 over their time here in Brunswick.

Unfortunately, the gym is quiet these days. The air is too heavy and the squeak of the floor is too loud. The bleachers are empty and the scoreboard has long been snuffedout.

All that's left are the team's championship banners. And that's not

Sailing opens spring with two wins

BY CHARLOTTE RYAN

In the sailing teams' first official races of the spring season, they won the Central Series regatta at Harvard and a race in the Veitor Trophy at Salve Regina.

At the Harvard Central Series on March 21, co-captain Doria Cole '09 skippered in the A division with crew.Erin Taylor '09. Co-captain Pete Wadden '09, with crew Audrey Hatch '10, skipped for the B division.

"Doria and Erin were awesome because they led up to a first-place combined score in the central series," Hatch said.

The Polar Bears edged out Tufts by one point to win the regatta.

One week later at Salve Regina.

Viktor Bolmgren '11 skippered with crew Coco Sprague '11 in A division. They finished in third place in their division with 43 points, just one point behind the first- and second-place teams.

ond-piace teams.

Alex Takata '12 skippered in B

drivision with Jeff Goodrich '12 as

crew. They finished first in their division by a significant margin, leading the Polar Bears to a win in the

Veitor Trophy.

With several sailors abroad for the semester, the spring sailing team is smaller than usual—though they've made the addition of Mark Dinneen '08 as assistant coach. Despite the loss of a number of teammates, the team's recent successes show promise for the rest of the season.

Over the break, the sailing team

traveled to Texas to take advantage of the warmer weather, sailing out of the Austin Yacht Club.

"It felt really good to open the season with two wins because we felt like all our hard work in Texas over Spring Break paid off," Wadden said.

Before the official races began, the team got some practice in at a race event hosted by Roger Williams.

The teams of DJ Hatch '11 and Leah Hughes '11, Billy Rohman '11 and Jeff Goodrich '12, and Audrey Hatch with Bolmgren and Sam Duchin '10 sailed through two days of good weather to kick off the spring season.

The sailing team will travel to Providence, R.I., this weekend for an invitational regatta.

OPINION

BOWDOIN ORIENT

Free speech

n Wednesday afternoon, posters popped up around campus with the Greek letters Phi Chi—the name of a former Bowdoin fraternity as well as the title of a traditional Bowdoin fight song now sung by the Meddiebempsters. The posters, which were hung to advertise tonight's a cappella concert, have since been removed, at the request of Student Activities and Residential Life, for the usage of Greek letters. The Meddies responded with a public apology for their "ignorance of the rule that stipulates that Greek letters cannot be posted on campus for advertising purposes.

As journalists, students, and most importantly as Americans, we find this type of censorship alarming—especially given that this is not the first infringement of free speech this year. From forbidding the student publication "Q" to be handed out in Smith Union to requesting the removal of a student's prominently displayed McCain poster in the fall, student free speech is occasionally and subtly stifled on campus by the administration.

Bowdoin is not a public place, so technically free speech here is a privilege, not a right. However, colleges and universities have a strong history of granting students and professors academic freedom, which necessarily should allow for the expression of a wide range of viewpoints. At Bowdoin, President Barry Mills affirmed this tradition in his 2005 baccalaureate address, when he said that "we are fundamentally a place for students to come to learn with engaged faculty—to study, mature, and grow together in an intellectually charged environment that is not afraid or unwilling to tackle the most troubling issues of today or in the past." The environment that Mills referred to necessarily extends beyond the classroom.

There are certainly instances where the College can limit this right, such as when speech is unnecessarily obscene or deliberately hateful. While it is not always easy to decide where to draw the line, none of the three cases mentioned above fall into these categories. The censorship practiced by the College-whether because of concern for image, outdated policies, or other reasons—deprives students of opportunities for expression or vigor-

The College should take its commitment to preparing students to be responsible citizens seriously. One of the fundamental rights we have as citizens is the right to free speech. Censoring students, even if the topic may be potentially offensive, is in direct opposition to that right. And the use of the Phi Chi symbols is hardly offensive. The Greek system plays an important role in Bowdoin's history, and its traces need not be purged. The Meddies keep alive a piece of Bowdoin tradition in singing the "Phi Chi" fight song and advertising for it with Greek letters. And this should

I FTTER TO THE EDITOR

Carbon neutrality is admirable but unlikely

Bowdoin's goal to become carbon-neutral is laudable, but-from a practical standpoint-most likely impossible. Consider that if Bowdoin does not modify its admissions policies and revert to being a regional, "New England," or even "Maine" college (though I am not recommending necessarily that it do so), it will be hard-pressed to comate for the carbon footprint of all

students' travel to and from campus.

Is this the responsibility of the College? I would say yes; a parallel might be the drive to buy locally grown foods "in season" and reduce worldwide food transport carbon emissions. To the extent that food comes to the consumer from a distance, Bowdoin faces a similar quandary and you probably can't overcome the burden without "shopping lo-cally;" so strive on, but don't put too fine a point on the promises.

Sincerely, Dale H. Tomlinson '70

A new social contract for the suburbs

BOWDOIN BY ROSS JACOBS

Their original sin was annihilating suburban ideals and vilifying suburban cultural institutions without begetting a compelling alternative to fill the void. We are awakening to the enormous communal toll of this irresponsibilty.

What is the one thing our environmentalism, romance with urban rap music, and emphasis on study abroad hold in common? I think it is a disdain for suburban life. I can count on one hand the students I've met here favorably inclined towards these post-war dwelling spaces, ore than half the students at Bowdoin call one of them "home." What gives?

The repudiation of suburban ideals is understandable. From my experience, those who describe Homo Suburbus as a bland vulgarian withdrawn from the community, a family-oriented consumer dedicated to the cult of affluence, and a middleclass white man without a strong need for diversity have not totally missed the mark. Yet, if you'll join me for a moment, I want to look at the origins of this repudiation of suburban life, sympathize with the criticism, but ultimately argue that we'd be better off trying to kindle the sparks of brilliance within suburban culture rather than vilifying this entire societal development

Revolutionary cultural move-ments tend to see themselves as artistic heroes overcoming the philistinism of an uncultured villain. The Greeks under Pericles wished to see their nobility triumph over the belligerence of the Spartans. The French Jacobins wanted to impose their "Liberté, Egalité, Fraternité" on the artificiality of the corrupt aristocracy-cum-bourgeoisie. German romanticism trumpeted the dethroning of industrial barbarism Recently, the baby boomers' stu-dent renaissance in 1960s America initiated a revolt against a greedy WASP establishment. In our time, with the baby boomers comprising the establishment, they lead a new struggle-a quest to commit students to more worldly, ecologically sound, and socially just goals that inherently repudiate bland subur-ban ideals. Without a doubt, this movement has been highly successful-students feel the need to leave the suburbs in order to respond to the call of the teachers they re-

The consequence of this anti-suburban bend is that when students return home to their suburbs, they greet them with disgust, cynicism, and even repudiation. Indeed, the critics of the suburbs were and are largely right about the cultural deficiencies of the suburbs. But their repudiation has left a hid-

den consequence-educated and cultivated people leave the suburbs, at least during their creative prime from, say, 19 to 35. How can we create more cultural opportunities in the suburbs if the baby boomers continue to encourage this "reverse sprawl," denying these spaces of the critical mass of culture necessary to attract creativity. Obviously there are more vicious cycles in our orld, but this one still merits further reflection.

Everyone knows that a great virtue of many suburbs in America is the education they provide. We should be grateful that the leaders and teachers of these communi ties plant seeds destined to bloom into the most respectable flowers. But we should remain astonished that these communities offer so little space for the seeds they plant to blossom within the confines of the suburb itself. What remains are talented dancers without a well-attended stage, drummers and violinists without a popular concert hall, thinkers without lively coffee houses, editors without a vibrant filmmaking scene, and journalists

without a thoughtful magazine. The suburbs have made great strides since their days as reactionary white-flight havens, especially in the realm of education and youth culture. Yet, the glaring hole is that there are so few spaces within the actual suburbs where cultural and intellectual toils can bear fruition. So the most creative minds and best community organizers immigrate to the city and perpetuate a caustic cycle of suburban philistinism.

Many people complain about a lack of vigor and intellectual engagement in our nation's top colleges. The twin cults of careerism and postmodernism that universities encourage do contribute to this decline, but the real problem lies outside the university. Suburbs are not adequately responding to their students' need to see that learning will open up the gates to participa tion in a cultural community. The lack of a tenable cultural infrastructure outside the universities, especially in suburbs, where over half of Americans dwell, should be added, alongside political correct-ness and Palinism, to a shortlist of possible culprits for our current intellectual decline. Because they see no magazine cultures they wish to join or literary associations they work to be part of, suburbanites getting a liberal education divert energy towards what is valued in the suburbs: a trophy wife or husband, a lucrative career, and a car. There exists little incentive to keep

working.

Rebuilding the entire infrastructure of suburban life is a difficult task-that's why this is the task of old people. Yes, rather than sit back and vote against educational referenda, the baby boomers should build our suburban culture.

When we get back home this summer, we should tell these baby boomers flat out: if you do not fill the void of suburban culture and continue to act as if these suburbs should be evacuated then no social security for you. While we work during our 20s, the same people who repudiated the suburban ideals and cultural institutions have the difficult task of creating these suburban cultural outposts. Without codifying or federalizing it, let this be the social contract for the 21st century: we will provide you with social security if you build us cultural outposts.

The boomers can be credited with great achievements—promoting civil rights, challenging racism, and liberating us from the tyranny of sexual Puritanism. By far, their greatest achievement was shift-ing the locus of global intellectual life to American universities after Europe and Russia descended into barbarism. Yet, their criticism of the suburbs was incredibly destructive and still disseminates a spirit of reactionary cynicism that aims to intensify our repudiation of the suburbs instead of ennobling these postwar growths.

Their original sin was annihilating suburban ideals and vilifying suburban cultural institutions with out begetting a compelling alterna-tive to fill the void. We are awakening to the enormous communal toll of this irresponsibility. It is time for them deem themselves. Perhaps these boomers to grow up can be channeled toward a creative project aimed at creating spaces where our cultural, civic, and intellectual toils can bear fruition in what are now socially vacuous residential areas. If they succeed and add the badge of a second revolution, the Suburban Invigoration Movement, to their uniform, maybe, just maybe, they can wrest from their courageous and legendary parents the mantle of "The Greatest Generation."

Swinging out of the Bowdoin bubble

SELON MOI BY MEREDITH STECK COLUMNIST

On the first and third Friday nights of the month, you will not find me at Bowdoin. I'll be swing dancing at the North Deering Grange Hall, getting a necessary supplement to my liberal arts education.

During my first and sophomore years, going to the Grange was solely about becoming a better dancer. I approached the introductory group lessons with the same focused concentration as I approached my classes and assumed that my disciplined determination would warrant immediate success. But when lights in the dance hall dimmed and the familiar teacherstudent scenario vanished, so did my confidence. The world at the Grange was dominated by whirling strangers of all ages with whom I could find no common ground. I couldn't ask them which dorm they lived in, what their major was or what sport they played...much less ask them to dance. For hours, I remained paralyzed on the sidelines, wishing I could join their community but unable to interact with people that seemed so utterly different from me.

I spent a year breaking down my self-inflicted social barriers and my overly rigid approach to swing dancing. The more I began to admire the dancers at the Grange, the more willing I became to let go of the Bowdoin comfort zone that was preventing me from connecting with anyone who wasn't a 20-something academic. I had mastered the basic swing step, but I envied the effortlessness and style of the older dancers. They weren't counting the beats or worriedly anticipating

moves; they were feeling and listening. Ever so slowly, I began to accept that swing dancing wasn't about being in control or regurgitating what you'd learned in lessons. I stopped counting. I let my body, develop reflexes separately from my brain and thus began to communicate with the people at the Grange.

These initial nonverbal communications on the dance floor wore away at my social apprehensions. What I had in common with these dancers suddenly became obvious: We had all chosen to be here at the same time and place. "Why?" I asked them.

One woman in her 50s had two daughters in college and was filling the empty nest with a new activity Another man was an engineer look ing to use the other half of his brain. A young female auto-mechanic wanted a reason to put on a frilly skirt ev ery once in awhile. Every month, I danced and collected life experiences. adventures hitchhiking through Europe in the '70s dancing to outdoor iazz bands in the streets of New Orleans until three in the morning, the shenanigans of crazy uncle Bill who rode a '36 Harley and wore a leather belt with "OUTLAW" studded in rhinestones all the way around. The room came alive.

Then I really learned to dance. And it had very little to do with learning new steps. Rather, I allowed myself to get lost in the infectious energy emanating from the crowd. I welcomed and acknowledged a partners' enthusiasm by reciprocating with my own unabashed joy. I had never previously been unguarded enough to physically express inner spontaneity in front of others. There was something absolutely human about all of us letting loose together, wearing our souls on our sleeves. The Grange had transformed me into an extrovert.

Becoming a part of the swing dance community in Portland revealed to me that transformative learning (both physical and metaphysical) can take place outside of academia. I have been granted newfound social ability, an invaluable sense of self, and fluency in an international language all due to a group of people that I was initially too hesitant to approach.

Why does the Grange provide such an important supplement to my college education? Although I want to enter the post-Bowdoin world as an eloquent, cultivated individual, I also want to be a gal who's fun to dance with. Someone who can embrace, enter, and echo the humanity in a room full of strangers. Someone who can communicate with a variety of people in settings outside a lecture hall. Bowdoin fosters a wonderfully close-knit community, but becoming proficient at interaction with only peers and professors will not necessarily sustain a lifetime of learning.

Although Bowdoin students seem to know that valuable knowledge and meaningful social experiences can be obtained outside of our bubble, not enough actually act. Everyone has subconscious barriers that will never be broken in the classroom setting, where we students are confident and comfortable. It never occurred to me that I wouldn't be able to dance those first few days at the Grange. Discovering that I could learn volumes about myself from these dancers has enhanced my four years here in ways I never thought possible.

The more veracious and resourceful a learner you become, they more you'll realize that the two worlds inside and outside the bubble are one and the same. Only then will your liberal arts education have achieved one of its most important goals: leading you toward the whole of humanity.

Why Barack Obama's 'smart' policies aren't

ANNUIT
COEPTIS
BY STEVE ROBINSON

After two long weeks of Spring Break, the students of Bowdoin College have finally returned in search of educational excellence. While many students spent those two weeks sking in the Rocky Mountains or sipping Coronas on some tropical beach, I was busy stockpiling ammunition and firearms.

All across the country, gun dealers are reporting tripled and even quadrupled sales since Obama's election. Perhaps sales have increased because our current political regime has eyed the second amendment with contempt for years or perhaps there is an increasing sentiment that our leaders are returning to a pre-9/11 attitude.

Over the last eight years, big government Republicans have spent us into a hole, but at least they improved homeland security and made this nation a safer place. Although the new administration seems keen on continuing the enlargement of government, they are remarkably naïve about the dangers facing America.

Many Democrats believed Obama would bring a refreshing new face to American foreign policy; however, his most recent attempts at "smart" foreign policy have been anything but. Although the American public may not read or understand the laws made by congress, the international community certainly does. Only after the European countries threatened a trade war was proposed protection-ist language removed from Congress'

stimulus package.
Secretary of State Hillary Clinton's first attempts at foreign policy have proven to be turbulent compared to the hopey-changey rhetoric of Obama's campaign. While visiting the E.U., Clinton had a tough time pronouncing the names of foreign dignitaries and even referred to her own counterpart in the E.U. as "high representative."

Clinton's sagacious foreign policy served America just as well when she was meeting with an ambassador from Russia. In an act of pure briliance, Clinton solved all of the problems between Russia and the U.S. by presenting the Russian diplomat with a reset button. What? Does that sound silly? Well unfortunately it is true.

In front of the international press Clinton unveiled a yellow box with a red button. On the box were two labels, one read Reset and the other was the Russian equivalent...or so she thought. One of Clinton's aides had committed a foul translation blunder because the Russian label actually read Overcharge. It's not Clinton's fault though: the good translators

were probably fired for being gay.

Not only has the new administration made childish attempts to mend fences, they seem unwilli tain relationships with America's most loyal allies. It is custom for foreign leaders to exchange gifts and on his first visit with Obama, Gordon Brown was out to impress. He brought a pen holder carved from the wood of Victorian anti-slave ship the U.S.S. Gannet. The U.S.S. Gannet was the sister ship to the vessel that provided timber for the Resolute Desk, which has called the oval office home since 1880. Brown also handed over a framed commission for H.M.S. Resolute and a first-edition biography of Winston Churchill. In addition, the prime minister provided Obama's children with outfits from Topshop and six children's books which have yet to be published in America.

Now you would think that a man who ran on "intelligent policy" would be prepared to reciprocate, however, in return for these thoughtful gifts Obama gave the Brown family a box set of 25 American classics on DVD and a couple of model helicopters. However, when Brown tried to watch one of his new movies he discovered that the technologically ignorant gift-givers had supplied him with DVDs that were incompatible with European systems.

Now that, Mr. President, is classy. But we haven't even got into the real meat of America's new foreign policy. Just as Obama supporters had hoped, the war in Iraq is over, all of our troops are home, and Islamofascist terrorists no longer want us dead. Wait...hold on...I'm being told that's not true.

What is true is that, since elected, Obama has escalated a war in Afghanistan, prolonged a war in Iraq, and initiated a covert war in Pakistan. It may be surprising to learn that, in terms of Middle East policy. Obama has out-Bushed Bush. But, then again, it's not a surprise for those of us who were paying attention.

If all these recent events were part of Obama's magnificent plan to feign international weakness, then congratulations...it worked. Iran has recently declared itself to be a space and nuclear power, North Korea is testing its ballistic missiles, and Russia is now using bases in Cuba as well as Venezuela. All these events point to one single fact; the cold war never ended, the strategy just changed.

However, in these dangerous times the American people may rest assured knowing that our current administration will do everything in its power to keep us safe...right? Well, I'm not holding my breath. Like many Americans, I am following a two-part plan to ensure my own safety. Step one: buy guns. Step two: take government away from the Democrats.

The quiet war that hits close to home

BY CRAIG HARD

With wars in Iraq and Afghanistan and escalating violence in the Middle East, it can be easy to forget about a war that is fought without missiles and tanks (so far at least). Yet the ongoing Mexican drug war is neither less serious in nature nor less relevant to Americans' lives than other conflicts around the world.

As the war between rival Mexican drug cartels (the main suppliers of illegal drugs to the United States) and Mexican government forces intensifies, Americans are becoming increasingly aware of, and affected by, the volatile nature of this conflict.

In the past 15 months, escalating violence has claimed more than 7,000 lives in Mexico. That violence is now beginning to spill over into the United States and frequently visited tourist hotspots in Mexico.

The problem is serious enough that Congress has already approved \$700 million in federal aid to help prevent the drug war from expanding it from to areas of the United States.

The Mexican drug war originated when heightened security in the Caribbean and South Florida led Colombia (historically the main exporter of co-caine and other illegal drugs) to form partnerships with Mexican drug traffickers to transport drugs to the United States. In the 1980s Mexican traffickers and Colombian exporters set up a system of payment in product instead of money. This meant that the Mexican drug traffickers were no longer just the

transporters of illegal drugs, but their distributors as well.

In recent years, competition between rival drug cartels, coupled with increased government intervention, has led to a significant spike in violence. While the Mexican government traditionally has paid little attention to violence between drug cartels, current Mexican President Felipe Calderon has shown a commitment to ending this ongoing conflict that threatens the stability of Mexican society. His new stance on the issue has led to the involvement of over 45,000 troops, as well as numerous state and federal police forces in his attempt to diminish the prevalence of drug trafficking in Mexico.

Three years into his ambitious antidrug campaign and faced with the drug cartels' ever-improving military technology and weapoury, it is clear that President Calderon will not be able to end the drug war without the United States' help.

The new administration has recognized the threat and appears to be ready and willing to take on a greater role than the United States government has done in the past, expressing a commitment to stand, "shoulder-to-shoulder with [President Calderon] in the fight [against drug cartels]."

ngm (against drug cartes).

Secretary of State Hillary Clinton
has already done more than the previous administration, which was often
criticized for not acknowledging the
extent to which U.S. weapons smuggling and demand for illegal drugs has
contributed to the escalating violence.
In a press conference with reporters,

Clinton said: "I feel strongly that we have a co-responsibility, our insatiable demand for illegal drugs and inability to prevent weapons from being illegally smuggled across the border to arm these criminals causes the deaths of police officers, soldiers, and civilians." She added: "Clearly, what we have been doing has not worked and it is unfair for our incapacity...to be creating a situation where people are holding the Mexican government and people responsible. That's not right."

On March 24, the Obama administration released a plan that outlines a pledge to work with Mexico in law enforcement and judicial capacities and to monitor the border more closely. They have also pledged to renew the United States' commitment to reducing the demand for illegal drugs in America. This final goal is, in my opinion, the key contribution—more than any amount of money the U.S. government invests—that can help Mexico end the drug war.

rollowing through on these promises could be the single most important thing this administration does in protecting our borders. By ending the drug war we can give Mexicans the chance to experience, in their own country, the safety and security that many risk their lives to enjoy across the border in the United States.

Mexico can't win this war alone, but it can win it with more support from the United States. And there's a lot to be gained for both countries if they do.

Longer op-ed submissions of 400 to 800 words must be received by 7 p.m. the Wednesday of the week of publication. Longer submissions may be prearranged with the Opinion Editor. The editors reserve the jight to edit op-eds for length. Submit op-eds via e-mail (orientopinion@bowdoin.edu).

WEEKLY CALENDAR

MARCH 27-APRIL 2

PREPARE FOR DEPARTURE: Seniors get ready for graduation and life as Bowdoin alumni during the 2009 Grad Fair in Smith Union Wednesday afternoon.

FRIDAY

CONCERT .

Phi Chi

The Meddies will honor Bowdoin's fight song during this half-hour performance.

Chapel. 7 p.m.

PERFORMANCE

Spring Improv Show

Bowdoin's Improvisational Comedy Troupe, the Improvibilities, will provide comic relief. Tickets, which are required for entry, are free at the Information Desk. Pickard Theater, Memorial Hall. 8 p.m.

"Perfume: The Story of a Murderer" and "Everything is Illuminated"

The Bowdoin Film Society will screen "Perfume," the story of one man's murderous search for the perfect scent, and "Everything Is Illuminated," a film based on Jonathan Safran Foer's novel.

Smith Auditorium, Sills Hall.

"Perfume": 7 p.m., "Everything Is Illuminated": 9 p.m.

SATURDAY

"Everything is Illuminated" and

"Perfume: The Story of a Murderer" Smith Auditorium, Sills Hall.

"Everything is Illuminated": 7 p.m., "Perfume": 9 p.m.

Okbari Fasil Ensemble

Amos Libby and Eric LaPerna will perform traditional Ottoman music.

Kanbar Auditorium, Studzinski Recital Hall. 7:30 p.m.

SUNDAY

RELIGIOUS SERVICE

Interdenominational Praise Service

The Bowdoin Christian Fellowship will lead a discussion of Scripture focused on the topic of worship. The service will include a worship band and the expression of several religious traditions.

Chapel. 7 p.m.

MONDAY

"Anecdota Arcana: Everyday Roman Life in Technical Writings"

University of Wisconsin Professor of Classics J.C. McKeown will discuss the findings presented in his most recent book about neglected facts of daily life in the

Lancaster Lounge, Moulton Union. 4:30 p.m.

"Race, Racism, and Revolution: Lessons from Cuba"

As part of the celebration of Cuba Week, Dalhousie University Adjunct Professor of International Development Studies Isaac Saney will speak. Saney is the author of "Cuba: A Revolution in Motion" and often teaches courses on Cuban issues.

Room 315, Searles Science Building. 4:30 p.m.

"To Infinity and Beyond"

University of Texas Professor of Mathematics Michael Starbird will deliver the Dan E. Christie Mathematics Lecture. He will speak about simple conceptions of infinity.

Room 315, Searles Science Building. 7:30 p.m.

TUESDAY

"Cantor Sets - Tame and Wild"

University of Texas Professor of Mathematics Michael Starbird will discuss the contradictions presented by Cantor Sets.

Room 217, Searles Science Building. 4:30 p.m.

"Ideas in Things: The Changing Vocabularies of Photographic Process"

Alison Nordstrom, Curator of Photographs for the International Museum of Photography and film, will speak about photographic vocabulary. A reception will follow. Room 315, Searles Science Building. 7 p.m.

"An Evening with Jonathan Safran Foer"

Foer is the author of international best-seller "Everything Is Illuminated."Tickets are required for entry and are available at the Smith Union Information Desk.

Pickard Theater, Memorial Hall. 7:30 p.m.

WEDNESDAY

"The Tradition of Shakespeare's Sonnets"

Sean Keilen, Associate Professor of English at the College of William and Mary, will discuss some of Shakespeare's most recognized work as he delivers the Jacob Stahl Lecture. Main Lounge, Moulton Union. 4:30 p.m.

"A Journey of the Mind"

One of the world's foremost experts on bipolar disorder, Dr. Kay Jamison, will speak.

Kresge Auditorium, Visual Arts Center. 7:30 p.m.

CONCERT

Roberto Díaz Recital

Díaz, who received an honorary doctorate from Bowdoin in 2007, serves as the President of the Curtis Institute of Music in Philadelphia.

Kanbar Auditorium, Studzinski Recital Hall. 8 p.m.

THURSDAY

"Attempts on Her Life"

This play by British playwright Martin Crimp details the shadowy existence of a contemporary woman. Wish Theater, Memorial Hall. 7 p.m.

"Seeking Equity through Education: Voices from the Urban Classroom"

Assistant Professor of Education Doris Santoro will moderate this panel discussion between several Bowdoin alumni who teach in urban areas.

Smith Auditorium, Sills Hall. 7:30 p.m.

Chris Hill '74 visits campus

Obama's nominee for U.S. Ambassador to Iraq speaks with students, staff, and faculty

> BY CATI MITCHELL ORIENT STAFF

A week later than expected, Bowdoin students, faculty, and staff had the opportunity to listen to Chris Hill '74 speak on a myriad of issues related to his work with the U.S. State Department.

Hill, who was recently nominated to serve as the U.S. Ambassador to Iraq by President Barack Obama, was originally scheduled to speak at last Friday's Common Hour, but rescheduled due to his pending confirmation by the U.S. Senate.

Hill spoke on Thursday night for more than half an hour before answering audience questions for 45 minutes. The event was closed to the press.

In an interview with the Orient after his lecture, Hill cited Bowdoin's liberal arts education as playing an important role in his current work in diplomacy.

"I think what I learned in history class, government, and even English classes, to understand the human condition and where people are coming from, and have a respect for other people's point of view is what you get in a liberal arts education," said Hill.

Financial aid requests rise 2 percent for incoming class

ORIENT STAFF

Bowdoin applicants requested more financial assistance during this year's admissions cycle, but the increase was minimal; requests for aid from the admitted Class of 2013 increased only 2 percent from last year.

According to Director of Student Aid Steve Joyce, the Student Aid office had anticipated a slight rise in aid requests.

"You have to remember that financial aid for next year is based on 2008 income," he said. "The economic slide began in the second half of 2008, so some families were still managing OK in 2008."

"The concern is really how long this economic recession will last and what it will mean to the employment of Bowdoin families," he added.

Unemployment, as well as decreased income and assets, will undoubtedly limit many families' ability to pay Bowdoin's total cost, which averages \$50,920 for the 2008-2009 academic year.

Joyce estimated that next year's financial aid budget will increase approximately 6 percent, in order to accomodate greater need.

Of the 642 accepted students who applied for financial aid, 370 were offered grants and 176 did not qualify. Joyce added that the figures were "not precise" at the time the College mailed letters last Thursday, because 96 aid applications remain incomplete. He predicted that most of the unfinished requests would qualify.

FINANCIAL AID INCREASE

•The College received a 2 percent increase in the number of aid requests for admitted students

-Out of the 642 accepted students who applied for financial aid, 370 were offered grants and 176 did not qualify. -Director of Student Aid Steven Joyce said that the College is anticipating an approximately 6 percent increase for next year's financial aid budget, which can in part be attributed to the effects of the current economic downtum.

"We usually have enough data to tell if they can't," he said. "The question is whether they will complete or not. They may have decided they're more interested in another school and just won't follow up."

won't follow up."

Joyce estimated that around 75 percent of these students would complete their applications.

This year, according to Joyce, 4 percent more students checked the box for interest in financial aid on the common application. Though it serves as just a tracking tool that allows the Student Aid office to follow up with students who indicate initial interest but do not apply, this figure signifies the overall applicant pool's higher interest in aid.

In keeping with past years, the incoming first year class is expected to use about 28 percent of the total \$22.5 million financial aid budget for 2009-2010.

The College offered \$11 million to

April Climate Days festivities aim to spark green activism

BY ZOË LESCAZE

The April Climate Days look to spice up—not heat up—campus next week.

Organized by the President's Climate Commitment Advisory Committee, the events include a Climate Fair, the results of the Climate Matters Contest, and a Common Hour lecture with environmental advocate Majora Carter.

In a campus-wide e-mail sent on Wednesday, President Barry Mills encouraged the "active participation of students, faculty, and staff" in the coming events.

The environmental committee behind the events was formed in 2007 when Mills signed the American College & University Presidents Climate Commitment, an agreement among leaders in higher education to combat global warming.

cation to combat global warming.
"The primary goal of the committee" is to "set a date for reaching carbon neutrality," said Committee Chair and Senior Vice President

for Finance and Administration & Treasurer Katy Longley. That date must be decided on by September 15 this year.

The main goal of April Climate Days is to engage the Bowdoin community in climate concerns. According to Environmental Studies Director and Professor of Environmental Studies and Biology Philip Camill, the committee didn't want to be "sequestered away from the rest of the campus."

"We wanted to generate a meaningful discussion within the community," added committee member Conor Walsh '11.

"I think the most important thing is to involve the whole campus... and show that this is a campus dialogue," said committee member Diana Zhang '11.

The first event in the series is the Bowdoin Climate Fair on Thursday in Smith Union's Morrell Lounge. The fair will feature the projects and efforts from environmentally-

College admits 18.6 percent for Class of 2013

With a slight drop in total apps, admissions rate stays on par with last year

BY ADAM KOMMEL

Bowdoin's admissions rate increased to 18.6 percent this year from 18.4 percent at this time last year. After accepting students off the wait list, last year's admit rate settled at 18.5 percent.

Bowdoin saw 5,940 applications this year, compared to 6,033 last year, for a 1.5 percent decrease. The College accepted 1,104 students this year, compared to 1,110 at this time last year.

"I think we were all bracing ourselves given what's happening in the wider world for a possible decrease in admissions, and nobody was excited about that," said Interim Dean of Admissions Scott Meiklejohn. "We were happy that our early decision applications were where they were. We're thrilled to be basically flat for total applications for the year."

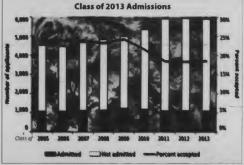

Bowdoin's peer schools have gen

erally seen even larger application decreases. Williams' is the most, dramatic, with a 20 percent drop. Middlebury dropped 12 percent. Bates and Colby each saw a 7 percent drop, and Amherst dropped 1 percent.

"In the context of mostly applications being down at a ton of our peer schools, we were feeling relatively OK that we had essentially the same number," said Meiklejohn.

Colby accepted 33.7 percent of applicants this year. Last year at the mailing date, it had accepted 30.5 percent. Bates accepted 25.1 percent this year, lower than the 28.9 percent last year. Middlebury

HILL

CONTINUED FROM PAGE 1

After graduating from Bowdoin with a major in economics, Hill served in the Peace Corps in Cameroon before joining the State Department, working extensively in Poland, Macedonia, Kosovo, and most recently, North Korea.

From his work in North Korea, Hill learned that it is important to "maintain a sense of patience, but also some persistence, as you deal with people who don't want to do something," a lesson he hopes to take with him as he moves forward.

Since he has yet to be confirmed by the Senate, Hill could not speak on the record about any issues pertaining to Iraq. He did, however, comment on the current economic crisis, noting that he did not think it would weaken America's diplomatic leverage.

"Frankly speaking, when you look at the G-20 and you look at the role that the United States has played in the G-20...I think actually the financial crisis may surprisingly turn out to be a moment where America will

noon, he will attend the Common Hour lecture given by Bowdoin classmate Geoffrey Canada '74. On Saturday, Hill will take the field for the alumni lacrosse game.

His goal for the weekend?
"Not to get killed playing lacrosse,"
he quipped.

AID CONTINUED FROM PAGE 1

students accepted to the incoming Class of 2013, but Joyce said he expects the students who actually matriculate will only require about \$6 million in aid.

only require about \$6 million in aid.

"It's a guessing game," Joyce said. "So if they all come, we will blow the budget."

The College assesses financial need based mainly on four factors: family income; family assets, including cash, investments, properties, and businesses; the number of children in the family; he and the number of children in college

According to Joyce, some uppermiddle-income families, earning \$120,000 and above, on the other hand, whose income and assets have been diminished by the recession, may have trouble paying bills because they have invested in expensive houses or private schools, for example.

"But we can't necessarily help families who have made those kind of choices," Joyce said.

"Students who have the highest need tend to matriculate at the highest rates, they have very generous grants and the amount expected from them is moderate," said Joyce. "Students in higher income bands tend to matriculate at slightly lower rates because more is expected of the family, and particularly in this economy, if the family is not confident they can manage payments over four years."

According to Joyce, the College seldom provides the entire cost for financial aid recipients. Almost all have a summer earnings expectation and a camous earnings expectation.

2013

CONTINUED FROM PAGE 1

accepted 22.2 percent, higher than the 18.3 percent at this point last year. Amherst accepted 15.8 percent, also higher than the 14.2 percent at last year's mailing date. Williams was unavailable for comment about the admit rate for its Class of 2013.

Of the 693 early decision applicants, 209 were accepted, for a 30.2 percent admit rate. Last year, 207 of the 690 early decision applicants were accepted, for a 30.0 percent admit rate.

The target class size for May 1 is 485. The College then plans to add 10 more students who do not require financial aid and who may be either transfers or first years.

As was the case last year, a record number of students of color, 1,095, applied for admission and a record number of students of color were accepted, 413, for a 37.7 percent admit rate.

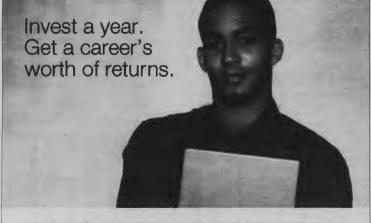

"That's a priority of the College," Meiklejohn said. "That's one of our most important objectives every year."

Women slightly outnumbered men in the accepted pool, 560 to 544, but women also outnumbered men in applications, 3,332 to 2,608. The admit rate for women was 16.8 percent, while the rate for men was 20.1 percent.

Bowdoin has offered 1,150 applicants a spot on the wait list, and Meiklejohn expects "several hundred" to accept spots. In recent years, Bowdoin has accepted 10 to 60 students off the wait list.

oriented Bowdoin courses as well as those of local businesses such as Gelato Fiasco.

The committee intends the fair to "show people what their peers are doing, what is possible here at Bowdoin," Zhang said.

Committee member and Associate Professor of Physics and Astronomy Madeleine Msall is bringing environmental projects developed by students in an upper level physics lab course to the fair. A current student of hers, Carl Morrisey '09, will present his plans for a wind turbine.

Other fair participants include students in psychology, architecture, and environmental studies courses—a range that reflects the many ways to approach global warming.

On Thursday night, Thorne will provide a "locavore" dinner that focuses on local foods. The term "locavore" has emerged in recent years to describe a person who consumes regionally produced food.

regionally produced food.
Student hosts at each table will talk informally to diners about climate issues, "getting their ideas, their feedback," said Walsh. There will be more than 80 hosts who hold various leadership positions on campus, such as team captains and club heads.

Attendees of the locavore dinner will have the opportunity to vote on the proposals submitted by the five finalists of the Climate Matters Contest.

Longley, who was highly involved in the nominations for the contest, said that it was designed to "raise awareness, engage the community, [and] be provocative." The committee received approximately 45 submissions to the contest.

Each of the top five were picked on basis of their "creativity, plausibility, originality, and how much it could actually contribute it terms of carbon reduction." said Walsh.

The top five proposals tackle the College's carbon emissions from a spectrum of angles. While one proposal suggests installing a "wind-mill field" on the Naval Air Station land, another recommends consolidating fall and Thanksgiving breaks, so that less energy is used in travel and re-opening the school twice. A third suggests raising the vehicle registration fee (Bowdoin's is one of the lowest in the NESCAC) and implementing a new parking policy under which cars could only be parked on the main campus for five or ten minutes.

FRIDAY, APRIL 10

Common Hour with Majora Carter Pickard Theater, Memorial Hall, 12:30 - 1:30 p.m.

Greenstock

Tie-dyeing, organic granola making, recyclable art, and a live concert by Avi & Celia.

Quinby House, 7 p.m.

"I think all of them are great ideas," said Environmental Studies Program Manager Eileen Johnson, a member of the committee. "They represent a range of approaches" as well as "a range of community members." Indeed, the top five submissions represent Bowdoin students, faculty, and staff.

"A lot of people are thinking about this issue and that's very exciting," said Johnson.

The headline event on Friday is Common Hour with Majora Carter, a leader in sustainability, environmental justice, and green-collar job potential.

"We're past the point where we need Al Gore telling us 'the climate's getting warmer," said Camill. The committee wanted to bring "someone who really captured the future of where this discussion's going," he said.

At the reception following Carter's lecture, President Mills will present an updated climate mission statement, or what Camill called, "a community-wide affirmation of what we stand for" as well as an announcement of the contest winner.

"It's the first time we've had something quite like this," said Johnson, referring to April Climate Days.

The committee does not want it to be the last. According to Camill, it hopes to "keep this conversation going and not just let it fall off a cliff."

Committee member Madeleine Msall, an associate professor of physics and astronomy, said that the committee "wants more people to become involved in that conversation."

"I think we're going to continue to have events that celebrate our commitment to climate...as the vision of what's possible becomes larger," Msall said.

BOWDOIN BRIEF

Geoffrey Canada '74 to deliver today's Common Hour lecture

Geoffrey Canada '74, the president and CEO of Harlem Children's Zone (HCZ), will present today's Common Hour lecture.

Common Hour lecture.
The talk, entitled "Winning the War on Poverty through Education," will mark the end of the McKeen Center for the Common Good's "Seeking Equity through Education" series.

The HCZ provides "a holistic system of education, social-service and community-building programs aimed at helping the children and families in a 97-block area of Central Harlem," according to its Web site.

Canada has held his position at
HCZ since 1990 and has received
numerous accolades and recognition

for his work at the nonprofit.

In a July 18, 2007 campaign speech, now-President Barack Obama pledged to replicate the model of the HCZ in 20 cities nationwide. Plans to move forward with this proposal

have yet to materialize.

In addition to his work with HCZ,
Canada has authored two books:

"Fist Stick Knife Gun: A Personal
History of Violence in America"
and "Reaching Up for Manhood:
Transforming the Lives of Boys in
America"

The lecture will begin at 12:30 p.m. in Pickard Theater, Memorial Hall.

-Piper Grosswendt

After editorial, administrators clarify policy

BY MARY HELEN MILLER

Last Friday, Director of Residential Life Mary Pat MacMahon and Director of Student Life Allen Delong sent a letter to the Bowdoin community regarding the content of the March 27 Orient editorial, "Free speech." The message was written to thank the Orient for calling attention to a mistake, as well as to point out an error in the content of the editorial.

The editorial was written after a Student Activities staff member requested that the Meddiebempsters take down posters that used Greek letters to advertise a concert. It argued that such a request was in opposition to student free speech on campus. MacMahon and DeLong's message, which was posted on the Bowdoin Web site and sent to the campus through e-mail, stated that the posters were not in fact a violation of College policy and should have been permitted.

Delong and MacMahon's letter said that the College policy that prohibits fraternities does not prohibit the use of Greek letters. The fraternity membership policy, which appears in the student handbook, states: "Violations of College regulations regarding membership in and other activities related to private, selective-membership social organizations will be considered violation's of Bowdoin's Social Code and will be adjudicated according to the normal Judicial Board procedures."

In an interview with the Orient, Delong explained that members of the Residential Life and Student Activities staff misinterpreted the "activities related to [fraternities]"

MARGOT D. MILLER, THE BOWDOIN ORIEN

HURRAH FOR OLD PHI CHI: Posters for a Meddiebempsters concert caused a stir on campus last week after a member of the Student Activities Office asked that they be taken down. The staff member was under the false impression that the College forbade advertising with Greek letters.

phrase to include the use of Greek letters. Delong declined to make any additional comments on the matter

MacMahon said that the mistake was the result of "a chain of assumptions," that led to the misinterpretation of the policy. "I'm not sure that our office

"I'm not sure that our office hasn't made this mistake before," she said.

The message also called attention to an unconfirmed statement in the editorial. The editorial stated that the administration had forbidden students from handing out the publication "Q" in Smith Union. However, the letter stated that "the Orient's description of events is inaccurate. In fact, 'Q' was distributed openly at many campus locations, including the Smith Union."

In response to the allegation, the Orient further investigated the matter and found no clear evidence to support the statement made in the editorial.

While Delong stood by the statement regarding "Q" in the letter, co-editor of the publication George Aumoithe '11, disagreed with the clarification.

"The issues of 'Q' had to be placed within the gallery, which was papered off," Aumoithe said. "They weren't freely distributed, but it wasn't that we couldn't give them out at all. That was one of the major terms, that the administration wanted us to limit where we put the magazine."

However, Aumoithe did not believe that that the issue was one of censorship.

CORRECTION:

In the March 27 issue of the Orient, the editorial, "Free speech," made an unconfirmed statement that the administration of the College forbade editors of the student publication "Q" from handing out the magazine in Smith Union. Director of Student Activities Allen Delong told the Orient that he stood by the statement that appeared in a letter that he and the director of residential life, Mary Pat MacMahon, sent to the

campus and posted on Bowdoin's Web site, which stated: "With regard to the distribution of Q, the Orient's description of events is inaccurate. In fact, Q was distributed openly at many campus locations, including the Smith Union." Co-editor of "Q" George Aumoithe

Co-editor of "Q" George Aumoithe
'11 told the Orient that he did not believe that the College had tried to censor the publication and accompanying
art show "Deviation." However, he did
say that "the administration wanted us

to limit where we put the magazine." Aumoithe also said, "The issues of Q had to be placed within the gallery, which was papered off. They weren't freely distributed, but it wasn't that we couldn't give them out at all."

The Orient regrets the error.

The Orient strives to be accurate in all of its reporting. If you believe a correction or clarification is needed, please email the editors at orient@bowdoin.edu.

BSG discusses Ivies snacks, changes to CAB

BY NICK DANEILS
ORIENT STAFF

At its Wednesday night meeting, Bowdoin Student Government (BSG) debated plans for snack distribution during Ivies and a possible amendment to its constitution affecting the Campus Activities Board

The Facilities Committee proposed a funding request for food and beverages at Ivies, asking for \$2,520 to sponsor a three-hour event on the main Quad.

However, the proposal was not put to a vote, as several representatives had suggestions to change the nature of the event.

Vice President for Academic Affairs Sam Dinning '09 expressed concern that if the event was held on the main Quad, BSG would have to spend money on an advertising campaign to assure student attendance.

"If we start this before 1 [a.m.], we need to do it at Pine Street because that is where 90 percent of campus is going to be," he said. This sparked disagreement, as some representatives felt that placing food before intoxicated students would provoke a messy experiment.

Vice President for Student Affairs Carly Berman '11 was one representative who voiced concern. "I think if I food is just sit-

"I think if [food] is just sitting around during a party, it'll get thrown around," she said.

IHC Vice President Dan Hetherman '09 said the event could be held at Harpswell Apartments, if BSG was willing to abandon the idea of hosting it on the Quad.

"If people are suggesting having it at Pine Street, maybe [instead] we could do it at Harpswell on Friday night, near the hockey rink," he said.

"It will have less logistical problems."

IHC President Lindsey Bruett '09
advocated that BSG's money be split
up over two days.

"I think we should do something at Harspwell on Friday, and have 100 pizzas delivered on Saturday," she

A straw poll conducted at the end of the discussion showed near

unanimous support for conducting two BSG-sponsored events, the first on Friday night, the second on Saturday, instead of a single event as originally suggested.

BSG President Sophia Seifert '09 assured the assembly that refreshment allocation would not get out of control.

"I talked with Randy [Nichols], and he said he would be willing to have a few security guards on hand to prevent pizza riots," she said.

The body also discussed a possible amendment to the BSG constitution which would change the way in which the CAB representative to BSG is selected.

'Vice President for BSG Affairs John Connolly '11 said that the amendment was a fairly small change to the constitution.

"Currently, this position is appointed by CAB; if the amendment passes the BSG and the Student Body, then the representative will be elected by the Student Body as a whole during the spring elections," he wrote an e-mail to the Orient.

SECURITY REPORT: 3/26 to 4/2

Thursday, March 26

• A lacrosse athlete with a possible concussion was transported to Parkview Hospital.

Friday, March 27

• The marble fountain outside Studzinski Recital Hall was tipped over in an act of vandalism.

 Dining Service reported that a student walked out of Thorne Hall with a tray of drinking glasses. The student was located and the glasses were returned.

• An ill student was transported from Ladd House to Parkview Hospital.

Students reported being disturbed by loud music in Howard Hall.

 Four students in Maine Hall were cited for an alcohol policy violation.

Saturday, March 28

 A student reported that an intoxicated student in Chamberlain Hall was having trouble breathing. Security responded to render first-aid and Brunswick Rescue transported the student Parkview Hospital.

 Two noise complaints were received from the area of Brunswick Apartments H.

 Unauthorized access to some of the basements at Brunswick Apartments was reported to the Office of Residential Life.

 A student in Chamberlain Hall received a facial injury when she fell over trying to cure a case of the hiccups by drinking water with her head tilted back.

 A student with a rugby-related sprained ankle was taken to Parkview Hospital.

• A student on the fourth floor of Maine Hall was cited for an alcohol policy violation

 There was an alcohol policy violation in Maine Hall involving five students in possession of hard alcohol

Sunday, March 29

• Four students were found responsible for entering Helmreich House early Sunday morning, causing damage and stealing property. A student sprayed a fire extinguisher on the first and third floors, and wall hangings and some food were taken. All property has been returned and the house was cleaned. A report has been submitted to the dean of student affairs.

 A fire extinguisher was reported to be missing from the basement of Quinby House—the same one later used at Helmreich House.

• A student was cited for urinating in the driveway at Ladd House.

 A loud noise complaint was resolved on the seventh floor of Coles Tower.

Security officers observed a vehicle driving on and around campus at unsafe speeds. The student driver has been barred from driving or parking on campus for the remainder of the academic year.

 A student who had been drinking was observed driving on Longfellow Avenue and in the parking lot at Brunswick Apartments. A report was submitted to the dean of student affairs.

 A security officer observed a local man dumping trash in the dumpster at Harpswell Apartments.
 The man was warned.

 A student reported a missing Arbor "The Blunt" skateboard from

the third floor of Quinby House.

• A student running with a four-

foot plastic Santa Claus on Coffin Street near Osher Hall was questioned. Santa belongs at Crack House.

 A sick student was transported from Moore Hall to Parkview Hospital.

Monday, March 30

 A naughty 2-year-old boy pulled a fire alarm at Farley Field House, causing an evacuation of the entire facility, including dozens of swimmers in Greason Pool.

 Two students reported that a suspicious man was watching them on the Quad near Massachusetts Hall,

Tuesday, March 31

 Two local residents were involved a minor two-vehicle accident in the Farley parking lot.

Students broke into the old basement chapter room at Reed House in recent weeks. Some property damage was done. The room, which is off-limits for safety reasons, has been re-secured. Some of the students involved were spoken to. The matter was referred to the Office of Residential Life.

 There was an alcohol policy violation and an animal policy violation in a room in Reed House.

 A student who was injured while playing baseball at USM was treated at Parkview Hospital.

Wednesday, April 1

Nothing much happened today.
 No foolin'.

Thursday, April 2

 A fire alarm in the basement of Baxter House was triggered by water intrusion into a smoke detector. Two students took responsibility for spraying a hose.

-Compiled by the Office of Safety and Security. This is the watch Stephen Halfingshand, Jr. was wrating when he consented a dreath driver. Time of death Giffpen.

After receiving Watson Fellowship, Goldstein '09 heads for the water

COURTESY OF MAX GOLDSTEIN

ROLLIN' ON A RIVER: Max Goldstein '09 plans to swim through the Strait of Gibraltar, the Bosphorus Straits, the Dardanelles, and other large waterways as part of his Watson Fellowship.

RY PETER GRIESMER

While most seniors aim to stay afloat next year, one student is ready to take a plunge. Max Goldstein '09 was one of 40 graduating college seniors nationwide named to receive a Watson Fellowship for 2009-2010. Announced March 15, the grant provides graduating college seniors the opportunity and means to pursue an independent project of their design outside of the U.S. for the 12 months beginning on August 1 of

For his project, Goldstein will seek to foster ties between separate nations or geographies by swimming across waterways that physically divide separate cultures or nations. He aims to make each of his long-distance swims a communityoriented effort by offering swim lessons in a number of different countries and engaging with foreign aquatic communities. His current plan includes swims through the Strait of Gibraltar between Morocco and Spain, Lake Titicaca from Peru to the Island of the Sun in Bolivia, and the Dardanelles and Bosphorus Straits between European and Asian sections of Turkey.

Although the planned swims vary in distance from 12 to 22 kilometers, Goldstein said that part of the challenge of each sojourn will be to complete the entire swim without touching any land or buoyant objects until he reaches his destination

A swimmer since he was 18 months old, he said, "I'm just as much scared by the physical and mental challenges as I am excited to confront them

For Bowdoin students, the ap plication process for Watson Fellowships began in September when students submitted project proposals and personal statements to the Student Fellowships and Research Office. Four proposals were passed on to the national pool of applica-tions, from which 40 national proposals were chosen as recipients of the fellowship and a stipend funding travels throughout the world for independent purposes

Goldstein first heard about possibilities offered by the Watson Fellowship in his first year of college. When he found out that he had been awarded the grant, he said: "I was in a kind of disbelief when I got it because, I

thought, the sweet dream I had may actually come to life... My proposal had me imagining anything I would like to do and like to be and got me thinking that there are no limitations. I'm now coming into a reality of responsibility and opportunity

Goldstein has already begun preparations for the first leg of the trip along the Spanish coast by getting in touch with local university swim teams, open-water swimming associations, and hospital groups that use swimming as a form of patient rehabilitation. He plans to cross the Strait of Gibraltar in mid-October in what he expects to be his most linguistically-rewarding experience among international cultures because will be able to apply his knowledge of French, Spanish, and Arabic languages during that part of the trip.

From there, Goldstein will proceed to Peru, where he plans to swim across Lake Titicaca to Bolivia by March of next year. He will then consider returning to Morocco to swim up to Spain once more to more directly engage members of the African community the second time he crosses the gap between the Atlantic and Mediterranean. In June and July, he plans to swim twice between the Asian and European shores of Turkey, first to Europe across the Dardanelles Strait near Istanbul and then back to Asia across the Bosphorus farther north

For each of his proposed swims, Goldstein will be accompanied by a support boat that will carry his per sonal possessions and will wait for him at each of his various destinations to help him out of the water; he considers such logistical components of the journey conducive to the ideals of the group togetherness he seeks to ng different peoples

Having recently finished his fourth eason competing with the Bowdoin Men's Swim Team, Goldstein is now training on his own in the pool at Bowdoin and is trying to put on weight so that he will not have to wear an entire wetsuit when swimming from Spain to Morocco. This coming summer, he plans to work as an ocean lifeguard with the Los Angeles County Fire Department and vill be able to practice a few longdistance swims in the ocean while there. On July 31, Goldstein plans to show up at work on the beach with his travel-ready backpack in hand so he can depart for his trip at the end

FEATURES

McAllister brings humor and expertise to Security

ORIENT STAFF

Despite only being on campus since September, Associate Director of Safety and Security Carol McAllister has already become an invaluable asset, according to Director of Safety and Security Randy Nichols.

"She has exceeded my expectations." Nichols said. "She brings something to the table. She helps make the Office of Safety and Security top notch."

The position of Associate Director of Safety and Security was created last year. Before then, the department had two assistant directors—one for Operations and the other for Support Services. According to Nichols, when former assistant directors Mike Brown and Louann Dustin-Hunter left last year, the department reevaluated the management structure before notified.

fore posting a position for hire.

Although McAllister arrived at Bowdoin after filling the position of Executive Director at the Mid Coast Chapter of the American Red Cross in Topsham, she has spent most of her career as either an active or reserve member of the United States Coast Guard.

After graduating from Hofstra University in Long Island, New York, in 1991, McAllister entered officer candidate school for the Coast Guard in Yorktown, Va., in October of 1993, got her commission in early 1994, and worked five years of active duty in Washington, D.C., in the financial management sector of the Coast Guard.

"I got myself involved in as many environmentally related things as I could," she said. McAllister worked with issues such as oil spill response and audits for major oil companies

She then transferred to the Marine Safety Office in San Francisco, where she became heavily involved in emergency response management, an area in which she excelled. "She has exceeded my expectations. She brings something to the table. She helps make the Office of Safety and Security top-notch."

RANDY NICHOLS
DIRECTOR OF SECURITY

The Marine Safety Office adopted the Incident Command System (ICS) for the Coast Guard, a response management program that was developed in the 1970s but was not widely used until McAllister's office adopted and further developed the system in the late 1990s.

"My commanding officer at the time had started this program [in the Coast Guard], and created the first field guide," McAllister said.

Through her work and that of others in her office, ICS has become the standard emergency resyonse management and training system for all federal agencies in the United States.

After working in hazardous materials response management in San Francisco and becoming a Lieutenant Commander, McAllister applied for reserve duty and moved to Iowa, where she raised a family and worked regulating commercial industry on the Missispipi River.

When the war in Iraq began, McAllister, through the Maritime Transportation Security Act of 2002, developed maritime security planning in the Midwest. She also served as the deputy planning section chief at the area field office in New Orleans during Hurricane

In 2006, McAllister, a New England native, moved to Maine to be closer to family members.

"This is home to me," she said.
"This is where I want to be."

She began working for the Red Cross in June of 2007, and her work eventually led her to Bowdoin. She contacted Bowdoin last summer when she was planning a pandemic flu conference.

"I was impressed that the College had been pretty progressive in their thinking for emergency planning on campus," she said. After browsing Bowdoin Security's Website, she found the job opening for Associate Director of Safety and Security and decided to apply.

Her expertise in emergency management impressed Nichols.

"We spend a lot of time planning for big emergencies, we have a campus emergency management team, and we drill annually," he said. "I was looking for someone with further expertise."

McAllister fit the bill.

"She was able to demonstrate that she was just a very organized person and was very good with policies and procedures, as far as writing them," Nichols said. "She is very good at organizing big projects, and I was looking for a big project person."

In addition to her unique and

In addition to her unique and advanced qualifications, McAllister and Nichols liked each other immediately

"Our personalities gel," McAl-

"I think we just clicked personally," Nichols said. "My skill set complemented hers, hers complemented mine."

"She has a great sense of humor, and I have kind of an interesting sense of humor, too, so we're very comfortable in that realm," he added. "We can speak freely to each other and have total trust in each other. To me, trust and loyalty is huge but I also want to hear it like it is."

The partnership has proved successful during the course of the year.

"I'm very impressed with the College and the students in particular because the majority of students are very respectful and very much want to build a model of respect and community," McAllister said. "It's ingrained in everyone to be responsive and helpful and really focused on what the right thing is to do."

COURTESY OF CAROL MCALLISTER

Top-notch': McAllister worked in the financial management section of the Coast Guard and for the Marine Safety Office in San Francisco before joining Bowdoin's Security Department this September.

McAllister is currently overseeing several major projects at the College, including the security aspects of the OneCard system and the modernization of the security communications center.

"My first and foremost priority is to ensure the smooth operations of campus security from a personnel standpoint, a financial standpoint, and a training standpoint," McAllister said.

"She's taking a leadership role for me in virtually all aspects of campus emergency management," Nichols said. "I'm able to delegate with confidence and know that the job is going to be done, and done right. It's great to be able to delegate to people who can do the job better than you can do it."

In addition to her job at Bowdoin, McAllister is still a Lieutenant Commander in the Coast Guard and was selected for promotion to Commander, which she anticipates happening this summer.

In the meantime, however, McAllister continues to enjoy her work at the College.

"I love it, it's a great job," said McAllister. "I'm very happy here."

Time flies, so 'live life while it happens' in sex and relationships

SEXUALLY SUGGESTIVE BY ALANNA BEROIZA COLUMNIST

Bowdoin students are a fortunate bunch. We have so many tools for learning and living at our fingertips, it's hard to believe that any one of us could ever complain about our situation here in Brunswick, Maine. One of the only things that I find deserving of serious lament at Bowdoin is timethere's not enough of it. I'm about to graduate in May, so I'm admittedly a little biased on the subject. but if you'll bear with me I think I have a point. The four years that e spend in college can be particularly formative with regard to our sexual identities.

For many of us, with our arrival onto campus in August of our freshman year came our first steps into sexual autonomy. Some of us take this instant freedom to a bit of

an extreme, while others are more inclined to take a conservative approach to the absence of a curfew and the bags of condoms hanging on their proctor's door. Whatever your approach has been, is, or will be, you may want to keep in mind that it will not last forever. At some point, you will leave Bowdoin. The question is, will Bowdoin ever really leave you?

ally leave you?

If, in 10 years, you're asked to describe your sex life in college, what will you be satisfied with the experiences you've had at Bowdoin? What will you be proud of, what will you regret? What will you wish you had known during your freshman fall? What will you wish you hadn't waited to do until your senior spring? When you're driving home in your old overloaded Subaru, hauling the last four years of your life down the highway, will you remember these years as

I don't mean to be overly serious,

If, in 10 years, you're asked to describe your sex life in college, what will you say?

but J do think that it's important to take a moment every so often to reflect on what it is that we're doing with our lives. Are we doing the best we can to stay in the moment and appreciate our current situation rather than try to control the future or regret the past? In my experience, particularly with regard to sex and relationships, the most healthy and rewarding way to experience life is to actually live it while it's happening. Just because the year is nearing a close doesn't mean that we are. Sure, school is almost over, but if we live our lives in fear of being hurt or running out of time, we'll never actually get to experience the things which might be most worthwhile in the long term.

So, as we enter into the first

days of what T.S. Eliot deemed the "cruelest month," I will offer a few items of advice, which may prove useful in the coming weeks. To begin with, we must have no regrets. Don't let it happen. If you are interested in someone, whether it be casually or more than casually, pursue that person! Do what you would normally do to get someone's attention. Be yourself. Don't try to put on some sort of defensive mask so that you can avoid being hurt, just go after it and hope for the best. Remember, nothing ventured next income a few items.

for the best. Remember, nothing ventured nothing gained.

That being said, I would warn against the "go wild" approach to sex and relationships. While it may seem enticing, sex and romantic attachment for no reason or the wrong reason can be some of the least fulfilling and most potentially dangerous behavior that a person can become involved in. Exploring your sexuality is fun and important, but only if it's something that you want to do for your own

self-improvement or enjoyment. If you're heading into it with the idea that it's something that you should or have to do, then you should probably turn around and head in the other direction.

Finally, try to prioritize your time. Think about what you're going to remember when you leave this place. Studying is important, and definitely rewarding when you're learning about something you find interesting. However, interpersonal relations are also extremely important, as they help to build skills that you will utilize in every social situation you're in for the rest of your life. Just think, will it be the organic chemistry exam and the modern political philosophy paper that you look back on with nostalgia? Or will it be asking that really good-looking girl with the great hair and awesome fashion sense in the basement of Mac House if she'll make out with you that you remember for the rest of your life?

Students earn money off campus as musicians, boat-builders, babysitters

After only a few months of work ing for Bowdoin graduate Richard Pulsifer '62 at his house on Mere Point Road, sophomore McKay Belk knows a whole lot about wooden boat-building. Belk is one of many Bowdoin students going off-campus to find employment, only to return with new unique experiences in the greater community.

Belk said he contacted Pulsifer about a job after he heard about the opportunity from Bowdoin seniors Madelyn Sullivan and William Oppenheim, who have been building boats for Pulsifer since the fall of 2007 and 2008, respectively. Once he had gone through an interview and training process in which he learned how to use various tools, Belk took up his role in the boatbuilding process.

"Mr. Pulsifer has been building wooden boat called 'The Pulsifer Hampton' for thirty years," said Belk. "It was once a lobster boat but now it's a leisure boat—though a very 'seaworthy' one."

"I'm assigned tasks without a large margin of error," said Belk. ood is a very responsive mate rial, so when you're dealing with antique hand-planers and electric planers, its important to really know what you're doing."

According to Belk, Pulsifer provides students with flexible hours that allow them to adjust their work schedule depending on academics and other interests.

Depending on my workload and the snowboarding and surfing conditions. I work between zero and eight hours a week," said Belk.

Belk said he is very happy with his current employment, a job that greatly contrasts his previous job vith Bowdoin Safe Ride, in which he served as a dispatcher and driv-er, and worked late, long hours. According to Belk, his current job allows him a nice escape from campus and a great opportunity to learn new skills.

"I can't imagine having another job like this," he said. "I've learned carpentry, I'm deciding my own hours, and I'm working with a great guy for good money. It's a pretty sweet deal."

Like Belk, sophomore Lindsey Mingo heard about her job at Free port's Banana Republic store from a fellow Bowdoin student and decided to apply for a position this

"I went into the store and filled out an application, then set up an interview date with the store manager," said Mingo. "I didn't have submit an official resume but many of the questions on the application were about my employment history and about my classes and activities at Bowdoin.

According to Mingo, her responsibilities include making sure everything is organized on the sales floor, helping customers find items, and working in the fitting rooms and at the register. Mingo said she enjoys her job because she

"loves interacting with customers, helping them find things and pick out outfits." Mingo also said she appreciates Banana Republic's parent company, GAP.Inc., for its environmental consciousness and involvement in charity projects.

Mingo said there are many advantages to working off campus and agreed with Belk that "flexible work hours" and a chance to escape the Bowdoin Bubble" drew her to the job.

"It's nice to get away and see the general community from a differ-ent perspective," said Mingo. "A lot of students from other schools also work there and its nice to get to know them."

Junior Hassan Muhammad has seen both the general and extended community while playing jazz piano at various venues in Brunswick, Bath, Freeport, Portland, Waterville, and even Boston.

"There's a really vibrant jazz scene in New England, and I had to get off the Bowdoin campus to explore it," said Muhammad.

Unlike other students employed off-campus, however, Muhammad sees his performances as opportunities to "cultivate a skill and have fun" instead of as a way to make

"The harsh truth about being a musician is that the highest paying gigs are oftentimes the least fun, said Muhammad. "My favorite environments to play in are the spaces where the audience is completely in tune with what I'm playing."

Muhammad said Port City Blue

on Portland's Congress Street (where his quartet has played five times) exemplifies this paradox, for though it is his "favorite place to play" for its ambience and audience, it is one of the least profitable venues because all funds received are in the form of tips.

"It's not about the money but the experience," said Muhammad.

While many Bowdoin students are employed in environments that are completely removed from campus, others work off campus in jobs that are connected to the Bowdoin community, such as working for an art professor in a studio or gallery, or walking a professor's dogs.

Emily Neilson '11 found her job babysitting for Special Assistant to the Dean of Students Affairs Meadow Davis while looking

through the student digest.
"There are usually a lot of postings for off-campus jobs in the digest," said Neilson, who said supplement" and a way to fill free time while not in season for field hockey or ice hockey.

Neilson said she contacted her employer through e-mail and then went through a "screening process" to ensure that she got along with the children she would be caring for. Neilson said her short commute to work a few times a week is 'a nice outlet from school."

In contrast to working on campus, Neilson said "working off campus proves to be good practice in preparing for the real world" because "it's about getting out there, being proactive, and landing a job" without the set framework of Bowdoin's student employment system

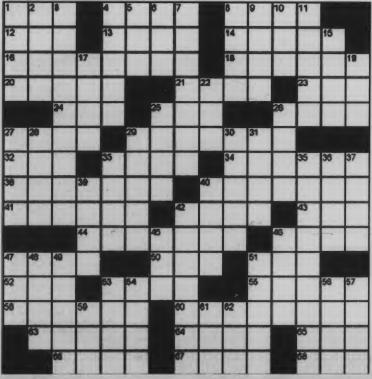

"It kind of gives me a feeling of independence-that I'm doing something, by myself, on my own terms," said Neilson, "I think that's pretty cool, even if I'm just baby-

ARTS & ENTERTAINMENT

WBOR presents rising hip-hop artist Wale tonight in Morrell

If social house basements and plates of Super Snack nachos are beginning to get old, students can rest assured at this weekend holds more in store than a typical weekend night. This Friday, the Bowdoin College radio station WBOR will present hip-hop art-ist Wale (pronounced wah-lay) to the

Friday's concert marks the second of two large¹ scale productions orchestrated by WBOR. The first was the Broken Social Scene concert that lit up Farley Field house this past October This wealth of music has been incredibly exciting for Bowdoin, according WBOR concert director Micah McKav'09.

"This is the first year we've done two shows on this large of a scale," he said. "In the past we've done one big show and then a smaller one. This re ally isn't normal, and to be able to do two shows of this size is pretty cool for

McKay also said that this spring concert offers an exciting opportunity for WBOR to diversify the sound on Bowdoin's campus

"WBOR hasn't brought a hip-hop artist before, so we wanted to broaden our tastes a bit," he said. "In the past, we've primarily brought alternative indie rock bands," such as Broken Social

"We thought that this would be a great opportunity for a hip-hop show, he added

Bringing Wale was particularly exciting for WBOR, as it seeks to fill the void of underground hip-hop shows on the college circuit, according to

JUST DO IT: Hip-hop artist and rapper Wale has several well-known songs including "Nike Boots," and has collaborated with many well-known artists including M.I.A. and Lil' Wayne. He will perform tonight at 10 p.m. in Morrell Lounge at Smith Union

"Wale has been hyped as the next big thing for a while now," McKay said. "He's released several mixtapes, he's had great press, and his shows have been incredibly popular."

Wale's concert presence is one of the reasons WBOR was so eager to bring him to campus

"One of the main reasons I like Wale, and think he's a perfect fit for the WBOR spring concert, is because he has so much energy," WBOR hip-hop director and Wale enthusiast Hasan Elsadig '10 said. "Just listening to his music puts you in this ampedup mood. Even the slower songs he has are like that.

Known for the energy he brings to his shows, Wale will perform at Bowdoin with a nine-piece go-go

"He's basically bringing a funk band from D.C., which is pretty unusual for a hip-hop artist," McKay said. "They'll have great energy, which is different even within the genre. Typically, a hiphop artist in concert will just play with a DJ, so that's another reason why he's such a force onstage.

This concert is also an exciting musical opportunity for Bowdoin.

"It's great to be able to have Wale here right now," McKay said. "He's done tracks with a lot of farnous art-ists at this point. Justice, Lil' Wayne, M.I.A., to name a few. So he's a pretty big deal in the music business, and has been for some time now.

Wale's success is only increasing, as

Deficit" this upcoming summer.

"It's very likely that he'll just blow

up soon in terms of his popularity. It's great for Bowdoin to be able to get him now while we still can," McKay said.

For students unfamiliar with Wale's music, both McKay and Elsadig agree that he is next in the lineage of hiphop artists like Lupe Fiasco and Kanye

"He's Kanye, but not at all. He has his own swag and his own style, at least in the country's hip-hop scene," Elsadig says.

"He plays over tracks, he uses the go-go funk band, he's very heavy on percussion," McKay said. "He's very tied to his roots as a rapper from Washington, D.C. He takes a lot of pride in that and so he uses the musical traditions that he grew up with, go-go being a D.C. creation. It's funkladen hip-hop."

The concert will be held in Morrell Lounge in Smith Union tonight at 10 p.m. Makio, S-Caliber, T-Throw and the neo-soul Phunky Phresh Band, which features students Hassan Muhammad '10, Peter McLaughlin '10, Scott Nebel '09, Justin Foster '11, and Tony Perry '09, will be opening for

The show will be free to students and non-students alike.

"We wanted to make it a free show," McKay said. "It's the best space for the concert. We want this to be an active show. We want to see everybody up on their feet.".

To get a taste of Wale's music before the show, students can check out Wale's MySpace page, http://www.myspace.com/wale, or his official Web site at http://www.walemusic.com

Bowdoin artists' work featured in statewide art exhibit 'Generation'

ANDY BERNARD STAFF WRITER

Four Bowdoin students will be honored in a Maine art show opening this weekend. "Next Generation IV," a biennial exhibition showing the work of roughly 20 junior and senior art majors enrolled at Maine colleges, opens at the Center for Maine Contemporary Art in Rockport this Saturday.

Four visual arts majors from Bowdoin-seniors Alex Bassett, Tom-Wilcox, Alexa Lindauer, along with junior Sam Gilbert-have been selected by the CMCA to show work at the exhibition. Also represented are students from Bates, Colby, the College of the Atlantic, Maine College of Art, and various University of Maine

The four Bowdoin students in the show learned about the Rockport exhibition through a visual arts department e-mail.

"I already had these works and thought 'Why not?' when the applica-tion was mentioned in the art department e-mail," Bassett said.

In fact, all four Bowdoin students submitted work that they had completed earlier in their college career. Wilcox's pieces in the exhibition are four of the eight images in his photo graph series titled "Famous," which he completed last fall

Gilbert has two pieces in the show, despite being abroad in Tasmania this

NEW HORIZONS: Sam Gilbert '10 painted this work, "Biette Farm" during a landscape painting class last semester. It will be featured in a show at the Center for Maine Contemporary Art in Rockport titled "Next Generation IV."

Two of my paintings were se lected—'Anticipation' Farm'-both of which I painted during my landscape painting class with Jim Mullen last semester," Gilbert wrote in an e-mail to the Orient. "I completed both of them before I even thought about submitting work to the

Bassett completed her selected

work, an oil and chalk pastel drawing titled "Turkeytails," last summer dur ing her time spent on Orrs Island.

"I drew the incidental, miniscu moments occurring on the trails," she said. "The turkey tails were less than a couple of inches across. Sometimes after I took a picture and started draw ing, I forgot how small they were until I saw them again on the trail."

Lindauer has work being shown from her first, sophomore, and senior years. Among her selected works are a charcoal-on-plywood series from her sophomore year titled "Trailworkers," and a group of photobooth portrait monotype prints made during her

There is a good representation of pieces in different media-sculpture.

metalwork, multimedia, oil and acrylic painting, charcoal and ink drawing, photography, and printmaking," said

The CMCA space lends itself to wide array of media. A three-story building, it is currently showing an exhibition of work from elementary, middle, and high school students from Maine in its downstairs gallery, and a state fair and festival-themed exhibition titled "On and Off the Midway" in its top-floor gallery. "Next Generation IV" will be shown in the Main Gallery on the middle floor.

"The exhibition is really cool-the space is a really neat site, wood floors on the top floor and lots of natural light," said Bassett. "Very bright, classic space."

For many students in the show, having art hung and shown by independent art directors is a new and valuable experience.

"I learned a lot from having to prepare for it, and even got yelled at by the director of the show for not giving her all the things she needed to hang my work," said Bassett. "But she knew it was my first show that I didn't hang myself, so she was very helpful in referring me to the hardware store down the street. It was definitely a learning

The reception for the opening of Next Generation IV will be this Saturday, April 4, from 2-4 p.m. at the CMCA. The show will be exhibited until April 18.

'Attempts' fuses actors, television screens, and imagination

MAXIME BILLICK

"Attempts on Her Life" will challenge actors and audiences alike to break down social norms tonight and tomorrow in Wish Theater. Written by Martin Crimp, it tells the story of Anne, a woman who may or may not be created by Hollywood. The audience is never sure of whether she is real or fake, dead or alive, hockey mom, girl-next-door, or terrorist. With a strong focus on the media, the play explores the dilemma of determining what is real in the age of global capital and media culture.

Details of the show have been kept from the Bowdoin community.

"At the first rehearsal we said, 'The first rule of Fight Club, is never talk about Fight Club," explained director Roger Bechtel, associate professor and chair of the department of theater and dance.

Why maintain the aura of se-

"There's a danger in sharing information about the show," Bechtel said. "Intellectually, it's serious and it has the potential to scare people away. As a performance though, it is extremely engaging. It condenses our experience of living in the world of capitalism and media, and touches on topics as broad as terrorism and pornography."

The script itself presented certain challenges as well. Written without characters, without a raditional

MARGOT D. MILLER, THE BOWDOIN ORIENT

LIFE-CHANGING: Actors Sammie Francis '09 and Sam Duchin '10 challenge the presence of mainstream media in everyday life in "Attempts on Her Life."

plotline, and with only dashes to indicate a change of speaker, it was up to Bechtel to decide how many people to cast and what role they would play.

"I was looking for certain qualities in my actors," Bechtel said. "Each person brings something different to the show. Overall, I was looking for a sense of fearlessness." Actor Khalil LeSaldo '11 said that

the play expects much from its audience, as well.

"Expectations are given to the audience at the beginning of the scene, then taken away," he said. "The show is ultimately asking, 'How real are we beyond the social representations of us?"

representations of us?

Although the show touches on issues like gender, pornography, and terrorism, Bechtel said that it was hard to name a central theme, apart from the media.

"All of the smaller themes funnel into bigger ideas, like 'How do we form our identities in this world where consumer capitalism creates so much of our desire?""

With all of the commentary on pop culture and social representations, it only seemed natural to incorporate different forms of media.

"We have created a complete media environment," Bechtel said. "We have four video projectors, two live cameras, and six TVs. It is a completely immersive experience for the audience members."

"Attempts on Her Life" involves issues that are prevalent at Bowdoin and other colleges, according to Bechtel.

"Media is so omnipresent, Bowdoin doesn't stand out in that regard," he said. "However, I think that the idea of consumer culture and capital, what we desire and why we desire it, plays a much larger role here and at all colleges."

Bechtel emphasized the strength of the cast.

"Despite all of the media, it is a great actor's show. The acting is strong," he said.

The director and cast will host a talk-back after each performance and encourage those interested to stay and discuss the show.

"Attempts on Her Life" will be performed tonight at 7 p.m. as well as tomorrow at 2 p.m. and 7 p.m. in Wish Theater. Performances are free and open to the public. Seating is limited, and tickets are available at the Smith Union information desk and at the door.

With woodcuts, students take lasting impressions from old Brunswick High

ERIN McAULIFFE STAFF WRITER

Over the past few weeks, Bowdoin's Printmaking II students have worked to bring art back into the classroom.

Led by Visiting Professor of Art Anna Hepler and local artist Andrea Sulzer, the advanced printmaking class took over a classroom in the old Brunswick High School for its latest project.

With a little inspiration and a lot of muscle, the class created a large-scale woodcut in the floor of a classroom and transferred them to multiple large prints. Students worked together to plan, carve, ink, print, and coordinate all aspects of their exhibit, "Carving the Floor," which opens tonight at SPACE Gallery in Portland.

"Having access to such a large space and having such free reign to do whatever we wanted to-do-was incredible," Becca Spiro '09 said.

"It was also a great learning experience to work with such a large group of artists. Since artists can be very opinionated, having 17 people agree was not always easy, but we somehow succeeded in the end," she added.

Scheduled for demolition this May, the building that formerly housed Brunswicks high school served as a perfect venue for the class. With only one room to work in, the problem of reconciling conflicting ideas and interests within the class arose.

"We spent several classes before we entered the school discussing possible approaches, but we couldn't decide on anything." Laurel Clark '10 said. "As a result, the floor was a bit chaotic at first, with everyone pursuing different design ideas that didn't really mesh. We had to step back as a group, re-evaluate, pick what we liked, and make it work."

Eventually the class discovered that group collaboration was necessary for a

ETCH A SKETCH: Visiting Professor of Art Anna Hepler peels one sheet off of the carved, inked floor in the old Brunswick High School. It is one of several sheets that will hang together as the finished piece.

ccessful prin

"The basic design ended up being a kind of pipe grid, overlaid with two giant 'blobs' filled with smaller organic shapes," Spiro said.

Traditionally, printmaking relies on an initial woodcut, engraving, or lino-cut which is then rolled with ink and printed on paper. The old high school, however, required a new scale and new approaches to printing.

Using an unfamiliar surface—a class-

Using an unfamiliar surface—a classroom floor—new tools were needed to create an effective woodcut that could be printed. The class resorted to power tools and chisels to breach the hard floor of the classroom. "We used small woodcarving tools, routers and drummels, and Anna Hepler and Andrea Sulzer even tried using a chain saw." Spiro said.

With Sulzer's help, Hepler also completed her own woodcut in the room next door to the one in which her students worked. She used the same inking and printing techniques, and incorporated abstract lines and negative space—styles that she has incorporated in previous works. Hepler and Sulzer's work will show alongside the class's woodcuts at the SPACE Gallery.

Most artists, once they finish their work, feel some personal attachment

to their project. This is not always so of printers. Since the school is being demolished in the spring, it is inevitable that the large woodcut created will be lost to the construction crews.

This fails to bother the artists.

"It's often the nature of printmaking that your actual carvings get discarded or reused," Clark said. "Once you have your print, you either attack your plate again and turn it into something different, or you move on."

The resulting prints, which were created by laying Kozo paper on top of the ink laden woodblock, have earned a prominent spot at the SPACE Gallery in

Portland this weekend.

In addition to the collaborative prints, each member of the class will complete five individual prints, which they will combine into a final project at the end of the semester.

"Carving the Floor" will be on display from April 3 to May 23 at the SPACE Gallery. Tonight, there will be an exhibit opening, including documentary photographs and a video diary of the project from 5-8 p.m.

The artists will also discuss their work at SPACE on Wednesday, April 8 at 7 pm

April 8, at 7 p.m.

On the indie music circuit, band looks to strike a chord

THIS WEEKS REVIEW

COLUMNIST

Hey, do you remember in the future when we're always talking about that band Phoenix, and their stellar album "Wolfgang Amadeus Phoenix"? THIS IS THAT MOMENT. Since we're on the topic of the future, there are some things you should know: The Office will continue to be unfunny, Vitamin Water will flow through taps, and Gossip Girl will play a track off of Wolfgang Amadeus Phoenix, You have been forewarned.

Now go flaunt your newfound knowledge to your friends, before Serena makes it hip.

To be fair, Phoenix isn't a new band. This French-born indie-rock band has been around since the early 2000s and quickly joined the ranks of their French counterparts Air, Daft Punk, and-close sonic relative-Nada Surf, With "Wolfgang Amadeus Phoenix," the group shows a much wider spectrum of influence.

The album boasts the drumbeats and heavy synth lines typical of European indie-rock, but there is a new infusion of flavor in this album.

Wolfgang Amadeus Phoenix cites newer indie phenomena like Vampire Weekend and The Arcade Fire. Phoenix's lead singer, Thomas Mars, delivers a spot-vocal performance that channels Brandon Flowers (The Killers) and Russel Mercer (The Shins). His brittle chestvoice and piercing falsetto complement the heavy rhythmic and instrumental qualities of the band that backs him. The melodies are not long, sweeping lyrical lines, but bouncy and percussive ones: making each song a foot-tapping, headbobbing delight.

There are so many strong tracks on this album. The first track, "Lisztomania," opens the album with punchy guitars and a driving backbeat. It sets the tone for the rest of the songs, something all good opening tracks should do. "1901" is the breakout hit of this album. When Gossip Girl pounces on this album, and it will, this will be the song that they take. It is pure attitude-gritty electric guitars mixed with Ratatat synthesizers and a Vampire Weekend-esque chorus.

This album's real strength is its sheer,

This album's real strength is its sheer, unadulterated fun. Musically or lyrically it doesn't have anything earth-shattering to say. In fact, the catchy guitar riffs and low-level of the vocals make the lyrics hard to follow. But the album makes no pretensions. It is a true springtime album. Its energy compels all who listen to it to get out of their seasonal funks. While the EP of "Wolfgang Amadeus.

While the EP of "Wolfgang Amadeus Phoenix" has been released, the full album won't be available until May 25th. Until then, spend some precious quality time with the rest of your iPod. It's going to get jealous.

So go out there, and liberate yourself from the ice and snow. You know you love me.

XOXO, Music Guy

French film strives to be at top of 'the class'

WORLD

BY LAUREN T. XENAKIS

COLUMNIST

The last few years, I've' seen a lot of movies about students in inner-city schools and the naïve, but well-intentioned, teachers who come to inspire them. "Freedom Writers" comes to mind, starring Hillary Swank as a devoted English teacher who overcomes budget cuts, condescending colleagues, and surly attitudes to help her students reach heights thought unreachable. "Stand and Deliver" is another, focused on calculus instead of writing.

stead of writing.

There are others, I'm sure, but they all have a common plot line: enthusiastic teacher starts school hoping to inspire high school students; high school students don't care and give him a hard time; one day the teacher makes a breakthrough; from then on, the students will walk through fire for him and everyone sets A's.

him and everyone gets A's.

"The Class" hits almost none of the points on this checklist.

Yes, this French film based on an autobiographic book by François Bégaudeau does have a class of surly teenagers who really do not want to be learning the imperfect indicative, but so does every high school. What I found startling about "The Class" was not only the breadth of diversity in one classroom, but also the overwhelmingly honest picture it paints of the interactions of teachers with their students and with each other.

The movie opens with scenes of the teachers introducing them-

selves and the classes that they teach. The movie focuses on one class taught by François Marin. Marin is a young teacher, trying to be both the authority figure and a friend to these students who really don't want his help or his friendship.

The students represent virtually every part of the globe, from Africa, to the Middle East, to the Caribbean, and finally Asia. The students have trouble believing that Marin really cares about their struggles because he teaches them grammar structures like the "imperfect indicative" which they call "bourgeois."

Many of the students are fresh, especially Esmeralda and Souleymane, although in two totally different ways. Esmeralda (played by Esmeralda Ouertani) constantly challenges Marin's intentions, showing that she is smarter than she pretends to be. Souleymane, however, is the classic bad boy: he cuts class, doesn't do his homework, and his attitude suggests that he'd rather be anywhere but here.

As Marin tries to negotiate his way working with this class, we're reminded that he is only human. I think as students, we like to think that teachers have a plan and know exactly what they're doing. Marin shows us that he's fallible and knows about as much as his students do about negotiating the new multicultural identity of France.

His interactions with his fellow teachers show that they, too, are imperfect. In a especially poignant scene, one teacher stomps into the teacher's lounge raging against the students and their apathy. You can tell that he feels helpless against their indifference, especially since he is doing all that he can to reach out to them and draw them out. The teacher's it silent, letting him rant and letting us hear him rant. We're reminded of the challenges that teachers face, something for which we often refuse to give them credit.

Bégaudeau both contributed to the screenplay and played the part of the teacher, François Marin. Considering that Bégaudeau is a teacher by trade, his performance as an actor is exemplary. In fact, if I hadn't known that Bégaudeau was a teacher, I would have thought that he's some well-known French actor.

Likewise, all the teachers and the students were taken from the school that Bégaudeau teaches in (and wrote about). Playing themselves in front of a camera can't be easy, but the students pulled it off without making any of their anger, joy, discomfort, or pain seem forced.

The documentary style of the film added to it as well and made it appear more believable and realistic instead of looking like "High School Musical in France!"

I left the Eveningstar Cinema wondering if I liked the movie or not. At times, you think that Marin is an inspiring teacher, and at other times you find him too sarcastic and condescending and think that the students are right in mocking him.

It's these polarities however, that make Marin a wonderful character. He's not the heroic educator. Instead, he's the average teacher trying to figure out where he fits in this classroom.

Chilean violist Díaz sparkles for community crowd in Studzinski

BY CAROLYN WILLIAMS
ORIENT STAFF

World-renowned violist Roberto Díaz played to a full house in Studzinski Recital Hall on Wednesday night, dazzling the crowd with an eclectic program that included works by Brahms and Bloch.

Diaz, a native Chilean, is the president and CEO of the Curtis Institute in Philadelphia, which is one of the most selective music schools in the world and known for its unique curriculum and talented faculty.

He has received numerous awards throughout his career, including an honorary degree in music from Bowdoin in 2007.

During his concert at Bowdoin, Díaz performed nearly two hours of music and was accompanied by pianist Andrew Tyson. His repertoire covered a rangê of classical music, including violin pieces transcribed for the viola.

Sam Waterbury '11 was impressed by Díaz's performance.

"I think he's a really talented musician," he said at intermission. "And I think that the piece selection has been great so far."

Díaz opened the concert with "Suite Populaire Espagnole" by Manuel de Falla and captivated his audience with "Sonata for Viola and Piano, Op. 78 in D Major" by Johannes Brahms, both pieces transcribed for the viola. After intermission, Díaz performed more contemporary works written in the 20th century: "Suite for Viola and Piano" by Ernest Bloch and "Transcriptions for Viola and Piano" by William Primrose.

Alyson Magian, an evening circulation assistant at the Hawthorne-Longfellow Library, decided to come to the concert after reading about the Curtis Institute at an earlier Bowdoin concert, Time for Three, which featured three musicians who had studied there.

She appreciated the opportunity to attend a classical music concert available to the Brunswick community.

"It's a fabulous performance," she said.
"It's a great opportunity for the community to come and take in a classical music performance," she said.

"I think it shows that Bowdoin is really committed to the arts, which is great," added Waterbury.

While 'Brooklyn' spans decades, its characters lack development

THE BOOK NOOK BY FRANCES MILLIKEN COLUMNIST

The structure of Alice Mattison's novel "Nothing is Quite Forgotten in Brooklyn" is one of its most compelling elements. Mattison chooses to alternate between two significant periods of the protagonist's life. One chronicles a week when, house-sitting for her mother, Con's fragile marriage heads toward demise and her daughter goes missing.

The second period of time is more than a decade in the future when Con has both her daughter, her ex-husband, and her mother's closest friend staying in her house. Con has forgotten most of the details of the week at her mother's but it is clear that that moment from the past and her present and are closely linked.

The novel is essentially about relationships. Con is front and center and the reader joins her as she sifts through the complicated dynamics between herself and those she is closest to. Marlene, her mother's best friend, has always been a source of puzzlement to Con. Marlene is flashy, racy, and romantic, while her mother is placid, capable, and timid. Con cannot fathom their connection and it bothers her for reasons she cannot put her finger on.

During both weeks, as Mattison focuses on the mystery behind the connection between Marlene and Con's mother, it develops an unsuspected sinister edge.

Joanna, Con's daughter, has never liked Marlene and is suspicious of the woman's intentions. When she learns that Marlene will be in Brooklyn over the weekend, she contrives to be there as well to bring to light the shadows that surround her grandmother's friend.

Joanna is an opinionated if somewhat scattered artist and her strong personality is a challenge for Con even though she has a distaste for her own mother's passive character. During the week when Con stays with her mother's cat, the house is burglarized. Con's purse is stolen, as is a box of trinkets from her mother's bureau. The point of this petty crime as Mattison writes it is not the small losses but the profound effect of invasion. Con's mother simply forgot to lock the door, which allowed the thief to enter without a sound and stand unobtrusively in the bedroom where Con is asleep. The violation of privacy is striking but not a route Mattison pursues, much to my dismay.

In fact, I found "Forgotten in Brooklyn" to be disappointing overall. None of the women's relationships in the novel manages to come to life. There is an underlying air of carping and irritation with one another that I felt was a disservice to female friendships. Mattison brushes over the complexities and becomes more concerned with a number of fairly contrived coincidences.

A winning scene in the narrative occurs on the weekend a decade after the burglary. Jerry, Con's ex-husband, has a strange penchant for visiting historical sites and prowling through them for unspecified purposes of his own. While in Brooklyn, the site of exploration is an aspiration to track the path of an elevated subway line that had gone through the initial stages of construction before the crash of 1929.

Marcus ogilvy wanted to connect the Brooklyn subway stops above ground so its passengers would not have to shuttle back into Manhattan in order to reach certain points in Brooklyn by subway. Jerry and Con spend an afternoon searching for vestiges of its inventor's dream. Incredibly, they find traces. Broken down supports exist amidst the buildup that one cannot see unless he or she is looking for

These quiet discoveries between Jerry and Con have a lovely magical quality that makes a connection to the past that Mattison's jumps between decades fail to accomplish.

David Shaeffer '11 and Dan Hicks '11

If you could only listen to one album for the rest of your life, what would it be?

DH: "Bat out of Hell" by Meat

DS: "Thriller" by the King of Pop.

Favorite song to privately dance/ rock out to?

DH: "Time Warp" from the Rocky Horror Picture Show.

DS: "Defying Gravity" from Wicked...The trick is to play it loud enough so the ladies can hear it.

If you were in a band, what would it be called and what kind of music would you play?

DH: Tragic Devil. It would be like an '80s cross between Boston and Chicago with heartwrenching love ballads.

DS: Yeah, Tragic Devil. Tell me you wouldn't like to hear a cross between Chicago and Boston.

Theme song during Ivies?

DS: Anything by Kenny Loggins. DH: Did Dave say Loggins? Definitely "Playin' with the Boys."

initely "Playin' with the Boys."

If you could meet any musician, dead or alive, who would it be and why?

DH: I will speak to Jim Morrison and he will tell me what I am supposed to do with my life.

DS: Robert Van Winkle.

Best new music you've heard lately?

DH: "How Do You Sleep?" by

DS: We played some remixed Nat King Cole. That was pretty cool. Re: Generations.

If you could time-travel back to any musical period, where would you go and why?

DH: I would time-travel back to the mid-1990s grunge alt rock period, let my guard down, and let the music change my life.

DS: '99. Boy Bands, Pop Princesses, Limp Bizkit... Pretty much everything I'm into right now. And Dan Hicks.

Bands/musicans who have most influenced your musical taste?

DH: Hootie and the Blowfish.

"The Dan and Dave Show" airs Tuesdays from 1:30-2:30 p.m. on WBOR 91.1 FM.

Men's tennis bumps Camels in 8-1 victory

CONTRIBUTOR

The men's tennis team (6-2) won its first home match of the season against Connecticut College (4-4) last Sunday, sweeping of the singles matches and winning two of the three doubles matches to set the final score at 8-The opening game victory puts the team at a four-win streak, a strong start to the season.

This match was a good confidence builder for the team," said Coach Colin Joyner. The singles matches were especially successful, even though the full lineup didn't play. Several players who are not usually in the lineup performed especially well with decisive, straight-set victories.

Joyner was happy to see the team step up to the competition.
"Michael Power '11, Matt Knise

'10, Alex Jacobs '12, Kent Winingham '12, and Josh Roer '11 were all impressive in their matches," he said. "It was great to see their hard work pay off and to see them compete well under pressure."

Senior co-captain Alex White and first year Josh Cranin each a pair of points for

singles and the No. 2 doubles with Tyler Anderson '10, and Cranin on at the No. 2 singles and the No. 3 doubles with Jacobs.

Senior co-captain Alex Caughron and Stephen Sullivan '11 won in straight sets at the No. 4 and No. 1 singles matches, respec-

Knise and Power also notched straight-set victories at the No. 5 and No. 6 singles matches.

The only loss came in doubles play, an area that has seen a lot of focus and re-adjustment from the Polar Bears.

"I tried some new doubles combos out for the match," Joyner "I like these new combos that I put together and I'm curious to see how they hold up in competition."

The singles lineup is very strong, so the team has been putting in extra time practicing doubles. Colby and Tufts are ranked lower than Bowdoin, but the Polar Bears will need to show up and play good tennis this week to keep nomentum going.

The Polar Bears travel to Waterville today at 4 p.m. to take on Colby. They then face Tufts on Saturday at 1 p.m.

CHARGE: First year Katie Herter runs at a Colby defender during the Bears 17-10 loss to the Mules on Wednesday.

men's lax falls short vs. Mules

BY CRAIG HARDT STAFF WRITER

In arguably its stiffest test of the young season, Bowdoin played rival Colby at home on Wednesday. The Polar Bears played even with Colby as the sides exchanged goals for the game's first six scores. A threegoal run by Colby threatened to put the game out of reach for the Polar Bears, but Bowdoin battled back to trail by just three as the teams headed into the second half.

After a Liz Clegg '12 goal, the Bears closed the gap to 11-9 as the second half began. Unfortunately, that would be as close as Bowdoin would get, as the Mules pulled away, scoring five consecutive goals to extend their advantage to 16-9 en route to a 17-10 victory.

Despite the score, Coach Liz Grote felt her team played well.

"We were right with them for most of the game," she said. "I told my girls that, if you didn't look at

the scoreboard, you would have thought it was a one-goal game looking at the intensity we played

The Polar Bears' schedule won't be getting any easier as they travel to face highly ranked Middlebury on Saturday.

Earlier in the week the team played NESCAC opponent Connecticut College and hard-hitting University of Southern Maine.

The three-game stretch started off in thrilling fashion last Saturday, as the Polar Bears narrowly defeated Connecticut College for their first NESCAC win.

The Polar Bears raced off to a 4-1 lead behind senior Lindsey McNamara's first-half hat trick, but allowed Connecticut College back into the game with four unanswered

McNamara (game-high five goals) scored again to break the Camels streak and tie the game at 6-6.

From that point on, a back-and-

answer for every Bowdoin goaluntil first year Elizabeth Clegg put the Polar Bears on top for good.

In a tense final two minutes, senior goalie Steph Collins-Finn ensured her team would come away with its first NESCAC victory by making a game-clinching save time expired, helping the Polar Bears to a 11-10 win.

The Bears ensured their second

game would have far less last-minute drama, as they cruised to a dominating 23-7 victory against

Ingrid Oelschlager '11 led the team with four goals and an assist as Bowdoin out-shot the Huskies, 52 to 22. Sophomore Katy Dissinger (four goals) and first years Katie Stewart and Chelsea Albright also added hat tricks.

But the Polar Bears will now turn their attention to a Middlebury team Grote called "the best team in

Women's tennis to play Amherst after hot start

Women's tennis continued to dominate NESCAC play in its vic-tory over Connecticut College last Sunday. The Bears won 7-2, proving sensational in their first home match.

Bowdoin's top two doubles teams cruised passed the Camels, with Sarah D'Elia '09 and Emily Lombardi '12 defeating Conn 8-1 at No. 1 doubles, and Charlotte Hitch '09 and Rachel Waldman '09 dominat-

ing 8-2 in the No. 2 spot. First year Hannah Hoerner '12 played a great match, defeating her opponent 6-3, 6-1 in straight sets.

Freshman Hannah Hoerner continues to grow and it is exciting to see her confidence increase with each match," Hitch said.

In addition, the Polar Bears used the match against the Camels as a learning tool.

"Against Conn this weekend I thought that everybody was able to work on using new shots in a match situation," Lombardi said. "The Conn match gave us a great opportunity to continue to improve and develop strategies that will help us win bigger matches in

The Bears are now 2-0 in NE-SCAC play, having defeated both Connecticut College and Bates.

"Winning our first NESCAC match of the season against Bates gave us confidence going into our

match versus Conn that enabled us to stay focused and pull out a great win," Hitch said.

Rachel Waldman '09 also noted the energy that these NESCAC victories have given the team.

"Our match versus Connecticut College was another good NES-CAC win for the team," she said. "Coming off of Bates, it gives us momentum as we look toward our next matches."

The team will play sixth-ranked

Amherst away this weekend. "The last time we played Amherst was when we knocked them out of the NCAA tournament last spring in the Sweet Sixteen," Waldman said. "So, they will be looking for revenge this weekend."

The Bears have been working hard in practice this week, tweaking their doubles play and practic-ing their "big shots."

"This week, we have been work-ing on doubles strategies in order to prepare to play against Amherst this weekend," Lombardi said. "We have been focusing on step-

ping up and having confidence in shots during the "big points," Waldman added.

The team is looking forward to the challenge and is confident going into the weekend.

Amherst is our biggest rival in the NESCAC division and although they may stand higher than us in the rankings, the fighting spirit of our team places us just as high," Hitch said.

Men's lacrosse on 5-game win streak

BY JEREMY BERNFELD

The men's lacrosse team is firing on all cylinders as it rolls into one of its toughest tests of the season tomorrow.
The team will host Middlebury in what could become one of the defining moments of the year for the team.

"[Middlebury has] some of the best offensive players in the country," said senior quad-captain Rob Halliday. "We have to keep playing as well as we have been on defense, and keep sharing the ball on offense, if we want to get a win. We have to show a lot of poise and play smart Bowdoin lacrosse."

Winners of five straight games, Bowdoin (7-1) will look to keep the streak alive against a top-notch NE-SCAC foe. Middlebury (6-1) is con-sistently one of the best teams in the

league.
"We have got to play great defense and keep them in single digits in the scoring column," said Coach Torn Mc-Cabe, "that'll be important for us. We'll

this report.

get our goals but we can't get into a race of a high-scoring match with them."

On Wednesday, Bowdoin beat Springfield for the team's fifth-straight in. After a sluggish start, the Polar Bears scored five goals in the second quarter to take the lead for good and, ehind a strong defensive unit, notched

"Our defense played really well," said McCabe. "Greg Pierce ['12], a defensive middie, is really playing well, as are all of our defensemen."

McCabe cited seniors Boomer Repko and quad-captain Bryan Holden, and juniors Jamie Devereux and Henry Andrews, for especially strong defense

"We tried to remain patient defensively and not create offense for Spring-field," said McCabe. "They had a lot of possession but they weren't getting great shots. We had to be patient and not try to do too much."

Senior quad-captain Cullen Win-kler paced the team with three goals and sophomore Kit Smith contributed two goals and an assist. Bowdoin also

creamy t game a season.

in their second-quarter flurry.

Eight players scored for the Polar Bears, and the team continues to show its depth.

"Having so many offensive options makes it tough for teams to defend against us, if you can have a lot of different players score," McCabe said. "It's exciting and great for team chemistry and team morale, and it's really good for our confidence. Some individuals can score a bunch, but it's nice when you can spread it out, makes it tough to defend."

The Polars Bears, ranked No. 13 in the nation, head into their clash with Middlebury and will look to move up in the polls with a win over the No. 7ranked Panthers.

"There's no added pressure with the rankings," Halliday said. "They just motivate us more to show that we're better than those 12 other teams."

"The teams we're playing in the com-ing weeks are ranked ahead of us so the pressure is on them," added McCabe.

FOUR-SEAM FASTBALL: Junior Joe Pace fires a fastball against USM on Tuesday. The Polar Bears won the game 7-4.

Baseball loses three to Bantams

BY DANNY CHAFFETZ

Three up, three down. The Trinity Bantams swept the baseball team this weekend in convincing fashion. Trinity, 3-0 in the NESCAC this year, seemed determined not to relinquish the league's top spot. They scored 27 runs against the Bears while only letting up 12 en route to the clean sweep.

On the positive side, Jason Koperniak '09 was a consistent offensive threat for the Bears, producing five hits and two RBIs in the three-game set. The young talent of Adam Marquit '11 and Matt Ruane '11 has also proved to be an integral part of the team. Even so, this season it's going to be an uphill battle for the Bears to catch Trinity, the defending national champions.

However, the weekend losses didn't discourage the team long. They rebounded with a mid-week 7-4 upset of the nationally ranked University of Southern Maine Huskies, No. 24 in the country going into Tuesday's game.

"It was big for us after Trinity," said Coach Mike Connolly. "It was an immediate reminder that when we play our-best ball, we can beat anyone in the country."

Joe Pace '10 carried the team on his arm with a dominating seven-inning performance, allowing just one run on five hits.

"He was untouchable," said Nick Pisegna '11. "We needed a strong start after the weekend and he gave us just that."

Offensively, Marquit and Reid Auger '10 provided the majority of the run support with two RBIs each. But although the Bears maintained a comfortable 7-1 lead for the majority of the game, junior Eric Chenelle had to shut the door in the eighth after the Huskies cut the deficit in half with a three-run homer to make it 7-4. He

did just that. Senior Pat Driscoll relieved Chenelle in the ninth and recorded the save with little trouble.

The win improved the team to 11-11 on the season, having slipped below .500 for just a few days. The win also marked the 189th career victory for Connolly during his 10 years here. He is now tied with former coach Harvey Shapiro for the most wins by any Bowdoin baseball coach.

"To me it's a program achievement, a testament to all the great players and coaches that I've had the privilege of working with over the years."

The team faces Thomas College on Sunday. The Terriers have struggled this season, going 0-9 over all and 0-4 against NESCAC teams. The 190th career win doesn't look too far away for Connolly, but he wasn't ready to jump to conclusions.

"Knock on wood...knock on wood," he said.

Softball falls in extras to drop series to Trinity

BY ADAM MARQUIT

After winning 10 of their last 12 games in Florida, the Polar Bears again traveled south of Brunswick to Hartford, Conn., to battle the Trinity Bantams for their first three NESCAC games.

The squad went 1-2 against the Bantams, losing the final two games of the series.

In the first game, the Polar Bears attacked first with an Ali Coleman '09 two-run home run in the second inning, and added one more in the inning after a Trinity error.

In the top of the fourth Bowdoin scored three more runs on two sacrifice flies and a wild pitch. The Bears' six runs were enough to hold off the struggling Bantams.

"Friday was really exciting because we came into the game with a ton of energy and jumped on them early," said Kaitee Daley '09. Trinity scored just two runs in Bowdoin's third straight win.

Kara Nilan '11 started the first game on the mound for the Polar Bears after earning the No. 1 spot in the pitching rotation following a strong Florida trip. Nilan gave up just three hits on the day and one earned run. She also struck out four Bantams

The next day Bowdoin and Trinity matched up again for the final two games of the series. Trinity pitcher Katherine Poulos was the kryptonite for the Polar Bear bats. In game one Poulos gave up just five hits and struck out four in a five-inning complete game outing. Poulos pitched 12 innings on the day and was the winning pitcher in both games.

Shavonne Lord '10 led the team

in game one with two of the five Bowdoin hits. Julia Jacobs '10 took the loss for...Bowdoin, giving up seven hits and four earned runs. Trinity scored in every inning of the first game of day two on its way to a 9-1 win and a game three that would decide the series.

The rubber-match was a toss up as the game went into extra innings.

At the end of the second inning, with the help of a Lord two-run double, Bowdoin led 3-1. Trinity struck back in the fourth inning when Nicole Nardella '11 blasted a two-run homer over the left field wall. In the bottom of the ninth inning Bantam Melanie Orphanos '11 stepped up to the plate with a runner on second base. After five strong, scoreless innings pitched, Nilan gave up a single to Orphanos that scored the runner from second. The Orphanos RBI won the game 4-3 and the series for Trinity.

ity. "Saturday was a tough day for us," Daley said. "Trinity physically and mentally out competed us in game one, and it felt like we were always just one big hit away from taking the series in game two," Daley said.

"We didn't perform at the level we're capable of," Lord said.

The upcoming weekend of nonconference play will give the Polar Bears a chance to redeem themselves after losing the series to Trinity. They will host their first home game this Saturday against Husson (2-8). They will then travel to Brandeis (9-9) for a doubleheader on Sunday and will play two more at home on Monday against University of Maine-Farmington (0-0).

NESCAC to impose travel regulations

BY SETH WALDER

To cut costs across the league, the NESCAC will be implementing new travel regulations next year for regular season games that require an overnight stay. The new policy will place limits on the number of players that can travel to these games, and will save Bowdoin an estimated \$15,000, according to Director of Athletics Jeff Ward.

The number of players allowed to travel under the regulations varies greatly, and was decided on a sport-by-sport basis.

The decision to make the limits at a conference level was made to avoid giving a competitive advantage to schools that have fared better in the economic crisis.

"Nobody is thrilled at having to do this, but the reality is that everyone is feeling financially crunched," Ward said. "Nobody fought this."

While the decision to impose the limits was made in mid-February, the policy will not become official until it is approved by all of the NESCAC college presidents, which Ward expects to happen without a high.

Ward said that certain teams, particularly men's lacrosse and baseball, would be affected more than others in the sense that they will have to decrease the number of athletes that travel the most, though he didn't expect any teams to be affected competitively because of the limits.

Men's lacrosse Coach Tom Mc-Cabe said he finds it strange that some teams will not be affected at all, but that it would affect nearly 25 percent of his roster. The men's lacrosse team, which currently carries 41 players, will be limited to 32 next year in matches that require an overnight stay during the regu-

Despite this, McCabe said he will not change the size of his team.

"Those guys who are at the lower end of the roster, they are first years and sophomores," McCabe said. "It's almost like having a farm system."

McCabe said that while he normally only uses around 26 players in a game, occasionally, due to injuries, a player who might not be in the top 32 would play. He also said that while there would most likely not be any differences on the field, "the hardest part is you go to the sideline at Middlebury and they have 44 guys on their sideline, and we've only got 13?"

Me've only got 32."

Although keeping morale up might be tougher for those games, McCabe estimated that his team would only have to play one such overnight game a season.

Baseball coach Mike Connolly said he understood why the limits are being implemented—he said the policy will cap his team at 24 traveling players in such circumstances—but he has his qualms about it.

"Everyone has the same potential to get the same amount of experience," he said.

Connolly also pointed out that in his series against Tufts last year, he used 28 players because the games were so close.

Ward said the men and women's basketball teams would be capped at 15, but would not disclose any other team's limits due to the fact, that the presidents had yet to sign the policy. He also mentioned that there would be no limit is post-season play with the possible exception of the men and women's swimming and diving teams. The NESCAC is considering a move to limit the number of swimmers for the championship meet to 18—the current limit is 24. However, Ward indicated that the conference will wait until June to make that decision.

Ward said that the \$15,000 in savings will be a result of fewer hotel rooms, meals, and transportation

PING HACKETT FOR THE BOWDOIN ORIENTO

WINDMILL: Courtney LaPierre'09 of the softball team pitches batting practice indoors on Thursday.

A Royal Angel in the Outfield?

COLUMN LIKE I SEE EM

LY CHRIS ADAMS-WALL COLUMNIST

You just had to go there didn't you? You saw the elephant in the room and just had to ask about it, huh? Well, fine then. If that's how we're going to play the game then I guess I'll have to fess up for your sake: my March Madness picks failed me once again.

I think I knew it was destined to be an abortive shot at near-perfection when I watched my beloved 11-seeded Utah State Aggies (who I had picked to reach the Sweet Sixteen) drop a one-point heartbreaker to six-seed Marquette; or maybe it was when Wake Forest decided to graciously and inexcusably bow out to Cleveland St.-the 51st in our Union, apparently. Three of my Final Four picks—Syracuse, Pittsburgh, and Memphis—also headed home a little earlier than expected.

But two-seeded Michigan State finally redeemed themselves in my book advancing to the semifinals, making up for that time a few years ago when I picked them as a seed to go all the way to the Final Four, only to watch them lose in horror to 11-seed George Mason.. who went all the way to the Final Four instead. All in all though, one out of four-for me at least-isn't terrible, and for what it's worth, I'll go with the Spartans taking the whole thing, which of course means that they won't by the fact that this very article has been published.

But this curse can't last forever. After all, it's baseball season, and I've got a funny feeling that the following 10 predictions and what actually plays out this year are on a collision course with each other. In

other words, they're going to happen.... (Please ignore the fact that this article has been published, so they might not.) Enjoy

10. No repeat in Philly

A Gary Sheffield signing could be in the defending champs' future, but a second consecutive World Series title is not.

The big three of Rollins, Utley, and Howard will continue to frustrate opposing pitchers, not to mention the newly-acquired light-ning rod and durability of Raul

The pitching will be tough as well with Cole Hamels becoming more dominant with each outing, and Jamie Moyer that much closer to the nursing home, which for him, believe it or not, benefit's his arm more so than if he had a curious case of Benjamin Button Syndrome. Philadelphia is an extremely well-rounded club with few holes to seal, and they will likely return to the postseason. But a more prepared Mets, Cubs, and Dodgers will be enough to exterminate whatever hopes of a repeat

Red Sox = Odd Team Out

At least in the AL East that is. With the Rays' rapid and unprecedented rise to prominence the retooled, star-studded Yankees acknowledging the current economic crisis like you would last night's hook-up at Thorne the next morning, the Bo-Sox, and their two walking question marks at the back end of the rotation in the geriatric John Smoltz and the tottery Brad Penny, have to be the favorite to lose the dog fight.

Yes, the offense is there and so is most of the pitching. And yes, I understand that they are the Red Sox. The exuberant Rays and daunting Yanks just have less feeble foundations.

8. They might be Giants Despite finishing fourth in their the team down by the bay where the watermelons grow looks qui-etly promising heading into this

GM Brian Sabean had an active offseason upgrading the bullpen with veteran lefty Jeremy Affeldt and righty Bob Howry, not to men-tion bringing on The Big Unit, Randy Johnson and his five Cy Young ards to add to a young staff that includes two former Cy Young winners in Barry Zito and the reigning champ/SI-proclaimed freak Lincecum, Sabean also brought on veteran shortstop Edgar Renteria, who has always thrived in the National League, and is hoping that rookie third baseman Pablo Sandoval will pick off where he left off last season where he hit .345 in 41 games with 24 RBI. Is this the year the ominous, lingering shadow of Bonds finally dissipates? I don't see why not

7. Introducing Halo 4

And no, I don't mean the video same. Try to name the best outfield in baseball without mentioning that of the Los Angeles Angels of Anaheim (I don't know about you, but those last two words still really bother me). You won't be able to. Bobby Abreu in left. Torii Hunter in center. Vladimir Guerrero in right. The back-up(s) you ask? How about a platoon of Gary Mathews Jr./Juan Rivera which makes for a lethal quartet of outfielders. It's safe to say that this year's Angels really are in the outfield; Roger and J.P. would be

The Cubs' championship drought will continue

Bet you never saw that one com-

In a sport that, over the last half decade or so, has thrived on formerly paltry and inferior clubs suddenly coming out of nowhere to become instant contenders (see 2008 Rays, 2007 Rockies, 2006 Tigers, etc.); we must ask the burning question: Who's next? And one-seventh of my gut says it'll be Kansas City.

The club with the best uniforms in baseball (see? I'm not that biased) has revamped their bullpen adding flamethrower and Yankee castoff Kyle Farnsworth and the reliable Doug Waechter to the mix to help support all-star closer Joakim Soria. The rotation looks solid led by ace Zack Greinke and Gil Meche the proverbial one-two punch. And if Alex Gordon can learn to hit a curveball, no one pitcher will want to face the 3-4-5 of Gordon, Jose Guillen, and Mike Jacobs.

Ok, so maybe you're not buying this. But I'm sure that last year around this time, at some other liberal arts school, some kid in his newspaper column predicted that the Rays would do the same thing. And guess what? Not only was that kid probably really happy, but he was also right.

4. The legend of Hanley will

The coolest player in base-ball—this side of Alex Rodriguez capped off a stellar last season in which he smacked 33 homers, swiped 35 bases, and finished with a .301 average and a Silver Slugger Award. Just wait until he moves to

3. Big Apple-double for the Cy Young

In the N.L., I still like Johan Santana's whose 2.53 ERA led the

Trinity

world last year and whose win total should increase now that K-Rod is slamming the door in the ninth. And in the A.L., I like A.J. Burnett over CC Sabathia and Jon Lester, whose 18 wins were third on the junior circuit last year for Toronto.

The 32-year old right-hander also led all A.L. pitchers with 231 strikeouts and should serve as a panacea for Yankee fans that have not yet recovered from the disastrous, injury-ridden career of Carl Pavano...that is until Burnett himself goes down, in which case I'll be glad I have the backup picks of CC and Lester.

2. A return to MVP

Justin Morneau. Jimmy Rollins. Dustin Pedroia. Just a few names of players who had very good seasons the last few years and ended up taking home the MVP hardware. I'm quite sure how "very good" recently has become so synonymous with "most valuable," but we can't be concerned with that anymore; it's time to reboot the system. I'll make this plain and simple: In the N.L., I like Manny Ramirez, and in the A.L. I like Miguel Cabrera; now these guys are most valuable

1. And the winner is...

If we go by divisions, I think it will be the Yankees, Royals, Angels, and Rays snatching the wild card from the Tigers in the A.L., and the Mets, Cubs, Dodgers, and Phillies as the wild card in the N.L. And since there is absolutely no rhyme or reason as to who wins the World Series nowadays (but especially because Boston will be out of the picture), I'll take the Halos over the Dodgers in a seven-game classic in Southern Cal...and if not them, it'll probably be the Pirates.

Rohmann, Hatch lead sailing at Salve Regina

After a tough weekend sailing in Newport at the Salve Regina Southern Series, the sailing team will look to rebound in Rhode Island at Brown University's Dellenbaugh Trophy regatta.

Additional teams heading to Yale for the Ferrarone Trophy regatta and Tufts for the Centennial

In the Southern Series at Salve Regina, DJ Hatch '11 skippered in Division A with crew Leah Hughes

Billy Rohmann '11 sailed in Division B with crew Ben Berg '12. In a fleet of 20 teams, Bowdoin placed 13th overall, with Hatch and Hughes finishing in 14th, and Rohman and Hughes finishing in

In the fleet, there were "a lot of top players," said Coach Frank

Pizzo said that competing in a very deep field at Newport-one of the bigger college sailing venueswas a great experience.

"This weekend was about player

ors," he said. "What kind of killed us was starting in the big fleets. We were pretty anxious on the starting

The teams had some trouble making tactical decisions.

"The wind was pretty light and shifty, but then there were streaks that rolled down the course, which made tactical decisions very important because if you weren't in the right place you would just get crushed and passed," Hatch said.

One team will race in the Yale Ferrarone regatta this weekend, with another team sailing at Boston University.

"It will be good to get a first sense of where we stack up against some of the real good teams in New England," Pizzo said.

The same team that raced at Salve Regina will race in the Central Series at Tufts, "giving them more good experience with big fleet sailing in a quirky venue, Pizzo said.

"[Assistant coach Mark Dinneen] and I are excited about a young team with a lot of potential,"

OPINION

BOWDOIN ORIENT

Wait-listed

dmissions season is coming to a close. The decisions have been made, and the letters have been sent. At this point, Bowdoin has accepted less than 19 percent of applicants: most have been rejected, and far, far too many have been put on the wait list. When a high school senior learns that she has been put on the wait list, she may assume that she has a chance of gaining acceptance to the College. In fact, there is almost no chance that she will be admitted.

This admissions cycle, the College placed 1,150 students on its wait list, even though it typically accepts a mere 10 to 60 students from the list. Once a tool used by colleges to allow flexibility in the admissions process, the wait list is now primarily a way to reject students gently. However, when the number of students on the wait list astronomically exceeds the number of students who will likely be admitted from it, the only yield is

Last year, former Dean of Admissions Bill Shain estimated that Bowdoin wait-listed more than 800 applicants for the Class of 2012. This year, that number has risen to 1,150 students-which is 46 more than were admitted. However, in the years 2003 to 2007, the College only accepted 10, 20, 56, 30, and 34 students from the waitlist, respectively.

According to Interim Dean of Admissions Scott Meiklejohn, there are multiple reasons that Bowdoin maintains a large wait list relative to the number of students it will ultimately accept. Sometimes, Meiklejohn told the Orient, there are cases where a student's performance is at a level "where a reject decision feels harsh," adding, "You have a pretty good idea you might not be able to take the person off the wait list, but their performance is at a level where a deny decision just feels wrong." Or, Meiklejohn continued, the College might consider wait-listing a student to help preserve a good relationship with a high school.

While many high school seniors are buying college sweatshirts, basking in excitement about their futures, these 1,150 students remain in limbo, unable to make concrete plans. For the vast majority of these students, being put on the wait list only prolongs the anxiety before rejection, further complicating an already difficult decision. Admissions notifications should inform applicants if the College has a spot for them to matriculate; they should not serve as a tool for diplomacy.

We fully recognize that the admissions process is a complex one. The competition between liberal arts colleges combined with the economic recession can only make it more so. However, the concerns of the College must be balanced with those of high school seniors. This will ensure an honest and timely notification of the applicants' standing.

LETTERS TO THE EDITOR

Administration apology needs further explanation

To the Editors:

The "Clarification of Orient Editorial" offered by the directors of Student and Residential Life last Friday said nothing that clarified what has occurred. That there could be any 'mistake" about students' right to free speech, save for abusive, libelous, or obscene speech, is distressing and demands substantive explanation.

That this was an "honest miscom munication of policy" is of no value in explaining what has happened. There is no indication of what was miscommunicated, who made the mistake, or what aspect of Bowdoin policy is vague on the matter of student speech. All that we have been told in the "clarification" is that the "policy prohibiting students from ining fraternities or similar selective-membership social organizations" is very clear. Anyone reading this policy, or simply observing last week's events, might conclude that this policy is not very clear at all.

What would be valuable at this point is a clarification of this policy, stating that it reflects only the institutional decision to eliminate the Greek system, that it has no scope beyond prohibiting the establishment of fraternities, and that the College makes no general assertion of authority over what students may say or who they might privately associate with. If such a statement would not be an accurate reflection of College policy, then this policy demands serious scrutiny, or at least real clarification.

Sincerely, Adam Hall '09

ResLife 'hypersensitive' about Greek life legacy

The editorial about free speech (March 27) and the associated lame apology by Residential Life hit a

I graduated in 2000 and was in a selective-membership social organization. Because this is a college based on selective membership (last time I checked, Bowdoin had one of the lowest admission rates in the country) and which actively supports many other selective-membership groups (i.e. varsity sports, the Meddies, etc.), it is arbitrary and hypocritical to single out fraternities and self-selecting social houses as the one application of selective membership that isn't kosher.

It's just a shame that something so unique and special was sacrificed in such a hypocritical fashion in the name of keeping up with the Joneses (i.e. Williams and Amherst). It's even more aggravating that nine years later, Residential Life is still so hypersensitive (and maybe self conscious...) about what they did that even the sight of Greek letters led to a poster teardown session. So, while I hope that current students are having a good experience and that the current social house construct is working, I won't ever feel the same connection to the College as I once did. Hearing stories like this just pours salt on the wound and gets me all riled up again.

I honestly don't know why I even read the Orient anymore when I am so generally disgusted by the people who run the College (and those who used to run it but have now left after taking a chainsaw to what it used to be). I guess I still do feel a connection with the students and there is a part of me that wants to have back the old relationship with the school I used to have-but it's pretty obvious it's gone and isn't coming back.

Ugh. Sincerely Josh Weiner '00 New York, N.Y.

Students do not forfeit First Amendment rights

The recent editorial ("Free speech," March 27) writes that "Bowdoin is not a public place, so technically free speech here is a privilege, not a right." This is a broad, categorical statement, whereas the relevant First Amendment law is more nuanced. Students do not forfeit all of their First Amendment rights by matriculating.

Sincerely, Tom Little '76 Shelburne, Vt.

Bond brands herself as an object in "Sex Matters"

To the Editors:

As the father of one daughter and grandfather of three young ladies, I feel deep sorrow that Julia Bond ("Sex Matters: Celebrating the common denominator of womankind," March 27) apparently derives so much of her self-image and self-worth from the genitalia she has in common with half of humanity, and for that matter, nearly half the animal kingdom. The modifier "lowest" seems to best fit her conception of "common denominator.

I accept that my advanced age and formal training in engineering and computer science render me hopelessly rational. Still, I came to understand that the raison d'etre for the modern feminist movement was to overcome the perceived objectification of women as nothing more than a

receptacle for personal sexual pleasure. ask then, searching for deeper understanding, just how Ms. Bond could expect such writings to promote viewing her as anything but an object of sexual gratification, even if she might be gratified along the way? If I was a male Bowdoin classmate, how could I view her as anything

With sincerity born of advancing years..

Sincerely, Pem Schaeffer Brunswick, Maine

Local mother appalled by 'obscene' sex column

To the Editors:

As the mother of an 8-year-old who reads well, I would be appalled if he read the recent column titled "Sex Matters" ("Celebrating the common denominator of womankind," March 27). This publication is available around Brunswick, so it's entirely

possible for such a thing to occur.

It's interesting, that in the same edition, there was an editorial titled 'Free speech." Mentioned there is the fact that Bowdoin is "not a public place," therefore, free speech is ."a privilege, not a right." Bowdoin can also limit that freedom "if it deems the speech unnecessarily obscene." My question is this: If this article is not "unnecessarily obscene," what is? If you were to print this in a larger public paper (i.e. the Portland Press Herald) would they deem it "unnecessarily obscene"?

When did the need for "edgy" preclude the need for news? What's next? A renaming of "private parts" to become "public parts" and the suggestion that your faculty and students attend class nude? As an intellectual institution, aren't 'you aiming for a higher standard rather than sinking to a lower one?

What you choose to print has an impact on Bowdoin's image. I doubt your alumni would be saying you have brought "thee fame by deeds

Sincerely. Lori Mills Brunswick, Maine

Robinson's criticisms are pathetic, laughable, false

To the Editors:

In reading last week's Orient, I was disappointed in the increasingly pathetic attempts of Steve Robinson to slander our commander in chief and his administration ("Annuit Coeptis: Why Barack Obama's 'smart' policies aren't," March 27).

I have no problem with reading and listening to views that go against my own, but when they are not based in reality I feel obligated to take is-

Robinson's assertion that President Obama is responsible for escalating a war in Afghanistan and prolonging a war in Iraq is both laughable and, more importantly, completely false.

In Afghanistan, the president is simply cleaning up the mess the previous administration left behind because it failed to give the situation the necessary attention.

The notion that President Obama is "prolonging a war in Iraq" is rather ironic coming from the same person who considers the current administration "naïve" on matters of national security. A responsible withdrawal that will limit the rise of insurgents and ensure a smooth transfer of responsibility is by no means "prolonging" a war. In this case, Robinson ap pears to be the one who is naïve.

Robinson's criticisms of our secretary of state are equally preposterous. What is wrong with referring to someone as "high representative"? Especially when it's their correct

With supporters like Robinson, it's no wonder the Grand Old Party is in shambles-reduced to fear mongering and criticizing gift-giving.

Mr. Robinson, keep on buy ing your guns. Leave the writing to someone who can do more than blurt out Rush Limbaugh's propaganda because, quite frankly, we're

Sincerely, Craig Hardt '12

The upaid internship is the next big thing

A SOJOURN IN CIVILIZED LIFE BY ANNIE MONJAR COLUMNIST

In our first and second years at Bowdoin, my peers in the Class of 2009 had lofty visions of where we could go with our Bowdoin diplomas. At the time, it seemed as if those certificates of higher education would be magic carpets, launching us to professional heights we could only imagine.

Over the rabble and into the offices of major investment banks, consulting firms, ad agencies, and distinguished Ph.D. programs we would fly, mjraculously landing, at the age of 21, halfway down the path of a successful professional life.

Certainly, some of my senior comrades have made secure plans for next year, and will propel themselves forward on the career continuum.

Most of us, however, thanks in large part to a less-than-welcoming job market, have been forced to reimagine our post-graduation lives. We've had to revamp the image of ourselves as young, well-tailored corporate workers, or budding scholars, and have started to worship at the altar of a new career path that has come to define this particular generation of graduates:

An unpaid internship and a job waiting tables.

The unpaid internship is No. 105 on stuffwhitepeoplelike.com, and I initially read that about a year ago with some disdain, telling myself that it was absurd for anyone to be expected to work for no pay. Hadn't the good Abè Lincoln outlawed that in the United States some time ago?

But as I've started looking for entry-level jobs, I've come to realize this: The unpaid internship is the entrance. Companies offering entrylevel positions specify the need for some experience. How to get experience as an unexperienced person? An internship.

To actually receive a salary or any type of benefits from an employer, you must first spend several months proving your unquestioning dedication to them. "I love this industry and this company enough to work here for free, standing at your beck and call," our cover letters plead.

Some internships shuffle around those pesky legal glitches that require workers to be paid for their labor by dubbing the internships as "college credit only." To me, this seems only a sheer gloss over the cruel cycle at hand: They'll force you to work for free because they know you have no other choice. And you should be grateful, dammit.

To an extent, too, most of us are grateful for the opportunity for some exposure to our chosen fields. What bothers me about the unpaid internship, which has become a fairly standard procedure for career-searching, is not really its lack of monetary compensation. Frustrating though that may be, many of the

internships are part-time, and there are certainly ways to have some kind of income on the side.

What bothers me about these unpaid internships is the fact that I can't seem to get one. You might assume that among well-educated young people, unpaid work would be undesirable. But again, it seems that every other senior I talk to is crossing their fingers for a much-sought-after, unpaid internship, and a part-time job with lots of tips.

The competitiveness of many of these internships is understandable; they are, after all, our gateway into the real world, where, presumably, someone will someday deem us worthy of a paycheck.

worthy of a paycheck.

But that doesn't help the particular sting that comes with a rejection from an unpaid internship.

from an unpaid internship.

"We don't think you've earned the right to be in this horribly crummy situation, and aren't sure you've had enough experience with crummy situations to be helpful to us," say the notifications. "We're sorry, but we've received so many applicants who are so well-qualified to make no money, that we're unable to offer you a position at this time. But at least you'll be making the same salary without this internship as you would have been making if you had gotten it."

"I can't even give it away anymore," I grumble to myself, drowning in despair.

As college graduates, we like to tell ourselves that these upcoming years are the most important of our lives, and that in them we will sow the seeds for our future happiness. The idea of spending the next 12 months of our lives hobbling unsteadily between jobs, or relying on low-paying service jobs for sustenance terrifies us and we spend hours piddling around on eBear for a glimmer of hope.

a gimmer or nope.

When I ist down to talk with other seniors about this frustrating and intimidating process, most express these same fears. Will work ever come? Why am I getting turned down so much? What was the point of the last four years? How am I going to make this work?

But the truth is that I recall these same anxieties surfacing last year among seniors at this time, and that nearly all those now-alumni are making it work. Even if they're not in a dream situation, they're making ends meet.

So while my tendency is to assume that any job without a paycheck and dental will cause the world around me to crumble, it's important to remember that the year after college is, at the end of the day, just one step in the process. Many years from now, this one year of our lives will feel very small and transitory, and it's likely we'll have set our hearts on a completely different track than the one we have our eyes on now

one we have our eyes on now.

And when we look back, we'll be able to say that maybe it was a good thing our magic diplomas didn't drop us too far down the wrong

The upaid internship New polar bear logo is a no-go

BY LENNY PIERCE

Upon returning to Bowdoin from my semester abroad, (and yes, I did expand my horizons through unique experiences with cultures vastly different from my own), I was disappointed to see that our school's athletic logo had been altered. The fearsome snarling polar bear head in profile was no more. Instead we now have a far tamer, and far lamer, straight-on shot of what I have to assume is a polar bear but more closely resembles a bear of the "teddy" variety. I feel that this alteration is a gross misrepresentation of both Bowdoin College athletics and polar bears. To understand the true essence of this crime, we must first understand the very nature of the polar bear and its significance to Bowdoin Athletics.

The choice of our school's mascot stems from Robert E. Peary's (Class of 1877) Arctic expedition in 1909. In said expedition, Peary encountered many strange creatures, including musk oxen, narwhals, and killer whales. Any one of these beasts would have been perfectly suitable mascots for Peary's alma mater. The musk ox is basically an 800-pound, ass-kicking goat that is so old it used to roll with the wooly mammoth and saber-toothed tiger in the Pleistocene Era. The narwhal is essentially a swimming unicorn with one huge tusk that protrudes from its head. "Scientists" are not sure what the tusk is used for, but I am. It is clearly designed for epic underwater jousting sessions and/ or sword fights. I don't think I really have to explain how awesome the killer whale is. Its name paints the picture pretty accurately. Considering their respective awesomeness, why did Peary not choose any of these Arctic warriors for Bowdoin's mascot?

I'll tell you why. Because Peary knew that Bowdoin's mascot needed to be an animal that outmatched all of its arctic contemporaries in aggression and ferocity. Bowdoin's mascot would have to be the overlord of the Arctic, the Chuck Norris of the North, the LeBron James of seal consumption: the Polar Bear (Ursus maritimus).

The polar bear is the largest land predator in the world, making it officially cooler than both lions and tigers. The polar bear's diet consists almost entirely of seals, making it "the most carnivorous bear in the world." To paint a clear picture of just how ferocious the polar bear is, I must quote a highly respected scientific journal called Wikipedia. This journal tells us that after the bear yanks a seal out of the frigid arctic water, "the polar bear kills the seal by biting its head and crushing its skull." Yeah.

This sheer power of the polar bear was central to its selection our mascot. Donald B. MacMillan (Class of 1898), a member of Peary's Arctic expedition, played a hand in this decision. Shortly after the mascot had become official, MacMillan presented the school with a stuffed polar bear and said of the bear, 'May his spirit be the guardian not just of Bowdoin athletics, but of every Bowdoin student." A worthy guardian indeed, it makes sense that the traditional depictions of our mascot were intimidating. The classic Bowdoin polar bear logo is a profile head with a snarling face and teeth everywhere. This image worked to effectively send a message of power and dominance.

The new logo is devoid of these qualities. It basically consists of a circle with a straight-on polar bear head in the middle. The bear's face is entirely expressionless without even a hint of ferocity. No teeth are shown; no skull-crushing abilities are indicated. This is a mascot who would not make much of a "guardian" at all. I read about polar bears for close to 15 minutes on Wikipedia, and their colorful descriptions of the animal were fully contrary to this new logo. Since Wikipedia's content is invariably factual, I must assume that they are right and that our new logo is a complete misrepresentation of the species. If any self-respecting polar bear saw this image, I think he or she would be

BOWDOIN

highly offended.

More important, the logo is a misrepresentation of Bowdoin athletics. Each Bowdoin athlete is trained to aggressively pursue victory and they should be branded with a polar bear that suggests this attitude. Our new polar bear appears more likely to settle for a tie or maybe even opt to forfeit if the competition became too heated. This is a face devoid of the confidence and assertiveness necessary for athletic success.

Peary and MacMillan picked the polar bear because of its ferocity, power, and intimidation. The athletic logo should, in turn, reflect these qualities. Traditionally, we had it right. We wore a polar bear which fully reflected both the dominance of the U. maritimus population and the dominance of Bowdoin athletes. The new logo is a gross injustice to both of these groups.

I don't know who is responsible for this decision, but I do know this: "Hungry polar bears are extremely unpredictable and are known to kill and sometimes eat humans." I must assume that whoever made this decision was indeed a human. This human, whoever he is, has seriously offended the polar bear population. My advice to him is that he watch his back, because "polar bears are stealth hunters and the victim is often unaware of the bear's presence until the attack is already underway." If Wikipedia is as reliable as I think it is, you might be in trouble.

Lenny Pierce is a member of the Class of 2010.

BSG wants you...to take the survey

BY CARLY BERMAN AND SOPHIA SEIFERT

Though the construction site by Druckenmiller Hall means we can't cut through the union on the way to class, we are all excited that the big hole in the ground will be transformed into a state of the art fitness center. We'll have a yog studio, an indoor climbing wall, and there will be no more waiting in line for treadmills!

But the structure that emerges will not just hold a gym. In fact, the new building will be the "Fitness, Health, and Wellness Center." The health center will no longer be located in Dudley Coe; the staff will move into this brand new facility. This important transition has gone unnoticed by many students.

This transition is significant. It presents us with the opportunity to improve student health services on campus. Throughout this year, the Bowdoin Student Government has been working with the Dudley Coe staff and the deans' office to examine how Bowdoin's health center can provide students the best service possible.

However, before we can implement improvements, we need to know about your experiences.

Last semester, BSG conducted an unscientific survey of about 250 students. While many students lauded the caring staff and appreciated the convenience of Dudley Coe's location, many others said they didn't trust the health center. Some students said they were misdiagnosed or received incorrect medications. The responses were diverse, but we can definitively conclude that students are concerned about their health care on campus.

Thursday, a more scientific and comprehensive survey was sent to all students. It is the result of work by BSG, the deans, Dudley Coe, and the Office of Institutional Research. The survey will be available online through Wednesday and is anonymous. And it only takes five minutes to complete.

In order for changes to be made, we need to hear from you. We need to know what the student experience actually is. We need to hear the horror stories and the successes. Tell us what made you want to pull out your hair and what made you sigh with relief.

And in this time of economic stress, we particularly need to know what services you do and do not value.

Your honesty—and liberal use of the "more information" boxes to explain your answers—is vital to the college's ability to fully address and accurately understand students'

Additionally, if you have had a negative experience, we strongly encourage you to contact Senior Associate Dean of Student Affairs Margaret Hazlett and make yourself and your story known. If the administration knows which students have had unfavorable experiences, they can examine the appropriate records to find out what went wrong. Armed with this information, we will take specific steps to

ensure it does not happen again.
So, please, take five minutes out of your busy week and fill out the survey. With the information you provide, we will be able to ensure that the Health and Wellness portion of the Fitness, Health, and Wellness Center is as topnotch as our new treadmills.

Sophia Seifert '09 is the President of BSG and Carly Berman '11 is its Vice President for Student Affairs.

Obama should lift ban on openly gay in military service

THE COLD,
HART TRUTH
BY EAMONN HART

President Obama has often been praised, appropriately, for his leadership and charisma. Indeed, these have served him well both on the campaign trail and in the policy arena. When the American people demanded action on the economy, the White House and Congress worked to pass the stimulus package. Leadership, however, is easier in some areas than others. When there is not a strong constituency for a particular policy, even when it is both pragmatic and just, strong leadership is necessary.

Right now, the struggle to lift the ban on gays and lesbians serving openly in the military needs leadership. Rep. Ellen Tauscher, D-Calif., has introduced a bill that would lift the ban, but fast action does not look likely, particularly because Tauscher has accepted a position at the State Department and is vacating her seat. A good bill lies in jeopardy as a result. It needs a champion.

It is high time the government

lifted the ban, if only for pragmatic reasons. At a time when our military is overcommitted, it seems that the last thing it needs is more reasons to disqualify potential servicemen and women. This isn't an abstract problem; the Servicemenbers Legal Defense Network estimates that 12,500 otherwise qualified individuals have been discharged as a result of the ban.

discharged as a result of the ban.
Of course, the pragmatic reasons for lifting the ban come in conjunction with a moral imperative. The United States strives to be the land of opportunity and equal rights for all. 12,500 is a shocking number of discharges, but just one is too many when it comes as the result of biportry.

result of bigotry.

Equality and freedom are not consistent with unjust discrimination against anyone. There is no reason that gays and lesbians cannot be equally effective soldiers, sailors, airmen, and marines as their heterosexual counterparts. Indeed, countless foreign militaries have no problem counting gays and lesbians among their ranks, and they have not witnessed deleterious effects.

The notion that allowing gays in the military will somehow damage military cohesion and effectiveness Lifting the ban is indeed politically risky. However, if now is not the time, then when will the time come?

is one that, while easily foisted on the public, lacks' evidence. For a more academic look, I would suggest examining UCSB Professor Aaron Belkin's paper on the subject, appropriately entitled "The Pentagon's Gay Ban Is Not Based on Military Necessity."

Professor Belkin argues that evidence suggests that in fact, the military would successfully adapt to the presence of gays and lesbi-ans. Academics aren't the only supporters of lifting the ban; former Chairman of the Joint Chiefs of Staff, Gen. John Shalikashvili stated: "I now believe that if gay men and lesbians served openly in the United States military, they would not undermine the efficacy of the Armed Forces."

Making a strong push to lift the ban flies in the face of conventional political wisdom. The forces in favor of maintaining the status quo are strong. There will be cries that action on this issue is too politically risky, and that now is not the time. Perhaps on the first count, there is some truth.

Lifting the ban is indeed politically risky. However, if now is not the time, then when will the time come? Even as there is risk, there is political upside to acting decisively. For one thing, it shows courage and leadership, qualities most Americans would agree are desirable traits in a president.

On a more practical level, President Obama made a commitment to end the policy. If he fails to do so by the end of the first term, it will look as though he has retreated on his pledge. If he waits too long, he risks making the 2012 election or even the 2010 midterms about the issue.

The challenges we face are too broad to allow the right wing to hijack this issue and make it a wedge. Acting quickly would reduce the issue's relevance to subsequent elections. Furthermore, Obama enjoys more political capital now than he will likely enjoy in a few years. The time for presidential leadership is now.

A wise man once said, "Justice delayed is justice denied." Indeed, the U.S. has denied justice to patriotic citizens for years by preventThe United States strives to be the land of opportunity and equal rights for all. 12,500 is a shocking number of discharges, but just one is too many when it comes as the result of bigotry... There is no reason that gays and lesbians cannot be equally effective soldiers, sailors, airmen, and marines as their heterosexual counterparts.

ing gays and lesbians from serving openly in the military. Of course, an attempt to repeal the ban should be planned and executed carefully, but this does not imply waiting until everyone in the country agrees. If that were the strategy used during the civil rights movement, change would have come much more slowly than it did.

If President Obama steps up and fights to lift the ban, history will remember his decision to stand up for justice at a time when it was unpopular. The cause of justice, as well as the need to maintain our strong military, tells us that it is not time to wait, but rather, time to act.

'Political kinesiology' can train America back into shape

.IMAGINING BOWDOIN BY ROSS JACOBS COLUMNIST

A family member tiptoes downstairs for a midnight snack. My mother, an aerobics instructor, awakes to the creaking of the floor, disturbed that these unhealthy habits exist. She yearns to see her family healthy and works hard to keep us that way: she encourages us to stick with sports, and she sets a good example.

But she wants us to make these healthy choices ourselves, without her coercion. Although she believes in her culinary monitoring and aerobic tutelage, she also wants to avoid the one crime that all mothers, and Jewish mothers especially, most fervently condemn in their own mothers. Every language has some word to describe this crime, but the Yiddish words for it carry a special weight—Jewish mothers worry about exposing themselves to accusations that they are a nag, a noodee, or even nudnik.

Looked at in a certain light, the situation of the American government with respect to health parallels this ordeal—American matriarchs and patriarchs yearn for us to be healthy, but they also wants us to be free. Millions of Americans painfully admit every day that they have botched that freedom and developed unhealthy habits that they cannot seem to shake by themselves.

Now, America is a mother deciding how to respond to the unhealthy choices of those she cares about. She wants us to retain our commitment to a limited government and knows that we will rebel if she becomes too much of a nag. But she is also looking at a people confined to their cubicles, chained to their computers, and living a shockingly sedentary life.

With more than three out of five of us classifying as overweight, she sees a people that once vigorously settled the frontier and defeated great armies.now decaying into the fattest civilization in the history of man. She sees men, ashamed of their bodies, idolizing sports heroes and weightlifters. She sees women, ashamed of their bodies, purging, starving, and fad-dieting themselves sick, consumed with the hope that they will one day look in the mirror to see a body that might deserve to join that of the celebrity tabloids they idolize.

When I look at the dining hall, the Outing Club, the levels of athletic participation, and the unusually healthy bodies of the students here, and then consider the engaged minds of the students here, I come to think that Bowdoin has special responsibility to address this social crisis. It demands from us a unified, interdisciplinary reflection on what could be called, for lack of a better word, political kinesiology.

Political kinesiology would begin with a distinct observation—the reason Americans are not healthy is because they do not need to be physically healthy in order to achieve many of the political and professional objectives relevant to

Cars and other transportation technologies make long walks to work or school unnecessary. With many wondering whether we are headed for a "postwar" age, the safety of the nation no longer requires our physical strength. With the production of our food outsourced, we no longer need bodies that can lift bushels of corn.

Although the long-term disadvantages include diabetes and other diseases, the immediate disadvantages of being unfit are often limited to handicaps in the dating With more than three out of five of us classifying as overweight, she sees a people that once vigorously settled the frontier and defeated great armies now decaying into the fattest civilization in the history of man. She sees men, ashamed of their bodies, idolizing sports heroes and weight-lifters. She sees women, ashamed of their bodies, purging, starving, and fad-dieting themselves sick, consumed with the hope that they will one day look in the mirror to see a body that might deserve to join that of the celebrity tabloids they idolize.

game or shortness of breath while walking upstairs. I could be proven wrong, but I doubt that sexual conquest alone can sustainably guarantee strepuos physical assertion

tee strenuous physical exertion.
With this broader perspective, this discipline would ridicule solutions to our crisis of fitness that affirm the frantic "status-quo scurry" that looks to diets, potions, elixirs, gurus, and magical recipes to cure the sorry state of our health. Members of America's supra-political leadership class informed by this new kinesiology would scribble on the cover of their notepad the emerging goal—restore health to the American population by committing it to tasks that require physical fitness.

This is a political issue because this injunction might be at odds with America's sacred commitment to liberal democracy. Can a population be recommitted to healthy objectives while honoring a commitment to limited government

In the 20th century two regimes weakened their commitment to limited government in order to summon forth and create a more fit and physically engaged people.

Nazi Germany promoted fitness by calling for the production of a master race that required statemandated exercising, a glorification of militarism, and an absurd, pseudo-scientific, eugenics test that we "Jewish degenerates" did not quite pass.

Communists promoted fitness through the hammer-and-sickle cult of labor. Dictators commanded that all citizens be conscripted in a labor corps that required the building of houses, working in fields, and toiling against nature on state-authorized agricultural projects.

We Americans, with our sacred affirmation of freedom, are at a distinct disadvantage when it comes to the possibility of ordering our citizens to undertake endeavors of physical fitness. If we are to retain our liberal regime over the next century, we need a political kinesiology, initiated by citizens themselves, that can prove democracy and fitness compatible.

It will be dedicated to the questions: What sort of endeavors or tasks can summon forth, and endow with significance, the strenuous physical exertion requisite to the health of our citizenry? It seems to me that competition in the Olympic Games, other athletic contests, and forest conservation, are a great start.

In Federalist No. 55, James Madison frankly acknowledged a "degree of depravity" in human beings that made him worry about putting somuch trust in private citizens. He ultimately decided to affirm our form of government because he also observed other human qualities that "justify a certain portion of confidence and esteem."

Over the next 50 years, the challenge of getting America back into shape will test whether Madison was mistaken in his decision to affirm a government that "presupposes the existence of these qualities in a higher degree than any other form." It will test whether we need to live under the tyrannical nagging of frenzied grandmothers or if we are in fact strong enough to be free.

Longer op-ed submissions of 400 to 800 words may be arranged in advance with the opinion editor. Submit pieces via e-mail (orientopinion@bowdo

WEEKLY CALENDAR

APRIL 3 - APRIL 9

FRIDAY

COMMON HOUR

"Winning the War on Poverty through Education"

Geoffrey Canada '74 will speak about his work as an educational reformer in Harlem seeking to break the cycle of poverty through education. Pickard Theater, Memorial Hall. 12:30 p.m.

PERFORMANCE

Teatime Concert: Athabasca Trio

This Canadian group, which specializes in chamber music, includes violinist Jane Chung, violist Tawyna Papoff, and cellist Caroline Stinson.

Kanbar Auditorium, Studzinski Recital Hall, 4 p.m.

PI AY

"Attempts on Her Life"

This play by British playwright Martin Crimp details the shadowy existence of a contemporary woman.

Wish Theater, Memorial Hall. 7 p.m.

FILM

"Beaufort"

The Bowdoin Film Society and Hillel will present this 2007 Academy Award-nominated Israeli war film about an Israeli Defense Force unit stationed in southern Lebanon during the South Lebanon Conflict.

Smith Auditorium, Sills Hall. 7:30 p.m.

CONCERT

The Bridgebuilders

Howell House will host this folk rock group, originally from Boston.

Howell House, 8:30 p.m.

PERFORMANCE

Wale featuring UCB

WBOR will present Wale, a hip-hop artist from Washington, D.C. Opening acts include performances by Makio, S-Caliber, T-Throw, and the Phunky Phresh Band. Morrell Lounge, Smith Union. 10 p.m.

SATURDAY

CONFERENCE

Symposium Commemorating the Attainment of the North Pole 100

Years Ago

American and Canadian professors and historians will gather to discuss issues of polar exploration as part of Bowdoin's celebration of Robert Peary's journey to the North Pale

Smith Auditorium, Sills Hall. 9 a.m. - 5 p.m.

PLAY

"Attempts on Her Life"

Wish Theater, Memorial Hall. 2 p.m. and 7 p.m.

Investigation of professor's study draws to a close

BY NICK DAY ORIENT STAFF

Following a College investigation of alleged research misconduct, a Bowdoin professor now awaits a final decision on the matter from President Barry Mills.

Professor of Economics Jonathan Goldstein, a former chair of the economics department and a 29-year tenured veteran of the College, researched in a 2008 paper the effect of athletics on academics at 36 small, liberal arts colleges, including Bowdoin. The paper, which contained results potentially harmful to the reputation of the College, has not been published in a scholarly journal but was posted last August on Goldstein's faculty page of the Bowdoin Web site.

Goldstein's 16-page study, "The Tradeoff Between Extra-Curricular Activities and the Academic Mission of Small Liberal Arts Colleges: Why Some Schools Are Poor Educational Investments," studied various policies at the schools and ranked them according to three factors: grade inflation at the school, the percentage of athletes at the school, and whether the athletic director at the school had Division I, II, or III experience. In the study, Bowdoin ranked 36th of the 36 schools in the survey.

Mills declined to comment, citing his ongoing involvement in the case, but referred the Orient to Vice President of Communications

ECONOMY

Maine newspapers weather economic storm

ORIENT STAFF

Amid the online-only shift of the Seattle Post-Intelligencer, a threatened Boston Globe, and the state's own Blethen Maine Newspapers for sale, the news industry today is struggling. With advertising revenues falling for all, print subscriptions down 15 to 20 percent at some Maine dailies in the past eight years, and burdensome debt structures to support, newspapers in Maine are looking, with the rest of the country, for ways to weather the storm.

At first glance, Maine's smallerscale, localized newspapers appear to be faring better than some of the more troubled, larger daily newspapers in other cities, which are facing huge production costs in a rough economy, large debts incurred by owners, and competition from many other city news outlets.

"As people's interests have become, in my mind...more about my community and my life, local papers are doing better. That doesn't mean we're doing as good as we were three or four years ago, but our rate of decline is much more gradual than the big city papers," said Eric Conrad, executive editor of the Kennebec Journal and the Morning Sentinel.

Nonetheless, Maine's papers are not immune to the blights facing the industry and country at large.

"All newspapers, big and small, face the challenges of adapting to industry changes... We're all struggling to some degree to create a 21st-century business model that will sustain the industry," said Rob-

Local stores

contend with slow economy

BY TOPH TUCKER

On Sunday, CyberLANd employee James McKernan told the Orient, "We hit a rough patch, but we're picking ourselves back up. Things are picking up."

By Wednesday, a "Going Out of Business" banner had been draped across the storefront.

Inside, the news was still sinking in for patrons and staff. One spoke of applying for a new job; one complained he'd have nothing to do but sit at home all day; another tried (and failed) to convince his wife to let him buy a couch for \$50.

While national newscasters talk about Wall Street and Main Street, Brunswick is most concerned with its own Maine Street. As the town of 21,000 emerges from a winter that was colder and harder than most beyond the weather, the surviving local businesses are greeting spring with cautious optimism.

"I think things may be turning in the right direction," said Scarlet Begonias owner Doug Lavallee. "I'm very optimistic."

While "there's definitely been a decline," Lavallee saw it as nothing groundbreaking. "It's always been a challenge to get through the winter."

Big Top Deli owner Tony Sachs is optimistic, too. Given Big Top's

ACADEMIC AFFAIRS

Minor in economics and finance to be offered at College next year

ORIENT STAFF

Starting next year Bowdoin will offer a minor in economics and finance, the result of a unanimous faculty vote on Monday.

The proposal, which had been a topic of discussion since Fall 2005 when the economics department first introduced finance courses, arose in response to interest from students, the administration and members of the economics faculty, according to Chair of the Economics Department Deborah DeGraff.

"Students had been asking for certain business-oriented courses for a long time," said Associate Professor of Economics Gregory Paul DeCoster, who currently teaches Finance courses, and now the mings, are our way of, in a sense, responding to that in a way that still remains very consistent with the spirit of a liberal arts education." "Finance is about pricing outcomes in the future and this is pure economics. Economics is a classic liberal arts topic," added DeCoster.

He explained that the new minor was designed with students' careers in mind.

"The purpose of this minor is to give students access to knowledge that prospective employers in an evermore competitive market have come to expect," he said, "and to do so while providing students with greater flexibility in their education than they would with a major in econ."

The minor will consist of Introduction to Microeconomics and Macroeconomics (Economics 101 and 102, respectively), Finance 1 and II (Econ 260 and 360), Microeconomics (Econ 255), and an elective at the 200 or 300 level which students may select from a specified list.

This offering "will probably at-

JACOBS: Prospective students: Choose Bowdon

INVESTIGATION CONTINUED FROM PAGE 1

and Public Affairs Scott Hood.

Hood said that Mills "does not have a timetable" for deciding when the case would be resolved. Hood would not speculate on a possible outcome.

Goldstein said that he felt that the president's decision could range anywhere from a "letter of censure" to "anything short of being fired, since termination of employment would have to go through a faculty committee.

Mills' decision would likely bring to a close an eight-month long dispute between Goldstein and College officials over the content and dissemination of his paper. Goldstein has maintained that the administration's response to his paper stifled his free speech, and that the investigation of its dissemination and contents was unsubstantiated and poorly handled. Administration officials, on the other hand, contend that Goldstein distributed the paper in inappropriate ways, and that it was necessary to investigate possible research misconduct.

The dispute begins

Goldstein said that he first finished his paper "around August 11," and sent it to colleagues at other schools the next day. On August 21, Goldstein linked a "detailed version of my paper on my College Web pages," according to a written synopsis by Goldstein given to the Orient.

In addition to posting the pa per online, Goldstein also distributed a shorter version of the paper during admissions information sessions on August 21, 22, and 25 to prospective students and their parents. On August 21, according to Goldstein's written synopsis, he "distributed the paper prior to the beginning of the [information] session" and "had no contact with Admissions Office personnel on that day." On August 25, Goldstein also handed out his summary "without incident." On August 22, however, according to the statement, Goldstein was approached by Interim Dean of Admissions Scott Meiklejohn before the session, who told him "that the information session was a private meeting of the College and that I should not attend it." Goldstein also says that after the conversation with Meiklejohn, the interim dean "closed and locked the sliding doors" to the information session, preventing Goldstein

from entering.

Meiklejohn declined to comment, referring the Orient to Hood.
Hood said that Goldstein was "interfering with College business" by handing his paper out to prospective students and their families last

"We don't think anybody should be allowed to highjack a tour or an information session," Hood said. "He's welcome to make his point in other ways, but he chose to do that in a disruptive manner, and the College thought it was inappropriate, consulted with attorneys, insurance companies, all of whom agreed with that."

"I do think there are ways to get your message across," Hood continued. "I think one way to do that, particularly when you're doing academic research is to publish your paper, do a peer review, allow people to talk about it from a different viewpoint."

Goldstein said he was surprised by the strong reaction from the College.

"I understand they're probably not happy with me disseminating information which is possibly sending a message contrary to the one that they're sending," Goldstein said. "But then again, this is an academic institution that values free speech and academic freedom. Why should we value that for every other idea except ideas that the administration or the admissions department think shouldn't see the light of day? It's just not consistent."

Charges

On August 27—less than a week after Goldstein began disseminating his paper during information sessions—Dean for Academic Affairs Cristle Collins Judd sent a letter to Goldstein telling him that his distribution of the paper was under investigation.

According to a letter drafted by Adam Kissel of FIRE (Foundation for Individual Rights in Education) on behalf of Goldstein and made available to the Orient, the letter from Judd to Goldstein stated that the dissemination of his paper was being examined "in the realm of harassment and hostile work environment, as well as the possible violation of other College policies."

In addition to these issues, which were to be investigated by Director of Human Resources Tama Spoerri, Judd found that Goldstein's "research methods...may need to be considered by the appropriate faculty committee and my office." In a subsequent letter on September 29, Judd-wrote Goldstein informing him that possible "research misconduct" was also being investigated. The new allegations were "failure to cite sources" and "plagiarism."

The "failure to cite" charge alleged that the paper "made reference to 'official' sources, but such sources are not cited, nor does the paper explain how the '36 nationally ranked liberal arts colleges' for which comparative data is presented were chosen," according to a copy of the charges Goldstein gave to the Orient. Additionally, in another charge of "failure to cite sources," no sources were cited for one table in the study. The plagia-rism charge, which also stemmed from the table that was not cited in the work, alleged that grade distribution information on one table is derived, without acknowledgment, from the 'Franklin and Marshall Grading Survey of Selected Institutions.

Goldstein acknowledged that he made several notes to himself to cite the table, but that he had unintentionally forgotten about the citation.

On October 17, according to Kissel's letter, "Spoerri's investigation cleared Goldstein of the harassment and hostile environment allegations. Spoerri "found only that Goldstein had failed to treat colleagues' with respect and proper protocol" in his run-in with admissions officials.

But the charges of academic misconduct were examined more thoroughly, with Judd initiating an initial inquiry, as stipulated by the Faculty Handbook.

On November 10 an inquiry committee, assigned by Judd and comprised of Professor of Mathematics William Barker, Associate Professor of Gender and Women's Studies Kristen Ghodsee, and Professor of Anthropology Scott MacEachern determined that the allegation of research misconduct

was "of sufficient substance to warrant further investigation." The committee did add, however, that "the document at the center of the allegation is potentially somewhat embarrassing to the College." The committee also observed a possible conflict of interest in the case since Judd was not only serving as complainant (defined in the Faculty Handbook as "a person who makes an allegation of misconduct in research") but also as the Dean for Academic Affairs, who is supposed to have an impartial role in dealing with allegations of research misconduct.

The Faculty Handbook is un-

clear about allegations of research misconduct that are raised by the Dean for Academic Affairs.

Goldstein maintains that there was a "blatant conflict of interest" in the case by having Judd serve as Dean and complainant.

Please see INVESTIGATION, page 3

Study examines grade inflation, athletics

In an August 2008 paper, economics professor studies issues at small liberal arts colleges

> BY NICK DAY ORIENT STAFF

Professor of Economics Jonathan Goldstein's paper, "The Tradeoff Between Extra-Curricular Activities and the Academic Mission of Small Liberal Arts Colleges: Why Some Schools Are Poor Educational Investments," has been the source of an eight-month long dispute between the author and College officials since shortly after it was posted on his faculty Web page last August.

The study examined athletics in the context of small, liberal arts colleges. Goldstein said he used data from athletics because it was the extracurricular activity "for which the data is most readily available."

Goldstein examined three factors to determine his rankings: grade inflation at each school, the number of athletes as a percentage of the student body, and the philosophy of the athletic department, which Goldstein quantified by differentiating between schools that had hired athletic directors with Division I, Division II, or Division III experience, with the "notion being that Division I is a more competitive environment." he said.

Goldstein said that he decided to factor in the prior experience of the athletic director at each school largely because of conversations with coaches after Bowdoin Athletic Director Jeff Ward came to the College in 1998. Ward had previously worked in a Division I athletic department as an assistant athletic director at Brown University.

"I remember when our current athletic director took over, I happened to have some casual conversations with existing coaching staff here at the time, and two or three of the people told me that they felt pressure that their job was in jeopardy if they didn't produce a winning team under the new regime here," Goldstein said.

"So that's ultimately why I considered that factor" in the study, he said.

In an e-mail to the Orient on Wednesday, Ward wrote that the investigation of Goldstein's research "had evolved into a personnel issue and a discussion of academic freedom" and that it "would be inappropriate for me to comment about either." He did, however, take a firm stance on Goldstein's views on athletics at the College.

"I strongly disagree with most of what Professor Goldstein has said about Bowdoin Athletics," Ward wrote.

Most of the information for his study, Goldstein said, was "obtained from the Internet, college Web sites and things like that."

According to Goldstein, he weighted the three factors (grade inflation, percentage of athletes at the school, previous experience of the athletic director) equally and then ranked the schools.

"The equal weighting [of the three factors] is arbitrary and anybody can argue that, and of course there is no correct weighting, and it's a matter subject to discussion," he said. What he found in his study was that "The schools that tended to be at the higher end of the spectrum were schools that we tend to associate with stronger academic programs: Swarthmore, Haverford, Bryn Mawr, etc."

At the bottom of his rankings "were schools that didn't necessarily have the same recognition for being academically rigorous places," he said. "A lot of the schools at the bottom [of the study] have good U.S. News and World Report rankings, which I view as the potential of the school. The question I'm interested in is the potential being realized, and that's sort of what I'm after."

Out of the 36 schools in the study, Bowdoin ranked 36th. Other NE-SCAC schools, including Amherst, Colby, Hamilton, and Williams, also appeared at the bottom of the rankings. According to his paper, these schools fared poorly because of the "pervasive nature of athletics" and "the failure to regulate athletics resulting in negative feedbacks on the academic mission"

Grade inflation

A major theme throughout Goldstein's study is grade inflation, and by his own admission, he is a more difficult grader than most professors at Bowdoin. In a footnote in his study, Goldstein explained that in terms of average grades he gives to his students, the Office of the Registrar once ranked him "dose to the bottom": 164 out of 171 faculty at the time.

At the end of each semester, students evaluate each of their professors. These teaching evaluations, noted Goldstein, are used "for the purpose of promotion, tenure, and merit-based pay increases."

"Obviously talking about a generation involves stereotyping," said Goldstein. "I believe that, and this is a testable hypothesis, that the current generation of students tend to tie grades to teaching evaluations."

Dean for Academic Affairs Cristle Collins Judd, who has been at Bowdoin since July of 2006, said she thought that grade inflation at the College was not something that faculty had been particularly concerned about.

"My sense, at the moment, is that grade inflation has not been a front burner issue for faculty since I've been at Bowdoin," she said.

Vice President for Communications and Public Affairs Scott Hood said that grade inflation was an issue at schools across the country, and that it wasn't necessarily a Bowdoin-specific problem.

"It's certainly not something that Bowdoin should be embarrassed about," he continued. "It's something that higher education in general has to deal with, and be part of the discussion and part of the dialogue."

Toning down athletics

Goldstein also has no reservations about voicing his discontent about what he believes to be an overemphasis on athletics at the College, as well as their adverse affect on the academic mission of the school.

"We have more varsity teams than

Notre Dame, Michigan State," he said.
"Let's be realistic about it."
But Goldstein, who is tall with

But Goldstein, who is tall with broad shoulders, is no stranger to the athletic field. During his junior year in high school, his football team won the New York City Public High School Championship. He planned to play football in college, but said he was forced to give it up because of a nagging shoulder injury. Shortly after he came to Bowdoin in 1979, Goldstein started a women's softball team, which he coached while also teaching economics. He was replaced in the early 80s by a full-time coach.

"I, think people will get the wrong impression that I'm anti-athletics," Goldstein said. "I want to change things, but at the same time, look, I've played sports all my life."

Goldstein said that in place of fewer athletic teams, a larger and more competitive intramurals program could fill the gap. In intramurals "you can get the rigors of competition without devoting so much time to it."

In addition to paring down the number of varsity athletic teams, "the other thing that probably is necessary is to have minimum GPA requirements for participation in athletics of extracurriculars in general," he said. According to Ward, there is currently no GPA requirement in order to participate in athletics at either Bowdoin or in the NCAA at-large.

Goldstein said that steps taken by Bowdoin and other NESCAC schools in late 2001 to decrease the number of rated athletes (athletes that coaches have identified as desirable for acceptance) at the College was as a step in the right direction. According to a December 2001 article published in the Orient, then Dean of Admissions Jim Miller announced that the College would admit roughly 20 percent fewer rated athletes.

However, Goldstein felt that the measure did not go far enough.

"I think the faculty was appeased, unfortunately so, by President Mills' decision back in 2002 to tackle the athletics issue, but ultimately make a policy change which was marginal and had minimal impact," he said.

"This happens at the College every 10 years," Goldstein said. "It comes up, someone addresses the issue, and typically marginal changes are made to appease the faculty for another decade. But the decade's almost over now."

Judd said that she believed the College was having the "right kinds of conversations" about athletics and academics.

"I think the balance for students making choices in curricular and extracurricular activities is always one that will call for a reminder about academic priorities," she said. "That's as true of the students who are in the Chamber Choir and the students doing work in the Center for the Common Good, and the students who are in the Outing Club, and the students who have passions that so many Bowdoin students have."

"I understand that my position is not popular, particularly among the students," said Goldstein. "But I think that the goals are laudable. I'm just trying to better achieve the potential of an institution, and I think it has a lot of potential." Judd declined to comment about

the inquiry.

Hood said he did not see a conflict of interest in having Judd serve as both the complainant and the Dean, and stated that Judd raised the issues of possible research misconduct surrounding Goldstein's paper "according to what the Faculty Handbook makes her do."

In addition to the possible conflict of interest, the initial inquiry committee recommended that if the issue was pursued further by Judd, that "the status of the document in question, and its position along a continuum between draft and published paper" should also be considered.

Furthermore, the committee recommended that the "question of 'honest error' in cases of alleged research misconduct" be taken into account.

The three faculty members who served on the inquiry committee declined to comment, citing the need to preserve confidentiality in the case. The Faculty Handbook states that "To the maximum extent possible, the inquiry committee will provide confidential treatment to the affected individuals."

Goldstein, who has waived his right to confidentiality in the proceedings, said he did so "because of the nature of the process."

"If everything remained confidential, the College basically has

the power," he said, "particularly if things go to a litigation stage, since the College has deep pockets."

Investigative committee findings

Eight days after the inquiry com mittee reported its findings, Judd wrote in a November 18 letter to Goldstein that she was going to "convene a formal investigation" of the allegations of plagiarism and failure to cite sources against him, according to the FIRE letter. Judd appointed Professor of English Marilyn Reizbaum, Professor of Chemistry Ron Christensen, Professor of Psychology Louisa Slowiaczek, and Colby College Professor of Government Calvin MacKenzie to the investigative committee. (According to the Faculty Hand-"committee members may be from within or outside the Bowdoin community.") These committee members also declined to comment, citing confidentiality.

Last Friday, after approximately four months, the committee released its findings to Goldstein and Judd. Due to the confidential nature of the proceedings, College officials would not comment on the complete report. However, Hood did say that the committee recommended that "Judd step aside, and she has done that," by recusing herself from the case and handing it off to Mills.

According to Goldstein, the the investigative committee also dropped the plagiarism charge, while the "failure to cite" charge was maintained.

Goldstein also gave the Orient an excerpt of the committee report, which suggested that any misconduct during his research could be considered unintentional.

"The distinct possibility that these actions were not intentional should be a mitigating factor in the application of sanctions," the committee wrote.

Goldstein, who said he filed an appeal with Mills shortly after the April 3 findings of the committee, believes that he should not be punished for what he believes are unintentional errors. The Faculty Handbook states that "misconduct in research...does not include honest error or honest differences in interpretations or judgments of data."

"Obviously there were some problems with my paper, but I haven't risen to the level of research misconduct," Goldstein said. "If you read the Faculty Handbook, where they define research misconduct, it clearly has to be an intentional act."

Judd declined to comment about the specific details of the case because of the confidential nature of academic misconduct cases.

When is a paper published?

Goldstein's paper also raises complicated questions about when a paper available on the Internet can formally be considered a published piece of scholarship. When Goldstein posted his paper on his faculty Web page at the end of Au-

gust, he did not identify that the paper was a preliminary draft. But he maintains that a large number of scholars leave unmarked drafts available on the Internet for others to view.

"When people put them up, sometimes they'll put 'preliminary' on them. But infrequently. Sometimes they'll say 'Draft not for Quote'. But the vast majority say nothing," Goldstein said.

Judd did comment in a general fashion regarding this issue, saying that there were specific guidelines for posting drafts of papers on the Internet.

"Many faculty members publish their research on the Web," she said. "And open access is something that we talk freely about at the College. There are standard conventions about how material in draft form is supposed to be labeled, and if information is not intended to be published or circulated widely, people put it behind a password on a Web site or they disseminate it in other ways.

"But drafts tend to be labeled draft," she added. "Often, they are labeled with 'Draft: not for circulation' because they are for a limited audience. Or they might be labeled 'Draft: not for further dissemination' or 'work in progress.' People typically, if the work is not ready for circulation, don't use the Web as the way in which they disseminate it to a subset of peers who are commenting on a draft."

Goldstein, on the other hand, said that during his time as an edi-

"There are standard conventions about how material in draft form is supposed to be labeled, and if the information is not intended to be published or circulated widely, people put it behind a password on a Web site or they disseminate it in other ways."

CRISTLE COLLINS JUDD DEAN FOR ACADEMIC AFFAIRS

tor for the "Review of Radical Political Economics," he frequently came across incomplete citations that were usually fixed by communicating with the author.

"I've served on the editorial board of this journal for six years, and you're getting incomplete cites and table citations all the time," he said. "What you do is say, 'How about completing this cite?"

Moving forward -

Goldstein said that his relationship with his colleagues and students would probably not change significantly after a decision was reached by Mills.

"I'll have a sour taste in my mouth with respect to the process and the administration," Goldstein said. "As for my colleagues—particularly those in my department—this is just a research project that I'm working on. It doesn't really affect them, and I don't expect there to be any kind of fallout or change."

STORES CONTINUED FROM PAGE 1

first-quarter performance, it's with good reason.

"My business has not declined," said Sachs. "I think our price point works for people."

Meanwhile, Bowdoin students are certainly conscious of changing times, but generally seem insulated from the carnage. Thanks to the weakened allure of downtown Brunswick relative to the more affordable comforts of campus, the Bowdoin Bubble is stronger than ever.

"Fridays, this used to be like a Bowdoin dining hall," said Sachs of Big Top. Since the beginning of the academic year, "we're not seeing that anymore."

Still, the deli sees strong weekend business from students.

"The only reason we're open here on Sundays is because of Bowdoin. If you guys move, if Barry decides to pick up the campus, we're following."

The story is a little different at Scarlet Begonias, where Bowdoin business has fallen no faster or slower than the rest.

"It's representative of what's going on with the economy," said Lavallee.

Tajuana Fulton '12 said she has increasingly been shopping online or at big retailers like Wal-Mart.

Of local businesses, she said, "They're really small, eclectic shops, but their prices are higher."

Sachs noted that when food costs rise, he has little flexibility in his own pricing at Big Top.

"Prices have gone up more in the past 18 months than in the previous 10 years. Bread alone went up 30 percent in a year, but we didn't raise our prices."

This is due to both a need to keep customers happy and the simple fact that a massive painted menu is an awful hassle to change

an awful hassle to change.

Thanks to the sign, "It would

probably cost me \$500 to raise prices!" said Sachs. Still, "I have options. We have wiggle room."

Josh Davis, co-founder of The Gelato Fiasco, explained that the gelateria is compensating for the economic decline with smart, frugal behavior. The Fiasco is reaching out to more customers and ensuring they want to come back.

"Last year I took weekly outings to The Gelato Fiasco, and this year that has decreased," said Allie Wilkinson '11, blaming a heavy workload as much as the economy.

Wilkinson, though, seems the exception to the rule. "We're a fairly young company and we've been going through a lot of growth," said Davis. "Our numbers have always been improving since we started," in August 2007—four months before the National Bureau of Economic Research now says the recession heean.

began.
Customer behavior has changed noticeably—more people are paying in cash, said Davis, and he hears fewer customers talking about dinner plans. Moods are shakier too, leaving a smaller margin of error in customer service. But tight wallets aren't keeping them away from "a treat that, while not cheap, is affordable."

while not cheap, is affordable."

Still, said Davis, "I see a lot of businesses that I really worry about."

Grand City Variety, Sweet Leaves Tea House, Hattie's Ice Cream Parlor, Maine St. Art, and Book Land are just a few of the names to have fallen off the face-of Brunswick recently, but there will be more.

Having just seen CyberLANd join that list, owner Keith Lemay warned, "We won't be the only ones before this is all over."

, "I think most people want to put on a good face and say they're doing fine," said Sachs. The reality may be harsher.

Lemay bore it all with a grin and a sad laugh. Asked about the role Bowdoin students played in Cyber"Fridays, this used to be like a Bowdoin dining hall, we're not seeing that anymore."

TONY SACHS
OWNER OF BIG TOP DELI

LANd's business, Lemay said, "Never saw 'em. Not a one."

"It was 40 percent of my revenue when I did my research. Apparently I grossly overestimated," said Lemay. "The college campus, from what I've learned, is entirely self-sufficient. It seems you guys don't need to come off-campus for anything."

"I'm jealous, actually," he said. While appreciative of the administration's efforts at outreach, Lemay was critical of Bowdoin students for not seeing the world around them

"It happens with all colleges. Colleges think they are the town. But if the town suffers underneath the college, eventually the school will suffer too."

Lemay implored students to try to support local businesses as much as possible. When purchasing a toy for his child recently. Lemay opted for a local merchant when he could have saved five dollars by shopping online.

"I don't want to do that. I want to buy it from him, because he lives in Brunswick. That's why Grand City closed: 'Oh, we'll just go to Wal-Mart"

Seniors Michael Krohn and Casey Latter are taking the buy-local mentality to heart.

"I try to support local businesses. I stopped going to Wal-Mart. I've tried not to tighten my spending too much," said Krohn, who admits that having a job for next year allows him to spend when others might be more pressured to save.

"Wal-Mart sucks," added Latter. Tim Fuderich '10 said, "I'm not nearly as thrifty as I should be. If anything I've been spending more." The Little Dog Café and the BoGRAND
RES

SIGNS OF THE TIME: A mainstay on Maine Street for more than 15 years, Grand City Variety closed its doors last December. In this fragile economy, many independant Brunswick businesses have worked to remain relevant to customers who can easily frequent less expensive chain stores.

hemian Coffee House both said customer loyalty has allowed them to perform better than most. At the latter, patron Tony Soper described how he has been known to walk miles in heavy snow to reach the Bohemian.

"They said 'you walked right past Starbucks!' I said, 'I know! I'd walk 20 miles past # Starbucks to get to the Bohemian Coffee House!""

Of the area in general, Soper said, "I haven't seen the devastation they predicted."

The devastation could be yet to come as Naval Air Station Brunswick (NASB) completes its shutdown. At 10 p.m. on January 29, 2010, the runways will close, said NASB Director of Public Affairs John James.

Once the second-largest employer in Maine, according to GlobalSecurity.org, the base was a casualty of the 2005 Defense Base Closure and Realignment Commission Report (BRAC).

The Pentagon hopes BRAC could save almost \$50 billion over 20 years, but the good news rings hol-

low to a town losing 5,000 jobs.

"It's going to get worse before it gets better," said Sachs. He estimates the base directly accounts for around 10 percent of his business, but notes that the true impact of the Navy's departure is harder to measure.

"If they go buy gelato, and Josh and Bruno have profit, then Josh and Bruno can come here for lunch." he said.

Ever the optimist, Davis remains unfazed by the closing. Past the short-term impact, which he acknowledges will make for a tough transition, Davis even sees an opportunity for more high-paying jobs to move in.

"We've been planning for it," he said, noting the six years of warning. "It doesn't need to be treated like a crisis or anything."

"Brunswick keeps its integrity pretty well," said Lavallee. "I think it'll continue to be exactly what we want it to be."

"I would not want to be anywhere else," said Sachs. "This is my home and I'm gonna stick with it."

NEWSPAPERS CONTINUED FROM PAGE 1

ert Long, managing editor of the Times Record in Brunswick.

Traditionally, newspapers ex-pected to receive 70 to 75 percent of their revenues from advertising sales, and 25 to 30 percent from cir-culation. Across the board, Maine editors have seen classified advertis ing decline drastically as jobs, real estate, and for-sale listings move to specialized Web sites. According to Rex Rhoades, executive editor of the Lewiston Sun Journal, this is leaving some newspapers without 15 to 30 percent of the revenue they once de-

Where newspapers used to have a monopoly, we've lost a slice of that market, and I don't think we will ever get as much revenue or monopolize that market like we used to," said Rhoades.

Declines in readership

In addition to declining revenue from advertising, newspapers have been seeing a steady decline in print readership for years.

A recent Portland Phoenix article, citing reports from the Audit Bureau of Circulations, explained that in the past eight years, the Portland Press Herald has lost 16 percent of its subscribers, and the Bangor Daily News has lost 15 percent, compared to the Boston Globe's 24 percent decline. In the eight-year period from 1996 to 2004, the Lewiston Sun Journal lost 19 percent of subscribers.

Conrad, executive editor of both the Kennebec Journal and Morning Sentinel, estimated that print readership has declined between 1 and 3 percent a year for his papers. Rhoades suggested that nt readership has been declining at these rates across Maine dailies for the past 10 to 15 years, with faster rates of decline in other states or more metropolitan areas.

According to the Audit Bureau of Circulations, the Portland Press Herald is Maine's biggest daily pa-per, averaging 64,575 weekday

readers and 100,454 for the Maine Sunday Telegram. The Bangor Daily News attracts 55,951 readers on weekdays and 64,575 on weekends, while the Brunswick Times Record reports 9,070 weekday and 11,057 weekend readers. Conrad reported a combined circulation for his papers of about 32,000, noting that the Lewiston Sun Journal is not far behind.

While print readership is down, Conrad pointed out that between April 2007 and 2008, online readership of the Kennebec Journal increased by 90 percent. Rhoades said the Sun Journal's online page views are up 35 to 40 percent. Maureen Wedge, vice president of human resources for the Sun Media Group, said that with online and print readership combined, "there have never been so many readers perusing our news and information

"The problem is, on the print side, revenue is declining much more quickly than it's increasing on the Web side. That's a problem for every Maine newspaper," said Rhoades.

The Internet's profit paradox

For newspapers across the country, the Internet is both the problem and the potential solution. newspapers may currently be losing money with free readership online, and losing revenues as advertising moves elsewhere on the Web, it also presents an opportunity to reach der audiences.

"We continue to experiment with ways to use online media to enhance our product, but in a way that doesn't undermine our ability to stay in business. It seems to me that newspapers jumped in the 1990s to post content online without fully contemplating the impact that would have on revenues and reader habits," said Long.

John Porter, editorial page editor the Portland Press Herald, said that right now, with so few barri-ers to entry and low costs to go on the Internet, newspapers face a of competition, making it hard to charge for content. The economic theory, he said, is that these marginal competitors will drop out, sources will consolidate, and newspapers will

be able to charge for content.

Maine editors said they are working to embrace and improve their paper's online media, offering more equent updates, as well as audio video broadcasts to compete with television news stations.

"The theory is, OK, we're going to hang in there until those prices firm Porter said. "Surviving in the meantime, I think, is showing to be a real challenge, especially given the challenges of the current economy.

While declines in advertising and circulation are significant, many Maine newspapers are still generating enough revenue to cover their operating expenses. Porter said that the real financial strain is coming from the debt structure involved

with these newspapers.

He explained that in past years, newspaper companies were sold for uch more than the actual value of their assets or normal profit returns-sold for their "good will" on the theory that, as strong monopolies on news generating more profits, they would be leveraged over time. Under today's economic stressors, however, newspapers have not met their financial expectations, and their goodwill value is gone.

w, with huge debts and financial obligations to shareholders, many newspaper owners are at a loss to make their payments, and have turned to closing down or selling the papers.

Last year, the Seattle Times Co.,

owned by the Blethen family, decided to sell its Maine media properties, including the Portland Press Herald Kennebec Journal, and Morning Sentinel. A Press Herald article from March 2008 estimates the Blethen family may have paid around \$200 million for the papers in 1998

Details about any negotiations or buyers have been limited, though there were talks of an investment group seeking to buy Blethen Maine Newspapers for a "bargain basement price," according to a March 2009 article in the Morning Sentinel.

Porter said that for the industry to survive, two things must happen.

First, while it may not be easy, struggling newspapers need to figure out a way to get rid of their debt, even if it means being sold or declaring bankruptcy. Second, newspapers must figure out a way to make the Internet profitable. Along the way, marginal costs can be cut as neces sary to make ends meet.

With uncertainty about the future, Maine newspapers share the economic plight of the nation, and they are looking to cut costs in the short term. Woodward said that many papers nationally have undertaken wage cuts, and staff sizes are down throughout the state.

"Like virtually every other paper in Maine, we've had to elim a few positions and, as a result, re-think the way we can best allocate resources to meet readers' and advertisers' needs," said Long.

Newspapers are focusing on de-livering local stories, and collaborating on statewide stories. Long explained, "Maine daily newspapers compete marginally for statewide stories, but for the most part, the relationship between the dailies is now more cordial than competitive."

He said that the Press Herald once maintained a bureau with two fulltime reporters at the Times Record. and similar bureaus in Augusta, Bath, and Biddeford, but they were closed in July 2008. Now, five of the state's daily papers, including the Press Her-ald, Kennebec Journal, and the Bangor Daily News, collaborate and share

tories, rather than compete.

When Conrad tried to imagine scenario in which one of Maine's dailies went under, he said it would be difficult for another daily paper to step in and take its place. Due to the geographical separation and lack of verlap between papers, the costs of hiring reporters, maintaining cover-age hundreds of miles away, and printing and transporting the papers each day would be too great.

Woodward expressed concern

that without local, daily news, "people will lack a common base of information on which to base public policy decisions and conduct a pub-

lic dialogue."
Similarly, Long said that he doesn't see television news or blogs as "vi-able competitors" for Maine newspapers yet, who often "repackage the work of print journalists" and "lack the ability to provide the depth of coverage" the newspapers do.

Conrad agreed, stating that news stations don't have the same "reporting firepower" that daily newspapers

"if we're not covering it, really nobody's covering it," he said.

Certainly, editors have expressed their concern about the industry's stability and what's to come next. Conrad admitted that it's "awfully scary reading and hearing about these papers closing," and Rhoades said that it's a "really scary time, but a really exhilarating" one as well, with the possibilities for change to come.

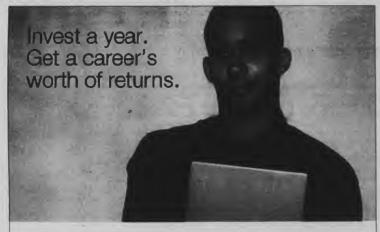

Woodward drew a comparison to the perfect storm hitting news-papers right now, with a decline in advertising, readership, younger readers, and a bad economy. Long compared what's happening now to the railroad industry 100 years ago, threatened by first cars and later airplanes, but still here today.

"The railroad industry went through a significant and often painful restructuring, but it did not die," he said. "I see newspapers now to be at the same crossroads that the railroads were at a century ago."

Porter said that the good news, and the optimistic line in the industry right now, is that there still are readers, people are still inter-ested, but there's just trouble to be worked out with the economic

Until then, editors are hopeful they can hold out in the turbulent economy.

"Maine dailies are, by and large, community newspapers—and I firmly believe that they will retain their value, if not expand it, as part of a national re-examination of the value of community," said Long.

An intensive, one-year Master's program, designed to accommodate students with title or no previous experience or coursework in Computer Science, the CSPP provides an up-close, in-depth perspective of the current art and practice of computer. Science fundamentale and the requirements of business today, the CSPP provides the instruction and training essential to harmoseing new technologies and putting them to use in real-world environments.

FINANCE CONTINUED FROM PAGE 1

tract some new students, but also will probably cause some students who might otherwise minor in economics, or choose economics as a second major, to instead minor in economics and finance," said DeGraff.

"I think that it is pretty cool that Bowdoin is adding this as a minor. I think it is a way for econ majors to focus on a more specific area in their studies," said Chelsea Young '11, who plans to double major in economics and mathematics with a minor in Spanish

"I think that for students who aren't very interested in econ, they can still learn about 'business' and how money works without having to major or

minor in econ," said Young.
Students may be especially attracted to the new minor in light of the global recession.

"I think that understanding finance and the economy is always important,

but I think at this point in time a lot more attention is definitely being paid to the economy, so more people might be interested in it," Young added.

However, the economics department does not intend to add a finance major in the future.

DeGraff explained, "Too narrow a focus on such a topic, just as too narrow a focus on any number of topics, would likely be considered by many to be contradictory to the philosophy of a liberal arts education

According to DeGraff and De-Coster, economics majors who satisfy the requirements for the combined finance minor will be given formal wording to indicate on their diplomas and resumes that they have completed these requirements.

For the time being Professor De-Coster will remain the only professor teaching finance.

The minor in economics and finance will be included in the course catalogue for 2009-2010 and will go into effect next academic year.

Experts help seniors prepare for post-grad financial realities

"It's never too soon to start thinking about saving for retirement," proday to a room full of groaning seniors at the workshop "Beyond Bowdoin: Living on Your Salary and Building Wealth after Graduation.

While many seniors are faced daily with questions like, "What are you doing after graduation?" and "Do you have a job yet?" Michaela Cavallaro, a freelance writer specializing in finance, began last Tuesday's workshop by asking a differ-ent type of question: What are your conabout life after college?

"Getting laid off," contributed by one audience member, was supported by a chorus of other fears, including managing the expenses of city life and "figuring out how to start a business.

Beyond Bowdoin" seemed to be an especially appropriate event considering the ailing state of the job market and the limited prospects many se-niors are facing after graduation. Ap-proximately 30 students attended the workshop, which was held in Moulton

Union's Main Lounge.

Cavallaro advised the audience to "make sure that your spending is in line with your priorities because that's really easy to get out of whack."

In order to practice prioritizing, each attendee took about 10 minutes to complete a worksheet which outlined the average expenses for a young per-son living on a \$30,000 a year salary in Portland, Maine. The worksheet forced attendees to think about choices, like whether to have a roommate or not, ether to buy groceries at Hann or Whole Foods, and whether to take a trip to Boston or rent a movie instead. The atmosphere was relaxed as students compared notes; most participants came out with a little money to spa

She warned seniors to anticipate the difference between budgeting in college and in the "real world" where "the safety nets get a little farther apart." She suggested writing down all expenses and categorizing them in order to find out exactly "where the money goes." Tools like Quicken and Microsoft Money can help with this task.

Cavallaro tailored her advice specifi-

cally to recent graduates and stressed the importance of saving immediately.

"You can make a really significant difference in your long-term finances when you invest at a young age and that's mostly because of compound interest," she said.

She had plenty of recommendations about how to save, including taking advantage of the free financial planning and 401(k)-matching benefits many

companies offer employees.

Cavallaro was followed by William Lund '77 who focused his talk around "helping [seniors] to avoid the negative." As the Superintendent of the Maine Bureau of Consumer Credit Protection, his job is to "help people for whom things have not gone the way they intended."

Above all, he warned the audience to always be alert when dealing with their

"If they say I'm here to help you," they're not. They're here to help themselves," he said.

Lund stressed caution when dealing with the now ubiquitous credit card. He cited the 1960s and 1970s as a time of truth in lending and fair credit reporting, but differentiated that "the nly rule about credit cards right now is that there are no rules."

He recommended that students use credit cards issued by local banks because "where there's face-to-face contact there's accountability. And there's very little of that in the credit card in-

He highlighted the importance of reading the fine print "with a magnify-

There's a reason that fine print is fine," he said. "It's because someone

doesn't want you to read it."

He advised that students pay off their student loans as soon as possible and discouraged the audience from cosigning based on a romantic relation-ship: "One word: don't," he said.

The workshop was well received by

"It was helpful," said senior Willy Wilder. Rather than providing an "exact procedure" for his future spending, Wilder said Cavallaro and Lund "answered questions that I had, and now what I need to think about, at

BSG addresses SAFC budget, funding issues

BY NICK DANEILS ORIENT STAFF

Bowdoin Student Government (BSG) worked through a number of proposals at its Wednesday meeting and learned that the Student Activities Funding Committee (SAFC) was in need of a bailout.

BSG Treasurer Ugo Egbunike '09 announced the SAFC was short on money, and would seek supplementary funding from College Houses class councils

"The three underclassmen councils...we ask that you give \$1,200 each," he said. "Spring Gala costs around three times more than it usually does-\$24,000. There have also been a lot of mistakes that club leaders have made this semester, and we have covered for them."

Egbunike explained that due to fire codes and construction near Morrell Gym, the Gala would be held in Farley Field house.

"There has to be a dance floor set up, along with moonlight, and the dining charges are at least 50 percent more because the food has to be transported," he said. "Because of all that, the cost is at least three times more. It caught us a bit off guard, and because of bailing out the Bowdoin Outing Club, we are a little over where we should be. More than likely we will be fine by Monday though, after the classes and social houses help out."

Egbunike carefully avoided assigning blame for the situation. "It really isn't any one person's fault,

BSG President Sophia Seifert 09 said that the situation with the SAFC was not a serious issue.

"The funds distributed by the SAFC exist solely for the purpose of funding student activities," she wrote in an e-mail to the Orient. It is not a savings account or endowment...so when the money is given away it means SAFC is doing its job."

In other business, a funding proposal to provide refreshments at Ivies—one that has been in the works for several weeks-was

FINE PRINT: John Connolly '11 and Sophia Seifert'09 review the agenda at Wednesday night's BSG meeting. BSG pass a funding proposal to provide refreshments at lyies.

Vice President of Student Affairs Carly Berman '11 said that final plan was to host two events during Ivies weekend: the first on Friday in the Farley parking lot, the second on Saturday at Pine Street Apartments. "We are asking for up to \$3,000 to spend on both nights," she said.

BSG also approved \$700 in fund-ing for additional subsidized movie tickets and passed a proposal to spend \$400 on free massages for students during reading period.

Although SAFC is facing a shortfall, Vice President for BSG Affairs John Connolly '11 expressed confidence that BSG would not end up in similar straits.

"BSG's spending plans depend on what the members of the assembly vote for, but right now it looks like we're going to be spending a significant portion of our remaining funds on providing food, drink, and possibly some fun BSG-brand-ed items during Ivies," he said in an e-mail to the Orient. "We're going to continue subsidizing movie tickets for the last few weeks of school,

provide \$10 for copies to every candidate in a BSG or Class Council election, ensure that newspaper delivery continues until the end of the year, and host at least one more Campus Conversation... At the moment, it looks like we will spend all the money we have in our budget, but I'm keeping a close eye on things, and we are not in danger of overspending."

"Since all accounts reset every year, we should try to spend all the money we have on things that will benefit students and the campus community," Connolly added.

The assembly also voted on a constitutional amendment requiring the Campus Activities Board (CAB) representative to BSG to be elected by the student body, rather than by members of the CAB.

Because amendments to the BSG constitution require support from four-fifths of the entire membership of BSG, the proposal failed due to the fact that Berman abstained and several representatives were out of town.

BOWDOIN BRIEF

Karen Gordon Mills confirmed as SBA chief

Karen Gordon Mills, wife of President Barry Mills, has been unani-mously confirmed by the U.S. Senate as the administrator of the Small Business Administration (SBA).

After being recommended by the Senate Committee on Small Business and Entrepreneurship on April 2, the full Senate confirmed Mills late last Thursday, April 3.

In her confirmation hearings with the small business committee, the Wall Street Journal reported, Mills outlined her initial priorities for the SBA.

According to the Journal report,

Mills said she would try to use money from the stimulus plan to bolster SBA programs that provide loans to small businesses. She also said that she planned to implement new technologies and bring in new staff, and that she would work with other govern-ment agencies that also deal with small

At the beginning of the hear-ing, Committee Chairwoman Mary Landrieu (D-La.) said that she and Maine Senator Olympia Snowe (R-Me.) had written a letter to President Barack Obama suggesting that he elevate Mills' position to the cabinet level. President Obama has not yet re-

SECURITY REPORT: 4/3 to 4/9

Four students took responsibility for hosting an unregistered event in the basement of Reed

An intoxicated student found in the restroom at Thorne Hall was evaluated and then brought to his room at Coleman Hall, under the supervision of a fellow student.

Two students took responsibility for an unregistered event in the basement of Brunswick Apartments R.

• Three vehicles parked at Brunswick Apartments had damage done to their registration plates, which were bent. One plate was missing and later found.

 Dining staff at Magee's Grill reported the theft of a large fourwheeled dolly from the Union loading dock. Security investigated and recovered the dolly at Osher Hall. A student had borrowed the dolly, without permission, to move personal belongings.

An intoxicated Bates College student was removed from the Wale concert at Morrell Lounge after he was seen spitting at performers on stage. The uncooperative student was issued a criminal trespass warning and ordered off campus via the limousine that he and other Bates students arrived Bowdoin Security contacted Bates Security and forwarded a report to the Bates dean of student affairs.

Saturday, April 4

 A first-floor Stowe Inn student reported that toilet water was leaking into her room through the ceil-A security officer responded and found the source of the leak to be a second floor bathroom containing an intoxicated student having difficulty with an overflowing toilet. Housekeeping was called in for clean-up duty.

 A student with a lacerated toe was transported to Parkview Hospital.

· A door panel at the west entrance to Coleman Hall was vandalized.

 Jack Magee's Pub staff reported that two kegs were tampered with sometime after the Wale concert ended

Sunday, April 5

Two alcohol policy violations involving hard liquor were reported at Ladd House

Security checked on the wellbeing of an intoxicated student at

Appleton Hall. A hospital transport was not required.

· Students at Crack House re ported that an intoxicated female student needed assistance. Security responded and transported the sick student to Parkview Hospital.

Tuesday, April 7

· A Climate Day banner that had been hanging on the west wall of Thorne Dining Hall was reported missing.

Grounds personnel reported finding hypodermic needles in the parking lot area at Sid Watson.

• Burning incense was apparently the cause of a fire alarm on the second floor of MacMillan House. fire department also reported that blocked doorways in the building constituted a safety hazard.

• A student reported safety con-cerns regarding the behavior of an-other student. The matter is under investigation

Thursday, April 9

· A false gas detection alarm was activated in the bakery at Thorne Dining.

Gunther '09 brings Baltimore to light through poetry

BY MARY HELEN MILLER ORIENT STAFF

When senior Kristen Gunther peruses the U.S. travel section in a bookstore, she usually notices that one section is conspicuously missing.

"You get down to Philly, and it skips right down to D.C.—there's nothing on Baltimore," she said.

Gunther, a Hydes, Md., native, said that most people know Baltimore as the setting for the popular TV crime shows "The Wire" and "Homicide: Life on the Streets." However, she aims to bring a new kind of attention to the city through her senior honors project. She is composing a book of poems, written either explicitly or indirectly about Baltimore. The book, which will be about 75 pages long and titled "Mobtown", will include poetry and prose poetry of various styles and lengths.

In addition to wanting to give Baltimore more deserved attention, Gunther said she chose to write about the city because of her family's rich history there. Both her mother and father grew up in the city, and she is the fourth generation of her family to live in the area.

"Pretty much everybody I'm descended from got off the boat in Baltimore," Gunther said.

Gunther began her project working mostly from family stories and personal experiences, which inevitably overlapped with stories of the city itself. She decided to broaden her topic and write about Baltimore through the lenses of its people and history. She said she has had an abundance of material to work from.

To inform both the style and content of her writing, Gunther, an English and Environmental Studies "It's a place with a million different stories, in some sense you think of it as fractured."

KRISTEN GUNTHER '09

double major, has read works by other authors, such as Seamus Heaney and Derek Wolcott, and conducted research on the history of the city. She also interviewed relatives and a number of other people about their experience and knowledge of Baltimore. Among her interviewees were a man who hosts a weekly radio segment on Baltimore history and a former mayor of the city, Tommy D'Alesandro III.

One of Gunther's poems is about the cathedral in Baltimore where her parents were married and her siblings were baptized. She wrote the poem based on a story that her grandparents told her about why it was built. In 1904, the Great Baltimore Fire swept through the city, destroying huge sections of town. According to the story, one shop owner saw the flames coming toward his store, and he pleaded with God that if his building were saved from the fire, he would build a cathedral in return.

"Everything around was charred and burned, but his store was absolutely fine," Gunther said, adding that she has seen photographic evidence of the store's survival.

So, when the shop owner died, he willed a large sum of money to the Archdiocese of Baltimore, with specific instructions to build a cathedral. By writing the story of this legendary cathedral, Gunther is able to weave her personal and family history into the fabric of the city's history.

"The story of my parents is in the book," she said, explaining that she has invoked many of her rela-

MARY HELEN MILLER, THE BOWDOIN ORIEN

MAPPING IT OUT: Gunther's collection of poetry features the city of Baltimore, a map of which inspires her next to the desk in her room.

tives as characters in the poems.

Gunther also cited her experi-

ence studying in Karatu, Tanzania, last spring as influential in her thinking about Baltimore. "I thought a lot about colonialism," she said.

While colonial Tanzania was very different from colonial Baltimore, Gunther said that the concept of colonialism has informed the way she thinks about the crosssection of different cultures in present-day Baltimore. "There's a similar meshing of different traditions," she said.

This phenomenon of distinct populations residing in the same city is the overarching theme of Gunther's book. "Its really interesting to take those pieces and tell a big story," she added.

Gunther keeps a map of the city hanging on the wall in her dorm room, next to the desk where she does much of her writing when she's not working at the beach or in downtown diners. She uses the map as a visual aid to consider the different experiences and histories of people in various neighborhoods. "It's a place with a million different stories, in some sense you think of it as fractured," she said.

Gunther takes on a variety of voices in her poems, sometimes telling stories from the perspectives of historical figures like Edgar Allen Poe and Johns Hopkins. In other instances, she uses a more familiar voice. "The guy hailing the cab might have an interesting story to tell, too," she said.

Gunther will spend the next few weeks finalizing the book before presenting it to a committee in the English department for evaluation in early May. Gunther does not have concrete post-grad plans at this point, but she doubts she would ever make a living writing poetry.

"You can't really have a career in [poetry]," Gunther said, adding, "Wallace Stevens was a lawyer."

Still, Gunther knows that writing poetry is not something she

will give up.

"It's a life pursuit, it's not something you stop doing," she said.

the centerboard caught the watery weeds

Shadow breaks across humn

Shadow breaks across hummocky fields, darkening tall grass to a churning sea: do land and sky make their own horizons? And what give's light its gravity?

Honest dialogue is the key to 'counteracting unhelpful and fake perceptions of sex'

BY JULIA BOND

When it comes to talking about sex, people often feel comfortable staying quiet. We accept sex as a taboo subject and keep our own sexual realities and experiences to ourselves. We have questions that we never ask. Though this might have been the norm in American society for some time, our culture is heading in a direction that requires us to reassess our perceptions on how we discuss sex.

Our generation is riding the wave of a cultural shift, especially regard-ing sexuality. We have inherited the changes initiated during the sexual revolution in the 1960s, when birth control, nudity, premarital sex, and enjoyable sex began to be integrated into mainstream culture. We are al lowed, and in some cases expected, to enjoy our freedom of sexual expression. We are also coming of age in a time when media, including movies, television, and the Internet are introducing sex and concepts of sexuality to an increasingly younger audience. In music videos, romantic comedies, and even video games, clothes are being removed, and sex is being discussed or implied. Popular music, despite radio editing, often makes thinly veiled references to sexual acts. While there are benefits to living in a society where sex is increasingly becoming more mainstream, there are definite downsides.

Even though our pop culture pounds us over the head with sex, there is rarely any real information provided about real sex and sexuality. In movies, perfect-looking peo ple with superficial and easily surmountable relationship spats have perfect, pleasurable sex without ever once talking about it. In music videos, more beautiful people, who are supposedly seizing control of their sexuality, sing about sex, take their clothes off and grind on each other, and, occasionally, on inanimate objects. People watch these things and think that they are learning about but they are not. Hollywood and MTV's interpretation of sex is designed to sell movies and music. It is not designed to encourage healthy and positive sexual experiences, nor is it designed to give people the in-formation they need to make their own decisions about sex.

This is why it is so important for our generation to promote open dialogue about the realities of healthy sex and sexuality. For every rapper singing about some shawty "going down" or "licking the rapper," there has to be someone putting out helpful, informative, and real information about sex and sexuality. For every music video depicting two people meeting at a club and going home together, there has to be someone providing information about what that actually means. In our hyper-sexualized pop culture, nothing could be more dangerous than to let glamorized, airbrushed notions of sex run rampant while trying to filter out accurate information in the name of propriety.

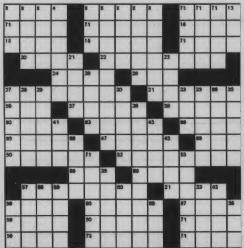

Pop culture is getting closer and closer to the continually receding line of appropriate sexual content, and, since sex sells so very well, it is unlikely to stop anytime soon. We need to begin to supplement this culture with accurate information about sex, instead of trying to pretend it doesn't exist. Sex is real and it happens, ask any American teenager who has listened to American Top 40 on the radio or watched "Gossip Girl," or even Fox News, for that matter. Our role in this evolving culture is to make sure that people have access to

helpful information that will enable them make their own healthy choices about sex and sexuality. Open, honest dialogue about sex is the only way to do this.

Promoting healthy dialogue about sex is not always popular. It is easy to vilify those who are frank about this traditionally off-limits topic. But we, as the generation who grew up in the age of the Internet, the sexualized media, the Clinton scandal, and so much more, need to get past this. Thanks to the sexual revolution in the '60s, we don't have to fight for the societal acceptance of free sexual expression. We are allowed to choose whether or not to have sex, when, and with whom. Our challenge is going to be counteracting unhelpful with honest dialogue. As the media and pop culture get more cavalier about showing sexual images in the name of selling products, we have to be prepared to be honest. I mean, do we seriously want to let Britney Spears be in charge of setting our society's sexual standards? I didn't think so.

ORIENT.BOWDOIN.EDU

GARDEN

CONTINUED FROM PAG

of Dining & Bookstore Services Mary Lou Kennedy, sticking to a schedule is important because "when you're serving 20,000 meals a week you really need to know you're getting the product you ordered."

Steven Kolberg '09, who interned at the garden last summer, said that the institutional nature of the dining halls sometimes conflicted with the realities of an organic farm. He said that the kitchen is "an efficient machine," and "sometimes it's too much of a pain" to accommodate "a big influx of a lot of produce at once."

When there is excess produce that the dining hall cannot use, it is donated to the Mid Coast Hunger Prevention Program or sold to faculty and staff during the few weeks in August when there are no summer programs on campus. Kolberg wondered if providing training that focuses on accommodating large quantities and unusual types of food, or allowing garden staff to have a farm stand all summer would eliminate "produce dumping," something he saw happen on occasion.

Kolberg would like to see the Dining Service increase its commitment to local foods, and thinks that the garden has "a tremendous amount of potential if it was taken a bit more seriously by the College administration." He cited a greenhouse, more land, or simply hiring more student employees as ways that the garden could play a bigger role in Bowdoin's food supply.

"It doesn't have to be technology," he said.

At the same time, Kolberg wondered if increasing the size of the
Garden was the most efficient way
to increase the quantity of local
foods offered in the dining halls.
In his senior environmental studies seminar, "Food and Agriculture," Kolberg and his classmates
are working to determine "where
you get the most bang for your
buck from local foods within that
budget." Kolberg said it might be
more economically advantageous
for the College to shift to purchasing more local Maine produce instead of increasing the garden's
size or output.

According to Creswell, "The College has proved to me over and over that [it] supports [the garden] ideologically if not economically." Recent cutbacks in the Garden's budget reflect this sentiment. The new farm manager will not enjoy the same benefits package that Creswell had for two of her four years at the College.

"We don't like it but it makes [economical] sense" from an economic perspective, said Kennedy, "When Katherine started she didn't have benefits, either." Creswell expressed concern that the garden manager position is less attractive now, but so far 13 people have applied for the job.

plied for the job.

In spite of the absence of benefits, Creswell acknowledged that the garden manager position is unique in the farming world. For normal farmers, "if the crop fails, they don't get paid," but the security of being salaried lets Creswell take risks and experiment with planting in a way she would not have been able to do otherwise.

"I didn't risk any setbacks because I got a wage no matter what," she said. "It's a big safety cushion. That's why this job is fantastic in a lot of ways." The garden has provdided the dining halls with \$17,500 in produce value in the past two years—more than

they are spending on paying the garden manager for seven months and purchasing seeds, which are the only garden expenses covered by the Dining Service

Creswell said that on the whole, the College has increased its support for the garden over the past four years. Bowdoin "is taking pretty major steps to support the program that they weren't doing before," she said.

"There will be a greenhouse that is College-funded in the foreseeable future, and that wasn't the case two years ago," she said. But Creswell was unsure when the greenhouse would be built. Kennedy said that they had not decided where to build, and wanted to wait until the new garden manager was hired before proceeding. "Even if we had the money we wouldn't do it this year," she said.

Kolberg suspected that the current economic situation will stall any budget increases in the near future, and was surprised that the garden's funding hadn't been cut already.

"They are very satisfied with the budget for the garden right now," he said. "The only way to convince them is with serious economic benefits of doing so."

But according to Creswell, the garden already saves money for the Dining Service. According to her, the garden has provided the dining halls with \$17,500 in produce value in the past two years-more than they are spending on paying the garden manager for seven months and purchasing seeds, which are the only garden expenses covered by the Dining Service. All other expenses (tools, compost, are covered by the Student Affairs Funding Committee through the Garden Club. She suspected that a few key investments in the garden, like a greenhouse, could save the College more money. She acknowledged the high up-front cost, but argued that in time it would pay off, especially "if we're producing expensive tender baby greens all winter long

Because Creswell is the only paid garden employee in the spring and fall, she relies heavily on student volunteers to seed, harvest, and deliver produce to the dining hall.

"The volunteer base has drastically improved since I've been here," she said. She believes there are more students who want to work in the garden because "local organic has become a national topic."

"Four years ago there weren't students approaching me [to volunteer]," she said. According to Kennedy, student applications for the summer intern position have increased as well.

This summer the intern will be working with a new manager, and Creswell will be trying to buy farmland of her own. When asked if she was ready to start her own farm, she replied, "You're never ready, and you can never know everything. But just the fact that I'm motivated enough tells me that I'm ready."

She is not worried about leaving the Bowdoin organic garden, since "there are systems in place for the program to operate smoothly."

"I feel like it can take care of itself," she said.

ARTS & ENTERTAINMENT

Muses, love stories, and imagination abound at One Act Festival

If you had one act to tell your story,

hat would you say?
This week, three Bowdoin students, with the help of their peers, are answer-One Act Festival. Produced by Masque and Gown in collaboration with the Hunter Frost Fund, the festival gives student playwrights, directors, and actors a chance to showcase their work by completing the challenging task of performing a one act play. The festival is also a competition. The writer of the best play is awarded at Honor's Day and

Written by Kat Sherman '09 and directed by Cait Hylan '09, "grunge is dead" is the story of a girl struggling with the trauma of a failed relationship.

"It captures the experience of grief and loss, and how horribly indeterminate and cyclical it can be," Hylan said. "It's very sad-we cry in rehearsals a

Writer Kat Sherman draws inspiration for her work from everyone and

"Sometimes you get thematic things in your head first, sometimes it's a line, sometimes it's an image," she said. "I knew for this one I wanted a filthy apartment, a bowl of water, and increasing levels of desperation.

Like most who participate in Masque and Gown, both Sherman and Hylan have background in writing and

PLAY IT UP: Sam Waterbury '11 and Natalie Jimenez '11 perform the one-act play "grunge is dead" on Thursday night. The play was written by Kat Sherman '09 and directed by Cait Hylan '09 and is one of three plays being performed this weekend as part of the One Act Festival.

"I directed Kat's one act 'Gargoyles' our sophomore year, and worked on 'Taming of the Shrew' in directing class. with Professor Davis Robinson," said Hylan. "Then, I spent a semester offcampus studying at the National The-ater Institute in Waterford, Connecticut, and in St. Petersburg, Russia."

It's not only seniors vying for distinction at this year's festival. "Disconnected," written by Lara Lom '09, is directed by first year William Pugh.

"Though I've had plenty of acting experience over the years, this was the first time I've ever attempted to direct anything." Pugh said. "My time on the stage throughout middle and high ool has really helped the transition from under the lights to the director's chair fairly seamless."

While some first years might be int-midated by the idea of working with a

senior. Pugh was not. He was instantly at home with Masque and Gown, and working closely with the writer was an important part of his experience with the festival, according to him.

"Lara has been great in terms of letting me artistically interpret 'Disconnected' on my own," said Pugh. "Our one act festival is about the writing, and I want to do everything in my power to bring Lara's cript the recognition it

deserves."

The final piece that will be performed at this weekend's festival is "Writer's liverelli, '09 Block," written by Omm Lucarelli '09 and directed by Wesley Hartwell '11. Lucarelli described the piece simply as "characters come to life, chaos ensues."
Unlike some of the other writers who worked with their directors, Lucarelli has a different take when it comes to interpretation of her work.

My personal belief is that a playwright should generally have some dis-tance from the directing process, unless they are directing their own work," she said. "This allows the director to interpret and therefore direct the play according to his impulses and discre

Hartwell, who has a moderate amount of prior experience, credits his actors for the success of the piece. "Thankfully, my actors are really good at what they do, and they've been very supportive of my somewhat experimen tal style," Hartwell said. "As experienced actors, they have worked very well with me to bring this play to life through a healthy interactive process."

All three plays bring a different ele-ment of theater to this year's One Act Festival. Festival coordinator Susie Kimport '09 is excited to see the final product.

"This year, we are especially proud of the quality of all the one-acts and look forward to a great show," she said. The One Act Festival will be per-

formed tonight and tomorrow at 8 p.m. in Memorial 108 at Pickard Theater. The show is free and open to the public

Bowdoin professor chronicles life of original 'Cosmopolitan' bad girl

CAROLYN WILLIAMS

Helen Gurley Brown, former longtime editor of Cosmopolitan magazine, claimed that women who live on the edge enjoy long and exciting lives. No one's life is a better example of that philosophy than Brown's own.

In one of the first biographies even written about Brown, "Bad Girls Go Everywhere," released this month, Gender and Women's Studies Professor Jennifer Scanlon explores the stories philosophies, and achievements of one of the most controversial and influential women in postwar America.

The title derives from a quote of Brown's: "Good girls go to heaven. Bad girls go everywhere." Perceived as one of the bad girls by many second-wave feminists in the latter half of the 20th century, Brown expanded the horizons of women everywhere with her ideas about what being a woman meant.

"She thought makeup and mini-

skirts and heterosexuality were all wonderful and terrific," Scanlon said. "I think a lot of feminists disapproved of her approach to womanhood, so she had enemies among conservatives but she also had enemies among feminists.

Brown, who grew up during the Depression, started her career as a secretary in Los Angeles to support her mother and sister. After working count less secretarial jobs, she landed a job at

an advertising agency.
"Her boss let her leave her desk once a year and go write ad copy for Sunkist oranges and then go back to her secretary desk," Scanlon said. "She did that for three years before he let her do that full time

LIVING ON THE EDGE: Professor of Gender and Women's Studies Jennifer Scanlon wrote "Bad Girls Go Everywhere," a biography about Helen Gurley Brown, the long-time editor of "Cosmopolitan" magazine who encouraged women to have careers, relationships, and fun. The book came out this month.

of her generation. They were considered permanent secretaries," she added. "But she had a lot of gumption and a lot of ambition and she finally became the highest-paid female advertising copywriter on the West Coast."

In 1962, Brown wrote her first book, "Sex and the Single Girl," which encouraged women to enjoy the single life by dating men, pursuing careers, making money, and embracing their beauty. The book and its film adaptation were later part of the inspiration for the hit HBO series "Sex and the City."

"That's what really made her famous,"

Scanlon said of the book. "She parlayed that into the position of editor at 'Cosmopolitan' in 1965."

Brown was 43 when she became editor of "Cosmopolitan," and held the position for 32 years. At 87, Brown continues to be the editor of all international versions of "Cosmopolitan."

"Cosmopolitan' is still the best-selling magazine in coffege bookstores us-ing the formula that she laid out," Scan-

lessly supported work for women, "not just for money, but also for identity," Scanlon said. "She thought that women,

whether they were single or married, had to have some identity that belonged to them and she promoted that. She promoted an early version of what we now call self-help. Women needed to take care of themselves, not just men and children."

Scanlon's research specializes in consumer culture and women's magazines, so writing about Brown was a "natural progression" for her.

"I'm interested in the way feminist ideas are transmitted and worked through among women in the main-stream," she said.

While Scanlon admits that maga-

zines like "Cosmopolitan" may send blatant messages about "pleasing your man," an underlying message exists in their pages as well.

'What I argue about 'Cosmo' is similar to what I argue about other mainstream magazines, which is that they have a veneer—that it's all about pleasing your man," she said. "But if you read carefully and you look below the surface, there are elements of empowerment for women in there."

This combination was championed by Brown throughout her career and brought her into contentious relationships with many prominent femi-nists such as Betty Friedan and Gloria Steinem. Her focus on the individual woman as well as her support of fulfill-ing heterosexual relationships and ap-preciation for feeling beautiful put her at odds with many ferminists of her day. but also helped usher in a third wave of feminism. Commonly known as "lip-stick feminism," it continues to thrive today, thanks in large part to Brown's

Go Everywhere" during her sabbatical in 2006-2007. She did much of her re-search at Smith College, which collect-ed Browns papers, including childhood letters, unpublished stories, and original manuscripts for her books.

"This book is less about her as a ce-

lebrity and more about her as a person," Scanlon said. "My intention really was to place her in the context of postwar American life because I think she's an important person in that context."
"Bad Girls Go Everywhere" is avail-

able now at www.amazon.com and at the Bowdoin Bookstore for \$27.95. It will be reviewed by the New York Times on Sunday, May 24.

With 'Recent Paintings,' Wethli brings a piece of Bowdoin to NYC

RACHEL GOLDMAN

With the opening of Professor of Art Mark Wethli's show "Recent Paintings" at RedFlagg Gallery in New York City, the Bowdoin arts continue to make a scene in the Big Apple.

RedFlagg Gallery, the product of Bowdoin professors Wethli and John Bisbee's inspiration and effort, exhibited works from another Bowdoin artist at its inaugural show. In February, work from 2001 alumna Cassie Jones' "Standard Deviations" was the first art to fill the space.

"RedFlagg Gallery is an outgrowth of the Coleman Burke Gallery in Fort Andross," said Wethli, who was approached with an offer for the New York gallery space by owners of Fort Andross who liked the way Coleman Burke Gallery was being run.

Wethli points to key differences between the two spaces.

"Coleman Burke's mission is to be a site-specific sculpture gallery," he said. "Artists are asked to come and look at the space and then design a piece that directly responds to that space. RedFlagg, on the other hand, is a smaller space. It's more ideal for two dimensional work and so its mission is really to show what's new in painting, works

OURTESY OF MARK WETHLI

CURRENT EVENTS: Professor of Art Mark Wethli's latest exhibit, "Recent Paintings," opens tonight at the RedFlagg Gallery in New York City. Wethli used old tables from Adams Hall as canvases for his work. The RedFlagg Gallery is a new gallery in New York opened by Wethli and Art Lecturer John Bisbee.

on paper, and new media, but on a smaller scale."

Coinciding with this mission comes Wethli's show, opening at

the gallery tonight. 4
"Recent Paintings" is composed of
30 of Wethli's paintings, a series he

has been working on since winter.

"It's hard to draw the line, however," Wethli said of his creative process. "The beginning of this series goes back two years, but the original inspiration—a trip to Spain—goes back 10 years. It was only this past November or December, though, that all these strands started coming together." Wethli's paintings hearken back

Wethli's paintings hearken back to traditions of art in Africa, Oceania, and the Americas, while at the same time pushing these traditions in new directions.

"I like to test boundaries and categories with my work," Wethli said. "In this case, the works are fundamentally abstract but there

DJs OF THE WEEK

Eric Binswanger '12 and Taylor Tremble '12

If you could only listen to one album for the rest of your life, what would it be?

EB: "The Soft Bulletin" by the Flaming Lips.

TT: "Houses of the Holy" by Led Zeppelin.

Favorite song to privately dance/ rock out to?

EB: I guess the one I should put here is Lou Bega's classic, "Mambo No. 5," but honestly I see no shame in that.

TT: "Blue" by Eiffel 65.

If you were in a band, what would it be called and what kind of music would you play? EB: We'd be called Best Boy

EB: We'd be called Best Boy Electric, and we'd be an acoustic ukulele quartet who played luau covers of '90s pop hits in the lobby of some luxury resort where we would get paid an exorbitant fee despite the fact that nobody is really listening to us at all. I'd have fun with it and start throwing in profanities, just to see if someone

would notice.

TT: I would be in Eric's band, but when the band inevitably split up due to its sheer ridiculousness, I would start a band called Aural Asphyxiation and would play straight up electronica all day everyday.

Theme song during Ivies?

EB: Easily the "Safety Dance" by
Men Without Hats, because you

can never be too safe during Ivies.
TT: "Double Vision" by Foreign-

er. Yes, Foreigner.

If you could meet any musician,
dead or alive, who would it be and
why?

EB: Kurt Cobain, so I could teach him to love.

TT: Charlie Parker. No explanation necessary.

Best new music you've heard

Best new music you've heard lately?

EB: A luau/hip-hop band called Reefer. Wow, I've been listening to them for over a week and I just got the pun in the title now.

TT: I'm going to copy Eric and

say Reefer as well. Hoorah for puns.

If you could time-travel back to

any musical period, where would you go and why?

EB: Just before Mozart, so I could publish all of his stuff as my own and then everyone in the future would be all into Binswanger.

TT: Well if I had to choose after Eric, I would go back to an earlier point so I could foil his evil plot and restore order to the musical galaxy, destroying his alternate 1984-like Back to the Future!

Bands/musicans who have most influenced your musical taste?

EB: Neil Young. TT: There are so many. The

Skatalites, Bob Dylan, The Who, to name a few.

"The Dan Halen and Scott Lee Crew Show" with Eric and Taylor airs Fridays from 11 a.m.-12 p.m. on WBOR 91.1 FM.

Preeminent Alessi jazz quintet to swing in Studzinski tonight

ANDY BERNARD

Ralph Alessi and his quintet, "This Against That," will fill Studzinski Recital Hall tonight with the jazz music that has made them some of the preminent jazz musicians in the Northeast over the past 10 years.

Alessi plays the trumpet and is one of the leading jazz trumpeters of his generation. He and the members of "This Against That", who have played together for five years, are all faculty members at the Brooklyn-based School for Improvisational Music (SIM). The quintet consists of Alessi on trumpet, John Hebert on bass, Tony Malaby on saxophone, pianist Andy Milne, and drummer Mark Ferber.

SIM was founded in 2001 by Alessi, who remains the school's director. The school was founded, as stated on their Web site, "for instrumentalists wanting to study jazz in all of its contemporary forms and implications." All of the faculty members at SIM are musicians independent of the school as well, enabling them to bring their performance experience to their teaching at the school.

On Friday and Saturday, Alessi and the other members of the quintet will be bringing that experience to Bowdoin classrooms as well in both group and private lessons.

"Basically we are trying to share our approach to improvising with some of the Bowdoin students," Alessi said. "What is that approach? To improvise spontaneously in the moment with an emphasis on intense listening as well as a necessity to creatively bring forth ideas that .best serve the unfolding music."

Each member of the quintet has been and continues to be active in performing jazz around the country and around the world.

Alessi himself has performed in

Europe, China, Japan, Cuba, Mexico, Korea, and Israel with the likes of Steve Coleman, Uri Caine, Don Byron, Fred Hersch, and Sam Rivers. He has five recordings to his name, and alongside his work at SIM, he has been on the jazz faculty of New York University since 2002.

Bassist John Hebert, born and raised in Louisiana, has experience with both the southern jazz of New Orleans and the northern style of New York. In 2006, he was featured on an album by Andrew Hill that was awarded Jazz Record of the Year by Doanbeat's Jazz Critics Poll.

Tony Malaby, the quintet's saxophonist, is originally from Phoenix, Ariz, but has been based in New York since 1995. His debut album, "Sabino," released in 2000, made the New York Times and the Philadelphia Paper's top 10 jazz lists for that year.

Pianist and Toronto native Andy Milne graduated from NYU in 1990 and moved permanently to New York one year later. He was voted "Rising Star Keyboardist" by the highly-respected Downbeat Magazine in 2004. His popular group Dapp Theory blends funk, hip-hop, and jazz, and have just released a new record. Drummer Mark Ferber is from

Drummer Mark Ferber is from San Francisco but currently lives in Brooklyn, N.Y. Though he teaches at SIM, he maintanes a busy playing schedule on both coasts, as well as in Europe. On Friday, Alessi and his quintet

On Friday, Alessi and his quintet will perform a set of Alessi's original compositions. Some of them will be from his first album titled "Look," while others will be from his newest record, which will be released later this year. The performance will also feature brand-new songs.

Alessi and his quintet will perform at Kanbar Auditorium in Studzinski Recital Hall tonight at 7:30 p.m. The concert is free and open to the public.

To beat the wheat, gluten-free beers quench with grass, rice

THE BEER GEEK BY MAC EVANS

Out of curiosity as well as by accident, I have recently tried a couple of beers that do not rely entirely on a wheat source. In the beer making process, a starch source is needed for a fermentable material and is a key ingredient related to the taste and alcohol content of the beer.

Typically, mashed barley is mixed with hot water to start the process and is then mixed with some other malted or unmalted substances such as wheat, rice, oats, rye, or even corn and sorghum. Barley malt is usually best to use, not only because it is easy to convert into a mash, but also because it is rich in amylase, which is a digestive enzyme that creates sugars from starch more easily.

Unfortunately, not everyone likes gluten products. Even if they do, their stomachs might not, which forces the consumer toward harder substances of alcohol that are not exactly allowed on campus. People can turn to wine or the rice wine, sake, but they may feel like they are missing out.

For these people (or in some cases, for the hell of it), brewers have concocted brews to try to avoid the biggest, most convenient ingredient in beer.

This first beer is not entirely gluten-free, but brewed primarily with rice in a sake format. Hi-

MARGOT D. MILLER, THE BOWDOIN ORIENT

LOW CARB: Hitachino Nest Beer Red Rice Ale and Redbridge serve as alternatives for those averse to gluten—neither of them has a wheat base. While the beer taste is unavoidably compromised, each has a unique flavor. Redbridge includes grass as one of its ingredients.

tachino Nest Beer Red Rice Ale is a nice example of a new twist on two old things. It has all the complex sake flavors mixed with the sweet tones of malt found in beer. It has some hints of strawberry, and ends with a strange mix of sake, beer, and bitter notes. For those not accustomed to sake, the taste is weird at first, but gets better as the bottle gets emptier. The brewing begins with the polishing, washing, soaking, and steaming of rice to break down some of the starches. A pilsner malt is added to the mash, and then later, hops, as is typical in beer. Because of the mix, two different yeasts must be used, both beer and sake yeast, to further break down starches in the rice and the malt. It is fermented for a couple of weeks and matured before being distributed in Japan and the U.S. I found this particular beer at Frontier Café, but I have not seen it there in a while.

For the die-hard gluten-haters, an entirely gluten-free beer exists, and it is widely distributed. This beer is Redbridge, and can be found at Hannaford.

It's produced by the Anheuser-Busch, which is behind Budweiser and all its incarnations, so it is shouldn't be too hard to find. Redbridge cites only four ingredients: water, fermented sorghum, hops, and yeast.

Sorghum is a type of grass and has been used as an alternative ingredient for beer for a while. In southern Africa, it produces the local version of Guinness, as well as other beers. While a gluten-free Guinness does not exist (as malt barley is still used as well), Redbridge has taken out the gluten for its beer.

I had very low expectations for an Anheuser Busch-produced beer that was made out of, well, grass. On tasting, the beer was not as bad as I anticipated, but that really doesn't say much. It is unmistakably beer, but there is really nothing too interesting about it aside from the fact that it is gluten free.

There is no captivating taste or aroma, but I imagine this would be quite the hot ticket if I had Celiac Disease.

One-woman act traverses a 'thin line'

MAXIME BILILCK STAFF WRITER

As a relatively vocal community, Bowdoin seems to be uncharacteristically silent around the issues of eating and exercise disorders, but on Tuesday, April 14, "The Thin Line" graces Kresge's stage to address precisely these issues.

According to its Web site, "The Thin Line," written by Maine playwright Cathy Plourde and produced by the Portland non-profit organization AddVerb productions, is a short, one-woman play illustrating "one girl's struggle with her eating disorder and the struggles of those close to her in their efforts to understand and to help."

Additionally, "The Thin Line" helps audiences recognize the symptoms of eating disorders, promotes prevention and intervention strategies, and acts as a catalyst for individuals, friends, and family to seek support and take action."

An interactive panel with a number of people from Bowdoin health resources will follow the 30minute performance.

Moderated by Kate Stern, the interim director of the Women's Resource Center, the panel will be made up of individuals from the eating disorder treatment team including representatives from the counseling center and the health center.

The panel will facilitate questions about the performance as well as a discussion about healthy eating and exercising habits for Bowdoin students.

"The Thin Line" is brought to Bowdoin by Peer Health Educators and BodySpeak. "Body image and eating disorders are big concerns on this campus that are often silenced," Co-director of Peer Health Emily Skinner said. "Peer Health believes that it is important to raise awareness around these issues."

"A lot of people at Bowdoin are very athletic and strive to excel in all areas of their lives," she added. "This creates a high-stress environment and a pressure to look and eat and exercise in a certain way."

Other members of the Bowdoin community see anxiety around food, but not necessarily full-blown eating disorders.

"I'm not sure about bona fide eating disorders, but 'disordered eating' is definitely prevalent on campus," Dana Riker '10, a member of Peer Health, said.

"I think a lot of people here, both males and females pay a lot of attention to what and when they're eating and how often they're eating. With all of the competitive, driven, motivated, dedicated students that make up Bowdoin's student body, those habits can even get a little bit out of control at times," she added.

Discussing and educating students about these eating disorders can be difficult.

While there are several resources for people with eating disorders at Bowdoin, many people choose not to use them, and communicating effectively with students about eating problems presents challenges to those trying to help.

"Educating about eating disorders or over-exercising is tricky and paradoxical," said Collin York '09, a member of Peer Health.

"You are encouraging people

who struggle with these things to call attention to what they already seem to be hyper-aware of, running the risk of only adding to this awareness," he added. "I've found the most 'healthy' eaters or exercisers don't reflect or obsess about these things."

Eating disroders have become prevalent in the United States in recent years, which makes "The Thin Line" an especially appropriate outreach tool. In the United States alone, as many as 10 million women and one million men struggle with an eating disorder such as anorexia or bulimia.

These numbers do not include the 25 million more who are dealing with other forms of disordered eating patterns or exercise disorders. Anorexia has the highest fatality rate for a mental illness in the country.

Additionally, a 1996 study reported that Americans spend more than \$40 billion on dieting and diet-related products each year.

Skinner hopes that this performance will open up the floor for discussion.

"There are a lot of great resources available on campus, and we want to make sure that students know how to help themselves or how to help a friend," she said. "Peer Health and Bowdoin both recognize that eating and exercise disorders are present on campus, and while 'The Thin Line' may not be comprehensive of all things, we hope that it will provide a forum to

begin the conversation."
"The Thin Line" will be performed in Kresge Auditorium April 17 at 7 p.m. The show is free and open to the public.

With straightforward simplicity, Morrison narrates gracefully

THE BOOK NOOK

BY FRANCES MILLIKEN COLUMNIST

Toni Morrison is the master of coaxing the voices of the past to life. The stories her characters tell are vivid, vital, and often full of sorrow. With her close narration, Morrison couples the reader's journey with the narrator's, the former bleeding in concert with the latter. In Morrison's most recent novel, "A Mercy," she once again excavates the unheard secrets of those kept silent through history.

"A Mercy" is a much more compressed narrative than previous novels of Morrison's such as "Beloved" and "Song of Solomon." Here, the author has not limited her cast of characters; they reveal a number of things about themselves and the rest of the cast simultaneously. Also, Morrison excises the magical realism component present in the aforementioned novels. This story comes across as deliberate, a straightforward chronicle of the facts. The emotion, however, remains despite the forthright approach.

the forthright approach.

The story unfolds in the late 1600s just as the slave trade is beginning to cement. An enslaved mother in Maryland gives up her daughter, Florens, in order to keep her younger son by her side and to exclude Florens from the lechery of the master's family.

Florens is given to Jacob, an Anglo-Dutch trader who does not "deal in the flesh," but is willing to take Florens as a settlement of a debt. Jacob's wife, Rebekka, has recently lost her only surviving child in an accident and he hopes that she will be somewhat cheered by the presence of this child.

It is Lina that responds to Florens' arrival, however. She is the last member of a tribe decimated by the arrival of the colonists, an invasion that Morrison describes with the horrifying simplicity of reality. Lina takes charge of Florens' well-being as if she were her own.

Finally, there is Sorrow. Sorrow is mysterious. Little is known ofher other than she spent her childhood living at sea. Sorrow's strangeness is tolerated and her complexities are revealed when her voice is amplified by the author.

"A Mercy" is primarily a story of women as well as a scrutiny of the intricate inner-workings of slavery, Jacob sets his sights on establishing himself as a wealthy man, leaving the women to the more domestic responsibilities. All animosity between Florens and her mistress has dissipated in the face of long years of tending to the same house. The friendships woven under such circumstances are conditional, but Morrison makes it evident that women can be, and were, a source of strength for each other.

Morrison illuminates her character's stories methodically. At this point in America's history, the struggle is not for pleasure but for survival. The women and men either bend their circumstances to their will, or are bent by them. No one's position is easy, and Morrison provides sympathetic views of her protagonists. There is an initial sense of solidarity, a coalescence that might serve as a level foundation. As the narrative unwinds, however, this union begins to fracture and the insipid seeds of greed and domination

WETHLI

CONTINUED FROM PAGE 11

is also something faintly representational in them as well. I'm interested in having a foot in each of these categories: the symbolic, the iconographic, the representational, and the abstract."

"I wanted to create work whose identity and purpose was some-what ambiguous, an object. That doesn't quite want to be one thing or another but which wrestles with the question of its own identity. I want to leave the viewer thinking about that idea," he added.

This idea of an artwork that pushes artistic definitions is strengthened by Wethli's choice of material.

All of his paintings are done on old recycled tabletops that were used in the sculpture studio in Adams Hall for many years and were destined for the landfill when that building was renovated.

"The environmental aspect of re-using these materials has been an added bonus," Wethli says. "The effects of wear and tear on the tables was too beautiful to let me pass them by. They had this rich patina and sense of history that caught my attention."

Even so, Wethli was unsure of how he would eventually use them, storing them in his garage for ahile but perpetually thinking about them.

"They are a part of Bowdoin's history. I'm not sure how long they've been around but it has definitely been a while and that has certainly added to the project," he said. "These surfaces already had a strong visual quality as found objects, which I've added to as little as possible."

Using these tabletops has emphasized the feeling of ambiguity and uncertainty that Wethli cherishes in his work.

ishes in his work.

"There's this question of whether the picces are found or made. I'm well aware that when you see them on the gallery wall, you know an artist made them," he said. "But, if you found one of them in any other context you might imagine wondering who made them and why. I like them to tempt the boundary between the functional and the aesthetic. The physical make up of the object is telling you one story and the image is telling you another. The question is, how do you rectify that?"

According to Wethli, the true inspiration came from home-made road signs, medieval art and African art, and the art of other times and places when objects had more than just an aesthetic purpose.

. "At the same time, in order for something to be of use—in rituals or to draw the viewer's attention, for example—they also need to fulfill certain aesthetic criteria, It's this quality that I would like for these paintings to evoke," he said.

Of particular interest to mem-

Of particular interest to members of the Bowdoin community is the fact that seven paintings from this series are indefinitely on view on the Bowdoin campus. This past year, Wethli took on the project of redesigning the President's Dining Room in Thorne.

"These paintings were painted as part of the series, but they were also painted specifically for that room. I wanted them to respond to the color and shape of the room and really set up a relationship, tying the room together. I was looking for unity and completeness," he

"These pieces hold particular resonance because of the recycled tables," he added. "I think they were probably used by dining services and then re-used work tables in the sculpture studio when they got too beat up for food service. It's especially interesting that they've

come full circle and are now hanging on the walls of a dining room." Wethli will continue working in

this vein even while his show hangs in RedFlagg.

"I have a lot more to do with this," Wethli said. "Sometimes you get the feeling of closure when you have a show, but right now it feels like I've just begun to scratch the surface."

"Recent Paintings" is showing at RedFlagg Gallery on 638 West 28th Street in New York City until May 16. For information about the gallery, visit www.redflagg.com.

Tennis keeps streak alive with 7th victory

BY ROBBIE ZHANG-SMITHERAM CONTRIBILITOR

The men's tennis team has been out-hitting its opponents at all positions, beating Bates 9-0 on Thursday night, dismissing Colby with a 9-0 shut-out last Friday, and winning again, 8-1, the following day against Tufts. The win improves the Bears NESCAC record to 5-0, with a 9-2 overall record.

Stephen Sullivan lead the way against Bates, winning at the No. 1 singles position, but the whole team had strong performanecs. The win marks the first time the Polar Bears swept the Bobcats 9-0.

"Pretty much everyone stepped up in general," Matt Knise '10 said. 'We're on a seven-match streak now, so it's awesome going into Middlebury this weekend."

"Our doubles play has improved significantly since Spring Break," added sophomore Michael Power. "The past few games really show how much we've come together as a

Coach Colin Joyner had put together new doubles combos, and was eager to see how they worked. Two new doubles combos, Stephen '11 with Alex Caughron '09 and first year Oscar Pena with junior Jamie Neely, dominated this weekend at the No. 1 and No. 2 doubles position. Tyler Anderson '10 and Alex White '09 worked well together to produce wins at the No. 3 doubles against both Colby (3-4, 1-3 NESCAC) and Tufts (7-4, 2-3 NESCAC).

The singles lineup was almost flawless over the weekend, with Anderson, White, and Caughron cruising through their matches and losonly one game in each of their straight-set victories against Colby.

First year Josh Cranin won his natch at the No. 4 singles positions against both opponents, though White dropped his third set in tough conditions to give Tufts its lone win. Sullivan, Pena, and Anderson all Tufts and Colby at the No. 1, No. 2, and No. 3 singles positions, respec-

The games last weekend gave the team a chance to show their ability to adapt to different surfaces, weather conditions, and to re-adjust to what Joyner called some "funky game styles.

The match against Colby was played on quicker indoor courts, and at Tufts, the Polar Bears had to transition from indoor courts to outdoor courts mid-match to deal with some weather conditions.

This weekend, a big crowd of parents, alums, and fans will be making their way up to Bowdoin for the 5th Annual Bowdoin Tennis Reunion. Weekend as well as the biggest home game of the season against rival Middlebury, on Saturday at 2 p.m.

Middlebury is currently ranked fourth in Division III; Bowdoin is ranked at No. 11.

Last year, Bowdoin downed Middlebury to win the NESCAC title, preventing them from winning their sixth straight title.

"There's no doubt they're going to want revenge," Sullivan said. "It should be a good match."

Joyner notes that although the team has built up confidence and momentum over the past week, playing against a more evenly matched opponent will make the match more

competitive.
"I think it will be a close match again. Middlebury was surprised we took two of the doubles matches last year. This year I am confident that we can win at every doubles position if we execute well," he said

The main plan, said Joyner, is to maintain momentum and play at a high level. "We beat them last year by playing better so that is our plan to beat them again."

Power has no doubts about the team's potential.
"Right now we're feeling that we

have the talent and depth to beat any team in the country," he said.

OUTSIDE CORNER: Senior Jessica Paris takes a swing in the first game of a doubleheader against University of Maine-Farmington. The Bears won 6-0

Softball wins two, despite injuries

After a tough weekend the Bowdoin softball team redeemed themselves with two key wins against the University of Maine at Farmington Beavers (1-5) on Thursday. Julia Jacobs '10 started on the mound for the Polar Bears in a comple game shutout 6-0 in game one. Jacobs improves to 4-4 on the season.

Three first year players made significant contributions in the second game. Courtney Colantuno '12 and Michelle Wells '12 enjoyed success on the mount while Hillary Smyth '12 smacked a ree-run home run

Hours of work to remove ice and snow finally prepared Pickard Field for the Bowdoin softball home opener last Saturday. The Polar Bears took on the son Eagles (5-7) in an afternoon doubleheader. Junior catcher Clare Ronan lead the way, belting an RBI dou-ble and then a three-run home run and the Bears never looked back.

The Polar Bear defense was stellar behind Karen Reni '10 on the bump. They committed zero errors on their way to an easy 7-2 victory. Reni earned the win with a complete game, four hit outing. She struck out six in her seven innings

Game two was a different story. It took three innings for Husson to put the first runs on the board. Down 3-0 in the fourth inning, Ronan blasted a solo home run, but the Polar Bear offense

came up short, losing 4-2.

Jacobs took the loss for the Polar Bears after pitching seven strong innings with four strikeouts

Last Sunday the Polar Bears traveled to Waltham, Massachusetts to battle the Brandeis Judges (14-10) for Bowdoin's second doubleheader in as many days. Game one was shaky for Bowdoin as the defense allowed six unearned runs in the first four innings behind Wells, and could only muster four runs of its own, eventually losing 7-4. Game two was a tight one. The lead went back and forth tight one. The lead went back and forth as the Polar Bears and Judges needed extra innings to decide the victor. In the top of the eighth inning, Shawonne Lord '10 drove in Kaitee Daley '09 with a single to right field, giving Bowdoin the edge as Brandeis came up for its last licks.

Brandeis was down to their final three outs trailing by one run. With runners on second and third, Brandeis 'Chelsea Korp '10 dropped a squeeze bunt to

score the tying run. After an error by pitcher Reni, the runner from second ounded third base and scored to win the game for the Judges.
"Reni, Jacobs, and Wells all pitched

better than our box scores show. The team needs to make their lives easier by scoring earlier and making big plays in the field," said Lauren Coven '10.

The Polar Bears received some more bad news after going 1-3 on the week-end. Sophomore pitcher and hitter Kara Nilan learned that due to stress fractures in her throwing arm, she will have to sit out the rest of the season. Daley's ankle is also causing problems that might bench her for the remainder of her senior season. Daley will get the final word after

"They both have had outstanding field play and bats for the team this season," said Amy Hackett '12. "It's never easy to lose one, let alone two key pla easy to lote one, it is a major strength for our team and there are people ready and willing to step up and get the job done." The Polar Bears will battle Bates in a

ome and away series starting on Pri-

day.
"Right now, every game is a big game for us," said Hackett.

Women's tennis downs Mules

The women's tennis team looked spectacular, shutting out Colby 9-0-on Toesday night.

The Bears were dominant in their singles matches and doubles matches, defeiting the Mules in the color of the colo straight sets.

Leading the way for the Polar Bears was Emily Lombardi '12 who won her match at No. 1- singles, and teamed with captain Sarah D'Elia '09 to win the No. 1 doubles

"I think everyone was very happy to shutout Colby," Lombardi said. Everyone played one spot higher than they normally do, so the win gave people confidence that they could play at a higher level."

First year Hannah Hoerner also

ted on the team's glori-

"To-defeat Colby we just had to maintain our focus and hit our shots," Hoerner said, "Everyone did a good job of using what they had arned in practice to win points." The Bears will use their victory

against Colby as a springboard for their match against Middlebury this weekend.

"We treated playing Colby as good practice for our big match this weekend against Middlebury,"

D'Elia also felt that the Colby metch has given the team a good experience that they can carry for-

ward for future matches.
"It was definitely a confidence booster to shutout Colby before a tough match coming up this week-

as he, along with the rest of the relay squad of Dumon Hall-Jones '09, Zach Winters' 11, and Hebert, finished second

overall in the 4x100-meter more.

Other notable performances at Princeton-included a fifth-place finish by Pain-lenks in the abot put, a fourth-place finish by Hall-Jones in the 100-meter deals, and a sixth-place finish in the 400-meter handles by Riker Wilsoff '12.

With the strong showing at Princeton, the ment track team has reason to feel confident going into the UNIX meet.

"We have a lot of gays with one on the verge of competitive breakthroughs," Slovenski said. "When the weather is right, or the team scoring is important, we have many athletes who are ready to rise up for outstanding performances."

Chase takes 800-meter at Princeton track meet

This past Saturday, at Princeton University, the women's outdoor track team proved that the high level of performance it set in the i door season won't be dropped in the outdoor season, whatever elements they might face.

And they certainly did have ele-ments to take on at Princeton's annual Sam Howell Invitational: the Bears not only raced in brisk, blustery winds, but against a field of the best Division III and Division I

The competition and the weather were no obstacle for senior Ali Chase, whose trademark kick in the final 100-meter stretch of the 800meter run launched her past seven competitors give her a first place finish in a time of 2:14.44. Chase's All-American finish in the 800-me-ter run at the NCAA Indoor Track & Field Championships on March 14 positions for her for another stel-

"Ali made a beautiful transition from indoor track to outdoor track," said Coach Peter Slovenski. "The longer straights will give her more room and time for her kick. She's had strong kick all year, and kicking is better suited to outdoor track.

Bowdoin's entire lineup in the 800-meter run looks promising this season, with five of the seven runners finishing under 2:25, and Alex Peacock-Villada '11 finishing first in her heat of the race.

The team's throwers also started the season off on a high note, with Kelsey Borner '09 taking third in the discus and sixth in the hammer throw, and Shemeica Binns '09 taking fourth in the shot put.

"Our throwers were especially impressive in the competition," Slovenski said. "Kelsey and Shemeica competed at a very high level and placed very well." The day's other highlights includ-

ed a ninth place finish by Anna Ackerman '12 in the 3,000-meter run, a 10th place finish by the 4 × 400-meter relay team, and a 15th place fin-ish by Elsa Millet '12 in the 200-meter dash. Millet's time of 25.96 is the second-fastest 200-meter dash time in Bowdoin history, missing the school record by a fifth of a second. The meet bodes well for the re-

mainder of the outdoor season, which the Polar Bears hope to highlight with a first place at the annual Aloha Relays on April 17 and 18, and a finish in the top three teams at the NESCAC Championship and the New England Division III Regional Championship.

After a long indoor season, the team will need to focus on maintaining the health and momentum it had through the winter.

"Since the season is so short, we really have to focus and come together right from the start," said quad-captain Alison Pilon '09. "We need to train smart and keep everyone healthy."

Quad-captain Dana Riker '10

"This is a really strong team, even stronger than indoor," she said. "If people stick to their guns and focus on the training and mental approach to races and combine that with our momentum from the indoor season, we will boost our results and lead to an even better outdoor season.'

This Saturday, the Bears will have another chance to stretch their outdoor legs in a dual meet against the University of New Hampshire, at the Reggie F. Atkins track in Durham The meet will prepare Bowdoin for the following weekend, when the Aloha Relays will bring teams from across Maine to compete for the

MARGOT D. MILLER, THE BOWDOIN ORIEN

WINDING UP: Sophomore Kit Smith prepares to fire a shot against Middlebury last Saturday. The Bears fell short, losing by one goal.

Men's lacrosse hit with two losses

After two tough one-goal losses, the Bowdoin Men's Lacrosse Team will have to re-focus for a string of road NESCAC contests.

On Wednesday, the 12th-ranked Polar Bears (7-3) fell 10-9 to the No. 17 Endicott Gulls. Endicott led throughout the game, by as many as five goals in the fourth quarter and stymied a furious Bowdoin final quarter rally just one goal short.

"With about four minutes to play in the game, we were down by four goals," said senior quad-captain Rob Halliday. "It was doable, and we got close, but we didn't quite get it. We didn't really show up until the second

After Endicott scored to make it 10-5 with under seven minutes to play, senior quad-captain Cullen Winkler led Bowdoin's fourth-quarter rally. Bowdoin scored four times

within one. Winkler scored twice in the rally, including one goal with 58 seconds to play.

"The team that makes the fewer number of mistakes is the team that's going to win," said Halliday. On Wednesday the team "just didn't put it all together," he added, "We had a nice rush at the end but there wasn't enough time."

Sophomore goalie Jake McCampbell made 10 saves in the loss, while Winkler led the Polar Bears with three goals and an assist

On Saturday, the Bears fell to the fourth-ranked Middlebury Panthers, 14-13. Bowdoin was down by as many as seven goals and stormed back to take the lead with just over nine minutes remaining, only to see it slip away in the final m ite. Even though the team could not secure the win, Halliday felt that the second-half comeback showed spirit.
"We needed to turn up the in-

against Middlebury," Halliday said.
"And then we had it, we just couldn't sustain it.

The Polar Bears are at a crucial juncture in their schedule. With just four games remaining in the regular season, all within the conference, they will have to buckle down to prepare for the playoffs. Currently third in league standings, the team's three upcoming conference road games against Williams, Colby, and Bates will be crucial. Bowdoin will end the regular season in a key home matchup against current second-seed Tufts.

Tomorrow Bowdoin will travel to Williamstown to take on the Ephs (4

"They have been playing well lately," Halliday said. "They have a good goalie and some good midfielders. We'll have to go back to basics and hopefully come out with a win. We've only got four games left in the regular season; it's time to push it."

Sailing finishes 6th, 8th

BY CHARLOTTE RYAN STAFF WRITER

On a breezy weekend, Bowdoin sailing finished sixth in the Ferrarone team race event at Yale and finished eighth in the Central Series at Tufts.

After Saturday's round robin, the

Polar Bears at Yale qualified to race in the gold fleet on Sunday. The team lost Sunday's races and fin-

"We were still in every race and only lost it on the final beat; down wind we were pretty fast and could split around the teams and attack," Coach Frank Pizzo said.

The big breeze was not ideal for team racing conditions and made keeping the mast upright hard; ac-cording to Alex Takata 12 some 30 boats capsized.

The sailors struggled a little bit in their first team race of the season, but showed promise.

Captains Pete Wadden '09 and

Doria Cole '09 along with Viktor Bolmgren' 11 and Takata skippered the team race at Yale. The crews at the event were Coco Sprague '11, Erin Taylor '09, and Audrey Hatch

The boat pairings were switched around a lot during the event but,

said Pizzo, "Sprague and Taylor elevated the level of sailing in every boat they crewed for."

Bolmgren and Takata saw the me well and executed plays, Pizzo

At Tufts, skipper DI Hatch '11 and crew Leah Hughes '11" finished in 10th in A division, while skipper Billy Rohman '11 and crew Ben Berg '12 finished sixth in B divi-Of 18 teams, the Polar Bears

finished eighth overall.

In the big breeze on Saturday, many of the Tufts boats lost their rigs, so only a couple of races were completed.

hman and Berg sailed well by hiking hard, pointing high, and sailing the shifts.

had one awesome race where we finished first and won by like 15 boats lengths," Berg said.

As the team prepares for the New England championships at Boston College and team race qualifiers at Roger Williams, they are figuring out which boat pairings are the fastest and working on boat speed, which will be crucial in the open

Women's lacrosse suffers tight losses

BY CRAIG HARDT

Thursday's game at Wellesley saw an all-too-familiar final score for the women's lacrosse team as it lost vet another game by a single goal-its fourth such game this season. The team has now lost three consecutive games to fall to 6-6 on the season (1-5 NESCAC).

The game was a back-and-forth affair from the beginning as the teams exchanged leads four times in the first half.

Tied 6-6 at the half, the Polar Bears fell behind as Wellesley scored two goals to open the second half.

Bowdoin battled back by scoring

a pair of their own to knot the game at 8-8 with 15 minutes left to play.

The game would remain tied until Wellesley's Jenny Holland broke the scoring drought with just over a minute remaining as they held on

Bowdoin outshot their opponents 27-24 but failed to convert this advantage into an advantage on the

Bowdoin's scoring was led by first years Katie Stewart (four goals) and Elizabeth Clegg (two goals). Sophomores Katy Dissinger and Ingrid Oelschlager also added goals. The Polar Bear's previous game also ended with Bowdoin on the wrong end of the scoreboard.

After losing to Colby, the Polar Bears' struggles continued last Saturday as the team fell to No. 8-ranked Middlebury.

Playing at Middlebury, the Polar Bears started off well, taking a 2-1 lead on the back of goals from and Dissinger '11.

Unfortunately that would be the only lead Bowdoin would hold all day as Middlebury pulled away with an impressive nine-goal streak to take an 11-3 halftime lead

Despite taking the same number of shots (23) as their opponents, the Polar Bears just couldn't seem to find a way to put the ball in the net as Middlebury goaltender Blair Bowie made 11 saves en route to the

The Polar Bears opened the second half scoring with a goal from Lindsay McNamara '09, but Middlebury responded quickly with a pair of goals to build their lead to 13

Bowdoin attempted to make a game out of it with a four-goal run keyed by Clegg and Katie Herter '12 to cut the lead to 13-8 with 11 minutes remaining.

Five minutes later Middlebury put the game out of reach with a pair of goals to stretch the lead to seven with just five minutes left.

Clegg, who finished with a game high four goals, added another goal with a minute remaining to get the Polar Bears within six, but it was too little, too late, as Middlebury celebrated the 17-9 victory to in its record to 5-2 (4-1 NESCAC).

The Polar Bears will look to re bound as they host NESCAC rival Williams at Howard F. Ryan field on

"Ali made a beautiful transition from indoor track to outdoor track," said Coach Peter Slovenski. "The longer straights will give her more room and time for her kick. She's had a strong kick all year, and kicking is better suited to outdoor track.

Bowdoin's entire lineup in the 800-meter run looks promising this season, with five of the seven runners finishing under 2:25, and Alex Peacock-Villada '11 finishing first in her heat of the race

The team's throwers also started the season off on a high note, with Kelsey Borner '09 taking third in the discus and sixth in the hammer throw, and Shemeica Binns '09 taking fourth in the shot put.

"Our throwers were especially impressive in the competition," Slovenski said. "Kelsey and Sheme-

ica competed at a very high level and placed very well."

The day's other highlights included a ninth place finish by Anna Ackerman '12 in the 3,000-meter run, a 10th place finish by the 4 × 400-meter relay team, and a 15th place finish by Elsa Millet '12 in the 200-meter dash. Millet's time of 25.96 is the ond-fastest 200-meter dash time in Bowdoin history, missing the school record by a fifth of a second.

The meet bodes well for the remainder of the outdoor season, which the Polar Bears hope to highlight with a first place at the annual Aloha Relays on April 17 and 18, and a finish in the top three teams at the NESCAC Championship and the New England Division III Regional Championship.

After a long indoor season, the team will need to focus on maintaining the health and momentum it had through the winter.

Since the season is so short, we really have to focus and come together right from the start," said quad-captain Alison Pilon '09. "We need to train smart and keep everyne healthy."

Quad-captain Dana Riker '10

This is a really strong team, even stronger than indoor," she said. "If people stick to their guns and focus on the training and mental approach to races and combine that with our momentum from the indoor season we will boost our results and lead to an even better outdoor season.

This Saturday, the Bears will have another chance to stretch their outdoor legs in a dual meet against the University of New Hampshire, at the Reggie F. Atkins track in Durham The meet will prepare Bowdoin for the following weekend, when the Aloha Relays will bring teams from across Maine to compete for the

MARGOT D. MILLER, THE BOWDOIN ORIEN

WINDING UP: Sophomore Kit Smith prepares to fire a shot against Middlebury last Saturday. The Bears fell short, losing by one goal.

Men's lacrosse hit with two losses

After two tough one-goal losses, the Bowdoin Men's Lacrosse Team will have to re-focus for a string of road NESCAC contests.

On Wednesday, the 12th-ranked Polar Bears (7-3) fell 10-9 to the No. 17 Endicott Gulls. Endicott led throughout the game, by as many as five goals in the fourth quarter and stymied a furious Bowdoin final quarter rally just one goal short.

"With about four minutes to play in the game, we were down by four goals," said senior quad-captain Rob Halliday. "It was doable, and we got close, but we didn't quite get it. We didn't really show up until the second

After Endicott scored to make it 10-5 with under seven minutes to senior quad-captain Cullen Winkler led Bowdoin's fourth-quarter rally. Bowdoin scored four times

within one. Winkler scored twice in the rally, including one goal with 58 seconds to play.

"The team that makes the fewe number of mistakes is the team that's going to win," said Halliday. On Wednesday the team "just didn't put it all together," he added. "We had a nice rush at the end but there wasn't enough time."

Sophomore goalie Jake McCamp bell made 10 saves in the loss, while Winkler led the Polar Bears with three goals and an assist.

On Saturday, the Bears fell to the fourth-ranked Middlebury Panthers, 14-13. Bowdoin was down by as many as seven goals and stormed back to take the lead with just over nine minutes remaining, only to see it slip away in the final minute. Even though the team could not secure the win, Halliday felt that the second-half

comeback showed spirit.
"We needed to turn up the in-

against Middlebury," Halliday said.
"And then we had it, we just couldn't

The Polar Bears are at a crucial juncture in their schedule. With just four games remaining in the regular season, all within the conference, they will have to buckle down to prepare for the playoffs. Currently third in league standings, the team's three upcoming conference road games against Williams, Colby, and Bates will be crucial. Bowdoin will end the regular season in a key home matchup against current second-seed Tufts.

Tomorrow Bowdoin will travel to Williamstown to take on the Ephs (4

"They have been playing well lately," Halliday said. "They have a good goalie and some good midfielders. We'll have to go back to basics and hopefully come out with a win. We've only got four games left in the regular season; it's time to push it.'

Sailing finishes 6th, 8th

RY CHARLOTTE RYAN STAFF WRITER

On a breezy weekend, Bowdoin sailing finished sixth in the Ferrarone team race event at Yale and finished eighth in the Central Series at Tufts.

After Saturday's round robin, the

Polar Bears at Yale qualified to race in the gold fleet on Sunday. The team lost Sunday's races and finished sixth of 10 teams."

"We were still in every race and only lost it on the final beat; downwind we were pretty fast and could split around the teams and attack," Coach Frank Pizzo said.

The big breeze was not ideal for team racing conditions and made keeping the mast upright hard; ac-cording to Alex Takata 12 some 30 boats capsized.

The sailors struggled a little bit in their first team race of the season, but showed promise.

Captains Pete Wadden '09 and

Doria Cole '09 along with Viktor Bolingren' 11 and Takata skippered the team race at Yale. The crews at the event were Coco Sprague '11, Erin Taylor '09, and Audrey Hatch

The boat pairings were switched ound a lot during the event but,

said Pizzo, "Sprague and Taylor elevated the level of sailing in every boat they crewed for

Bolmgren and Takata saw the ame well and executed plays, Pizzo

At Tufts, skipper DI Hatch '11 and crew teah Hughes '11 finished in 10th in A division, while skipper Billy Rohman '11 and crew Ben Berg '12 finished sixth in B division. Of 18 teams, the Polar Bears finished eighth overall.

In the big breeze on Saturday, many of the Tufts boats lost their rigs, so only a couple of races were completed.

Rohman and Berg sailed well by hiking hard, pointing high, and sailing the shifts.

"We had one awesome race where we finished first and won by like 15 boats lengths," Berg said.

As the team prepares for the New England championships at Boston College and team race qualifiers college and team race qualifiers at Roger Williams, they are figuring out which boat pairings afe the fastest and working on boat speed, which will be crucial in the open

This weekend Bowdoin will race in the Friis/Marchiando team race at MIT and the Alymers fleet race

Women's lacrosse suffers tight losses

BY CRAIG HARDT

Thursday's game at Wellesley saw an all-too-familiar final score for the nen's lacrosse team as it lost yet another game by a single goal-its fourth such game this season. The team has now lost three consecutive games to fall to 6-6 on the season (1-5 NESCAC).

The game was a back-and-forth affair from the beginning as the teams exchanged leads four times in the first half.

Tied 6-6 at the half, the Polar Bears fell behind as Wellesley scored two goals to open the second half.

Bowdoin battled back by scoring

a pair of their own to knot the game at 8-8 with 15 minutes left to play.

The game would remain tied until Wellesley's Jenny Holland broke the scoring drought with just over a minute remaining as they held on for the 9-8 win.

Bowdoin outshot their opponents 27-24 but failed to convert this advantage into an advantage on the scoreboard.

Bowdoin's scoring was led by first years Katie Stewart (four goals) and Elizabeth Clegg (two goals). Sophomores Katy Dissinger and Ingrid Oelschlager also added goals. The Polar Bear's previous game also ended with Bowdoin on the wrong end of the scoreboard

After losing to Colby, the Po lar Bears' struggles continued last Saturday as the team fell to No. 8-ranked Middlebury.

Playing at Middlebury, the Polar Bears started off well, taking a 2-1 lead on the back of goals from and

Unfortunately that would be the only lead Bowdoin would hold all day as Middlebury pulled away with an impressive nine-goal streak to take an 11-3 halftime lead.

Despite taking the same number of shots (23) as their opponents, the Polar Bears just couldn't seem to find a way to put the ball in the net as Middlebury goaltender Blair Bowie made 11 saves en route to the

The Polar Bears opened the second half scoring with a goal from Lindsay McNamara '09, but Middlebury responded quickly with a pair of goals to build their lead to 13-4.

Bowdoin attempted to make a game out of it with a four-goal run keyed by Clegg and Katie Herter '12 to cut the lead to 13-8 with 11 minutes remaining.

Five minutes later Middlebury put the game out of reach with a pair of goals to stretch the lead to seven with just five minutes left.

Clegg, who finished with a game high four goals, added another goal with a minute remaining to get the Polar Bears within six, but it was too little, too late, as Middlebury celebrated the 17-9 victory to improve its record to 5-2 (4-1 NESCAC).

The Polar Bears will look to rebound as they host NESCAC rival Williams at Howard F. Ryan field on

Baseball rebounds with 7-5 win

CONTRIBUTOR

Once again, a mid-week game salvaged a poor weekend for Bowdoin and bolstered confidence for the week ahead. The team played Saint Joseph's College of Maine last Tuesday and took the victory with a come-frombehind 7-5 win. The Bears took an early 3-0 nothing lead in the contest but quickly found themselves down 5-3 going into the sixth. Fortunately, the team was able to rally with con secutive two-run innings to take

back the lead for good. Sophomore Brendan Garner drove in the winning runs with a two-run single in the seventh inning. Sean Kleier'09, Eric Chenelle '10, and Tim Welch '11 together recorded four scoreless innings to end the game, giving the team the opportunity for the comeback. Bowdoin snaps a fivegame losing streak to St. Joe's with the win.

It was an important game for the Bears, mentally, after a disappointing two-game split with Thomas College

Polar Bears defeated Thomas College 3-0 in the opening game of a doubleheader last Sunday. In doing so, Coach Mike Connolly surpassed former coach Harvey Shapiro for most all-time wins as a Bowdoin Baseball coach, with 190.

It was a game for the record books, and yet, a game quickly forgotten. The Bears lost the second game 2-1, giving the Thomas Terriers their first win of the season.

"We've played great baseball against great teams all year, we just need to play great baseball against all teams," said Matt Ruane '11 about the

However, Bowdoin's pitching was not to blame in the unsuspected split with Thomas. The team allowed only one earned run in the two games with two convincing efforts by Pat Driscoll '08 and Carter Butland '10. The two gave up only six hits while striking out 10 in 12 innings of comed work. Driscoll was also named NESCAC pitcher of the week after his performance on Sunday, which University of Southern Maine earlier in the week.

Unfortunately, the team's offense could not keep up with its stellar pitching. The Bears went 12 of 49 from the plate over the two-game series, scoring only four runs against a team that had allowed a whopping 52 runs to Williams College in its previous three games. Bowdoin cannot afford any more slumps like this in its remaining games, as the season schedule now turns towards league

The Bears, now 13-12 on the season, have a three-game set against Colby College this weekend. Colby, 4-9 on the season and 1-2 in the NE-SCAC, have struggled this year, but are always competitive against their division and state rival.

"Every league series is important and this one against Colby is no dif-ferent," said Assistant Coach Manny Lora. "I'm sure the boys are looking forward to it."

The first pitch is scheduled for 3 p.m. today at Pickard Field.

Better than the Weather

JEREMY IS REPNING

I JEREMY BERNEEL D

If you think baseball is a boring three-plus-hour game where fat steroid-users parade-around with big muscles, big heads, and "bacne", you're right.

And you're missing the point. Sure, the games are long and the

pants are tight. The muscles may be more artificial than the hot dog meat and the grass not as green as the players' bank accounts. The fans may be more interested in perfecting The Wave and the tickets might cost more than a 50 percent share in GM. But it's baseball, and it's back.

It's 45 degrees, mostly cloudy and it actually could snow tonight Yikes. March Madness just ended, it's snowing in Chicago and Detroit, and it's cold and rainy all over the country, but I'm in shorts and a tshirt. I don't care what any ground-hog has to say, it's officially summer baby!

It's time to break out the jerseys and the gloves. And for that matter, the halter tops and skirts. Baseball means summer and summer means fun. Therefore, through some mathematical mumbo-jumbo they call the Transitive Property, life is good. Don't argue with me, or with baseball, that's science

Because what's important about baseball, isn't baseball. And that's what makes it special.

The game is fine, the game is fun, but the game is hardly ever exciting. What's great about baseball is hanging out in the sun, drinking a few sodas, and heckling an overpaid Yankee. What's great about baseball is meeting the in-laws and actu-ally having something to talk about. What's great about baseball is that winter is freaking over!

And now that they're here, these guys will never leave. This summer I'll spend more time with Youk and Tek than I will anyone else. They play 162 games in about 190 days. Heck, I'll hang with Papi more than I will my own dad.

Baseball has a rhythm and is full of joyful sounds. It is its own religion with its own priests and gods and as passionate a following as one can find. I've certainly drank the Kool-Aid. Or at least eaten the CrackerJacks.

Even through scandal, baseball is strong. The sport is full of likable stars and amazing talent. If the steroid mess is far from over, and Bud Selig still hasn't sent me a personal apology note, nothing can make it better than the fresh start of a new vear of America's pastime

I get why you don't like baseball. If I didn't live in an MLB city I'd probably be among the doubters, too. But I've witnessed the transcendent greatness that is baseball in October. I've seen the making of legends and felt the sorrow of defeat. It isn't every day you can see the birth of hero. It's only 162 games a year.

Scrooge might not like Christ-

mas, but I guarantee he'd like Open-ing Day. The NBA may be "Where Amazing Happens" and the "The Cup May Change Everything" in the NHL, but Major League Baseball has the most important slogan in Brunswick. Baseball: My Anti-

TENNIS CONTINUED FROM PAGE 14

end against Middlebury," D'Elia said. "I think it gave people a chance to work on things in a match situation so they would feel confident doing it in a closer match."

The team will certainly use this confidence and momentum to guide them against Middlebury

"This weekend against Middle-bury, we want to be able to play

freely so we're not afraid to go for our shots in a match situation," Lombardi said.

The Bears will start by working on their doubles game.

"We have been working on our doubles a lot lately and we hope to come out with strong lead early in the Middlebury match by getting some doubles points," Hoerner said.

"We need to start out strong in doubles and be able to play big in tight situations because we know it is going to be close," D'Elia added

OPINION

BOWDOIN ORIENT

Sharing the burden

or the past several months, the College has been forced to make hard decisions about how to reduce spending. While trying to stay as committed as possible to its fundamental principles, the College has made cutbacks that have significantly affected everyone on campus-everyone, that is, except the students.

While we appreciate the College's desire and efforts to maintain current standards of the student experience, we also understand the severity of the current economic situation. The College has chosen to reduce its spending in big ways, like freezing faculty salaries and holding off on large purchases or new construction projects. This approach is necessary and commendable, but cutbacks should be shouldered by students, as well. While College employees tighten their belts and many of our families struggle to make ends meet at home, we students have not been forced to give up many of the luxuries that others have.

As other schools cut back on meal portions, close dining halls entirely, or trim student athletic offerings, Bowdoin has kept its students relatively insulated. Part of the College's response to the economic downturn has been to increase the student body by some 50 students over the next five years. We will feel the impact of this decision—a larger class here, a longer line there-but these effects are subtle. There are still more ways that the College could cut costs and reduce expenses, without detracting from the fundamentals of a Bowdoin education.

For example, as the year nears its end, campus organizations and College Houses may find themselves with excess funds that they will lose if they don't spend. Instead of blowing the money just to spend it, those managing funds should consider alternatives. They could forfeit the money in the interest of the community, or the College could allow funds to be aved for next year.

This week, the Bowdoin Student Government approved \$400 to be spent on massages for students during finals week, and another \$700 for subsidized movie tickets. A few weeks ago at the grad fair, which could have been a simple, logistical event to prepare seniors for commencement, hundreds of dollars worth of raffle prizes were given away and a large popcorn machine was specially brought in to provide attendees with a snack. We should reconsider this sort of spending: while enjoyable, such frivolity won't help the College balance its budget.

Bowdoin should not attempt to shield students from omnipresent economic maladies. By cutting out small excesses, the College would be saving a considerable amount of money and students would be taking a role in the preservation of the essentials of our college community.

The editorial represents the majority view of The Bowdoin Orient's editorial board, which comprises: Nick Day, Nat Herz, Will Jacob, Mary Helen Miller, and

LETTERS TO THE EDITOR

Jacobs' column lacks relevance for students

To The Editors:

Ross Jacobs needs to explain why his harrumphs are things we should care about. In his last column ("Imagining Bowdoin: 'Political kinesiology' can train America back into shape," April 3) he looks at America and sees "a people that once vigorously settled the frontier and defeated great armies now de-caying into the fattest civilization in the history of man." Which sure sounds bad. But what, exactly, is the problem? Is obesity making us more susceptible to invasion? Will the Lakota now ransack Pierre?

Admittedly, Jacobs mentions in passing some actual complaintsfat people get sick and sad-but his solution is sheer manifest destiny: charge Americans with "endeavors or tasks that can summon forth, and endow with significance, the strenuous physical exertion requisite to the health of our citizenry." In other words, find another frontier to settle, preferably with vim.

His fixation on "vigor," "en-deavor," and the dilapidation of our warrior spirit suggests Jacobs' real worry is with the "decline of America's soul." But that's just a

Until he can explain why it should matter to each of us; his work will be eccentric: persuasive to Buchananites, Civil War re-enactors and John Wavne enthusiasts, laughable to all the rest.

Miles Pope '09

Frat-era alum should keep faith in students

To the Editors:

My hat is off to Josh Weiner '00 ("ResLife 'hypersensitive' about Greek life legacy," April 3). Just when I thought I had lost complete hope in the Orient's endless supply of flavor-of-the-week beers, Mr. Weiner provided me with the best read since "The Diddy Gritty."

However, I want to reassure our fellow Polar Bear. Not all has been lost to the wind. Bowdoin has indubitably changed since the keg pipelines of Theta Delta Chi were filled with cement. But the echoes of the fraternal Bowdoin still live on-and I'm not just talking about the engraving "ΒΘΠ will never die" still etched into my bedroom

We still know how to have fun and maintain a strong sense of campus-wide camaraderie. It's just that now instead of sipping vodka tonics or whiskey sours, we have to rip shots before leaving the safety of our rooms (with the exception of Crackoween of course).

I've come to accept the fact that the only Greek letters I'll be seeing are either in physics class or on the beaches of Spring Break. We can only dream of what the Bowdoin bubble was like just a decade ago, but the fire still rages. So while your irritation with the hypocritical administration is understandable, I ask that you not lose faith in the student body itself.

Sincerely, Shea McKeon '10

Bond within her rights to celebrate the vagina

To the Editors:
In light of the Vagina Monologues
and the Speak Out, where I heard story
after story about abused, neglected, and
ashamed vaginas, Julia Bond's column
("Sex Matters: Celebrating the common denominator of womankind," March 27) was a much needed celebration of vaginas. Given my appreciation of the column, the two letters published last week ("Bond brands herself as an object in 'Sex Matters," April 3; "Local mother appalled by 'obscene' sex column," April 3) left me with several questions.

First, why is a sex column too much about sex when it celebrates women's anatomy? It is a sex column after all, and women are sexy.

Second, what's wrong with understanding the look and function of a vagina? The eight-year-old in Mills' letter was born from one and will surely encounter another one at some point Bond's column will help dispel the hateful myths about the vagina, and women for that matter, that permeate our culture.

Thirdly, do feminists best celebrate their bodies by never exploring or talking about them? Bond is not objectifying herself by talking about her vagina. On the contrary, she is celebrating the one part of her body that we have been taught to be ashamed of and hide. It gives us pride and it gives us pleasure. When I have children and grandchildren, I hope that's one of the first things I teach them.

Sincerely, Margo Clark '09 Co-leader of Safe Space

Hearing your own voice through solitude

SELON MOI

BY MEREDITH STECK COLUMNIST

My beetle study at the Bowdoin Scientific Station this summer required that I set and collect traps on an unin habited island for a few hours a day. I had never been so utterly alone. After the Kent Island dingy dropped me off and disappeared into the inlet, there was stige of humanity to be seen, heard, or even felt. On some days, when the mist reduced my visibility to a 20meter radius, I could not even see land from my foggy prison. It's the closest I've ever been to where Shel Silverstein says "the sidewalk ends."

For the first couple of trips, I had to talk or sing to myself out loud while I was digging my pitfall traps to constantly reassure myself of my own existence. I was actually afraid that my brain would cease to function if I wasn't actively thinking about useful things. My interior mono-logue was the only radio station, so I imsively turned up the volume in order to mask the silence, Gradually, I learned to be amused by the ingenious forms of employment conceived by my peripatetic mind. Sometimes I thought about things. My favorite colors. Problems with French immigration policy. Sometimes I didn't. Sometimes I'd dance. Nap. Decide what I wanted to do with my

life. Trail a carabid beetle through the marsh. Devise a practical joke. Remember a verse of poetry. These digressions told me volumes about who I was, how I formed my thoughts and my answers to the controversial questions to which I hesitated to respond in public. There were moments, especially when the sun was bright enough to see each smooth pebble through the clear waves, when I was supremely and inexplicably happy.

You should see peoples' faces when I say I spent the summer on an island with 13 people, almost no electricity, no hot water, a sleeping bag, a few pairs of pants and 10 shirts. But life on Kent anything but frugal. Rather, it was indulgent. My mind stretched its underdeveloped legs, meandered, paused, rud, exploded, and sprinted away. I experienced unfettered self-awarene ture did not tell me what I should, could, or must do. Nor did my peers; everything they learned about me in those months came from my own willing actions or verbalizations of my inner monologues. My outward and inward self became one and the same.

The week of re-entry into society was jarring. I got headaches from straining to hear myself amidst a world that was just too noisy, where my brain had to process so much stuff. That's the only word vague enough to describe it. Every single person and object in the world bombarded my mind with agendas, obligations, and wishes—as if I would perish without constant distraction.

Everybody's clothing, behavior, accent, profession, and brand-name sunglasses spoke to me before I could digest the actual words of the individual, much less form a thought of my own. I missed the clarity of my own voice. My solitude.

Now if you see me on campus, you will note that I have neither renounced all my worldly possessions nor fash-ioned a hut in the Bowdoin Pines. I'm no misanthrope. I love people, parties, poetry, good conversation, and going to the movies. Thoreau's "friendship of the seasons" just isn't going to cut it after a while. However, I can be far more lonesome in a Bowdoin day scheduled to the minute than I ever was on Kent Island. Sure, I see plenty of people, but when your brain is hyperstimulated by all of the etiquette codes you are obligated to interpret and display on a daily basis, in-teractions and thoughts can become (as Thoreau might call them) "cheap." There simply isn't room left for the genuine. Thankfully, solitude sowed a few shy

seeds of rebellion. I don't always succeed in resisting conformity, but Kent Island has taught me that life can be wonderful and complex without society's noise Solitude will neither define my lifestyle nor be my most "companionable" com-panion, as Thoreau claims, but it is a powerful tool. It has taught me how to listen for my voice in a world of perpetual fireworks and constant com tary. If Bowdoin wants to craft students

Please see SOLITUDE, page 18

Prospective students: Choose Bowdoin to confront intellectual conformity

IMAGINING BOWDOIN BY ROSS JACOBS COLUMNIST

Dear visiting students,

Congratulations on your admission to Bowdoin College. The task of the admissions office here is not an easy one—many of the students who apply can handle the course load at the college and would be great contributors to the community, but admissions saw something special in you, and we want you to come here.

So, the tables have turned. You were once an anxious student visiting colleges wondering if you were good enough for them. Now, you need to judge whether Bowdoin is your top choice—we are now your suitors as you visit our home over the next three weeks. If this place "feels right" you have four years to decide why it is you came here! Personally, I am still trying to figure out why I left the Midwest and traveled a thousand miles to attend college in this tiny

school in Maine

One of the big differences between high school and college is that in college, the content of your thought begins to matter. In high school, teachers are more interested in making sure you can read long books, write grammatically sound essays, and use the academic resources at your disposal. In college, you need to begin developing some beliefs on your own. You need to take a stance on some of the perennial human questions and slowly develop a position on the most divisive political issues of our time.

One of the things you should consider when choosing a college is the character of the intellectual life. The professors here are great and many students carry a real intellectual fire. Bowdoin is far from a monolithic place, but I will confess to you that when it comes to the intellectual diversity here, we are seriously lacking—very few students here deviate from the accepted range of liberal opinion. With fewer than 10 passionate conservative voices on campus at a school of around 1600, I've found that the vigorous debate I dreamt of

when coming here is hard come by. The faculty is overwhelmingly repulsed by conservatism. This is most harmful for liberals who hardly ever find it necessary to bring forth a serious intellectual argument to support their cause. The historic rivalry between liberals and conservatives does not flourish here. As disappointing as this discovery was, I think you should come here anyway.

Although you will not be debating the future of the world order here with people who virulently disagree with you, I've found that I can still learn a lot. The reason I am glad I came to Bowdoin is that I am learning why there are no conservatives here. It seems to me that one of the most important questions today is, "Why are there so few conservative students and faculty in our nations eminent liberal arts schools?" Hundreds of years of history, scientific innovation, philosophy, and literature are lurking beneath superficial explanations for this lopsidedness and can shed light on why so many students and professors here bind together in liberalism. The intellectual conformity here ironically has its roots in an admirable desire to make

all students strong enough to resist con-

The reason you should come here anyway is that when you look at the cases of real Bowdoin students, you do not see a passive assent to liberal dogma, but a profound struggle to reconcile the demands of our inherited Judeo-Christian morality with the emancipative spirit of the post-60s liberal university. Although few students here consider themselves conservative, the term 'liberal,' when you look at how many people actually fit under this umbrella, is pretty much meaningless. This struggle is not something merely abstract—we set allies about real people here.

are talking about real people here.

At Bowdoin, you will find committed Christian black students who have an uneasy relation with a "postmoral" culture but see so much inequality in their own communities that they cannot even consider respecting the GOP.

You will find gays and lesbians trying to figure out how to reconcile their pagan sexualities with their desire to participate in the western traditions of marriage and family.

You will find chemistry, biology, and

neuroscience majors tormented by the realization that their quest for scientific knowledge reveals truths that are at odds with their inherited moral convic-

You will find literary postmodernists who feel a fervent desire to preserve a canonical liberal education.

You will find 150 Jews, atheists, and Christians crowded in Moulton's Main Lounge to celebrate the Jews' exodus from Egypt. They sit there with a glass of Manischewitz wine in one hand while they ponder, "How can this great tradition continue to survive?"

No, you will not find any intellectual conservatives who are the rightful heirs of Burke, Tocqueville, Chesterton, or Buckley. But, you also will not find many students here who are seriously comfortable with the current commercial, technological, and social erosion of our noblest inherited traditions.

If you come here, we cannot promise

If you come here, we cannot promise you will you find the typical battle of political ideologies. We can promise you, however, that you will contend with the oldest paradox—the struggle between tradition and emancipation.

SOLITUDE

CONTINUED FROM PAGE 17

who are independent thinkers, solitude should be some sort of core requirement. I think Rousseau, who observes that "the man accustomed to the ways of society is always outside himself and knows how to live only in the opinions of others," would back me up on this one. Being a social chameleon does allow you certain advantages, but if you want to become a truly independent

and analytical thinker, find solitude.
How? "What sort of space is that which separates a man from his fellows and makes him solitary?" asks Thoreau. I now respond: a space far enough away in time and space so that his own thoughts are all he hears, a space far enough away to experience himself in

a context without society's incessant analysis. Preferably for a long enough period that his outward behaviors and opinions become unconsciously those of his own interior monologue. Nature serves as a useful setting, However, I realize that not everyone has the means or the time to "go find solitude" for three months in the Bay of Fundy. Which is why I feel incredibly blessed to have unknowingly seized the opportunity. One

summer was a life investment. Because once you have lived in true solitude, you may not have to go as far away to seek it again.

When my voice is drowned out by the world's cacophony, I imagine myself away to the lonely island and think, "What would I shout to the wind and the terns and the seaside goldenrod? That was where I was undisputed master of myself, where I heard only one voice, and where I will come upon honest answers." Nobody can truly find me there because nobody I know has ever been. Besides, a cozy fog has just rolled in. The Kent Islanders are the only ones who can navigate it and they aren't coming for another hour because I have asked them not to. And only sometimes, by equating this island sanctuary with my subconscious, I can revisit a moment of my precious solitude.

BOWDOIN ADDRESSES CLIMATE CHANGE

Greenstock perpetuates reductionist stereotypes

BY SHELLEY BARRON AND EMILY GUERIN

The Climate Days events of this past week and the "We're committed. Are you?" banners featuring a green "B" in the word Bowdoin are intended to showcase the College's commitment to "educating our community and promoting sustainability on campus." Over the course of the week those students who attended the events learned about important, contemporary, environmental issues like the importance of eating local foods, the environmental work which is happening at the College, the availability of green jobs and...how to tie-dye and make organic granola. These last events, in addition to recyclable art and folk music, are part of tonight's Greenstock party. Instead of culminating what has otherwise been an impressive week of climate events that addressed current environmental challenges and featured such renowned speakers as Majora Carter, Greenstock merely perpetuates blatant and reductionist stereotypes about environmentalism and sustainability.

First, consider the name of the party. "Greenstock" takes its name from the 1969 Woodstock music festival—the quintessential hippie festival that was advertised as "three days of peace, love and music." By naming the cultiminating event of Climate Days after Woodstock—and going so far as to use the same images and design as the 1969 poster—the organizers reinforce stereotypes about environmentalists as hippies and sustainable living as a 1960s jam-fest. Moreover, a party like Greenstock only undermines the goal of Climate Days to encourage greater participation in Bowdioin's sustainability efforts.

Greenstock sends the message that in order to care about sustainable living or combat climate change, one has to adopt a specific lifestyle. But there are many ways to live sustainably that do not entail making your own organic granola, wearing tie-dye shirts, and listening to folk music. We can understand homernade organic food—no wasted packaging if you make it yourself and the ingredients are produced without petrochemical fertilizers or insecticides—but did the or

ganizers have to pick granola, the token hippie culinary choice? And since when did wearing a tie-dye shirt embody sustainability or reduce one's carbon footprint? A way! most dues chamical based?

print? Aren't most dyes chemical based?

These activities further an inaccurate, or at least very limited, conception of what 21st-century environmentalists should be. Greenstock could have appealed to a wider audience by featuring a variety of non-stereotypical sustainable living activities designed to pique the interest of all types of Bowdoin students. Instead, the organizers of Climate Days narrowed their audience by offering activities that appeal only to a small group of students, many of whom—if we had to guess—are already interested in environmental issues.

If Greenstock, which is being held at Quinby House, celebrated that social house's commitment to sustainable living, we would still argue that it perpetuated stereotypes, but we would not object to it all together. We enjoy a good theme party as much as anyone else. However because Greenstock is prominently featured in the Climate Days calendar, and is endorsed by and represents the College, it is all the more unfortunate. Endorsing a party like Greenstock has the potential to weaken the take-home message of Climate Days and advertises the College's superficial understanding of what makes one an environmental activist.

In addition, Greenstock is a setback to those students like us who already consider ourselves environmentalist. Whether we are majoring in Environmental Studies, pursuing a career in an environmental studies, pursuing a career in an environmental field or just interested in the subject, we already have to contend with the hippie stereotype since, as evidenced by Greenstock, our interests still associate us with the 1960s. While we commend the College for promoting a week of climate change action, we regret that the week should end with an event as cliché as Greenstock. We do not need yet another reminder, especially not from our own college, that caring about the environment often lends us to being branded in this narrow and outdated

Shelley Barron and Emily Guerin are members of the Class of 2009.

Sustainability means conservation

BY AARON COL

Bowdoin has failed in its selfproclaimed mission to lessen the impact of climate change through College-wide action. It is not just a failure of results; it has been a failure of vision and a failure of leadership. Our leaders do not understand the nature of the problem; they believe that there is some solution that does not amount to a change in our behaviors.

The heart of the argument for sustainability is conservation. We realize that our actions and our use of resources affect future generations. As Teddy Roosevelt put it, "Our duty to the whole, including the unborn generations, bids us to restrain an unprincipled present-day minority from wasting the heritage of these unborn generations."

The environmental crisis is a crisis of resources—there are not enough resources on, this planet to power the aggregated aspirations of mankind. There is not enough oil to fuel our cars; there is not enough space to hold our carbon waste; and there is not enough land to sustain population growth. How can we satisfy our desires and wants but conserve enough resources for our children?

Sustainability and the environmental movement are not purely selfish, for we also seek to ask how our decisions affect those other creatures who share the planet. How noble. It is too bad that our leaders forget the core mission of sustainability—conservation.

Resources must be conserved. We cannot buy our way out of climate change. The posters proclaiming that Bowdoin is ready to fight climate change required resources to construct and print. To what end?

Will two-dozen posters change people's behavior enough to conserve the amount of resources and energy that went into making those posters? Will buying a new, environmentally friendly Nalgene made at a factory with low carbon emissions make up for the old Nalgene that lies unused? Will buying T- shirts that say "Polar Bears against Climate Change" save any polar bears or stop climate change? No.

My eco reps tell me to recycle my beer cans. If it is worth it to recycle a single can, isn't it worth it to recycle an entire building?

Barry Mills proudly tells his colleagues that Bowdoin has one of the first LEED certified hockey stadiums in the country. LEED certification, which by its very title defines the leaders of the environment movement, does not take into account that an entire building will be demolished as a result of the new one being built.

I'd like President Mills to follow up his proud proclamation by informing those same colleagues that Bowdoin will now feature an additional parking lot after Dayton is demolished. Not only are we using virgin resources to build a new rink, we are sending a good percentage of an old one to a landfill, and encouraging more driving to boot. Show me the calculations that prove constructing a new building and destroying an old one

Resources must be conserved.
We cannot buy our way out of climate change. The posters proclaiming that Bowdoin is ready to fight climate change required resources to construct and print.
To what end?

is sustainable. You'll need to invite some magicians to the President's Climate Commitment Advisory Committee to make that one work.

If you want to be sustainable, Bowdoin College, buy fewer clothes. Reuse the same Solo cup every weekend. Plant trees. Print double-sided. Turn Dayton into office buildings or lab space rather than tear it down.

Until our leaders understand that they cannot buy a solution, we are destined to waste the heritage of those unborn generations.

Despite economy, U.S. should maintain its commitment to go green

BY CRAIG HARDT

'Going green' has become one of the most popular catch phrases of 21stcentury jargon, but what does it really mean?

Magazines and newspapers around the country are filled with tons of "easy tips" on how to reduce your carbon footprint and live a more environmentally friendly life. Companies and organizations like Starbucks, Patagonia, Ikea, Nike, Hewlett-Packard, Yahoo, UPS, and MTV (not to mention our very own Bowdoin College) have already taken steps towards more environmentally friendly practices and have learned that it can save them quite a lot of money. Said the executive director of the Environmental Defense Fund, David Yarnold, "going green" "can create competitive advantage" and "strengthen the bottom line."

On the campaign trail, President Obama made the case for a "green" America, proclaiming, "I'll invest \$150 billion over the next decade in affordable, renewable sources of energy—wind power and solar power and the next generation of biofuels; an investment that will lead to new industries and 5 million new jobs that pay well and can't ever be outsourced." He also noted the added benefit of decreasing our reliance on volatile governments who use oil as a bargaining chip, as well as the obvious environmental necessity of such a plan.

His ambitious plan aims to save more oil within 10 years than we currently import from the Middle Bast and Venezuela combined, put 1 million plug-in hybrid cars on the road by 2015, ensure 10 percent of our electricity comes from renewable sources by 2012, and 25 percent by 2025, and implement an economy-wide capand-trade program to reduce greenhouse gas emissions by 80 percent by 2050.

Although these plans sounded great during the campaign, the more pressing concern for most Americans is what it means for the economy.

Strong arguments have been made against the notion that "going green" is good for the economy, the best of which is the cost disparity between "clean" energy and the current reliable, cheap energy that fuels our economy

According to the U.S. Energy Information Administration, the government currently subsidizes solar energy at \$24.34 per megawatt-hour (MWh), and wind power at \$23.37. In comparison, it subsidizes natural gas at just 25 cents per MWh, coal at 44 cents, hydroelectricity at 67 cents, and nuclear power at \$1.59.

Despite government mandates for renewable energy and significant handouts aimed at supporting the growth of these industries, solar and wind power contribute less than one-half of 1 percent to the U.S. electricity grid.

Obama's lofty campaign rhetoric not withstanding, the new administration's plan will inevitably have the effect of increasing energy costs for U.S. companies and citizens, which in turn could cause companies to move jobs overseas where energy would presumably be much cheaper.

ably be much cheaper.

As economist William Pizer put it,
"I am skeptical that [dealing with climate change] is going to make money.
You'll have new industries, but they'll
be doing what old industries did but
[at] a higher net cost...You'll be depleting other industries."

So what should we do? Do we continue using cheap, dirty energy sources because it is economically beneficial even when there is an undeniable environmental necessity to change?

Perhaps it is time that we do more than look out for our own well-being. We have become too caught up in trying to live in as much comfort and with as little effort as possible.

Our economy is not doing well. That is not in question. However, neither is the fact that failure to address climate change now will make the lives of future generations much more The United States accounts for 26 percent of the world's energy consumption despite representing only 5 percent of the world's population. As countries like China and India continue to develop, their energy consumption levels will rise exponentially.

If we have not already transitioned the world to using clean energy by then, we will undoubtedly experience significant changes to our worlds climate—changes that probably will lead to a dramatic, unfavorable shift in how we live our lives.

The long-term benefits of acting now far outweigh the short-term economic drawbacks.

It's everyone's dream to save the world. So let's respond to those signs you see around campus with a resounding "Yes" and help America reclaim its rightful place in the world.

We've been playing the villain for too long, what do you say we play the hero again?

Craig Hardt is a member of the Class of 2012.

WEEKLY CALENDAR

APRIL 10 - APRIL 16

FRIDAY

COMMON HOUR

Majora Carter

Carter, a noted environmental advocate from the South Bronx, will discuss green jobs and the green economy. President Mills will also announce the Climate Contest winners and introduce the College's new Environmental Mission Statement.

Pickard Theater, Memorial Hall. 12:30 p.m.

I FCTURE

"Gay is not the New Black"

Dr. Ron Buckmire, president and co-founder of Southern California's only LGBT advocacy group, the Barbara Jordan/Bayard Rustin Coalition, will offer his perspective on California's gay marriage ban. Beam Classroom, Visual Arts Center. 3:30 p.m.

CONCERT

School for Improv Music

A quintet from the Brooklyn-based School for Improvisational Music will perform. Kanbar Auditorium, Studzinski Recital Hall. 7:30 p.m.

FILM

"Walker"

The Bowdoin Film Society will present this acid western based on the life of William Walker, an American who invaded Mexico during the 1850s and made himself President of Nicaragua.

Smith Auditorium, Sills Hall. 7 p.m.

PLAYS

Masque and Gown One-Acts

Members of Masque and Gown will stage studentwritten one-act plays.

Libra Theater Studio, Memorial Hall. 8 p.m.

SATURDAY

NATIVE AMERICAN CULTURE

Wabanaki Arts Festival

During this annual event, 25 Wabanaki artisans and craftsmen, a traditional Penobscot singer, a storyteller, and a drum group will visit campus.

Morrell Lounge, Smith Union. 10 a.m. — 4 p.m.

CONCER

Bellamafia Invitational

The ladies of Bellamafia will host all-male a cappella groups including Route 9 from Amherst and the Deansmen from Bates.

Chapel. 7 p.m.

FILA

"Walker"

Smith Auditorium, Sills Hall. 7 p.m.

PLAYS

Masque and Gown One-Acts

Members of Masque and Gown will stage student-written one-act plays.

Libra Theater Studio, Memorial Hall. 8 p.m.

PAWAT SERITRAKUI FOR THE BOWDOIN ORIEN

FOOD FOR THOUGHT: Seniors gather in the Thome Dining Hall kitchen Tuesday to learn simple cooking skills that will be useful after Bowdoin.

SUNDAY

RELIGIOUS SERVICES

Unitarian Universalist Service
Unitarian Universalist Church of Brunswick. 10 a.m.

Congregational Service
First Parish Congregational Church. 10 a.m.

Protestant Service Chapel. 7 p.m.

MONDAY

LECTUR

"The New Amazon Map: Social Change, Climate Change, and Globalization in the New World Tropics"

A Professor of Urban Planning at UCLA, Susanna Hecht is a specialist on development in Latin America. She will speak about trends in the Amazon Basin and Central America. Lancaster Lounge, Moulton Union. 4 p.m.

BSG FI ECTION '0

BSG Officer Candidates Debate

Students will have the opportunity to meet candidates running for BSG officer positions before the debate.

Jack Magee's Pub. 7 p.m.

TAL

"Art Made Tongue-Tied by Authority: Theater Censorship and the

Franco Regime"

Catherine O'Leary, a lecturer from the University of Ireland, will detail the decisions made by playwrights during Franco's dictatorship.

West Conference Room, Hubbard Hall. 7:30 p.m.

LECTURE

"An Introduction to Surface Tension (Or Why Raindrops are Spherical)"

Harvey Mudd College Professor of Mathematics Andrew Bernoff will discuss the science behind the shape of raindrops during the Cecil T. and Marion C. Holmes Lecture. Room 315, Searles Science Bullding. 7:30 p.m.

TUESDAY

CENNINAD

"Langmuir Layers: Exploring a (Nearly) Two-Dimensional Fluid Experiment"

Andrew Bernoff will speak about Langmuir Layers, which are very thin sheens of floating on a liquid.

Room 217, Searles Science Building. 4:30 p.m.

PERFORMANC

"Thin Line"

Sponsored by Dudley Coe Health Center, this one-woman play addresses issues surrounding eating disorders.

Kresge Auditorium, Visual Arts Center. 7 p.m.

WEDNESDAY

BLOOD DONATION

Red Cross Blood Drive

Representatives from the American Red Cross and student volunteers will be on hand to take blood from community donors.

Morrell Lounge, Smith Union. 3 – 8 p.m.

READIN

Mark Strand

Strand, a former United States Poet Laureate and current Professor of English at Columbia University, will read from his work.

Lancaster Lounge, Moulton Union. 5 p.m.

THURSDAY

LECTUR

"A Lesson in Looking"

Mark Strand will discuss poetry in America.

Kresge Auditorium, Visual Arts Center. 7 p.m.

FORUM

"A Candid Discussion on the

Economic Crisis"

Professor Emeritus of Economics Michael Jones will moderate a panel discussion between renowned economists Al Hubbard and David Levy.

Smith Auditorium, Sills Hall. 7:30 pm.

At Thursday night's opening of "New York Cool" at the Museum of Art, Brunswick residents view Kenneth Noland's 1958 painting "Spread." The exhibit will be on display until July 19.

BSG candidates square off in debates before election

Elections begin today. seven positions to be filled

BY CLAIRE COLLERY

Fifteen students running for seven positions debated their way issues at Monday the night's BSG Officer Candidates debate.

Though free food was provided, attendance did not exceed about two dozen.

The evening began with a surprise when Jess Song '10 decided to drop out of the race for BSG Treasurer at, literally, the last minute.

Song's sudden forfeiture left only Kyle Dempsey '11 in the running. Uncontested, he will serve as next year's BSG Treasurer.

Subsequent debates for the four contested vice presidential elections led up to the animated contest between presidential candidates Mike

Dooley '10 and Rutledge Long '10. Dooley, whose legacy was often referenced by the other candidates, presented a platform that emphasized "tangible results." He listed his major accomplishments from his two-year tenure as vice president for facilities, including his management of the collegiate readership program that provides newspapers in the dining hall, his organization of discounted shuttles to both the airport and the bowling alley, his initiatives to extend hours in Watson gym and to provide it 2009-2010 BSG Officer Elections When: 8 a.m. today until 8 p.m. Monday Where: Online, at bowdom.edu/vote

with magazine subscriptions, and his leadership on various environmental issues

Long dichotomized the race by undermining the importance of tangibles and of BSG in general.

tangibles and of BSG in general.
"I bring an energy, an attitude, and a spirit," said Long. He said that BSG "doesn't really hold any power" and identified that his goal as president would be to make BSG "more than the said that he said that his goal as president would be to make BSG "more than the said that he said than a symbolic institution that does next to nothing."

Each candidate was asked either two or three questions for which they were given the prompts in advance, succeeded by tougher, follow-up questions conceived by moderators Orient Senior Editor Cati Mitchell '09 and BSG At-Large Representative Christian Adams

Long, who recently resigned from his position of Class of 2010 representative, was asked how he could be trusted not to resign from the presidency, as well.

"A Rutledge Long presidency is a risky decision," he said, "This could be a great success. There's a 25 percent chance that this will be a total

flop."

He contrasted himself with his opponent saying that "it is not risky decision to vote for Mike

streamline budget operations

BY SETH WALDER

In order to increase efficiency Campus Activities Board (CAB) has written a new constitution that will bring changes to membership and rename the organization the Entertainment Board (E-Board).

The biggest alteration to the organization is going to be the size. According to CAB Co-Chairs Emma Reilly '09 and Katherine Finnegan '09, CAB currently has Finnegan '09, CAB currenty has 20 to 30 members, though the number fluctuates heavily be-cause it is an open club. Under the new plan, students will apply to be board members each spring. Reilly, Finnegan and Co-Chair for Concerts and Comedy Amy Tsout-souras '09 will pick students from the applications to be permanent members on the E-Board next year. Reilly and Finnegan said they are aiming for 10 to 14 students, though that will also include all four class council vice presidents

Those applying will have a written application, a group interview and an individual interview before being selected.

We want to make sure we understand where people are from, their views and ideas," said Reilly.

Finnegan said they want to "allow for more communication with the campus, and are inviting [nonmembers] to attend the meetings once a month."

Once the board is selected, it will select members to take on leadership roles.

The other significant change being made is a new plan for the budgets. Under the current plan, CAB has a budget for each of its three branches, Concerts and Comedy, Lively Arts, and Campus-Wide Activities, as well as a small budget for the CAB Co-Chairs. Reilly said that they plan to ask for one budget for the entire E-Board.

"We'll go in three weeks to SAFC

Please see CAB, page 2

CAB to downsize membership, H-L to reduce spending on hard copy journals

In response to the recent economic downturn, the Bowdoin library is seeking to reduce its expenses on periodicals by \$150,000 for the next

According to Librarian Sherrie Bergman and Associate Librarian for ic Services Judith Montgomery, the library plans to cancel only sub-scriptions for which the College has duplicate electronic and print versions, or those that have very low demand. This means that the impact of these reductions should be low for both faculty and students

The library currently spends be-tween \$1.4 and \$1.5 million of its \$2 llion materials budget on some 8,000 electronic and 1,300 print journals, with electronic access to articles (but not subscriptions) from about

Around 40 percent of the library's Around 40 percent of the indianys materials budget currently comes from the endowment, so the planned reductions represent an effort to prepare for the coming impact of the economic resion over the next few years.

BOOKKEEPING: The library plans to cancel subscriptions to both publications which the College already subscribes to electronically and those with a low demand.

Because Bowdoin draws funds from the endowment based on its lagging average over the past three years, the College will not feel the full brunt of the downturn until 2010-2011.

"We're hoping that this will make the next several years easier," Montgomery said.

DEBATES

CONTINUED FROM PAGE 1

opponent saying that "it is not a risky decision to vote for Mike Dooley."

Dooley was asked how he would respond to skeptics who say that BSG doesn't do anything. He answered that what's covered in the Orient is constitutional reform," but that "we need to do those things in order to be more effective." He elaborated that "tangible results are not all that I bring to the table" and highlighted the benefits of his visibility on campo

The race to fill Mike Dooley's shoes Vice President for Facilities, the most heavily contested of the evening with four candidates, was also the most polemic.

Samantha Scully '09 filled in for Isa Abney '11, who could not attend the debate because of a class meeting. She said that Isa "is differentiated by experience," and, when questioned about accusations that he "has had difficulty sharing authority" in the past, Scully mentioned his successful involvement with various campus organizations and the fact that he is "heading six events this weekend."

While At-Large Representative Nyle Usmani '12 was accused of "spotty attendance" at BSG meetings over this past year, Class of 2012 Representative Jack Hilzinger highlighted in his open-ing remarks that he has "only missed one meeting."

"I'm the candidate that's going to get the job done and get it done well," Hilzinger said. "I feel like I'm the only one who's capable of continuing Dooley's legacy.

Jung Gun Song '11 rounded out the facilities candidate pool and used his time to focus on the importance of communication.

POINT-COUNTERPOINT: Mike Dooley '10 looks on as Rutledge Long '10 speaks during Monday night's BSG Officer Candidate debate. The two juniors are competing against each other for BSG President. Voting began this morning, and runs until Monday.

The three candidates in the race for Vice President for Student Affairs all cited the current economic situation as the most important issue facing students.

Addison Boyland '10 pointed out

that "student issues are never stationary" and suggested adding a finance workshop to first year orientation to dents navigate complicated paperwork.

Representative Rasha At-Large Harvey '12 referenced his initiative to produce a cost-cutting guide that will be made available to Class of 2013 students in their pre-arrival summer mailing.

The same Jess Song '10 who dropped out of the treasurer's race earlier in the night served as a proxy for Alicia Martinez '10, who is currently studying abroad. She assured that Alicia, a self-proclaimed "big fan of networking and co-sponsorship" would make economic information "accessible and interesting."

Vice President for Student Orga nizations candidates Class of 2012 Representative Branden Asemah '12 and BSG Secretary Emma Nathaniel
'12 presented similar platforms, emsizing communication, especially between the Student Organizations Oversight Committee and the Student **Activities Funding Committee**

Asemah promised to make "club visits" and create FAQ sheets if elected. Nathaniel would focus on the "administrative" end rather than help with "idea generating." She would also "encourage all clubs to make Web sites."

In the race for Vice President for Academic Affairs, candidate Derek Brooks '12 opened by saying that the academic affairs committee can have

"tangible goals, unlike other committees." He assured that he would sit in on different faculty meetings, and advertise the sparsely attended campus conversations—Friday afternoon events for students and faculty that address questions like, "How does one balance extra-curriculars and academics at Bowdoin?'

Clara Hill '10 stood in for Bryce Spalding '10 and voiced his opinion that the student-faculty relationship is not an "us versus them battle," citing his previous involvement with the academic affairs committee.

BSG President Sophia Seifert '09 said "the candidates clearly thought hard about their responses." She said that the divergent responses represent "a good opportunity for stu-dents to choose the direction of BSG

CAB **CONTINUED FROM PAGE 1**

to propose the budget," she said. Finnegan said this is no different from how they usually receive their budgeting, so the process is familiar to them

The way the E-Board representative sitting on the Bowdoin Student Government (BSG) is chosen will also be changing. In previous years, CAB has nominated one member to sit on the BSG, but after a BSG vote on Wednesday, the student body will now get a say. The E-Board representative sitting on BSG will now be opened up to a campus-wide referendum.

The alterations are being made after members expressed concern with the way CAB was being run earlier this year.

"I had a lot of students on CAB coming to me in the fall feeling like it [CAB] is cumbersome," said Program Advisor to CAB Megan Brunmier '08. "I wasn't surprised.

Co-Chair for Concerts and Comedy David Gruber '11 was one such student. Because of this, Gruber helped to spearhead the plan to change CAB as an organization, along with Reilly and Finnegan.

'We started looking at models other schools used," Gruber said. We looked at a bunch of NESCAC schools, as well as Brown. It was also inspired by the J-Board process."

Ultimately, Gruber, Finnegan, and Reilly were all pleased with the system that has been set in place for the E-Board.

Gruber did mention that in one respect, some forms of entertainment will not be handled by the E-Board.

"There is one aspect of the board that is less connected," he said. 'That is the campus-wide events like 'the Regurgitator.' We will start to phase that out."

Gruber also mentioned another small change that is being made as a result of the smaller size of the board.

"Currently members have to work'shifts at all events," he said. "Next year we will offer that up to the whole campus in exchange for VIP seats or tickets to concerts."

Brunmier did offer one negative side to the E-Board's format.

"I think it will be difficult to get a fair sample of campus," she said.

That being said, she felt that it was worth it to have a smaller board because it would increase the productivity of the board overall.

Brunmier also mentioned how pleased she was with the way things turned out.

"Am I proud of them? Optimistic? Satisfied? All of these things," she said.

JOURNALS CONTINUED FROM PAGE 1

Montgomery added that the College has raised some money for the library in the Capital Campaign, which should offset some of the decline in the endowment.

The Orient did learn late Thursday that pending trustee approval, the library's materials budget for 2009-2010 would be increased, even while budgets in other departments are planned to be held flat. According to Bergman, the increase is to cover the costs of periodical subscriptions, which rise each year.

However, Bergman wrote in an e-mail that the increase would not change the journal review process, because the budget does not cover all anticipated price increases or include funds to support materials for new courses or faculty interests.

The library already has an established system for reviewing its periodicals; the collection went through a similar evaluation in 2006 and cut \$130,000 in expenses.

Currently, library staff are consulting with faculty to see if there are any journals currently received in print and electronic format for which the electronic version alone would suffice. Bergman said that the staff is hoping hear back by the end of this month, or the beginning of May.

Before ending any subscriptions, the library will circulate a list of proposed cancellations to faculty to

In addition, if the library finds that there are periodicals that are only consulted occasionally, it may be cheaper to pay for access to individual articles, rather than for a yearlong subscription.

According to Bergman, Bowdoin has also entered into new collaborative agreements with other libraries to expedite deliveries of interlibrary loan, which would allow delivery of articles in 48 hours.

Such arrangements allow the library to "start thinking about what you need to own, or what you need access to," Bergman said.

In an unrelated move, the library is also planning to remove, or deaccession, about 50,000 journal volumes from its collection.

According to Bergman, Hawthorne-Longfellow Library is cur-rently out of space, and the easiest print journals that are now available electronically.

"It is standard practice to deacces-

sion those materials," Bergman said. She and Montgomery emphasized that the library would not be getting rid of any unique content, or journals that contain illustrations.

Library adds five e-readers to shelves

Starting Monday, four Amazon Kindle 2's and one Sony Reader will be available to check out from Hawthorne-Longfellow Library.

The library plans to introduce the ereaders on a limited basis this semester to test their popularity and usefulness. Three Kindles and the Sony Reader will be available for two-week circulation periods, and one Kindle will be available to check out for four days.

The e-readers use electronic displays that mimic the effect of ink on paper to provide an experience similar to that of reading a book.

Library Information Technology Specialist Mike McDermott said that the e-readers could sometimes be more convenient to use than books.

Somebody finds something online that's a 200-page document, rather than having them print them out, they could check out a Kindle, download it to that, read it, use it," McDermott said. "That might be an alternative to having to print or load something on your laptop and have to carry your laptop around to read the document."

Librarian of the College Sherrie Bergman, who spearheaded the effort to buy the e-readers, said that they are a good investment because "the electronic book is here to stay."

We don't see it as being something

WILL JACOB, THE BOWDOIN ORIENT

FROM PAGE TO SCREEN: The library will make one Sony Reader (left) and four Amazon Kindle 2's (right) available for borrowing beginning on Monday.

that people are going to use instead of books at this point or anything," Bergman said. "It's more just a topic that is in the news quite a bit right now, and a lot of people in libraries are thinking about what this means for how you distribute digital material, things that are only available in electronic format.

McDermott said that right now the program is targeting "people who haven't seen one and just want to try one out and see what they think of the

"At this point it is pretty much just a learning experience," he said.

"The fun about technology is that you introduce it and see how the community reacts and what applications they make of it," Bergman sai

McDermott said that the library aid full price for the four Kindles, at \$359 each, but it got a small discount on the Sony Readers, which normally retail for \$349.

Bowdoin plans on packaging a variety of books on the e-readers. Included will be about 50 books, ranging from a Stephen King novel to Bowdoin Professor of History Matthew Klingle's "Emerald City: An Environmental History of Seattle

Klingle said that he is glad to see his work on e-readers.

"It's an opportunity to get your schol-arship out there to a wider audience in a different medium," he said. "If it gets out there and people read it, that's all

to participate in Relay for Life

LEAN ON ME: Students gather at last year's Relay for Life for a group photo. The event, which has been held at Bowdoin since 2006, raises money for the American Cancer Society.

BY TOPH TUCKER

Tonight, close to 500 Bowdoin students will be spending the night at Farley Field House participating in Bowdoin's fourth annual Relay for Life.

"The idea is to celebrate, remember, and fight back against cancer," said student coordinator Julia Seltzer '09.

So far, 53 teams have managed to raise upward of \$35,000 for the American Cancer Society (ACS). Seltzer's goal is \$50,000; with two more months to go before the fund raising deadline, still very much in reach

This year's turnout will be higher than ever; Seltzer said it is the first time the Relay has attracted more than 400

"It's depressing to think about, but almost everyone I know has been touched by cancer in some way," said participant Megan McFarland '11. The money that I have raised has all been in honor of my grandfather who is currently fighting his cancer and in honor of all those who are fighting the

"It's a great cause, but it's also a really fun night," said Seltzer.

From 6 p.m. to 6 a.m., activities ranging from a cappella performances to a hypnotist to a ping-pong tourna-ment will keep participants alert. Inflatable jousting games, a Velcro wall, a poker tournament, a pie-eating con-test, and an all-night movie corner are also on the agenda.

Relay for Life is Bowdoin's biggest fundraiser, said volunteer organizer Ashley Fischer '09. With the economy in poor shape, though, Seltzer said, "We want people to feel comfortable donating small amounts.

"A little goes a long way," said fellow volunteer Katherine Finnegan '09. The three previous Relays have raised a combined \$135,000 for the

Kiel McQueen '08 organized Bow-doin's first Relay for Life in 2006 as Baxter's community service representative. After serving on the entertain-ment subcommittee her sophomore year, Seltzer was asked to chair the

group last year.

"It's definitely a cause that's really important to me," Seltzer said. "As long as cancer exists, I hope Bowdoin will have a Relay for Life."

After graduation, said Seltzer, "I definitely want to continue to work to support the work the ACS does."

Relay for Life was started in 1985 by a Seattle cancer surgeon, whose first event lasted 24 hours and raised around \$6,000. The Relay has since been adopted as the flagship event of the ACS. It is offered in all 50 states, as well as internationally, and has raised

The American Cancer Society, founded in 1912, fights cancer on four fronts, said Maine Director of Communications Sue Clifford: research, education, advocacy, and patient service

programs.
"The ACS is the largest non-governmental funder of cancer research in the world," said Clifford, "because we're ssionate about finding a cure.

Of the researchers the ACS has funded, 42 have won Nobel prizes. The ACS also sponsors fellowships for stu-dents looking to study at facilities like the Maine Medical Center Research Institute and Jackson Laboratory in Bar

Advances in cancer research benefit ients everywhere, but the Bowdoin Relay will especially benefit the local community. In most states, heart disease is the number-one killer; but in Maine, cancer is.

Clifford said she thinks Maine's rural nature and insurance troubles make access to treatment harder. More than 8,000 people in Maine were diagnosed with cancer in 2008, and 3,500 diagnosed Maine patients die every year. Still, the ACS and others are making

"In Maine this year we're hoping to raise \$1.5 million through events like the one at Bowdoin College," said Clifford. There are 22 other scheduled ne Relays for Life this year, four of

which are college events.

"The quality of life for cancer patients, here in Maine and around the world, is being dramatically improved thanks to the Relay for Life," said Clifford.

As it is very difficult to hold on to federal funding, local fundraisers are all the more important.

Science is going to happen, but it esn't happen without funding," added Clifford

Seltzer said she gets frequent positive feedback on the Relay for Life.

"I'll get really heartfelt messages from survivors," she said. "The ACS is a real beacon of hope for a lot of people."

"My grandmother actually passed away from lung cancer this past fall, so fund raising became personal for me," said Rebecca Levin '12. "I've been surprised with the generosity of my family and friends and think this event definitely brings people together in a w to help people cope with the far reaching consequences of cancer, because so many people have been affected by

"The Relay for Life represents the hope that those lost to cancer will never be forgotten, that those with cancer will be supported, and that one day cancer will be eliminated," Clifford said.

"People just genuinely really care about it," said Seltzer. "It actually is sav-ing lives. It's real, and they care."

Hundreds of Bowdoin students | Tower, Chamberlain quads go quickly at lottery

Housing lottery season kicked off with the quads lottery on Tuesday night in Daggett Lounge, leaving some delighted and others dejected.

Sarah Wood '10, whose group scored the second pick in the lottery and chose a Chamberlain quad, was thrilled with her good fortune.

Being lucky enough to get the two pick makes me pretty happy," Wood wrote in an e-mail to the Orient.

"I definitely sympathize with peo ple who didn't do very well," Wood added, "since this is the third time I've been in the quads lottery and the first time I've actually gotten a quad."

Director of Residential Life Mary Pat McMahon said that this year, there were 476 students in the lottery for only 276 beds. Last year's numbers were slightly different, with more available beds in the quads lottery: 448 students entered the quads lottery for 352 spots. McMahon said that the fewer number of available beds during this year's quads lottery could largely be attributed to the conversion of Stowe Hall quads into quints, into order to accommodate a larger than predicted number of students on campus for the 2009 fall semester. The quints lottery, which also took place on Tuesday night,

PAWAT SERITRAKUL FOR THE BOWDOIN ORIEN

GOING ONCE, TWICE, SOLD! Students commit to living situations at the guads lottery on Tuesday evening. Lotteries for other housing configurations continue tonight and next week

had 50 applications for 60 spots

According to McMahon and Associate Director of Housing Operations Lisa Rendall, trends amo seniors with high picks in the quads lottery remained similar to last year's lottery. Seniors with high picks generally opted for Chamberlain quads, suites in Coles Tower, and units in Harpswell Apartments. Rooms in Pine Street Apartments-up until this year a perennial favorite among seniors—filled up slower, and Mc-Mahon approximated that the apartments would be half seniors and half iuniors next fall.

Greg Tabak '11, whose group had No. 61 in the lottery, said that his group could have chosen an apartment in Pine Street, but that they decided not to because "we thought it was really far away and in the mid-dle of a graveyard." Tabak said that

is group was considering the triples lottery, while also looking into off-

campus options.

In addition to the converted uints in Stowe Hall, another large change to next year's housing arrangements will be the addition of 25 forced triples in Brunswick Apartments. Rendall recommended that rising juniors consider entering the triples lottery to get one of these apartments, particularly since the triples lottery falls two days before the doubles lottery.

"Let's say there are six people in a group who are thinking about block-ing together in the doubles lottery," Rendall said. "They should consider the triples lottery as well, since that would end up being two groups of three, and might give them a better shot at getting an apartment [in Brunswick Apartments]," she said.

COLBY

CONTINUED FROM PAGE 1

College security officer arrived at a dance near the campus's Pugh Center to find a student passed out on a couch. The security officer called for backup, as is typical. What happened after, however, was not so typical-ending with three students spending the night in

The student paper the Colby Echo gave an account of the incident based primarily on interviews with student witnesses. According to the Echo, as students began to trickle out of the dance just after 1 a.m., a few students approached the security officers, who were standing near the couch, and began to question them. The officers requested that the students leave and, according to witnesses, when they didn't, an officer yelled at one of the students and attempted to push him out of the room. When the student resisted, he was wrestled to the floor.

By this time, a few dozen students had begun to gather and a security officer called in for all available police officers to come to the scene. A second male student approached the scene to ask why they were restraining a student and after what appeared to be a heated conversation, the second student was also restrained on the ground by security. Shortly after the police arrived, according to an account on iReport.com, a CNN-affiliate, the police used mace on the second student.

Some of this scene was captured on camera by another student, and the video made its way onto the Internet Tuesday morning. In the video, which is about two minutes long, the first student is pinned to the ground by a security officer, a pool of blood from a bloody nose spreading under his head. The second student, also on the ground with a security officer kneeling on his back, is in the periphery. Near the end of the video, a police officer comes into the frame and enters the altercation.

The two students were arrested and charged with assault and criminal

A third student was arrested later in the evening elsewhere on campus on charges of disorderly conduct. According to the story posted on iReport, the student approached a police officer as the crowd dispersed to ask for an explanation of the events, and was handcuffed and taken to prison.

In an e-mail on Sunday afternoon to the campus, Colby Dean of Students Jim Terhune, who declined to speak with the Orient, wrote, "This is a profoundly distressing series of events that are in no way reflective of the sense of personal responsibility and mutual respect which are hallmarks of the Colby community."

Several Colby administrators de clined to comment on the incident, forwarding Orient requests for interviews to Director of Communications and Marketing David Eaton, who did not return numerous phone calls.

On Şunday afternoon, several hundred students gathered on campus to protest the incident. These demonstrations have continued throughout the

According to the Facebook page of "Colby United," a group "for continuing information on the unified student response to the violence that occurred on Colby College Campus in the early morning hours of Easter Sunday, which currently has 1,655 members, the incident demonstrated a use of overly aggressive force by security and police officers. A document titled "Colby United Grievances and Calls to Action" reads: "The actions of the parties involved, including Campus Security, local law enforcement agencies, and students illustrate a greater problem of lack of communication, lack of trust, and a lack of common respect within our community."

Members of the Waterville Police Department and Colby Department of Security did not return requests for

However, in an article posted on the Web site of the Maine Public Broadcasting Network (MPBN), Waterville's Police Chief Joseph Massey said, "It all stemmed from apparently some stu-dents not wanting another student, who was intoxicated-and medical treatment was trying to be delivered to that student by some EMTs who were also students, and for some reason this large group of students, who obviously a lot of them had been drinking, didn't want the student to receive medical treatment."

A team of three Colby administrators was named to investigate the incident, and have been interviewing witnesses since Sunday.

"A full and complete understanding of the facts and circumstances of that morning is required if we are to have any hope of addressing productively the many concerns raised," wrote President Adams in an open letter published on the Colby Web site Thursday afternoon.

The college has also reinstituted a policy that security personnel must rear voice-recording devices whenever on duty, according to an article in the Kennebec Journal.

April is, of course, also a busy month for admitted students to visit campus. In an e-mail to the Orient, Colby Director of Admissions Steve Thomas wrote, "It would be way too early and way too speculative to have any sense of Colby's yield might be affected by Sunday's unfortunate series of events. With regard to admission, there have been few comments regarding Sunday's events and the reaction thereafter, but those comments we have heard have been both positive and negative.

The incident was a topic of much discussion at Wednesday night's Bowdoin Student Government meeting, which was attended by Dean of Student Affairs Foster, as well at Director of Safety and Security Randy Nichols (see story,

Foster said, "The danger with this situation here is that it's really easy to quickly pass judgment on what's happened...I think Colby needs our support.

Foster was quick to commend Nich-ols and Bowdoin's Department of Safety and Security. "I really admire that our security seeks to build relationships with students," he said. "When these incidents happen, it's all about relationships and trusts, and that's fundamen-tal to the work that [Bowdoin security

BSG discusses Ivies, Colby incident with admins

BY NICK DANIELS

its Wednesday meeting, Student Governmen (BSG) discussed both a recent incident at Colby and Ivies weekend in a question-and-answer session with members of the Dean's Office and Security, and also addressed funding issues with representatives from the Orient and Bowdoin Cable Network (BCN).

The Bowdoin community became aware this past week of a confrontation between Colby students and Colby Security, although the facts surrounding the incident remain

unclear (see story, page 1).

Director of Safety and Security
Randy Nichols said that he knew few details about what had actually

"We are all waiting for the facts at this time," he said. "I have read the reports and I have read bcuria, but I have yet to talk with my counterpart up there. Once they get through their investigation, we will talk with them, and we will learn from them...I can tell you that Bowdoin tries very hard to avoid situations like that, and so do the guys up there."

Dean of Student Affairs Tim Foster said that in light of the incident, the College will host a community meeting on April 20 in Daggett Lounge to allow students and facul-ty the opportunity to ask questions and voice their concerns about the Colby incident.

"I think it's easy for us to throw rocks, and I think it's a time for us to think about how we can support them," he said. "I think they are still trying to figure out what happened. We can use this as an opportunity, to come together and reaffirm our values here on campus."

At-Large Representative Mary Connolly '11 asked Nichols, "What is your biggest concern about Ivies weekend?"

Nichols said that he was concerned about alcohol consumption at Ivies, and called on students to "I think [Colby is] still trying to figure out what happened. We can use this as an opportunity, to come together and reaffirm our values here on campus."

DEAN OF STUDENT AFFAIRS

exercise prudence if they choose to

"Usually whenever something bad happens, it's due to alcohol...that is the trend in our society," he said. "If you choose to drink, you've got to do

Nichols stressed that students should not hesitate to call security

"We really rely on our students to alert us when other students are in trouble," he said. One of my worst nightmares is that a student won't call us when their friend is in danger, because they fear their friend will get in trouble."

"It is the community security model," he added. "I consider every member of this community a part of the security force."

In other business, BSG Treasurer Ugo Egbunike '09 announced a proposal to regulate the manner in which the Student Activities Funding Committee (SAFC) gives money to student organizations that deposit profits into revenue accounts.

Student organizations including The Bugle, BCN, and the Orient maintain revenue accounts from which they pay their employees.

"Clubs with revenue accounts... still come to the SAFC for money," Egbunike said. "There's no way to regulate that. With BCN right now, someone could get paid \$75 an hour nd we wouldn't find out until after

Egbunike said that the changes were needed as it was unfair that some student organizations paid their members and others did not.

"I don't think it's fair for the Orient to pay themselves until they're totally self-sufficient," he said. "That being said, if you pay yourselves and then come back and compete with other clubs to ask for money, that's

Orient Co Editor in Chief Nick Day '09 said that paying stipends to student employees of the Orient ensures that the paper remains a high-

quality publication.
"I think this is a way to hold people accountable for what they're doing and to make sure they're doing an honest job," he said. "Anecdot-ally from what I've heard, the Orient, seven or eight years ago, was a very different publication and wasn't taken seriously by the staff...I think that was partly because people on staff weren't getting stipends."

The assembly passed Egbunike's proposal, but mainly for procedural

reasons; two votes on separate occasions are required to pass the measure. Formal debate of the proposal will take place at the final BSG meeting.

Vice President for BSG Affairs John Connolly '11 said that since BSG is only meeting once more be-fore the end of the semester, the assembly had to pass the proposal in order to keep it on the table.

"In order to make changes to our most important rules, which are contained in the bylaws, we have to vote on them twice in the same form to make sure that the change is re-ally supported by the body," he wrote in an e-mail to the Orient. "If they could be changed easily or quickly, they wouldn't be very effective rules, and doing it this way means that those affected by the changes have ple time to express their views and be part of the conversation.'

The assembly also passed a constitutional amendment require the Campus Activities Board (CAB) representative to BSG to be elected by the student body, rather than by members of the CAB.

SECURITY REPORT: 4/10 to 4/16

Friday, April 10

ported that another student, who was intoxicated, had tripped on a street curb and hit his head, causing a bleeding injury. Security responded and called Brunswick Rescue for transport to Parkview Hospital.

Saturday, April 11

· Students at Brunswick Apartments reported being disturbed by loud music coming from the H sec-tion at 3 a.m. Officers dispersed a small gathering and ended the

· A student claimed responsibility for breaking a window at Mac-Millan House.

Sunday, April 12

 Security responded to Haw-thorne-Longfellow Library to in-vestigate a report of two suspicious males near the main entrance. Two local residents were identified and allowed to remain.

• A student reported that a sus-picious man asked the student for entry into Appleton Hall, ostensibly to use the telephone. The student denied the man access and called Security. When Security arrived the man had already left the area. The description given was of an older male with gray hair wearing a cap and blue jacket with a crest. He was carrying a Blackberry cell phone

Monday, April 13

· Brunswick Fire responded to a gas alarm in the bakery at Thorne Hall. It was determined that Kaiser rolls produce a gas during the rising process that sometimes activates the alarm.

· A trash can fire was reported outside of the south, entrance to Adams Hall. A faculty member used a fire extinguisher to put out the blaze. Brunswick Fire responded. The building was evacuated for a short while.

 A student reported being assaulted by a fellow student in Thorne Hall prior to Spring Break. The matter is under investigation.

 A women's softball player injured during practice while sliding into second base was transported to Parkview Hospital.

Tuesday, April 14

 A men's rugby player received a possible broken hand during rugby practice and was transported to Parkview Hospital.

· A female student walking on Federal Street at 7 p.m. reported that a racial slur was uttered at her from a passing vehicle. This bias incident is under investigation.

Wednesday, April 15

 A fire alarm at Howard Hall was activated by burnt chicken nuggets in the kitchen microwave. Brunswick Fire responded.

· Faculty and students reported that an offensive phrase was written in chalk on the paved walkway itside of Adams Hall. The incident was referred to the dean of student affairs.

A Coleman Hall student reported that a ring that was on a room desk was missing and possibly lost or stolen. The item is a silver Tiffany's heart shaped ring valued at \$275. A second ring of similar value also on the desk was not missing. The room door had been left bricked open all night.
Thursday, April 16

· A security vehicle was involved a minor accident in the Rhodes Hall parking lot.

• A student reported a bicycle

missing from the Outdoor Leadership Center. The bike was located and returned to the owner.

. The Dudley Coe Health Center reported that a student presented an altered drug prescription at a local pharmacy.

Compiled by the Office of Safety and Security.

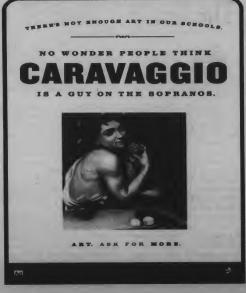

CORRECTION:

A story in last week's Orient about RedFlagg Gallery incorrectly credited Professor of Art Mark Wethli as one of the founders of the New York City gallery. Art Lecturer John Bisbee, after founding the Coleman Burke Gallery in Fort Andross in 2007, was approached by the own-

ers of the building about whether he would be interested in opening a similar gallery in New York City. He, not Wethli, is the founder and director of RedFlagg Gallery, which opened this winter.

The Orient strives to be accurate in all of its reporting. If you believe a correction or clarification is needed, please email the editors at orient@bowdoin.edu.

Three seniors fight child porn, one click at a time

BY ANYA COHEN

Thanks to three Bowdoin students, police departments worldwide are fighting child pornography faster and with greater case.

Last fall, senior computer science majors Nick Dunn, Tucker Hermans, and Jeremy Fishman wrote a computer program that helps recover deleted video files from child pornography suspects' hard drives. Their collaboration arose in November in response to a request from Sergeant Glenn Lang, supervisor of the Maine State Police Computer Crimes Unit. Lang had contacted both Chair of the Computer Science Department Stephen M. Majercik and a University of Maine professor in his search for a program that could help the police in child pornography cases. "1e-mailed Sergeant Lang's request for

"Ie-mailed Sergeant Lang's request for assistance to our computer science majors and minors, and less than an hour later, I was copied on an e-mail Nick had sent Sergeant Lang saying he would be happy to help him," said Majercik.

"We had a specific need: to take manual labor out of carving bits of data out of child pornography," said Lang. The specifications he sent by e-mail required skills that Dunn, Hermans, and Fishman had in their arsenal.

"I was in the [robotics] lab with the other guys, and we thought that what they needed wouldn't be too difficult. We had the expertise and the time, so we figured we would just throw something together," said Dunn.

Similarly, Hermans said, "I thought [the e-mail] was interesting because it was very specific in what it wanted. It didn't seem that difficult to implement. The tools it wanted were pre-existent and just needed to be put together."

and just needed to be put together."

The Harvester, which Lang named the program, works in conjunction with software that the Maine police already had. According to Dunn, it detects files that have been erased or renamed, extracts bites from them, and makes cryptographic hashes, with which the police can make a database. Essentially, it cre-

ates digital fingerprints, different for each file, which can be matched against pre-existing files. Therefore, the police can detect if a suspect has a known child pomography file on their computer without going through every file.

"Our program doesn't do any recov-

"Our program doesn't do any recovery itself, but what it spits out can be input in files police already have," said Dunn.

According to Lang, his department, which does not staff any computer programmers, previously employed a labor-intensive process that took months to recover deleted files.

"I'm surprised that it hadn't been made. In some way they had been doing it by hand," Hermans said. "There are commercially available forensic computer tools, but no existing programs that packaged the program in this way. It made the process a lot faster and a lot more manageable."

The students sent Lang the first version of the program within four days of his inquiry. They then worked on and off for the next month in response to Langs requests for various new features. Dunn estimated that in total the program took no more than 50 hours to write.

Hermans and Fishman wrote the back-end of the program (what actually happens when you click a button) which puts out a string of numbers. Dunn, the leader of the group, fused these elements together and created the front-end (what the user sees and interacts with). He said that making the Harvester aesthetically pleasing and easy to use was the most time-consuming part of the process.

time-consuming part of the process.

The three students worked well together, having collaborated previously as
members of Bowdoin's RoboCup team,
which creates robots that compete in
soccer against other teams.

"We understood how to have multiple people working at the same time, and more specifically we knew what each of us could do best," said Hermans, one of the captains of the RoboCup team.

Lang and his colleagues were full of praise for the Harvester, which Lang said would be especially useful for cases in which the police know a suspect has viewed child pornography, but have no

TOMMY WILCOX FOR THE BOWDOIN ORIE

SUPER WEB-SURFERS: Senior computer science majors Nick Dunn, Tucker Hermans, and Jeremy Fishman's computer program, the Harvester, is being used around the world to track down child pomography suspects.

way of recovering the erased videos.

"It revolutionized the way people look for these videos," said Lang, "No one has suggested anything like this. I've been running this department since 2001 and doing computer forensics for a long time, and I've never heard of another way to accomplish what this program does."

A testament to the essential need that it fills, the Harvester is reportedly being used in 21 states and 12 countries. Lang suspected that the program has spread to even more states now, and will "absolutely" spread in the future.

Dunn, Hermans, and Fishman "have done a tremendous service to children on this planet who are being exploited," Lang said. He clarified that this tool helps to combat videos involving children from two months to ten years old. The students have not been paid for their work. Both Dunn and Hermans said they did not intend to profit from writing this program and that their only goal is to help the Maine State Police.

"Not only our unit, but others around the country are in debt to Nick and his friends for the service they did without compensation," said Lang. "It's very rare to get people that selfless...you don't get much more noble than that."

"I'm a little stunned, because I had no idea that the demand for a program like this was so widespread. This is serving the common good on about as big a scale as you can get," he said. "But, I'm not surprised that it was three Bowdoin computer science students who wrote the software."

In addition to the Harvester's most direct application to child pornography

cases, it could potentially be used for any cases requiring data recovery and identification, for example corporate espionage.

Despite the students' contribution to computer forensics, Hermans said that all three of their interests lie elsewhere. Hermans, originally from Temple, Texas, plans to pursue his Ph.D. in Robotics at the Georgia Institute of Technology next year. Dunn, of Berwick, Maine, has been speaking with companies about a programming job. Fishman, a Westport, Conn. native, said he was taking time off after graduation before heading to California to look for work.

fornia to look for work.

"I'm just really proud that Nick,
Tucker, and Jeremy were so willing to
step in and take on this project and that
they did such a great job," said Majercik.
"They are truly remarkable students."

The Day of Silence: Keeping quiet to give LGBT issues a voice

SUGGESTIVE

BY ALANNA BEROIZA COLUMNIST

If you've been reading my column this year, you are already well aware of the fact that college has been a very formative experience for me, both sexually and socially. Unsurprisingly, then, with graduation biting at my heels, I still find myself in the position to learn and grow at Bowdoin. Today will be the first time in my four years at this school that I attempt to participate in the Day of Silence.

As a freshman, I entered Bowdoin without any prior knowledge that such a day existed. I was well acquainted with the sundry forms of anti-LGBT harassment that takes place in school settings, but completely unaware that there was an annual student action to

take action against such behavior. but I remember thinking it must be a pretty powerful thing to be a part of. Unfortunately, although I was openly queer at the time, I wasn't really comfortable or confi-dent enough with myself to participate. At that time, students were icking up stickers at the Smith Union information desk, which they attached to their clothing to indicate why they would not be ing their voice that day. Walking around campus that day, I felt a bit hypocritical as I saw many queers and allies pledging silence while I chose not to participate or mark myself out in that way.

Beyond issues of confidence serving as an obstacle for my participation in the Day of Silence in years past, I also didn't have very much experience dealing with adversity regarding my sexuality. At a school as tolerant and sensitive to LGBT issues as Bowdoin, experiencing actual overt physical or verbal anti-LGBT harassment is not extremely common. Additionally, coming from a relatively non-religious background, my sexual orientation has not caused any serious turmoil in my family. However, in the four years that I've identified myself outside the bounds of heterosexuality, at school, at home, and abroad, I have experienced forms of anti-LGBT sentiment which, though less overt, occur rather consistently on campus, off campus, and in Western culture in general.

Four years isn't a lot of time to have been dealing with LGBT adversity, and Bowdoin isn't the most difficult place in the world to identify as queer. Nonetheless, when I think of the kinds of discrimination I've faced as a result of my sexuality, the word silence inevitably comes to mind. I mentioned earlier that my "coming out" to my parents didn't cause a major uproar in my family. Well, I should also mention that since I

made that admission to my family members all mention of boyfriends has ceased and has yet to be replaced with an equivalent. Sure, I didn't really like it when my aunts and uncles used to tease me about having a boyfriend, but at least it was some kind of dialogue.

At Bowdoin, I've come up with different forms of silencing. For instance, I've noticed a certain sense of entitlement to a heterosexual propriety in classes and events on campus. Some people seem to think that because queer issues often deal with sexual themes, they are somehow unfit or less significant than other social issues or topics of intellectual inquiry. I wonder why it is that it seems to go without saying that climate change posters can hung up all over campus, when media with queer sexual content seems to be met with a significant amount of concern from the administration. I don't argue that climate change is unimportant, but on a campus like Bowdoin, whose student body is very aware of environmental issues and active in this area—don't these banners feel a little bit like they're preaching to

I apologize if it feels like I'm attacking campus green activists, or if it sounds as if I'm implying that Bowdoin is an oppressive place for queer people. This is not my intention. I do, however, wish to call your attention to some of the ways in which the queer community can be swept under the rug and the subsequent importance of such events as the Day of Silence on our campus. By keeping silent today, I am reminding myself, and those people around me of an important group of people who are not always treated fairly. I want to participate in this day to demonstrate my commitment to ending anti-LGBT harassment to my peers at Bowdoin, just as the Bowdoin community demonstrated to me its commitment to these issues four

Longfellow remembered as poet, patriot with 'Paul Revere's Ride'

BY ALEX PORTER

State offices, schools, and local businesses throughout Maine and Massachusetts will close on Monday to celebrate Patriots' Day and commemorate the first shots of the American Revolution. Festivities will include historical re-enactments in Lexington and Concord, Mass. where minutemen first met

the British army in battle. Here at Bowdoin, the commemoration of Patriots' Day bears spe cial significance due to the critical role that Henry Wadsworth Long-fellow, Class of 1825, had in romanticizing the revolutionary ride of April 18, 1775. On that day, Paul Revere, a Boston silversmith and member of the Sons of Liberty, a secret group of rebels, received instructions from Dr. Joseph Warren to warn John Hancock and Samuel Adams of their impending arrest by a column of British troops marching on Lexington.

Eighty-five years later, war threatened New England once again. On the eve of the Civil War, Longfellow penned a poem called "Paul Revere's Ride" that was not meant to capture the facts of Revere's ride itself, but instead to exaggerate them for social and politipurposes. Charles C. Calhoun, a member of the Maine Humanities Council and author of "Longfellow: A Rediscovered Life," wrote in an e-mail to the Orient that, "Longfellow definitely saw himself as a maker of myths." Calhoun was careful to point out, however, that the poet did not mythologize to mislead, but rather, believed that "...a relatively new nation needed its own folktales and legends."

With its assurance that "In the hour of darkness and peril and need, / The people will waken and listen to hear, / The hurrying hoof-beats of that steed, / And the midnight message of Paul Revere," Longfellow's poem tied the New England-

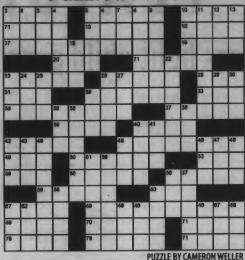

ers of the Civil War period to the event that galvanized their patriotic event that galvanized their particular spirit in the struggle for independence. Calhoun wrote that, Revere's Ride is a shorter work that quickly caught the public imagina-tion in 1860," which Longfellow's contemporaries read "as a Civil War poem, calling the North to arms in a moment of national crisis.

Longfellow's Bowdoin education from 1822 to 1825 prepared him well for his role as a prominent lit-erary figure later in life. The future poet's classmates displayed an intellectual and cultural brilliance rarely seen before or since in the College's history. Longfellow biographer Eric Robertson wrote that, "... there were many young students at Bowdoin destined to shine in later life," such as Nathaniel Hawthorne, who graduated with Longfellow in the Class of 1825, and United States President Franklin Pierce, a member of the Class of 1824.

Although Longfellow returned to Bowdoin as Professor of Modern Languages in 1829, his most remembered work, "Paul Revere's Ride," appeared in the 1860s, a time of exceptional personal prosperity for Longfellow. Longfellow scholars recognize his primacy as an American writer of narrative poetry, and Charles Calhoun said that his ability is "about as good as it gets. In English, his only superiors are Chaucer, Milton, Byron, and Browning," all of whom hailed from Britain itself.

The American public still holds Longfellow's poetry in high regard as well. Even today, readings of "Paul Revere's Ride" figure prominently in Patriots' Day celebrations. In assessing the poem's continuing popularity, Calhoun asked, "How many other poems can so many Americans still recite by heart?"
While most would say "Not many,"
on Patriots' Day, New Englanders remember "a word that shall echo for evermore": Longfellow's rendering of Paul Revere's midnight ride.

LONGFELLOW'S LAIR: A plaque on the outside of Winthrop Hall commemorates Longfellow's room at Bowdoin from 1823-1825

If not for your fashion, stand out for your passion

RY DAVID YEE COLUMNIST

On Wednesday I watched two very interesting presentations consecutively, exiting each with the same conclusion about their style, but not their fashion. First, I saw a painter present his work as though the presentation served the role of a job interview, which in a sense it did since Bowdoin is currently hiring for a professor to fill the role of two people on sabbatical. Normally, I would expect someone coming in to interview for a job to dress as if interviewing for a job—at least a button-up shirt, tie, suit jacket, dress pants. This is what the Career Planning Center (CPC) conditions us almost-graduated seniors to do, isn't it? So I was surprised to see a man in a casual jacket, button-down shirt, and jeans standing at the front of the room.

Second, I saw Mark Strand-a poet-as a vision of Clint Eastwood ng behind a podium, bespectacled, dressed as if going to an awards show rather than shooting up towns or even coaching million dollar babies. In the end, these two men imparted upon me this knowledge: what they wore was almost completely unimportant in what they did, and who they were. It was their passion for what they did that broke each piece of fabric away from prominence, and it was their passion that filled the room and captivated audiences.

It is often assumed that style is what you wear and how you wear it, but I'd posit that style is much more. How one lets one's passion shine through into the everyday influences how oth-

one's own body. That is not to say that these things are mutually exclusive, as they aren't. Students come to Bowdoin to learn the tools of reason-of science, of government, of philosophy, even of music or art. The necessary faculties of each discipline may be learned in many ways, and Bowdoin requires that we learn these faculties in order to become well-rounded citizens of the world. However, this is the base of the education that Bowdoin offers. In the end, Bowdoin expects its students to-to put it as indelicately as possible-get really pumped about something and go do it.

And that is what, to me, these two pre-

senters did. The first, the visual arts candidate, spoke in one volume and perpet ually too loud for the space in which he spoke. He gestured excitedly and paced in front of the projector screen, the light painting the brush strokes of his own works on his forehead. And in this moment, as he passionately spoke about his work while it was simultaneously superimposed upon his own body, it was clear that he was his work, and there was no other way it could be. Mark Strand was much more quiet in his presentation; his voice, a mellifluous mixture of Daniel Day Lewis and Randy Nichols, belied the slight crack of a sideways smile from which it emanated, and his words, as he read them, automatically became autobiographical-reflections of himself that he lets the world see. I will not be able to clearly remember what either wore in time; in fact, memories of that are fading as I type, and the memory of their clothing will likely have vanished by the weekend. In the end, I will remember the overall impression that they por-

trayed of themselves.

To me, the style columnist, this realization means many different things. I have spilt most of my ink trying to encourage small changes in outfits that better reflect the person within, and to say that passion overrides it all would make most of my work su-perfluous (though undoubtedly there are those that would think this statement unequivocally true). I feel that, for people like Mark Strand, fashion comes in at a very distant second to their demeanor in affecting how people perceive him. To that end, I would applaud those who can walk around campus in a sweatshirt and still make the air around them vibrate with their presence, for ultimately, they are bet-ter people than me. Personally, I feel as if I need a little something else to jump off the page, to show a little more deeply who I am through a medium of more immediacy than conversation In another sense, fashion is one of my passions. I enjoy putting clothing together in different combinations, and I enjoy experiencing how certain combinations feel. Like many other passions-of art, science, or poetryfashion is one that I'd hope to communicate to others in a positive way.

In these last days of Bowdoin's spring semester, people come out of the woodwork and look happy again, which is a refreshing change from the dour inward/indoorsness that pervaded the campus psyche not two weeks earlier. Now is a great time to go out and find one thing you enjoy doing, grand in scale or not. Go do it, then keep doing it. No fashion worksheet that the CPC gives or clothing advice I give can create more positive change

Student production of 'Topdog/Underdog' delves into issues of race, family

MAXIME BILLICK

A black man in whiteface will impersonate Abraham Lincoln this weekend as part of the thought-provoking show "Topdog/Underdog."

Director Caitlin Hylan '09 will present the two-man show, written by Pulitzer Prize-winning playwright Suzan-Lori Parks.

The director and the two actors, Jamil Sylvester-John '09 and Tony Thrower '09, will perform the show as the gulmination of an independent study.

The show depicts the strained relationship between brothers Lincoln and Booth. Lincoln works as an Abraham Lincoln impersonator and has abandoned his former job as a three-card monte hustler. On the other hand Booth (named after Lincoln's assasin) continues to hustle and tries to convince Lincoln to abandon his legal job.

"There is an incredible rivalry between the two brothers," Hylan said.
"They are constantly trapped both by their own personal histories and by American history. They are trapped, but they also need it to structure their lives."

This production is not the first time the playwright's work has been presented at Bowdoin. Parks visited campus during the fall of 2007, and the

CAROLYN WILLIAMS, THE BOWDOIN ORIENT

BENEATH THE UNDERDOG: Jamil Sylvester-John '09 and Tony Thrower '09 face off as brothers Lincoln and Booth in "Topdog/Underdog."

theater and dance department put on scenes from her show 365 Days/365 Plays all over campus last year. "I had never heard of her before she

"I had never heard of her before she came to Bowdoin," said Hylan. "After she visited, I thought "What a brilliant, fascinating person.' I knew I wanted to direct one of her plays. I worked with scenes from her show 'In The Blood' last semester, but when I read "Topdog' I recognized immediately that it was different. It's much more realistic than her other plays, most are pretty abstract."

"Bowdoin as a community hasn't seen a show like this before," Sylvester-John added. "It touches on a lot of stereotypes about black men."

Sylvester-John sorted through major differences between himself and the character he plays, Lincoln, in order to immerse himself in the production. "Lincoln is basically uneducated, he barely finished high school. In order to play this character I had to focus on what we had in common, not our differences," he said. "I know what it's like to be the youngest brother—you know how to push your brother's buttons—so I drew from that. Tony and I had to be real about it. How would I react if I were in his position? How would I think? How would I speak?"

"The play is intellectual and certainly incorporates bigger ideas, but that takes a backseat to the raw emotion," Hylan said.

Hylan did not hesitate to produce such an emotionally compelling play.

"I wanted something really gutsy, I was yearning for something real," she said. "The hardest thing about it is that there are no dance routines, fancy lights or elaborate costumes. It really is an actor's play."

"Sometimes I feel a little useless," she added. "I want to help them, but there is only so much I can do as a director."

However, Hylan said she has seen the play evolve since she first undertook the project.

"We initially headed down a track that was very much internal and meditative," she said. "Now all of a sudden we're making changes so that the characters' progression is more external." Hylan admits that the play's contro-

Hylan admits that the play's controversial aspects will result in a new and potentially uncomfortable theater-going experience for those who attend.

"It's very raw. It's from way outside the 'Bowdoin Bubble,' it's from way outside the state of Maine!" she laughed.

"Topdog/Underdog" will be performed today and tomorrow at 7 p.m. in Chase Barn. Admission is free and the play is open to the public, but seating is limited.

In 'New York Cool,' renowned art heats up museum

RACHEL GOLDMAN

The arrival of a traveling exhibit from the New York University collection will infuse the Bowdoin College Museum of Art with a new shade of cool.

The exhibit, titled "New York Cool: Paintings and Sculpture from the NYU Art Collection," was curated by New York University professor and art critic Pepe Karmel. Skillfully surveying the disparate New York art world of the 1950s and 1960s, Karmel drew entirely from the New York University Art Collection and included significant pieces by artists such as Willem de Kooning, Helen Frankenthaler, Alex Katz, Robert Rauschenberg, and others.

"This is extremely exciting for our collection," Andrew W. Mellon Curatorial Fellow Diana Tuite said. "It is pretty rare to be able to encounter a collection of Post-War art of this caliber anywhere locally. This is a pretty stellar collection of work that is really addressing a lacuna in our collection."

"New York Cool" is on display in both Halford and Boyd Galleries, stretching upstairs to take the place of the 19th-century American Art Exhibit. Since the renovation of the museum, Boyd Gallery has been dedicated to showing American art in a series of exhibits.

"It has always been an American Gallery," Toite said. "In fact, this is the first time it has been painted since we reopened, the first time we've departed from the historical gallery colors, and it's really worth it. This exhibit includes a lot of work that, with the renovation and with new spaces, we could finally accommodate in a way that is appropriate."

Yet, while the exhibit lends a modern guise to Boyd Gallery, it remains tied to the shows that have hung before it.

"It may look different," Tuite said. "But it heavily references what has been there before."

Tuite pointed out a Helen Frankenthaler landscape that hangs where landscapes from the American Scene Exhibit hung previous-

ly.
"We've tried to be sensitive to the fact that the exhibit is following in a lineage of historical American art, and so each piece is incredibly strong and resonates with what people are used to." he said.

strong and resonates with what people are used to," she said.
"New York Cool" is also dynamic because it includes both art historical greats as well as lesser-known artists who were embroiled in the artistic fervor of the 1950s and 1960s.

"The exhibit is canonical, yet it also includes artists that are perhaps lesser known or don't have such a historical reputation. In that sense, this exhibit is accessible to everyone," Tuite said. "This comprehensive compilation of artists and artworks fleshes out the artistic story of the era as it pedagogically forces viewers to reexamine what they understood the narrative of Post-War art to be."

"What is particularly powerful about this exhibit is that it complicates the traditional linear narrative of how contemporary art evolved. It shows how movements yielded to other movements, and in that sense it is perfect for a college audience," Tuite said.

Pamela Fletcher, an art history profesor who specializes in modern and contemporary art, emphasized the importance of such the

"Paintings of the 1950s and 1960s rely so much on brushwork, texture and scale that the opportunity to see them first hand is really critical," Fletcher said.

Moreover, the arrival of "New York Cool" engages the campus beyond the walls of the museum.

"The exhibit reveals and comments on an affinity between the literary and the visual arts that was so ripe during this period," Tuite

Tuite partnered with Professor of English Marilyn Reizbaum in organizing the opening of the exhibit and the many campus events with which it coincides.

On Wednesday, former Poet Laureate Mark Strand read from his many collections of poetry, including his Pulitzer Prize-winning collection "Blizzard of One."

On Thursday night, Strand delivered a keynote lecture titled "A Lesson on Looking" in which he shared his expertise about the mid-20th-century art world and the mid-century New York art scene in which many of the paintings in "New York Cool" were created.

The intellectual flame continues to burn later this month with Professor of History David Hecht's lecture "American Culture and the Cold War" on April 30. This lecture will provide another lens through which to view the moment in which the art of "New York Cool" was produced.

The Bowdoin College Museum of Art will present "New York Cool: Painting and Sculpture from the NYU Art Collection," a nationally traveling exhibition organized by New York University's Grey Art Gallery, from April 17 to July 19.

Lanois shows off production skills with cohesive tracks on 'What Is'

THIS WEEKS
REVIEW
BY LOUIS WEEKS
COLUMNIST

You don't know it yet, but you want to party with Daniel Lanois. He has been behind the console of legends like U2, Emmylou Harris, Brian Eno, Peter Gabriel and the tambourine man himself, Bob Dylan. If that who's who of undeniable coolness doesn't do it for you, then you are cool—approaching Prince-levels of cool. For the rest of us, living our lives in the Jason Segel regions of the hip spectrum, Daniel Lanois is a god.

In 2006, Daniel got a film crew to-ther and traveled the world, following his studio musicians into the depths of the creative process. The relationship between artist and producer is often a forgotten one. It's a creative friendship that happens off the stage, behind the closed soundproof wall of a windowless studio. In his 2006 film "Here Is What Is," Lanois attempted to open this aspect of musi-cianship. With his friends, Bono, Brian Blade and Billy Bob Thornton (Lanois ourage is made up entirely of people with B names. Bob Barker, Bruce Ban-ner, and Betty Boop have all confirmed friend him on Facebook), Lanois and his film crew captured live perforions, and interviews with some of his collaborators. In noisy, street-side cafés, Lanois muses about the nature of beauty, art, and a little chest of drawers; it's a bit much. Luckily for us, he released an album of the music only and called it "Here Is What Is."

Each track of "Here Is What Is" is different, yet Lanois has pulled them together into a cohesive unit. The instrumentation is most responsible for this unification of sound. As well as a producer, Lanois is a brilliant singer-songwriter and pedal-steel player. His tracks feature the swelling, sparkling tone of his pedal-steel guitar and the low rasp of his Dylan/early Tom Waits voice. His lyrics are simple and honest; there are no story songs or complex poetic gestures, just tight phrases with powerful, emotional wocal performances.

One of the highlights of this album is the drumming. Brian Blade throws together a jaw-dropping performance on this album. His parts are not too flashy and not too simple, but perfectly appropriate for the simple country/alt songs. "Where Will I Be" mixes Lanois' production intuition and Blade's technical still. The song features two simultaneous drum sets, creating an elaborate but hooky polyrhythm. In songs like "Duo Glide', Blade locks into the beat and never falters. The unrelenting consistency gives the track a perpetual motion forward and creates an infectious groove.

With songs like "Where Will I Be,"

With songs like "Where Will I Be,"
"Duo Glide," and the title track, "Here Is
What Is', Lanois shows off his skill as a
songwriter, and it works tremendously
well. The rest of the album attempts
something a little loftier and at times
falls flat. In "Lovechild," a jazz-piano reverie mixed with country-ballad, weeping slide guitar lines feel forced. The
textures of the two instruments create a
delicate and sweet atmosphere, but this
doesn't last too long. Soon the harmonic
monotory of the song's unchanging material begins to wear the listener down.
This instrumental track is eight minutes
long and entirely too much.
"Here Is What Is" is a fantastic album.
"Here Is What Is" is a fantastic album.

"Here Is What Is" is a fantastic album.

Its production value is phenomenal and
the songs are of another time. Listening
to this album is like meeting your coolest uncle, then listening to his stories
about Bono...and Benjamin Button.

Student movies grace the silver screen at film fest

Forget Hollywood—the red carpet will unroll at Bowdoin this week at the annual Film Society Student Fes-

The short films from 14 different student directors range from a "mockumentary" to a 19th century psychological thriller.

The Bowdoin Film Society (BFS), which collects film entries and recruits volunteers to judge them, v hand out the awards tomorrow night

in Sills Auditorium.
"Chick Magnet," directed by Sam
Tung '09, is the story of a boy who es across a tube of chapstick that makes women fall in love with him. A problem arises when the flocks of girls prohibit him from attracting the ne girl he wants, a cutie he spots at the Café.

Tung is the sole creator of "Chick Magnet," and while he enjoyed the creative control, he admitted that having more people involved would have been helpful.

There were times, though, when a team of writers to bounce ideas off of, or a team of camera people to assist in shooting, would have been incred-ibly helpful—it's a lot to organize and control," he said.

Using student actors was also a challenge for Tung, who employed three of his peers to bring his movie to the big screen.

"One busy Bowdoin student trying to schedule three other busy Bowdoin students for shooting, as well as rallywas difficult, he said.

"Chick Magnet" has been nomi-

nated for Best Original Song and Best Writing. Actors Sam Waterbury '11 and Sam Duchin '11 have also been nominated for Best Actor.

Another of the film festival entries is "Library," directed by Kate Kross-

Taking place in Bowdoin's own Hawthorne-Longfellow Library, Krosschell's film is a romance about a boy and girl who encounter one another among the shelves.

Based on the song "The Warni by the band Hot Chip, Krosschell had a very specific visual idea of how to create her movie but found that editing her film was a challenge.

When it came to writing the script and editing during post-production, I realized just how hard it was to cut the movie to fit the specific moments and changes in the music," Krosschell said. "I had imposed some pretty rigorous constraints on myself, so I had to work within those confines. In the end, I managed to make it work, and I'm glad to have had those limits to

keep me from getting sloppy."

Actress Meredith Steck '09 has been nominated for Best Actress for her work in the film.

Finally, a unique title on the list of film entrees, "It Will End With Seven Shots From Kookamunga in Saturday's Spilled Blood on the Steps of Solidarity," directed by Lucas Delahanty '10, is described as an actiondrama-comedy-mockumentary.

Delahanty, who is also one of the

original touch to his film.

"My short film is made to look like it's completely one take, lasting 10 minutes, taking place in real-tim he said. "This was the most difficult part of filming, as it involved a lot of coordination on the part of my actors, limited shooting time due to lighting conditions, and some tricky

"I'm really happy with how the il-lusion turned out though," he added.

The film is a love letter to the BFS, according to Delahanty. He is unconcerned that most of campus might not understand the intricate message of his piece.

"It is purely an entertainment piece I made for the Film Society, and a parting gift for the BFS President, Jake Daly, who takes the lead role in it," Delahanty he said. "Also, young children and those with sensitive vo cabularies should wear earmuffs, because Jake, Hannah, Sam, and Chester use a lot of grown-up language."

"It Will End With Seven Shots

From Kookamunga in Saturday's Spilled Blood on the Steps of Solidarity" has been nominated for Best Sound and Best Editing.

Lucas Delahanty has been nomi-

people together. It is central to family gatherings, holidays and celebrations. First, second, and third dates usually revolve around food; there is romance in a well-laid table and the accompanying well-chosen wines. Food preferences reflect people's personalities and moods. The inherent magic of food and its preparation is the foundation of Erica Bauermeister's novel, "The School of Essential Ingredients."

Lillian is an accomplished chef who owns a restaurant that she decides to open for cooking classes on Monday nights. She is a somewhat mysterious character who is fairy godmother-like in her eagerness to guide her students toward gustatory satisfaction and love.

The assorted students differ in expected ways: An old married couple come together, a lonely young man, a waitress are some of the characters. Each week the class tackles a different dish and in the kitchen, connections and relationships simmer. Layers of the characters' pasts and hopes are peeled away like the layers of an onion to reveal their insides.

Unfortunately, this is about the depth to which the novel penetrates. Beautiful descriptions of savory food and aromatic scents rising from cooling dishes populate the pages of this book. If one appreciates the creation of meals and the thought and care that enters into it, the plethora of tasty descriptions will likely

But I found myself hungry for more. Each character reaches a fairly logical conclusion in concert with his or her original preoccupations. The students enter the classroom somewhat bruised and exit having discovered that tender fruit can be turned into a delicious desert or sweet jam. As a New Mexican who relishes the spice of chile, the blandness of these storylines left me ravenous.

Additionally, I was highly disappoint-ed to find recipes absent. "Like Water For Chocolate" by Laura Esquivel, "Frankie's Place" by Jim Sterba, and "The Lobster Chronicles" by Linda Greenlaw are all books that use food as a central theme. While "Like Water For Chocolate" is a novel and the other two are memoirs all three include the recipes discussed between their covers. "The School of Essential Ingredients" failed to appeal to me on a number of levels, but the food sounded delicious and I would love to try some of the recipes myself.

Bauermeister's novel is light enough to make for a satisfactory read on the Quad or the beach. "Like Water For Chocolate" is a far more bewitching tale, however. For two excellent characterizations of Maine in the summer, turn to Sterba or Greenlaw. We've made it through a long cold winter, and we all deserve a little taste of the summer their recipes supply

Most of 'Sunshine Cleaning' feels like a never-ending cloudy day

BY LAUREN T. XENAKIS

As the weather gets nicer, I've noticed that time during class has started mov-ing a lot slower. My 90-minute classes, which used to move at the normal pace of time, have suddenly stretched out to feel as if they're three hours long. Watching "Sunshine Cleaning" was like sitting in class knowing everyone else is lazing about on the grass in front of the art museum-excruciating.

"Sunshine Cleaning" focuses on the Lorkowski family. Rose (Amy Adams) was the popular cheerleader dating the quarterback in high school. Rose now vorks for a maid service in the same town where she grew up cleaning the houses of the people who used to want her life 10 years ago. A single mom, Rose struggles to balance her job, get her real estate license, and have an affair with the quarterback, who married another cheerleader. Add to the stress her sister Nora's (Emily Blunt) drug use, her father's get-rich-quick schemes, and her son's trouble in school, and it's easy to see why Rose is struggling.

When her son gets kicked out of

school because he has been licking things, Rose decides that she needs to make a lot of money, fast, to pay for his tuition at a private school. The quarterback—now a police detective—tells Rose that she could make money cleaning up crime scenes. So, she and Nora start Sunshine Cleaning—a company that cleans up after suicides, deaths, and

other bloody happenings.

In case you didn't understand what I was getting at when I opened this col-umn, I'll say it explicitly here: the movie is dull. It's not even two hours long, but

it felt like it was three. The writers tried to add in too many twists and turns, but the real originality came from the two women trying to clean up crime scenes. Instead of focusing on the humor there, the plot instead tries to become deeper by focusing on Nora's emotional baggage over her and Rose's mother's death and Rose's desire to make a life for herself that will allow her to feel some of the glory of her high school career. We watch Nora trying to connect with the daughter of a woman whose house she cleans after the woman dies, but instead of giving Nora (and us) some sort of rsis, the movie just leaves everyone hanging. We see Rose trying to fig-ure out her relationship with her lover, which never felt all that real anyway. We also have to watch Rose deal with her son, Oscar (Jason Spevack), who is too precocious to like; this is probably why it ms like Rose does It really like him.

The movie tries to elicit laughs about the pain of suicide by making us watch the women who have to clean up the messes left behind. In its attempt to do this, the movie tries to make Rose's and Nora's job uplifting by pretending that they're actually making a difference in people's lives. The only evidence I saw to support this point was one instance: when Rose sits with an old woman. Every other time, Nora and Rose clean up the bloodstains, get rid of the flies, and then skedaddle with their check. The movie was more of a documentary about cleaning up bio-hazardous waste than what it was supposed to be: a funny

story about how messy life can be.

As the friend who went with me said, As the friend who went with me said, "The only uplifting thing in that movie was Amy Adams' curved nose." So un-less you enjoy checking your watch ev-ery few minutes, find something better to do with your time—maybe get out and enjoy real sunshine?

DJs OF THE WEEK

Jimmy Pasch '11 and Wilson Taylor '11

If you could only listen to one album for the rest of your life, what would it

JP: Steven Isserlis' recording of the Bach Cello Suite

WT: Dave Matthews Band, "Live at Red Rocks."

Favorite song to privately dance/rock JP: "Sweet and Dandy" by Toots and

the Maytals. WT: Probably "Ain't Too Proud to

Beg" by the Temptations.

If you were in a band, what would it be called and what kind of music would

IP: Elbow, and we'd use silence very effectively. Other than that, it'd be pret-

WT: Either Gold Lion or Caramel Delight and we'd create cryptic, funk-laden jazzy euphoria. With heavy organs. And spectacles like Dave Bru-

Theme song during lvies? JP: "Lost in the Supermarket" by The

WT: Talking Heads' "Burning Down the House."

If you could meet any musician, dead or alive, who would it be and why?

JP: David Bowie. He's all-around

WT: David Byrne. He has to be one of the most elusive and enigmatic figures in modern music. I would also like

Best new music you've heard lately? JP: The Ralph Alessi quintet that

played at Bowdoin last Friday. WT: Milkman. But I have spent most of my time recently listening to The Clash, New Order, and Bob Dylan.

If you could time-travel back to any

musical period, where would you go and

JP: The '60s and '70s, because all the musical excitement and experimen-tation in rock as well as the classical realm would blow my mind.

WT: The 1980s, for the illustrious use of keyboards and the creative fusion of styles. I would also like to see the Talking Heads' "Stop Making Sense" tour.

Bands/musicans who have most influenced your musical taste?

JP: Bach, Bowie, Brahms, and Ra-

WT: Perhaps Herbie Hancock, Bob Dylan, and Talking Heads.

"Ice Cream Soup" with Jimmy and Wilson airs Wednesdays from 5:30-7 p.m. on WBOR 91.1 FM.

SPORTS

Women's tennis upsets Panthers with 6-3 win

The No. 18-ranked Bowdoin Women's Tennis Team defeated No. 15-ranked Middlebury on Saturday during the Bowdoin Tennis Alumni Weekend. The victory brings the Polar Bears to a 7-5 overall record.

The team won 6-3, with important victories from the doubles teams of captain Sarah D'Elia '09 and Emily Lombardi '12, and Rachel Waldman '09 and Charlotte Hitch '09

D'Elia remains undefeated in No. 1 singles play this season, as she coasted to a 6-2, 6-4 victory against Middlebury's Tori Aiello. In doubles play, D'Elia and Lombardi also triumphed in their 6-4 victory at No. 1 doubles. D'Elia was recently ranked No. 2 in the northeast, and the D'Elia/Lombardi duo was ranked No. 4 in the northeast.

"Sarah and Emily are playing really well together, and are comfortable with one another on the court, which makes it easy for them to dominate," Waldman said.

At No. 2 doubles, Waldman and Hitch won a vital match in a tiebreaker. The doubles pair had defeated Amherst in a tiebreaker the previous week.

Liz Pedowitz '10 reflected on the

team's attitude approaching their match against Middlebury.

"After our close loss to Amherst, were fired up and knew we could take Middlebury this weekend," Pedowitz said.

In addition, Waldman explained that the Bears were thoroughly prepared to face their Middlebury

opponents.

"We knew who we'd match up with in the singles lineup so we prepared individually for our matches," Waldman said. "I have played Clare Burke many times in the past, and I knew exactly how was going to play and what I

had to do to beat her."

The Bears began the singles matches already ahead 2-1 following the doubles play.

"It's always nice to be ahead af-ter doubles," Waldman said. "It takes the pressure off of singles and gave everyone confidence as we took four of the remaining six

The team looks to take on tonranked Williams away this weekend.

"On paper, Williams has a lot of talent, as they are the reigning national champions," Pedowitz said. "But we match up with them well, and look forward to the opportunity to step it up and win this

PUTTING THE HERT ON: First year Katie Herter prepares for a faceoff during the Bears' 10-7 victory over Williams.

Vomen's lacrosse beats Williams

After a string of tough losses this month, the women's lacrosse team returned to its winning ways at home on Saturday with a 10-7 victory over Williams.

surrendering goal to the Ephs' Tracey Ferriter, Bowdoin responded with two goals of its own from Lindsay McNamara '09 and tri-captain Libby Barton '09 to take the 2-1 lead.

A Williams goal briefly tied the score before the Polar Bears took control of the game with a four-goal run keyed by sophomore Ingrid Oelschlager's two goals. Williams fought back in the final

five minutes of the first half with a three-goal run of its own to get within a single score at halftime. That would be as close as the Ephs would get.

Bowdoin opened the second half with a dominating four-goal run to extend its lead to 10-5.

Williams attempted to get back in the game with a pair of late goals but the Polar Bears' strong passing and athleticism allowed them to maintain possession for most of the game's final 10 minutes.

"It was a great win and it came at a really good time," said Emily French'12. "It was a great team win, it gave us a lot of confidence.

Senior tri-captain Steph Collins-Finn (eight saves) keyed a strong defensive effort that held Williams to its lowest goal tally of the year. With the win, Collins-Finn tied the school record for wins (39) as well

McKenna Teague '12, McNa-mara, and Oelschlager scored two goals apiece while Becca Austin '10 keyed the defensive effort with five groundballs and three draw controls in the match.

With the win, the Polar Bears improve to 7-6 on the season (2-5 NESCAC) as they look to build momentum heading into the final two games of the regular seaso

Bowdoin will welcome Bates to Howard F. Ryan Field next Tuesday in a match up of NESCAC foes.

"I think we've had a really good week of practice, which has helped us prepare for them," French said. "We know they are a very aggressive and high-pressure team, so we've been preparing for that. It's definitely within our reach to beat them."

Men's tennis' 6-3 loss snaps 7-match streak

BY ROBBIE ZHANG-SMITHERAM STAFF WRITER

The Polar Bears fell 6-3 to Middlebury last Saturday, bringing an end to their seven-match win

The match was very close, with the No. 11-ranked Polar Bears winning two of the three doubles matches and the No. 4-ranked Panthers winning five of the six singles matches.

Coach Colin Joyner asserted that the team had a winning strategy coming in to the match, which was very clear from its strong wins in the No. 1 and No. 2 doubles positions

The combos of Oscar Pena '12 with Jamie Neely '10 and Stephen Sullivan '11 with senior co-captain Alex Caughron both played well, posting 8-6 wins over tough competition.

After a strong start in doubles play, the team started to hit some challenging obstacles. Pena, playing at the No. 2 singles position, lost 6-3, 6-0 against a tough oponent who seemed never to miss First year Josh Cranin was also dismissed with a 6-3, 6-0 loss at the No. 4 position.

Sullivan had some tough luck against a difficult player, Conrad Olsen. Sullivan was up a break and serving for the set at 5-4 when Conrad had two lucky points in which the ball caught the net and

dropped over. Oslen took the match 7-5, 6-3.

Tyler Anderson '10 also lost in straight sets, while senior co-captain Alex White took his match to a third set tie-break before losing. The sole win in singles play came from Caughron.

Winning in doubles was definitely a confidence booster, as-

"Our Middlebury match was a good experience for the guys," he said. "We'll be hungry for another shot at them which will likely hap-pen at NESCACs or in the NCAA tournament.

This weekend will be jampacked with games, starting with a non-conference match at MIT Friday, followed by matches against No. 6-ranked Amherst and No. 5-ranked Williams on Saturday and Sunday, respectively.

Sullivan is looking forward to the games this weekend, which will be good training as the season approaches NESCAC play and the NCAA's

"Amherst and Williams are always tough teams, so I'm sure we'll have some good matches," he said.

Joyner also sees the upcoming

matches as a good learning experience for the team.

These regular season matches are all about learning about our toughest competition and seeing where we need to focus our work to beat them," he said

Kerr, Borner, Head lead track at UNH

BY ANNIE MONJAR

Facing cold, drizzly skies last Saturday, the women's track team garnered three victories against the Jniversity of New Hampshire in Durham, N.H.

Though UNH's Wildcat Invitational was not scored, the strong performances in tough conditions ode well for the annual Aloha Relays this weekend, when schools from across Maine will come to Bowdoin to compete at the Magee-Samuelson track.

As usual, competitors in the 800meter run were particularly impressive, with Grace Kerr '11 taking first in the event with a time of 2:19.66, followed closely by Alex Peacock-Villada '11, who took second with a time of 2:19.78.

Quad-captain Kelsey Borner '09 won the discus throw with a per-sonal record of 38.99 meters, just 1.5 meters ahead of the second-

Teammate Shemeica Binns '09 also placed well in the throws, taking second in the shot put and third in the discus.

"Our throwers had an impressive day," said Coach Peter Slovenski. "They were able to stay right with

the Division I competitors."

Chris Head '11 won the pole vault by more than two feet with a jump of 9'9", over two feet higher than the second-place finisher.

"The atmosphere was pretty re laxed," quad-captain Dana Riker '10 said. "People wanted to perform well, but the consensus was that there was less pressure because it was a non-scoring dual meet. People responded differently to the weather, but overall I think people just focused on their events. Weather is something you have to be ready for during spring sports in New England."

The competition will heat up this upcoming weekend with the Aloha

Relays, which the women have won the past two years. Though the Bears are defending champions, and the favorites going into the compe-tition, they will need to focus their competitive energies on maintaining momentum and gearing up for

further championship meets.

"The team is psyched for the Aloha Relays," Riker said. "It's a fun meet with some good competition, and we have the benefit of hosting. It's always one of the favorite meets of the year, and inspires a lot of strong performances."

The Aloha Relays will prepare the Bears for the NESCAC Championship on April 25 at Connecticut College, where they hope to finish among the top three teams in the conference.

The NESCAC Championship is the first meet in the team's championship season, and will be followed by the New England Regional Championship the following week-end at Springfield College.

Baseball sweeps Colby, Tufts awaits

BY DANNY CHAFFETZ STAFF WRITER

Five years in the making, senior pitcher Pat Driscoll continues to lead the Polar Bears.

In the opener of a three game set against Colby last Friday, Driscoll pitched a complete game shut out on just five hits and no walks. He has now pitched 17 straight scoreless innings for the team and hasn't allowed a run in the month of April.

lowed a run in the month of April.

"He's having fun out there, but more importantly, he's having fun competing," said Coach Mike Connolly

The Bears went on to sweep Colby the following day, taking the first game 3-2 and the second 13-0. Carter Butland '10, started the first game, going seven strong innings with just two earned runs on the day. But once again, aside from a three-run first, the team's bats went cold for the majority of the game.

In the third game of the series, however, the offense responded well, exploding for thirteen runs off 12 hits. Joe Berte '09 and Brett Gorman '11 each drove in three runs to lead the team. Kevin Zikaras '10 also had three hits on the day and scored three times. Joe Pace '10 started for the Bears and struck out six in just five innings pitched. Once again, a reliable bullpen finished the game off with four scoreless innings. It was the first and only time. they were needed throughout the three

After last weekend, Bowdoin seems to have virtually eliminated Colby from the playoffs. The three-game sweep of Colby has also moved the Bears into second place in their division as they head into the weekend against Tufts University. And as Trinity runs away with the top spot, the race for the second and only other playoff spot seems to be a two-team fight between Tufts and

Bowdoin, as Bates continues to sit at the bottom of the league.

"Every series is as important as the next," Connolly said. "They're all playoff games."

But it seems that this series might be the season's deciding factor. Just a year ago, Tufts took two out of three from the Bears on their way to the playoffs, squeezing out Bowdoin in a head-to-head tiebreaker.

"There's no bad blood between the two teams I don't think, but it's definitely growing into quite a rivalry," said Connolly.

This year, Tufts is a mediocre 10-14 overall and 2-4 in the NESCAC going into the weekend.

The Polar Bears are now 16-12 on the season, 3-3 in the NESCAC and are currently sitting on a four-game winning streak. The team looks to continue its success as it makes its way down to Medford, Mass. The first game of the series is scheduled for today at 3 p.m.

ONE-HIT WONDER: Julia Jacobs'10 throws a pitch during her one-hitter against Bates last Saturday

The Nightmare After Easter

SEE EM

BY CHRIS ADAMS-WALL COLUMNIST

The sun was shining, and the weather was sweet. There was plenty of warmth and a cool breeze that blew by from time to time. People were finally in shorts donning them after their five-month sabbatical in the bureau. Yes, spring was finally in the air this past Wedne And with the spring came baseball with baseball came the Yankees; and with the Yankees came early Cy Young favorite A.J. Burnett (told you so). With America's pastime always comes not only the highly anticipated NBA play-offs (set to kick off next week), but the NHL postseason as well, featuring the Bruins and Canadiens once again in perhaps the best, most unappreciated rivalry in sports where the 1 and 8 seeds couldn't be more meaningless. Habby birthday to us, eh?

Yup, the tides had certainly turned, and life was looking brighter, cheerier, and positively upward. That was Wednesday morning as I was putting in my earbuds at the gym before a quick run on the old treadmill. And perhaps the only buzz-kill worse than that of Rachael Ray was what I witnessed on Sports-Center moments after changing the channel from the 40-year-olds magical cooking show. As I began to run, I kept my focus on the screen, highlights of last night's baseball and basketball games, and the 4-4 draw between Chelsea and Liverpool that sent the Blues through to the Champions League Semis flickering before my buoyant self; I was happy and healthy all at once. Then I saw him, and everything changed

He stared back at me in that same insouciant, reassuring manner I was so used to, his radiant smile gleaming from ear to ear like it had for the last five years of my life, and though his words were inaudible to me, his hubris still shone through eminently. And had I been less mature, I would have felt myself being hypnotized into his seductive trance; I would have believed his promises, what lay ahead in the future, and known that he would make everything all right. But just before I was vacuumed back in by his jaunty façade, I caught myself. This man was something that he was not; this man was a mirage. This was a man whose charm and intrigue were both complete affectations. This was a man

whose duplicity and hollowness had once fooled me and thousands of others into trusting him. This was a man who had burned so much more than bridges, who had now made an unexpected and inconvenient return into my life. This man was Isiah Thomas,

The former Knick executive and head coach had his latest headline hanging below his belying countenance that was as confusing as it was terrifying. Thomas named head coach of Florida International University Men's Basket-

ball Team! Here we go again. — 3 the Mills of the Donnie Walsh came on board as the Knicks new President of Basketball Operations last spring, not only did he personally replace Thomas in the front office, but he waited for the former Pistons legend to finish off a franchise worst 59-loss season before firing him as head coach despite his remarkable 56-108 record over two years. The last I'd heard, Walsh had allowed Thomas to stay on staff as a scout, sending him to Italy to seek out unknown talent, which, of course, was code for, "Stay the hell away from my basketball team." And now, leaving Tuscany as merely an afterthought, Zeke is indubitably the next head coach of the FIU Golden Panthers.

Just in case you need to refresh your memory on FIU Men's Basketball, let me tell you a little about the storied program: They play in the infamous Sun Belt Conference, competing against powerhouses Middle Tennessee St., North Texas, and South Alabama (Western Kentucky, too). The Golden Panthers finished 13-20 overall last year (7-11 in the conference; good for fourth in thee East division), and have not had a winning record since 1999-2000. They have a distinguished class of alumni that include and are limited to Raja Bell and Carlos Arroyo, and haven't made the NCAA tournament since 1995. Considering Thomas' impressive record with the Knicks, FIU

just might be a perfect fit.
For Athletic Director Pete Garcia, reeling in the big fish that is Thomas to head up an ambiguous basketball program seems to be an innocuous a move as any. For one, he gets a coach, who, despite his more recent failures, has had success in the past with the Indiana Pacers, guiding them to the playoffs each full year in charge from 2000 to 2003. Also, Garcia will be happy to know that most sports fans around the country have now heard of Florida International University, since Thomas' appointment

effectively puts the Golden Panthers of the map...but at what expense?

This is the same Isiah Thomas who purchased the Continental Basketball Association back in 1998, and drove it into the ground within three years with his haphazard spending and severe mismanagement of the now defunct league.

This is the same Isiah Thomas, who, at the end of a game two years ago against the Denver Nuggets, could be seen mouthing to Carmelo Anthony from the sideline, "Do not go to the hoop right now" with his trademark smirk that ensued, only seconds later to watch as Anthony's teammate J.R. Smith drowe to the hoop only to be mauled by Knicks guard Mardy Collins, which sparked an all-out brawl, which may or may not have been instigated firstly by Thomas himself

This is the same Isiah Thomas who was found guilty in a sexual harassment suit by a co-worker at Madison Square Garden, who claimed that the Knicks head coach had made sexual advances toward her, and repeatedly told the woman that he loved her, which resulted in the victim being awarded \$11.6 million in the lawsuit.

This is the same Isiah Thomas who is the new sheriff in town at FIU, and who Garcia was referring to when he told the press on Monday that "...we are getting a great human being." The term destroyer might be slightly more accurate.

Thomas sat in front of the flashing cameras Monday afternoon on FIU's campus, his perfunctory grin scintillat-ing, and soothing voice declaring that he enjoys challenges, especially taking something from the bottom and building it to the top, a tune I remember hearing once before. The world of reng now awaits him, a whole new arena for him to imbue his players with deceit and false promises. But even if you still don't trust Thomas-which urely I do not-it's difficult to slander his constant and unwaveringly positive attitude. And if Thomas' atypically magnanimous decision to dona entire first year's salary to FIU's Athletic Department is any indication that he has turned a corner (and I really hope that he has for his sake; not only on the basketball court, but also behind the scenes where it matters more) then maybe there's a reason to believe in Isiah Thomas one more time. That, and we Knicks fans would really appreciate

Softball to play Jumbos

BY ADAM MARQUIT CONTRIBUTOR

The Polar Bears traveled to nearby Lewiston last Friday to take on the Bates Bobcats for the first of a threegame NESCAC East division series. Bates came in hot after winning four of its last five games and decisively beat the Bears 8-1. Bowdoin committed seven errors behind starter Karen Reni '09, who took the loss. In six innings of work, Reni (3-4) allowed five earned runs on seven hits.

Clare Ronan '10 provided the Polar Bears with their only run of the first game as she led off the second inning with a solo home run. Ronan added two more hits to lead the team as Hillary Smyth '12 and Shavonne Lord '10 had two hits of their own in the loss.

Bowdoin hosted the Bobcats for the final two games of their series at Pickard Field on Saturday. After six no-hit innings for Bowdoin, Julia Jacobs '10 surrendered Bates' only hit of the game with three outs left in a 4-0 win. The Polar Bears scored all four runs in the first three innings as Jacobs (6-5) shut out her oppo-

"Twirling a one-hitter to any NE-SCAC team is a noteworthy feat," Reni said.

The all-important third game of a split series did not go the Bears' way as Bates returned the favor with a 5-0 shutout win. After her success in game one, Coach Ryan Sullivan gave Jacobs the nod to start game two. The only hit Jacobs gave up was a bases-clearing three-run double as she took the loss after pitching just three innings.

"Losing the series to Bates this past weekend has made making playoffs a lot harder," said Reni. "At the same time, there is a sense of urgency to dust ourselves off and start playing to the potential we know we have."

The Polar Bears' NESCAC record falls to 2-4.

On Tuesday the Polar Bears hosted Thomas College for a non-conference afternoon doubleheader. Jacobs took the mound once more in game one giving up just one run in six innings. The Bowdoin bats rebounded from the Bates series, amassing 14 hits against Thomas in a 9-1 victory. Ronan went four for four from the plate and Ali Coleman '09 drove in four runs.

Game two looked to be much of the same as Bowdoin scored four runs in the bottom half of the first inning. Coleman drove in two with her third home run of the year. Thomas fought back, however, tying the game at five in the fifth inning. Reni relieved Michelle Wells '12 to hold the Terriers as the game ended in a 5-5 tie.

The Polar Bears added two more wins on Wednesday against the University of Southern Maine Huskies (5-25). Reni pitched five strong innings in game one as she led the Polar Bears to a 12-1 mercy-rule victory. First year Courtney Colantuno drove in two runs while going three for four at the plate with two doubles.

Game two looked ominous as the Huskies jumped out to a first inning 2-0 lead. Bowdoin fought back in the second, plating four runs. Colantuno earned the win in relief for Reni, pitching three scoreless innings. The Polar Bears added one more run in the fourth inning and ended the game with a 5-3 victory. With the sweep of USM, Bowdoin improves its overall record to 19-

Sullivan became the first coach in Bowdoin softball history to surpass the 100-win mark after the two wins against the University of Maine at Farmington last Thursday.

"It's always nice to achieve milestones, but in this regard it certainly is about the players who play and achieve on the field," said Sullivan.

He looks to keep the wins coming as the Polar Bears travel to Tufts this weekend for three divisional games to battle the undefeated Jumbos (29-0, 9-0). "The difference for softball is that in the divisional format, only the top two teams from the East will qualify for the NESCACs, so any loss really puts pressure on the other contests," added Sullivan. "It creates a great competitive atmosphere."

WOMEN'S LACROSSI

Men's lax falls to Colby in overting

After a tough overtime loss to Colby on Wednesday, the men's lacrosse team will have to claw its way toward home conference playoff game. With two crucial games remaining, the Polar Bears will look to snap a four-game losing streak.

"We just need to begin playing with more confidence in ourselves as individuals and one another as teammates," said senior quad-captain Cul-len Winkler. "Right now effort is defi-nitely not an issue, but somewhere along the way we just can't turn desire into results."

The skid includes losses to NES-CAC rivals Middlebury at home, and Williams on the road, as well as the shocking overtime loss at Colby. All of the games were extremely tight and in three of the four losses Bowdoin fell by only one goal.

"One-goal games are always difficult," said senior quad-captain Harry Ashforth. "There is always a fine line between winning and losing in the NESCAC."

Bowdoin (7-5, 4-3 NESCAC) lost at Colby on Wednesday, 9-8 in overtime. The Polar Bears trailed 7-5 heading into the fourth quarter, but notched three straight tallies to take the lead. However, Colby tied with under two minutes left in the game and scored just one minute into the overtime period to take the win.

Winkler said that suffering a loss after coming so close to a win is "really frustrating because everyone beats themselves up about their own individual mistakes that could have potentially led to that game-tying or game-winning goal. But it's important to remember that you win and lose as

Rob Halliday '09 scored twice for the Polar Bears, as did his brother, sophomore Russ Halliday. Junior Adam Tracy and sophomore Kit Smith each notched a goal and an assist.

Last Saturday, Bowdoin fell at NE-SCAC rival Williams, 10-7. The Ephs' stingy defense stifled the Polar Bears and held Bowdoin scoreless for the first 28 minutes of the contest.

Near the start of the third quarter Bowdoin was down 8-3, but a fourby just one heading into the final frame. But the Ephs managed to hold Bowdoin scoreless in the fourth quarter, while adding two tallies of their own, to win the game. Ashforth and Winkler each notched two goals and an assist to lead the Polar Bears.

"If those one-goal games went the other way, we would be looking at a pretty successful season right now," Winkler said. "Unfortunately we've been on the losing side and can't seem to turn it around."

Tuesday, Bowdoin heads to Bates for a crucial NESCAC showdown. The Polar Bears will need to notch a win against the Bobcats (3-8, 1-6) if they are to hold on to the fourth spot in the league.

But every conference game is tough, especially on the road

We need to come togethe team at both ends of the field," Ashforth said. "We need to get our confidence back, and that starts with play-

ing together as a single unit."

Next Friday night Bowdoin will host Tufts, currently second place in

OBLY TOO CAR PREVENT FOREST FINES.

Men's track looks to sit atop Maine

BY CHESTER ENG

The men's track and field team remembers the heartbreak from last spring's second place finish at the Maine State Meet. Despite an overall terrific performance by the entire team, it was still not enough to beat archrival Bates, who outscored Bowdoin by only two points to win the state title. With this emory still fresh in their minds, the Polar Bears say that they are determined and excited as ever to seize the state title at Bates on Saturday.

The entire team is psyched for the Maine State Championship," said Thompson Ogilvie '10. "We haven't won the title in about six years, so we are very

The state meet has a lot of tradition and close finishes," said Coach Peter Slovenski. "It's always very competitive

The meet will feature the best track and field teams from Maine, and there is no doubt that Bowdoin will face a tough field. Bates is favored to repeat as state champions, and Bowdoin and the University of Southern Maine are a toss-up for second place. Although the Polar Bears dominated Bates at this past season's winter indoor state meet, they

know that they cannot safely assume similar results at this weekend's outdoor

We have been preparing for this meet both physically and mentally. The competition will be tough for us from Bates because of their strength in the field events," said Ogilvie. "Even though slaughtered the Bobcats during the indoor track season, in outdoor track Bates is a whole different animal-like a bobcat mixed with a 20-foot alligator. If we perform to our potential, there is no chance of the bob-igators defeating the Polar Bears.

With another strong showing against Division I opponents at the University of New Hampshire Wildcat Invitational last Saturday, Bowdoin showed just how much potential it has to win the win the

"We had good performances on the track, in the jumps, and in the throws," said Slovenski about the UNH meet. "We're entering the championship part of our schedule this weekend, and we think we're ready for everyone on the team to reach a personal best in the next two or three weeks."

On the track, Zach Winters '11 finished first in the 400-meter dash with a time of 50.82 seconds. Ogilvie was also

sive with second-place finishes in the 800-meter and 1500-meter runs.

Without a doubt, the most extraordinary performance of the day came from the 4 x 100-meter race. Since Kyle Hebert '10 was unable to run due to a harnstring strain late last Thursday, the Polar Bears had no choice but to put together a new lineup that had never run with one another before. Nonetheless, the relay team of Winters, Damon Hall-Jones '09, Tim Fuderich '10, and Chris Martin '12 overcame initial adversity during a nearly disastrous first baton exchange between Furderich and Winters to win the race in thrilling fashion with a time

In the field. Nick Ianetta '11 took first in the javelin throw with a toss of 52.85 meters. Hall-Jones capped off his extraordinary day and displayed great versatility by not only placing second in javelin, but also doing the same in the 200-meter dash.

"These pre-championship meets [UNH and Princeton] are good tune-ups for the chunk of the season that most of our athletes peak for," said Hall-Jones. "We've performed well against good competition and that's what we've come to expect on this team. I'm sure that the meet will be hard-fought."

Sailing finishes mid-fleet in regattas

BY CHARLOTTE RYAN STAFF WRITER

Despite wind conditions preventing the final races, Bowdoin sailors competed in the Friis/Marchiando team race at MIT and Tufts and finished sixth of 12 teams in the Alymer's Trophy.

The team placed sixth after a fourth-place finish in A division and seventh in B division.

On Saturday the Polar Bears sailed in big breeze on the Charles River at in FJs. Eight teams competed at MIT, Bowdoin included, and another eight raced at Tufts. After completing two round robins, the four best teams from each venue competed at MIT on Sunday and the bottom four teams sailed at Tufts.

Viktor Bolmgren '11, Alex Takata '12, and Doria Cole '09 skippered in the team race with crews Erin Taylor '09, Coco Sprague '11, Audrey Hatch '10, and Charlotte Ryan '12.

Bowdoin finished in the bottom four after several close races against some of the top-ranked team race schools in the U.S.

"Roger Williams and Yale are in the top five team race teams in the races against both," Coach Frank Pizzo said. It was a good opportunity to race against teams that will be at the team race qualifiers in two

The wind was blowing over 20 mph on Sunday at Tuft's Mystic Lake. There was a lineup change for the Polar Bears on Sunday. Pete Wadden

'09 sailed at Tufts while Cole sailed in the fleet race at Mass. Maritime Academy. The race was postponed due to high winds. Several hours later the teams began the races without iibs.

Bowdoin won its first race of the day, but in the warm-up for the secrace Bolmgren and Ryan's rig was loose and the mast snapped in

Tufts called the race due to boat breakdowns and high winds.

At the Alymers Trophy on Saturday, Wadden skippered in A division with crew Jeffrey Goodrich '12. Billy Rohman '11 skippered in B division with crew Ben Berg '12.

The team is preparing for fleet race qualifiers this weekend at Bos-

OPINION

BOWDOIN ORIENT

BSG President

t Monday night's Bowdoin Student Government (BSG) debate, candidates for officer positions answered a variety of questions about their goals, dedication, and experience. During the debate between the two presidential hopefuls, one thing became clear: Mike Dooley '10 makes the grade in all three categories. In Dooley's candidacy statement, he vows to make BSG a more relevant presence in student life at Bowdoin. This is a goal that Dooley has already accomplished in many respects through his role as vice president for facilities for the last two years.

Dooley has worked to provide important, tangible services to students-extending gym hours, organizing the airport shuttle, providing newspapers in the dining halls, and subsidizing Brunswick Taxi rides, to name a few. These achievements indicate that as a leader of BSG he will continue to create positive, meaningful change in student life. For this reason, we endorse Mike Dooley for

At the same time, however, we lament the dearth of candidates running for open positions; with only two students in the presidential race, there are admittedly slim pickings. In the past four years, a total of seven students have campaigned for the position, a dismal average of less than two a year. This is due, in part, to the provision in the BSG constitution that mandates presidential candidates have previous BSG experience.

In both 2006 and 2007, the presidential candidate ran unopposed. Last spring, an Election Reform Commission, formed by BSG, recommended removing the eligibility requirement. The student body voted on a measure to waive the requirement, and while a majority of students were in favor of the amendment, the necessary twothirds did not support it.

The primary argument behind the eligibility requirement is that BSG is a complicated beast, and experience is crucial to running it effectively. However, in a recent interview with the Orient, current BSG President Sophia Seifert '09 said that while she hoped students would be involved beforehand, she thinks that "student government does not need institutional memory to reside in one person."

First and foremost, the role of BSG President is one that requires strong leadership skills. This is a quality possessed by numerous Bowdoin students—certainly far more than the seven who have run in the past four years. The eligibility of more contestants would help to ensure a more democratic process. We urge students on BSG and across campus to bring this issue back to the forefront.

The editorial represents the majority view of The Bowdoin Orient's editorial board, which comprises Nick Day, Nat Herz, Will Jacob, Mary Helen Miller, and Cati Mitchell.

College abused right to monitor research

To the Editors:

I am distressed and disappointed to see how the College has handled the ongoing dispute with Professor Goldstein over his distribution of a paper containing a critical treatent of Bowdoin's academic culture ("Investigation of professor's study draws to a close," April 10). have no especially strong feelings about the individuals in-volved or the contents of Professor Goldstein's paper, but I am deeply troubled to see the College apply ing rules, which are meant to ensure the quality and credibility of work published by our faculty, in a punitive fashion.

Since the inquiry into possible research misconduct followed directly on Professor Goldstein's alleged disruption of admissions information sessions, we can only conclude that this was the reason for the investigation. Apparently the College has a very lax policy towards the research conduct of the faculty, only taking an interest in such matters when they might relate to a personnel dispute or an issue of public relations. Worse still is that I cannot avoid the conclusion that the College is using its standards for research conduct as a means to retaliate against someone it views with displeasure.

The complaint against Professor Goldstein's behavior should stand or fall on its own. By trying to use allegations of research misconduct as a retributive tool, the dean for academic affairs is setting a terrible precedent. The message that seems to come from this matter is that high standards of research conduct are not regularly enforced at Bowdoin, but that students and faculty alike must now fear that honest errors in their work will become a liability if their ideas or personalities fall out of favor with the administration.

Sincerely, Adam Hall '09

Bowdoin effectively balances school, sports

To the Editors:

The general point that college athletics (and high school and junior sports) have grown in size and importance is unequivocal. Professor Goldstein's reported methodology ("Study examines grade infla-tion, athletics," April 10) strikes me as a very blunt instrument indeed. The last thing we need is another college rating system that misses the point.

As a parent of a current college athlete (and a long-time teach er-administrator at a secondary school), I know that Bowdoin in particular and the NESCAC in general have done a good job maintaining a balance. One only need look at practice schedules, curricular restrictions, and operating budgets in NCAA Division I athletic programs to see how far out of balance things can get.
Should Bowdoin or other col-

leges in NESCAC cut the number of varsity teams? I don't think so.

Having watched this happen, from a distance, at universities and colleges across the country, I don't think anyone wants to go there. At universities such as Penn State, which have a low percentage of athletes in their student bodies, athletes form a separate class of people sequestered in the own athlete dorms, fed in special dining halls, and tutored by a cadre of academic advisers.

In the end it is possible to excel both as a student and as an athlete (Bowdoin clearly encourages that), and when that intersection happens, both endeavors benefit, will the greater society that students enter upon graduation.

Sincerely, Peter Neely, Parent '10 College Counselor Thayer Academy Braintree, Mass.

Bowdoin athletics help student development

I was surprised to read the omments of Professor Goldstein ("Study examines grade inflation, athletics," April 10) which ranked Bowdoin at the bottom of a report concerning the relationship between academics and athletics.

In my opinion, the best aspect of Bowdoin is the complementary nature of adademics and athletics at the College. As a 12-season varsity athlete on the cross country and track teams and a chemistry major, I was successful in both areas, a result I attribute to the wonderfully supportive faculty and coaching staff at Bowdoin.

Some of my best memories from Bowdoin include the times I ran with my chemistry professor and engaged in intellectual discussions with my coach. In my current endeavor as a Ph.D. student, I have realized that the lessons I learned through Bowdoin athletics-determination, hard work, teamwork, and most importantly, the ability to push oneself beyond what seems reasonable-are at least as valuable as anything I learned in a classroom for my success as a scientist and my general well-being.

I know that my former team mates and guess that many other Bowdoin athletes would agree with me that Bowdoin athletics served to enhance their personal and intellectual development during col-lege, not detract from it.

Sincerely, Kristen Brownell '07 Stanford University Stanford, Calif.

Finance minor causes excitement, concern

To the Editors:

The announcement of a new economics and finance minor in last week's Orient ("Minor in economics and finance to be offered at College next year," April 10) greeted me with both excitement and concern.

As a graduating senior, I will never experience this minor, but I can say that had it been available in previous years I certainly would

have considered it, as I think many Bowdoin students with an interest (although not necessarily career aspiration) in finance would have.

I caution the economics department to be careful, however, in how it approaches the new minor and finance education in general.

As we are in the midst of the worst financial crisis in decades, the department would do well to make sure that the program not only focuses on teaching students headed for the financial sector how to make money, but also focuses on financial ethics, long-term risks,

It seems that a missing sense of all three of these contributed greatly to the mess in which we find ourselves.

Sincerely, Eamonn Hart '09

Greater oversight for columnists is needed

To the Editors:

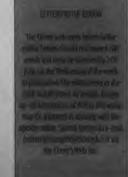

I would like to address one of the many crass passages from Ross Jacobs' column in your latest edi-tion: "You will find gays and lesbians trying to figure out how to reconcile their pagan sexualities with their desire to participate in the western traditions of marriage and family" ("Prospective students: Choose Bowdoin to confront intellectual tonformity, April -10). That's right, you seriously printed that sentence.

I don't want to get into a huge PC argument about the merits of calling homosexuality pagan beridiculous to have a real conversation about. The real issue is that nonsense like this makes it past the chopping board in the first place.

I find it particularly annoying because I agree with Jacobs' basic argument, at least the argument I gleaned from his rambling incoherent monologue. Bowdoin is too dogmatically liberal. People here do tend to reinforce their beliefs instead of questioning them.

Like many students here, I have occasionally voted for a Republican in the past and will probably do so again in the future. I just wish the Orient would get columnists who could argue from the right with the intellectual vigor that conservatism deserves.

Sincerely, Darius Alam '09

LETTERS TO THE FOITOR

Chalkers should come forward, engage in campus discussion

To the Editors:

In light of Tax Day occurring this week, I have seen various forms of political advertising all around campus. While I praise these people for taking time out of their precious Bowdoin lives to write messages in front of campus buildings, I do not fully understand the extent to which these messages served a purpose.

Rather than simply assuming that they served the goals of Republicans at Bowdoin, it appears as if these messages have negative connotations as well. Honestly, after seeing controversial messages like "Dethrone the Welfare Queen," this appears to me to be an issue surrounding race.

Now, why chalk? It is going to rain in two days; therefore, while the messages will be erased, they will not be forgotten. Whoever is a part of this incident should step up to the plate and talk about, rather than chalk about, their emotions regarding the economy, the Obama presidency, or even race in this country. Why are they afraid to speak up about it?

None of these actions have been explained. So let's have a forum rather than going back and forth like children writing notes to each other.

Sincerely, Awa Diaw '11

Vote in BSG elections and end the current leaders' incomptence

To the Editors:

As the Orient's commendable weekly reports make clear, the current student leadership is worth less. The past three weeks have been spent debating the nature of a \$3,000 food handout during Ivies. Much of the preceding month was spent discussing "gender-neutral housing," a policy BSG has no con-trol over. Meanwhile, the SAFC is out of funds with a month left of school, and mismanaged movieticket subsidies are persistently over budget. The 2009 Class Coun cil is charging all seniors, at mini-mum, \$50 for Senior Week because its leadership has frittered away its funding on useless gifts (including two sets of koozies and hundreds of extra class sweatshirts) and numerous Sea Dog pub nights.

This incompetence is hardly contained to recent events. Last year at this time, BSG wasted \$5,500 for a little-attended "Block Party" and we lost our newspaper subscriptions for a month because BSG took three weeks to even notice that the fund had gone empty. All the while, BSG representatives bickered over unisex bathrooms and, yes, "gender-neutral housing."

ing."

This should remind students that elections do matter. You are selecting the people who will be responsible for spending a portion of your tuition money. Examine the records of the many incumbents seeking re-election today and ask yourself if these people really deserve another year in office.

Sincerely, Chris Adams '09

Of deniability, dethronement, and 'welfare queens'

RY SCOTT MACEACHERN

Euphemisms are, by their nature, tricky things. They are designed to simultaneously stuggest ugly topics and avoid them. They allow interested parties to talk about sensitive issues in code, while at the same time maintaining a plausible deniability concerning the subject matter and their overall goals. They are contextual, insinuating through proximity what they do not dare to claim outright. The use of euphemism is a good way for those of a delicate nature to hurt people, because euphemisms allow for an injured retreat under challenge, with claims of pure intentions and unfortunate misunderstandings.

Euphemism is the antithesis of careful and interesting analysis, in the way that it replaces clarity with innuendo, daring with the provision of a safe retreat.

On April 15, Bowdoin saw a striking deployment of euphemism on campus, in the context of chalk-drawn slogans against taxation and the current presidential administrations financial policies. A variety of these messages appeared on sidewalks around campus, but one in particular invites further examination: "De-throne the welfare queens," written in bold yellow chalk letters on the sidewalk just west of Adams Hall.

The euphemism "welfare queen" has a long and dishonorable history

been around since at least the 1960s, but was popularized by Ronald Reagan's exaggerated description during his 1976 election campaign of a Chicago woman cheating the welfare system. It has been a racialized image since that time. Over the next 20 years, the idea of the "welfare queen"-if not always the term itself-remained as a central element in conservative efforts to deploy racial animosity as a political strategy in the United States. Welfare queens" were poor, urban, improvident, undeserving of aid, and above all, African-American; they lived off the hard work of deserving, middle-class white folks.

The stereotype of the "welfare queen" was probably surpassed in popularity among conservatives only by the much older and even more pervasive American stereotype of the threatening, violent black man, used, for example, in George H.W. Bush's "Willie Horton" attacks during the 1988 election campaign. Over a period when the universal nature of civil rights has become more widely accepted in the United States, naked appeals to racism have become less and less useful in American politics. Under those circumstances, euphemisms like "welfare queen" became especially handy, insinuating the old themes of race to those animated by them, while maintaining some plausible deniability for politicians who

ade use of them

After its role in the 1976 Republican primaries, the concept of the "welfare queen" became important again in the mid-1990s, during debates over the role of welfare programs in American society. These debates culminated in the 1997 abolition of the Aid to Families with Dependent Children (AFDC) federal assistance program, which restricted or removed many of the support mechanisms used by people on welfare. In principle, Bill Clinton's 1993 promise to "end welfare as we know it," and the subsequent end to AFDC, would imply the end of the idea of the "welfare queen"-but a negative stereotype for poor, urban black women was simply too useful for some conservatives to set aside and forget about. It has cropped up periodically in American politics since that time, in different forms and with different values.

And thus we come to Bowdoin, and mid-April in 2009. In a political and economic season when poor people are not in fact primary targets of conservative animosity, "Dethrone the welfare queens" appears in big. bright letters on the sidewalk directly below the offices of Bowdoin's Africana Studies Program, in Adams Hall. As we have noted, in euphemism, proximity and innuendo are everything.

There's no direct or obvious con-

nection between a race- and classloaded term like "welfare queen" and the themes of the "Tea Parties" being organized around the country, but at this point there hardly has to be. "Welffare queen" and the different kinds of animosity it represents have become a conservative reflex, deployed in this case only for their juvenile shock value and their ability to hurt people. Euphemism has hardened into cant, and cant, especially, has no place at a school like Bowdoin.

Where do we go from here? We are very happy to see dialogue, debate, and even protest at Bowdoin—but when such activities are juvenile and unthinking, they need to be identified as such. At the least, we would like to encourage creativity in protest on campus. Our students are generally smart and inventive people: Bowdoin students should be able to come up with their own causes and ideas, without having to borrow ugly and obsolete slogans from a generation before theirs.

Scott MacEachern is a professor of anthropology. The following members of the faculty and staff, all working in Adams Hall, would like to be noted as co-signers of this op-ed: Rosemary Armstrong. Pamela Ballinger, Joe Bandy, Susan Bell, Jan Brunson, Gabrielle Foreman, Eileen Johnson, Matt Klingle, Seth Ovadia, Roy Partridge, Jill Pearlman, Krista Van Vleet, and Olufemi Vaughan.

Choose a presidential candidate who can embolden BSG

IMAGINING BOWDOIN BY ROSS JACOBS COLUMNIST

Elections for Bowdoin Student Government begin today and you need to decide if, and how, you are going to vote. But, in order for you to believe that voting is a worthwhile use of your time, you need to understand why, or if, BSG matters. This is exactly what I was wondering as I walked around campus this week taking note of the hundreds of posters plastered on every wall—specifically, I asked, "What exactly is BSG for?"

For these kinds of inquiries, it is always best to consult those who have done the most to craft the vision and goals of the institution. I began with DeRay Mckesson '07; he told me how the organization came about. Apparently, BSG as now know it was established in 2001 with the tacit goal of recreating Bowdoin's community life after the removal of the fraternities. The first presidents were Jason Hafler '04 who served from 2002-2004 and Haliday Douglas '05 who served during the 2004-2005 school year.

Mckesson, who will undoubtedly go down as the most charismatic Bowdoin student of the decade, brought a rare, creative exuberance to BSG. He expanded the scope of BSG and won the institution a new sense of legitimacy. When I touched based with him, he accentuated three goals, the first of which was "solidifying the structure and purpose of BSG." Beyond structure, he tried "cultivating and supporting a strong sense of student leadership" through enabling cooperation between BSG and the class officers. Finally, and most

ambitiously of all, he "positioned BSG to be seamless and intimately involved in every facet of College life."

Mckesson swung hard using a driver, and then a 4-iron, to get us as close to the green as possible. Yet, his goals were so lofty that he had a tendency to neglect the details. During his two-year tenure, he established, stabilized, and energized BSG, but his overreaching left us in the bunker.

Then came Dustin Brooks '08 in 2007-2008, another government major and a future sovereign in the state of Maine. Dustin strolled in with his glasses and sand wedge, declaring himself to be the man who would refocus BSG after Mckesson's orgy of grandiosity. I spoke to Brooks as well and he said the goals during his term were more sober indeed—he stressed "creating a voice for BSG in academic policy discussions" and "increasing the transparency of BSG," while "improving the BSG election process."

Brooks got us to the green just before Sophia Seifert '09 was elected president this year. Her administration took out the putter and focused on important details. When we touched base, she emphasized "keeping a balanced agenda," going beyond the handbook to get "involved with student's lives" while "developing specific administrative relation ships." According to rising BSG star Rasha' Harvey '12, the central accomplishments this year includ-ed: the installations in the union, movie ticket subsidies, airport shuttle service refinement, and a health center policy investigation. BSG is a trustworthy institution that can get stuff done.

Now we can see why this year is so important—with the first hole finished, we need a real swinger to After reading their platforms this morning, we will choose one of them as our president. As we consider how to vote, we should ask ourselves—which candidate is better prepared to seize the opportunities created by the legitimacy previous BSG leaders have worked so hard to earn?

propel BSG down the new fairway. From watching Monday night's debate, I am confident that both Rutledge Long '10 and Michael Dooley '10 can bring BSG the big ideas it needs to succeed.

Long is a junior from Charleston, a former football player, an English major with surprisingly tremendous depth, and has single handedly breathed life into the Poeting Club. Dooley is a junior from Long Island studying Arabic and government, and is largely respected by BSG members for his graceful composure and for his diligent work as vice president for facilities, the capacity in which he secured us newspaper and airport shuttle services. After reading their platforms this morning (see pages 14-15), we will choose one of them as our president. As we consider how to vote, we should ask ourselves-which candidate is better prepared to seize the opportunities created by the legitimacy previous BSG leaders have worked so hard to earn?

Thanks to three solid presidencies that laid the groundwork, the next president can finally put aside petty concerns and take a part in the shaping of Bowdoin's culture. Instead of asking, "What hassles can we eliminate to make student life as easy as possible?" BSG has earned the right to lift its gaze to a higher horizon and ask, "What trends might be interfering with Bowdoin's cultural task of educating great human beings?" and "How do we engage fellow students in the quest to overcome

these obstacles?" BSG needs to join the administration and faculty to help Bowdoin live up to its high reputation for giving birth to scientists, geniuses, scholars, magnificent political leaders, activists, philanthropic titans, and poets.

BSG can now find time to address our noble fear-cultural sterility. If there is a yearning I see in the students, faculty, and staff here, it is a yearning to believe that we dwell, and that Bowdoin students will forever dwell, in a womb capable of birthing great human beings. With the financial crisis threatening to distract students from their studies, urgent questions about the proper role athletics, rise of technologies like the cell phone and internet, a student body without the common language provided by shared intellectual experiences, and the possibility of careerism and consumerism seeping even further into student life, BSG has its work cut out

BSG is the only democratically elected body representing the whole school, and given the real cultural challenges we face in this digital age, it is its duty to help Bowdoin students hear a call transcending everyday hassles. It is clear to me that both Long and Dooley have the strength and passion to recommit the Bowdoin student body to a collective reach for excellence. The real question is whether they will get a council and a student body that will let them shine forth on a new stage of politics at Bowdoin

Let students, not College, condemn hateful speech

At the beginning of the year, President Barry Mills addressed the community in an e-mail, remind-ing us of the existence of the Bias Incident Group on campus. The group's purpose is to address "...defacements, graffiti, or other hateful expressions against campus groups. Last week, an unknown group en-tered the chapel and posted several pictures protesting the Roman Catholic Church's stance on gay marriage. One picture depicted the Virgin Mary with the word "slut" written on the back. At the time of writing, the Bias Incident Group has vet to issue a statement condemning the actions of these maladjusted individuals.

Throughout my years at Bowdoin, the Bias Incident Group has been called on several occasions to address particularly atrocious incidents. In 2005, the group issued a statement condemning an act- of homophobic vandalism. The group convened again in 2007 to issue a statement addressing homophobic phrases directed towards an openly gay student on campus.

If the past two decisions are any indication of how the Bias Incident Group may act, it wouldn't be a surprise if the group convenes again to ddress the vandalism in the chapel. In all three cases, some form of defacement and hateful expression was directed towards a specific group on campus.

However, with the recent spate of free speech issues on campus, I am forced to wonder whether it is wise to continue administrative regulation of the content of speech through College policies and the Bias Incident Group. Many of the latest free speech conflicts on campus have involved the regulation

With the recent spate of free speech issues on campus, I am forced to wonder whether it is wise to continue administrative regulation of the content of speech through College policies and the Bias Incident Group.

of content. This sort of regulation would not be allowed at an institution bound by the First Amendment (i.e., a public university).

Take for example, the recent con troversy over the use of Greek let-ters to advertise a Meddiebempsters event. Although the matter was eventually deemed to be a miscommunication of College policy, it is doubtful that the miscommunication would have occurred had the College avoided content regulation

The vandalism in the chapel provides an opportunity for the College to move in a direction that is more protective of free speech. But rather than assembling the Bias Incident Group, the College, as a pluralistic institution dedicated to free expression, ought to maintain a neutral Students on the other hand, should pick up the slack by taking a more proactive approach in condemning the acts as despicable.

By placing a greater burden on students to condemn inappropriate speech, the College avoids the difficulties of having to determine what speech should and shouldn't be uttered on campus. Furthermore, students will also be more prepared to deal with issues outside of the Bowdoin bubble. After all, the Bias Incident Group cannot protect students against hateful speech for the rest of their lives.

Jeff Jeng '09 is chair of the Bowdoin College Republicans.

The Ivies one-hit wonders we need

I am beginning to notice a trend in the performers whom we attract for the Ivies Weekend concert. In addition to being unable to break away from hip-hop, the model for our selections seems to be one "big name" artist who has three decent

This year we are having Sean Kingston who will sing "Me Love,"
"Take You There" and "Beautiful
Girls." Last year we had Naughty
by Nature who sang "OPP," "Jamboree", and "Hip Hop Hooray." And
before that we had Kevin Lyttle who sang "Turn Me On" three times in a

While I have had a good time at Ivies concerts, I feel that this rubric of one big name with three passable songs has got to go. What I am suggesting for next year's Ivies is a complete reversal of this trend. Instead of one big name with three decent songs, I want three small names that have only one awesome song each: three artists who are completely unremarkable outside of that one epic ballad which was clearly beyond their capacity as musicians. Imagine a trifecta of one-hit wonders, each unleashing that single song which makes you dance in the shower, sing in the car, and think "What the hell are those guys doing now?

Our selection of single-serving performers would not be easy. There are all too many musicians whose careers can be summed up in four and half glorious minutes. Such musicians are in no way busy and would all be psyched to pick up a paycheck. We need to pick three artists who have each produced a solitary masterpiece that is perfect

To start the concert off right, we would need a track that sets the tone for the rest of the afternoon; a song that sends the unmistakable message of "Let's party." The choice, Hanson, LEN, and LMNT are not "big names" in most people's world. In fact, they are very small names in almost everyone's world.

then, is obvious: "MMMBop," by Hanson. While many one-hit wonder bands have split up, Hanson has the bond of brotherhood keeping them together. In addition to "MMMBop" contains thought-provoking lyrics such as "You have so many relationships in this life / Only one or two will last" and "Can you tell me which flower's going to grow?" and "Mmmbop, ba duba dop doowop." "MMMBop" came out in 1997, making it 12 years since any-body has cared about Hanson. Our solicitation of their services will be a welcome relic of the past.

The intoxicating "MMMBop" will leave everyone thirsting for more of that upbeat 90s sound. To fully satiate this craving, there is really only one option for the next track, "Steal My Sunshine," by LEN. The song hits you with meticulously crafted lines such as "my sticky paws were into making straws out of big fat slurpy treats" and "now the fuzzy stare from not being there on confusing morming week impaired my tribal lunar-speak." Lines like these defy both common logic and grammatical standards, further enhancing the intellectual mys-tique of the song. I think it would be easy enough to persuade LEN to join us for Ivies. They live in Nova Scotia, only a five-hour ferry ride

For the grand finale, we will need to raise the energy significantly. The final track should be one which effectively caps off an epic concert and parlays the show into a raucous Saturday night. Quite simply, we must hear "Hey Juliet." "Hey Juliet," by LMNT, combines mediocre vo-cals with simplistic guitar riffs for a high-energy ballad which has stood the test of time since its 2002 debut.

The lyrics of "Hey Juliet" are missing the philosophy that we find in "MMMBop" and "Steal My Sun-shine," but they more than make up for it with literary references. The song effectively amalgamates Shakespeare's classic "Romeo and Juliet" with the very unique and complex theme of a "high-school guy likes high-school girl" sce-nario. The verbal expression of this journey comes in the form of lyrics which are highly repetitive and thus very easy to sing along with. Especially since LMNT did not stop in Brunswick during the 2002 "Pop' til you Drop" tour, I think we can all agree that their presence here is way overdue.

These three masterpieces, carefully placed in the right order, will be more than enough to make next year's Ivies concert one to remember. Hanson, LEN, and LMNT are "big names" in most people's world. In fact, they are very small names in almost everyone's world. But while they may lack an expansive musical catalogue, these artists boast solitary songs which have the unique ability to truly start a party

It is doubtful that this plan of mine will materialize in any way. Since the appeal of these songs was gone for most people after 8th grade, we will likely never see them performed at our campus. But I ask of you this: Let's have a little respect for the one-hit wonder songs. Why? Well, in the words of Hanson, be-cause "In the end they'll be the only ones there. When you get old and start losing your hair. Mmmbop." Lenny Pierce is a member of the

Class of 2010.

By Arden Klemmer '09

Gay marriage rights overdue in Maine

HART TRUTH BY EAMONN HART COLUMNIST

On Wednesday, April 22, the Maine Legislature's Joint Committee on the Judiciary will take up hearings what has become the defining civil rights issue of our time: same-sex marriage. A large crowd is expected; indeed, projections are so large that the hearing has been moved to the Augusta Civic Center to allow for greater seating capacity. Many owdoin students have been working on this campaign in one way or another, and some on both sides of the issue may even attend the hearing (it is open to the public).

A few years ago, when Massachu-setts legalized same-sex marriage, the entire country was inundated with constant shouts that it would be the end of civilization and that the institution of marriage was forever damaged.

Now, as the years have passed, it is apparent that this projected outcome absurd. Heterosexual couples did not stop getting married, having children, or carrying on any other activities we might associate with traditional notions of family. Citizens kept going to work and paying their taxes. Crime rates did not spike and in fact, they have gone down in Massachusetts in the post-marriage legalization years. In short, the societal collapse that anti-marriage forces predicted has not happened.

Now, more and more states are realizing that marriage rights for gay and lesbian couples are long overdue.

loving partners cannot file taxes tovisit each other in hospitals, or make medical decisions who partner is incapable of doing so? Why do we insist that if one partner dies without a will, the other partner be completely cast out of the process? Ultimately, it is fear and hatred for those different from us, combined with bigotry from religious groups

Of course, religion is a touchy sub-ject in this debate. There are religious utions that believe homosexuality to be immoral conduct, and would in no way condone same-sex marriage. These beliefs are their right.

That said, no one is asking churches or other religious groups to perform or even recognize these uni All that is desired is for the state, a supposedly non-religious entity, to do so. Indeed, the bill that is before the Maine legislature is titled "An Act to End Discrimination in Civil Marriage, and to Affirm Religious Freedom." And it specifically notes that religious institutions would not be required to recognize same-sex marriages if they so choose.

All that said, in a free society we should not be imposing our religion on others through law. Proselytize all you want on your own time, but leave legislative debate out of it. Consider ing the body of empirical evidence suggesting that, in fact, the sky did not fall after same-sex couples started getting married, it seems as though the only arguments against samesex marriage now are religious arguments. Legislators should not be placing the religious beliefs of some above the rights of all when considering legislation, particularly when there is no tangible effect on the bulk of individuals opposing the measure.

Those who, even considering that

their own religious institutions will not be affected, still oppose the bill should ask themselves a few ques-tions. Can they think of any time since the legalization of same-sex marriage began that they felt a genu-ine threat to their own marriages or relationships? Will they love their husbands, wives, boyfriends, or girlfriends any less because same-sex couples have married in some states? they face any personal harm, be it physical or economic, when same-sex couples marry? Opponents of the bill should do some soul-searching before making up their minds.

If you answered yes to any of these questions, try getting out and meeting some same-sex couples. Spend some time together. You will find that they are responsible citizens, loving parents, and good people like the vast majority of Maine's citizens You might even think twice about preventing the state from recognizing their love. If at the end of the day, you still oppose marriage equality, you can at least say that you had the courage to face those whom your on will affect.

Maine has a wonderful opportunity to be a leader in the civil rights arena. We can join Massachusetts, Connecticut, Vermont, and Iowa and be remembered as one of the first states to fully recognize the rights of same-sex couples. It won't be easy. It will take communication, calls to legislators, and vocal support. If we do this, however, Maine will be remembered as being on the right side of history when popular opinion was not. It is a time to move forward, not back.

create perverse incentives and un-intended consequences. In Dexter, Maine, the municipal transfer station charges \$50 to dispose of a television. A drive down a dirt road

in Maine have created new demand for tree stumps. This has caused the price of saw dust to rise dramatically. I know from experience that smallscale dairy farmers in Maine depend

These are just two examples of the detrimental effects unwise environmental regulations can have on the

Now I'm not saying we need to give up the pursuit of the Green Revolution. Quite the contrary. As the educated youth of the greatest nation on earth, the power is in our hands to accelerate the transition to sustainability. If we are to achieve this goal, however, we must not turn to government solutions. Instead we must draw on the thriftiness of the old school and understand that what we seek is a change in culture, not change in the institution of government. Change in government can only mean more bureaucrats, higher taxes, and more waste. Exgovernment is the antithesis of the

Academic affairs need to become more transparent

The debates surrounding Professor in's controversial study and the College's ongoing investigation certainly raise some interesting questions. In-evitably, questions have arisen about the study's findings, the way in which it was distributed, and the accusations of the College's stifling of free speech.

at stands out most, however, is the lack of transparency throughout the handling of the situation. Without taking sides on this particular issue, it is important to recognize that the questions of procedural transparency raised here may also be extended to many other decisions in Bowdoin's academic affairs

The academic affairs division of the College makes decisions on a daily basis that affect everyone at Bowdoin Some of these decisions change the College immediately while others will affect Bowdoin over the course of several decades

Given such significant impact, it is always surprising when the vast majority of students have little idea what decisions are being made or who is making them. Though academic affairs does not have as natural a connection to students as student affairs or other administrative portions of the College, its relationship to the student body is no less important

Students who serve on faculty committees see a great deal of what goes on "behind the scenes." These positions re an excellent way of creating spaces for discussion among students, faculty, and staff. Unfortunately, these positions create spaces for just a small h ndful of students to actively engage. Even more troubling, efforts for engagement by others who are interested in particular issues often leave students frustrated by their exclusion from meaningful discussion.

Many times, there seems to be a fear on the part of the administration that the concerns and ideas of students will create trouble or cause a hassle that the College this apparent fear is direct, as students and faculty alike feel stifled in their ability to contribute to important conversations. Even as these various parties come together on official committees, the lack of a culture of open policy discussion has the immediate effect of lim-iting the freedom students and faculty feel in presenting views that may differ from those of the administration.

This culture of open dialogue must come from the top. Many people at the College do an incredible job reaching out to the Bowdoin community. We have come to take for granted gestures like President Barry Mills joining ran-dom groups of students for lunch in Thorne. These simple actions are what separate the Bowdoin community from that of most other college campuses.

Within academic affairs, however, this genuine, consistent outreach has been absent. Instead of an honest, collaborative relationship like that of students and faculty at Bowdoin, the relationship of students and faculty with academic affairs has been at best strained. This is not difficult to change, but the dedication to an open dialogue műst go both ways.

Nothing attracts students to Bowdoin more than our excellent academic program and the incredible community that we have on campus. What remains to be seen is a true combination of these elements. The excellent relationship between students and faculty is a start, but the administration needs to be a part of this as well. All that it takes is genuine willingness to interact on a personal and professional level.

As Randy has proven with Security, it is possible to create great relationships between students and those in positions of power at the College. Given how relevant the administration's decisions are to all of our lives at Bowdoin, it is necessary for everyone to work towards a similarly open relationship within academic affairs.

Sam Dinning '09 is BSG vice president

Thriftiness: Old-school sustainability

ANNUIT COEPTIS **BY STEVE ROBINSON** COLUMNIST

From the commitment displayed on the walls of Thorne Dining Hall, to the myriad of environmentally friendly changes in our lifestyles, Bowdoin College has caught green fever. Although this new lifestyle may seem hip, it is actually very old school. In the olden days Americans weren't coerced or instructed to live green. For them it was common sense. They called it thrift. This new concern with our impact on the environment is most certainly not that new at all. Why, the first Earth Day was held back in 1970. Except, back then, they were worried about global cooling, Yeah...global cooling.

I am reminded of that scene in "Men in Black" where Tommy Lee Jones tells Will Smith about all the things we humans "know." One thousand years ago we "knew" the earth was flat; 40 years ago we hu-mans "knew" that the next ice age was just around the corner, and now we "know" that the planet is warming. Can you imagine how much we'll know tomorrow? To be fair, any truly green college student will tell you it's not global warming, it's climate change. So we're fighting against change, eh? Those environmentalist folks would have a much easier job if they could just make up

Regardless of which direction the temperatures swing, America

should continue its revitalized mission to live sustainably. However, in doing so the United States should approach any green legislation with caution. It may seem tempting to enact coercive regulations on our means of production, like taxing the pants off the coal industry, but such intervention will prove costly. If this new green revolution has proven anything, it is that the solution to the "climate crisis" is likely to be found through cultural changes and not institutional changes. Institutional changes, in the form of Green legislation, only expand the scope, cost, and power of the federal government. Take, for example, the Environmental Protection Agency (EPA).

The EPA is an unelected bureaucracy with the authority to make and enforce laws. Like all bureaucracies the EPA is subject to the will of the self-interested. Corporations can lobby in support of climate-control regulations and even provide some supporting evidence. If you think information won't be biased you've got to remember, this is capitalism we're talking about.

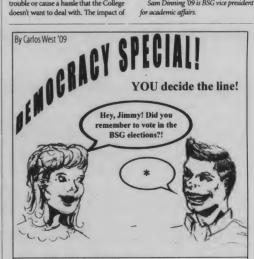

Green regulations create overhead costs which burden small businesses. By abusing the system in this way, large corporations can create barri ers to free market entry. Fewer small businesses mean fewer jobs. Generally speaking, environmental regula tions create jobs in the government while eliminating jobs in the private sector. The ultimate result of green regulation is the consolidation of private ownership and a perpetuation of the staggering wealth divide that lib-erals love to hate.

Some environmental regulations few towns away reveals that this attempt to fund environmentally friendly garbage disposal actually leads cash-strapped Mainers to junk their old TVs by the roadside. Subsidies for cellulosic ethanol

on saw dust for their daily chores. Increases in the cost of milk production mean profit decreases for strug-

American people.

green revolution.

Bowdoin Student Government Statements of Candidacy Officer Elections

BSG President

Mike Dooley '10

A common refrain at Bowdoin is, "I don't know what BSG does." As a current member of the Bowdoin Student Government, I am often frustrated upon hearing this and with your help, I intend to eliminate this statement from our hallowed halls. As Bowdoin students, we must remember that the BSG belongs to every student, not just to those with titles. The BSG is capable of doing much more for the student body, and I intend to change the BSG into a pertinent, direct-action entity.

With three years of Bowdoin Student Government experience, including two years as VP of Facilities, I know what the student body needs in order to connect with the BSG. By utilizing techniques and resources like Facebook, campus mailings and a visible presence in the dining halls and residences, I know that BSG will be able to more directly suit student needs. If elected, I intend to use this increased communication to achieve my goals of re-examining distribution requirements, creating a student-run peer advising system and continuing BSG's commitment to provide student services like shuttles, movie tickets and newspapers for little or no charge. If elected, I will consider it my personal duty to lead the BSG back into relevance for each and every student. Thank you for your time and support.

Rutledge Long '10

Abraham Lincoln said, "a house divided against itself cannot stand." 21 Male from Charleston, SC w/ BSG experience seeking bastions of culture and community on campus... Bowdoin Students... Lock your windows, close your doors, and definitely don't tell Randy that you're voting for Rutledge. It's a risky idea, revolutionary at best. But this isn't about me, or the BSG, this is about WE THE PEOPLE. This is the Dream... Early in the Morning, when Crack House is quiet and Super Snacks are swimming in Osher's toilets, I imagine Bowdoin with a United Student Body. Popular Community meetings, Common hour riots! Why

we're a campus of individuals. Let's get creative to establish Student Power. Currently BSG underutilizes campus connections. The SOOC could network club leaders and captains to connect the campus on social and academic issues, and thus erect a Bowdoin Student Voice for faculty and administrators to RESPECT. BSG needs visleadership inspiring creative unification of student voices. Otherwise, BSG is still irrelevant. As a poet and dreamer, I know this can happen: ELECT RUTLEDGE-ERECT A UNITED VOICE, P.S. Quad Parties with Music, Beer, and Nametags bring people together. Try my product.

VP for BSG Affairs

Anirudh Sreekrishnan '12

Though I am running unopposed for Vice President for BSG Affairs that does not mean that your vote for me does not count. I have spent the last year as an At-large Representative for the BSG and I am excited to continue my work as your VP for BSG Affairs. An important that I stay connected to you- my constituents. Remember, government cannot function without the public input. I urge you to get your opinions out there, get involved with the assembly (Wednesday's at 8:30), and use me (and all other newly appointed VPs) as a source to get your voice heard. Don't ever feel that there is something on campus that you cannot change. If you have an opinion, it is our responsibility as BSG members to make sure that the rest of the body can hear your opinion as well. So please, email (asreekri), facebook (Anirudh Sreekrishnan), or stop by my room (Hyde Hall), and let Also, make sure to vote- that is the first step in getting your voice

VP for Student Affairs

Addison Boyland '10

Hello All,

My name is Addison Boyland,

and I am running for Vice President of Student Affairs here at Bowdoin College. As a junior, I have first- hand experience regarding issues that students struggle with on a daily basis. I am currently serving my second year with Residential Life as proctor of Hyde Hall. As a member of Residential Life, I have experience dealing with situations that require problem solving, quick thinking, organiza-tion, and the ability to communi-cate my thoughts and goals to the appropriate individuals/resources on campus. Also, I have recently been appointed as one of the Judi-cial Board members for the 2009-2010 academic year. Therefore, my peers as well as officers of Bowdoin (deans, etc) have full faith and confidence that I have what it takes to make sound decisions that reflect the values of this institution- both academic and social.

As Vice President of Student Affairs, my primary focus would be to organize events that thoroughly introduce students to the resources this institution offers. In addition, more vehicles for shuttle and zip car services, and create a Watson Recreational Room. Please check out my facebook video and my facebook group for more information on specific issues.

Rasha' Harvey '12

I am running for BSG VP for Student Affairs because I have experience with listening to students' concerns and implementing change to better student life. I currently serve as a BSG at-large representative and member of the BSG Student Affairs Committee and Social Issues Task Force.

This year, the Student Affairs Committee has helped produce a cost cutting guide for the Class of 2013, worked with the health center to improve its services, brought attention to important social issues, and sponsored various events to enhance campus life.

Top Priorities:

1. Making sure the College remains committed to need-blind financial aid and the no-loans policy; create a cost cutting guide for current Bowdoin students

2. Push for Gender- Neutral housing and reducing damage

charges at Social Houses by 50%

3. Bridging the gap between athletes and non-athletes by working with students to create a panel to discuss this issue and follow up the discussion with a fun event such as a basketball or dodgeball tournament

I know how this committee works. I will be honored to be your BSG VP for Student Affairs. Please email me at rharvey@bowdoin.edu if you have any questions.

Alicia Martinez '10

Aloha!

My name is Alicia Martinez and I have been a part of student government since my first year and my experience has only confirmed my desire to run for Vice President of Student Affairs. I want students to know what Bowdoin can offer them and how they can give back. I want BSG to be more involved in the daily lives of the students. All the institutional work we do is without purpose if you are not aware and not affected by it. I also want to bring the dialogue to you because student empowerment means giving students the opportunity to take ownership of their school.

School Spirit: Polar Bear of the Year Award, School Colors Day, Bowdoin rubber wristbands, and a more interactive Homecoming and

Academic and Career Services: Career Fair, Dress for Success, more study rooms, and student internship experience sharing.

Other: Pub delivery, dating at Bowdoin, Bowdoin Talent Show, and Autograph Day.

I can assure you that visible changes to better student life will happen if you elect me. I have the experience, credibility, work ethics, and personality to reach out to all of you. This is my promise to you!

Mahalo, Alicia

VP for Academic Affairs

Derek Brooks '12

Hello Bowdoin! I'm Derek Brooks '12 and I'm super-psyched to run for V.P. of Academic Affairs. I'm a committed member of the College and BSG, bringing unbridled energy and enthusiasm. This year I served as Co-Chair of Programming and have acquired much experience rallying the BSG, organizing events, working with the administration, and acting for students. I've led projects ranging from fireside chats with Barry Mills to the three-part-social-issues-display in the Union. Next year will prove to be an interesting time for Academic policy and my goals include:

- 1. Changing Credit/D/Fail to CR/NO CR or Grade/CR/F
- 2. Strengthening faculty relations through Campus Conversa-
- 3. Creating "lunch-grants" so students can take faculty to lunch in town
- 4. Reworking peer-advising so it's independent and consistent.
- it's independent and consistent.

 5. Writing a clear "bill-of-rights" for students wishing to study-abroad.
- 6. Getting course syllabi online for course registration.
- 7. Re-evaluating distribution requirements are achieving exploration and allowing the use of CR/D/F.
- 8. Developing an "Arabic Studies" through the study of Language, Religion, Government, and History

This year I've found myself in a communicative role, bridging the information gap between students, BSG, and the College administration. The skills I've gained will be pertinent to Academic Affairs. I want to show that faculty and students share more in correspondence in their goals for the College than is commonly believed.

Bryce Spalding '10

I, Bryce Spalding, am running for Vice President for Academic Affairs. As VP I would ensure that the student body's views are heard on a wide range of academic issues. For three years I served as 2010 Class Representative. From my two years on the BSG Facilities Committee and especially this past year serving on the Academic Affairs Committee I gained invaluable ex-

Please see CANDIDATES, page 19

STATEMENTS HAVE BEEN PRINTED AS RECEIVED BY THE ORIENT.

Voting is open from 8:00 a.m. on Friday, April 17, until 8:00 p.m. on Monday, April 20.

All students can vote online at bowdoin.edu/vote.

Watch the BSG Candidates Debate video on YouTube:

Search "bsgnetwork" or go to www.youtube.com/user/bsgnetwork

Bowdoin Student Government Statements of Candidacy Officer Elections

CANDIDATES

perience concerning BSG and its structure. I have learned the necessary steps to get the wishes of the student body heard by faculty and administration. With this understanding I hope to not only create a constructive relationship between BSG and faculty/administrators, but also to open the dialogue between students and Bowdoin staff. This can be achieved through the BSG sponsored Campus Conversations and the strengthening Academic Advising. If elected, I'd work to extend Arabic studies and ensure that your concerns regarding Credit/D/Fail are addressed. While my experience from the past three years is crucial, determination, hard-work, and commitment are key. I will bring all of these attributes to the position of Academic Affairs VP. I welcome any suggestions, concerns, or questions by e-mail or facebook. This weekend, please vote for me, Bryce Spalding, VP for Academic Affairs

VP for Student **Organizations**

Branden Asemah '12

My name is Branden Asemah and I currently serve on the Student Organizations committee as the BSG '12 Representative. I have experience with both BSG policy and the planning of many year events (Pub night, T-shirts). I am also apart of a new BSG ad hoc committee named The Social Issues Task Force, the group responsible for the socially striking displays in the Union. Last month I worked closely with current BSG President, Sophia Seifert, to help recruit more students from various backgrounds through personal club visits and letters encouraging Bowdoin students involvement. Throughout this year I have devoted a lot of my time to BSG and I am ready to take this dedication to the next step. Some ideas I have are to continue the FAQ sheet for club members and guaranteeing the Leadership Development Series to happen in the fall of 2009, both programs that I have had experience with this school year. New plans I have are to expand field trips by committee members to at least once a semester and creating a Unity Council that will meet monthly to help foster communication and support amongst a variety of groups on campus. This is just a brief glance into my ideas. Make sure that not all NICE GUYS FINISH LAST! Vote Branden Asemah-VP of Student Organizations!

Emma Nathaniel '12

My name is Emma Nathaniel '12 and I'm running for BSG Vice President of Students Organizations. This year, I served as treasurer of my class. I helped organize a pub night, a Secret Santa, a first-year semi-formal dance, and a class gift of t-shirts. I also served on the SAFC. I learned about what makes a good budget and how to allocate funds fairly to different clubs. Next year, as VP of Student Organizations, I will bring my knowledge and experience to the

also served as the secretary of the BSG. This prepared me to take on a leadership role in the BSG because I know how the body runs and the major topics that are being debated.

I have many ideas to help next year run smoothly and efficiently I plan to hold office hours so that club leaders and treasurers find me easily. I would like to imple ment the Leadership Development Series that has been in the works for a while. I plan to update the Student Organizations site and include simple directions about how to organize different types of events.

I look forward to the possibility of continuing my involvement in student government next year!

VP for Facilities

Everyone running for this po-sition will list what they're going to do if "they're elected." Blah. My competitors and I all want good

things for Bowdoin. Yet, how many of my competitors have a significant amount of experience required for this job? I have been a part of many student organizations such as BSG, CAB, Af-Am BQSA, and I founded and currently serve as the co-editor of O magazine-the only student-run queer magazine on campus. I have made friendships across all class years and among college officials. In addition, I have lead a ton of programming initiatives such as last year's Bowdoin Toy Drive, and the Harlem Children's Zone Fundraiser happening this week. I plan to use my skills as an effective programmer to create an online housing lottery system, getting printers in first-year dorms, and working with facilities and the dean's office to make the counseling center handicap accessible. If you want more study spaces open later so you don't have to run to Kanbar at 3 a.m. to print off your homework for your 8:30 a.m. class, then vote for me. If you hate waiting three hours in stuffy-as-hell Daggett Lounge vying for that last triple in Brunswick apartments, vote for me. The choice is yours.

Jack Hilzinger '12 I'm Jack Hilzinger and I want to serve you as your Vice President for Facilities. Currently a rising sophomore, I had the distinct pleasure to serve as a Class of 2012 Representative to BSG as a member of Facilities Sub-Com-

Consequently, I have the relevant experience necessary to tackle any issues that the commit-tee will encounter next fall. I also possess a nearly unmatched level of steadfast and responsible service to the BSG. For the last two semesters, my work has entailed providing a variety of services to students: free newspapers, discount movie tickets, and shuttle services to the airport, Freeport, Cook's Corner, and Portland. Despite all of this, I yearn to

do even more. I want to take up Bowdoin's green initiative by mitigating the use of bottled water on campus through creating Sigg and Nalgene bottle filling stations. I want to revise, expand, and cheap

en our existent shuttle services. Furthermore, I want to continue to push the Office of Residential Life to make gender-neutral hous-ing a reality here at Bowdoin.

Personally, I see myself as committed, innovative, and organized. I am the candidate you can count on to get the job done and, most importantly, done well.

Jung Gun Song '11

Do you want a peer-to-peer network created on campus so that you can share media with your friends? Wouldn't it be cool to see Smith Union become a late-night studying destination? It would be great to see printers in dorms that are far away from the libraries, wouldn't it? Knowing how the new wellness center will work for you would be sweet, right? If you answered yes for all of these, then I'm your man. My name is Jung Gun Song, and if I am elected as the new VP of facilities, I can be your one stop destination for all of your facilities needs.

How will I accomplish all of my promises? I will do this by acting as a liaison between the student body and the facilities on campus. I will meet with the administration to negotiate changes that will increase the welfare of the campus. I will also take measures to make sure that I can easily and quickly understand the needs of student body. I will use any medium, including face book, blogging, an online forum, or even a suggestions box to accomplish this.

And remember, a vote for Jung Gun Song is a vote for America.

Nyle Usmani '12

On the heels of my first year at BSG as a representative in the Facilities Committee, I am ready to take on the responsibility of Vice President. I have worked on resolutions to maintain free newspapers, shuttles to Freeport, cheap movie tickets, Gender Neutral Housing, and to reduce bottled water use on campus, I am committed to improving even more institutions for this upcoming year. I will make sure the opening of the new Health and Fitness Center provides the best for the students. I will hold the services given at

this institution accountable to the tuition that the students pay. I am committed to making this campus is more Green. President Mills once told me that the environment issues were the gravest problem facing our upcoming generation; as we are getting increasingly closer to a dangerous global situation, we are realizing that we need to pull our weight to lower carbon emissions. I will work to provide FREE Nalgenes and FREE heat insulating lunchpacks for EVERY student, so as to decrease usage of water bottles and paper bags in the Cstore/Express. I also have a campaign rapsong: www.myspace. com/mujahead. Check it and the facebook group and vote!

Treasurer

Kyle Dempsey '11

As my class's treasurer for the past two years, I served my classmates through various programming initiatives and served the greater student body as a Student Activities Funding Committee (SAFC) member. I have enjoyed these responsibilities but would now like to focus exclusively on the SAFC, which the BSG treasurer chairs, because working on this committee will enable me to help all student groups with the finan-cial side of their events' planning.

Working on this committee for two years, I helped change group leaders' perception of the SAFC most leaders would say that we are far less intimidating and much more welcoming than the past SAFCs. During my time on the committee, we have also made the entire funding process far more efficient and easier for everyone involved—budget proposal time slots have been reduced by about one third and a new electronic budget proposal system is in development that will make the entire process even easier for club leaders

As the BSG treasurer, I will continually look for ways to innovate the SAFC's procedures and will work hard to ensure that quality events are occurring. If you want to learn more about me, please visit my campaign's facebook event!

STATEMENTS HAVE BEEN PRINTED AS RECEIVED BY THE ORIENT

Voting is open from 8:00 a.m. on Friday, April 17, until 8:00 p.m. on Monday, April 20.

All students can vote online at **bowdoin.edu/vote**.

Watch the BSG Candidates Debate video on YouTube: Search "bsgnetwork" or go to www.youtube.com/user/bsgnetwork

WEEKLY CALENDAR

APRIL 17 - APRIL 22

FRIDAY

BSG ELECTION

Elections Begin

Cast your vote for 2009-2010 officers and representatives at www.bowdoin.edu/vote.

Online. 8 a.m. - 8 p.m. Monday

EXHIBITION OPENING

"New York Cool"

This exhibit will show urban art from the 1950s and 60s. Boyd Gallery, Museum of Art. 10 a.m. – 5 p.m.

FUNDRAISER

Harlem Children's Zone

Students will staff a Harlem Children's Zone raffle table to conclude a week of fundraising for the organization.

Smith Union. 10 a.m. — 4:30 p.m.

COMMON HOUR

Student Chamber Ensemble Concert

Students will perform an array of classical pieces.

Kanbar Auditorium, Studzinski Recital Hall. 12:30 p.m.

PERFORMANCE

Teatime Concert: Lydia Forbes, Violin

Cellist Marc Johnson and pianist Frank Peters will join violinist Lydia Forbes in performances of Beethoven's Piano Trio in C Minor and Schubert's Piano Trio in Bb

Kanbar Auditorium, Studzinski Recital Hall. 4 p.m.

FIGHT CANCER

Relay for Life

This annual fundraising event which supports the American Cancer Society will feature a hypnotist, inflatables, and free food.

Farley Field House. 6 p.m. - 6 a.m. Saturday

PLAY

"Topdog/Underdog"

This performance is part of an independent study by director Caitlin Hylan '09 and actors Tony Thrower'09 and Jamil Sylvester-John'09.

Chase Barn, Boody-Johnson House. 7 p.m.

PERFORMANCE

Hassan Muhammad '10

Muhammad will give a recital as a member of a jazz

Kanbar Auditorium, Studzinski Recital Hall. 7:30 p.m.

COMEDY

Hari Kondabolu '04

After appearances on Comedy Central, HBO, and the Jimmy Kimmel Show, Kondabolu will return to Bowdoin to perform his stand-up act.

Kresge Auditorium, Visual Arts Center. 8 p.m.

CONCERT

Hip-Hop Show

Several groups will perform, including the Unity Step Team, the Phunky Phresh Band, and the Longfellows. Morrell Lounge, Smith Union. 8 p.m.

TOMMY WILCOX FOR THE BOWDOIN ORIENT

WALKING THE LINE: Sophomore James Carney enjoys the recent spring sunshine as he balances across a slackline on the Quad Thursday afternoon.

SATURDAY

CONCED

Gospelfest

The Bowdoin Christian Fellowship will present Portland's BeyondBlue Christian band as well as student performances. Morrell Lounge, Smith Union. 2 p.m.

CILA

Bowdoin Film Festival

The Bowdoin Film Society will screen student-produced films in its 5th annual Film Festival.

Smith Auditorium, Sills Hall. 7 p.m.

PERFORMANCE

Vague Dance Show

Bowdoin's only jazz dance group will perform original pieces.

Kresge Auditorium, Visual Arts Center. 7 p.m.

STYLE

Asian Student Association Fashion Show

ASA will present a vanety of lively garments and performances at its 15th annual fashion show.

Morrell Lounge, Smith Union, 8 p.m.

SUNDAY

CONCERT

Friends, Part IV

The Bowdoin College Concert Band will give its final concert of the year. Guest conductor and composer Andrew Boysen will conduct several of his pieces. Kanbar Auditorium, Studzinski Recital Hall. 2 p.m.

MONDAY

LECTUR

"World War II: A Necessary War?"

Dr. Williamson Murray, a senior fellow at the Institute of Defense Analysis and one of the world's foremost military historians, will speak.

Main Lounge, Moulton Union. 7 p.m.

TUESDAY

LECTUR

"All the Old Familiar Places — Love Songs of Depression and War"

Music historian and former English teacher Michael Lasser will discuss how Americans met the emotional challenges of the Great Depression and World War II through the song lyrics of popular music.

Beam Classroom, Visual Arts Center. 7:30 p.m.

WEDNESDAY

DINNER

Evening with the Meddiebempsters

The Meddies will give a formal dinner performance open to the Bowdoin and Brunswick communities.

Main Lounge, Moulton Union. 5 p.m.

THURSDAY

GALLERY TALK

"Keeping Up Appearances: Culture and Clothing in the Age of James Bowdoin III"

Jacqueline Field, vice president for Education and Programs of the Costume Society of America, will discuss early American style.

Zuckert Seminar Room, Museum of Art. 4 p.m.

PERFORMANCE

Openings

The 38th Annual Spring Dance Show will feature performances by beginner, intermediate, and advanced dance course students.

Pickard Theater, Memorial Hall. 8 p.m.

CONCERT

Racer X

The ever-popular 80s cover band composed of Bowdoin professors will play in Smith Union.

Campus, town prepare for Ivies Weekend

AND TOPH TUCKER ORIENT STAFF

It's time to boogie down.

On Wednesday, the Campus Activities Board (CAB) finally made the official announcement that Santigold and Sean Kingston will be headlining this year's Ivies celebration.

The two stars will perform on the Ouad Saturday at 1:30 p.m. Student bands Mr. Suds and the Phunky Fresh All-Stars will open.

This year's acts represent a break from tradition. According to CAB co-chair Katherine Finnegan '09, the two artists "are more co-headliners than anything, even though Sean Kingston is playing before Santigold." Whereas the two acts are traditionally more similar and "there is one clear opener," she highlighted how this year's selections "have very different followings and

very different styles."

Finnegan said that CAB was pleased with the outcome of the selection process, which began in November.

"Within CAB they were top picks... and I think this year the genres can appeal to a wide range of people, so we're really happy about it," she said. "Most importantly we hope the campus enjoys it."

Please see IVIES, page 3

ACADEMIC AFFAIRS

Professor Goldstein receives letter of censure from Mills

BY NICK DAY

President Barry Mills sent Professor of Economics Jonathan Goldstein a six-page letter of censure this week, effectively ending the eight-monthlong dispute between Goldstein and College officials over a 2008 paper the professor began disseminating last August.

"I place this letter, along with a copy of the Investigative Committee's report, in your permanent file," Mills wrote in an April 21 letter to Goldstein. "As also recommended by the [investigative] committee, you are hereby on notice that similar offenses in the future will yield more severe sanctions."

"The letter is to put [Goldstein] on notice, to let him know that what he did is not acceptable, and that any future offenses will be considered more seriously," said Vice President for Communications and Public Affairs Scott Hood.

The decision handed down by Mills was precisely that recommended by the investigative committee's April 3 report as punishment for research misconduct.

"The Committee recommends that a letter of censure describing these offenses and a copy of this report be placed in Prof. Goldstein's permanent file," the committee had written in the report. "That letter should indicate that subsequent, similar offenses would yield more severe sanctions."

Goldstein said on Thursday that he disagreed with Mills' letter of censure, though he acknowledged that the punishment "could be associated with a slap on the wrist."

"My oversights and activities did not rise to the level of research misconduct, clearly stated in the Faculty Handbook," Goldstein added. "Yet I'm being punished for that."

In the letter, Mills acknowledged that while the research errors in Goldstein's paper "may not have been intentional...in failing to cite your sources and to adhere to the confidentiality of the source, you are responsible for recklessly performing your research."

Goldstein's 16-page study, "The Tradeoff Between Extra-Curricular Activities and the Academic Mission of Small Liberal Arts Colleges: Why Some Schools Are Poor Educational Investments," studied various policies at 36 small liberal arts schools and ranked them according to three factors: grade inflation at the school, the percentage

After lengthy search, College names Salatino new director of art museum

BY PIPER GROSSWENDT

After an exhaustive search that spanned nearly the entire academic year, the College announced last Friday that Kevin Salatino will become the director of the Museum of Art in August. Salatino, who currently serves as the head of the Department of Prints and Drawings at the Los Angeles County Museum of Art (LACMA), will bring years of experience of working in museums—as well as a background in academia—to campus next fall.

Dean for Academic Affairs Cristle

Dean for Academic Affairs Cristle Collins Judd, who served as a member of the search committee for the position, said she was "thrilled that we've been able to recruit Kevin Salatino to Bowdoin."

Salatino said he was eager to start work on August 3.

"I'm looking forward to having a terrific collection that can move in any number of areas with a terrific team of people who are capable of helping the place really sing," Salatino told the Orient on Thursday.

"One of the things I want to do right away when I get there is sit down with representatives of the student body, because I really want the students to feel connected to the museum," he added.

Before taking on his current po-

sition at LACMA in 2000, Salatino worked for nine years as the Curator of Graphic Arts at the Getty Research Institute. Prior to beginning his career working in museums, he taught art history at Middlebury College.

"When I taught at Middlebury, I liked it, but interestingly enough, I didn't love it, and I thought 'maybe this isn't the way I want to go," Salatino said. "So when a position came up at the Getty Research Institute, it was somewhere between being a curator and a scholar... I thought, 'let me give that a try,' and I liked it a lot."

Salatino characterized the Getty Research Institute in Los Angeles as a hybrid between strict scholarly work and a museum. It serves as a center for study, but also for sharing that study with the public through programming such as lectures and exhibits. Working as the Curator of Graphic Images at the Getty Research Institute in Los Angeles served Salatino well.

"For me, it was the perfect transition from academia," he said.

But when the opportunity to work at LACMA came up, Salatino was excited to move into the realm of exclusively curatorial museum

BSG leadership reflects on this year's agenda

BY MARY HELEN MILLER

ORIENT STAFF

Bowdoin Student Government (BSG) will hold its final meeting of the year next Wednesday. Throughout the course of the academic year, members of the BSG assembly have been involved in a number of projects and processes. The Orient asked several members of BSG, including its president, vice presidents, and treasurer, to reflect on the year.

BSG worked this year to maintain a variety of pre-existing student services, strengthen the structure of the assembly, provide new programs for students, and propose policy changes for different entities on campus.

thes on campus.

The most significant projects taken on by the assembly include proposing changes that will be adopted by the Judicial Board, continuing discussions with the Office of Academic Affairs about the Credit/ID/Fail grading option and

the Arabic program, and conducting surveys to gauge student experiences at Dudley Coe Health Center

Vice President for BSG Affairs John Connolly '11 said that he thinks the assembly has grown as a body throughout the course of the year.

"People started listening a lot more, being a lot more attentive, so there has not been the repetition there was in the

GOLDSTEIN **CONTINUED FROM PAGE 1**

of athletes at the school, and whether the athletic director at the school had Division I, II, or III experience. In the study, Bowdoin ranked 36th of the 36 schools in the survey.

Goldstein's research misconduct charges claimed that his paper "made reference to 'official' sources, but such sources are not cited, nor does the paper explain how the '36 nationally ranked liberal arts colleges' for which comparative data is presented were chosen," according to a copy of the charges. In the second "failure to cite" charge, no sources were cited for one in his study, which was taken from the "Franklin and Marshall Grading Survey of Selected Institutions."

The investigative committee on April 3 found that Goldstein's "misconduct in research and the violation of confidentiality in his use of clearly labeled confidential materials are serious offenses and should be sanctioned."

Goldstein acknowledged in the April 10 Orient that he made several notes to himself to cite the table, but stated that he had unintentionally forgotten about the table citation. He had maintained his innocence during the investigation, arguing that the administration stifled his free speech because of the embarrassing findings of the study, while also asserting that the investigation into his work had been poorly examined.

Mills, in his approximately 2,800 word letter, described his decision to censure Goldstein, though he also pre sented his own interpretation of the events surrounding the dispute.

In the letter, Mills objected to Goldstein's argument that the research misconduct charges were brought up against him because Goldstein's findings were embarrassing to Bowdoin.
"This claim is both wrong and reflects a complete misunderstanding of what is at stake," Mills wrote in the letter. "To all those who claim that your 'mistake' in failing to cite doesn't matter and that your breach of confidentiality is a trumped up charge, I point out that we standards at Bowdoin College."

"The honesty of the mistake goes to mitigation of the sanction, not the finding of a violation," Mills wrote a paragraph later. "If we ignored your violations, what should we tell our students? Should we tell them that faculty are held to lesser standards?"

Mills also addressed Goldstein's insistence that a specific provision in the Faculty Handbook absolves him from any wrongdoing. The Faculty Handbook states, "misconduct in research...does not include honest error or honest differences in interpretations

or judgments of data."
"There is a provision relating to honest error but that provision is intended to deal with data that may compiled incorrectly or interpreted in-correctly, not a bald-face failure to cite urce of the data," Mills wrote.

Mills also addressed the actual methodology of Goldstein's paper, which he found problematic.

"I have a copy of your paper and have had it reviewed by internal experts to test your methodology," Mills wrote. "There are serious quesns as to the methodology, so at this time, it appears that the summary conclusions you reach regarding Bowdoin and other peer institutions are unsubstantiated.

We must be rigorous in our analysis of the issues, however, and reach conclusions that are based on fact and well-reasoned opinion," Mills added two sentences later. "You show me the facts and analysis that prove the depth of the problem you assert, and you have a partner in me to remedy this situation. To date, I have yet to see the

data that proves your point."

Mills concluded at the end of the letter that it was time to "move on."

We face enormous challenges at this time in our history and should not be diverting our attention and efforts in this manner. You claim to be working in good faith to improve the

College. I am eager to work with all faculty—including you—to achieve the best for Bowdoin and to further promote and protect excellence in our academic program and pride in our community."

Mills declined to speak with the

Orient beyond the scope of his letter.
"The letter is long and compre hensive," Mills wrote in an e-mail on Wednesday. "There is nothing more to say on the matter, it expresses my

to say on the matter, it expresses my views completely and accurately."
"From the College's point of view, it's over, and the letter has been sent." added Hood.

A full version of Mills' letter can be found at http://www.thefire.org/index. php/article/10506.html.

Goldstein's reaction

Goldstein said on Thursday that he had not carefully read Mills' letter sin receiving it on Wednesday, but said he thought the College investigation into his work set a bad precedent for future research at Bowdoin.

"I think this sets back academic freedom at the College decades," Goldstein said. "Why would one ever pursue a controversial issue again, taking the risk that the administration may not agree with the position you take, and therefore subjecting yourself to be accused of research misconduct?"

Despite the long-running dispute

over his work, Goldstein said that he plans to move forward with the study; he hopes to finish a more academic version of the paper for eventual publication in a journal.

I had no intention of letting the administration suppress my speech or control my ideas or thoughts, and I will continue with the project," Gold-

He added that he would also not er the way he conducts research in light of the charges.

"It won't change my [research] habits," Goldstein said. "But I think it sends an ominous message to the rest of the faculty that they better be very particular and careful with their research, even their first drafts."

Goldstein also said that he would consider disseminating his work in the admissions office again, although he did note that the academic version of his study would probably be a "tougher read" for prospective students and their parents. It was Goldstein's initial distribution of his study last August in the admissions office that sparked the quarrel between Goldstein and College officials.

"I certainly value my right to free speech," Goldstein said. "And if I deem it something to help advance my research—which is the primary reason I went to admissions in the first place-I don't see any reason why I wouldn't do that."

BSG **CONTINUED FROM PAGE 1**

beginning of the year," he said.

Class of 2011 Representative Greg Tabak said that while last year's assem bly focused primarily on constitutional reform, this year's assembly "didn't really have an overriding purpose this year."

"This year it was sort of like we wait-ed for issues to come to us to deal with, which was very different, not necessarily bad," he said.

Class of 2009 Representative Ian Yaffe said he was satisfied with the amount of work that BSG did this year, but he thought that the assembly could have been more efficient.

I feel like we spend too much time in our meetings getting on the same page, a lot more work could be done in advance if we just had the information ahead of time." Yaffe said.

The 27 current members of BSG sit on six committees: Academic Affairs, BSG Affairs, Student Affairs, Student Organizations, Facilities, and the Student Activities Funding Committee (SAFC). These committees have convened as a full assembly 20 times this year.

Academic Affairs

Vice President for Academic Affairs Sam Dinning '09 said that he thinks BSG accomplished "a great deal" in the realm of academic affairs.

He explained that although some of what BSG does is visible or tangible, much of the work in academic affairs is not.

"The glacial speed of academia makes changes less apparent," he wrote in an e-mail to the Orient.

Dinning said the most significant deelopment in academic affairs this year is that the College will continue to offer Arabic next year.

The committee for academic affairs also submitted a proposal to Dean for Academic Affairs Cristle Collins Judd regarding the Credit/D/Fail grading oprecommended that professors should not be able to know which students are taking a course Credit/D/Fail, and it also proposed that the option be changed back to Credit/Fail, without the possibility of earning a D. Additionally, the committee recommended that first-year seminar registration should

revert to the way it was before this year, allowing students to prioritize course choices instead of listing several with out an order.

Dinning said that students on his ommittee "have great relationships committee with faculty members," but that their relationship with the administration "could be better."

"Students certainly have a valuable role in the decision-making processes of the College, but we still need the administration to be more open to student and faculty ideas if we're going to have a truly collaborative process," he wrote in the e-mail.

BSG Affairs

Vice President for BSG Affairs John Connolly '11 described his committee as "the geekiest BSG nerd committee," because, he explained, "It's focused on making sure BSG operates, making sure that everything else can function."

According to Connolly, BSG Affairs' responsibilities include writing the legislation for the body, writing proposals compiling meeting packets, running elections, managing the budget, and heading up communications, includ-Web site, newsletters, and the message board in Smith Union.

Connolly said he thinks the committee's biggest accomplishment was the work it did with the Judicial Board. The committee proposed several ways in which the Judicial Board could alter the way it presents information to the student body, both about specific cases and the Board itself. The Judicial Board has agreed to adopt much of the proposal.

"In the end, it was a very fruitful discussion, and it was great that BSG was able to work with the J-Board to get things changed," Connolly said.

Student Affairs

Much of the focus for the student affairs committee this year was on student health issues—physical, mental, economic, and social.

After releasing a poll about the Dudley Coe Health Center in the fall that the BSG assembly deemed inadequate, a second survey was administered during the spring semester in conjunction with the Office of the Dean of Student

"I think that's been a great success

we've finally gotten the Health Center survey out," Vice President for Student Affairs Carly Berman '11 said.

The student affairs committee also arranged for free massages to be pro-vided for students during finals and reading periods, prepared a booklet about how to cut costs at Bowdoin that will be distributed to next year's incoming students, created displays in Smith Union about social life at Bowdoin, and arranged for late-night snacks to be provided during Ivies.

Student Organizations

Hannah Bruce '11, the vice president for student organizations, said that her committee focused "on supporting clubs and helping clubs maintain their charters and memberships."

"They have the opportunity to come, and we'll help them get going," Bruce

Among the newly chartered clubs this year are a lyricist poetry society, a Russian martial arts club, a ping-pong club, and the yellow bike club, a bikesharing organization.

Mike Dooley '10, the vice president for facilities, and next year's BSG president, said that his committee focused on maintaining pre-existing services and figuring out how to make them run more smoothly.

"My year was mostly spent trying to work the kinks out of things," Dooley

Dooley listed the newspapers avail-able in the dining halls and Smith Union, the airport shuttle, and the night taxi to the bowling alley among the services that the facilities committee has supported this year. Dooley added that his committee also conducted the background research for the gender-neutral housing initiative that was discussed during March meetings of BSG.

Student Activities **Funding Committee**

BSG Treasurer Ugo Egbunike '09, who heads up the Student Activities Punding Committee (SAFC), said that his committee manages student funds across various clubs and assures that all clubs have equal access to those funds.

"I would say the biggest thing that we worked on was cleaning up the messes that were going on this year," Egbunike

Egbunike said that when clubs overspent this year, "we wouldn't know until after the fact." He also said that there was a high number of funding requests throughout the year. The increased workload caused the SAFC to meet an average of three hours each week, twice as long as it normally would. Under the current system, clubs must

report their budgets once at the end of the year, but Egbunike said that starting next year, clubs will undergo budget check-ins throughout the year.

Looking forward

Seifert noted the relative youth of BSG-seven years-and said that she hopes that next year's assembly will be able to move beyond the stage of "setting precedent."

"A lot of the work that I've been a

part of, has just been sort of setting precedent, and creating spaces where we can really engage and get our foot in the door," she said. Yaffe, however, disagrees with Seif-

ert's assessment.

"I don't buy that argument at all. Bowdoin has had student government for hundreds of years, and just because its name changed, doesn't mean student government just started six years ago."

Tabak said that he is hopeful that BSG will be more relevant to student

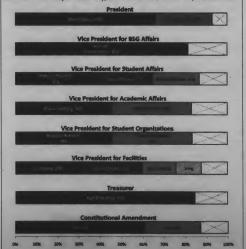

"I hope that we can ensure that we are not a marginal institution," he said. "I hope that we can really assert ourelves as a body and continue to build RSG as an institution"

Dooley, who will be next year's president, wants to change the sentiment he perceives on campus that "BSG doesn't do anything.

"In a perfect world non-BSG members would come forward with thi they want to get done," he said.

Bowdoin Student Government 2009-2010 Official Election Results

In all, 984 students voted in the election. The results have been verified by the BSG Elections Commission: Sophia Sedier, BSG President; John Connolly, VP for BSG Affairs; Carly Berman, VP for Student Affairs, Mark Newman, Ja-Board Chair; and Matts Smith, J-Board Wee-Chair. The constitutional amendment asked students the following ques-tion: Should the student body elect crafter than appoint the Bowdoin Entertainment Board Representative to BSG?

MUSEUM **CONTINUED FROM PAGE 1**

"After all those years [at the Getty] I was very keen to get into pure museum work, because I love the object as object. I love just work ing with objects, and the Getty Research Institute was more about working with objects and artifacts as ideas," he said.

This past winter, a Los Angeles art dealer, Stuart Denenberg '64, mentioned the opening for the director position at the Bowdoin Museum to Salatino, and encouraged him to apply for the job.

Judd explained that Salatinochosen from a pool of more than 75 candidates—was an exceptional candidate because of his experience and personal attributes.

"I think everyone who encoun-tered Kevin felt like he brought the ideal qualities we were looking for," Judd said. "He's a highly regarded scholar and art historian, he's an incredibly creative and inventive curator who has done major exhibitions, and collaborated with institutions all over the world."

Stephen Perkinson, an associate profe sor of art history who represented the department on the selection committee, explained that Salatino's interest and expertise in prints and drawings "parallel the strengths of our collection."

"Not only are prints and drawing: one of the major strengths of the Bowdoin collection, but [his previous work in that area of specializa tion] required him to deal with objects and issues from a really broad range of dates and cultures; there's really no other curatorial position that has such wide-ranging responsibilities," Perkinson wrote in an email to the Orient.

At the helm of the museum,

Salatino's job will not only involve oversight of museum programming, but also community and donor outreach.

"It's clear from the work he's done

at LACMA...that he knows how to engage well with donors, that he knows how to engage well with the broader museum public, and he's somebody who it was obvious really does his homework," Judd said. Salatino said he often had to raise

money in his job at the LACMA.

You have to go out there and hustle a lot, you really do have to go out and find the patrons who rill support your acquisitions, and that's what I've done a tremendous amount of," Salatino said. "That's something you're never taught in graduate school, you're never taught in art history courses.

familiarity with the liberal arts also proved to be a major selling point to the selection committee.

"He really can articulate the value of the arts in the liberal arts and the role of a museum on a college campus," Judd said.

Salatino said that he hopes to expand the collection "into areas the museum is not strong in."

"Since a director has to be responsible for all collections, it's also as important to me that areas that are not my specialty, like antiquities, are very strong at the museum," he said.

Eli Bossin '09 served as one of two student members of the selection committee. He was the only one present in the Spring committee meetings though, because the other student on the committee, Caitlin Beach '10, is currently studying

"I think he is really a very exciting choice to lead the museum," Bossin said. "I think he brings a lot of intelligence, energy, and enthusiasm," he added.

Salatino, who plans to move to Maine sometime in July, said he is taking the transition from sunny southern California to New England in stride.

"I'm hoping that my Connecticut Yankee DNA will reassert itself and I'll develop that layer of protection against the cold," he said.

IVIES

MARGOT D. MILLER, THE ROWDOIN ORIENT

FUN IN THE SUN: Students gather on the Quad during last year's lives Weekend. Sunny weather is expected on Saturday.

Santigold and Kingston each cost, according to Finnegan, about \$20,000-\$25,000 to bring to campus.

Third Eye Blind and Vampire Week-

end were among the other options that CAB considered but were unavailable due to a variety of restraints.

"It's often the location that is difficult. money, conflicting dates, recording time. It can be difficult matching schedules," Finnegan said.

Finnegan said that everything with the booking process went smoothly this year. She mentioned that the creation of the Entertainment Board (E-Board), which will replace CAB next year, "was definitely not a direct result" of any problems encountered during this year's planning.

Food for all

To make up for the lack of Super Snack tonight and tomorrow night, Bowdoin Student Government (BSG) is planning to pick up the snack slack.

"There's no more apt time to provide food and non-alcoholic beverages than Ivies," said BSG President Sophia Seifert '09.

Tonight, from around 11:30 p.m. to 1 a.m., BSG will provide chips, cookies, water, and juice by Watson Arena. Tomorrow night, 100 pizzas will be delivered to Pine Street in waves around midnight. Citing a desire to support local businesses, Seifert said that BSG chose to order from the Brunswick House of Pizza, which is staying open late to accommodate the special order.

Dining Service is also organizing a barbecue on the Quad tomorrow from around 4:30 to 7 p.m. Last year's barbecue served about 1,200 people, according to Associate Director of Dining Service Ken Cardone. He said that approximately 2,000 hamburgers, 1,500 hot dogs, and 48 gallons of coleslaw were consumed.

This year will feature the same "traditional barbecue menu," with express meals available at Moulton Union for those who aren't interested in participating or who don't have time to brave

Cardone said that traditional indoor dining can be hard when, after the concert ends, everyone storms in all at once and "chokes the place."

"It could get rowdy in the dining hall," he said.

Furthermore, "If it's a nice day, we [the Dining Service staff] want to be outside, too," said Cardone.

BSG spent around \$2,500 out of the \$3,000 allotted for refreshments. Discussions began before Spring Break, and, as previously reported in the Ori-ent, have ranged from ice cream truck proposals to warnings of potential pizza riots."

Given that past BSG meetings dur-ing Ivies "may not have been the most productive or professional," Seifert said, week's meeting was canceled. In

an April 25, 2008, article, the Orient reported that "several BSG members showed up to the meeting visibly in-toxicated, some with red Solo cups in

Seifert cautioned that Ivies must be treated as a privilege, not a right.
"I hope that students really do try to

remain positive and respectful. This is a tradition we want to keep, and [I hope students] won't do anything that would jeopardize that," she said.

Safety measures

Director of Safety and Security Randy Nichols and his staff "see Ivies coming from a mile away." 'I will be working here continu

ly throughout the weekend," Nichols said. "I'll be averaging four hours [of sleep] a night for the next four nights,

Security makes significant changes to accommodate the Ivies festivities. He said that they significantly "beef up the shifts," with "several people working several overtime shifts."

Nichols assured that they will have "adequate resources at all the major events," including Pine Street, Harpswell, and Brunswick apartments, the concert on the Quad, and the College House events.

Security has also extended the schedule of the Bowdoin Shuttle service avail-

able for the duration of the weekend. In an "Ivies Guide" e-mailed to all students, Nichols wrote, "College policies are enforced during Ivies, too." in an interview with the Orient, he spoke of how circumstances dictate that they must be enforced differently.

"Our focus is very much based on the health and safety of the students," Nichols said. "We spend most of our efforts on the high-risk situations."

According to Nichols, who is enter-ing his fourth Ivies, the weekend elicits only a slight increase in disciplinary write-ups. "Our policy is not 'Let's see how many violations we can write up," he said.

"I'm trying to prevent people from getting killed or injured," he said. "Someone who is taking a sip of beer, drinking responsibly, is probably not going to injure anybody."

Nichols wanted to remind students that "the big, long party does come to an end and reality will be waiting on

"Think twice before you commit to a course of action," he said. "Think twice and then call Randy. Because I'll

Nichols stressed the importance of not driving after drinking, and of being considerate to campus neighbors. He warned that students are "most likely to encounter the police in an area of public property."

egarding the Brunswick Police Department (BPD), Nichols said, "I would sional...We want to be on the same page while keeping in mind that our jobs are different."

In his 12 years with the BPD, Community Policing Officer Terry Goan said he has seen its relationship with Bowdoin Security grow "a whole lot closer

Nichols said that "several times" last year he collaborated with the BPD to issue Criminal Trespass Orders to campus guests who, among other distur ances, started a campfire in the middle of Pinestock.

We've got some undesirables that will try to get into parties on College property," said Goan. "We don't care so much that you've got a party going on, but we want to kick that other person

For Ivies, the BPD will be more aware and somewhat more staffed, Goan said.

There may be a body or two just up there all night, around campus, around the Quad-where the crowd seems to

The BPD is primarily concerned with drinking in public, overconsumption of alcohol, and neighborhood disturbances.

"What people do in their own rooms, we don't really care. That's College property," said Goan.

Concern for safety, said Goan, should take priority over fear of punishment.

"People die of alcohol poisoning. It's important that they get the help they need. You might get in trouble, but that's a whole lot less important than someone's life."

Town and gown

Brunswick residents seem largely oblivious to the pandemonium.

"I haven't noticed," said Toni Pavlovick, a Brunswick resident. "I haven't really seen anything different.

Big Top Deli owner Tony Sachs, ever, reports that "everyone seems like they're pretty well hung over, and then they miss the dining hall. Everyone just kind of stumbles in."

With rainy weather presenting a dreary beginning to a legendary week, first years anticipating their first Ivies were unsure of what to expect, and of whether reality will live up to the myth.

"I feel like the hype is making it seem a lot more exciting than it actually is," said Jen Wenz '12.

"A lot of people have events coinciding with Ivies, so I wonder whether it'll be as exciting as they say," added Liz Huppert '12.

even Kolberg '09, who works at Hawthorne-Longfellow Library, said attendance "will be way down, especially if the weather's good," although he could not vouch for it, having not been in the library himself during past

"More than anything," said Wenz, "I'm excited to watch everyone else"— especially seniors—"have fun."

BOWDOIN BRIEF

Chris Hill '74 confirmed as U.S. Ambassador to Iraq

Christopher Hill '74 earned Senate confirmation, 73-23, on Tuesday to serve as U.S. Ambassador to Iraq.

Hill was already on his way to the Middle East on Thursday night, he told the Orient.

"I'm just taking off now from D.C. en route to Kuwait," he wrote in an e-mail to the Orient at 9:44 p.m.

All 23 "nay" votes came from Republicans. Eighteen Republicans sub-mitted "yea" votes, and one abstained epublican Sam Brownback of Kansas led the opposition, and 2008 presiden-tial candidate John McCain, R.-Ariz. so voted against Hill's confirmation Maine's two senators, both generally considered to be among the most moderate Republicans in the upper house, voted to confirm Hill's appointment. One Republican abstained

Of the 48 Democrats in the Senate, 46 voted to confirm Hill's appointment, and two abstained. One of Minnesota's seats, contested by Democrat Al Franken and Republican Norm Colema

has not yet been decided. On Monday, the Senate voted 73-17 to end debate on Hill's confirmation, which mainly consisted of a Brownback

Hill has previously served as U.S. Ambassador to North Korea (2004-2005), as well as Poland (2000-2004) and Macedonia (1996-1999).

In Iraq, Hill will head the United States' largest embassy, a newly opened complex in Baghdad's Green Zone.

Hill spoke at Bowdoin's Pickard The er on the evening of Thursday, April 2. On Saturday, April 4, Hill played in a men's lacrosse alumni game

Seniors encounter job market with varied results

BY ALEX PORTER ORIENT STAFF

During a year that has seen the loss of millions of jobs nationwide, the senior class has attained mixed results in its job search. While some have found positions, others have taken alternative career paths, or still continue to search for jobs as graduation approaches.

Although some senior job hunters have found employment, they have had to contend with the effects of this sour economy. Career Planning Center (CPC) Director Tim Diehl said that seniors are "getting jobs later than they might have expected... It seems that a lot have landed jobs in the last month who might have otherwise gotten them in the fall."

Bowdoin's liberal arts curriculum has helped the Class of 2009 as a whole to weather this financial storm. The wide range of interests held by students here, as well as the diversity of academic specialties that they claim, mean that the shift in jobs away from a particular sector will not adversely affect the job search of an entire class of students.

Diehl recognizes the value of Bowdoin's academic diversity and seeks to leverage that fact as he guides student job searches.

"In this market, it is essential that applicants consider many different positions that leverage the skills they might have." he said.

skills they might have," he said.
That is what Ian Yaffe '09 has
done over the past year. Currently
a candidate for the United States
Coast Guard Officer Training
School (OTS), Yaffe said that a career as a Coast Guard officer "is
the only job that combines all of
the interests that I have. I would
be working on the water in public
safety and possibly also combining my Latin American Studies
background."

As he focused in on a career in the Coast Guard, Yaffe reports using few traditional Bowdoin career resources. His assistance from the College community remained more informal, and occurred as he liaised with Associate Director of Bowdoin Security and Coast Guard Lieutenant Commander Carol McAllister. Although this career counseling did not mirror the typical experience of Bowdoin seniors, Yaffe said, "I am happy with it that way."

Interactions like Yaffe'scan lead to a successful job search in this economic climate. Diehl reports that CPC staff have encouraged "aggressive networking" to increase applicants chances of success. He emphasized the importance of social networking tools such as LinkedIn and the Bowdoin Career Advisory Network in this process.

"It is absolutely critical to expand your networking beyond your first-degree contacts," he said.

The CPC's emphasis on networking has seen some positive results this year, even yielding Jobs for a few students looking for work in the beleaguered financial services sector.

Economics major Jasmine Qu '09 landed a three-year contract with a Boston economic consulting firm. Qu stated that her job search was "much more difficult" given that "the traditional career path for economics students has a lot fewer jobs and [getting them] has become a lot more competitive."

Bowdoin career resources aided Qu as she sought a position.

"I found my job through the CPC; they have been really aggressive in networking and creating job opportunities for Bowdoin students," she said.

Indeed, Qu's job search went even more smoothly than that of most Bowdoin students. Instead of waiting for results into the spring, she received an offer before Thanksgiving and "did not have the bitterness of job hunting" experienced by many of her classmates, she said.

For many, that job hunt still continues. Senior Claire Lewkowicz said she is searching for "work in Boston doing biomedical or clinical research, at least for two years." After her initial work experience, Lewkowicz plans to pursue graduate studies. Unlike for Qu, potential employers have not yet made Lewkowicz a final offer of employment. This situation has more to do with the nature of her search than with unfavorable economic conditions.

"For research positions, the hiring process happens a lot later than in the financial or marketing world, so I guess it leaves that uncertainty a little longer," Lewkowicz said.

Despite efforts made by the CPC and students, the recessionary climate has yielded no job results for some seniors. Nick Peddle '09 finds himself in this position even though he actively sought a position and utilized CPC resources as he searched for a job. Like many of his classmates, Peddle stated that he searched for "some finance and consulting job when [he] came to campus in the fall." Just as he was doing so, however, those industries began to cut back on their available positions.

Even if a couple of spaces were available, as Qu's experience suggests, Peddle said, "There are definitely fewer jobs." This situation has spawned a feeling of discontent not only for Peddle, but also for many of his classmates whose job searches have been slower than usual or ultimately unsuccessful.

After discussing the situation with several friends, Peddle said, "It has been frustrating for everyone that I've spoken to."

SECURITY REPORT: 4/16 to 4/23

Thursday, April 16

• The Cumberland County Sheriff's Office reported finding an unsecured door at the Coastal Studies Center in Harpswell. There was no indication of criminal activity.

 Vandals left sink water running full blast in the first floor women's room at Sills Hall. Water flooded into the basement level damaging a ceiling. The incident occurred while an event called "A Candid Debate on the Economic Crisis" was taking place in nearby Smith Auditorium

Friday, April 17

 A Brunswick Police bicycle patrol officer issued a summons to a student on Noble Street for possession of alcohol by a minor.

 Four 30-racks of beer were found in the men's locker room at Farley Field House. Two students claimed responsibility.

 A Museum of Art patron reported turning her ankle on a walkway near the main entrance.

 A faculty member reported seeing three men with "guns" walk into Sills Hall. Security immediately responded and located three students with toy guns being used for a film festival rehearsal. The students were cautioned about the alarm caused by toy guns that often appear to be real.

Saturday, April 18

 A Thorne Dining employee reported a physical altercation with a contracted worker in the workplace. The matter was referred to Human Resources.

Sunday, April 19

 Security checked on the wellbeing of an intoxicated student in the men's room at Thorne Hall during Super Snacks. The student was escorted to Winthrop Hall.

 Brunswick Police warned a group of students who were drinking beer and playing Blongo Ball in the Watson Arena parking lot.

• Two female students reported

to a shuttle driver that an intoxicated man on Maine Street near the 7-Eleven store was hollering at them and behaving in a threatening manner. Security officers located and spoke with the man walking on Bath Road and identified him as a local resident. No further action was taken.

Monday, April 20

 An ill student was transported from Osher Hall to Parkview Hospital.

 An ill student was transported from Coles Tower to Mid Coast Hospital.

 An ill student was transported from Chamberlain Hall to Parkview Hospital.

 Security checked on the wellbeing of a student sleeping on a couch in Kanbar Hall.

 Women's ski boots and goggles that were left at Moulton Dining were turned into Security. Call Jen at 725-3458 if they belong to you.

Wednesday, April 22

A student who received a concussion playing dodge ball was transported from Dudley Coe Health Center to Parkview Hospital.
 A female student who was vom-

 A female student who was vomiting blood was transported from Coles Tower to Parkview Hospital by Brunswick Rescue.

 A student with severe back pain was transported from Stowe Hall to Parkview Hospital.

Thursday, April 23

 A student called to report an intoxicated student in a secondfloor rest room at Baxter House.
 Security checked on the well-being of the student and medical attention was not required.

 A student called Security to check on the well-being on an intoxicated student at Brunswick Apartments.

 Railing damage and fire safety violations were reported at Baxter House.

Lotteries wrap up, Brunswick Apts. go quickly

BY ANYA COHEN

Daggett Lounge filled again with anxious students seeking housing on Tuesday and Thursday night—for the triples and singles lotteries on Tuesday, and the doubles and open lotteries on Thursday.

The Tuesday lottery started with triples at 7:30 p.m., and did not move to singles until around 9:15 p.m. This long wait was due in large part to the transformation of 25 Brunswick doubles into forced triples for next year.

Despite the tighter living conditions and the time-consuming process of the lottery, Director of Residential Life Mary Pat McMahon said, "People were remarkably good spirited, patient, and willing to work with the options that they had. I was very impressed with the singles and triples

McMahon said that 207 students entered the triples lottery for only 177 beds in 59 available triples. Last year, 132 people entered, and 120 were assigned triples.

However, because of the additional beds in Brunswick Apartments, Mc-Mahon said, "It was harder this year to predict and extrapolate from last year year's numbers."

Like past years, though, top picks for rising seniors and a few blocks of rising juniors were unforced Brunswick Apartment triples. Of these, Dana Riker '10, who will be head Proctor for Brunswick Apartments next year, said that units located on the Brunswick Quad were chosen first.

McMahon said 79 participants remained after the triples lottery to try and get one of 69 singles. Some students left early, although everyone who stayed until the end was assigned a bed.

Associate Director of Housing Operations Lisa Rendall said that the small number of efficiency apartments in Stowe Inn, which have kitchens, went fast.

"People clearly knew they wanted those, they had done their homework." she said.

After those, most students chose between singles in Stowe Inn and Chamberlain Hall

Additionally, the 10th floor of Coles Tower was reserved for singles within suites. Sarah Loeb '11, who got a relatively low number, was one of the students who chose this option.

"The singles lottery worked out because everyone wanted different things," she said. "But it did take a lot longer than I expected."

Last year, only 68 of the 109 students who entered the lottery were assigned beds, and only one first year was able to pick, according to Renda-II. However, fewer seniors than in the past entered the lottery on Tuesday and several students did not show up, giving more students a chance to choose singles. On Thursday evening, Residential Life set up shop in Daggett Lounge for the last of this year's housing lotteries, this time for the doubles and open lotteries.

Two male spaces in Coles Tower remained and went into the open rooms lottery, along with four beds in Burnett, one bed in Howell, and two quints—one in Stowe Inn and one in Stowe Hall. Rendall said it was the first time that any singles were not selected.

According to McMahon, the 37 available Brunswick apartment doubles were selected first. The only exception was an Osher two-room double, the only one of its kind, selected by rising seniors with a good number.

"It's been kept kind of quiet," said McMahon.

Nathan Merritt and Sean Healey were the first all-rising-junior block to select a Brunswick double.

"We got the first pick for our class two years in a row," said Merritt.

Grant Easterbrook '11, whose block picked the last Brunswick double, said, "I'm truly lucky. We knew we were at the border, and we were on the border for the quads lottery too, so it feels really good."

After Brunswick, several junior and sophomore blocks were left frustrated, selecting between rooms in Osher and Chamberlain Halls. A few rising juniors opted to defer housing until the fall.

Professors analyze recession

GRAPHIC COMPILED ON WORDLE.NET

BY ZOË LESCAZE ORIENT STAFF

As the recession continues to pound the nation, its blows are visible day by day in Brunswick. Whether it is a business closing its doors or an e-mail from President Barry Mills on the Blue Tarp Committee's plans to carry the College through the crisis, the Bowdoin community can see the signs of economic downturn. This week, the Orient asked the Economics and Government Departments to speak on the subject of the recession and share their views of the Obama Administration's efforts to end the recession as well as the recession's long and short-term effects on the government.

John Fitzgerald William D. Shipman Professor

The recession induces, and in a sense is caused by, reduced spending by consumers and businesses. Reduced spending is caused in part by a massive loss of wealth from falling house prices and falling stock prices, coupled with problems in the banking system. The contraction is severe and unemployment will likely rise further.

In the near term we need two things: more spending and a sound financial system to provide credit for the recovery. The stimulus package increases government spending, and thus overall spending, but even more short-term government spending would be helpful. The tax cuts and long-term spending in the stimulus package are less helpful than immediate spending, and are not sustainable. As for the financial system, the banking system needs liquid assets to weather the storm, and the Federal Reserve is providing them with bucket-loads. Major banks in the financial system need to reduce their portfolios of high-risk under-performing assets so that they can begin to take on more normal loan risks. It is not yet clear that the bank rescue plans in place will really induce banks to do this, but some type of additional mas-

sive aid to shore up the financial sector is probably necessary. The question is how to do it.

Deborah DeGraff Professor and Economics Department Chair:

Overall, I am supportive of the Obama Administration's initiatives to address the current economic recession. I believe that stabilizing the financial sector of the economy and, particularly, restoring a reasonable availability of credit to individual consumers and producers is fun-damentally important to returning to conditions of economic growth, or at least avoiding further contraction. Restoring confidence in the financial sector will also likely help to recover some of the losses in valuation in the stock market. In addition, targeted government interventions to relieve economically distressed households or to generate new production and employment will lessen the depth of the recession and promote a faster recovery, simultaneously supporting new policy initiatives in areas such as the environment, education, etc. While I believe that the focus on the short-term is important, I hope that the administration will also sustain its focus on regulatory reform of the financial sector broadly defined (e.g., including mortgage brokers and insurance providers in addition to investment banks) in order to reduce the likelihood of the types of irresponsible and destructive behaviors that have developed in these areas during the past two decades and that underlie much of the current macroeconomic condition. If such ires are taken, and individuals also learn some lessons about responsibility in their personal finances, I am cautiously optimistic that the U.S. economy can emerge from this episode a few years from now in a stronger position, albeit with a continued and even greater need to reduce the federal debt.

Gregory DeCoster Associate Professor of Economics:

The U.S. economy continues to be in an essentially unprecedented and relatively precarious state. The level of uncertainty regarding the future path of the economy is quite high. A few points are, however, quite clear. A necessary (though not sufficient) condition for a sustainable economic recovery is that the banking system be returned to a reasonable degree of health. The policies implemented by the administration to date have little chance of making much progress to ward this critical objective. As regards the recession, monetary policy has been astonishingly aggressive; fiscal policy somewhat less so. Whether these policies will prove adequate to arrest the ongoing decline in eco-nomic activity is unknown. What is nown is that current monetary and fiscal policies are not sustainable over any substantial period of time. Yet, continuation, and possible expansion of the policies will be a necessity at least until such time as the administration seriously addresses the problems in the banking system. There are a variety of potential permanent solutions to the banking problems, although most come down to some version of nationalization of some set of banks or, at least, the vast quantities of so-called toxic assets on bank balance sheets. Exactly why the administra-tion has steadfastly refused to get on with what seems inevitable is actually quite puzzling. But, with the appropriate humility that should accompa-ny any forecast, I am fairly confident in the belief that as the administration dithers the ultimate price tag growsprobably fairly rapidly.

Henry Laurence Associate Professor of Government:

"In this present crisis, government is not the solution to our problem: government is the problem" declared then-President Ronald Reagan in 1981. Those days are over (apart from the music and hairstyles, of course, kept alive by hordes of screaming Racer-X fans). The biggest impact of the economic meltdown has been a shift in attitudes toward the appropriate level of government involvement in the economy. Far from being the problem, massive government intervention—in the form of trillions of dollars in stimulus spending and billions in welfare handouts to Wall Street bankers—is gener-

ally regarded as essential to economic recovery.

Perhaps, if the history of the last Great Crash is any guide, this will usher in a period of closer, better supervision of big business. No longer will Peanut Corporation of America be allowed to sicken and kill hundreds of Americans by "re-testing" and selling food when initial reports indicated salmonella. No longer will systemically vital American Insurance Group (AIG) be allowed to make massive bets on the housing mar-ket without the assets to cover losses, thereby apparently requiring tens of billions of my tax dollars to repay their gambling partners (Don't worry, I'll hand the tab off to you guys). No longer will we believe the fiction that our broken system of for-profit health care is more efficient than all the myriad alternatives on offer in other rich countries, most of which secure better, more equitable health outcomes for far less

The operative word is "perhaps." In the 1930s, Congress undertook serious reform of regulatory institutions, creating an economic system which worked well and equitably until dismantled five decades later. However, I don't yet see signs that President Obama intends to do more than tinker at the edges of the current system, despite all the hypocritical hysteria from the tea-bag right. Still, the ideological winds have definitely shifted, to the great consternation of Reaganwannabes such as Sarah Palin, who famously demanded "Government, just get out of my way!" only to insist on stricter federal oversight of financial markets a few sentences later. Her

confusion tells the same story as my receding hairline and creaking dance moves: we're not in the '80s any more.

Richard Skinner Visiting Assistant Professor of Government:

In the short term, the recession has increased the demands on government while reducing the resources available to it. State governments have been hurt especially by the downturn, since it has reduced the revenues available to them through income and sales taxes, while also increasing the demand for social services such as Medicaid and unemployment compensation. Almost all states have a constitutional requirement to balance their budgets every year, forcing them to cut spending and raise taxes, just when such moves have the most severe economic impact. Not surprisingly, the Obama Administration has aimed much of its stimulus funding at the states.

The federal government, since it is under no requirement to balance its books, can run a deficit. Since U.S. government securities are still considered to be among the safest possible investments, Washington can easily borrow billions from jittery financiers at a low cost. Not only has Obama embarked on a wave of spending aimed at reviving the economy, he has intervened in the private sector, especially the auto and financial industries, at a level almost unprecedented in American history.

can history.

In the long term, it is possible that we are seeing a reversal of the trend toward free markets that began as a response to the inflation and sluggish growth of the 1970s. Polls showed an unusual public appetite for government intervention and a growing skepticism of big business. So far, they also indicate that citizens remain confident in Obama's ability to manage the economy. Should he retain this support, he may be able to expand the federal government's role in a variety of areas, especially health care, education, and energy.

Keeping professional and casual wear within your comfort zone

BY DAVID YEE COLUMNIST

For most of the year, I've been hearing a familiar refrain regarding fashion: "The weather right w sucks. When it's nice at the end of the year, I'll be more likely to care about how I look. Until then," the refrain continues, "I just want to be comfortable." And while, for the whole year, I've been speaking of the merits of doing otherwise, I definitely appreciate desire to dress comfortably. Clothes are meant to be lived in, not just looked at. However, I also know that it's not necessarily true that people start to care what they look like at the end of the year. Jeans and a sweatshirt no longer feel comfortable when the weather eclipses the 60-degree mark. Shorts and t-shirts (which generally come in brighter colors) short, it's probably not out of con-cern for image that people look happier and springier. Our dress reflects who we are, and most of us naturally seek comfort. At the end of the year, comfort just looks better. Again, I can appreciate that.

The end of the year also brings talk and concern of what lies beyond the bounds of the Bowdoin Bubble, and for many, it is a job world that is not as open and for-giving, but nevertheless much apt to judge on first sight. With the exception of a lucky few, we will fall into jobs and internships that necessitate dress that diverges greatly from our daily norms. Even those lucky few that avoid the desk job must display great courage (or foolishness) to shirk dressing up for the job interview; not many of the outfits dis-played on "The Sartorialist" would pass the grade. Just as more people are willing to embrace attire infused with more personality, the If your job doesn't allow you to exhibit any sort of comfort or individuality, don't squander the few opportunities you have to do so---especially those few you have left in the forgiving specter of the Bowdoin Bubble.

real world intervenes.

But the common assumption that all professional formal wear must be uncomfortable is untrue, and it is likewise incorrect to assume that professional attire can-not express individuality. The options out there for business attire are actually dizzying, probably due to the fact that so many people in this world are forced to wear it. The colors and patterns do vary, though they are markedly quieter than those you may choose to use outside of the workplace. Colors and patterns are largely up to per-sonal taste, and people will choose them as they will, mostly in line

patterns in their casual wear. Cut and material are more closely related to comfort and are aspects of formal wear that people tend to forget about, assuming that they cannot look good in the clothing, and thus cannot be comfortable in it. Most people know what they look good in, and while it may take some searching, there are suits (for men and women) that fit and look good. All formal wear comes in a variety of materials, ranging from and warm winter material to light summer material. Again, finding the right material for your comfort and the time of year largely depends on putting the time into it, but we are naturally com fort-seeking creatures, and that extra time is likely worth it.

As to personality, many career planners give the general advice that dress that makes one stand out is not appropriate for the work-place. While I cannot consciously advise otherwise (as I do not have

experience enough in the world to know it to be untrue), I will say that there are clothing options that more subtly express a bit of rebelliousness than outlandish outfits at work. For men, cufflinks, tie bars, and pocket squares all work to add flash of personality to outfits that most people will not notice. For women, covered jewelry (like bracelets or anklets under clothing) can work to the same extent. And for both sexes, socks don't often get noticed, so if there is room for a bit of wardrobe-related craziness, it's often beneath the cuffs of pants and under the shoes

Remember, too, that there are locales under sunny skies and nights out beyond the workplace to be had and used for self-expression. If your job doesn't allow you to exhibit any sort of comfort or individually, don't squander the few opportunities you have to do especially those few you have left in the forgiving specter of the Bowdoin Bubble.

Power in the prostate: Exploring the atypical possibilities for male pleasure

MATTERS BY JULIA BOND

Putting aside these cultural attitudes and exploring the pleasure potentials of the prostate can be a very COLUMNIST rewarding experience for a man.

Sexual pleasure for men is considered to be less of a mystery than pleasure for women. Part of this might be because the part of male anatomy considered to be "most central" to sex, the penis, is pretty obvious. It might also be because men are assumed to start masturbating at a young age and are there-fore considered orgasm experts by the time they might want to start teaching other people how they work. In reality, however, there is more to male sexual pleasure than the penis. Putting aside fantasies, preferences and emotions and focusing solely on anatomy, there are men who experience pleasure in their ears, nipples, fingers, inner thighs, balls and anus, to name a few locales. This doesn't mean that the penis isn't important, because

age woman. In the name of expanding the understanding of male sexual pleasure, I would like to focus on a part of male anatomy that is shrouded in stigma: the prostate. The prostate gets a bad rap for a variety of reasons. For one thing, many men don't think about their prostate until they're about to undergo an examination by a medical professional, a process which probably couldn't be less erotic and brings to mind scary words like inflammation, disease or cancer. For another, the best way to access the prostate is through a man's anus. Unfortunately, our culture attaches a stigma of non-masculinity with the anus and men being penetrated instead of doing the penetrating. These connotations are sometimes enough to completely turn a guy off from viewing his butt as anything other than the subject of hilariously immature bathroom

it often is, but it does mean that the

concept of foreplay can be just as enjoyable and important for him as

it is considered to be for your aver-

Putting aside these cultural attitudes and exploring the pleasure potentials of the prostate can be very rewarding experience for a man, both alone or with a partner. The prostate is a collection of muscle fibers, connective tissue and glands that encircles the urethra under the bladder and is responsible for contributing about percent of male ejaculate. It is possible to access the prostate both externally and internally.

The prostate can be stimulated through pressure on the perineum, which is the strip of skin between the back of the scrotum and the anus. Because there are muscles separating the prostate from the skin of the perineum, it might take a fair amount of pressure to elicit sensations. Figuring out what works for an individual will require experimentation with varying degrees of pressure at different

points along the perineum.

The easier way to explore the prostate is internal stimulation through the anus. Though there are many sex toys designed to stimuthe prostate, it can be easier and less intimidating to start with a finger if you have a partner who is willing to try it. The prostate is located about an inch or two in on the front side of the butt, so it can be helpful for a man to lie on his back and a partner to use a "come hither" motion for stimulation. Use lots of water-based lube and take your time when inserting anything into the anus. Use a condom or a non-powdered glove to cover the finger if you want, and make sure that your nails are clipped and

Prostate stimulation can be a very erotic experience for both the giver and receiver, and it can easily be combined with stimulation of other erogenous zones, including the penis, to explore a variety of new sexual sensations. For some men, having the prostate stimu-lated at the same time as the penis can result in a completely different kind of sensation and orgasm than stimulation of the penis alone. We get a lot of information

from popular culture about what

ppropriate eroticism is, and anything that falls outside of that narrow scope is considered deviant or kinky. In reality, many men of all sexual orientations enjoy anal play in a variety of ways. And even though they don't have prostate

ing their butts touched, licked or penetrated. Despite the stigma that comes from our culture branding the butt as "taboo," exploring the erogenous possibilities of your back door can be a great way to

expand the horizons of your own sexual pleasure as well as add some new and exciting aspects to your relationship. Anal play is certainly not for everyone, but don't let any-one else make that decision for

ARTS & ENTERTAINMENT

Dance department spins innovative elements into spring show

Dancers will twirl onto the stage during the 38th-annual spring dance performance on Friday and Saturday nights-this time adding a few new

"Openings" is an hour-long dance performed by students in repertory dance classes 112, 212, and 312. It is choreographed by Gwyneth Jones and Paul Sarvis, both senior lecturers in dance performance.

The performance explores new territory by using the space of Pickard Theater in new ways and by asking the audience to engage with the performers.

Sarvis explained that historically, nost dance shows at Bowdoin have been in a showcase format where repertory courses had a venue for show ing their work at the end of a semester udent dance groups had the chance to perform as well.

Last year, the dance department decided to break out of this mold and try something new; three classes were brought together and centered their dances around sculpture pieces by Wade Kavanaugh '01.

Sarvis noted the multitude of ben-

efits of the new take for the dancers involved

"A show like this creates a certain esprit de corps and helps individuals

MARGOT D. MILLER THE ROWDOWN ORIENT

DO THE TWIST: Three students perform their final dance at the dress rehearsal for this weekend's show, which includes work from several classes.

foster an identity as dancers," he said "Also, it gives participants a fuller picture of the creative process."

"The thing to remember is that these are courses first," he added. "This presents us with the imperative to give performers a certain amount of experience. As the choreographer, I have to be mindful of the audience and craft a show that is interesting, but I have to be mindful of the dancers too, and ensure that they have fulfilling experiences as performers. Overall, it n to be a thoughtful and well-crafted evening of dance."

A major aspect of this year's dance show is the set design by Victor Becker. Becker's previous work at Bowdoin includes the design for "Phaedra," "Oedipus," and "An En-emy of the People," along with many other sets for shows both nationally

"The set really opens up the space in the theater," said Sarvis. "Hopefully it makes the audience aware of the rality of the space being a frame for the performance, but also a room shared with the performers."

He said that the stage protru into the audience and that there are a number of large white walls that progressively fly out, revealing large white

breaking up.

The soundtrack to the dance is diverse, ranging from a small jazz en-semble to new string quartet and incorporating hints of Motown and the

contrast in the dance" to be mimicked in the music. "The chosen music varies in tempo, feel, and instrumenta-

"I stayed away from music with lyrics and music that is solely entertaining," he explained. "I wanted to work with sound in such a way that it supported, but not dominated, the

The songs, while diverse, share some common aspects.
"I chose things that seemed part

of the same universe. For example, there is a reoccurring breathy flute, a steel guitar, a mandolin that becomes a motif. I tried to find original music from contemporary composers as well as some jazz and classical sources,"

The spring dance show will be performed today and tomorrow at 8:00 p.m in Pickard Theater. Tickets are ilable at the Smith Union info desk or at the door, but due to the nature of the performance, Pickard's seating will be reduced from 600 seats to 350.

Improv concert will put musicians on the spot

There will be a concert in Studzinski tonight, but the performers don't know what they're playing

The performers are students in Lecturer of Music Frank Mauceri's Improvisation 221 class, and they've spent this semester learning how to create music without traditional scores or guidelines. While Mauceri has taught jazz en-

sembles and lessons at Bowdoin for eight years, the class is the first of its kind. According to Mauceri, the class is an appropriate addition to the music department's curriculum.

"We wanted to have improvisation open to more than just jazz players," he said. "The creative process of improvisation, I think, should be something that every musician should experience."

Tonight's concert will showcase the several types of improvisation the students have spent the semester studying.

The concert's featuring a variety of different sorts of music which in volve different types of improvisation in various degrees," said music major Peter McLaughlin '10. "Some of the pieces we're playing will be free improvisation, meaning freely communicative music improvised on the spot with little to no preconceived material."

Other pieces will be "open form classical compositions," according to McLaughlin, who will perform his own concert of improvised music Monday night.

"Open form music was a style of composition that arose and became popular largely among American classical composers in the 1950s and '60s" he said. "It was developed

as an attempt to free music from the confines of a strict structural notated score

Some of these pieces integrate improvisation in a more traditional sense-within a strict harmonic and structural framework-while others allow performers to make decisions entirely at their discretion during the performance.

According to Mauceri, improvisation is an important elemen in every tradition of music in the world other than Western classical music, and even within that tradition, improvisation is not entirely

The class spent the semester learning about and trying different kinds of improvisation.

"The way the class is structured, ve spend half the time reading about and discussing improvisation in various musical traditions and we spend half the classes playing and workshopping and improvising ourselves," Mauceri said.

Although the students haven't improvised on classical music, they're exploring "non-idiomatic improvisation," according to Mauceri

"We're not trying to improvise in a particular style, but we might stipulate our own rules," he said

The class, comprised mainly of music majors and minors, is having

"It's certainly helped me to expand my improvisational palette and has allowed me to think in new ways about music-making, McLaughlin, a drummer, said.

"It's been great," said Abriel Ferreira '10, a music major and trum-pet player. "What I used to consider really out there and super experi mental is now sounding more and more in the norm and I'm finding myself questioning a lot of musical

As a classical musician, learning how to improvise has been espe

cially eye-opening for Ferreira.
"It's really changed the way I think about music because, pecially being classically trained, improvising isn't really taught or ouraged even though it's such a huge part of being a musician," she said. "No matter what kind of music you play, knowing how improvise is a very valuable skill and will only make you a better

The concert, which will include a variety of pieces intentionally writ-ten by composers intentionally for musicians to improvise, will have some untraditional aspects.

"The concert will feature some music which pushes the boundaries of traditional music making and incorporates theatrical elements," McLaughlin said.

McLaughlin and Ferreira declined to expand on what kind of theatrical elements will be incorporated into the show.

"So much about improvisation is about the process of discovery, and so we don't want to take away from that," Ferreira said.

The final piece on the program will be a conducted improvisation in which Mauceri will direct students using a system of gestures that has previously developed.

"It's a really specific system of conducting. He can tell different groups and different musicians to do different things at different times," McLaughlin said.

The concert will be performed to-night at 7:30 at Kanbar Auditorium in Studzinski Recital Hall. It is free and open to the public. McLaughlin's concert will be at 7:30 p.m. on Mon-

Bowdoin chamber choir to perform historic opera 'Dido and Aeneas'

The sounds of opera music com-ing from the concert hall will provide classical alternative to those ti be heard across the Quad on Saturday. While several musical acts will visit Bowdoin this weekend, the Bowdoin Chamber Choir will be putting on a show of its own during Ivies Weekend.

The show, held in Studzinski, is the

concert version of Henry Purcell's opera "Dido and Aeneas," which was written in 1689 and is England's oldest opera. It is based on the fourth book of Virgil's "Aeneid" about the Queen of Carthage Dido and the Trojan Aeneas

The general plot of the opera begins when Dido and Aeneas marry to pacify the relations between Carthage and Troy. A sorceress, however, plots the destruction of Dido and Carthage by sending an elf, disguised as the god Mercury. to convince Aeneas to leave Dido. N wanting to displease the gods, he decides to leave, and once he does, the heartbroken Dido sings the famous aria "Dido's Lament" as both she and Carthage are

The music of the opera, originally scored for a small group of women at a boarding school, will be performed by an ensemble cast of 20 voices accompanied by five instrumentalists from the Chamber Orchestra.

Chamber Orchestra.

Additionally, two dancers from the Portland Ballet will be part of the cast.

"The ballet dancers from the Portland ballet are great," said Jordan Payne '12, a member of the chamber choir. 14, a member of the chamber choir.

"They mostly perform and interpret dramatic elements throughout the show to emphasize the text. Their choreography definitely adds a dramatic aspect to the show. Audience members might interpret them as angels, witches, or per-formers for members of the court."

Although the chamber choir is performing the "concert version" of the opera, theatrical elements such as staging, props, and costuming will be used.

"We are performing the opera in full. It is about an hour in length, and we will perform straight through with no interruptions," said director and Visiting Pro-

ruptions," said director and Visiting Pro-fessor of Music Shannon Chase. The role of Dido will be played by Zoe Eddy '10, Aeneas will be played by Matt Gray '08, Dido's sister and hand-maiden Belinda will be played by Payne, and the sorceress will be played by Julia Bond '09. The fact that this production represents a semester-long project is not surprising given the size and difficulty of

For Payne, "Dido and Aeneas" is her first experience with opera.

"Learning to be more of an opera singer as opposed to a musical theater performer has been a really cool experi-ence," she said. "Even though it was a bit intimidating at first."

The accompanying chamber or-chestra is comprised of two violins, played by Yojin Yoon '12 and Kim Ayers '10; a viola played by Professor of Music Mary Hunter; a bass played by David Yoon '11; and a harpsichord layed by Delmar Small, the concert, budget, and equipment manager for

the music department.

To have a performance of this type on campus that combines instrumental music, vocal music, and acting presents a unique opportunity to experience op era in a small and intimate setting.

era in a small and immate setting.

There will be two performances of
"Dido and Aeneas." The first will be on
Saturday at 7:30 p.m. and the second on
Sunday at 2 p.m. at Kanbar Auditorium
in Studzinski Recital Hall.

In honor of Ivies festivities, bevy of beers brim with school spirit

BY MAC EVANS COLUMNIST

As far as I'm concerned, Ivies started Monday. This being my last Ivies, I've decided to share some of the most school spirited beers I found with old alumni brews, as well as celebrate or try to forget that the end is coming in less

Chamberlain Pale Ale Method of Serving: Bottle

Our first alumni ale is very eas find and very easy to drink. The flavors of this brew by Shipyard are not too complicated or overbearing, and the taste is somewhat watered down. The flavor is great—a sort of biscuit like taste—but subdued and hiding in the background. The thin tang of the beer makes it very drinkable, perfect for a social gathering or a barbeque, or

Longfellow Winter Ale Sustainable Ivies Cup

The next alumnus to be made into a beer by Shipyard is a winter ale and thus much harder to come by. It is like a combination of a Scottish Ale and a Porter, with some barley overtones throughout. It pours a dark mahoga-

IVIES ELIXIRS: Shipyard's Chamberlain Pale Ale is named in honor of one of Bowdoin's most illustrious alumni and goes well with outdoor gatherings.

ny into my green plastic cup, with an aroma of smoky molasses or chocolate. Like Chamberlain, Longfellow is very drinkable, with nothing too complicated to be attributed to spices or extra-neous flavors. This is a solid porter that is made well, and it is a shame that it is only distributed in the winter.

La Fin Du Monde

Method of Serving: Chalice Yet another Unibroue beer calling for the end of the world. It is a ni

percent Belgian, and is accomplished reasonably well. It has a taste of both fruitiness like banana or apple and a doughy or yeasty taste. The delicious-ness of the beer does hide its high alcohol content, as with most of the beers from this brewery reviewed this year. It is reasonably easy to find and reasonably cheap, making this an excellent beer for having around during the day (but not necessarily one you'd want to shotgun). It pairs very well with sushi, but even by itself, it is very

drinkable and highly recommended.

Delirium Tremen

Method of Serving: Mug In old cartoons, before they were

edited to become politically correct, when characters got to a certain point of drunkenness they saw little pink elephants running around. These guys are called delirium tremens, a real-life alcohol-induced hallucination. I wondered how much and how long I'd have to drink to see them during an Ivies celebration, but apparently it's three straight months and almost always is followed by death.

The beer Delirium Tremens is not nearly as extreme. It is an extreme beer. yes, also with a nine percent alcohol content, which makes it a bit pricier, a bit dangerous for Ivies, and delicious. This beer is 20 years old, recognized 10 years ago as the "best beer in the world." Righthy so, this is a Belgian beer made with an excellence that other Belgians should aspire to. It has a banana foretaste with vanilla and mild spices, paired with an intense bubbliness and the taste of hops coming through in the

Method of Servi Duct-Taped to Hand

I think in other, normal situations, I wouldn't like this beer. But it appears to be duct-taped to my hand, and I don't really care at this point anyway. It's really hard to function with this thing, so the only logical thing to do is to drink it as quickly as possible. This beer comes from Pabst brewing, and as such is somehow less appealing than PBR (also good in social situations). It has a yellow color and an aroma of a fraternity floor It has an alcohol taste that it doesn't even try to hide, and a surprising taste of malt or hops... but I don't think that's true. It is very drinkable, which is good, because this 40 is annoying.

In 'Beginner's Greek,' sparks fizzle, then become lost in translation

THE BOOK NOOK BY FRANCES MILLIKEN COLUMNIST

If one is prone to dreams of romance, planes provide appealing fod-der for the chance meeting that might lead to one's true love. A strange in-timacy can develop between people while they are crammed into the confines of scratchy seats for long stretches of time. It has something to do with the altitude. And there is the added anticipation of who might sit next to you. It's a mystery and there is a short moment of suspended time when one can imagine "Maybe this time..."

Usually, it's a hairy older man, or a chatty grandma happy to talk with you for all five hours of the flight. But for Peter Russell, a fellow who is par-ticularly prone to this line of thinking, fills the seat next to his on h flight from New York to L.A., and, night from New York to L.A., and, you guessed it, they fall madly in love. This is the premise of James Collins' novel "Beginner's Greek." The novel purports to be one both about true love and love at first sight with delicious complications.

Being something of a die-hard ro-mantic myself, I decided to succumb to what I hoped would be the mind-less but enjoyable pleasures of a mod-ern "comedy of manners." I should have known better.

Of course, Peter and Holly don't end up together right away. They meet in the first chapter, but the slip of paper that Peter takes from Holly with her number on it "mysteriously" disappears. And from there unfolds a 400-page drama of reconnections, misunderstandings, affairs, marriages of convenience, and the everlasting

the convenience, and the every same hope for happily after.

The result is incredibly banal.

Collins clearly has a very good idea of what his characters look like

and how they behave. Descriptions of their clothes, wealth, and lucra tive occupations are quite detailed. Almost all of his characters have extended face time. Collins frequently moves from one perspective to an other, thereby developing a multi-di-mensioned narrative.

The characters are designed to be more complex than they first appear. The neurotic Charlotte has a daring side; the temptress who has mar ried for money gives it all up to do the right thing. A whole entourage of well-groomed personalities with their assigned roles parade through the pages of this novel. They are vivid. eat for breakfast, or what criteria his best friend Ionathan uses to choose

Despite the amount of detail and lucidity with which Collins examines his characters, nothing unexpected happens. All the character "twists" are not only predictable but inevitable. Everyone ends up where they were supposed to after that first scene on the plane. But Collins takes the reader on an endless detour that sheds little light on humanity or the development of any of the characters. A critique of the extreme wealth of the characters emerges, but neither the implications nor the possibility of complications is examined. On the whole, the cast seemed to be content with settling with the best offered to them. They struck me as spineless on the whole, and undeserving of the sheer bliss Collins allows them to achieve.

I love love stories, and I love New York, which is where most of this glamorous drama unfolds. But even my affection for these elements was not enough to carry me through the triviality of this tale. Fiction has come a long way since the 1800s, when comedies of manners were novel. Jane Austen handled the topic much better, and she remains far more relevant.

WBOR 91.1 FM DJs OF THE WEEK

Neil Chaudhary '09 and Cody Desjardins '09

If you could only listen to one album for the rest of your life, what would it be?

NC: Metallica's "S&M." That way I could enjoy both classical music and Metallica before they began to

CJ: "Kid A" by Radiohead. Favorite song to privately dance/ rock out to?

NC: Guerilla Radio.

SPORTS

CATEMITCHELL. THE BOWDOIN ORIENT

SPLISH SPLASH: Mike Mitchell '11 (second from left) jumps a hurdle while trailing shortly behind teammate Jonas Crimm '10 (No. 5) in the steeplechase.

Men's track finally wins State Meet

If at first you do not succeed, try, try again. During the past seven seasons, no matter how hard the Bowdoin men's track and field team tried, their valiant efforts at the Maine State Championship were simply not enough to prevent the same disappointing result from occur-ring year after year: a close second-place finish to archrival Bates.

The Polar Bears finally got over the hump last Saturday and snapped Bates' streak of seven straight outdoor state championships by winning their first

Maine State Championship since 2001.

At the Russell Street Track at Bates the Polar Bears scored 230 points and in doing so, ran past the Bobcats, who scored 206. The University of Southern Maine finished third with 142 points and Colby was fourth with 36. For many on the team, they feel that they not only won an important title, but also brushed a big chip off their shoulders.

We feel so relieved," said Thompson Ogilvie '10. "For the past couple of years, we came so close, but ended up losing by two or three points."

"It feels great, more so for the seniors since they came close so many times," said first-year Riker Wikoff, reiterating the same sense of relief. "Most of the satisfaction from the meet came from the fact we could pull through for them."

Ogilvie and Wikoff each contributed to the Bowdoin victory with wins in the 800-meter run and the 400-meter hurdles, respectively. The Polar Bears also received event wins from Chris Martin '12 in the high jump and Nick Ianetta '11 in the javelin throw.

Easily the most remarkable performance of the day came from senior captain Damon Hall-Jones '09, who scored 27.5 points and made history by becoming the first athlete in the 114 years of the state meet to score in three running events and two throwing events.

This type of athletic depth proved to be a key factor during the tightly con-tested meet. Although the Polar Bears had only four first-place finishes on the day, it was the only team to score in every event. The quartet of Ianetta, Kyle Hebert '10, Mason Moss '12, and Hall-Jones were the best representa-tion of Bowdoin's athletic versatility in the javelin throw, finishing in spots one

"It was a close meet all day, and then the javelin throwers gave us a strong lead that we were able to hold for the rest of the meet," said Coach Peter Slovenski

about his throwers' impressive feat.

However, as several runners noted, Bowdoin's team depth did not only have a major impact on its victory on the track and on the field, but also on the sidelines. Although track consists port that the Polar Bears gave each other throughout the meet proved that it is very much a team sport as well.

"I didn't care how fast I was running, and in the end, the race didn't hurt as much it could have because there was so much excitement and energy coming to me from all my teammates cheering. said Scot McFarlane '09, describing the atmosphere during his second-place finish in the 5000-meter run that clinched the state title for Bowdoin. "For me, having a chance to contribute to our victory was definitely one of the best feelings of

Having conquered the track and the field in Maine, the Polar Bears will have the chance to prove their prowess with the rest of New England watching at this Saturday's NESCAC Championship. Riding the momentum from the state championship, Bowdoin is confident that they can produce equally successful results at this larger meet with stronger

will be a tough meet. NESCAC schools are tough competitors," said Ogilvie. "But this win over Bates has given us a lot of confidence. We're going to carry this momentum into the NES-CAC championships and try to grab a top-four finish."

The men's track and field team will travel to Connecticut College to compete at the NESCAC Championship this

Women's track takes first at Aloha Relays

The women's track team remains confident in its chances of finishing in the top three teams at this weeken NESCAC Championship, given its defeat of two of the conference teams. Colby and Bates, at the Aloha Relays

This was the 21st Aloha Relays. which draws schools from across the state as well as Mt. Holyoke and Smith Colleges. The Polar Bears won the meet handily, eclipsing Bates' 150 points and Colby's 123 points with a total score of

Highlighting the day were two record performances. Chris Head '11 jumped a height of 10'2" in the pole vault, set-ting a Bowdoin record in the outdoor pole vault and taking third in the event. Last year, Head also set the indoor vault record with a jump of 10'6".

Continuing her stellar transition from indoor to outdoor track, Ali Chase '09 set a meet record in the 800-meter run with a time of 2:15.63. two seconds with a kick in the final 200 meters. Bowdoin took four of the top five spots in the 800-meter run, with Duffy '11, Grace Kerr '11, and Alex Peacock-Villada '11 taking third, fourth, and fifth, respectively.

"I found the open 800-meter run inrirational," said quad-captain Alison Pilon '09. "It was so telling of the depth we have on this team right now."

The Bears garnered many other victories throughout the day, with Laura Peterson '12 winning the long jump and the triple jump, and classmate Elsa Millet '12 taking first in the 200- and 400-meter dashes.

Other first-place finishes included Emily Barr '12 in the 100-meter dash,

meter run, Anna Ackerman '12 in the 3,000-meter steeplechase, and Kelsey Borner'09 in the javelin.

The team of Barr, Haley MacKeil '10. folly Seaward '09, and Hannah Peckler '11 had a decisive victory in the 4 x 100-meter relay, finishing .52 seconds ahead of the second place team from

The 4 x 800-meter relay team Peacock-Villada, Kerr, Lindsey Schickner '09, and Jess Sokolow '09 nabbed a first place finish as well, edging out the Colby team by just over a second.

So while a decisive victory and a sunny day left the Bears reassured of their depth and talent after the Aloha Relays, the women are preparing to fry bigger fish this weekend at Con-necticut College, where the NESCAC Championship will draw some of the top schools in the region.

Bowdoin finished sixth at the 2008

championship, but the team is setting its sights on a top-three finish this year, with Middlebury, Williams, and Tufts posing the largest challenge. Williams and Tufts took second and third at the indoor Division III New England Regional Championship two months ago, a meet that Bowdoin took fourth in.

"NESCACs will bring some very fierce competition," said Borner, "and it will be our goal to beat Tufts and Middlebury to move into the top two or three teams in the conference. We'll need people to get points wherever they can, especially moving up from 11th, 10th, and ninth place seeds into

the top eight scoring positions."

"The competition will be steep," Pilon said, "but we definitely have a thing or two to show the other teams in the league...I think that if everyone starts peaking the way we are planning then we'll be able to achieve that."

Sailing places 15th, misses nationals

BY CHARLOTTE RYAN

Bowdoin sailing failed to qualify for the fleet race championships last week-end at Boston College and will now focus on team racing for the remainder of the season in hopes of qualifying for

Bowdoin finished 15th in an 18boat fleet at the New England Dinghy Championships. The Polar Bears sa against the top teams in New England.

After a tough start in Division A, captain Doria Cole '09 came in off the bench and strung together several good finishes in a very competitive fleet. Cole was up against at least eight All-American skippers in Division A and just 31 points separated the top 10 teams after 32 races. Cole sailed with crew Coco

Alex Takata '12 sailed to an 11th place finish in Division B with crew Erin Taylor '09. Takata was one of two first year skippers in the division.

Coach Frank Pizzo said crew Taylor and Sprague were the "workhorses of the weekend."

The team did not qualify with a 15th-place finish; however, they were in good company. Four or five top-15 teams in the

ntry are also not going to nationals," Pizzo said. Pizzo said the team "sailed better

than the results showed," despite the fact the sailors had trouble with boat speed and getting off the line with the ding boats.

wever, the team stuck it out in

good breeze conditions.
"They strung together some really good finishes and kept a good attitude

and had good stamina throughout a really long weekend," captain Peter Wadden '09 said.

Another team of sailors competed in the Oberg at MIT and also finished 15th in an 18-boat fleet. DJ Hatch '11 skippered with crew Leah Hughes '11 in Division A and Andrew Howard '09 skippered with Katharine O'Brien '12.

The team is now preparing for the team race qualifiers at Roger Williams this weekend. The sailors will compete against six teams for two spots in nationals. University of Vermont is the favored team, but after UVM, the race is up for grabs.

ave raced everyone else, be competitive, beaten most of them before," Pizzo said.

The Polar Bears will also send a team to MIT to compete in the Cen-

Tennis swept by Williams

BY EMMA POWERS

The women's tennis team fell to Williams College on Sunday, losing all nine matches to the top-ranked team. The loss represented the Bears' worst of the season, as all but two matches were lost in straight

Sarah D'Elia suffered her first loss of the season to Williams'

At No. 2 singles, Emily Lombardi '12 battled, losing a tight match in three sets (6-4, 3-6, 6-1). Liz Pedowitz '10 also had a strong showing, taking a set away from Ashley Parsons (6-1, 4-6, 6-2).

'Our loss was unfortunate, but I also don't think the score is very telling of how the overall match went," Pedowitz said. "We had a lot of close individual matches that could have gone either way."

Lombardi explained that the team is prepared to take what they have ned from the Williams match in order to focus and improve.

The most important thing is that everyone learned exactly what they need to work on to beat the

best," Lombardifsaid, "Now that we each know the adjustments we need to make to our games, we can work reach our peaks at the right time."
Stephanie Langer '11 also reflect-

ed on the positive aspects of the brutal match

"Obviously our team is disappointed that the match wasn't closer against Williams," Langer said. However, each of us learned what we need to do to advance to the

After a week of hard work at practice, the Bears are looking to bounce back this weekend when they take on MIT and Tufts at home.

'We're pumped up for both of our home matches this weekend against MIT and Tufts," Pedowitz said.

In addition, with Ivies weekend in full swing, the Bears are hoping to have a good crowd at the match.
"We're excited to see what kind of

Were excited to see what kind of rowdy fans an Ivies weekend home match brings," Pedowitz added. "This weekend, we hope to go out playing with confidence," Lombardi said. "We are looking forward to playing at home and showing what we can do."

Men's lax to face Tufts

BY JEREMY BERNFELD

The men's lacrosse team heads into its huge showdown with Tufts ronight in a pitched battle for a home playoff game. Currently tied for third in the conference, the Polar Bears (8-5, 5-3) need a win if they are to host in the first round of the NESCAC tournament.

Tonight's game, at home at 7 p.m., is crucial for the Polar Bears and the team will look to run its winning streak to two after a win over Bates on Tuesday.

Tufts (11-2, 6-2) sits at second in the standings heading into tonight's game and will also lock up a home playoff matchup with a win. The Jumbos boast a prolific offense led by attackmen Clem McNally and D.J. Hessler.

Bowdoin will look to its ball-control and fitness to overcome the Jumbos.

"To beat Tufts, we'll have to maintain the intensity and continue the smart style of play from Tuesday night, and just flat-out outhustle them," said senior quad-captain Rob Halliday. "We know that they're a big transition team but we're still one of the most in-shape teams I've ever been on and should therefore be able to [combat] their fast style of play."

"We are going to have to come out confident and play a full game," said junior attackman Adam Tracy. "Because Tufts has such a strong offense it is going to be essential for our own offense to minimize turnovers, control the game, and capitalize on our opportunities."

The Polar Bears overcame both the elements and the Bobcats on Tuesday in their 15-7 win. The game, played after an hour delay, was a battle through

driving rain and cold temperatures. The victory snaps a four-game losing streak at a crucial juncture in the season.

"We watched a lot of film on our past few games, the Colby game in particular," said senior quad-captain Harry Ashforth. "We were able to fix a lot of our mistakes on offense and defense by watching ourselves in the games. The team did a great job of implementing what we worked on in practice, and it showed against Bates."

Bowdoin was led by Tracy who notched four goals and one assist in the win. Russ Halliday '11, Matt Legg '09 and Steve Thomas '10 each added two goals and sophomore netminder Jake McCampbell stopped 11 shots.

"Opportunities were created by good ball movement and taking advantage of the looks their defense was giving us," Tracy said. "Our offense finally came together and we played as a team."

The Polar Bears scored in bunches throughout the game, with runs of two, three, and six goals. After leading 9-4 at the half, Bowdoin outscored Bates 4-0 in the third quarter to put the game out of reach.

Tonight's game features two of the best teams in the league battling for the playoffs. While Tufts is ranked No. 8 in the country. Bowdoin will look to knock the Jumbos down a peg and secure a home playoff game. If the Polar Bears win, they would host on Sunday.

"A home playoff game is definitely

"A home playoff game is definitely important as it's always great to play in front of our fans and the Bowdoin and Brunswick community," said captain Halliday. "But home or away, the key to the rest of the season is maintaining the poised confidence and intensity that we've now regained."

JUMBO HUNTING: The women's lacrosse team will face Tufts in Medford today in its final regular season match.

Women's lax beats Bobcats in 20T

BY CRAIG HARDT STAFF WRITER

Hosting NESCAC rival Bates at Ryan Field on Tuesday, the Polar Bears looked to build on the momentum they gathered in last week's win against Williams.

Bates scored first before first-year Liz Clegg got Bowdoin on the board, beating Bates goalie Mara Krueger with an impressive unassisted goal.

However, both teams struggled to score in the first half as the defenses held the opposition in check before Katy Dissinger '11 broke the scoring drought with three minutes left in the half.

After being outshot 16-7, Bowdoin looked as if it would make it to half-time trailing by just one, but Bates' Joan O'Neill scored with two seconds remaining to give the visitors a 4-2 advantage heading into the second half.

After surrendering a pair of goals to Bates after the half to fall behind 6-3, Bowdoin climbed back in the game with an improbable 5-1 run to take the lead.

Bates refused to crumble though, pulling even with just under two minutes remaining in regulation, before Clegg gave the Polar Bears the lead with just 35 seconds remaining. However, a free position shot by Bates with just 15 seconds left sent the game into overtime, where Lindsay McNamara '09 put the Polar Bears up 10-9.

Bates responded with a goal of its own to send the game into a second overtime.

Bowdoin's Clegg scored her fourth goal of the night on a free position shot to put Bowdoin on top for good.

Coach Elizabeth Grote said, "We're finally starting to hit our stride. It'll be like that with a young team but we're playing as well as we have al season right now."

With the win, Bowdoin improves to 8-6 (3-5 NESCAC), putting the team in a three-way tie with Amherst and Bates for the final NESCAC tournament spot.

Senior tri-captain Steph Collins-Finn made 14 saves en route to her school-record 40th win.

"Steph has been a leader all year and she's playing her best yet right now. Her leadership has been a big spark for us," said Grote.

The Polar Bears will look to finish their regular season on a high note as they travel to Boston to take on NES-CAC-leading Tufts today.

"We've just got to keep possessing the ball offensively and capitalizing on our scoring chances," said Coach Grote. "We could finish [the regular season] anywhere from fifth to ninth, so it's scary, but we're going for the win."

Baseball hopes for playoffs

BY DANNY CHAFFETZ

Adding insult to injury, Bowdoin suffered a 19-9 blowout loss to Husson on Wednesday after an already disappointing weekend against Tufts.

After trading runs for the majority of the game, Husson exploded for nine runs in the bottom of the eighth inning to secure the victory. A usually strong bullpen struggled in the contest as Bowdoin needed to use nine pitchers on the day. It was the team's first loss in a mid-week game, but it will not have any impact on the team's playoff hopes.

Just four days earlier, Bowdoin walked off the field having won the last of a three-game set against Tufts. Unfortunately, the Bears had already lost the previous two games and now take a 3-4 NESCAC record into their list earlier of the propular responsible.

last series of the regular season.

The team needed to take two out of three off of the lumbos in order to stay in control of their playoff hopes, but made it difficult after losing the first game of the series 15-3.

All aspects of the team fell flat as Tufts easily took the victory in the first game of the series. The hitting struggled with just seven hits on the day while defensively, four errors led to four unearned runs. The only high points for the Bears were three solo home runs by Dan Hicks '11, Kevin Zikaras '10, and Joe Berte '09.

"Hicks has become a real presence in our lineup, his hitting has really improved this year," said Coach Michael Connolly. But with the loss on Friday,

But with the loss on Friday, Bowdoin looked to sweep the double header the following day. In the first of two, Bowdoin was down 11-3 going into the bottom of the seventh after having let up six runs in the fifth. The team knew how important the game was and began to rally. But even after putting together six runs in the top half of the seventh, the team fell just short and lost 11-9 after an almost brilliant comeback.

Having lost the first two games of the series, Bowdoin needed to win the last game in order to put pressure on Tufts to relinquish that last playoff spot. On the shoulders of captain Jason Koperniak '09 and sophomore Brendan Garner, the Bears were able to muster a win against Tufts, taking the game 13-7.

Joe Pace '10 was the winning pitcher in the contest, going five strong innings, giving up just four hits and three earned runs. Offensively, Koperniak provided most of the support with four RBIs in the game while Garner added three of his own. Tim Welch '12 recorded the save in the game after pitching four innings and allowing only two earned runs.

Defensively, the team struggled all weekend long. The Bears had 14 errors over the three-game span that

led to seven unearned runs in total.
Going into this weekend's series against Bates, the team has the exact same playoff picture as it did last year.
Bowdoin needs to sweep the Bobcats and have Tufts lose at least one game against Colby.

against Colby.

Last year, Colby did indeed take a game from Tufts, but the Bears dropped a game to the Bobcats, ruining their playoff chances. Bates comes into this weekend with a 2-6 record in the NESCAC, and is 8-16 overall. Bowdoin, now 17-15 on the season, look to take game one of the series at Bates today at 3 p.m.

Softball reaches 20 wins after UNE victory

BY ADAM MARQUIT STAFF WRITER

The Bowdoin softball team reached the 20-win mark for the third season in a row with a 5-4 win over University of New England on Wednesday. Inclement weather shortened the scheduled double-header to one game, but the Polar Bears were ready despite the rain.

First-year Courtney Colantuno (4-0) started on the mound for Bowdoin, pitching four strong innings as she earned the win. She only allowed one hit with the defense behind her allowing three unearned runs. She struck out three and walked three. Julia Jacobs '10 got the save in relief, pitching the final three innings. Jacobs allowed just three hits and one earned run as she also struck out three.

Colantuno helped her cause, hitting her first home run of the season in the second inning, driving in two runs. Lauren Coven '10 went two for four at the plate with one RBI. Senior catcher Alison Coleman drove in two as she went one for three.

Last Friday, the Polar Bears took on Tufts University (32-0, 12-0) at Pickard Field in the first of a three game divisional series as the Jumbos looked to complete a perfect NES-CAC record. Jacobs (6-7) tossed a complete game allowing eight hits and four earned runs as she took the loss in a 5-0 Jumbo win. Tufts pitcher Lauren Gelmetti quieted the Bowdoin bats in her complete game shutout. Gelmetti did not allow a hit until the sixth inning.

Saturday proved to be much of the same for Tufts as they defeated the Polar Bears 9-1 and 6-3 in the doubleheader, topping off their perfect 12-0 NESCAC season.

Karen Reni '09 (4-5) tossed all seven innings for the Polar Bears, allowing 11 hits and five earned runs. The Bowdoin defense committed five errors behind Reni as Tufts took an early 4-0 lead. Coven supplied Bowdoin with their only run in the first game on an RBI single.

The second game on Saturday was scoreless until the third inning when the Jumbos plated their first run. Bowdoin made an attempt at a comeback down 6-0 in the sixth inning scoring three, but it wouldn't be enough. Junior shortstop Casey Sullivan went five for five for the

Jumbos, scoring two runs and driv-

Amy Hackett '12 and Coleman both went two-for-four at the plate for the Polar Bears. Jacobs took the loss for Bowdoin in four and a third innings of work allowing four earned runs on 10 hits.

Some good came out of the weekend against Tufts as the Polar Bear pitching proved to be one of the strongest in the NESCAC. "We held them to one of their lowest team batting averages all season," said Kaitee Daley '09.

In the final three games of the '09 season, the Polar Bears look to improve their 2-7 NESCAC record this weekend against Colby, but do not have a chance at making play-

The first game will be in Brunswick and the Mules will host the Polar Bears for a doubleheader on

"The remaining games give the freshman, sophomores, and juniors their last opportunity to beat a huge rival with some of their best friends on the field before they graduate," said Jacobs. "I don't know if Karen Reni pitching her last game will be harder for me or for her dad."

The Return of Hockey

JEREMY IS
BERNING
BY JEREMY BERNFELD

I've got all of my teeth, my hair is short, and I don't say "eh." I don't skate too well and I haven't been in a fight since fifth grade. I've only seen Mighty Ducks four times. And despite all of that, there is a hockey player inside of me just waiting to burst out and finally figure out which channel is Versus.

channel is Versus.

Hockey is back, baby! I might be a little late to the train, but there are now certainly four major sports on the American landscape. Memo to soccer and NASCAR: you had your chance and you blew it.

It has crept up on us, but it's hockey playoff time. And for anyone who knows what USA 4, USSR 3 means, it's time to unleash the beast. But in case you hadn't already figured it out: Wake up and smell the Canadian bacon, because playoff hockey rocks!

The league has marketable young stars with insane amounts of talent. There are great teams locked in epic playoff battles, and the NHL is a league full of the gritty, hard-hat lunch-pail guys that the American public loves.

Hockey players leave it all on the ice, or in the ice, because after games they must be as sore as my wallet post-Ivies. And that's why hockey is cool: you can't go half-speed, you can't cruise. You've got to give it your all if you play hockey, or wou'll get crushed.

or you'll get crushed.

Bruins-Habs (don't ask me why they call the Montreal Canadiens the "Habs," I'm just a bandwagon fan) has historically been one of the great rivalries in professional sports.

The intra-Pennsylvania derby series between Pittsburgh and Philadelphia has more bad blood than a tea party with the Montagues and the Capulets. And the Sharks-Ducks Western Conference match-up should be as entertaining as an actual shark eating an actual duck.

Hockey has always been fast-paced, tough, and dramatic. It has always had passionate fans, at least north of the border, and great rivalries. The problem with hockey was never a problem with actual hockey, it was with the way the came was neckaged.

game was packaged.

First they tried to stifle fighting. Since this is America, that backfired. Then they tried to jam hockey down our throats because the networks wanted more sports programming. Since this is America, that backfired. And finally, they decided that nobody was making enough money so they would just deprive us for a year and weld finally wake up and realize how much we missed hockey. And since this int Canada, it backfired.

sant Canada, it backtured.

During my senior year of high school
the NHL canceled its season because
greedy people couldn't figure out a way
to be slightly less greedy. This, of course,
turned the casual American sports fan
off of backey.

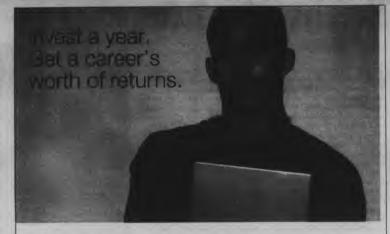

That was me. But that was then and this is now. I may not be a shopaholic, an alcoholic, a drug addict or a criminal, but I do have a confession to make: I'm officially a bandwagon jumper. I used to be a Bruins fan and now I'm back from my sabbatical.

As a bandwagon fan I'm the lowest of the low, only a few rungs up from perverts, drunkards, and reality television "stars."

But I've come to terms with my poor life choice and I know that admitting is the first step to recovery. And don't worry, they don't make pink Bruins hats. Otherwise I'd have to buy one.

Of course, as a homer and a fan for all of the last three hours, I'm making my highly educated NHL playoff prediction: Bruins over Sharks in the finals. Lord Stanley, welcome back to Beantown. While the B's might not bring home the Cup, I can predict with certainty that hockey will only grow in the future. Finally, all is right in a world with four

So, pop open a Labatt Blue and settle in for passion on ice. You won't regret it, unless you're from San Jose.

Men's tennis finishes regular season ranked No. 11 in nation

The Polar Bears ended the season yesterday with a solid win against the University of Southern Maine 8-1, finishing 11-5 (5-3 NESCAC). Last weekend, the team had a game on each day of the weekend, downing MIT 8-1 on Friday but falling to Williams and Amherst.

Williams is ranked No. 7 in the nation, Amherst is No. 5, and Bowdoin is No. 11.

Doubles play started off strongly against MIT last Friday, with first-year Oscar Pena and Jamie Neely '10 winning 8-3 at the No. 1 position, Stephen Sullivan '11 and Alex Caughron '09 winning 8-2 at the No. 2 position, and Tyler Anderson '10 and Alex White '09 rolling 8-0 over their opponents.

Singles play was solid, with Sullivan, Pena, Caughron, and Neely all notching extra points for the Polar Bears. Sullivan owned his opponent 6-0, 6-0, at the No. 1 position.

Pena pulled out a three-set win 6-3, 5-7, 11-9 at the No. 2 position. Josh Cranin '12, Caughron, and Neely all won at the No. 5, 3, and 6 positions, respectively, with White

ceding a tough match to MIT.

The Polar Bears started off strong against Williams the following day, posting-wins at the No.1 and 2 doubles positions. The new doubles combos put to-

gether by Coach Colin Joyner midway through the season was worked very well. Singles play against Wil-

STEPHEN SULLIVAN '11

liams was much rougher, however, with Sullivan '11, Pena '12, and Anderson losing in straight sets at the No. 1, 2, and 3 positions. Senior co-captains Caughron '09 and White each lost tough three-setters, and Cranin notched the sole win for the Polar Bears at the No. 6 position.

Though the team won two out of three doubles matches against both Williams and Middlebury in the past, Coach Joyner said that it was not a reliable indicator of singles play.

"Singles and doubles play is completely different," said Joyner. "I'm happy with how our doubles team has been performing.

The match against Amherst on Sunday, though close, swung to the opponent 8-1. Amherst won all three doubles matches, though the No. 2 (Caughron '09 with Sullivan '11) and No. 3 (White '09 and Anderson '10) matches were close.

The full singles lineup was missing as Anderson sat out with a back injury. "Hopefully I'll have a fast recovery," he said. Sullivan (No. 1), Pena (No. 2),

White (No.3), and Cranin (No. 6) were all knocked out in straight sets. White dropped a tough three-

Have a Safe and Happy Ivies Weekend

Bowdoin Security: (207) 725-3314

OPINION

BOWDOIN ORIENT

The Ivies Spirit

or many of us, Ivies is one of the most exciting weekends of the year. It's a time for people to drop everything, and, yes, knock back a few beers. Or knock back a lot of beers.

Undeniably, alcohol is part of what makes Ivies fun. But at the same time, especially for those of us who might be unsettled by the idea of drinking for three, five, or seven days in a row, it's important to remember that it's by no means the only purpose.

As we see it, the major goals of Ivies are as follows:

- 1. Ignore work entirely
- 2. Be outside as much as possible
- 3. Spend time with friends
- 4. Listen to great music
- 5. Let go of inhibitions

It is true that drinking can aid in the achievement of these goals, but none of them inherently demand alcohol. Anyone can experience a successful Ivies without the assistance of substances.

In all seriousness, Ivies can be intimidating for those who aren't interested in drinking, or who only want to drink a little. However, we would urge everyone to embrace the spirit of community that coalesces around the Quad on Saturday. Just make that embrace in whatever way works best for you.

Dance Show

ven that it's Ivies Weekend, it seems unlikely that anyone would want to go sit still in a dark room for an hour. With Harpswell, Pinestock, and the concert on the Quad, it's easy to understand why. However, we can think of at least one reason: It's called "Openings," and it's the spring dance concert going on Friday and Saturday.

Due to the many distractions that are occurring this weekend, we feel that "Openings" needs our support. Featuring performers from this semester's three dance classes, the hour-long show is the culmination of three months of hard work.

For anyone who hasn't been to a Bowdoin dance show before, we highly recommend it. The pieces are always clever and original, showing a good mix of different styles and speeds. You don't need trained eyes or ears to be able to appreciate the grace and precision of bodies in motion.

So for one hour this weekend, put down your PBR, turn off the music, fill up your Nalgene (with water for a change), and go relax and recuperate at the dance show. It will be worth it.

I FTTFRS TO THE EDITOR

Distaste for high taxes does not equal racism

To the Editors:

In last week's Orient, Professor Scott MacEachern tried to mount a "euphemism"-busting, "careful and interesting analysis" in response to a cheap slogan scrawled on a campus sidewalk ("Of deniability, dethronement, and 'welfare queens," April 17). What he instead produced was quite the opposite—an unthought-ful piece of conspiratorial drivel.

Certainly most everyone can agree that racism has historically played a role in American politics and that racism is bad. MacEachern does not write just to make these two points, because they do not need making. Instead, two such simplistic points serve to lull his audience into an uncritical trance before he unloads an otherwise untenable thesis.

There's no obvious connection between a race- and class-loaded term like "welfare queen" and the themes of the "Tea Parties" being organized around the country, but at this point there hardly has to be."

Such a claim is overwhelmingly unjustified. If, as MacEachern concedes, no obvious connection exists between racism and disapproval for the welfare state, where then does proof of such a definite connection ie? Apparently it lies on a sidewalk outside 'Adams Hall in Brunswick,

MacEachern contends that the

use of an antiquated political slogan on a Bowdoin footpath evidences otherwise undetectable racism that catalyzes all "conservative" reactions against increasing taxationuniversal bond between racism and opposition to the welfare state.

By MacEachern's flawed logic, anyone who admits to opposing the welfare state implicitly admits also to being a racist. He creates a standard whereby labels like "anti-tax" "anti-welfare" euphemistically imply "racist."

Although MacEachern concludes by preaching the value of meaningdiscussion and debate on campus, he does nothing personally to contribute to such a discussion.

Will Grunewald '10

Alum doubts validity of Goldstein's study

As an alumnus, I read with interest the story regarding Professor Gold-stein and his study ("Investigation of professor's study draws to a close, April 17; "Study examines grade in-flation, athletics," April 17).

While I could not find his study on the Internet, and so cannot com-ment on its details, I understand that one of the main points concludes that Bowdoin is of a lesser quality due to extensive grade inflation.

I would suggest that the average quality of students at Bowdoin has improved over the last half-century. The increase in average grades may be explained by a higher percentage of students doing high quality aca-demic work, not lesser standards.

In my service as an alumnus doing interviews for the Admissions Department (Bowdoin "BASIC"), and as Chairman of Rhode Island BASIC for several years, I have been stunned at some of the truly exceptional applicants who have been turned down by Bowdoin. While one must be careful in drawing conclusions from such a relatively small number of applicants, my conversations with some long-term faculty members at my 25th reunion confirmed my sus-picions. They all agreed that today's student body has a higher percent-age of top students than in my day.

And as a former varsity athlete at Bowdoin (captain of the squash team in my senior year), I am insult-ed by the notion that involvement in sports implies a lack of academic interest or achievement. Sadly, that may often be the case at Division I educational institutions, where the time demands of varsity athletics are so much greater, but it was not my experience at Bowdoin in the late '70s; nor, do I believe that it is

In summary, I am shocked by Professor Goldstein's behavior with respect to prospective students and their families. I also am suspicious of the validity of his work on this subject.

Sincerely, Benjamin H. Walker Jr., MD '80 Portsmouth, R.I.

Defining modern intellectualism

Bowdoin students are sometimes criticized as lacking an intellectual fervor. Those critics suggest that, because the average Bowdoin student won't engage in impassioned intellectual debate over a cup of coffee at the Station, his attention rarely ascends into the more lofty realms of abstract thought. That position is complete

An intellectual is someone who derives pleasure from learning. By this definition, almost every Bowdoin student is an intellectual. Because we invest so much in learning, our profes-sors demand of us critical thinking at the highest level. Those who suppose that Bowdoin students float through classes complacently are forgetting that our student body represents some of the most intelligent youth of the world. Bowdoin's worst student is by far and away much more astute than the vast majority of humans.

What's more, the fantasy of a Bowdoin campus populated with students sporting horn-rimmed glasses and toting cloth-bound tomes is rooted in sentimental nostalgia. I doubt that even the most intellectual academic institutions retain more than a handful of such eccentric characters, with fewer still in the student body. Students now study in computer labs humming with oversized Apple monitors, rather than in dimly-lit wood-paneled board rooms. (Speaking of which, the sentimental and nostalgic part of me would really like to study in the Bliss room at some

point. Security?)

In this new age of instant and ubiq-uitous communication—I can check and respond to my e-mail on my walk from Quinby to Druckenmiller-intellectual debate has left the Station. The questions remains, should we be concerned about this monumental transition from the more personal intellectualism of pre-Internet communications to the more anonymous intellectualism of the present? Nos-talgia and sentimentality would say yes, lamenting, for example, the mar ginalization of Classics. But in order for Bowdoin students to sustain their legacy of intellectualism in a quickly changing world, we must find room for critical thought in the crowded forums and response threads of newspaper Web sites and YouTube.

The challenge this community faces is the retention and cultivation of critical thinking in the face of free information. In the past, bookish intellectualism exalted the accumulation of knowledge; the association of books with intellectuals, for example, derives from the assumption that memorized facts supplement or foster intellect. In fact, the heart of intellectualism-and its most impressive aspect-lies more in the ability to deduce and infer connections among various fragments of information than in the ability to call forth a wealth of trivia from the recesses of one's mind. Old-school intellectuals still recognized and lauded original synthesis of old ideas—Hegel articulated the importance of original synthesis in the 1800s—but with the

liberalization of information, and with the erosion of class barriers to intellectual institutions, the importance of accumulating knowledge has declined, accentuating, by contrast, the value of synthesis.

The advent of free information, exemplified by Wikipedia, should not be seen as antithetical to intellectualism. The modern capacity to dispatch with a review sheet, describing dates, characters, locations, and events using Internet resources, represents a tremendous improvement in academic efficiency. The Internet is a tool that allows students to bypass the tedious accumulation of knowledge, allowing more time for synthesis and assimilation.

Our community should strive to embrace this revolution in information technology, because it empowers, rather than undermines intellectualism. Recognizing the incredible accessibility of knowledge, students and professors can strive for new intellectual heights. With so much information so easily accessible, our capacity for critical thought has not decreased,

but expanded immeasurably.

The trick now, is for academia to demand more of its students, who, equipped with tools more power-ful than ever before, can elucidate increasingly original and impressive arguments. With the proliferation of wisdom has come a most profound opportunity for intellectual growth, which the Bowdoin community

is well-poised to pursue.

Jonathan Coravos is a member of the Class of 2011.

Enjoying Ivies vicariously, from inside the library

CIVILIZED LIFE BY ANNIE MONJAR COLUMNIST

Earlier today, I was wallowing in despair over my upcoming week. It's Ivies Weekend, with all its celebratory buffoonery; the one week of the school year where students can feel rightfully justified in throwing their homework up in the air, their feet up on the table, and their beer up on the Quad.

Festivities started early this week—many Bears put on their party hats as early as Tuesday evening, preparing for a marathon of jubilee that should theoretically last until the early hours of Sunday morning.

And while I wish them God-

speed and heavy hydration in their journey toward what's bound to be an unfortunate Sunday brunch, I can't help but feel pangs of jeal-ousy about their week of adventures. Like many other Bears, I've

had the severe misfortune to have been assigned two lengthy papers this week, one due Friday and the other Monday.

Okay, okay, fine: I wasn't assigned them "this week" per se. When I say they were "assigned," I mean, clearly, that I noticed their presence on the syllabi I was handed the first day of classes back in January. Happy, faculty? Regardless of my poor foresight,

other students certainly relate to this feeling of having a very pre-cious experience fall out of reach, like missing "American Idol" for a mandatory review session. Whether the deterrent be academic, exgastrointestinal, tracurricular, familial, or any other fun-obstructing nuisance, there's no feeling of abhorrent injustice like having to rain check on Wednesday afternoon margaritas.

But what's a girl to do? On both Friday and Monday, I have to turn in several full pages of what's going to need to resemble grammatically correct English. And having disastrous "printer problems" on the

And while I wish them Godspeed and heavy hydration in their journey toward what's bound to be an unfortunate Sunday brunch, I can't help but feel pangs of jealousy about their week of adventures.

Monday morning after Ivies looks somewhat suspicious. ("It went up in flames, professor! And then it lit the wiring in the computer lab on fire so I lost everything! And then a big, black dog came in the tower and ate my laptop which had my thoroughly polished draft

But to mitigate the anger against my studies in what is, after all, my third-to-last week of academic life as I know it, I've been devising ways to bring the Ivies experience

I assembled a shuffled playlist of all my favorite Sean Kingston beats, bopping to the three-song rotation while studying Japanese poetry. I braved 45-degree, rainy morn ings in flip-flops and a sundress. I brought a Nalgene of fruit juice into the library. (Judging by pictures of the festivities on the Student Gateway, it looks like that's the thing to do during Ivies weekend).

I'm living vicariously through friends with lives, probing them for the kind of gossip that makes Ivies so memorably foggy and humiliat-

ing.
"Didja go to Joshua's last night? Was it fun? Crowded?"

Yeah, kinda."

"Was anyone embarrassingly ridiculous?'

"I mean...not really, no." "Nobody peed on Maine

"What? No."

"Anyone make out in the bathroom? Puke someplace public?"

"I think this is your floor, Annie." Of course, it wouldn't kill me to try and get some of this work out of the way earlier in the week. Truththe next 48 hours, I could probably swindle a couple days of fun out of my week.

But it's easier said than done, of course. Freezing, with about 368 grams of cranberry-tinted liquid sugar pumping through my arteries, my head filled with licentious ideas and corruptive hip-hop blaring in my headphones, the incentive to be studious disappears.

And again, it's not like most Bowdoin students don't have other obligations to deter their Ivies experience. The number of us that are actually capable of participating in five straight days of excess is remarkably slim.

My dad has a saying regarding fun: "At my age, I can't; at your age, you shouldn't."

In the end, it's probably not a bad skill for me to learn how to put aside temptations for diligence, and to learn to appreciate the fun I can have.
After all, there's nothing like a

round of "Me Love" to brighten a night in the library.

Disagreement will yield a more informed truth

The silver lining of controversy is its capacity to inspire discussion. It reminds us not only of what we believe, but also that we believe at all. In that spirit, I want to consider the ubiquitous disgust with the recent use of the word "pagan" to describe homosexuality "Prospective stu-dents: Choose Bowdoin to confront intellectual conformity," April 10). Why was the Bowdoin community so disgusted by it? Simply, because we believe that homosexuality is not wrong. This is our conviction. We believe it to be true-and rightly so.

Yet, paradoxically, I have heard nnations of affirmative beliefs all too frequently in my years at Bowdoin: "What right do you have to tell me that I'm wrong?" or the oft-repeated "Well that's just your opinion." As if opinions were something arbitrary, informed only by our circumstances and not based on independent judgments!

Well, Bowdoin community, how do you know that homosexuality is moral? Is it just your opinion? If you say yes, then what right do you have to condemn the use of the word "pagan" to describe it?

You have every right to condemn the use of "pagan" to describe homosexuality. Just because you believe something to be true does not invalidate the possibility that it is true. Unless Bowdoin wishes to understand itself as devoted merely to high-powered vocational training, our purpose in coming here must also include the reasoned examina-tion of our beliefs and the pursuit of the truth about them. Nor should rest contentedly with the superficial notion that I have my values and you have yours. You believe your values are better—that's why you hold them. The purpose of the conversations we have in class is to determine who among us is right. Be generous and help me improve my own values.

So often people act ungenerously

None of us should rest contentedly with the superficial notion that I have my values and you have yours.

and claim that all values are equally valid. But do any of us, deep down, believe this? As much as we assert that one cannot know the truth, we all think we do. That is what these opinions of ours are: assertions of what is true—absolutely, eternally, and universally. By default, we hold the opposite of our belief to be

If you were an actual nihilist and you thought that there were no better or worse values, then why have you ever stood up for anything, condemned anything, or, to take it to the greatest extreme, done anything at all? Are you solely a product of your circumstances? I would like to think I have some rational agency apart from my upbringing. For example, I think that homosexuality is absolutely not wrong. Many of you agree with me. And in so doing, we believe this to be true absolutely not just for us, in our lives, but for

Let us take this opportunity to remember what it means to hold a conviction. Affirm what you believe to be true. Tell people they're wrong, and defend it. Opinions do matter, and the noble thing is not to discount opinions but to try to acquire better, more informed ones. If you disagree with someone, so be it. We may not know the whole truth, but surely we can strive to come closer to it. In the meantime, with open ears and a bit of chutzpah, perhaps we will change our views, proving to ourselves that we are not outgrowths of historical circumstance ut free, rational beings. I have my beliefs, you have yours, and let us educate ourselves as to which one of us is right. Every one of us believes there is truth. Let's act like it.

Ben Stern is a member of the Class

Why I write and why you should too

SELON MOI BY MEREDITH STECK COLUMNIST

Seeing copies of the Orient scattered across the tables in Thorne on Friday mornings still gives me chills. There is something very intimidating and empowering about seeing my words physically in print; students can fold them, open them, close them...and, even n frightening, read them. Publishing is rewarding but certainly not easy. I have met so many good writers at Bowdoin, pontificators and introverts alike. Both have the responsibility to contribute to the newspaper but often do not act.

The pontificators accuse the Orient of being "official discourse." The weight of tradition and the breadth of off-campus readership are undeniable sources of pressure. But these constraints are not sufficient reasons to refrain from con tribution. Translating an emotional tirade into organized prose that can be digested by a universal audience is a useful academic exercise. Yes, you might lose a bit of that "personal flare" when you can't rely profanity to express your anger, but you might discover some juicy new words in the process.

And who says you have to take the personality out of your articles, anyway? Has your letter been rejected for publication? (Have you even written it?) If you feel the Orient needs to be pushed, then push it. Take ownership and commit your beliefs to the public space. There are so many strong voices on this campus that can make us question ourselves. I hear them alright, but I don't always read them.

Others are too shy to publish. It took me three and a half years to find the courage. Joan Didion accurately describes writing as "aggressive, even hostile of "imposing oneself upon other people." The first of the "four great motives for writing," according to George Orwell, is "sheer egoism." For many, lack of confidence is an

Personally, I crafted a stereotype that columnists necessarily needed to be pretentious and political. Not true. Orwell is an enemy of "pretentious diction;" such writing consists of "gumming together long strips of words which have already been set in order by someone else...making the results presentable by sheer mbug." This writing is "easy.

Clear meaning is harder to come by. Composing a sincere, observant, concise letter to the editor is far more of an accomplishment than submitting a congested piece with ostentatious vocabulary. Additionally, articles need not be political in order to be insightful and provocative. As a student on campus, you observe and analyze your surroundings every minute of every day. You are thus qualified and obligated to engage the Bowdoin community in self-awareness and self-reflection.

I am asking you to write not only because literary culture at Bowdoin needs to be invigorated, but also because the process will serve you, as a writer. Writing holds you accountable for your own opinions.

Do you think you believe in a cause? Write about it, publish it, defend it, and then I will be impressed.

Writing also forces you to justify personal opinions that appear evident; this exercise is especially important on a campus where libviews often escape criticism. Agonizing over words in order to accurately articulate my beliefs has been an interesting form of self-exploration and has made me a more confident speaker.

Furthermore, contributing to conversation whose reach surpasses that of dorm room banter is enterprising. I always knew that newspapers were a powerful form of communication but I never appreciated their influence until alums, strangers, and friends began responding to my ideas.

Though Didion would claim that this column is my act of saying "listen to me, see it my way, change your mind," writing has actually made me more in tune with campus issues and student opinion than ever before. I routinely turn to the person at a neighboring computer (be they friend, fellow writing assistant, or stranger) and toss them a couple of ideas. Often, surprising debates ensue, leaving me with both a new perspective and a new acquaintance

Cultivating good conversation is one of the most important functions of a publication. The act of writing this column has encouraged me to pursue discussion with students, experts and other sources while synthesizing my own opinions. In an effort to impose my voice, I became attuned to hundreds more, which is why I consider this space a gift to me from the College.

It is time you started your own conversations. Kudos to all those who have made an appearance in any of Bowdoin's publications this year. If you haven't yet, sit down with Orwell's "Politics and the English Language" and write. You owe it to the campus and to yourself.

CONTRIBUTE TO THE ORIENT

The Orient welcomes letters to the editor. Letters should not excee 200 words and must be received by 7 p.m. the Wednesday of the w of publication. The editors reserve the right to edit letters for lengt

s from any class year interested in writing a weekly or b

WEEKLY CALENDAR

APRIL 24 - APRIL 30

FRIDAY

CONCERT

Piano Students of Joyce Moulton

Planists taught by Bowdoin faculty member Joyce Moulton will play works by Mendelssohn, Schubert, Gershwin, Chopin, Mozart, and others. Tillotson Room, Gibson Hall. 4 p.m.

RECITAL

Professor Mauceri's Improvisation Class

Extravaganza

Bowdoin improvisation students will give a semesterculminating performance showcasing skills learned during their improvisation course. Kanbar Hall, Studzinski Recital Hall. 7:30 p.m.

PERFORMANCE

"Openings"

The 38th annual spring dance show will feature performances by beginner, intermediate, and advanced dance course students.

Pickard Theater, Memorial Hall. 8 p.m.

SATURDAY

WELLNESS

World T'ai Chi and Qigong Day

As part of this global celebration, the Counseling Service will sponsor several demonstrations and opportunities for participation in T'ai Chi and Qigong.

Ouad. 10 — 11 a.m.

CONCERT

Sean Kingston and Santigold

Hip-hop artist Sean Kingston and rock artist Santigold will perform as the main acts during this year's Ivies Weekend concert.

Quad. 3 p.m.

PERFORMANCE

"Dido and Aeneas"

Under the direction of Shannon Chase, the Bowdoin Chamber Choir will present this noted opera written by English Baroque composer Henry Purcell. Kanbar Auditorium, Studzinski Recital Hall. 7:30 p.m.

DANCE

"Openings"

A reception will follow this performance to celebrate the work of participating dance students.

Pickard Theater, Memorial Hall. 8 p.m.

SUNDAY

PERFORMANCE

"Dido and Aeneas"

Kanbar Auditorium, Studzinski Recital Hall. 2 p.m.

MARGOT D. MILLER, BOWDOIN ORIEN

BEARING TOWARD SUNNY SKIES: After several days of rain, clouds scud away from the weathervane atop Memorial Hall Thursday afternoon.

MONDAY

MEAL

Bowdoin Multifaith Dinner: Celebration of Senior Faith Leaders

This dinner will recognize the work of spiritual leaders from the Class of 2009. RSVP to Denise Trimmer as soon as possible

Main Lounge, Moulton Union. 5:30 p.m.

CONCER

Peter McLaughlin '10 and Company

McLaughlin, along with Abriel Ferreira '10, Scott Nebel '09, Hassan Muhammad '10, and Jazz Ensemble Director Frank Mauceri, will perform several jazz selections. Kanbar Auditorium, Studzinski Recital Hall. 8 p.m.

TUESDAY

OFFICE HOURS

President Barry Mills

Smith Union. 3 – 5 p.m.

FILM

"Czech Dream"

As part of the "Redefining the Common Good After Communism" series, the Government and Gender and Women's Studies programs will present this film, which details a hoax played on the entire Czech population after the fall of communism.

Lancaster Lounge, Moulton Union. 7 p.m.

CONCER

Jazz Students of Tracey MacLean and Frank Mauceri

MacLean's jazz voice students and Mauceri's jazz saxophone students will give a group recital.
Tillotson Room, Gibson Hall. 7:30 p.m.

WEDNESDAY

CONCERT

Elinor Frey, Cello

Frey, a doctoral candidate in music at McGill University, will perform a solo program of modern music for cello.

Kanbar Auditorium, Studzinski Recital Hall. 7:30 p.m.

THURSDAY

PERFORMANCE

"Trojan Women"

Senior Aislinn Curry will direct this play by Euripides as part of an independent study in directing. Drake Lobby, Memorial Hall. 7 p.m.

LECTURE

"Diary of a Wave Outside the Sea: Poetry and Story from Iraq"

Dunya Mikhail, an Iraqi poet, will speak about the conflicts that influence her poetry as she delivers the 2009 Kenneth V. Santagata lecture.

Lancaster Lounge, Moulton Union. 7:30 p.m.

FESTIVAL

"Matsuri: A Night of Asian Music and Dance"

Local high school students, community members, and Bowdoin students will showcase dance and music from Central, East, and Southeast Asia during this student-run celebration of Asian arts.

Kresge Auditorium, Visual Arts Center. 7:30 p.m.

PERFORMANC

"Vermillion"

Students will perform dances choreographed by senior Elizabeth Jones as part of her independent study in choreography.

Wish Theater, Memorial Hall. 8 p.m.

MAY 1, 2009

Parking tickets won't curb habits of some students

BY MARY HELEN MILLER

According to the Bowdoin Web site, the average Bowdoin student can expect to spend \$350 for travel, \$400 for fees, and \$800 for books each year. An extra \$825 to cover parking tickets is not list-ed, though it will be on sophomore Jane Pierce's bill.

This year, the Office of Safety and Security has issued approximately 1,100 tickets and warnings for parking violations to students, faculty, and staff though the vast majority have gone to students, according to Director of Safety and Security Randy Nichols. Pierce, who Nichols referred to as "the top scofflaw," chose to identify herself to the Orient. Nichols said that "nobody else comes close" to Pierce's 24 tickets—though a total of 25 students have amassed at least six tickets this year

Some students don't take our parking regulations very seriously, they think there are no consequences," Nichols said. "The fact is, it may take us a while,

but we'll eventually get around to you."

Nichols said that parking management is "one of the least satisfying aspects of my job because it is not often directly linked to safety and security."

Please see PARKING, page 3

BEARNAKED

MARGOT D. MILLER THE ROWDOW ORIENT

Alanna Beroiza '09 and Elsbeth Paige-Jeffers '10 prepare for "Exhibition: The Naked Art Show" on Wednesday. The show, comprised exclusively of artworks by Bowdoin artists, opens tonight in Fort Andross. See story, page 13.

Six from Bowdoin awarded Fulbright scholarships

Of the 20 graduating Bowdoin seniors and alumni who applied for the Fulbright Program year, six have been granted a fel-lowship and one student has been listed as an alternate.

The grants offered through the program by the U.S. State Department operate in more than 140 countries around the world and provide individuals with living stipends, health insurance, and tu on for graduate school for nine to 12 months.

As they do every year, Fulbright applicants submitted proposals to the Student Fellowships and Research Office in late September. Under Director of Student Fellow-ships and Research Cindy Stocks, a committee was then organized to conduct interviews with students who had applied in order to evaluate whether or not the students' interests were supported by their respective plans.

The committee also offered feedback so that students might have an opportunity to revise their original application.

In October, students official-submitted their applications through Bowdoin to a U.S. panel that eliminated 10 of the original

Yongfang Chen'10 co-authors Chinese book on the liberal arts

In less than a week, thousands of copies of a book about Bowdoin-

cowritten by Yongfang Chen '10— will fill Shanghai bookstores.

The book, "A True Liberal Arts
Education," aims to inform Chinese
high school students and their parents about liberal arts colleges in the United States.

"I define what a liberal arts college is compared to a national university education," Chen said of the book. Then I describe the classes I have taken at Bowdoin, what professors I have taken, and why I have taken specific classes."

Chen, an economics and neuroscience double-major, said his idea for the book came about during the summer after his first year at Bowdoin, when he realized that high school students in China did not have information about American liberal arts college readily avail-

There was no material...that elaborated on what a liberal arts college in America was about," he said. "I felt responsible for disseminating information about this system, be-Chinese students only know Harvard, Yale, Princeton, and no body knows about Amherst, Williams, Bowdoin. And I think they're equally important."

After contacting a publisher, the China Publishing Group in 2007, Chen said the publisher completed a market survey to find out what kind of interest there was in the book. According to Chen, there was considerable amount of interest, so the isher approved the idea,

The book also includes two other perspectives from Chinese students perspectives from Chinese students currently studying at liberal arts col-leges in the U.S., although these sec-tions combined take up only about a third of the book, Chen estimated. The two students attend Bucknell and Franklin and Marshall College. Chen said that while he had initially planned to write the book himself, he realized that the addition of two other Chinese students describing their experiences would strengthen

"I wanted to diversify the content," he said. "There are many liberal arts colleges in America."

Chen said that one fundamental difference between the Chinese higher education system and the

American system was in the under-standing of the word "college."

"In China, 'college' does not have a comparable meaning to 'univer-

Please see CHEN, page 3

Econ major becomes more popular in recent years

For the past five years, the economics and government departments have occupied the top two spots for the most popular majors among graduating classes. While economics has consistently ranked been No. 2, the number of economics majors, as well as the percentage of each graduating class majoring in the subject, has substantially

increased in the past five years.

Chair of the Economics Department Deborah DeGraff had statistics on the number of economics majors per class, starting with the Class of 2004. She said that between 2004 and 2008, an average of 47 students per class majored in economics. But for the Class of 2009, that number jumped to 63, and in the Class of 2010, 81 students have declared an nomics major

Additionally, the percentage of each graduating class that is majoring in economics has increased. Figures provided by the Office of Institutional Research of 2004, the current junior class has the highest percentage of students that have declared an economics major, at 17.7 ercent (Note: the number of students in the Class of 2010 was calculated with figures from the 2007-2008 year because the 2008-2009 figure does not

account for the number of students that are studying abroad). Among current seniors, 14.4 percent are majoring in economics, an increase from the 10.1 percent of the Class of 2008 that majored in economics.

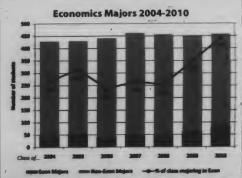

The increase has strained professors and class enrollments. Associate Professor of Economics Ta Herrera said, "classes are largely very full, much fuller than they used to be." Economics class es frequently have long waiting lists, and professors often bump up enrollments beyond the cap, he said.

Although the department was

ulty positions as part of the Bowdoin Campaign, DeGraff said that one new professor would only somewhat help reduce the stress on class sizes. "We're still up against extreme enrollment pres-sures," she said.

DeGraff and Herrera attributed the increased interest in economics to the new distribution requirements. Under the previous system, economics was listed under mathematics/natural sciences but for the Class of 2010 and beyond

Please see ECON, page 2

TOPH TUCKER, THE BOWDOIN ORIEN

HIGH DEMAND. Since 2004, the number of students majoring in economics has trended upward. Data for the Class of 2010 is from last year; the current figure doesn't reflect students studying away.

FLU CONTINUED FROM PAGE 1

fied to reflect the threat posed by the swine flu, the plan was released to the public last night on the Bowdoin Web

Thus far, according to Foster, the College's actions have amounted to the revisions to the response plan, as well as efforts to keep people informed about the spread and prevention of swine flu. Also, Foster added, the health center is preparing to cope with a potential increase in flu cases.

As of Thursday afternoon, Dudley Coe had conducted three H1N1 tests,

and all were negative.

According to the guidelines released last night, the College's actions during an epidemic are directed by a four-phase response plan. Currently, judging from the status of the outbreak and Bowdoin's response, the College appears to be somewhere between phases two and three, with the fourth phase characterized by "widespread human-to-human campus transmission."

The responses to phase two are more focused on education and preparation, while phase three calls for more preventive measures, like quarantining and testing of suspicious cases.

In phase four, the campus emergency management plan is activated, and responses are more dramatic, like cancel ing athletic events and giving parents the

option of bringing their children home.

Senior Vice President for Finance and Administration Katy Longley stressed that the phases are meant to act as a set of guidelines, rather than act as a set of guidelines, rather than prescribing specific responses to certain events.

"It's not supposed to be completely wooden," she said. "It's supposed to have flexibility so that we have a road map."

One potential concern over the next few weeks is school closure. Currently, state guidelines call for a one-week shutdown of any public school with a probable case of swine flu in a student. In Kennebunk, an elementary school and a day care center were closed on Thursday, as two of the cases in York County were among children who at-

er, in a press confe Wednesday, Maine Chief Health Officer Dora Anne Mills said that private schools would be dealt with diff

"We have to be sensitive to their in-dividual situation," Mills said, "because they have different student bodies and have different types of dorms

Former Dire tor of Health Services Dr. Jeff Benson, who helped write the original pandemic response plan during the avian flu scare, worried that the swine flu outbreak could interfere with

If this thing continues to grow, with people traveling, I would think that ould be a very complicated call," he said. "The last thing you want is people flying in from all over the place...and

then spreading back out again."

Benson added that similar concerns about Commencement surfaced during the SARS scare in 2003.

Longley said that while the College is not yet thinking that far ahead, "if we need to, we will."

Around the state, other colleges were also revising and activating their emergency procedures. Colby College's

cy response team met to review its pandemic response plan on Tuesday, and Bates College's met yesterday. Bates, like Bowdoin, already has a

indemic response plan dating back to the 2006 avian flu scare, according to Brian McNulty, director of con nications. Since the current threat from swine flu is less severe, McNulty said that Bates would "deal with developments as they arise."

An announcement posted on the Bates College Web site last night said that the risk of a school closure is unlikely before summer vacation begins on May 29, but that if one occurrs, all students would have to leave campus

measures to preclude the spread of the virus. On Wednesday, Williams College took the step of eliminating any selfservice areas in its dining hall

"If you look at life on a college campus, and where viruses are most likely to be transmitted, it's in those places who large numbers of people are likely to be picking up the same thing," said Jim Kolesar, director of public affairs. "The precaution was that we decided to do without those for a while."

Two Bowdoin students, Sarah Ebel '10 and Nandini Vijayakumar '10, were studying abroad in Mexico—where H1N1 originated—for the spring se-mester. Eber's program, in Baja, ended just over a week early because of con-cern over the swine flu.

In an e-mail to the Orient, Ebel wrote that while the virus had not yet been discovered in Baia, administrators end ed her program due to minimal health care facilities in the area, as well as fears that the United States might close the Mexican border and leave students marooned in the country.

Vijayakumar's program, in the Yucatan, was going on as scheduled, although she wrote in an e-mail that her classes had been cancelled for a we

"Everyone here is really paranoid about the flu," she wrote, even though nobody in the Yucatan has contracted the disease. "All of the movie theaters, clubs, bars, and some restaurants are to leave my house without wearing a mask." closed. I'm technically not supposed

ECON

CONTINUED FROM PAGE 1

economics counts for the mathematical, computation, or statistical reason ing (MCSR) requirement, while the natural sciences are separate. In order to satisfy the MCSR requirement, many students have opted to take Economic 101. Herrera estimated that 75 percent of the juniors, sophomores, and first years will have taken Economics 101 by the time they graduate.

DeGraff believes that the high num-

ber of junior economics majors reflect this change. The new distribution requirement "brings people in the door at the entry level," she said. "Some of those who wouldn't have thought about majoring in econ realize they're interested and they continue."

But DeGraff's explanation would not apply to the 63 economics majors in the Class of 2009 who fulfilled distribution requirments under the old system. In light of this fact, the Orient attempted to determine why so many students are choosing to major in eco nomics by conducting interviews and e-mailing all junior and senior majors the question: "Why did you decide to major in economics?'

Why economics?

Some students said that they chose to major in economics because of the type of thinking that the field requires.

Sarah Richards '10 wrote in an e-r that she "really liked how it distilled the real world into manageable scenarios, scenarios we could understand." Crosby Cook '09 wrote, "having been quantitatively successful in high school, economics appealed to me as a practical application of this skill set." Jeff Cutter '09 said that economics, and finance said that economics, and finance specifically, fit his personality because it is fast-paced, competitive and "almost like a game."

A few students said that economics would allow them to serve the Common Good

Kayla Baker '09 wrote that she chose the department because "in order to address issues of social justice, DuBois said that Blacks need to understand

Luke Fairbanks '09 said in an interview that he wanted to help people, and that economics complemented his coordinate environmental studies major ell. "It gives me perspective on both subjects" he said.

Fairbanks added that "an economics degree is pretty good to have for the job market and I think that's a legitimate reason itself"

Senior economics major Dave Falkof wrote in an e-mail that he thought interest in economics among students was cyclical and reflected the current economic situation. "We are in the midst of a recession, so the cycle is favoring the career oriented majors," he said.

But junior Alex Carpenter wrote that the recession had caused him to lose interest in business, and he decided to drop his economics major.
Still, many students explained

their interest in economics in terms of employability. Stephen Gonzalez '09 wrote that one

of the reasons he chose economics was "so I could get a sweet job." Junior Reid Auger wrote, "I basically just wanted to keep my options open and be able to land any job out there with a respect-

DeGraff recognized that students major in her department to make them-selves attractive to potential employers and prepare for future jobs, especially within the business field. "In general I think there is a fairly high percentage of students who, if Bowdoin offered business management courses, they would take them," she said.

Herrera echoed her sentiment, "there is a subset of the student body that ma jors in economics because it's the closest thing we have to a business degree." For Cutter, who will be working as a

financial analyst next year, economics was "sort of the only road" towards a career in business. "A lot of people are interested in getting into business and we don't have another route to do so," he said

The new economics and finance minor

But starting this fall, students looking to study finance will have a concrete way of expressing their interest in the topic to potential employers by declaring a minor in "economics and finance According to DeGraff, the new minor is a credentialing issue." Graduating with a minor in economics and finance is something clear on their resume that signals to potential employers that they have taken particular courses."

From a curricular point of view, DeGraff said the minor is "a cluster of related courses that make for a more cohesive curriculum for students interested in that area." No new courses will be added, but rather the minor will be structured as to require students to take two finance classes. "It's just putting a name on what we do here," she said

Cutter, who is a co-president of the Bowdoin College Finance Society, agreed that "a finance minor would help" students show interest in the field

and clarify their interests, since majoring in economics can be confusing to em-ployers who think that candidates will have studied business. Cutter said that in job interviews he has had to explain that Bowdoin does not offer a business program. "I thought they understood that a liberal arts school doesn't have a business major," he said.

But Cutter is pleased with his deci-sion to attend a liberal arts school, and said that the decision has not placed him at a disadvantage in the job market even though Bowdoin students "don't really have exposure to what other students at business school do." When asked why he chose a school like Bowdoin, he said that he did not know what career he was interested in coming into college, but he added, "business programs are narrow." He described a friend who was enrolled in a business program who "doesn't re-ally have a well-rounded perspective on

He added that even if the economics and finance minor had existed while he was at Bowdoin, he still would have ma jored in economics. "I wouldn't go back and do just a finance minor," he said. He added that economics is a liberal major that is "good for general knowledge."

udents like Cutter, the new minor will be of little help since economics majors cannot also minor in economics and finance. DeGraff wrote in an e-mail that "for majors who choose to complete the requirements for the new minor, Professor DeCoster [who teaches the finance classes] will provide them with appropriate language for the re-sume and cover letters to indicate such, but it is not a formal recognition."

Concerns about a finance minor

Some students and professors expressed concern with the recent cretion of economics and finance minor.

Danny Chaffetz '11, who is majoring in economics, said that "if you say you're an econ major then people as-sume you're doing it so you can be suc-cessful in a purely income-based way." He added that the assumption that economics majors are just interested in business leads "people to doubt your interest in the subject.

Fairbanks agreed with Chaffetz.
"I think that putting in the finance minor could potentially perpetuate what some may consider a problem in the economics student body," he said, referring to the assumptions Chaffetz described. Fairbanks added that a finance minor might draw people who "think it will make them money in the

"A lot of people want to major in fi-ince who have no interest in econom-

ics, they just want to go work for 'the man.' Putting in the finance minor in-stitutionalizes that feeling," he said.

Only a few students said they were explicitly interested in economics to make money.

Junior economics major Daniel Rea gan responded to the Orient's e-mail by quoting the sap group Wu-Tang Clan. He wrote, 'Cash Rules Everything Around Me. C.R.E.A.M. Get the ney. Dolla dolla bill y'all." Timothy Kelleher '09 wrote, "I know a lot of big name companies offer big time salaries.
Economically, having an economics major just made sense.

Although a high salary did not fac-tor into most students' responses, many students were concerned about getting a practical education with skills that would transfer easily to the workplace.

Mitchell Dillon '10 wrote in an email that "economics has a reputation for being the most practical major." Auger wrote, "I took economics because it is applicable in the real world." Junior Thai Ha-Ngoc wrote, "the economics major would give me practical tools and knowledge to use in whatever career I ended up pursing."

Although Herrera argued that "there's theory of finance" and that economics is a "robust intellectual area," many students who responded to the Orient's -mail were drawn to economics not because of the theory, but because of its applications and implications for future

Practical education at a liberal arts college

Fairbanks was confident that finance was a liberal arts topic, but worried that students would not view the new minor as such. "As a subject it is liberal arts, but the way people approach it or try to use that credential is inconsistent with liberal arts.

But Fairbanks added that an economics major is no different from any other major; "in a very big way college itself is a means to an end."

Chaffetz echoed his sentiment. "Bowdoin itself is a résumé-builder," he said. However, Chaffetz added, "you want to think that everyone came here because Bowdoin has something academic to offer, not what it can give them after they graduate.

Professors in other departments believe that there is a general trend to-wards balancing practical with liberal arts education at Bowdoin.

Associate Professor of Sociology Joe Bandy said that although the College has made "concessions to more care oriented education" over the years, has no trouble with the finance mir

or with the trend towards practical education. "I prefer to have students have practical applications to the things they learn," he said. He argued that community-based courses and other practical applications of theory do not "diminish ntellectual rigor, [they] can actually enhance it."

Associate Professor of Education Chuck Dorn's research focuses on the civic functions of higher education. He has recently written a paper entitled "From 'Learned Professions' to 'Lucrative Professions." In it he argues that throughout the 19th century, the purpose of a liberal arts education was to prepare students to serve the common "personal advancement fused with civic responsibility to create a so-cial ethos that defined success, at least in part, by an individual's commitment to the public good.

However, Dorn argues that during the 20th century, definitions of success and the purpose of higher education have evolved towards material wealth and reaping personal benefit. Dorn writes in his article, "a social ethos of private advantage, which defines personal success solely in terms of material wealth, has fostered and legitimized undergraduates' conception of higher education as a consumer good through which one prepares for employment in a 'lucrative' rather than a learned' profession."

For senior economics major Archie Abrams, Bowdoin should both educate students morally while also preparing them for a career. He wrote in an e-mail that economics provides students with useful tools and interesting insights about how and why people act (as well as preparing us for careers in business and public policy)." However, he added that the subject alone was not complete by itself. "Economics, by its very nature, does not attempt to seek any truth or goodness behind simple calculations of

Abrams wrote, "What concerns me about the rise of economics at Bowdoin is that will Bowdoin continue to produce graduates that are human b only produce useful students, con-cerned only with simple calculations of utility?'

Bandy has hope that the new finance minor will instill Abrams' sense of "truth and goodness" in its students; "we need people in finance and busi-ness who serve the Common Good." Otherwise, there is a risk of "a dichotomy between civil service and business, he said. However, "it remains to be seen whether this finance minor encourages the Common Good or not."

Seniors Yaffe, Scully to speak at 204th Commencement ceremony

While peer schools have recently snagged big names like Bill Clinton, George H. W. Bush, and Brian Williams for Commencement speeches, Bowdoin is sticking to its longtime tradition of keeping the focus on the

Seniors Ian Yaffe and Samantha Scully, winners of the Goodwin Commencement Prize and Class of 1868 Prize, respectively, will be addressing the crowd at Bowdoin's 204th Commencement from the steps of the Walker Art Building Bowdoin does Walker Art Building. Bow not invite big keynote speakers; while honorary degree recipients have sometimes given brief remarks in the past, the practice was discontinued

about 10 years ago.
"The biggest thing that I wanted to
do is say thank you to everybody here at Bowdoin, and there's a lot of people, that have made it possible for me to attend here and have such a great education here," said Yaffe.

"And that would be a lot of thank you cards, so this will be an easier way to do it."

Yaffe, whose speech is titled "The Common Good and Commitment to Bowdoin," also wanted to share his ideas about what the common good

I hope that it's thought-provoking and controversial in a good way," he

Scully's speech, "Offer Accepted," will address her interpretation of the Offer of the College and how it has

impacted her career at Bowdoin.
"We're going into a recession; we're all going into different fields that may not connect to our major," said Scully not connect to our major, said sculy. "I thought this was a great time to understand the Offer of the College from someone who's been here for four years, who's now going into a new

There's been this tradition at the College that Commencement is about our students, and not about creating a forum for some famous person to come and give a talk," President Barry Mills said in a phone interview with

"We've created opportunities for each of our honorands to give a talk, if they'd like to, to the community," such at the Baccalaureate Ceremony, said Mille

And if President Barack Ohama was available to speak at Commencement?
"We'd probably have him come and speak at Baccalaureate," Mills said.

Senior Class President Christian Adams said that many of his classates have approached him about the lack of a big-name speaker. "People have said it would be really cool to It's sort of inspiration

Yaffe, though, disagreed. "If you have someone famous come, it could easily become more of an opportunity for them to speak, rather than focusing on the fact that we just spent four years-or however long it takesgraduating from here," he said.

"I've gone to graduation since my freshman year, so I've always seen the

two senior speakers," said Scully. "It seems to strike a good balance. Some are a little more serious; others can be

"People get stuck saying, 'College is the best four years of my life!' Well, you have the rest of your life to be great," said Scully.

"These are really hard talks to do well," Mills said. "It's hard, I think, to set the right tone, to give the right speech. Over my time here, some people have done an excellent job, and some people have done a fair job."

Thinking back to his own gradua-

tion from Bowdoin, "I do remember who did it, but I don't remember the talks," Mills said.

"But we'll see how these folks do this year," he said.

The tradition of student speakers dates back to 1806, when Bowdoin cel-

ebrated its very first Commencement. Louis C. Hatch in "The History of Bowdoin College" writes: "Professor Packard, in his Reminiscences, says of this Commencement: "The exercises were held in the church building, yet unfinished and affording but a poor shelter from the pouring rain. President McKeen presided in the pulpit with an umbrella over his head; what the audience did in that shower-bath has not been recorded"

John Cross, secretary of development and college relations, commen ed on the history of commencement in an e-mail to the Orient.

"In the early years of the College each student was required to deliver a Commencement speech in Greek.

"It is less a case of prohibiting nonstudent Commencement speakers than it is an affirmation of faith in the students who have received a Bowdoin liberal arts education," Cross wrote "Over the years the student speak-ers have included future governors, distinguished scholars and teachers, business leaders, college presidents, physicians, authors, scientists, and leaders in all walks of life."

As the graduating classes grew larger and the ceremony grew longer, the number of speakers was gradually pared down to two. Today, speakers are chosen by a sub-committee of the Student Fellowship and Research Committee (SFRC), chaired by Professor of Chemistry Jeffrey Nagle. After submitting proposed speeches in written form, finalists present their addresses in person to the sub-committee, which consists of five faculty members and two SFRC staff members.

The tradition has been viewed by many alumni and faculty as an expression of the College's democratic ideals," said Cross.

Adams, though, sees the process as anything but democratic.

"It doesn't strike me as strange that students speak, but it does strike me as strange that the students don't choose," he said. "It's your voice, but students have no say."
As Class President, Adams will

give a brief address, making him the closest the Class of 2009 will get to an elected speaker. The speech is primarily focused on the presentation of the class gift.

"This is not a popularity contest. It's an opportunity for, and an honor for, members of the class to get up and give a substantive talk to the entire assembled group," said Mills.

Although he saw potential for more student influence, either in an enlarged role for the Class President or perhaps at the Baccalaureate Cer-emony, Mills prefers the system of committee review to an open vote.

"I think it is more likely that you... get a substantive talk out of the pro-cess that we have today," he said.

"I am not opposed to having another group, possibly including stu-dents, select the student commencement speakers," said Nagle.

In any case, no one is apt to miss the Latin, Greek, and Hebrew come Commencement. While the addresses generally scored high marks with listeners, "the speakers were not always the best scholars in these languages," wrote Hatch. He recalls the 1810 Greek oration of a student named Wise, "noted for his collection of tobacco pipes and his con-stancy in using them," and an 1813 oration in Hebrew, "or what purported to be that language," by a student named King.
"Nehemiah Cleaveland says of

King, 'He rubbed along through college in some unaccountable way, as others have done before and since." Wrote Hatch, "He is one of the few alumni of whom the college lost all

CHEN **CONTINUED FROM PAGE 1**

sity.' If you say 'I attended college' in China, it means maybe you were in vocational school, or maybe technical school." Chen did say there were liberal arts colleges in China, but ac-cording to him, "they're not regarded as highly as liberal arts colleges in

Chen, who had never been to the U.S. before he began at Bowdoin in the fall of 2006, said that he found out about the College through the annual U.S. News and World Report ranking, which he said Chinese students place "a lot" of emphasis on.

Although Chen's book is nearly all

in Chinese, it does include an appenin Chinese, it does mercan additional in English. The appendix includes interviews Chen conducted with Bowdoin faculty and administrators, including Associate Dean of Admissions John Thurston, Assistant Dean of Student Affairs Laura Lee, Dean of Student Affairs Tim Foster, Professor of Sociology Craig McE-wen, and President Barry Mills.

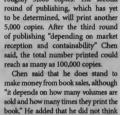

According to Chen, the publisher will publish the book in three waves. The first wave-which Chen said was completed on Thursday, totalled roughly 5,000 copies. The second round of publishing, which has yet to be determined, will print another

"it depends on how many volumes are sold and how many times they print the book." He added that he did not think the economic downturn would affect the sales of his book.

"Since the topic is very hot, and lots of parents in China want to know what American education really is, I don't think the economy will hurt sales," he

Chen is leaving for China next week to promote the book, where he will sign copies of the book in Shanghai ookstores." A promotional event sl for the end of August to is scheduled to have the mayor of Shanghai as a guest. "I think Bowdoin will become fa-

mous immediately if this book is accessible to a Chinese audience," Chen said.
"Next year, I think Bowdoin could have a huge increase in applications from China."

MARGOT D. MILLER, THE BOWDOIN ORIENT

SPREADING THE WORD: After his first year at Bowdoin, Yongfang Chen'10 decided to write a book explaining and extolling the virtues of a liberal arts education for an audience in his native China.

PARKING

Pierce, whose car is registered for the Farley Field House lot, said she received most of her tickets for parking in the Chamberlain lot. Pierce used to leave old tickets on the windshield to try to trick security officers out of issuing a

"This worked for a while then eventually they caught on," she said.

"There was just always [a ticket] there, and then they started piling up," she said. "I didn't know that I was getting more until I got a notice that I had to go see the dean

According to Nichols, the 25 students with six or more tickets received let-ters from their deans a couple of weeks ago, informing them that their driving privileges on campus could be revoked. Nichols added that none of the parking violators has actually had privileges taken away.

In most cases, the first three tickets sued to a violator are for \$25 and subsequent tickets are for \$50. If a student or faculty or staff member does not pay a ticket, the violator is billed through the bursars office. For students, this usually means that the expense is added to a bill that is sent home to parents.

"I tried to tell my parents it just hap-pens to everybody," said Emily Neilson '11, who owes \$545 for nine tickets this

Neilson also told her parents that parking fines are the means by which security is funded, but in fact, the Office of Safety and Security won't see any of the \$28,000 it issued in parking fees this year. Nichols said that the money goes ck to general College funds.

Neilson, whose designated lot is at Farley Field House, has gotten most of her tickets from parking in other lots around campus. The orange sticker on her bumper makes it obvious when she

is parked in the wrong place.
"I wish I had never registered my car, biggest mistake ever," Neilson said,

TOMMY WILCOX FOR THE BOWDOIN O

PILING UP: Students received the vast majority of parking tickets issued by security this year.

though Nichols emphasized that car registration is a requirement for students, faculty, and staff who park on campus.

Though 642 students paid the \$40 fee in order to register their vehicles this year, Nichols said that there is a small number who did not.

Because visitors to campus may park almost anywhere, it may be tempting for a student not to register his or her car in order to appear as a visitor. Nichols said that such students can fly under the radar-but not for long.

"What normally happens with an unregistered vehicle is it may take us a while, but we'll eventually figure out that it's a student vehicle," Nichols said.

One female sophomore, who wished to remain anonymous because her mother is not aware of her \$200 in parking fines, explained why she did not think the current fee system was effec-

tive in changing behavior.
"They don't really follow up, so there's no incentive to pay it," she said. "It's just put on your bill, you never really have to

Asked if she was planning to tell her mother, she said, "I'm personally hoping it will just get lost in the shuffle."

On the other hand, Stephen Sullivan '11, who has been issued 10 tickets this year, said he thinks students are more likely to change behavior if their parents are billed than if students have to pay the fine themselves.

"If your parents find out, then you're going to get in a lot more trouble than if they never know about it," Sullivan said.

For those who believe that they were unfairly given a ticket, the Office of Safety and Security has an appeals process, which usually results in the dismissal or reduction of the charge. Those seeking an appeal can fill out an online form within 14 days of receiving the ticket and hear back, sometimes within a few days, whether or not their ticket has been reduced to a warning or entirely

Starting next year, first-year students will no longer be allowed to bring cars to campus, a change which Nichols said will probably reduce the number of cars on campus by more than 80. There will also be additional parking spaces available at Watson Arena and in the lot where Dayton Arena now stands

"So the parking situation is improv-ing quite a bit," Nichols said.

BSG votes down proposed changes to SAFC Blue Book at last meeting

BY NICK DANIELS

At its final Wednesday meeting of the semester, Bowdoin Student Government (BSG) voted down two proposed changes to the Student Affairs Finance Committee (SAFC) Blue Book The first change would have increased regulation of student organizations that pay their members stipends, while the second would have adjusted fuel reimbursement rates for student vehicles.

Both proposals were brought by BSG Treasurer Ugo Egbunike '09, who argued that student organizations that pay student stipends from their revnue accounts should not automatically be eligible to receive money from the

"As of now, there are three or four clubs on campus that have revenue ac-counts," he said. "Clubs that make money like the Orient receive money from advertising and deposit that revenue into an account."

The Orient was singled out by Egbunike because it would have been the most affected by the bill. Egbunike said that the bill was proposed in order to promote parity between student organizations on campus.

"If you are going to generate revenue from SAFC money, you should be fund-ing your club from [that] revenue you make, he said. "We didn't think it was fair that clubs that have revenue come and ask for SAPC money when...clubs that don't have revenue come asking for that same money."
Orient Co-Editor-in-Chief Nick Day

'09 said that Egbunike had raised some valid points, but he was heavily critical of the bill. He called several passages in the proposal "contradictory."

Day's view was echoed by several

BSG representatives, including Vice President for Academic Affairs Sam Dinning '09, who said that a comprehensive policy should be developed

"I think there are a lot of problems with this bill," he said. "The SAFC already has the power to regulate the Orient's money, and so I think we should vote this down."

At-Large Representative Rasha' Har-

vey "12 expressed frustration that a conamount of meeting time

expended on an inconsistent proposal.
"Why should we have to vote on a bill that is flawed?" he said. "That is just wrong. There should be more prior discussion on this, and whoever writes these bills should be more careful about m] before they are put before BSG."

Ultimately, two members of the BSG assembly voted in favor of the proposal, while 19 voted against it. Two members of the body abstained. The second SAFC proposal would

have decreased the amount of money students are reimbursed per mile when driving their cars for College-related activities, to a variable rate related to the national gas average

Egbunike said that the current reimbursement rate "comes from numbers based on the College's vans, and we found that many students were [compensated for more than they were charged, since student vehicles get twice as good of mileage as the schools

Many representatives were dissatis fied with the gas proposal because ex-planatory research was not completed and the bill contained typos. Vice Presi-dent for BSG Affairs John Connolly '11 said that most members thought postponing the bill until next semester rould allow time for it to be more care-

fully designed.
The Gas Reimbursement proposal failed because [B9G] members wanted to make sure there was still a way of givto make sure there was still a way of giv-ing money for wear-and-tear on student vehicles the way that other campus de-partment calculate it for their vehicles," he wrote in an e-mail to the Orient. Eight members of the assembly vot-ed for the bill, 13 opposed it, and two obstained force venture.

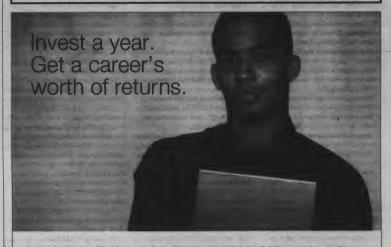

abstained from voting

In other business, BSG enacted a resolution affirming support for the syneral goal of increasing diversity within the faculty, and allocated \$800 for an appreciation breakfast for the faculty

and staff of the College.
At the conclusion of the meeting, BSG President Sophia Seifert '09 thanked the body, praising them for "accomplishing things" that had "not happened before in my four years.

Over summer vacation keep up with The Orient and watch for online updates.

20 students who applied to the program from the College.

gram from the College.

The remaining applications were subject to review by a panel in various host countries, and on Monday, all students were notified as to whether or not they had been named Pulbright scholars.

"Across the U.S., about 6,500 applications were received and about 1,500 were given out. Our students are going up against individuals."

are going up against individuals applying for their Ph.D. or Master's," said Stocks.

abroad fall into two groups: those who have received full grants for research study-Charles Stern '09, jimmy Lindsay '09, and alternate Birgitta Polson '09, and those who received English teaching assis-tantships—Kathryn Yankura '08, Kerry Persen '09, Theresa Weaver '09, and Jessica Lian '09. Each of the students will be overseas for one academic year to promote cross-cultural awareness

According to Stocks, students who received a full grant planned goals and activities that include taking graduate-level courses and taking graduate-level courses and pursuing independent research. English teaching assistantships work approximately 20 hours a week teaching English and American Studies classes, most often in

For his project, Charles Stern applied to a school of Daoism and Religious Studies in Sichuan, China. An Asian Studies major, he is currently doing an honors project translating and textually analyzing a calligraphic document written in 1072 A.D. by Confucian scholars

10/2 A.D. by Confucian scholars during the Song Dynasty. Stern has been to China twice before; he taught English on one trip and studied Chinese on another trip last year. He will be staying in an area of China that experienced an earthquake last year, and said that he is interested in getting involved with a volunteer organization to help restore the region from the devastation it suffered.

Jimmy Lindsay will pursue a Master's Degree from the Sustainable Energy Department at the Royal Institute of Technology in Stockholm, Sweden. After traveling to Cairo last spring, he was inspired to apply for the Fulbright Program and decided that Sweden would support his interests in alternative energy since Sweden's re-search in the field is decades ahead of anything currently being done in the United States.

Lindsay's thesis will take a look into the speculative field of micro-generation, a way of better captur-ing energy resources using thou-sands of widespread power plants, and will focus on one inhibitor of the implementation of this tech-

nology.

Additionally, Lindsay is looking forward to spending free time windsurfing on the eastern and western coasts of the country.

Birgitta Polson might be awarded the full grant to work in Sweden if those who have already received it for work in the same country drop out or if more grants become available later on. Ten grants have been given out annually for Ful-bright fellows applying to live in den but one was cut this year, Polson said.

If she is ultimately accepted into

the program, Polson will be doing field work at the Sustainable Development Department at Uppsala University to determine how the Lutheran Church in Sweden, articulates development policies. As a Religion major and Economics minor, Polson wants to research what, apart from organic agricul-tural projects currently underway in Sweden, would qualify as "sus-tainable development."

English teaching assistantships

Kathryn Yankura, who gradu-ated last year, will be teaching English at either a middle school or secondary school in Germany.
With a double major in English
and German, Yankura studied abroad in Vienna, Austria during her junior year at Bowdoin in order to improve her German lan-guage skills. She plans to volunteer at a daycare or elementary school in order to integrate herself into the community, an additional aim of Fulbright scholars working as English teaching assistants.

Yankura also wants to meet wo en from either a shelter or a "kindercare" program, currently subsidized by the German government, in order meet women of different ethnicities and social statuses

"I want to be able to experience the culture in Germany in terms of everything I've studied and to meet as many people from as many different generations as possible and get their different perspectives on the division of their country into Eastern Germany and Western Germany, she said.

Senior Kerry Persen will be teaching public high school on the island of Java in Indonesia, where the main language is Bahasa Inde nesia, a mixture of Dutch, Arabic, and tribal languages. According to Persen, "It's one of the easiest languages to learn so I'm excited to

Working in Indonesia, Persen will be able to bring together her interests in Islamic Studies and Middle Eastern Politics: Indonesia is the largest Muslim majority country in the world and is currently developing a democracy. Although she originally wanted to work with a non-government organization, Indonesia only allows her to work at the school where she will be teaching due to restrictions the country imposes on visas. Persen will travel to accommodate her interests with economic and political development, but also plans to get involved with the extracurriculars her school offers.

Theresa Weaver will spend her Fulbright year teaching in Germany, though the country's panel for Fulbright scholars has yet to inform Weaver where she will be working. She is interested in starting an international club, liberal political group, and student newspaper at whatever school she ends up teaching.

A German major, Weaver is currently completing an honors' project focusing on Heinrich Van Kleist's novella, "Die Marquise von

Jessica Lian will complete her Fulbright in China as an English teaching assistant at the Hong Kong Institute of Education for university students. While there, she wants to organize a discussion event to promote cross-cultural exchange between American and Chinese college students. Lian is also interested in earning her Master's Degree once she returns to the U.S. at the end of her time

College stays true to hiring and firing promises

Despite expected salary freezes, Bowdoin's faculty and staff have not experienced the layoffs and hiriatuses that some institutions have resorted to as a result of the economic downturn.

In his January 22 message to the College about its finances, President Barry Mills said that faculty salaries will remain fixed for the next two years in order to balance the College's budget while avoiding lavoffs

He added, however, that pay increases would still be given to promoted faculty.

"As President Mills said, promotions would be recognized with an increase and that is the policy we will follow in setting salaries for next year," wrote Dean for Academic Affairs Cristle Collins Judd in an e-mail to the Orient. "Normally eight to 12 people are reviewed for promotion in a given year." Judd explained that promotions

are changes in rank, for instance, from lecturer to senior lecturer, assistant professor to associate professor (the point at which tenure is awarded), or associate professor to full professor."

As Mills outlined, the College will also continue to hire faculty to fill existing tenure-track positions. According to Judd, six of the seven tenure-track searches authorized

and the last is still in progress. The College has also filled new tenuretrack positions created through the Capital Campaign. Judd said the College will fill

vacancies created by retirements where necessary, as well. "As President Mills said, we will

continue to monitor changes in the economy and adjust if we need to do so, but we believe that we have developed a prudent plan," wrote

Director of Human Resources Tama Spoerri said she has not had to lay off any non-faculty staff. Additionally, Bowdoin has experienced one of the lowest vacancy rates on record in 2009. Some staff members have quit or resigned, but not at a lower rate than in past years.

From a hiring perspective, one of the things that is certainly obvi-ous with this economy is that people aren't leaving their positions," Spoerri said. "People want to hang on to their jobs."

Spoerri said that in tough economic times people keep jobs with which they are familiar and experi-

"Our employees are some of the best, and what it is says is that we can keep some of our most talented people and it's not a super competi-

tive environment," she said. Of the staff members who have left, Spoerri said most left positions in services like security, dining, and

Check us out online

housekeeping.
"We absolutely need to fill those positions," she said. "We have an obligation to students."

As for other vacancies that may arise, Spoerri said that Human Re-sources would judge if they could reorganize positions, but would not rule out hiring new staff.

As for the 2009-2010 academic year, Spoerri said, "I would anticipate that we will continue as we are oing right now. It's hard to predict what will happen, but short of their being some catastrophic economic development, we will continue the way we're working. We've been working hard to curb discretionary spending across campus so that we can avoid layoffs."

Mills also recommended a salary freeze for non-faculty staff mem-bers earning more than \$40,000 per year in the message. For those earning under this amount, "the budget assumes a two percent increase for the next two years that will be paid either as a salary increase or as a one-time payment in each of the next two years." Spoerri said that Human Resources has followed this

policy.
"The overwhelming response that I have observed has been one that recognizes the importance of the College community, supports the desire to avoid layoffs among staff, and wants to focus on maintaining the quality and integrity of our academic program," said Judd.

SECURITY REPORT: 4/24 to 4/30

SECURITY REPORT Friday, April 24

An intoxicated campus visitor and his Bowdoin student host were asked to leave the Racer-X concert.

· A security officer checked on the well-being of a student near the Farley turf field.

· A student called Security to check on the well-being of an intoxicated campus visitor who had passed out in a shower in West Hall.

· A group of students in Quinby House were cited for playing drinking games.

· A security officer encountered a student on South Campus Drive sitting behind the wheel of a running vehicle pouring a vodka drink.

• A fire alarm at Harpswell Apart-

ments was caused by burnt food.

· A security officer reported that bikes improperly stored in a Stowe Hall hallway constituted a fire hazard.

· A student vomited on the floor at Thorne Dining Hall during Su-per Snacks and then vomited again when he returned to Winthrop Hall. The student will be billed for two clean-ups.

female athlete who rolled her ankle during a sporting event requested transport to Parkview

· Illegal fireworks were ignited on the main quad during the Racer-X concert.

Saturday, April 25

· A student attending the Ivies event at Harpswell Apartments tripped over a landscaping wire and dislocated her elbow. A security officer transported the student to Parkview Hospital.

· An employee at Thorne Dining requested that an officer check on

the well-being of a student.

• Brunswick Police issued a summons for possession of alcohol by a minor to a student walking on Cof-fin Street. The student was warned for drinking in public and littering.

· A student complaining of an ankle injury was transported from Chamberlain Hall to Parkview Hospital.

 Security officers approached an intoxicated and belligerent visitor on the Quad during the afterconcert. Lucas Creamer, 29, of Bath, made several violent threats to the security director and another security officer, and was spoiling for a fight. Security offi-cers verbally directed and escorted the man off the Quad, away from the crowd and onto Park Row. When a BPD officer arrived to assist, Creamer attempted to assault the police officer. The security director assisted the police officer in subduing Creamer who was physically resisting arrest. Creamer now has several criminal charges and he was issued a criminal trespass or-der barring him from all Bowdoin property. A campus security alert has been posted.

· An intoxicated student became ill and vomited in the common room at Hyde Hall after consuming hard alcohol. Brunswick Rescue was called to transport the student to Mid Coast Hospital.

· A student on the Quad received a foot laceration after stepping on broken glass. She was transported to Parkview Hospital by Brunswick Rescue.

· Several students on the Quad reported that a group of confrontational visitors were making verbal

threats and harassing them. Security approached the group and asked them to leave campus. Two mem-bers of the group refused to leave and began insulting and taunting the security officers. BPD was called to assist in removing the pair and issue criminal trespass orders. The pair continued to be uncoop erative with the police. Zachary Tenenbaum, 21, of Brunswick, and Joshua Long, 21, of Brunswick Naval Air Station, have been officially barred from all Bowdoin property

· Female students on the Quad reported that a local man was walking around ogling and leering at them, making them feel uncomfortable. Security asked the man to leave and he complied.

· Security checked on the wellbeing of an intoxicated student in Coleman Hall.

• Brunswick Police issued a summons for possession of alcohol by a minor to a student who was riding a bicycle on Pine Street while

drinking an alcoholic beverage.

• A McKeen St. resident called to complain that he could hear a large group of students at Quinby House singing bawdy drinking songs while they bathed in a small plastic swimming pool in the back parking lot. A security officer asked the students to lower their voices and turn the music do

Sunday, April 26

 A student was transported from Howard Hall to Mid Coast Hospital at the student's request.

• A student reported that a male who claimed to be a student crawled through an open first floor bathroom window Hall. Security checked the building thoroughly and did not locate the

A student reported the theft of a bicycle from 24 School Street.
Vandalism was reported in the

third-floor men's room at Appleton

Monday, April 27

There was an alcohol policy violation in Hubbard Stacks.

· An oven in the kitchen on the 16th floor of Coles Tower was found left on at a high temperature

• The kitchen area of MacMillan House, found in an unsanitary and smelly condition, was reported to Housekeeping for cleaning.

 A student reported a bicycle sto-len from the area of Howard Hall. A security officer recovered the bike and returned it to the student.

· A student at Brunswick Apart-H reported that someone had kicked in his apartment door.

Wednesday, April 29

· A staff member reported that student furnished alcohol to a visiting high school student who was attending in the Aspirations in Maine program. The matter was referred to the dean of student affairs.

Thursday, April 30

· An Ultimate Frisbee player with an injured knee was transported from Pickard Field to Parkview

The Office of Safety and Security thanks all Bowdoin students for their cooperation and assistance in helping keep our students and our campus safe during lvies.

ORIENT STAFF

The 2008-2009 academic year at Bowdoin was both exciting and tumul-tuous. The College found itself coping with a national economic crisis, engag-ing in a highly-anticipated national election, and participating in other interesting and noteworthy events in academia, arts and athletics during the 207th academic year.

Students returned to campus this September during the transition of two major posts at the College: the director of the Museum of Art and the director of Admissions. In June, William Shain stepped down after two years of serving an of admissions at the College as dean or admissions at the College, citing family health problems as part of the reason for his departure. Scott Meiklejohn, who worked at the College for 11 years (most recently as vice president for planning and institutional advancement), was named interim dean of admissions

After 10 years as the director of the Walker It's years as the director of the Walker Art Museum, Katy Kline also announced that she would leave her post in September. Kline said she felt the time had come to "let somebody else invent the next chapter" since th museum's \$20.8 million renovation and reopening last fall. Retired Professor of Art History Clif Olds served as interim ector of the museum. Kevin Salatino, who currently serves as the head of the Department of Prints and Drawings at the Los Angeles County Museum of Art (LACMA), will take over the position in August.

However, September saw a number of new arrivals as well. The College cel-ebrated its dedication to the common good during the official dedication of the Joseph McKeen Center for the Common Good on September 26. The McKeen Center, which replaced the Community Service Resource Center, is located in Bannister Hall. The week of events leading up to the dedication of the McKeen Center included a Com-mon Hour address by former Senator George Mitchell '54 and the 10th annual Common Good Day.

The College was also forced to look inward at its own community values after the Wall Street meltdown escalated to a national economic crisis. Near the same time, the College reported that its endowment had slowed to a growth of 1.3 percent for the 2008 fiscal year, down from 24.4 percent the previous

October

The economy continued to impact the College as the year progress but the administration assured the Bowdoin community that everything was under control. Wachovia Bank was under control. Wachovia Bank froze a fund containing less than \$500,000 of the Collegés money; the fund had previously held millions of dollars of the Collegés money, but had been transferred to other investments during the summer of 2008. Mills and Associate Professor of Economics Gregory DeCoster also explained the Collegés financial state to students in an October 6 forum.

Despite the dismal performance on Wall Street, construction on Maine

Street Station, a \$25 million train sta-Street Station, a \$2.5 minion train sta-tion and shopping center in down-town Brunswick, began on October 20. Bowdoin has signed two spaces in the development, and some of the site is scheduled to be completed by July

In October, the Bowdoin commu nity and the nation also turned their attention to politics and the 2008 Elec-tion. The Orient got a chance to inter-view Rep. Tom Allen '67 (D-Maine) before the November 4 Senate election and heard Allen's views on the election, and neard Alean views on the election, the state of the economy, and of course, the Red Sox. Bowdoin also hosted a de-bate between Charlie Summers (R) and Chellie Pingree (D) for the first district house seat several days before voters went to the polls.

The atmosphere on campus as elec-tion day neared remained electric, as students vigorously worked to register members of the Bowdoin community to vote through a "Get Out the Vote (GOTV) campaign. In a poll the Orient conducted throughout October and published on October 31, 84 percent of published on October 31, so percent of the student body supported then Sen. Barack Obama, while only 11 percent supported Sen. John McCain before the November 4 election.

Bowdoin pride also remained strong throughout the month, as a newly redesigned polar bear mascot was unveiled by the Office of Commu-nications and Public Affairs. The new nications and Public Affairs. The new mascot features the 96-year-old po-lar bear mascot gazing directly at the viewer and standing on three legs, with the fourth paw raised and resting on a capital letter "B." The Bowdoin name also traveled beyond the realm of the Bowdoin community into ABC's hit TV show "Grey's Anatomy," appearing twice on the shirt of Lewiston native Patrick Dempsey, famously known as Dr. Shepard or "McDreamy."

After weeks of political events and election preparation, the Bowdoin community was geared up and ready for Election Day on November 4. Start ng at 8 a.m., Bowdoin students were shuttled to election poles to cast their ballots, with students traveling to the polls. More than 500 students also voted early with absentee ballots. On the evening of November 4, Bowdoin students and faculty gathered to watch as Barack Obama was declared the 44th President. That evening, shortly after the announcement, a rally of some 200 students spontaneously formed on the Quad shouting, "Yes, we can," while running, jumping, climbing trees, and celebrating with noisemakers and tiki

In local election results, the Maine's In local election results, the Maines Electoral College votes went to the Democratic presidential nominee for the fifth presidential election in a row. In the Maine Senate race, incumbent Susan Collins (R-Maine) defeated Rep. Tom Allen (D-Maine), a member of the Bowdoin Class of 1967, in the race for U.S. Senate. In the local state representative race, alum and Iraq War veteran Alex Cornell du Houx '08, defeated Jonathan Crimmins (R), and David Frans, a Green Independent candi-date, to become a state representative for District 66 in Maines Legislature. District 66 is a part of Brunswick consists of approximately 300 Bov students, including residents in ick that

ell House, Helmreich House, Burnett

House, and Stowe Inn.
Two weeks after the November 4 election results elated much of Campus, another celebration took place near Farley Field House to celebrate the second consecutive NCAA national title for the women's field hockey team. The championship game went into double-overtime before first year Katie Herter assisted Bowdoin's all-time leading scorer Lindsay McNamara '09 for the winning goal. A crowd greeted the bus returning from the game with cheering the development sings, and being according to the control of the control of the second of the se ing, champagne, signs, and leis around 1 a.m. on Monday, November 16.

With Winter Break approaching, the College continued to react and plan for difficult economic times. President Mills announced on Monday, Decommittee to look into the College's finances and make cost-cutting recom-mendations for the next year's operate, ing budget. The "blue tarp committee" was selected by President Mills and inwas sericical by President Mins and in-cludes faculty, students, and staff who worked closely with the senior officers and President Mills to discuss Bow-doin's financial situation and budgeting plan for the next few years.

Bowdoin students, staff and faculty returned to campus in January to wit-ness the christening of Bowdoin's brand-new hockey triak, the Sidney J. Watson Arena on January 18. The women's team tied Hamilton in the risik's first official game before the men's team dominated.

the Williams Ephs in an 8-3 win

While some members of Bowdoin's mmunity traveled to Washington, D.C. to witness the swearing in of the new president, others were given key roles in the new administration. George Mitchell '54 was named the special envoy for Middle East peace, Karen Gor-don Mills (wife of President Barry Mills) was appointed as the admin-istrator of the Small Business Ad-ministration (SBA), and Chris Hill 74 was named U.S. Ambassador to Iraq.

In January, the College con-tinued to contend with the poor state of the U.S. economy. President Mills sent an e-mail to the Bowdoin community on January 22 recommending a small increase in the number of enrolled students at the College, a salary freeze for most employees, and a number of most employees, and a number of other steps in order to confront an expected budget shortfall. His recommendations came after three meetings of the blue tarp commitmeetings of the oute tarp commit-tee. Overall, however, the number of students requesting financial, aid did not increase considerably this year, though the College said it was planning to budget more funds for

February

After applications had fin trickling in, Bowdoin recorded percent decline for the Class of Bowdoin recorded a 1.7 ne for the Class of 2013. decline to: ur percent of applicants de intended to apply fo

financial aid, up from 57 percent in 2008. Many of Bowdoin's peer schools saw applications fall between 5 and 20 percent, while some, like Wesleyan, jumped considerably.

In February, the College also looked to gain funds from President Barack Obama's stimulus package, signed on February 17. Bowdoin sent a letter to Maine Governor John Baldacci's office looking to receive state funds for "shovel-ready construction projects in Brunswick and "green initiatives" around campus—projects that totaled \$10.3 mil-lion. Some of these projects included putting energy-efficient windows in Coles Tower and Hawthorne-Long-fellow Library, as well as installing solar panels on the south side of the Farley Field House roof.

As spring approached, the stu-dent body also began making deci-sions about their living situations at Bowdoin and abroad next year. A record number of students applied for College Houses, with 300 students vy-ing for 197 spots in the eight college houses, compared to 218 students who applied to live in the houses last who applied to live in the houses last year. The applicant pool consisted not only of 272 sophomores, but also 28 upperclassmen. In addition, 269 students applied to study abroad during the 2009-2010 year, with 95 students applying to study abroad in the fall and 150 applying to go abroad in the spring, creating an imbalance between semesters. Twenty-four students applied to go abroad for the full academic year.

March

After a two week long Spring Break, students returned to campus at the end of March with the housing imbalance continuing to be an issue on campus. Res Life, in order to deal with the problem, said that it would convert 25 Brunswick Apart-ment doubles into triples, and turn 11 Stowe Hall quads into quints.

In March, Teach for America (TFA) also announced that its applications rose this year by 42 percent, as college graduates sought alternative options to jobs and graduate school. On the basketball court, the

vomen's basketball team made the Polar Bear nation proud when it won the NESCAC championship and received an automatic bid to the NCAA tournament. Unfortunately, the Polar Bears fell to Muhlenberg College by the heartbreaking score of 58-57.

April

In April, Bowdoin announced that it had accepted 18.6 percent of that it had accepted 16.5 percent of its applicants for this year's admissions cycle, a slight increase from last year's acceptance rate of 18.5 percent. Bowdoin's peer schools generally saw larger application decreases; Williams, with the most demonstrate of the percent of t dramatic drop, saw a 20 percent decrease; Middlebury dropped 12 percent; Bates and Colby each saw a seven percent drop; and Amherst dropped one percent. As was the

case last year, a record number of students of color-1,095-applied for admission and a record number of students of color were accepted, All3, for a 37.7 percent acceptance rate. The College has also offered 1,150 applicants a spot on the wait list. In the past, the College has only accepted between 10 and 60 students from the wait list.

This April was also characterized by an emphasis on the environment, as Bowdoin declared in February that it would keep its carbon pledge towards neutrality despite economic hard times. The President's Climate Commitment Advisory Committee which is responsible for setting a date and coming up with plans for the Col-lege to reach carbon neutrality, organized events that took place during April Climate Days during the week of April 5 through 10. Events during the week included a Climate Fair, a locavore dinner at Thorne, the results of the Climate Matters Contest, a on Hour lecture with environ mental advocate Majora Carter, and a concert by folk band Avi and Celia at Quinby House. While Bowdoin's campus contem

plated the environment, the rest of Brunswick showed signs of struggle amidst a faltering economy. Though Gelato Fiasco raved about good busi-ness, stores like CyberLANd wereforced to shut their doors, following in the footsteps of other Brunswick businesses including Grand City Variety, Sweet Leaves Tea House, Hattie's Ice Cream Parlor, Maine St. Art,

PHOTO MONTAGE BY MARGOT D. MILLER

and Book Land Brunswick business owners cited the closing of the Na-val Air Base and the lack of student spending in townalso as factors that hurt commerce on Maine Street.

In the academic realm, President Mills sent Professor of Economics Jonathan Goldstein a six-page letter of censure on April 21 after an eightmonth investigation into research misconduct stemming from his study, The Tradeoff Between Extra-Curricular Activities and the Academic Mission of Small Liberal Arts Colleges: Why Some Schools Are Poor Educational Investments." In the study, Goldstein examined various policies at 36 small liberal arts schools and ranked them according to three factors: grade inflation at the school, the percentage of athletes at the school, and whether the athletic director at the school had Division I, II, or III experience. In the study, Bowdoin ranked last of the 36 schools in the survey. Mills' letter warned Goldstein that similar research offenses would lead to more serious repercussions in the future

Ivies Weekend, traditionally held the last weekend of April, kicked off with a performance by Racer X on April 23. The weather during Ivies Weekend offered blue skies and warm temperatures, and students were entertained by artists Sean Kingston and Santigold in a Satur-day concert. After the weekend festivities, students are now ready to tackle final projects and exams as the academic year draws to a close.

In retrospect, college has been a time for exploration and progression

SEXUALLY SUGGESTIVE

BY ALANNA BEROIZA

Sometimes I wonder how I got this job. What qualifies me to spout words, loosely related to the topic of sex, for the Bowdoin community to read every other week? Because this is the last article I'll be writing for the Orient before I graduate this month, it seems to me like an ideal time to share with you my credentials as a sex columnist. If you want to know the truth, the idea for this column began as a joke that my friends and I hatched over lunch at Moulton early this past fall. I think the idea was that it would be really funny, or ironic, or something, if I wrote the sex column because of my particular situation with regard to sex.

First of all, I'm queer. Hopefully, this is not news to any of you, but it

does contribute a great deal to my appeal as a "(sex)pert." Because my sexuality falls outside of the norm, I automatically become a point of sexual interest. Whether that interest resides in the category of admiration, disgust, or something in between is not for me to say-all I can say is, ever since I've been queer people have been quite a bit more interested in talking to me about sex and sexuality than they ever were in the past.

But it's not just the people around me who have been more interested engaging in conversation and about sexuality with me. I myself have been increasingly more invested in questions regarding sex and sexuality over the past four years. As soon as I began to identify myself as someone outside of the norm, I wanted to understand how it was that I got to that place, why I should stay there, and how I could make a life for myself in a world that I had barely even considered before. To me, it seems only natural that

such self-exploration and re-evalu-ation should take place in an individual who is just beginning to stake claim to a marginalized identity.

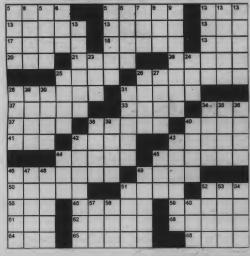

However, something that I'm beginning to understand is that I'm not the only one who's interested. College is a period of development. During these four years, many of us do a lot of work (i.e. experimentation) in the name of experimentation) in the name or "finding ourselves." Sexuality in particular becomes a central focus for many of us during this time in our lives. As we traverse this small our lives. As we traverse this smail liberal arts landscape, we contend with more than just the bitter cold of February, or the brutal stress of late April. Every single one of us, regardless of preferences or back-grounds of any kind has, an opin-ion on sex. Each of us desires, and as we do so, we do it differently and with different levels of comfort and experience. And so, from my point of view, each of us can benefit from dialogue and exploration of ques-tions around sexuality, no matter find ourselves when it comes to these things.

In the past, I've definitely con sidered sexual exploration and the use of intoxicating substances to be very closely linked. After last weekend, I'm pretty confident that I can come up with a couple of reasons to support my former opinion. In a way, it makes sense. Sex is such complicated, physical, social, mental, and emotional thing—the lowering of inhibitions may seem more like a requirement than an option at times. I bring up this point because I think that the general attitude about sex at Bowdoin could stand to be improved. When we marry sexual exploration to the consumption of intoxicants, we make it possible for our community to downplay the importance of sex and sexuality. It just makes things that much more difficult to understand or talk about with a sense of feeling and respect the morning after when those involved

were intoxicated the night before.

All this, however, is not to say that Bowdoin is a sexually stagnant community. If I could say anything to describe my four years here it would be progress. It's really un-believable how different Bowdoin seems to me today than it did four years ago. The campus has come alive with discussion, debate, art, and action around questions of and action around questions of sexuality in ways that I never could have imagined. There are commu-nities of people (Outpeers, V-Day, BMASV, Safe Space, and BQSA to name a few) that are actively tackling issues pertaining to sexuality with words and actions and spirit in ways that really seem to be making a difference. I want to thank those of you who have taken the time to read my articles this year for your support. This column has been a real pleasure to write. I consider myself extremely fortunate to

ARTS & ENTERTAINMENT

Senior directors cap Bowdoin careers with innovative productions

As the sun and warm temperatures infiltrate the library annals once again, Bowdoin students are faced with the unavoidable fact that the academic year is coming to a close. While this may be a startling realization for many, two Bowdoin seniors are taking advantage of their final days at tge College in their upcoming independent study performances.

Seniors Elizabeth Jones and Aislinn Curry decided to undertake independent studies that built upon the knowledge and experience they had gain throughout their time at Bowdoin. The final productions, Iones' dance perfor-"Vermilion" and Curry's play 'Trojan Women" are the results of their hard work, motivation, inspiration, and

For Jones, dance has played an integral role in her Bowdoin education.

"I'm majoring in visual arts and art history, minoring in dance," Jones said. "But it's in the theater that I spend most of my time.

In her first independent study with - Senior Lecturer in Dance Performance Gwyneth Jones, Jones honed her affinity for choreographing, which culminated in a dance film.

"After working on that project, I realized that I really liked choreography but that I wanted to take on a larger project. I wanted to choreograph dance that was not solely made for the camera, and this has definitely been harder," Jones said. When you're working to a final, live production, you have to have everything ready for the performance. You can't go back like you can with film and piece everything together so you have only the best parts."

Live performance proved to be different than film, not only in terms of the choreography and production but also the dancing. "Vermillion" has al-

PAWAT SERITRAKUL FOR THE BOWDOIN ORIENT

GIRL POWER: Katherine Sherman '09 performs a scene from "Trojan Women," a play about women after the Trojan War directed by Aislinn Curry '09.

lowed Jones to scrutinize the difference between dancing for film and dancing for a live audience.

When you're dancing for the camera, there are so many different ways you can look at the dance and the choreography versus when you're seeing a live performance and you only have that one view from your performance seat," she said. "With film you can get so much closer with so many different angles."

Choosing appropriate music was integral to the success of Jones project as well as establishing and strengthening the theme of the production.

"The theme of the project is the color red," Jones said. "Red has so many different connotations and thus each of the nine sections of the performance have a title and music that feel like some aspect of the color red. I chose from a wide range of music including Chinese and Mongolian, American and Argentinean."

Jones cites Yo-Yo Ma as one of her aior influences.

"I was very attracted to his music, so I started to look for other music that he was in and that he influenced in, and then I went from there," she said.

Iones has chosen to use video project tions throughout the performance.

"I've incorporated video projections into my choreography, both recorded and edited video, that complements the live dancers as well as live video that reflects exactly what they are doing at that moment," she said.

Curry is directing and adapting the play "Trojan Women," a process that has been a similarly stimulating and chal-lenging experience. "Trojan Women" is the product of an independent study Curry did with Associate Professor of Theatre Davis Robinson

"I've always been involved with theatre," Curry said. "I trarted acting in middle school, acted a firsh high school, took acting classes here. But at Bowdoin I found my passion in theater lay behind the scenes in tech work, running shows in just about every position you could."

Unique to Curry's play is its connection to Curry's honors project in the Classics department.

"My honors is a paper that examines

how to stage a classical tragedy, "Trojan Women, specifically for modern wom-en. I look at the themes of the play, the history behind it and the gender issues that run throughout it," Curry said. "In my independent study in theater I'm directing the same play, and it's been an amazing experience to have these two processes coinciding with one another.

The knowledge I get in one so heavily influences the knowledge I get in another, even though they remain two distinct entities'

For the focus of both her honors project and her independent study, Curry chose to work with the play "Trojan Women" because it resonated strongly with her on a personal level.

"I read through every Greek trag-edy in existence, and I got to a really lowpoint," Curry said. "I was not connecting with any of them and then I found 'Trojan Women,' with which I felt an immediate connection. My favorite characters out of all of Greek mythology, ones that I've found fascinating since my youth, are all in this play. It's also a play that connects strongly with women.

Trojan Women" takes place the day after the Trojan War has ended in the city of Troy, which has been completely

destroyed.
"The play doesn't have your standard plot," Curry said. "There's not a single event that everything leads up to. Instead, it's a series of episodes about the women whose lives have been destroyed, each one talking about what has happened to her. It's really a play that explores these large, social questions of what happens at the end of war and what is the meaning of war."

"Trojan Women" will be performed

on Friday at 2:00 p.m. in the Studzinski Outdoor Amphitheater or in Drake Lobby if it rains. "Vermilion" will be performed Friday night at 8:00 p.m. at Memorial Hall in Wish Theatre. Admission for both shows is free.

Seniors, advanced art students display final work at Fort Andross

ANDY BERNARD

Some of the best and most recent art projects that Bowdoin students have to offer will be on display, starting next Friday, at Fort Andross in an opening of both the Advanced Studies In Visual Arts (Art 350) final projects and the senior visual arts major projects. While Art 350 is an independent course, both groups of projects will be intermixed in one show consisting of 31 total projects.

For the Art 350 students, the work that they will be displaying is the culmination of the semester They have been working on these specific projects since January.

Rather than strict assignments with rigid parameters, their projects were very open, which gave the students a lot of control over the work in the show.

'What is going into the show is a project that they've been developing themselves with close consulta tion with the rest of the class," said Assistant Professor of Art Mike Kolster, who is organizing the show. "It is work that they have generated, come up. with, and conceptualized themselves."

The media included in the Art 350 show will be diverse, as the

JUMP START: "The Jumper," by Becca Spiro, is a scanned image of a plexiglass print she made in Advanced Printmaking. Her work and the work of other art students will be on display at Fort Andross starting next Friday.

course does not insist on any specific medium of art. The work that the senior majors will be adding to the Art 350 work is wide-ranging as well. It is a combination of painting,

drawing, printmaking, sculpture, photography, video work, and even a few multimedia projects, making

projects.
"They [the non-350 seniors] are participating in this show with the idea that they would show their most current and strongest work," been working more in the traditional, straightforward way with paint on canvas, while others have been pushing the definition of what art is," said Kolster. "However, most of the projects reside within the two.

While many advanced art shows from Bowdoin students have been exhibited in Fort Andross, the space that this show will be using is somewhat different.

Most exhibition spaces are large, bare, white rooms that house all of the projects, whereas this space, called Suite 412, is a converted office suite, meaning that instead of one or two big rooms, it is broken up into a number of smaller rooms. This creates a different environment of artwork for viewers in each

"It's a much different space," Kolster said. "The exhibition will be an experience of moving into some different environments. Students haven't altered the environments, but you will feel a difference in each room that you enter."

The show, consisting of the work of both senior visual arts majors and Art 350 students, opens on May 8 from 5-8 p.m., and will remain open until May 15. The show is in Suite 412 at Fort Andross.

Finnegan'09 curates extensive exhibit during independent study

MAXIME BILLICK STAFF WRITER

Senior Katherine Finnegan's independent study unexpectedly exploded from a small student gallery display to a headlining exhibition.

"Third-Party Politics: Britain, France, and America in an Age of Revolution" opened at the Bowdoin College Museum of Art on April 9 and is the culminating project of an independent study in history.

independent study in history.
Under the guidance of Visiting Professor of History Aaron Windel and witl. the help of Mellon Curatorial Fellow Diana Tuite, Finnegan investigated prints that were created during the early decades of King George III's 60-year reign over Great Britain and Ireland in the 18th century.

"I always wanted to do an independent study. Initially it was only supposed to be one semester long, and the project was reading-heavy with a very small student gallery exhibit," Finnegan said. "Then an opportunity arose and a main gallery opened up, so we extended the project into a year-long study."

The prints touch on a number of conflicts, mainly the French Revolution, the American Revolution, and the Seven Years' War, as well as a number of economic, social, and political issues related to these clashes.

Finnegan was careful to pick prints with similar allegories from those available to her at the museum.

"I narrowed down the prints based upon classic symbols," she said. "For example, a common theme was that of the liberty cap. Its symbolism originated in Roman times...when a slave was freed, the cap was placed upon their heads. Later in history the cap came to represent foreign captives."

According to Finnegan, the cap signified freedom from slavery for Americans fighting for independence, and for Jacobins during the French Revolution.

The cap plays a prominent role in

"There is one where an American and a Brit are both struggling for a pole with the cap on it, symbolizing the fight for independence,"

Prominent printers in the exhibit include William Hogarth, William Humphrey, and James Gillray.

"Hogarth was very pro-Royalist," Finnegan said. "He was employed by the Crown and therefore his prints mock dissidents. Not all printers were against the U.S. though, like Gillray. However, he always depicted America as a 'savage' American Indian in a very stereotyped way."

This was Finnegan's first experience in curating. Having taken only one course in art history while abroad in Rome, Finnegan credited curatorial intern Tuite as "extremely helpfut."

"It was through her knowledge and assistance that this exhibit is possible," she said.

"I always had appreciation for exhibits, but I ever knew what went into it," Finnegan said. "I couldn't have done it without the help of a professor and a curator. I'm so lucky that I had the chance to work with people who are so knowledgeable. \ \

MICK DANIELS, THE BOWDOIN ORI

ART SMART: Katherine Finnegan '09 curated the exhibit "Third-Party Politics: Britain, France, and America in an Age of Revolution," currently on display at the Bowdoin College Museum of Art.

There's no way I would have had this experience at a larger school. Windel and Tuite are brilliant and I look up to them as mentors."

"Third-Party Politics: Britain, France, and America in an Age of Revolution" is on display in the Center Gallery at the Bowdoin College Museum of Art until July 12. Additionally, Finnegan will deliver a gallery talk titled "Representing the Revolutionary Atlantic" in conjunction with the exhibition on Thursday. May 7, at 4:30 p.m.

Students bare all in 'The Naked Art Show'

STAFF WRITER

Some Bowdoin students have anticipated the rising temperatures by shedding their winter layers to participate in "Exhibition: The Naked Art Show." The show is an annual event that lets student artists explore the diversity of the human body and use familiar Brunswick locations as the settings for their individual projects.

One of the artists and organizers of this years' show, Elsbeth Paige-Jeffers '10, used an interesting medium to examine the details of sex.

"I am contributing a sound installation titled 'Submersion/Submission' to the show," Paige-Jeffers said. "This piece deals with the aural and auditory associations we have with sex. I wanted to push my personal work past formal notions of the body and nudity and into a related field, namely sex. Thus I eliminated the visual element in my work."

ment in my work."
Paige-Jeffers, along with head organizer Alanna Beroiza '09, pushed
artisfs to test the boundaries of expression with their pieces more than
in previous years, and hope to see
positive responses from fellow stu-

"For viewers of the show, we hope that simply seeing fellow students willing to ponder these issues, create art, expose themselves and their bodies, will encourage a dialogue and an increased comfort-level with all things fleshy and human," Paige-Jeffers said.

The 2008 naked art show featured mostly photography, but this year the artists are branching out into new mediums.

Kristina Dahmann '10 used her experience with art as a jumping-off point for her project.

"I have always done art and it was fabulous to be able to have the leeway and do a little of this and that—all of what I really wanted and missed doing," Dahmann said. "I used charcoal, oil pastels and other dry mediums on bright paner."

Artist Rosalind Worcester '11 was able to apply methods of photography learned in class to her interpretation of the show.

tion of the show.
"In my photography class we saw

COURTESY OF COURT

IN THEIR BIRTHDAY SUITS: Bowdoin students have spent the past few weeks working on pieces for the annual naked art show, which opens tonight at Fort Andross.

some pictures that looked like they contained more than one photo but were printed together," said Worcester. "This technique, where you use more than one negative while printing, intrigued me because I liked the idea of using multiple pictures to make one picture that is comprehensive as a whole."

Worcester believes the show will have a positive impact on Bowdoin's campus.

"I've definitely been surprised by some people who signed up," she said. "I also have talked with several freshman who have never encountered this kind of school-funded nudity, but they seem nervous and excited to go to the show on Friday."

go to the show on Friday."

Bryant Johnson '11, another one of the featured artists in the show, has a theory about the fascination with nudity that inspires the naked art show

year after year.

"These bodies are shocking," Johnson said. "They are the bodies of college students invested in the future, determined to shatter the social coordinates of the privileged class' modes of distinction in a highly choreographed way."

Taking a more philosophical approach, Johnson insists that the show is more about expectation than controversy

"We strip naked to distract ourselves from the fact that sexual attraction, innuendo, and cinematic romance exist at the expense of a broader-encompassing love for that unfathomable notion of humanity."

"Exhibition: The Naked Art Show" opens tonight at 7 p.m. in Room 309 of Fort Andross in Brunswick. It is free and open to the public.

In 'State of Play,' Crowe, Affleck engrossed in thrill of the chase

THE REEL
WORLD

BY LAUREN T. XENAKIS
COLUMNIST

You would think that after Ivies, I would have had enough excitement to last me until the Fourth of July. While listening to Sean Kingston shout "Put your hands up!" over recordings of his songs was exhilarating. I found myself craving just a few more thrills before settling down to the grind of classes and homework.

Thus, at precisely 6:55 p.m. on Sunday evening, my roommate and I decided to postpone our mountain of homework for another two hours and go see the 7 o'clock showing of "State of Play" instead. The movie, starring Russell Crowe and Ben Affleck, proved to be thrilling enough to make up for Sean Kingston's performance.

'State of Play" is a political thriller

centering on the death of a young political aide, Sonya Baker. Baker was the lead researcher for a committee headed by Senator Stephen Collins (Ben Affleck), Collins, a former soldier, is the young star of the Democratic Party and is in charge of the committee investigating the practices of private defense companies deployed to Iraq. Afghamistan, and domestically. Sonya dies the morning the committee is supposed to open. Collins, revealing his aide's death, is so overcome with emotion that the media immediately goes into a frenzy speculating—or rather, declaring—that Collins and Baker were doing a little more than researching.

Meanwhile, Cal McAffrey (Russell Crowe), the star journalist for the sinking Washington Globe, is investigating the murders of two young men. McAffrey is an old-school reporter with a computer that looks like it belongs in a historical documentary, not a news-room. McAffrey was Collins' college roommate, and they have kept in touch over the years. Determined not to let this media storm hurt Collins' wife, Anne, McAffrey decides to help Collins discover the truth about Sonwas death.

Della Frye (Rachel McAdams), on the other hand, is a reporter cast more in a modern mold. Della works on the online side of things writing a political blog, but she's quite naive when it comes to real reporting. Thrown together with Cal on the assignment to figure out exactly what happened, Della gets a rude awakening about the rules in real reporting, which include bending the law when you need to.

And so, Della and Cal get tangled more and more in the political and corporate web woven around them as they try to figure out who knew Sonya Baker and who would have wanted to kill her. Cal is also trying to balance his relationships with Stephen and Anne Collins with his need for a scoop as a journalist. Plus, he has a rather frightening Helen Mirren on his back as the Globe's editor, who is trying to keep a sinking newspaper afloat.

The movie is based on a BBC televi-

The movie is based on a BBC television series of the same name. Its British origins are apparent as the movie is rather smart and well-written. It doesn't try too hard and go for the long chase scenes and big shootouts that we expect in American thrillers. The movie was engrossing and kept my attention for the entire two hours, which, considering that I had a pretty long weekend and a rather painful sunburn, is quite a feat.

However, while the plot was interesting, some of the chemistry between the characters was lacking. I didn't find the relationship between Collins and McAffrey believable, probably because I knew that Ben Affleck and Russell Crowe would not have been college roommates. Also, I never had any sympathy for Collins, even though his marriage was falling apart and his mistress had just been killed. Maybe it's because he was a politician and I have an inherent distrust of politicians, or maybe it's because Affleck played the part with a cold and calculating demeanor.

coold and calculating demeanor.

All in all, however, "State of Play" is good entertainment. Watching the trailer, you expect the movie to ask some hard questions about politics, journalism, and corporate corruption, but it doesn't really delve into these issues to make a real statement. Instead, you leave the theater feeling glad that you live in rural Maine, where the greatest threat to your life is a moose crossing the highway.

Reflecting on favorite reads in final installment of the 'nerd noo

THE BOOK NOOK

BY FRANCES MILLIKEN COLUMNIST

For my last column of the semester, I generally compile a list of books for whatever vacation is just around the bend. But this time my last column of the semester is my last Orient column. I write it and then I graduate, the end.

When I leave the land of the polar bears, I will leave having acquired a number of things during the last four years: friends, experience, knowledge, etc. And then there is my prodigious tower of books. Scanning my shelves full of hard and soft covered novels, I am confronted by with the one constant that has run through my college career; I always read.

Since I started writing this column, I have frequently been asked, "Do you read a book a week?" The answer, pure and simple, is no. I read every day, and sometimes that takes me through a book or two in a month, sometimes that many in a week. It depends on a lot of factors. What is important to me is the prospect of the pages that meet me when I tumble into bed.

I am a little embarrassed to be waxing so nostalgic, but I figure that those who do get this far in my nerdy literary column will indulge me in my last, brief summary of the books that have bowled me over during the last four years

Unaccustomed Earth

By Jhumpa Lahiri
I raved about this collection of short stories from the Pulitzer-winning author in my final column of last year. By the end of the last story I was so affected I had to hold the book for the first minutes after I finished it. Pathetic, I know. This spring the book was on the syllabus for one of my English classes. was ecstatic, but also nervous that the story would not have the same effect. I reread it cautiously, slowly, looking for what drew me in the first time. Lahiri is a genius of prose; her stories are consistently subtle, complex and sensual. Reaching the final pages, I was relieved to be engulfed by the same emotions. Again I found myself holding the book, pondering its conclusion.

"The Sun Also Rises" By Ernest Hemingway

I have always loved Hemingway. But I didn't get to this novel until last spring. The simplicity of his language is mesmerizing. I found myself entranced by the beauty of a single sentence, one that I still spell out to savor its enveloping calm. There is always an edge of tragedy to Hemingway's work, and this heightens the presence of the pleasures.

"Norwegian Wood" By Haruki Murakami

Since I read this book two-anda- half years ago I have touted it as my deal breaker novel. Nervous that I had read the complicated, beautifully written teenage love story during a particularly angsty period in my life, I picked it up again this fall. I took my time and it was the only book I had on hand for a week or so. It was just as good as I re-membered. Murakami is known for his magical realism but that element is aband lovers in general cannot help loving this book. And if you can, you and I are

It's these three that I can imagine reand rereading. I came to these particular novels outside of class. I will be graduating with 13 English courses under my belt, however, and I am going to include a brief selection from those cla

I was exposed to Philip Larkin's poetry during my first semester at Bowdoin. The dark, somewhat cantankerous poet often drums through my head. His presence there I can attribute to the superbly

Whatever unpretentious bones I have in my body resist my inclusion of the next author. James Joyce. I have to say it, both because you aren't a real scholar 'til you have read "Ulysses" (kidding!) but also because my Joyce seminar with Professor Reizbaum was such an unex-pected joy. "The Dead" in his collection "Dubliners" is really what I would rec-

And with those small notes, I am going to sign off. It's likely that not everyone reads novels now. My hope is that life after Bowdoin will provide all of you with more time to indulge.

On 'World,' Noah and the Whale blow indie scene out of the water

THIS WEEKS REVIEW BY LOUIS WEEKS

I hate their name, but goddammit I like their music. I have been listening to Noah and the Whale's debut album "Peaceful, the World Lays Me Down" nonstop since I bought it in December. While I'm still struggling with my British accent, I think it's fair to say that I now speak whale.

The members of Noah and the Whale are what we look for in our indie crooners: they aren't Americans, they play cute instruments that are littler than usual (ukulele, mandolin, glockenspiel, kazoo...), and are an adorable couple that may or may not be dating.

Noah and the Whale nails all of the pre-musical requirements that the genre demands of it. Musically, they go above and beyond what most expect from hokey maybe-dating duos. While they take their cues from Belle & Sebastian and The Weepies, Noah and the Whale's members also infuse an element of American country and bluegrass into their music. Their arrangements are usually sparse: guitar-heavy tunes with a prominent gravelly, vocal line. This is nothing new, but Noah and the Whale seems to make something different out this mundane folk formula. Their strengths lie in their ability to take one musical idea and hash it out, to stretch a concept to its limits, to show the listener all of the possibilities inherent in a simple folk melody. Noah and the Whale plays to these strengths in "Peaceful, the World Lay Me Down

I am a sucker for beautiful duets. of Noah and the Whale is lovely, but is effective in its moments of grittiness. The best vocal moments of the album don't occur in the soft and rounded "oo"

vowels, they occur when the harsh British accents of Charlie Fink (lead) and Laura Marling come together in a kind of rough poetry. Like punk singers, they chew on their words. They do so with a striking similarity and swell in and out of their long notes like dancers, pushing and pulling against the other. In these vocal performances, they achieve what all musicians hope to in a performance which is sharing the same musical body. They think, react, and interpret the music as they believe the other might.

It took me a while to appreciate Fink's lyrics. I've never been one for the vagueness of pop lyrics, but in this case. I was willing to make a suggestion. Like the sic that they play, the lyrics straddle the line between pop, punk, folk and country. Their hooks are simple-often three or four words-but they serve as a nice foil to the heavy, often philosophical themes of their verses. Usually this juxtaposition of hyper-serious and overly simple lyrics might feel too jarring, but Noah and the Whale make it

The entire album is a success, but there are some songs that are especially strong. The first song you will listen to will undoubtedly be "5 Years Time." You will recognize this song from the Saturn commercial, you will think to yourself "I hate my television," you'll get distracted...just listen to it. After you repair your broken iTunes (from overplaying this song) you'll want to move on to "Shape of My Heart." This song encapsulates all that works well on this album: feel-good, driving drums, punchy guitars, clapping, and a sugary sweet chorus. "Rocks and Daggers" is a fantastic tune that has a tinge of bluegrass. The fiddle solo will pleasantly surprise you, and convince you that even the widely disliked American genre of bluegrass can be made catchy by a group of London hipsters. I can say, with almost 100 percent certainty, that they will never touch our Pabst Blue Ribbon.

SPORTS

Men's lacrosse in conference semis

STAFF WRITER

The men's lacrosse team notched two huge wins last weekend and needs only two more for its first-ever NESCAC

·The second-seeded Polar Bears will travel to host Middlebury and play thirdseeded Tufts in the conference semi-final tomorrow. With a win, Bowdoin will advance to the NESCAC finals for the second straight year and face the winner of Middlebury-Wesleyan. Though they'll face stiff competition, the team firmly believes it can win the

Saturday," said senior quad-captain Rob Halliday, "but Sunday is definitely in the back of our heads this whole week, and rightfully so. I know the senior class has been waiting for this—from our semifinals appearance our freshman year, to last year's defeat to Williams in the NES-CAC finals-we all know that this is the year we win the NESCAC.

Coach Tom McCabe said that the three teams left in the tournament are very athletic, so the Polar Bears will have to control possession by winning face-offs, playing solid defense, and taking

smart shots.
"We need to eliminate their transition games," said McCabe.

"When we play consistent lacrosse

on both ends of the field, we're a tough team to heat," he added.

after two marquee wins last weekend. On Friday, Bowdoin beat Tufts at home to score a first-round home playoff game. On Saturday, the Polar Bears be Trinity 11-8 to knock the Bantams out

The Bowdoin defensive unit has layed exceptionally well in the playoffs, holding Trinity scoreless for an incredible 34-minute stretch. Sophomore goaltender Jake McCampbell notched 18 saves and won both the game and NESCAC Player of the Week honors. "Against both Tufts and Trinity our

ise really played well, and it all started with the goaltender," McCabe said. "He made a couple of really big saves and kids really fed off of that."

With eight minutes left in the first half, Bowdoin trailed Trinity 5-4. But the Polar Bear defense locked down and shut the Bantams out into the fourth quarter. Senior quad-captains Halli-day and Cullen Winkler each scored twice, as did senior Matt Legg, and juniors Adam Tracy and Steve Thomas. Sophomore Ben Chadwick scored the final Bowdoin goal and Ashforth tallied

On Friday, Bowdoin never trailed and beat Tufts 11-7. Another exceptional third-quarter sealed the win for the Polar Bears, after goals from Ashforth. Winkler and junior Justin Starr put the game out of reach. McCamp-bell stopped 13 shots and the defensive unit held Tufts to only one goal in seven

man-up opportunities in the win.

The NESCAC champion is guaranteed a berth to the NCAA tournament, though there are at-large bids up for grabs, but Bowdoin would have to at least make the championship game to have a shot at a berth. McCabe, however, believes that the team could make second straight, and second ever, NCAA tournan

"When we're playing well, and luck-ily we're playing well at the right time of year, we could win [the NESCAC] very easily" he said.

The team is ready for a rematch against Tufts, Halliday said.

Some may say that since we beat Tufts last week they'll come out with more intensity this Saturday, so they have the advantage," said Halliday. "The way I see it, though, is that we know we are the better team, as shown last Friday, nd what's more, they know it too. The advantage is ours."

The team has had a great week of practice, Ashforth said, and hopes to turn its hard work into wins this weekend.

"If we keep having fun by going hard in practice, we will have no problem staying focused and carrying our momentum in to Saturday," said Ashforth.

Women's lax falls again

Heading into last Saturday's game at NESCAC-leading Tufts, the Polar Bears knew they needed to win if they hoped to prolong their up-and-down

Behind early goals from first year Elizabeth Clegg and senior Lindsay McNamara, Bowdoin looked like a team that would not be denied as they mped out to a 3-0 advantage. Tufts' Chrissie Attura scored a goal

to cut the lead to 3-1 but Clegg quickly answered for the Polar Bears with a goal of her own assisted by McNamara.

The following 10 minutes saw Tufts dominate on both defense and offense as they sprinted back to a 5-4 lead on the strength of four consecutive goals.

Once again, Clegg had an answer for the Jumbos scoring her third goal of the first half—this time unassisted—to get Bowdoin back in a 5-5 tie with less than five minutes remaining in the first

After giving up another goal to the Jumbos, the Polar Bears responded ith less than 10 seconds remaining in the half by tying the score on the back of Clegg's team-high fourth goal of the

In about as even a first half as possible, the two teams played to a 6-6 tie with roughly the same number of controls, and clears

The second half would prove to be a ferent story entirely.

Tufts opened with a pair of goals before sophomore Katy Dissinger scored to trim the deficit to a single goal. After a heated first half, Tufts' expe-

rience and poise took over, shooting 16 times and limiting Bowdoin to just eight shots in the second half.

Tufts capitalized on their advantage in shots, ending the game—and the Polar Bear's season—with a five-goal run to win by the final score of 13-7.

Senior tri-captain and Bowdoin's all-time wins leader Steph Collins-Finn finished the game with 11 saves and four forced turnovers while Mc-Namara, who also plays for the field hockey and women's ice hockey teams, ended her storied Bowdoin athletic ca-

reer with two goals and an assist.
With the win, Tufts sealed the NES-CAC's No. 2 seed by improving to 13-1 on the season (8-1 conference) while Bowdoin fell to 8-7 (3-6 conference) and narrowly missed the conference ament for the first time in the NESCAC's nine-year history.

We would have gone on if Conn. College had beaten Wesleyan," said Alex McLain '11. "We were very hopeful at the end of the game, but we found out mid-huddle that they lost and we were heartbroken."

Sullivan '11, Chase '09 win Athlete of the Season award

The Orient chooses the male and female "Athlete of the Season" based on his anıl her exemplary performance, leadership, and commitment to their respective programs. The winners are decided by the editors of the Orient.

Stephen Sullivan '11

Stephen Sullivan didn't always love tennis this much.

"I started playing when I was 12, my mom made me play," he said. "I didn't really like it, I preferred team sports."

Then much more of a soccer player, the 12-year old Sullivan hardly expected tennis to be his sport of choice. In truth, he may not have realized it until his arrival at Bowdoin.

"I was burned out in high school," he said. "I used to go to all these tournaments, it was kind of rewarding I guess, but it didn't really mean anything.

"It wasn't until I came to Bowdoin that I started to like it again. It was because of the team aspect," he added.

However, Sullivan came to Bowdoin

and brought immediate success, going 18-5 in his first year, making an ap-pearance in the Final Four in the nation and helping the team win the NESCAC

"I would honestly say, as an unseeded player I was impressed he made it to the final four at nationals," said teammate Josh Roer '11. "It's pretty remarkable for

That was probably one of the better sports experiences of my life," Sullivan said. "Everyone on the team is like my best friend, we all worked so hard to-

This year, Sullivan said he stepped up ng regimen in the sur

cause he knew he had to take over the No. 1 spot on the team because of Garrett Gates' '08 graduation

"I was very impressed with the way he took the off-season," said Roer. "His commitment, working with a trainernow that we're coming up to the postseason I'm sure it will pay off again

Sullivan said that he found the No. 1 singles position to be very challenging.
"In the beginning I kind of struggled

because I knew I would have a tough opponent no matter who we played,"

Sullivan said that after talking to his coach about relaxation techniques, he was able to find his groove again.
"I regained the confidence I had last

Clearly, it has served him well as Sullivan has completed the regular season, going 11-4 at the No. 1 singles spot.

There is still time for Sulliva the postseason looms, starting this weekend at the NESCAC championships.

"In the beginning of the year, we were joking about a national championship," Sullivan said. "But these last two weeks it actually feels like it could happen."

Runners up: Damon Hall-Jones '09 (track), Harry Ashforth '09 (lacrosse).

Ali Chase '09

Ali Chase '09 may have won Orient Athlete of the Season, but if there w

ever a Comeback Player of the Year award, she would have certainly won that, too. Chase entered Bowdoin as a three-season athlete, as a soccer player and a runner for indoor and outdoor track, running mainly the 800-meter race. But in the fall of her junior year, Chase tore her ACL in a soccer game.

You know you never think it will happen to you," Chase said. "But it did."

Chase had surgery just a month later because she wanted to have it as soon as possible in order to start the recovery

"I trained really hard to get back for soccer, but I got tendinitis in my patellar tendon, so I had to rest through the fall

The beginning of this year's indoor track season was the first time Chase had been able to run competitively since the spring of her sophomore year.

"I was really nervous, but right from the start it went well, my coach was aware we couldn't overdo it," she said. With all of the rehab I had done, I definitely came back stronger than before

Chase completed the indoor season while staying healthy, and qualified for Open Indoor Nationals.

Teammate Alison Pilon '09 has been impressed by Chase.

She's pretty motivational in terms of being able to come back and train really hard and do a lot of cross-training, and have such great success, go to nationals," Pilon said. "It's almost too good to be true, she's an inspiration to

Chase runs her races in a distinct way. According to her, she likes to stay in the middle, or even the back, of the pack until the last 100 or 200 meters when she tries to pass the rest of the

"She comes around the first lap and she's behind everybody and I think Tm not worried," said Pilon. "She always seems to come back and pass them."

Chase is about a second off of the Bowdoin record for the 800-meter, but said at the upcoming New England championships she will be running for place, not for time.

"Right now I'm just focused on the m," Chase said.

Even if she does qualify for outdoor nationals, Chase will not be attending as it lands on the same day as gradua "I sort of had to decide on that awhile

ago, for training," she said.

Runners up: Sarah D'Elia '09 (tennis),
Chris Head '11 (track).

HIGH HONORS: Stephen Sullivan '11 (left) hits a forehand, Ali Chase '09 (right) runs a relay leg at last year's NESCAC championship meet.

YOU GOT SERVED: Stephanie Langer '11 prepares to serve during practice on Wednesday.

Tennis to play Tufts, **Trinity in first round**

18th-ranked Rowdoin women's tennis team dropped a match to 19th-ranked Tufts on Sunday, leaving the Bears with a 4 3 NESCAC record this season. The Bears are 8-7 overall.

Bowdoin fell 9-1 to Tufts, with Stephanie Langer '11 claiming the team's only victory at No. 6 singles (6-2, 6-4). Rachel Waldman '09 and Liz Pedowitz '10 also had tight matches at No. 4 and No. 5 singles, respectively. Waldman lost in three sets, while Pedowitz fell in a tie-

The team lost all of their doubles matches, and Waldman commented on the skill of the Tufts doubles

"Tufts is always a strong team and they came out prepared for the match," Waldman said. "With three strong doubles teams, the matches were all close, and could have gone either way."

Pedowitz also noted the competitive nature of the matches

Despite what the overall match score says, we realize how close it really was," she said. "There were a lot of individual close matches including some losses in tiebreakers and 3-setters.

The match against Tufts marked the Bears' last home match of the season, and the last match on the Bowdoin courts for seniors Waldman, Sarah D'Elia, and Charlotte

"Our last home match was bit-tersweet," Waldman said, "But the

season is not over, and we still have a lot of work to do.

The team will begin postseason play at the NESCAC tournament this weekend, hosted by Williams. The Bears will face Tufts again in the first round of NESCACS.

"This is a great opportunity for us...to play Tufts again and beat them this time around," Waldman

"We now know the game-style of each player and what we need to do to win," Pedowitz added. "We want revenge and there is no doubt in my mind that we have it in us to beat Tufts only a week after they

Waldman added that the team will bring their A-game to the court this weekend.

"Having just played Tufts, we know what to do, and we're prepared to play our very best tennis,"

The men's side did not play last weekend, but its season is far from over. After finishing No. 4 in the NESCAC, the Polar Bears will face fifth-seed Trinity at 9 a.m. today at Williams College.

The Bears were a fourth seed last year when they won the NESCAC championship.

the Bears beat Trinity, they ould face top-seed Middleh 9 a.m. on Saturday in the semifi-

teams in the conference," said Ste-phen Sullivan '11, "but we barely

Hall-Jones leads men's track to 4th

The men's track and field team was hard at work at the NESCAC Championship last Saturday. After running away with the state title last weekend, the Polar Bears said that they had a feeling that there would be much tighter competition this time. They were right

Bowdoin scored 108 points to place fourth, finishing only 8.5 points away from second place. Wil-liams repeated as NESCAC champions by scoring 154.5 points, well ahead of second place Bates' 116.5, followed by Tufts and Bowdoin. Al though they did not meet every goal that they had hoped for, the Polar Bears say they have a lot to be proud about from Saturday's meet.

"We were pretty happy with how we did," said senior trf-captain Luke Fairbanks. "We were aiming for a top-three finish, but we still perormed really well and had a lot of great individual performances. We had as many first-place finishes as we did at states and more than douNESCACs...I felt that the guys had

Four Bowdoin athletes won indi-vidual conference championships, most notably, the versatile Damon Hall-Jones '09.

In addition to winning the 100eter dash with a time of 11.09, Hall-Jones also placed third in the 200-meter dash and anchored the 4 x 100-meter relay team of Tim Fuderich '10, Kyle Hebert '10, and Zach Winters '11 that finished second place overall, earning additional All-Conference honors in both events

Other individual champions from the meet included Thom pson Ogilvie '10, who seized the 5K run by a commanding twelve seconds, post-ing a 15:10.54. In the field, Chris Martin '12 won the high jump with a height of 1.91 meters, while Fairbanks captured the shot put title with a throw of 15.52 meters, in addition to scoring in the discus throw

"Luke Fairbanks had an amazing day," said Coach Peter Sloven-ski. "He was one of only a few aththrowing events. And he is one of only six Bowdoin athletes who have ever thrown over 50-feet in the shot

The Polar Rears have continuaously stressed the importance of the support they give each during their vents at important meets.

"Everyone has just been feeding off the performances of each other for the entire season. This week, Damon's domination of the 100-meter dash and Luke's phenomenal throw in the shot put pumped me up for a strong performance in the 5000-meter," said Ogilvie.

After yet another grueling cham-pionship meet, the Polar Bears are again gearing up for what they know will be one more weekend of tough competition at the New England D-III Championship.

Though they are entering the final stages of the championship season, Bowdoin says that they do not expect to see anything different down the stretch and are looking for a topfive finish at the outdoor New Eng-

Softball sweeps final double-header

The final weekend series for the seven seniors on the softball team ended on a high note after losing to the Colby Mules on Senior Day last

them out on the field with us, but they have left us with the motivation to play hard," said first year

In their first game of the week-end, the Polar Bears scored four runs in the third inning thanks to three errors committed by the Colby defense. The Mules bounced back, however, closing the gap to one run in the fourth inning be-fore taking the lead 6-4 in the fifth. Bowdoin scored once more in the om of the inning but the Mules held off the Polar Bear attack for a

Julia Jacobs '10 (7-8) took the loss for Bowdoin pitching four and

On Saturday the Polar Bears traveled to Waterville for their final two games of the 2009 seasona, earning -3 and 5-1 victories. Game one was a thriller. Thanks to three consecutive singles by Bowdoin and an error by Colby, the Bears took the one run lead after being down 3-1 with two outs in the top of the seventh inning. Karen Reni '09 shut down the Mules in the bottom half of the

inning on their way to victory.

Reni (5-5), in her final start of her career, pitched all seven innings and

Lord again went two for three from the dish and scored two runs. After returning from an ankle injury to play the final four games of her career, Kaitee Daley '09 added two hits of her own and one run scored.

Bowdoin carried the momentum from their last inning comeback into the second game of the double-header, scoring three runs in the top of the first inning. The Mules scored just once in the fourth inning as Jacobs pitched all seven innings and earned the win.

Junior Lauren Coven had three hits, two RBIs and two runs scored as she helped the seniors end their careers with a win.

The Polar Bears end their season with a solid 22-16-1 (4-8 NESCAC)

We entered the season with very high expectations," said Coleman.
"We definitely thought that this
year was going to be the year." The seven seniors end their four-year careers with 89 total wins, the best ever for a senior class. "The seniors have been an amazing group to coach and with whom to work," said Coach Ryan Sullivan.

The 2010 season looks very promising for the Polar Bears. After suffering some injuries to key players, all will be healed as a new class will join the team next fall.

"We certainly have high hopes for next season," said Sullivar

Women's track looks to New Englands

STAFF WRITER

The women's track and field team envisions a top-three finish in the Division III New England Regional Championship this Saturday, a goal they set their sights on after last year's championship, when they took seventh overall.

The Bears took fourth place at the NESCAC Championship this past weekend to Williams, Middlebury, and Tuffa northing a third. The women's track and field

bury, and Tufts, putting a third-place finish at the New England Championships within striking

with a number of breakthrough performances at NESCACs, he ever, the women remain optimistic about their chances of achieving

Not the least of these perfor-

mances were Bowdoin's two indi-vidual champions in the meet. Elsa Millet '12 took first in the 400-meter dash with a time of 58.29 seconds, winning the race by over half a second. Millet also picked up a third-place finish in the 200-meter dash with a time of 26.08 seconds.

Millet's performance testifies to the remarkable amount of talent in

the team's first years, quad-captain Alison Pilon '09 said.

"It has been a true pleasure to have [Millet] and other talented first years join the team this year," she said. "I felt like watching her win reaffirmed how much this year's new members have contributed to our team effort and dynamic."

Riding the momentum it has maintained all season, the team's senior throwers both had stellar finishes, with quad-captain Kelsey Borner '09 earning a victory in the discus with a throw of 42.24 me-

Borner also took second in the n throw, where her distance of 38.95 meters qualifies her provi-sionally for the NCAA Champion-

The 4 x 800-meter relay team of Grace Kerr '11, Dana Riker '10. Jess Sokolow '09, and Ali Chase '09 took second overall with a total time of 9:24.74, just one second off the Bowdoin school record.

Despite wanting a top-three fin-ish at both NESCACs and New England D-IIIs this year, the Bears

are looking forward to another shot at that goal this weekend.
"D-IIIs is the biggest meet of the year for our team," Riker said. The seeds shift around a little bit between NESCACs and D-IIIs as some other schools join the competition, and we have a strong enou team this year to use that to our ad-

vantage and sneak past Williams, Tufts, Middlebury, or MIT.

The Bears will travel to Spring-field College this weekend, where they will take on nearly 25 other New England teams to gun for the top-three finish they've been wait-

WALK-OFF: Brett Gorman '11 receives high fives after scoring the winning run over Brandeis in the bottom of the ninth on Wednesday.

Baseball narrowly misses playoffs

BY DANNY CHAFFETZ STAFF WRITER

Once again, a head-to-head tiebreaker with Tufts University proved to be the deciding factor for this year's baseball team.

Bowdoin did all it could this week end, winning all three games against Bates. Unfortunately, Tufts didn't blink, matching all three games with a sweep of their own against Colby.

In game one of the series, the Bears went down 3-0 early to the Bobcats, letting up a run in the first inning and two in the third. But after five scoreless innings for the team, a four-run explosion in the sixth proved to be the deciding factor in the game. Jason Koperniak '09 led the way with two RBIs in the inning. Pitcher Tim Welch '12 calmed down at ter his first couple of innings to go eight strong, allowing just three runs off four hits while striking out ten. Pat Driscoll

'09 came in for the save in the ninth.

Coming from behind again, the Bears took game two of the series 5-4, ting all of their runs in the fifth and sixth innings. Jordan Edgett '12 led the

m with three hits on the day while Joe Berte '09 and Kevin Zikaras '10 both homered for the Bears. Sean Kleier '09 came in to relieve Driscoll in the sixth inning. And after two scoreless innings and just one hit, he was rewarded with his second win of the season.

No need for a comeback in the final game, as Bowdoin wrapped up its NE-SCAC season with an 8-6 victory over Bates. The team scored its eight runs off 13 hits, while Adam Marquit '11, Brett Gorman '11, and Edgett each had three on the day. Joe Pace '10 pitched the first five innings of the game, giving up just three runs en route to his team-leading sixth win of the season. Carter Butland '10 relieved Pace in the sixth and closed out the game with four good innings, allowing just one run on two hits.

Consistent offensive contributor Gorman was also rewarded with NES-CAC Offensive Player of the Week after his stellar performance this weekend. Combining all three games, Gorman had seven hits, four RBIs, two doubles, and a home run. He is now hitting over .400 with a team-leading 28 RBIs on the season and is second on the team

with a .587 slugging percentage. When asked about receiving the award, Gor-man said that "it was certainly a great honor" but he was more focused on the success of the team

It was definitely a successful weekend sweeping Bates, but we know that in order to make the NESCAC tournament next year we will need to compete at that same level every game," he said.

The Bears continued their winning

habits with a 6-5 win over Brandeis this past Wednesday. After a backand-forth game, Edgett was able to hit a game-winning walk-off single in the bottom of the ninth.

Gorman also had two more RBIs and hits in the game to add to his already impressive week. The triumphant win improved the Bears' record to 20-15 rall (7-5 NESCAC).

Although the team's playoff chances are over, the season still continues. The Bears will visit Colby for a doubleheader today. The team was originally scheduled to travel to Middlebury, but games were canceled in favor of the Colby matchup. The first game is at 11 a.m. in Waterville.

BY CHRIS ADAMS-WALL COLUMNIST

This past Tuesday afternoon, Josep Guardiola paced back and forth in his office, contemplating the impending match that would take place later that evening. Only a few days prior, Guus Hiddink and his team stepped off of their plane and into Guardiola territory, iracle worker himself contemplat-

ing Tuesday night's clash.

On Wednesday, Sir Alex Ferguson popped a Chiclet or two into his mouth and naturally began to chew away violently at the hard-shelled gum, contemplating the impending match at his stadium that evening. And finally, in the opposing clubs locker room, Arsene Wenger stood expectedly stoic in front of his team, a three-hour train ride from home, contemplating, too, a match that might define his squad's un-

For most of you, these names will mean nothing...yet. But they are per-haps the four most scrutinized men in sports today, each of whom are manag-ers for the last four club football teams still standing in Europe's prestigious Champions League.

I know what you're thinking: "An-

other soccer article? Are you kidding me? Get over it, Chris." And, if that ur reaction, I do apologize, but I am still not over it and hope I never am. But please keep reading and hear me out: I promise you, I am doing this for your

On Tuesday evening, Guardiola put forth his prolific Barcelona club in front of a jubilant home crowd of over 95,000 at the Nou Camp in the coastal, northat the Nou Camp in the coastat, north-eastern Spanish metropolis. Guardiola, in just his first season as manager, had his side atop La Liga—Spain's premier division—four points ahead of rivals Real Madrid, and was now poised to resume his quest for European glory in the first leg of the Champions League semifinals. Hiddink, the Dutchman and seminals. Hiddink, the Dutchman and interim manager of Chelsea, countered with his Blues squad, who, like Burqs, was making their second consecutive appearance in the semis, fresh off their epic 7-5 aggregate quarterfinal win over English foes Liverpool.

Barcelona boasted the usual suspects of the elusive Samuel Broo, the graceful Thierer Happer and the expertional.

of the elusive Samuel Broo, the grace-ful Thierry Henry, and the exceptional Lionel Mess, the inexhaustible trio hav-ing produced 65 goals this year. Cheleca answered with the destructive Didier Drogba, the troublous Michael Ballack, and the crafty Frank Lampard. And soon, the match finally commenced, as Hiddink's gameplan to thwart and pre-vent came to fruition, Chelsea frustrat-

ing an overwhelmingly powerful and tactical Barcelona team that, despite generating several opportunities (four of which might have been goals had it not been for keeper Petr Cech), was held scoreless at Camp Nou for the first time this season. The game ended in a 0-0 draw, with the second leg set to take place Wednesday in London at Stamford Bridge.

In northern England on Wednesday, Ferguson brought out his big guns of Wayne Rooney, Carlos Tevez, and cur-rent FIFA World Player of the Year Crisno Ronaldo for Manchester United to face Wenger's youthful Arsenal, represented by the exuberance of Cesc Faregas, Theo Walcott, and Emmanuel Adebayor, to name a few. And like the other side of the bracket in Barcelona, the draw ultimately took off, the reign the draw ultimately took or, the reign-ing champions at home against the vis-iting Babies of Europe. For the majority of the game, Arsenal looked severely outmatched, with United creating nu-merous scoring chances, including one on an unlucky flick by Mikael Silvestre that landed at the right foot of defender John O'Shea who alammed it into the John O'Shea who alammed it into the top of the net, giving Ferguson's boys an early 1-0 lead. But Gunner keeper Manuel Almunia was brilliant all night, making save after impossible save, rea-cuing Arsenal from even more demise as the offensively-challenged club that generated hardly any opportunities escaped Old Trafford with a 1-0 deficit going into the second leg back home.

Now you know the summaries: going into the second legs (of a home-andhome, if you will), the scores are 1-0 Manchester United over Arsenal, and 0-0 between Barcelona and Chelsea. That is precisely how both final matches of the semifinals will begin next Tuesday and Wednesday, respectively, each of the four clubs vying for a trip to Rome for the Championship game on May

Yesterday, a friend of mine asked me why I wasn't writing about hockey or basketball this week. I told him that this was more important. On Tuesday at 2:45 p.m. on ESPN2, we will all have at 2:45 p.m. on ESPINZ, we will all have the privilege to watch one of the most historic soccer games ever (Manchester United and Arsenal have never met in the Champions League), the best player in the world in Ronaldo, and a potential upset at the Emirates Stadium in London-a place where United has yet to don—a place where United has yet to win. Then, on Wednesday at the same time and network as Tuesday's match, we have Barcelona visiting Chelsea—not far from the Emirates—in what should prove to be one of the most unpredict-able, exciting, and decisive games in history that has extra time written all over it. And the best part is that we are at an ideal spot in the semester in terms of watching these games, as the final exam storm has yet to hit and many of

our classes will come to a close the afternoon of the first game. Also, I should mention that I am indeed an ardent fan of both the NHL/NBA playoffs, as I hear one of those leagues is where amazing happens, but why would I wait until nighttime to see amazing when it will be on in the mid-afternoon on Tuesday and Wednesday?

This is my proposal. My wish, in fact. Watch these two games. Sit down, relax, and watch them. Even if you don't like occer, watch both games. Just watch the games. I promise you won't regret it. It will be new and exciting and wonderful all wrapped into one tortilla of awesomeness, and will take only half as long as an NHL/NBA playoff game (90 at are you going to do instead, homework?). If you watch the games, you won't be disappointed. And if you do so-which I hope you do-and talk to me about your positive or negative (I don't care) reactions toward both of them afterwards, to put my money where my mouth is, I will never write about the sport that somehow always manages to take a backseat in our great country in this column again. All I care about is you watching. Just this once. Do it for yourself. This is a golden opportunity, and one not to be missed. London will be rocking, and I sure hope that Bowdoin is, too. So go ahead. Watch and enjoy the show. I dare

OPINION

BOWDOIN ORIENT

Our true Bowdoin

or those of us who are graduating in three weeks and stumbling out into the cold, hard, jobless world, now seems like a pretty good time to reflect upon how lucky we are to have been in college for the last year. While others have been stuck in a cubicle watching their 401k evaporate, or worse, been faced with the terrifying threat of unemployment, we've remained relatively insulated.

However, the College has provided us with more than just shelter from the economic crisis this year. Over the past four years, we've spent countless hours rapt in discussion with friends over dinner, engaged in meaningful conversations with professors, and supporting classmates in extracurricular endeavors. We've walked alone across the Quad under starry winter skies, after long nights grappling with our studies in the library. We've run jubilantly across that same Quad with dear friends after a late-night, spring-time party. We've written poems for the Quill and cleared trails on Common Good Day. We've challenged each other, and we've challenged ourselves—and Bowdoin has provided a space for us to do so.

Ultimately, these kinds of experiences are what make college such a unique and formative period in our lives. With no end in sight to the current economic downturn, we need to continually evaluate and reevaluate what is most important to enable the growth that takes place here. President Mills and the trustees may be the ones who sign the check for buildings like the new ice arena or the fitness center that is in the works; however, new buildings and new policies ultimately come in response to student demand. It's our responsibility to make sure that in the future, our demands and requests stay in line with what we really need for a truly educative experience.

William DeWitt Hyde's "Offer of the College" makes no mention of beautiful athletic facilities or palatial dorms. What it does proffer, however, is a myriad of suggestions to consider, regardless of the ups and downs of the economy. Hyde asks us to "cooperate with others for common ends." In these tumultuous and trying times, it's especially important for students to assert themselves as the College makes decisions that could impact the institution for a long time.

And let's not forget to make some time to enjoy these last couple of weeks of the school year. As Hyde encouraged: "lose yourself in generous enthusiasms."

LETTERS TO THE EDITOR

Thank you to Dining Service for its work with Food Forward

To the Editors:

Over the past four years, I've eaten some incredible meals here (particularly Thorne's Buffalo Chicken Burger and Moulton's Tostadas) and had the opportunity to work and learn with Dining Service in two capacities: As a display cook in Thorne, I've) seen how things work behind the seenes and I cannot imagine a more talented and dedicated staff than the one we have here. This view is only enhanced by the interactions I've had with Dining Service as a leader of Food Forward and executive chef of Taste for Change.

In 2006, we set up Bowdoin's Food Recovery program which sends all unserved food from the dining halls to the MidCoast Hunger Prevention Program. Dining Service takes care of all major aspects of this program like storing and logging food donations and providing reusable containers to transport the food in. Finally, Dining Service staff members have helped me out in unimaginable ways every month for Taste for Change dinners. They've helped me develop memus for upwards of 50 guests.

cooked 20 pounds of pasta during the dinner rush because I forgot to get the water boiling at Ladd, steamed 50 lobsters for me in Thorne simply to make my job easier, and didn't give me too hard of a time when I ironically presided over a kitchen fire.

To the entire Dining Service crew:

To the entire Dining Service crew: thank you for everything you've done for Food Forward. You have made it possible for us to raise over \$5,000 for community change and recover about 10 tons of food. Most importantly, thank you for cooking us such great food (particularly after ivies week).

Sincerely, Ian Yaffe '09

Discovering origin of feminine shame may bring enlightenment

To the Editors

In her letter ("Bond within her rights to celebrate her vagina," April 10), Margo Clark '09 cites "hateful myths about the vagina, and women for that matter." She further states that Bond is celebrating "the one part of her body that we have been taught to be ashamed of and hide."

Which leads to the question of just

who has taught such "hateful myths" and led her to be "ashamed of and hide" her vagina.

Was it her parents? Her friends? Her mentors? The academics who hold their positions solely on the basis of such presumed oppression? The leaders of the feminist movement who gain their power from such assertions? The therapitss who carn their living addressing such neuroses, founded or not?

I submit that greater enlightenment might come from answering this simple question than from all the vagina-based cultural elements of our day. And I hope the two writers involved will report their answers from the real world when the Orient resumes publication in the fall; it is important that we all know from whom such hate and shame derives.

In the mean time, Ms. Bond should know that I am not in the least asharned of my prostate ("Sex Matters: Power in the prostate: Exploring the atypical possibilities for male pleasure," April 24) nor do I harbor any insecurities about it that might spawn a study concentration, a safe house, a theatrical production of the prod

tion, or an industry.

And I won't take any challenges to this position sitting down.

Sincerely,
Pem Schaeffer
Brunswick, Maine

Gentrification: Harlem's De-Renaissance

BY KAYLA BAKER

Many people think of Harlem not only as New York City's most famous neighborhood, but also Black America's most famous neighborhood. Others simply look at Harlem as another black and Latino ghetto: During the Harlem Renaissance, a black middle class was established, but more important was the introduction of black arts, which included jazz music, poetry, books and short stories, and other art that allowed a black consciousness to

As I walked through Harlem a few days ago, I noticed the effects of gentrification. Condominiums and coops are being built in areas that were, during the late 1980s and early 1990s, swarming with drug peddlers, needle stickers, and prostitutes like every other black community. Starbucks and a New York Sports Club warmly invite new members, many of whom are white, to what was once considered, in the minds of black people, the center of the America (and maybe the world). Columbia University contin-

ues to buy out old buildings, including historical landmarks, to expand their

Am I the only one that sees a problem with this? On the one hand, Harlem has become more integrated with whites and racial groups. Many people would consider this to be positive, moving away from racial tensions. On the other hand, preservationists, like myself, argue that the system of racial privilege is taking place once again. The black community and the local government have worked hard to clean up Harlem's drug epidemic, but the community is not being rewarded for their diligence and loyalty. Instead, the black community is

Instead, the black community is being pushed out of Harlem because rent prices have become significantly higher. Many people who are pushed out of Harlem end up leaving New York City because rent prices are just as high in other places. As a firm advocate of economic independence within black communities and other racial enclaves, I wonder if economic independence within Harlem is possible in the long run. Was this des-

tined to happen? And if so, how do black people stay empowered when New York City's recurring gentrification movements are destroying part of their history?

People who view gentrification favorably believe that black people and
other racial groups no longer need
economic independence because race
issues are less prevalent today, especially since President Barack Obama is
black (although he's actually biracial).
I believe that black people (and other
racial groups that are viewed as low on
a subconscious hierarchy of race) still
need black empowerment, economic
independence, and community intervention in order to improve their lives
socially, economically, and politically.
The black people of Harlem and of
America deserve to keep their historical home, regardless of who moves
in next door, but the effects of racial
privilege won't allow this. Most of the
black people of Harlem will be moving
south very soon, in order to accommodate others who have moved in.

Why I don't hate TFA...and why I probably should

BY CHARLES DOR

Since the publication of Zoë Lescaze's article on Teach for America (Tise in TFA applicants at Bowdoin, nationwide, March 27), a number of students have asked me why I hate TFA. Each time I emphatically, respond that I don't hate Teach for America, but that I probably should. And here's why...

Unlike organizations, such as the Friedman Foundation, which claim to improve "the quality of elementary and secondary education" in the United States yet actively erode support for public schooling. Teach for America is a strong proponent of public education. As someone who believes that public institutions are central to the maintenance of a vibrant democratic republic, I appreciate TFAS commitment to public schooling. In an increasingly commodified and privatized society, it is important that organizations such as TFA counter the proposals issued by ideologically motivated, market-driven school reformers.

TFA, furthermore, states that its central mission is to eliminate the persistent educational inequities resulting from inequality in American society. In a nation where public school student enrollments frequently mirror the stark demographic realities of racially, ethnically, and socioeconomically segregated communities, I greatly respect TPA's refusal to ignore the significant educational disadvantage that children from impoverished communities—both rural and urbar—suffer when compared to their suburban neers.

compared to their suburban peers.
For these reasons and others, I am committed to working closely with Bowdoin students when they inform me that they hope to join TFA. Given the gravity of their occupational plans, I immediately urge them to prepare for the work with the heightened level of seriousness and intensity with which they would approach any consequential undertaking. Many take my advice and enroll in Bowdoin courses requiring hundreds of hours observing and practice-teaching in public school class-rooms while learning the instructional methods and curriculum development skills necessary to succeed as a classroom teacher. According to TFA, however, such undergraduate preparation for the realities of the public school classroom is

unnecessary

It is primarily for this reason that I probably should hate TFA.

The unfortunate number of ineffective elementary and secondary school teachers (whose classes most of us have suffered through at least once) attests to the genuinely complex and challenging nature of teachers' work. Indeed, even at Bowdoin College, an institution that typically enrolls prepared, engaged, and enthusiastic students, I frequently discuss with other professors the difficulties associated with planning and teaching in effective ways. Yet TPA's model of providing only minimal "training" to college graduates (many who have never taught a single lesson in an elementary or secondary school classroom) is counterintuitive in assuming that its "corps members" will succeed in their first year as teachers in some of our nation's most challenging educational environments.

Of course, whether the result of raw talent, sharp intuition, or some other difficult-to-identify personal characteristic, some TFA teachers do succeed. Many, however, struggle with the demands of their position. Overwhelmed by a lack of experience with disadvantaged students' academic, social, and emotional needs, they strive just to keep their own motivation from slipping, away. Some of those TFA participants drop out of the program during the school year, leaving their students at an even greater disadvantage than before. And TFA recruits who complete their two-year term of service frequently observe that they learned more from their students than their students learned from them—a claim I imagine their students' parents would not be pleased to hear.

TFA placed 3,700 corps members in schools this past year. With approximately 3 million public school teachers working in almost 15,000 school districts in the United States, TFA recruits amounted to .12 percent of the nation's public school teacher workforce. This is an obviously insignificant contribution.

an obviously insignificant contribution.
Nevertheless, Teach for America
has attracted a great deal of attention as
well as private financing (last year, for
instance, TFA spent almost \$30,000 on
marketing for each recruit it placed in a
public school classroom—approximately the same as a Maine teacher's starting.

salary). With such a high profile, TFA has demonstrated its potential for influencing policy development, which is why. I value the organization's dedication to addressing the problem of educational inequity. Indeed, its commitment is one that I wish we all would share.

Bowdoin students, especially, might consider putting their tremendous talents to use in an effort to end inequality in America, including by becoming public school teachers. In their zeal to join "the movement" to end educational inequity, however, students should not be duped by TPAs marketing schemes into believing that academic achievement as a student on one side of the desk necessarily translates into success as a teacher on the other.

I have worked as a teacher and teacher educator in and around public schools for 20 years. During all of that time, I have never met anyone who believed that he or she would not have benefitted from more rigorous preparation prior to becoming a classroom teacher. I doubt I ever will

Charles Dorn is an associate professor of education.

Have three times the fun at Trivies

BY LENNY PIERO

Though my hangover from Ivies has retreated, I have noticed that my Ivies mentality has not. I'm talking about that mentality which puts each one of us on a noble mission to pack as much fun into five days as possible. In my sadness, I began to wonder why it is that that this beautiful mentality is restricted to the period of April 21 to April 26. If we are able to outwardly embrace our internal thirst for pleasure on this one weekend, what is stopping us from reapplying that attitude as we choose?

I feel that our Ivies mentality should not be limited to just one weekend. Rather, that this mindset should be expanded to the weekends before and after Ivies as well. The product will be three full weeks of the kind of debauchery we thought was only possible for one. Bowdoin, get ready for Trivies.

Mathematically speaking. Trivies will be three times as awesome as livies. But like anything awesome, the magic of Trivies will come at a price. The current sacrifices of lvies include a student's academics, physical health, and the campus activity board's budget for musical performances. These sacrifices will be threefold for Trivies and thus our efforts to combat them must be innovative.

Consider the academic sacrifices. Usually, the weeks before and after Ivies are used to complete homework, which is impossible to do during the festivities. On Trivies, this strategy will be void since both of these surrounding weekends will be filled with partying. Since it is impossible for a student to dictate how much work he or she will be assigned, this issue will be the responsibility the faculty. As the student body raises its standards for partying, the faculty will be expected to lower their standards for academics.

When writing a paper during Trivies, the underused triple-spacing strategy will become fully acceptable. Triple spacing our papers will make page requirements more feasible and is in keeping with the age-old Trivies theme of the number three. For tests, getting your name right will be worth 50 percent of the final grade. The

As the student body raises its standards for partying, the faculty will be expected to lower their standards for academics. When writing a paper during Trivies, the underused triple-spacing strategy will become fully acceptable. Triple spacing our papers will make page requirements more feasible and is in keeping with the age-old Trivies theme of the number three.

other 50 percent will be taken from a series of multiple choice questions (three options, of course). For each question, full credit will be given not only if you make the correct selection, but also if you decide to instead write in "BEST TRIVIES EVER" as a fourth option and circle it.

Another problem to be combated will be the degenerating health of the student body. Excessive alcohol intake can leave even the hardiest undergraduate with a nasty hangover by the fourth day. The problem of campus-wide dehydration will be outsourced to Midcoast Hospital. Using some of our Ivies funding, we will rent out IV stations and an accompanying medical staff to administer when necessary. Multiple trips to the Trivies IVs will be allowed and the amount of saline solution used per student will be deducted from his Polar Points. I know a few people who coincidentally had to get IVs after a night of drinking. From their testimonies I can assure you that the IV works far better than Gatorade,

fruit salad, or morning mimosas.

Trivies IVs will deduct a lot of money out of our funding for the event. This means that we may not be able to book an earth-shattering act such as Sean Kingston. In fact we probably won't be able to afford anybody who is cool enough to wear a necklace with their own name on it. Who, then, will apathetically persuade us to put out hands in the air? This dilemma is perhaps our largest, since whoever does perform for the concert will be dictating the absolute climas of Trivies.

For this dilemma, we cannot turn to the faculty or to the Maine state health care system. Nay, we must instead turn to each other. While we may not have the funds left over to book a mediocre hip-hop act, we most certainly will be able to book ourselves...and a karaoke machine.

Instead of listening to Sean Kingston trip over the words of his own songs, why not hear your best friend nail every line of somebody else's. Imagine belting out "Livin" on a Prayer" to get the Quad dancing or "Stairway to Heaven" to get them making out? The responsibility of throwing a good party will be in the very hands of those who do it best us.

These three strategies will effectively dismantle any possible glitch in the Trivies machine. The sacrifices necessary for Ivies will be a non-issue for Trivies. The professors will assist us with academics, Midcoast will assist us with hydration, and we all will as sist each other in throwing a concert which will go deeper into the record book than the checkbook. Through this communal effort, we will effe tively provide each other with what ses to be the most epic three eeks of our lives. This year, we have already missed our opportunity to make the week before Ivies stand up to its successor. But not all is lost, for tonight begins what could someday be the final weekend of Trivies. The opportunity for two wild weekends in a row is still alive. So let's make it great, because the way I see it, right now we can still finish off one hell of

L'enny Pierce is a member of the Class of 2010.

GOP: Adapt or die

THE COLD, HART TRUTH BY EAMONN HART COLUMNIST

The political world is abuzz this week with the news of Arlen Specter's defection to the Democratic party. It has come so quickly that we do not yet fully know what it means, but the GOP certainly cannot feel good about it. Specter's votes will probably not differ, that much, and this will probably keep a more liberal Democrat out of the Senate in 2010 (PA was poised to go blue with Specter looking weak against primary opponent Pat Toomey). Still, this is not much of a silver lining for Republicans, as what was left of any "big tent" they could claim to have once had is quickly collapsing.

While Specter's motives for switching seem fairly cynical (his atrocious primary poll numbers probably had a lot to do with it) the GOP still can take an important lesson from Specter's switch; namely, that it is time to move into the 21st century.

On social issues such as gay marriage, the GOP is hopeless if it continues on its path. Yes, the issue is still controversial, and no, it won't stop being divisive any time soon. According to a recent New York Times poll, 42 percent of all adults now support gay marriage, and 57 percent of those under 30 do. Imagine what those numbers will be like 10 years from now, when more and more people are acquainted with happily married gay couples, and as more and more supportive young people reach voting age.

Make no mistake; although it will

Make no mistake; although it will be difficult, those in favor of marriage equality will win the fight. The Republican party can get on board now, or it can risk being branded as out of touch and bigoted. Steve Schmidt, one of John McCain's closest advisors, realized this and has recently come out in favor of gay marriage.

favor of gay marriage.
Unfortunately for the GOP, social issues are not the only area where it is out of touch. In the wake of the financial and economic crises, the public is demanding action on the economy. It seems as though the Republican party

cannot comprehend this concept.

One of the recent chalkings on Bowdoin's walks read, "Hope is not an economic strategy." Ironically enough, this seems to be the only strategy the national Republican party has to address economic problems right now. While the party made a big deal over its opposition to the stimulus package, it failed to offer a meaningful counter-strategy other than repeating the failed Bush model of massive tax cuts for the wealthy and hoping for a different result

The GOP should get over its kneejerk opposition to anything supported by President Barack Obama, realize that not all functioning government is inherently evil, and actually try to work with the majority, as opposed to complaining about being shut out because the administration will not acquiesce to its every demand.

There are plenty of moderate, and even conservative Republicans who aren't represented by the current donothing party leadership. The GOP does not have to agree to everything Obama wants. It is an opposition party, and it would be silly to ask it to do so. However, if it does not wish to alienate more of its membership and risk more defections (it would not be surprising if the Majority Leader's office has been placing calls to Maine's own Senators Snowe and Collins), it would do well to try and move forward.

The GOP can and should still try to find "conservative" solutions to problems; for example, what could be more conservative than environmental protection, or trying to find a market-based solution to the health-care crisis? Moving forward does not mean that the Republican Party must abandon its core principles. It merely means that it must fully acknowledge the problems we are facing and make an earnest effort to find solutions. Only then will it regain the national influence it has lost and live up to its reputation as one of America's great political parties.

America's great political parties.
If, however, the Republican Party cannot find its way into this century, then any of its disaffected membership should remember this. They can always join the Democrats. It is a bigtent party and there is plenty of room for more.

Recreating Ivies: A community in need of tradition

This year's Ivies inspired me to solve the most difficult problem I've encountered at Bowdoin. Our utter lack of community tradition is a ser-rous problem calling for a serious remedy. Without tradition, we are nothing

The way I see it, every weekend has The way I see it, every weekend has the potential to be one of the most exciting weekends of the year. Why is it that when Ivies comes around everyone suddenly goes speshif! Ev-ery year, Ivies proves to me that we students know how to have a good time together. We should prove this

each other more often. What's good about lvies? The editors of the Orient stated the main five goals of Ivies as being: "1. Ignore all schoolwork 2. Be outside as much as possible 3. Hang out with friends 4. Listen to great music 5. Let go of

OK, well besides the fact that I try and adhere to at least four of those on a daily basis, I'd say that unless we believe our editors are into stating th obvious, we as a campus must take a hard look at ourselves in the mirror and ask if we don't want to have more fun? Rousseau called it the so cial contract. And by the way, I wrote two papers over Ivies and had a blast, nk you very much. The school is holding us back in more ways than one, but Ivies is exactly the type of tion that we need more of

We must collectively challenge a problem that, more than any other, contributes to the decline of the Bowdoin College community. It threatens to divide us because the gravity of the situation is ignored: I'm talking about our "party" scene, or lack thereof.

or lack thereof.

Bowdoin's registered parties are generally haphazard, sterile, meaningless, keg-centered orgies. What do they stand for? Is "Saturday night" our best reason to dance, drink, and be merry? Are we celebrating free beer as payback for the absence of traditional fraternizing? Social house parties, with a few marginal exceptions, have been sterilized beyond the point of recognizing a true celebration. Typically there are some symptoms of a party (dark rooms, the smell of beer, people, keg) but there is not much social celebrating going on. The establishment of tradition as a keystone (no pun intended) of campus life is crucial to this insti-

Bowdoin needs more campuswide celebratory traditions to ensure that all can celebrate together more than once a year. Reveling within a community not only makes working hard worthwhile, but it also provide the best kind of opportunity to interact with the friendly faces who get lost in the shuffle of schoolwork. Forming meaningful bonds through established tradition and noble intoxication means more campus continuity. What will we remen when we graduate? Good old-fash-ioned, healthy, traditional revelry. Our current motto, "Get blacked

out," may be about our school colors, but it speaks volumes to how Teams have soul, clubs have heart, but our community needs to check its pulse more often.

whitewashed and disconnected the Bowdoin community truly is. The American-materialist-without-asoul thesis lives within the weekend

blackout mindset.

I know were all in some way competing with one another, but isn't a community-wide tradition the easiest way to achieve our greatest goal of contributing to the common good? Put down the work and have some fun as a campus, shall we? Teams have souls, clubs have heart, but our community needs to check its pulse more often

Granted the authorities on campus can come to grips with this obvious need for tradition, it should be very easy for us to find adequate cause to celebrate. Are you with me?

Consider the legend of Ivies: We celebrate the day that Bowdoin declined an invitation to join the Ivy League. Have you heard that one Well, that is a myth. If you didn't know that it was a myth, at least it sounds good. That is, until you talk to a student at Princeton or Harvard and hear how many traditional party weekends they celebrate. If we had accepted that invitation to the Ivy League, perhaps we would be cel-ebrating together more often.

Is Ivies for the Bowdoin students,

who failed to reach the Ivy League, to commiseratively get blacked out?

Certainly not, but the current, alcohol first, community second attitude towards partying seems to suggest that this could be the case.

that this could be the case.

Bowdoin College, by eliminating frats and purchasing keg beer, seems to endorse the consumption-ascause-for-partying philosophy. This is breaking down our sense of community. Some students, like career alcoholics and eighth graders, get drunk behind locked doors before they even go out. Whereas in my hometown we sip whiskey together and talk and hit the dance floor when the right song comes on, many Bowdoin students, because of the illegality of hard liquor, are drinking wodka in the bathroom for the first time since their acne cleared.

Bowdoin could encourage students to drink liquor responsibly by teaching about safe consumption. Instead, the College tacitly endorses instead, the College facity endorses sketchy consumption that is not only more dangerous, but crushes the community concept of celebration. Students and administrators to-gether need to unlock their doors

and open up to the idea of a cohesive campus. The administration owes us this right, and quite frankly, we will all be better off for it. We need to supplant consumption with tradi-tion as a cause for partying.

We need to collectively diagnose

e problem, and establish mean-gful community traditions. In the ingful community traditions. In the spirit of this op-ed, I urge the campus to start making preparations for Fall Ivies. Call the IHC and let them know that on the first, second, third, and fourth sunny weekends of August and September, we're going to need 12 kegs and 100 pizzas on the Quad, hand-delivered by Randy Nichols. This is not a joke. This is a serious problem.

We experienced a fantastic dem onstration of good attitude and good spirits over Ivies, so what is holdspirits over Ivies, so what is hold-ing us back from getting down like that every weekend? Sean Kingston sucked, so it's not the music Last year Talib was just as bad, withere's double confirmation. The best per-formances (besides Santigold) were the student bands, so there's no need to drop major cash on big names.

The gap between us and good time can only be bridged by tradition. There is only one weekend per year where the school says basically says, "have as much fun as you want to."

Bowdoin College is in need of a fundamental change. The key word here is fun. As we have all experi-enced, Ivies is one of the best weekends of the year. Technology, heavy workloads, and the weather keep student bogged down indoors and separated from each other. What we need is tradition to break the chains that shackle individuals and keep community values at bay. Rutledge Long is a member of the

Culture of public paganism seeks a unifying goal

IMAGINING BOWDOIN BY ROSS JACORS COLUMNIST

Dear Bowdoin College,

weeks, a fruitful Over the past few controversy erupted surrounding my use of the word "pagan" to describe cultural currents I saw streaming through elements of Bowdoin's GLBTO community. Through hours of conversation with professors, discussion with fellow students, and book browsing in the li brary, I came to see that there is a lively debate about the meaning of the word "pagan." So I should clarify—when I te it, I had just read the provocativ 1994 essay, "A Pagan Theory of Sexual-ity" by Camille Paglia, who transfigures and glorifies paganism invoking the word as shorthand for our "Greco-Roman" inheritance as compared with the more traditional inheritance from what she calls the "Judeo-Christian moral tra-

In any case, after these discussions, and after Ivies weekend, it is clear to me I was in the wrong. I sincerely re-spect, and even celebrate, the courage of homosexual people on campus and should not have singled them out as "pagan"—mostly because I now believe that the whole campus deserves this compli-ment. It is hard to say what people do in private, but I feel confident saying that Bowdoin College is an institution of

This noble paganism at Bowdoin is ostly visible in the intellectual origins of three prominent cultural movements that find robust expression at the col-lege—environmentalism, sexual liberam, and academic postmodern-

ism. While each of these currents finds its own way of harmonizing with inherited religion, all of these currents are accompanied by legitimate grievances against traditional Judeo-Christian morality. They have combined to strip religion of its former prestige and successful forge a "culture of public paganism."

Despite the recent mainstreaming of environmentalism which has made it more religion-and-commerce-friendly Bron Taylor in "Resacralizing Earth' paints its intellectual forerunners in America as "environmental pagans' frustrated with traditional religion. As the College elevates sustainability as a communal value and drapes the cam pus in black and green posters that read, "We're committed, are you?," it carries with it a deep strain of paganism, be-ginning with Sierra Club founder John Muir (1838-1914) who decisively proved that, "pagan religious sentiments leading to environmental activism are not a new phenomenon in America." His thick pantheism glitters through his prose—"I fancy I can hear a heart beating in every crystal, in every grain of sand and see a wise plan in making and shaping of ev-ery one of them. All seems to be dancing divine music. The clearest way into the universe is through a forest wilder-

Edward Abbey (1928-1989) continued in this vein, calling for an imagina-tion strong enough to "abandon forever such fantasies of the supernatural." Like a psychedelic Muir, he sees in nature a "Hindu pantheon of divinities" and fur-ther writes, "Each time I look up at one of the secretive little side canyons I half expect to see...the leafy god...a rain-bow-colored corona of blazing light, pure spirit, pure being, about to speak my name." Bringing us to present day, we have the activist and Poet Laureate of "deep ecology," Gary Snyder (b. 1930). Developing a "utopian eco-political phi-losophy," he harbors hopes that "if people stay somewhere long enough...the spirits will begin to speak to them. It's the power of the spirits coming up from

Although contemporary homosexuals harmonize more with religion, it is not disputed that many earlier proponents of sexual libertarianism held griev ances against the restrictiveness of traditional Judeo-Christian morality. Many would either develop more progressi theologies or, as Paglia advocates, mid-wife a "return to paganism!" We attend a college where it is considered sinful not to pursue your desires and where ho-mophobia is disciplined and punished. In my interview with Outpeer, BQSA member, Q editor, and resident Judith Butler expert, Alanna Beroiza '09, these intellectual transformations seem to be kicking in-"Bowdoin professors continue to do a better job of welcoming the pagan vocabulary of sexuality in the sroom. They show a willingness to think outside the Judeo-Christian norms and this translates into more meaningful acts of queer resistance."

The victories are the fruits of a cades-long struggle. In 1964, Michel Foucault called for a reversal of the Christian battle for chastity against "concupiscence." He lamented that "for-nication" was considered "the most dis-graceful of all the vices, the one that is most shameful." From this perspective, most shameful." From this perspective, Christianity "is a confissional religion; it imposes very strict obligations of truth, dogma, and canon, more so than do the pagan religions." Calling for the "intelectual destroyer" to resist the "power structures" of society, he might have agreed with Paglia in 1994 when she recommended that gay people, "concentrations of the property of t trate...on winning recognition of the pagan line as a counter-tradition whose or contributions have been science and art and whose philosophy of sexual-ity is both broader and subtler than the

A final current with serious griev es against Judeo-Christianity is academic postmodernism. The widely influential Richard Rorty protests religion in the name of a "romantic polytheism," which welcomes "the substitution of poetry for religion as a source of ideals." After saying that only humans can "dictate mor choices," he encourages like-minded col-leagues to work as "liberal ironists" who can favor what [Arnold] called "Helle-nism" over what he called "Hebraism" The academic postmodern and the "sci-entific atheism" flourishing today under the auspices of Richard Dawkins and "The Four Horsemen," also represent the scientific grievances against religion—it promotes violence, it is intellectually dishonest, it devalues science, and ever accuse it of "immorality!" More serious postmodern academics and partisans of paganism blame the tradition for its exrivity, its lack of pride, or its colonial and imperial nature

legitimate and facetious griev ances emanating from environmental paganism, sexual libertarianism, academic management and academic management ac nic postmodernism are more than opposed to traditional Judeo-Christian rality. They have combined to create a forceful repudiation of our religious inheritance and it is now cleansed from our public square. You could follow Old Scalias criticism and argue this repudia-tion has relegated religion to a "purely personal avocation that can be indulged, entirely in secret, like pornography, in the privacy of one's own room." Yet, this privatization of religion can also open up space for us to search for a new goal to

In this series, entitled "Imagining doin," I've taken our public paganism for granted and used each column consider a different thought that might be capable of goal unifying Bowdoin. I idered several-overcoming "the considered several—overcoming the audicated, invigorating the suburbs, a "political kinesiology" to get America back into shape, reconciling the '60s spirit with Judeo-Christian morality, and the possibility of an "Athleticist" culture. I spent a great deal of effort pondering what kind of goal this could be, but for different reasons, each of these goals falls short. Nonetheless, this "problem of culture" calls on all of to seek some kind of goal that can reunify us. I end where I egan a little less than three years agobeguiled by this one quote, presented by Professor Franco in his September, 2006 speech, "Nietzsche and Liberal Educa-

Perhaps this is one of Nietzsche's uring lessons—not his specific solutions he came up with, but the tire-less quest to find a goal for culture and education in a world that had lost its traditional bearings, and was headed into the long twilight of nihilism. Though he may not have discovered a goal th find compelling today, he brings home the danger, especially for education, of doing without any goal at all." The series "Imagining Bowdoin" is now over and I will likely retire forever

from all journalism. For an uncorrection of this column, thanks for giving reasters of the count, trained so giving my scribblings your time. I now invite you to embark on the far more important task of engaging this "problem of culture"—a genuine perplexity I take to be the most important question facing we firstlings of the 21st century.

Reverse racism hurts America | The first hundred days

COEPTIS

BY STEVE ROBINSON

The history of United States is a story of various struggles and the struggle against racism is, perhaps, most prominent in the minds of students at liberal arts colleges. In America, racism is largely characterized as a white behavior and rightly so.

It was the whites who propagated slavery. It was the whites who instituted the Jim Crowe laws. It was the whites who passed the Chinese Exclusion act and it was the whites who forced over one-hundred thousand Japanese Americans into internment

Clearly there is a historical basis for blaming America's racist history on white folks, but achieving a truly post-racial society requires that v resist the temptation to create racebased policies for the purpose of correcting rancid injustices of the distant

In the 20th century the United States made extraordinary attempts to bring about racial equality and it did so through a combination of cultural and institutional changes. The civil rights movement exem effective cultural change that laid the foundation for a post-racial society; however, the institutional structures that have been created in order to promote racial equality now threaten to crumble that cultural foundation.

Attempts to eliminate racism from our society using the legal system may have been justified in their day, but now they have led to the institu-tionalization of policy based on race. In fact, race-based policies have even created a new form of racism: reverse racism. To be honest, there is really nothing reverse about it. This form of racism is wrought from the same ethnic-based discontent and is equally detrimental to the goals of a free so-ciety. Unlike the violent racism of the past however, reverse racism is subtle and seemingly harmless.

Subtle and passive as it may be, reverse racism is ubiquitous throughreverse racism is uniquitous through-out American colleges. Take a look around Bowdoin College campus and you are bound to see posters for the Asian Students Association, the Latin Students Organization and the African-American society Absent from this collection of racebased assemblies is a White Ameri can Students Organization. Even the thought of such a group seems frivolous, laughable, and even racist. But

The idea of a WASO is ridiculous because any group which is predicated on racial divisions is itself racist. Every one of these race-based institu is dedicated to reinforcing the idea that students should feel more comfortable associating with people of their own race. By encouraging racial divisions within our com we are actively preventing the realization of a post-racial society.

Admissions offices across the country pursue non-white students in order to fulfill their multicultural quotas. When you filled out your apolication for Bowdoin College you were asked to check a box indicating your race, but why? If race doesn' matter, then why ask? Questions of race on college applications can mean only one thing; for college admissions officers, race does matter. That race helps to determine an individual's acceptance to a college is not affirmative action, it is discrimination in action

Make no mistake, the yearning for diversity which motivates such policy is remarkably beautiful, but it has corrupted the very idea of character-based judgment embodied by acter-based judgment embogated by the civil rights movement. Affirma-tive action seried an important func-tion in paving the way for gender and racial equality. No one can argue that the results of affirmative action policy undesirable, but the means by which these results were achieved are contradictory to a post-racial society and progress necessitates a reevalua tion such race-based policies

Even the justice system of the United States acts as an agent of reverse racism. The Violent Crime Control and Law Enforcement Act of 1994 was the first law passed to prevent race-based violent crimes. If a white man murders another white man, then that is just ordinary homicide. But under this law, if a white man kills a black man, he is guilty of a hate crime and will receive harshe punishment than if his victim had

Even though all violent crin involve some form of hatred, in the United States only interracial vio lence merits the title of "hate crime". The American justice system uses racial discrimination in order to prevent racial discrimination. What bizarre and savage hypocrisy!

There are those who believe that

America must go above and beyond in its efforts to enforce racial equality. But when will this stop? Must we have a congress whose racial composition is equal to that of our nation? Must we have the wealth of this nation distributed equitably along racial lines? Or perhaps the for multiculturalism will neessitate race-based population control to ensure that no neighborhood becomes too culturally or ethnically homogenous? I understand the old argument that the pendulum must swing both ways, but racism is one instance where society cannot fight fire with fire

Let me make it abundantly clear that this reverse racism of which I write pales in comparison to the vio-lent racism of the past. Nonetheless, a truly progressive post-racial society will not encourage affirmative action policies, hate crime legislation, or any institutional structures predicated on race. We have come too far as a nation to allow even subtle racism to infect our culture.

Our generation, the inspired youth of America, have the power to accelerate the transformation into a truly post-racial society. In the words of Abraham Lincoln, "With malice to vard none, with charity for all, with firmness in the right, as God gives us to see the right, let us strive on to finish the work we are in, to bind up the nation's wounds."

Last Wednesday, April 29, marked 100 days since that historic day when a man born to a white mother from Kansas and a black father from Kenya became the 44th President of the United States of America.

In that time, we have seen our new ident implement an ambitious (and expensive) economic plan to pre-vent Americans from feeling the brunt of a serious economic downturn while setting up the infrastructure America will need to continue leading in the increasingly competitive 21st century. He has begun troop withdrawal in Iraq but at a more conservative pace than he had suggested during the campaign. He has closed down the mous Guantanamo Bay detention facility and taken steps towards creating a more transparent, efficient gov-

While some have questioned the wisdom of some of his policies (the massive government spending being the primary concern), one thing is clear, Barack Obama's presidency will be as important to the direction of this country as any in recent history.

Unlike others' first 100 days in office, the 44th president's have been anything but a honeymoon. Greeted by a credit crisis spiraling out of con-trol, ongoing wars in Iraq and Afghanistan, and growing threats of instability in Iran and Pakistan, Obama has had little time to get comfortable with his new surroundings. The good news is it doesn't seem like he's needed it.

His aggressive response to the credit crisis has appeared to stabilize (at least for now) a market that was so unpredictable it may as well have been a slot machine. According to a new AP survey, a majority of Americans now believe that America is heading in the right direction. Compare that with the 17 percent who thought so last October and we can surmise that, if nothing else, Obama has improved the spirits of a nation badly in need of a boost.

On the foreign policy front, Obama has proven to have the dignity and diplomatic tact that his predeces-sor lacked. More importantly, he has shown to our nation's friends that he

Obama has had little time to get comfortable with his new surroundings. The good news is it doesn't seem like he's needed it.

will pay much more attention to their concerns and those of international organizations that were largely ig-nored by the Bush administration.

To our enemies, he has demonstrated that he is open to listening, but will not be afraid to use American might if they fail to demonstrate a willingness move towards conciliatory measures. He is wildly popular around the world and will look to use that political capital to promote American policies abroad and improve a relationship badly damaged by eight years of we don't need your help' diplomacy.

So after 100 days can we define

what type of president he is? Republicans will point towards his ive spending programs and say that he is a 'tax and spend' liberal, but support his responsible withdrawal policy in Iraq.

Democrats will say he is a pragmatic social engineer who will revive our nation and prepare it for the future, but criticize his healthcare plan as too conservative to truly meet the goal of providing all Americans with

At this point, it's too early to put the president in a box-and maybe that's just the way he wants it.

Obama has answered the doubters who said he wouldn't be ready for the job and has brought a leadership style to Washington that exudes confide

Said Obama about his first 100 days, "I am pleased with the progress we have made but I'm not satisfied...I look forward to working with the American people in all the 100 days to follow to make sure this country is what it can he"

Only time will tell how Obama's presidency will turn out, but so far at least, it looks like he's got the country back on track.

Craig Hardt is a member of the

34 columns later, 'Thanks for the conversation, Bowdoin'

A SOJOURN IN CIVILIZED LIFE RY ANNIE MONIAR COLUMNIST

A senior's parting words of wisdom are usually some intonation of the adage, "Take advantage of everything Bowdoin has to offer while you can."

As with most adages, they are true and sincere words.

Trying my best to abide by this rule, I've approached the vast majority of Bowdoin life with as much enthusiasm as I could muster. Generally, that excitement has come naturally

An English major (a title I've turned into an ideological stance more th an academic designation), nothing sends chills through me like sitting in class and experiencing that elusive

Outside academia, too, I've tried to keep the thrill alive. I've treasured each lap around the track, every breakfast catch-up with friends, any school-wide event, and every dinner with my team

The truth is, though, that "taking advantage of everything" is hard work And now, at the threshold of my life's next chapter, I'm wondering-worrying, actually-if I took enough advan-

I genuinely relished in esoteric dissions on far-fetched ideas from old books; there were plenty of mor wever, when, at 3 a.m. in the Cham berlain room, shaking the last cold droplets of coffee out of my Sustain able Bowdoin mug, I cursed Romantic etry and its supposed adherence to Gothic conventions, or Renaissance drama and its homosociality.

I didn't go to the Chris Hill lecture a few weeks ago because there was new episode of "30 Rock" on hulu.com. The other night, I closed my door, called my mom and scribbled in my blog in-

In three weeks, I leave Bowdoin behind, and I'm forced, now, to confront the possibility that I didn't engage enough with this campus; I didn't raise vigorous intellectual debates with friends or classmates enough, didn't probe professors for their wisdom as ch as I should have, didn't pack my schedule with as many lectures and

performances as were available, and -most disturbing of all-that I just didn't care enough to do so.

But one opportunity presented it-self that I did grab hold of, one that I think proved as enriching as at least a few Common Hours.

During winter break of my sopho more year, I saw a post in the student digest, from the opinion editor of the Orient, asking for submissions.

People who love writing come to a point, I think, when they feel a commanding urge to write publicly fectively and sincerely; the thoughts build enough that it seems they might spill over and suffocate if not given a

voice in the shape of words.

That urge has led me to this, my last of the 34 columns I've written over the past two and a half years.

The first column I wrote was arguably the most stressful endeavor of my ably the most stressful enceavor or my young life. I spent hours composing it, re-reading it, changing words, add-ing sentences. I had about five friends read it for me, torturing them with questions I didn't really want honest

You're sure it's funny? Because I

didn't see you laugh when you read it. It needs to be funny. You can tell me if it's not. I want an honest answer."

'It's very funny, yes."

"Very funny? Is it the right kind of funny, though? I don't want, offensive funny, you know. I don't want to turn people off. I really don't see you laughare you sure it's funny?

'I'm both amused and unoffended, I

This could go on for hours. The anxiety, though tempered, remains; I still do a fair amount of pacing around my room, biting my nails, and muttering aloud to myself to eke out a column.

Joan Didion (who's always good for

vell-timed quote) once wro peculiarity of being a writer is that the entire enterprise involves the mortal humiliation of seeing one's own words

But my muttering and pacing now comes less from my fear of exposure than it does from that very campus engagement I've been mulling over these st few weeks. I've learned to not think of these columns as putting my opin-ions on the front lines of criticism, and more as me striking up a conversation with Bowdoin.

My first few conversations had all the typical insecurity of a first date's talk-strained, self-conscious, and nerve-wracking. Over the years, though, like any good relationship, the talks have gotten easier, livelier, and more enriching. I never write a column in which I don't feel I've revealed something new about our lives as Bowdoin students to myself and to my readers.

I paced about a mile around my little tower room and had an hour's worth of dialogue with myself for this particular

Originally, I wanted to preach the "take advantage" trope, but, in truth, I haven't been 100 percent faithful to that notion in my years here, and my sense of engagement, largely because of this colu

I also realized that I'm not too worried about having this printed. After all, Bowdoin, you and I have exchanged a lot of words over the past couple of years. We're pretty close friends, now, and I think I can finish this column feeling confident that, even if I don't say it out loud, you get what I mean. So thanks, Bowdoin. It was a good

Bowdoin Student Government 2011 and 2012 Class Councils **Statements of Candidacy Officer Elections**

BSG At-Large

Nyle Usmani

Bowdoin Community! I, Nyle Usmani, have served you for a year in this very position already and have worked very hard. I pushed the faculty to drop the "D" in C/D/ F, focused on trying to get Gender Neutral Housing to join us in our near future, made sure there were cheap movie tickets in Smith Union to get, and got 100 Pizzas (though we deserved more) to Pine Stock during Ivies. I, with my past experience and your new ideas, will work as an ambassador for you to the BSG. Together, we can make Co-Ed Housing possible, finally take the "D" out of C/D/F, make an acceptable policy so that our students can enjoy the massages and acupuncture that our tuition dollars are paying for in the New Health and Fitness Center. We have a government that doesn't always do what we want, and have a community whose needs far surpass the current dialogue in BSG. With this new team of leadership, I hope to serve you once again as we move to get the best Health/ Fitness Center around, make more resources available to students, and in general, make Bowdoin a better place. Thank you.

Emma Nathaniel

Hey everyone, I'm Emma Nathaniel and I'm running to be an At-Large member of the BSG. I have spent a lot of time working with the student government in different capacities in my first year here are Bowdoin. I served as my class treasurer and helped organize a pub night, a Secret Santa, a first-year semi-formal dance, and a class gift of t-shirts. I also sat on the SAFC where I allocated funds to different clubs across campus to put on events and activities. Finally, I have served as secretary of the BSG for the past semester. I understand how the BSG operates, I know what the current issues are, and I am excited and ready for the chance to take on a larger role.

I think it is important for students to know what their govern-ment is doing for them, so I would like to work on making the BSG more transparent next year. I want to make sure that students know that the BSG is there for them. I am committed to Bowdoin and the BSG, and if elected I promise to work hard to represent the stu-dent body. VOTE EMMA for BSG At-Large!

Jack Hilzinger

I'm Jack Hilzinger and I want to serve as your BSG At-Large Repre-sentative. Currently a rising sopho-more, I had the distinct pleasure to serve as a Class of 2012 Representative to BSG for the last two semes-

Consequently, I have the relevant experience to tackle any issues that the BSG will encounter next year. I possess a nearly unmatched level of steadfast and responsible service to the BSG. Moreover, my work this year has included draft ing a proposal for gender-neutral housing, debating issues associated with Credit/D/Fail, and working to improve the health center. Remember those free pizzas at PineStock? I helped with that, too.

Despite all this, I yearn to do more. I want to take up Bowdoin's green initiative by mitigating bottled water use on campus through creating reusable water bottle filling stations. I want to vanguish Bowdoin's heteronormative standards by making gender-neutral housing a reality. So too, I want to put course registration online and get rid of our current anachronistic method.

Personally, I see myself as committed, innovative, and organized. If elected, I will do my utmost to make sure BSG stays focused on the issues pertinent to students; I will make sure your voice is heard!

Derek Brooks

Hello Bowdoin College! I'm Derek Brooks (class of '12) and I'm running to be an at-large representative to the 09-10 Bowdoin Student Government. Over this past year I've proved to be a dedicated member of the College and BSG, bringing unbridled energy and enthusiasm. This year I served as Co-Chair of Programming and have acquired much experience rallying the BSG, organizing events, working with the administration, and acting for students. I've led projects rang-ing from fireside chats with Barry Mills to the three-part-social-is-sues-display in the Union along with the members of the student affairs committee. Next year I'm committed to changing Credit/D/ Fail to Credit/No Credit and possibly Grade/Credit/F to encourage student exploration. I want course syllabi to be online before course registration to allow us to understand the potential workload. I want to re-evaluate the distribution requirements to make sure they are achieving exploration and allow the use of CR/D/F. I also want to investigate using the ONE-card downtown. This year I've found myself in a communicative role, bridging the information gap between students, BSG, and the College administration. The skills I've gained will be pertinent to working for students on the BSG. Thank you for this opportunity to represent you.

E-Board Representative

Sherrone Ricks

I would like to be a BSG rep because BSG represents the student body and I find that too often the members of the student body have little to no idea about what is ing on in BSG. Thus, I would like to keep everyone informed so that the student body is up to date about what its government is doing. I will do this by issuing monthly updates about what's going on and what events are planned/coming up for the academic year. As a member of BSG I will aim to represent the student body and its diversity with an open mind. With this in mind, as a member of the entertainment board I will dedicate myself to bringing entertainment to the campus that well represents the diversity of the student body. I also believe that it is important that the student body has a more interactive role in the selection of entertainment brought to campus. I will do this by polling various groups, cultural and social,

listening to the demands of the stu-dent body, and striving to reach a final decision that well reflects the wants of the student body. Get more BSG funded entertainment for the student body.

Christopher Omachi

My name is Christopher Omachi and I am running for BSG E-Board Representative.

I am the current Vice President of the Class of 2012. As such, I am required to serve on the Campus Activities Board, which is the group responsible for bringing various entertainment groups to campus. Most of you know it as the group that planned the Ivies concert with Sean Kingston and Santigold.

I have greatly enjoyed my time on CAB, and while I am currently on the Entertainment Board (new name, same group) for next year I would also like to participate in BSG and represent the interests of the E-Board

I have gained a lot of experience this year while working on CAB. I helped plan the Andrew Bird con-cert, Battle of the Bands, and the Ivies Spring concert. I have a lot of knowledge about music and con-certs, and I have thoroughly en-joyed planning these events.

For these reasons, I would greatly appreciate your vote! Thank you.

Class of 2012 President

Hartley Brody

my name is hartley brody and i'm in the running to be your class president. i'm the kind of person who is cut out for the job of class president. i have a 'can-do' attitude and i love organizing events and following up on suggestions that will make you -- my peers, class-mates and friends -- more satisfied with your time at Bowdoin. i was my high school's student council for 4 years, and I was elected president of the school my senior year. i hope that you will give me the opportunity to continue being a passionate, enthusiastic leader in our Bowdoin community. i take pride in my work and i take pride in my class. hartbro

my goals for this year are to: increase transparency - you should always know what your class council is doing increase involvment - you should

always feel like you have a say in what's going on

increase swagger - you should feel proud to be a member of our

Sage Santangelo

To my favoritist people, So I return to plead my case in this excellent publication. Imag-ine... A world where 2012 becomes the area code, Fruit Gushers grow endlessly on trees instead of scarcely in the bag lunch line, and your shoes come out of Crack clean... maybe not but this is a world of op-portunity people. Think BIG... Now that we've rid ourselves of freshman butterflies, we can blossom into whom we choose. How can I help you with this? Well... Class unity is still a focus, but I want to help every individual establish themselves and see that they've made a difference. I'm thinking more events that service the community beyond, that bring us together and build lasting bonds, and that people will look back on as highlights. Work with me... Gushers and Bowdoin Logs may not grow on trees but Bowdoin has given the opportunity for YOU to be creative with happenings on this campus. Why am I the one for this job? I know the ropes, as your president this year I know what you as a class aspires to be. So if you would be so kind please vote for me... (Yes I purposely rhymed that... don't judge)

Bowdoin Student Government 2011 and 2012 Class Councils Statements of Candidacy Officer Elections

CANDIDATES

CONTINUED FROM PAGE 22

60, you want to remember that you chose the right person for the job. The person with the strongest will, determination, and loudest voice- All qualities of a leader. When you think back you, will remem-ber dancing with Santigold during Ivies, drinking "apple juice" on the Quad, receiving awards for Honors Projects... but also voting for PRI-MO for VP. As your vice president I want to get our class more involved in all decisions that your council makes. The class council represents our class, but I want to make sure our class majority agrees with decisions that it makes. I will also run under a platform of unity. We all know Bowdoin is a great school. But one of our main problems is the formation of "cliques". Whether it's your team or your roommates some people never branch out. By promoting unity not only will everyone get a fuller college experience but also the college will flourish even more. So join the family. Vote for your "Primo".

And this cuz will never let you down.

Thank you so much, Primo Garza

Barry Clarke

Hello class, my name is Barry Clarke and I am running for Vice President of the best class at Bowdoin College. As Vice President, I will make sure that next year will be the best sophomore year imaginable. One of the duties as Vice President is to serve on the E-board. If elected, I will ensure that no weekend is monotonous or repetitive, as many weekends this year have appeared to be. Also, by not being on the class council this year, I noticed that as a class, we don't really have any authority in what we do together or any input on how to make Bowdoin better. Thus, if elected, I will propose that our class come together to make sure everyone's time here at Bowdoin is more fun and memorable. So, vote Barry W. Clarke as Vice President of your Class Council.

Class of 2012 BSG Representative

Vivek Stalam

Today I look at Bowdoin and I see unfulfilled potential: a campus full of brilliant students who are being held back by student government. Student government has done little other than subsidizing shuttles to Portland that few people take except to go home, and thrown a couple of newspapers in the dining halls. We need more from our student government.

I, first and foremost, will propose to install cell phone signal boosters near West and Osher, as there is little reception in those buildings. I will fight for social houses to be allowed to honor their history by embodying the spirit of fraternities. I will encourage Bowdoin to become more committed to environmentalism, not with random, meaningless gestures of hanging large posters, but by having a water bottle that every member of the Class of 2012 will receive. I will fight specifically for the needs of the class of 2012, the first class where Credit/D/Fail is not an option for distribution requirements. I will fight to change that rule, and to extend the deadline for the Credit/D/Fail option from 6 weeks to after the first midterm (regardless of the class). As your Class Council BSG Representative, I will fight for you

Rebecca Levin

"Hey all, my name is Becka Levin and I'm running for the BSG Rep for the Class of 2012. I have been enthusiastically s-rwing all of you for the past year on your current class council and aim to do an even better job next year. Also a veteran of high school student government, I have the experience to serve you well. I aim to make class council an more accessible resource that will contribute to our time here at Bowdoin. Personally, as a member of the Bowdoin Women's soccer team, I know the value of both teamwork and hard work. A motivated individual, I will ensure that your government caters to your

interests. Don't forget to vote this weekend!"

Tommy Cabrera

Greetings, my name is Tommy Cabrera and I am running for BSG Rep of the Class of 2012. I believe that I will be an awesome representative because of my combine personality and intense love for the class. I know that love alone doesn't bring home the bacon, that's why I have experience and commitment to back it up. I was a four year member of my high school's student government—obviously doing good things the entire time. I've also cleared, insert never filled in, my schedule so there is nothing in the way of me becoming the best possible BSG rep.

Recap: Vote for me and I promise you'll love every second of it.

Class of 2012 Treasurer

Tobi Olasunkanmi

Much like my competition for Treasurer, I have relevant experience dealing with finances and know how to prepare financial statements. I have held positions raising and managing enough money to rebuild a public high school and to provide for the Tsunami victims. I have the financial aspects in control. What sets me apart is my commitment to YOU. The money that you will trust me to manage is your money so you should have a say in how it is spent. I would love to work with you to select priority events and follow through with the funding. This year I've been involved with the Bowdoin community in various capacities from the McKeen center to the Dean's office. I have made the connections and familiarized myself with the resources to make things happen. Managing our money wisely is my primary responsibility but that's no reason to deprive ourselves of fun. I plan to have fundraisers that will foster class interaction and provide us with financial help for our programs. As you become leaders in your various clubs, I want to help make the process of obtaining funds

from the SAFC more transparent to you, therefore I hold office hours in the Union for an hour every week for anyone to stop by and chat. I plan to prepare Trading, Profit and Loss Accounts and Balance Sheets at each month end to keep you on top of your class budget. You deserve an efficient, productive, transparent, trustworthy individual who cares about our class. I am that person.

Christian Larochelle

My name is Christian Larochelle and I am running for Class Treasurer. I believe I am a strong candidate for Treasurer for several reasons. First, I have experience in student government and in administration. During each of my four years of high school, I served as Class President and as a Student Council Representative. In addition, I worked on two committees that reported to state officials on standardized testing and curriculum. Next year, I will also serve as Vice President of the College Finance Society.

Second, I believe our money should be spent wisely. While it is important to promote class unity through events and class clothing, we must also be weary of the large expenses that are incurred during Senior Week. To ensure that we can celebrate our final days at Bowdoin in any manner we choose, I would guarantee that no money is wasted and that all decisions are transpar-

If elected, I will be open to all ideas, I will work to promote class unity through various events, and I will strive to make our experience here at Bowdoin as enjoyable as possible.

Thank you for your time and remember to vote.

Calli Coffee

Dear students-

My name is Calli Coffee and I am running for the treasurer of the class of 2012.

As treasurer of my high school class for 4 years, I know how to get the job done and do it well. I strongly feel that I would be able to contribute significantly to planning great events for our class, appropriately distributing funds and effectively communicating class council's plans to the student body. I would ensure that the money granted to our class would be put to the best possible cause and that it would be spent wisely.

Additionally, I really want to

Additionally, I really want to emphasize a more inclusive relationship between the class council and the students. Integrating the students into the class council could be implemented by polling the members of the class and welcoming suggestions from the class. Most importantly, I would love to play a role in making sophomore year a memorable one for the class of 2012.

For these reasons, I would greatly appreciate your vote!

THIS SHIT HAS BEEN PUBLISHED EVERY WEEK SINCE A LONG TIME AGO

Sophomore student hangs with a Dean

In what College administrators are hailing as a "major breakthrough," a fso-phomore male student reportedly hung out with a College dean on Wednesday afternoon in Morrell Lounge.

"I think it's pretty obvious we're making some progress here," said Dean of Student Affairs Tim Foster of the meet-

Student Affairs 1 im Poster of the meeting. "This calls for a toast, a celebration."
Maybe even a campus conversation."
"Incredible," said President Barry
Mills, shaking his head in disbeliefwhen told of the news on Thursday. "I haven't had anyone come to my office hours at the Café since they stopped serving sushi on Wednesdays.

The student, who wished to remain anonymous, "because my older brother reads the Occident, and he would beat senseless if he found out about this," apparently sat down with Assistant Dean of Student Happiness Kevin Brown before his Economics 101 class, hung out, then left several minutes

"It was awkward, for sure," the male student said after the exchange. "I just YO MAMMA IS SO FAT ...

When she turns around, people give her a welcome back party.

•The last time she saw 90210 was on the

-She sat on the beach and Greenpeace threw

wanted to ask him whether I would be better off studying abroad in the fall or the spring. But he kept asking me if I liked to 'bro out,' and whether I liked Natty Ice, and if I liked Jack Johnson or Dave Matthews better."

But Brown thought the meeting

"I told him when he sat down-like I tell everyone who comes to see me: What can Brown do for you?' And I said it in the third person, like that."

Tim Foster said that after the unparalleled success of the program, there were plans to expand the hanging out with students next fall to include IT staff members, admissions officers, and Human Resources employees.

"It'll be a blast," Foster said, although

he acknowledged he was "struggling to come up with a name for these as catchy as 'Hangin' with a Dean."

College to go 'all glass' by 2020

BY SOME GLASSHOLE

At its spring meeting, the Board of Trustees voted unanimously to approve President Barry Mills' recommendation that Bowdoin "go all glass" by 2020. The 11-year plan is two-pronged: it will require that every newly constructed building be made of glass and it will gradu

glass building with a glass version.

Although the official plan was

just approved, Mills said it has been in "trial mode" for the past several years, noting that the new fitness center and entrance to the Museum of Art, as well as the glass portions of Druckenmiller, Kanbar, and Adams, are all part of the master plan.

"After a little deliberation with the Board, it became apparent that this plan was the clear choice, mov ing forward," Mills said.

Director of Capital Projects Don Borkowski said that the academic buildings will be the first to be replaced, followed by residential

White House reveals Mills hired for being Tootsie Roll princess

ALEX CORNELL DU HOUX, STILL PHOTGRAPHING SH

PUT YOUR HANDS UP! Karen Mills wears this outfit to the Senior Etiquette Dinner each year.

BY 69 BOYZ LET ME SEE YOUR TOOTSIE ROLL

While Karen Mills may be an accomplished venture capitalist, the Obama Administration revealed on Wednesday that she was appointed head of the Small Business Administration primarily for "the delicious tootsie roll candy that her family has helped to produce since 1896."

Sometimes tootsie rolls are the only way I can bribe Michelle to have kinky sex, so I needed someone with connections in the administration." President Obama said of appointing Mills, whose parents run Tootsie Roll Industries.

Since President Obama's inauguration, the dramatic increase in small glass bowls of Tootsie Rolls in the White House has done much to keep relations smooth between the President and First Lady, but it has also caused problems. Vice Presi-dent Joe Biden, for instance, has taken the increase of chewy sweets as a personal affront to his capped

"They know I can't eat the goddamned stuff. It tarnishes the glow of my 'grill," he said.

Greek student banned from College campus

BY ZEUS
BALLER, SHOT CALLER

Just before 5 p.m. Wednesday, Demitrius Stephanopoulos '12, a Greece native, was forcibly removed from campus by security. According to Dean of Student Affairs Tim Fos ter, Stephanopoulos was taken from campus just because "he's Greek."

Stephanopoulos was in the Union looking at the "How do others perceive you?" exhibit, trying to de if he was more bro or emo when two security officers seized him.

"They grabbed me by the arms and said, "You're coming with us, bro," Stephanopoulos said. "I was like, OK number one, you may perceive me as a bro, but I don't think that's accurate."

According to Foster, the seizure was a response to complaints from several students who felt that Stephanopoulos' presence on campus promoted a culture of exclusivity. Foster said that from now on, Stephanopoulos is not permitted to

set foot on campus.

Director of Residential Life Mary Pat McMahon said that while she was sorry Stephanopoulos' education had to end early, his removal was necessary as he represented the last vestige of Greek

"Stephanopoulos was a nice guy, but his dark hair and dreamy eyes reminded students of a time here when hazing, heavy drinking, and fun, in general, prevailed," McMahon said.

Foster said that he is working with the office of the dean for academic affairs to eliminate the Greek and Classics programs from the curriculum. Though, Foster noted, Director of Student Activities Allen Delong has been hindering the effort to curb Greek presence on campus. Foster explained that last weekend, while Delong was chaperoning the Ladd House party Epicuria, he got "caught up in the moment."

"First I was monitoring the keg to make sure all types of students were treated with respect, regard-less of race, sexual orientation, or disability," Delong said. "Then, next thing I knew I was doing a kegstand while everyone was sing-

ing the Phi Chi fight song."
Though Delong does not remember the rest of what happened that night, the Phi Chi tattoo on his neck suggests that he spent the hours between 1 and 2 a.m. at Ron's Piercing Experience receiving painful body

GLASS

THAT SHIT GOT SMASHED, JUST LIKE US

"We're really excited about Gl-assachusetts Hall," Borkowski said.

"People here are curious," Dean of Student Affairs Tim Foster said. With the new fitness center, you'll never have to wonder how much your peers can bench press. But, I'm most excited about the glass dorms-they will really increase awareness and understanding on campus."

Foster explained that watching your peers choose their outfits in the morning helps with unconstantly define themselves and shape their identity through cloth-

"This will help us reflect on our community values," Foster said. Member of the Board of Trust-

ees Richie Grad said that the Glass Campus Plan is part of a bigger effort to increase transparency at the

"Soon, all shall be revealed. We'll see if those chem-free kids really are chem-free after all," Grad said, adding that Hyde Hall will be renamed "You Can't Hyde Hall" after the renovation.

Borkowski stressed that the College will have to implement a few "Ice, ice, baby." BARRY MILLS

formed to glass. The rules include: no snowball fights, no ogling, and no being naked. Ever.

"We'll also have to create a new branch of facilities management that deals specifically with bird carcass clean-up," Borkowski said. Mills said that Bowdoin is also

considering changing the mascot from a polar bear to an iceberg in order to better reflect the glass campus.
"Ice, ice baby," Mills said.

Communications renamed Ministry of Propaganda

According to President Barry Mills, Bowdoin's Office of Communications is being reorganized, and will now be called the Ministry of Propaganda.

In this new world of social media, the Ministry of Propaganda will allow us to craft our message in new ways to ensure that the College is always portrayed in a positive light," Mills said.

As part of the move, Director of Communications Scott Hood's position has been changed to "High Priest of Press Relations," while Director of News and Media Relations Doug Boxer-Cook will become "Press Secretary."

Hood said that while he had always wanted to be called the "Supreme Viceroy of Communica-tions Domination," "High Priest of Press Relations" was a good compromise.

According to a document ob-tained by the Occident, respon-sibilities for the Ministry of Propaganda will include making sure that employees of Dudley Coe do

not have to talk to reporters, deflecting tough questions, and "running interference when shit hits

Hood said that over the summer, Ministry employees will be attend-ing a retreat with former members of the Bush administration, from whom Hood said "a lot can be

"Karl Rove has been a big inspiration for me for both my life and my work," he said. "I'm very excited to meet him-I just hope I don't jizz in my pants when we shake hands'

College is bringing sexy back to the front of the classroom

In light of its continued participation with the Consortium for Fac-ulty Diversity (CFD), the College nounced yesterday its plan to join the Consortium for Faculty Spiciness (CFS). Much like CFD, which aims to bring faculty members from diverse backgrounds to college campuses, CFS leads a nationwide initiative to bring hotter faculty members to

dents, I have heard time and time again how they'd be more motivated to do well in the classroom if their professors were totally slammin," said Dean for Academic Affairs Cristle Collins Judd.

"So when I heard about CFS, I immediately knew that it was something the College should join," she said.

CFS promotes hottness in the classroom as not only a motivation

classroom as not only a monvation for student performance, but also as a booster for the College's profile. "Simply put, good looking pro-fessors look good for the College," said Vice President for Communications and Public Affairs Scott Hood. "We're excited to have some smokin' faculty members in the promotional literature."

originated from the desire of professors and schools alike to attain the distinction of 'hot' on RateMyProfes sor.com-the graphic that denotes

this honor is a tiny red pepper.
"I think this is an excellent direction for the College to be heading in," said sophomore Martha Bamboozle '11. "I have Rick Thompson for Social Behavior right now, and I've never done so well in a neuro class before. He's just so pretty, I'd be so embar-rassed to do poorly."

established themselves as FSCB (Fac-ulty that Students would Consider Banging) on campus have taken issue with the College's joining CFS.

"For a lot of us, who got hired not because of our superlative attractiveness, but because of our academic excellence and qualifications, this comes as a great insult," said Ken Templeton, a visiting fellow in the education department with piercing blue eyes and nice physique

Professor of Economics Ionathan Goldstein, who is tall with broad shoulders, agreed with Templeton that in joining CFS, Bowdoin would bring down its reputation as a center for serious academic study.

Putting any efforts to initiative, monetary or otherwise, is

YOU KNOW YOU LOVE ME: Associate Professor of Sociology and Anthropology Joe Bandy, Assistant Professor of Government Shelley Deane, Associate Professor of Education Chuck Dom, Visiting Assistant Professor of Psychology Julie Quimby, Associate Professor of Visual Arts Jim Mullen, and Assistant Professor of German Jill Smith are all smokin.

deeply embarrassing," Goldstein told a group of prospective students and eir parents

Visiting Professor of Psychology

Julie Quimby felt otherwise.

"Even though I'm nearing nine months pregnant, students are still ridiculously nice to me," she said. "One

nice boy even offered to cook a meal for me in his apartment so I wouldn't have to walk all the way to the din-ing hall."

Endowment to be made into window shades, says Mills

In an unprecedented action, the College is moving to replace all of its window shades with its endowment.

"As I've said a million times, our endowment is appropriately transparent," said Bowdoin President Barry Mills. "What better way exists to ensure that our students receive an appropriate amount of

Due to the College's non-disclosure agreements with its endowment fund managers, students will not be able to actually look at, en, or close the window shades. Mills said that this was a non-issue, as the school's investment committee will take up permanent residence on campus to manage the shades.

"Do your work. Do your Common Good stuff. We'll take care of your windows." Mills said. "You can organize all the people you

want to tell the trustees what you think is the appropriate amount of sunlight, but ultimately, it is their

According to Senior Vice President for Finance and Administration Katy Longley, Bowdoin's diverse investment pool will give the College the flexibility it needs to

Longley said that the school's large ExxonMobil stock certifi-cates would be used in Coles Tower rooms, while \$100 bills would suffice for smaller windows

Senior Vice President for Investments Paula Volent said that her office was the site for beta testing for this new use for the endowment, and that things had been going swimmingly.
"My new window shades have al-

lowed me to both work on my tan while simultaneously keeping out the prying eyes of you little shit disturbers," she said, presumably referring to students.

SWEET TAT: Allen Delong, kicking ass, taking heteronormative names (see story, page 1).

Fitness center shatters under tightened belt

BY MO MONEY, MO PROBLEMS

The Blue Tarp Committee unveiled a new plan on Wednesday to cut costs at the College. The budget proposal, which will involve the dining hall, the OneCard system, and the heating system, was developed after an embarrassing failed attempt to cut costs

with the new fitness center.

Director of Capital Projects Don Borkowski said that the College wanted to "tighten its belt" on the fitness center. First, all the belts on the new treadmills were pulled tight, leaving machines that still functioned, albeit just barely. Reveling in the success, Borkowski ordered an oversized belt to be placed on the entire building and then tightened, us-ing the brute force of the entire team of security officers

"We got three holes of slack out of it, then I said, 'Boys, don't let up, pull HARDER!"

At that point, the building shat-

"We were all like, 'fuck," Borkowski said.

The new, three-pronged mea-sure will include eliminating cups, dishes, and utensils in the dining hall, replacing each stu-dent's "OneCard" with a "Half-Card," and lowering the heat in Coles Tower from 103 degrees to 101 degrees.

"Other schools are doing trayless dining," said Associate Director of the Dining Service Ken Cardone. "But we thought, why not cupless dining, too?

Cardone explained that stu-dents will drink from a beverage stream that will be installed where the drink machines are currently located in Thorne and Moulton. Using either cupped hands or a sustainable straw, students will choose from the caffeinated flow, The Stream of Consciousness. or the milk and juice blend, which Cardone said "will be modeled af-

THANKS ANONYMOUS DONOR

SUCKING IN: This is what the belt looked like on the Fitness Center before it was tightened Tuesday. New plans to cut costs include switching to cupless dining and HalfCards instead of OneCards.

ter the River of Jordan."

As for the food, students will manually scoop their portions from a communal trough and carry it back to their tables.

"Students should make sure their fingernails are clipped and clean before they reach for the grub," Cardone warned.

Director of Dining and Bookstore Services Mary Lou Kennedy said that switching from OneCard to HalfCard seemed obvious

"We're asking every student to cut their card in half," Kennedy said. "They can make the cut either vertically or horizontally, depending on their preference."

As for the lowering of the temperature in the Tower, students seem to be taking the news relatively well. Ronny Bonza '10, who lives on the 12th floor of the Tower, said that he has spent the vast majority of the year naked in a pool of his own perspiration.

"It's like the fuckin tropics up

there," Bonza said. "It will be nice to live in a more temperate cli-

Director of Facilities Ted Stam said that the College did not consciously decide to lower the temperature, it just decided to switch heating systems; the lower tem-perature is only incidental.

Instead of the old system of burning oil, the College will now burn books and periodicals from

"Although we plan to stick to library materials for fuel, Dean Judd requested that we burn Jon Goldstein's study, so we'll make that one exception," Stam said.

Stam explained that burning library materials serves the double purpose of heating Coles Tower

and helping the library cut back.
"We think the library's new Kindles will make good kindling, Stam added, noting that they will also make "a very sweet light show" as they burn.

TFA recruiters' aggressive tactics incite fear into hearts of students

NIBLESA DE CHINCKA DAZ ENCEBUC

ONE MINORITY AT A TIME: Assistant Professors of Education Chuck Dorn and Doris Santoro try to keep their past work with TFA a secret, but the Occident found this picture of them as proof.

BY HILARY SWANK
WAS IN THAT MOVIE

The Bowdoin community got fired up yesterday when Teach For America (TFA) recruiters attempted to burn down Riley House—with the education faculty inside.

"TFA has always been controversial, but this was a little extreme, even for them," said Assistant Professor of Education Charles Dorn.

TFA recruiter Crabbey Prior was apparently resentful that former TFA corps members Chuck Dorn and Doris Santoro, both professors in the education department, have turned on the organization.

Asked why they joined TFA in 1995, Santoro and Dorn answered with cold, jaded expressions.

"A lot of shit went down in the 90s," Santoro said.

90s," Santoro said.

Dorn responded: "The inner city

looked so fun in the brochures."
Visiting Professor of Education
Matthew Long said he wasn't surprised by TFA's extreme tactics on
campus

"They've been playing with fire for a long time when you look at what they do to their corps members," said Long, a critic of TFA's methods. "We honestly should have seen this coming."

Witnesses say they spotted recruiters pouring gasoline around the perimeter of Riley House and carrying blowtorches bearing the TFA logo. Before they could burn the building down, however, campus security intervened.

"We didn't start the fire!" screamed a TFA recruiter as she was dragged off by Randy Nichols.

"But we would have!!"

Other recruiters managed to escape security and have since been spotted around campus supplying brochures and other TFA material to, promising Bowdoin students. TFA, known for its aggressive recruitment techniques, seems to be employing new strategies to find and commit Bowdoin's leaders.

Amy Hill '10, who is the president of several clubs and co-captain of the women's lacrosse team, was confronted by a TFA recruiter in a Quinby House bathroom.

"I was in the bathroom, and all of a sudden someone's head popped up over the top the stall," she said. "He told me that he wanted to talk with me about my impressive leadership skifls."

TFA recruiters have appeared elsewhere on campus. One TFAer was discovered swiping cards at Moulton the other day, telling students about underprivileged classrooms in the Mississippi Delta as she did so. Patty has mysteriously been reported missing.

Various organizations have reported TFA infiltration. BCN said TFA managed to sneak subliminal flashes of advertising into "Sex and the Boonies" and all of WBOR's PSAs have been replaced with CDs about educational inequity.

Security is struggling to contain the TFA propaganda, which has spread like wild fire since their attempts on the Education department.

"TFA prides itself on the tenacity and motivation of its staff," said Associate Professor and Chair of the Education Department Nancy Jennings. "These qualities make TFAers incredibly difficult to get rid of."

PIZZA RIOTS...AHHHHHHHHH

BOWDOIN BOXERS

Bowdoin Organic Garden to pull up roots soon

The College announced yesterday that the Bowdoin Organic Garden (BOG) will be closed in order to fund the purchase of more "We're Committed...Are you?" signs.

the parameter.

As much as we like having an organic garden, dealing with all that zucchini in the fall is just a big pain in the a-" said Director of Dining Services Mary Lou Kennedy. "The "Committed" signs are a much easier way to show our dedication to sustainability. They don't need to be watered, weeded, or harvested."

According to Kennedy, the garden coordinator will remain on staff, and be responsible for the placement of the new signs, as well as running a small farmstand that will be built and supplied by Sysco Systems.

"Even though we won't be growing our own food any more, the farmstand makes it look like we still are, which is important for maintaining our image as an environmentally responsible institution," Kennedy said.

-Steve Robinson.

Bates buys Stowe Inn, re-names it 'Bates Motel'

Bates announced on Wednesday plans to buy Stowe Inn, convert the space back into a motel, and to rename it "The Bates Motel."

"Man that place was a real pit," said Senior Vice President for Finance and Administration and Treasurer and Six Other God-Damn Titles Katy Longley said. "It's about time we sold it, before the Board of Health shut it down or a tour group accidentally walked past it or a methamphetamine dealer started selling from the first floor steps."

"But it all worked out in the end," Longley added. "We coaxed an inferior college to purchase the space, so it's not our problem anymore."

Bates President Norman Bates, tending to his ill mother, could not be reached for comment on Thursday.

-Bob Katz.

Clerkin '11 fails to make digest post deadline

A teary-eyed Caitlin Clerkin '11 emerged from class on Thursday after missing the 3:15 deadline to submit posts to that afternoon's digests. Clerkin, a member of Quill and the Bowdoin Film Society, has made 494 consecutive digest posts since her matriculation last August.

494 consecutive digest posts since her matriculation last August.

T was just skimming through the digest, and I skipped the first two posts like I usually do because it's like, 'I get it, Film Society shows movies," said Matthew Cleavage '09, "But then I was just blown away. Clerkin wasn't there! CC fucked

Other students thought that Clerkin had been put on digest probation.

"I heard that Clerkin had filled up her digest quota from someone on CAB, so it must be true," said I.P. Daily '11. "I guess posting at least twice every day really came back to bite her in the ass."

-James Baumberger,

BSG worries: Are the rumors true?

BY SLUTLEDGE LONG
HE CAME THIS CLOSE

At its Wednesday meeting. Bowdoin Student Government (BSG) discussed methods by which it might combat rumors that BSG is irrelevant on campus.

irrelevant on campus.

BSG President Sophia Seifert
'09 told the assembly at the beginning of the meeting that she was
concerned with students' image of

"I am frequently told that all we do is meet Wednesdays in Burger King crowns, and discuss how we all can't wait to become trustees and actually run this school," she said.

Vice President for BSG Affairs John Connolly '11 said that Seifert was exaggerating the gossip. "We all know what BSG really does," he said. "We provide Occident reporters who have no future in journalism with jobs, we stage Warhammer 40k boffing skirmishes with Klingons vs. Death Eaters, and we provide Facilities with extra pocket money since they set up the BSG chairs every week."

A Co-Programming Chair who requested anonymity heartily agreed.

"BSG is, if anything, more efficient than the United States Congress," he said. "We aren't stuck with Roland Burris, nobody cares if we run up huge debts bailing out the Bowdoin Outing Club, and if our bills are bad policy and are full of typos, nobody cares since they don't matter anyways. Plus if you really think about it, Sophia is much hotter than Nancy Pelosi."

A half-hour after Seifert's plea, At-Large Representative Anirudh Sreekrishnan '12 suggested the body brainstorm solutions to end BSG's irrelevancy. "I know that was a big thing to say," he confessed in a tearful post-meeting interview. "But I kind of wanted to get out

early, since Lost airs at nine. Now I'll have to watch it online, which means the Smoke Monster will be pixelated."

At-Large Representative Rasha' Harvey '12 concurred, and said that Connolly has been a lose cannon ever since Sean Kingston told him to put his hands up during the Ivies concer, after which he received a titty-twister from the Jamaican hiphop star.

After this debacle, most BSG members were too tired to proceed with a discussion. However, a brief burlesque performance by Class of 2011 Representative Grek Tabak recharged the assembly and pushed BSG to unanimously vote to continue discussion next semester.

On Tabak's dance routine, Vice President for Facilities Mike Dooley'10 stated, "That was quite possibly the hottest thing I've seen since Princess Leia donned her slave bikini in Return of the Jedi."

Penis pride: Bowdoin celebrates 'Cock Week'

A BIT

BY 'PIMP'SCHAEFFER

Prostates were celebrated left and right throughout Brunswick on Thursday, as students took to the streets to commemorate their buttholes. The riots were mostly peaceful, though Julia Bond '09 was seen violently yelling about prostates and even demonstrating the correct techniques for pleasuring the prostate.

We spend so much time talking about vaginas around here," Bond said. "Vagina, vagina, vagina. I'm fucking sick of vaginas. All I want is a damn prostate."

The demonstration was the main event of P-Day, with the slogan, "Un-til the Silence Stops," referring to the abhorrent culture at Bowdoin where students often avoid each other's prostates or, even worse, choose to not talk about prostates at all. Banners with the slogan hung from the ceilings of all campus buildings, with written directions and pictures of the "come hither" motion to aid students in achieving maximum prostate

'COME HITHER': Posters around campus provide a visual for proper prostate stimulation. The posters are part of 'Cock Week,' a week centered around events like the Dick Monologues and P-Day.

A Brunswick mother with a "very literate 8-year-old" was very happy that the riots were not printed in the

local newspaper.
P-Day is the beginning of a number of festivities to counter V-Day and the Vagina Monologues. Campus Cock Week will begin on Sunday with the first ever "Sperm Out," where students will spew their wet and sticky stories all over Smith Union

"Honestly, I feel like every week is cock week for me," said one first year female. "But I'm just blown away, and blowing away, at the Sperm Out!"

The Dick Monologues will be the main event of the week, a perfor-mance that 149 male students will be participating in. The main scenes will be: "My Angry Dick: Blue Balled," "My Frustrated Dick: Hanging at Half-Mast," and "When I Was 12 My Balls Dropped."

Newly formed '80s band not about tenure, profs insist

ONE HIT WONDER

Two professors who happen to be currently under review for ten-ure have started an '80s cover band. They are reportedly looking for two Brunswick-area musicians to round out the proposed quartet.

Economics professor Billsyall and government professor Ann Archie say that their goal is simply to entertain the Bowdoin community.

"This is in no way a one-year project solely intended to get us tenure," Archie said.

Billsyall and Archie claimed they were unaware of the existence of popular '80s cover band Racer-X.

Who and what is Racer-X?" Billsyall asked. "And how long exactly after they started their band did they get tenure?"

Archie said that the proposed band, to be called "The Ten-Year Itch," plans to play in Morrell-Lounge in Smith Union on Thursday nights.

We have determined that time and place seems to be the most effective way to achieve our goal, said Billsyall. Added Archie, entertaining the community."

As neither professor can play an instrument, both plan to share singing duties for the band.

"We already know all the words to

SCREAMING GIRL "OH MY GOD I LOVE RACER-X

GET YOUR TENURE ADVICE HERE: In a seemingly unrelated story, several groups of professors have started a bunch of '80s cover bands.

'The Final Countdown' and 'Livin' on a Prayer," said Billsyall. "We're still learning 'Come on Eileen' and 'Sister Christian.' We're pretty sure that's all we need to know."

"We also need to get some purple

wigs," said Archie.

Even though The Ten-Year Itch has yet to play a single gig, every single female Bowdoin student is crazy about the band.

"Oh my god, I unconditionally

love The Ten-Year Itch," said some random sophomore girl.

Faculty members have also been supportive.
"Hey, it worked for us," said Eng-

lish professor Aaron Kitch and mu-

sic professor Vin Shende, who each received tenure this year.

In other news, on Thursday Bowdoin College granted tenure to the two members of Racer-X who are not professors

We now have seven a cappella groups. Kill me.

A campus riot comparable to the size of the march on the night of Obama's presidential victory broke out last night over the news that a seventh student a cappella group will soon do its part to make a cappella

concerts even longer.

The group, which filed for a charter this week, is called STFU (the meaning of the acronym is unknown). Its leaders have little-to-no selection process for members, and encour age anyone who likes to sing in the shower to join.

With the emergence of STFU, the percentage of Bowdoin students involved in a cappella will reach a disproportionately high number. Depending on how many students choose to join STFU, nearly 65 per-cent of the student body may perform pop standards with quirky and "suggestive" dance moves in the chapel at least three times a semester. In ddition, the average length of a cappella concerts is expected to increase from an hour and a half to more than two hours.

While members of the group could not be reached for comment incensed students stormed through

"If I have to hear another a cappella rendition of 'Don't Stop Believing' one more time, I'm going to transfer said a junior who declined to give his name because he was too busy barricading the doors to the chapel to pre-

GPA KILLERS

Goldstein: benchwarmer

Eleven students were reported in a "severe state of shock" after news was released that Professor of Economics Jonathan Golstein was in fact cut from his high school football team. Goldstein, reported by Curia to be a "strapping man with broad shoulders, strong enough to kill an ox," may not have been the athlete he was hyped up to be.

The report, by Sports Illustrated's Selena Roberts, indicated that Goldstein was removed from the roster during his sophomore year after a sub-par freshman season. He later tried out for JV golf, but did not make the cut

"I'm not here to talk about the past," Goldstein said. "But just for the record, my GPA was pretty fuck-

ing studly while I was on the team."

Curia "news" staff led the campus in a moment of silence Thursday at noon. No Curia staffers were available to talk to the actual press. but the organization did release a

We are saddened and disturbed by the allegations against Professor Goldstein. We will support him no matter what and are convinced he was at least a bench-warmer," the statement said.

The news comes just days after President Barry Mills announced that the new health and wellness center would be named in Goldstein's honor.

"Professor Goldstein's commitment to athletics and research morality inspires us all," Mills said on

However, Mills seemed pretty bummed after hearing about Goldstein's athletic incompetence.

"That's bullshit," he said. Goldstein's high school coach confirmed the Roberts report.

"We had to let little Johnny go," he said. "He kept weirdly hanging out in admissions instead of going to practice. He even locked everyone else out of an information session.

Those doors were not locked." said Goldstein

LET'S JUST CHILL MAN

Newly named U.S. Ambassador to Iraq Chris Hill '74 has decided to take on the challenge of being a lax daddy yet again. The diplomat has said that he has always dreamed of coming back to the turf, and what better opportunity than when he was given a largely ceremonial position in international relation

"Lacrosse helped me concen-trate while I was at Bowdoin, so why not play while dealing with

Hill will be exercising his fourth year of eligibility to play an NCAA sport after red-shirting as "It's pretty simple really," Hill said. "Go to a couple meetings in Baghdad in the morning, hop on a jet to Brunswick, suit up, run train on Middlebury, and then cool off with some down-time at

Hill said that he didn't anticipate hangovers from partying to affect him at his day job because he is such an experienced partier and can "throw back Natty Ices like the best of 'em."

When asked if he would "enjoy" the group of girls that seems to follow the lacrosse team around, Hill just grinned.

"I mean I'm just here to play ome lax and have a good time, he said. "Whatever is gonna happen will probably just happen.

Hill '74 to become lax | Patty heckles at hockey game

BY EGG MCMOULTON OPEN NET GOALS

Patty, the Moulton Union cardwiper, proved that her affection for rdoin's hockey team extends bevond the lunch line when she was escorted out of Watson Arena for heckling last Friday at the Bowdoin-Colby

Security escorted the Bowdoin legend out of the stands after a Colby player reported being distracted by Patty's abrasive comments and with cries of slander, such as "Our buffalo chicken sandwiches are better than anything you're ever tasted!" and "You bet I'll swipe your cards!" Colby play-ers and fans were especially offended by Patty's threat to poison their Bruns-wick Stew and butter their biscuits.

"Tve never heard anything like it," junior Cameron Swirka, who said he repeatedly moved places in the stands to avoid hearing the taunts. nice lady. It was all just really out of

On-lookers claim they saw Patty holding up offensive signs as well, one of which read "Mules are fools," and another with the words, "You guys can't have babies."

Millan AbiNader '10, who witnessed Patty's 'immature behavior" said that the term "fool" is especially distasteful. "It isn't 'the f-word,' but its offensive nonetheless," she said.

After more than a dozen complaints from both Colby and Bowdoin players and fans, Director of Safety and Se-curity Randy Nichols was eventually forced to escort Patty off the premis

"Patty is a wonderful lady, and I didn't want it to come to this, but peo ple felt threatened by her behavior,

"Her behavior was truly unprofes sional," said Dean of Students Affairs Tim Foster in an e-mail to the

Patty's presence on campus will be confined to Moulton.

Since news of Patty's removal from Watson hit the Internet this week, sports fans across the U.S. have comnted ceaselessly on Internet sites and blogs and made Patty's battle their own. BarStoolSports.com has espeowin batsuoports.com has espe-cially become an advocate for Patty's plight, claiming that the Bowdoin community "should take a page out of Patty's book when it comes to her passion for sports and her active contribution to the Polar Bear fan base."

In fact, the Web site recently made Patty its poster child and an image of her in her Polar Bear paraphernalia can be found on the Web site's homep age. Patty now receives letters and fan mail from aficionados across the US.

"I care about sports, and I care about Bowdoin hockey [players]," said Patty. "I'm not ashamed and I would do it all again."

Bots kill soccer team in ultimate showdown

RONALDINHO

JUST READ A-WALL'S COLUMN

The Bowdoin Robotics team handily beat the men's soccer team last week 15-2, confirming for everyone what many had already suspected: these robots can kick some serious ass.

some serious ass.

"We put on a good show out there," C3M-1LLU, who had six goals and three assists for the Bots, said after his post-game greasedown.

The two teams squared off on the Robot's home turf, a 4.4 by 6.8 meter carpet inside Watson Arena. While the Robots were familiar with the field, the human soccer squad had trouble adjusting to the conditions.

"The field was so fucking small," said men's soccer co-captain Ricky Martin '09. "You couldn't take two steps without knocking a robot over. We couldn't pass, corner kicks would hit the side of Watson. It was a nightmare out there."

"In fact," Martin added, "the only way we scored those two goals was when [sophomore striker James] Nixon took a pair of wire cutters and went to town on three or four of the robots on the field, then just sort of kicked them aside."

"Talk about clearing up the passing lanes," Martin added.

In addition to home field advantage, the Bots also had a couple of other things working in their favor, including an ability to go long stretches without water.

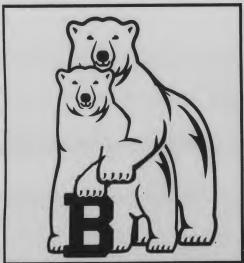

"All we needed was an oil change at halftime, and we were good to go." C3M-1LLLU said. "Water, Gatorade? That shit is so 20th century."

The Bots were also cheered on by a boisterous crowd of their

"They had a lot of fans out there," men's soccer coach Paul Pierce said. "Where did all those fucking robot fans come from?"

The Northern Bites have been so successful this year that they will be given special priveleges as Bowdoin's most "athletic" team.

"Don't worry about those robots," said Director of Athletics Jeff Ward. "We will make sure that no matter how close the opponent is to home, every away match they will be treated to a fully-functional hotel stay, with individual rooms for each 'player.' And yes, of course, they can order room service."

πο δηλώνει με υπερηφάνεια ότι είμαστε οι έθνους παλαιότερο συνεχώς δημοσιεύεται εβδομαδιαία κολέγιο. Για ένα χαρτί με ένα τόσο σημαντικό όγκο αριθμός, θα μπορούσε κανείς να πιστεύω ότι θα είμαστε προσεκτικοί με τις ιερές αριθμούς. Ένας θα ήταν εσφαλμένη. Ο Απρίλιος 5, 2002 ζήτημα της Ανατολής περιλαμβάνει τις ακόλουθες gem ενός Σημείωμα Εκδότη:

Ο όγκος του αριθμού 2001-2002 έκδοση της Ανατολής έχει αλλάξει από 133 έως 131 που αρχίζει με αυτό το θέμα. Αυτή η αλλαγή είναι μια διόρθωση που προκύπτει από τον αρχικό όγκο αριθμοδότησης λάθος που έγινε το 1992. Τον Ιανουάριο του ίδιου έτους, ο όγκος ήταν λανθασμένα άλλαξε αριθμό από 121 έως 122, και ο όγκος τους αριθμούς μέχρι το φθινόπωρο του 1996, παρέμεινε ένας αριθμός πολύ μεγάλος. Το φθινόπωρο του 1996, οι εφημερίδες είχαν όγκο αριθμούς που κυμαίνονται από 126 έως 129, και, τέλος, για τη διευθέτηση 125, που ήταν ένας αριθμός πολύ χαμηλό όγκο. Ο όγκος παρέμεινε αριθμό αυτό τον τρόπο, μέχρι την πτώση του 1998, όταν είχε αυξηθεί κατά τρεις, με τον τρόπο αυτό δύο αριθμούς υπερβολικά υψηλό. Είμαστε τώρα για διόρθωση του προβλήματος αυτού με τη μείωση του όγκου αριθμός από τα δύο. "

Αυτό που έχουμε, ώστε besmirched μας κληρονομιά είναι μια πηγή μεγάλης θλίψης. Ωστόσο, εκείνοι που αγνοούν την ιστορία είναι καταδικασμένος να το επαναλάβω, και, ως εκ τούτου, καλούμε τον εαυτό μας σε αυτό το λάθος τώρα, έτσι ώστε οι μελλοντικές γενιές να θυμάστε την τραγωδία και να μάθουν από αυτή. Αυτό δεν είναι απλώς υποθετική ανησυχία, μάλιστα, φοβούμαστε ότι οι ευγενείς συντρόφους μας στο The Bates Φοιτητών αρπακτικά έχουν πέσει σε παρόμοιο σφάλμα.

Φοιτητική απαριθμεί τα τρέχοντα θέματα που ανήκουν στην τόμος 138. Ο αριθμός θα πρέπει να είναι γνωστά: είναι, επίσης, συμβαίνει να είναι το σημερινό όγκο αριθμό. Ο μαθητής, όμως, θα έπρεπε να είναι δύο χρόνια πίσω από εμάς. Σύμφωνα με τη Wikipedia, ότι κριτής όλων είναι ότι το σωστό και το λάθος, το Φοιτητών ιδρύθηκε το 1873? Αντίθετα, την Ανατολή, ιδρύθηκε το 1871.

α το μίσος για το μαθητή να πρέπει να δημοσιεύσει μια παρόμοια δυσάρεστη Σημείωμα Εκδότη, ακόμη και αν όντως έχουν κάνει λάθος αρίθμηση, είναι πατριωτικό καθήκον τους να το πράξουν. Με τις καλύτερες προθέσεις, θα αποφασίζει, επομένως, να φέρει την προσοχή σε αυτό το ενοχλητικό διαφορά οι ελπίδες για την επίτευξη της ακρίβειας, της συναίνεσης, και, με αυτή, αιώνια ειρήνη στη Γη. Ο Θεός ευλογεί όλους σας, και μπορεί να συνεχίσει ο Θεός να ευλογήσει τη δημοσιογραφική τέχνη. Suck it.

The bullshit represents the majority view of not Adam Kommel. However, we do wish him luck on his last of three road tests in the state of Maine.

WEBBED MAN

You would be a fool to subscribe be-cause anyone who's anyone knows that our print version will be defunct before this can come out next year.

ADVERTISING 20, Brunswick, ME. Been in nship w/ Big Top sandwiches

MAILBAG FULL OF WINDBAGS

Did you seriously just ignore me in line?

To the Editors:

Really, though? I mean you were about three people behind me the entire time we were in the hot food line and then you crossed behind my back while I was standing, sort of off to the side, waiting for them to bring out more BBQ beef quesadillas

I'm really pissed off though be-cause I made sure to take a shower before I came to dinner, put on some rosebud salve and every thing. I showed up right at 6 p.m. to maximize my chances of accidentally bumping into you in an overcrowded servery. I pretended to be interested in the salad-bar couscous for about five minutes while you got your drinks-four of them, all lined up across the top of your tray.

Oh, while we're talking about drinks, this something I've been wondering: four glasses of the Aquahealth water? Do you do that at every meal? It takes about twice as long to come out of the dispenser. Do you know what the difference is between the Aquahealth water and the regular water? I mean, except for the flavor if you decide to get raspberry.

I went out of my way to sort of watch you the whole time you were eating, in the dark room, even though I was sitting on the side of my booth that faces toward the back

of the room and it meant that I had to crane my neck for like half of dinner. When I got up to get dessert I sucked in when I walked right past you and you still didn't say any-

The point is you completely acted like we didn't spend Friday night looking at each other acros the basement of Maine Hall where about 25 freshmen were hanging out from about 11 p.m. until 12:15 a.m. playing beirut.

Sincerely. Dee Springton '12

I really should have it both ways

To the Editors

As a rising junior, I am understandably very angry. First, I had to put up with all kinds of crap from the total pushovers at the OCS office who, for about two weeks, pretended that they weren't going to let me study away in the spring. Excuse me? My mom has better things to be doing than dialing (207) four times in a week.

Furthermore, if I had to study away in the fall there is no way I could ever get a start on my minor. Putting off the decision between anthropology and sociology would just stress out the whole time I was away. It's actually unsettling for me to even consider the possibility of studying away without figuring out this deci-

sion before I leave. The fall is the only time I can really explore South Asia from all angles and finalize my choice between the two disciplines by simultaneously taking South Asian Popular Culture (SOC 236) and Modernity in South Asia (ANTH 243).

So then, to add insult to injury, I am being reduced to living in a forced Brunswick triple for the one semester of junior year that I do get to be here. I mean, for \$50,000 a year I think we can all agree that this is outrageous Why are they forcing Brunswick triples anyway?

Three to a room is just too crowded, especially when the room is over-crowded with students that, having never experienced eye-opening time abroad, are not sensitive to others' cultures and living styles.

The College should get its act to-gether; every student deserves to eat his cake and...know that there will be more waiting at the display station at Thorne.

N. Titled '11

Maine same-sex marriage bill is so gay

Bots kill soccer team in ultimate showdown

JUST READ A-WALL'S COLUMN

The Bowdoin Robotics team handily beat the men's soccer team last week 15-2, confirming for everyone what many had already suspected: these robots can kick some serious ass.

"We put on a good show out there," C3M-1LLLU, who had six goals and three assists for the Bots, said after his post-game greasedown.

The two teams squared off on the Robot's home turf, a 4.4 by 6.8 meter carpet inside Watson Arena. While the Robots were familiar with the field, the human soccer squad had trouble adjusting to the conditions.

"The field was so fucking small," said men's soccer co-captain Ricky Martin '09. "You couldn't take two steps without knocking a robot over. We couldn't pass, corner kicks would hit the side of Watson.

It was a nightmare out there."
"In fact," Martin added, "the only way we scored those two goals was when [sophomore striker James] Nixon took a pair of wire cutters and went to town on three or four of the robots on the field, then just

sort of kicked them aside."
"Talk about clearing up the passing lanes," Martin added.

In addition to home field advantage, the Bots also had a couple of other things working in their favor, including an ability to go long stretches without water.

"All we needed was an oil change at halftime, and we were good to go." C3M-1LLLU said. "Water, Gatorade? That shit is so 20th cen-

The Bots were also cheered on by a boisterous crowd of their

own.
"They had a lot of fans out there," men's soccer coach Paul Pierce said. "Where did all those fucking robot fans come from?"

The Northern Bites have been so successful this year that they will be given special priveleges as Bowdoin's most "athletic" team.

"Don't worry about those robots," said Director of Athletics Jeff Ward. "We will make sure that no matter how close the opponent is to home, every away match they will be treated to a fully-functional hotel stay, with individual rooms for each 'player.' And yes, of course, they can order room

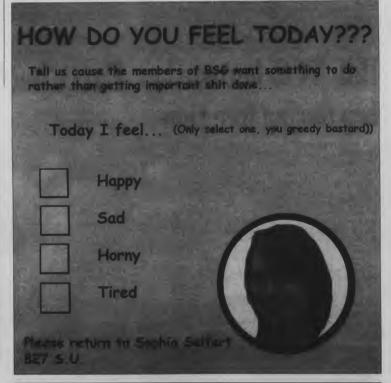

BEAR ASS: The administration has come up with a more "appropriate" school logo.

BALLS DEEP: The administration decided to fill Dayton Arena with \$15 million worth of balls for the world's most expensive play-per

πο δηλώνει με υπερηφάνεια ότι είμαστε οι έθνους παλαιότερο συνεχώς δημοσιεύεται εβδομαδιαία κολέγιο. Για ένα χαρτί με ένα τόσο σημαντικό όγκο αριθμός, θα μπορούσε κανείς να πιστεύω ότι θα είμαστε προσεκτικοί με τις ιερές αριθμούς. Ένας θα ήταν εσφαλμένη. Ο Απρίλιος 5, 2002 ζήτημα της Ανατολής περιλαμβάνει τις ακόλουθες gem ενός Σημείωμα Εκδότη:

Ο όγκος του αριθμού 2001-2002 έκδοση της Ανατολής έχει αλλάξει από 133 έως 131 που αρχίζει με αυτό το θέμα. Αυτή η αλλαγή είναι μια διόρθωση που προκύπτει από τον αρχικό όγκο αριθμοδότησης λάθος που έγινε το 1992. Τον Ιανουάριο του ίδιου έτους, ο όγκος ήταν λανθασμένα άλλαξε αριθμό από 121 έως 122, και ο όγκος τους αριθμούς μέχρι το φθινόπωρο του 1996, παρέμεινε ένας αριθμός πολύ μεγάλος. Το φθινόπωρο του 1996, οι εφημερίδες είχαν όγκο αριθμούς που κυμαίνονται από 126 έως 129, και, τέλος, για τη διευθέτηση 125, που ήταν ένας αριθμός πολύ χαμηλό όγκο. Ο όγκος παρέμεινε αριθμό αυτό τον τρόπο, μέχρι την πτώση του 1998, όταν είχε αυξηθεί κατά τρεις, με τον τρόπο αυτό δύο αριθμούς υπερβολικά υψηλό. Είμαστε τώρα για διόρθωση του προβλήματος αυτού με τη μείωση του όγκου αριθμός από τα δύο. "

Αυτό που έχουμε, ώστε besmirched μας κληρονομιά είναι μια πηγή μεγάλης θλίψης. Ωστόσο, εκείνοι που αγνοούν την ιστορία είναι καταδικασμένος να το επαναλάβω, και, ως εκ τούτου, καλούμε τον εαυτό μας σε αυτό το λάθος τώρα, έτσι ώστε οι μελλοντικές γενιές να θυμάστε την τραγωδία και να μάθουν από αυτή. Αυτό δεν είναι απλώς υποθετική ανησυχία, μάλιστα, φοβούμαστε ότι οι ευγενείς συντρόφους μας στο The Bates Φοιτητών αρπακτικά έχουν πέσει σε παρόμοιο σφάλμα.

Φοιτητική απαριθμεί τα τρέχοντα θέματα που ανήκουν στην τόμος 138. Ο αριθμός θα πρέπει να είναι γνωστά: είναι, επίσης, συμβαίνει να είναι το σημερινό όγκο αριθμό. Ο μαθητής, όμως, θα έπρεπε να είναι δύο χρόνια πίσω από εμάς. Σύμφωνα με τη Wikipedia, ότι κριτής όλων είναι ότι το σωστό και το λάθος, το Φοιτητών ιδρύθηκε το 1873? Αντίθετα, την Ανατολή, ιδρύθηκε το 1871.

α το μίσος για το μαθητή να πρέπει να δημοσιεύσει μια παρόμοια δυσάρεστη Σημείωμα Εκδότη, ακόμη και αν όντως έχουν κάνει λάθος αρίθμηση, είναι πατριωτικό καθήκον τους να το πράξουν. Με τις καλύτερες προθέσεις, θα αποφασίζει, επομένως, να φέρει την προσοχή σε αυτό το ενοχλητικό διαφορά οι ελπίδες για την επίτευξη της ακρίβειας, της συναίνεσης, και, με αυτή, αιώνια ειρήνη στη Γη. Ο Θεός ευλογεί όλους σας, και μπορεί να συνεχίσει ο Θεός να ευλογήσει τη δημοσιογραφική τέχνη. Suck it.

The bullshit represents the majority view of not Adam Kommel. However, we do wish him luck on his last of three road tests in the state of Maine.

THE BOWDOIN OCCIDENT

Has anybody ever faxed us anything? Fax: (207) 725-3975

http://oksident.bowdoin.edu

Two blocks north of Maine Street Station. It's going to bring the people Brunswick, ME 04011

The Bowdoin Occident is an annual publication that relies on bcuria.com and Soot Hood for tips. Independent of the College, it is published in the basement of the last bastion of brotherhood—Alpha Phi. The Occident pursues content freely and thoroughly, following professional journalistic standards in writing and reporting that are much higher than the standards they'd keep if they ever got to the Pub on a Thursday. The Occident is committed to serving as a forum so open that you should even feel comfortable clipping your fingernails and digging around here in pursuit of your prostate. And I think it's pretty much up to you to decide whether or not we are thoughtful.

Avg. age 20, Brunswick, ME. Been in yrlong relationship w/ Big Top sandwiches but looking 4 something new, to spice it up. Likes pizza, Mexican, Plz fax; see above

MAILBAG FULL OF WINDBAGS

Did you seriously just ignore me in line?

Really, though? I mean you were about three people behind me the entire time we were in the hot food line and then you crossed behind my back while I was standing, sort of off to the side, waiting for them to bring out more BBQ beef quesadillas.

I'm really pissed off though be use I made sure to take a shower before I came to dinner, put on some rosebud salve and everything. I showed up right at 6 p.m. to maximize my chances of accidentally bumping into you in an overcrowded servery. I pretended to be interested in the salad-bar couscous for about five minutes while you got your drinks-four of them, all lined up across the top of your tray.

Oh, while we're talking about drinks, this something I've been wondering: four glasses of the Aquahealth water? Do you do that at every meal? It takes about twice as long to come out of the dispenser. Do you know what the difference is between the Aquahealth water and the regu lar water? I mean, except for the flavor if you decide to get raspberry.

I went out of my way to sort of watch you the whole time you were eating, in the dark room, even though I was sitting on the side of my booth that faces toward the back

of the room and it meant that I had to crane my neck for like half of dinner. When I got up to get dessert I sucked in when I walked right past you and you still didn't say any-

The point is you completely acted like we didn't spend Friday night looking at each other across the basement of Maine Hall where about 25 freshmen were hanging out from about 11 p.m. until 12:15 a.m. playing beirut.

Dee Springton '12

I really should have it both ways

As a rising junior, I am understand ably very angry. First, I had to put up with all kinds of crap from the total pushovers at the OCS office who, for about two weeks, pretended that they weren't going to let me study away in the spring. Excuse me? My mom has better things to be doing than dialing (207) four times in a week.

Furthermore, if I had to study away in the fall there is no way I could ever get a start on my minor. Putting off the decision between anthropology and sociology would just stress me out the whole time I was away. It's actually unsettling for me to even consider the possibility of studying away without figuring out this decision before I leave. The fall is the only time I can really explore South Asia from all angles and finalize my choice between the two disciplines by simultaneously taking South Asian Popular Culture (SOC 236) and Modernity in South Asia (ANTH 243).

So then, to add insult to injury, I am being reduced to living in a forced Brunswick triple for the one semester of junior year that I do get to be here. I mean, for \$50,000 a year I think we can all agree that this is outrageous. Why are they forcing Brunswick triples anyway?

Three to a room is just too crowded, especially when the room is overcrowded with students that, having never experienced eye-opening time abroad, are not sensitive to others' cultures and living styles.

The College should get its act together; every student deserves to eat his cake and... know that there will be more waiting at the display station at Thorne.

Sincerely, N. Titled '11

Maine same-sex marriage bill is so gay

To the Editors:

Let's get one thing straight—this is ridiculous

Sincerely.

Bob Jones Maine Marriage Alliance

MISSED CONNECTIONS

• You rung me up at the C-store. Your eyes were the color of my Odwalla Superfood. \$3.57 ring a bell? • We've been boxmates for two years

now. I'm wearing the socks right now that your grandma sent. Coffee

• 1 saw you coming out of the Plan B room in the Union. Want to use it this weekend?

this weekend:

I saw you in the basement com-puter lab last night...we hooked up in Baxter once, but I don't think you remember. I was wearing my Timbs.

I have really good long distance vi-

sion and I saw you on the other side of the Quad. You were wearing your green backpack, walking between classes, and you were looking in my direction—I was leaving Hubbard.

· I sat under the tree on the Quad right outside your 2:30 class in Searles waiting for you. You tried to make eye contact, but I pretended to be looking for the cookie in my bag

 You grinded up on me in the Boom Boom Room, but now I can't remem-ber your face. I'm 5'5"; you seemed to be about 6 feet. Wanna do it again Saturday, same place, same time?
• I took the last grilled cheese at Super Snack on Friday. You were standing in line behind me. I thought you

· We shared a Safe Ride from Cole man to Pine Street on Thursday. We had a really meaningful conversation. I tried to follow you into C, but you closed the door behind you before I could slip in. Lunch at Thorne?

• I saw you in the waiting room at the Health Center. You said you've been having symptoms of irritable bowels.

LOL SPEAK

NO A CAPPELLA THIS WEEK

IT'S ABOUT FUCKING TIME

FRIDAY

COMMON HOUR

Mahmoud Ahmadineiad

In his first visit to the United States since his controversial talk at Columbia University in 2007, the Iranian President will visit campus in response to an invitation from Associate Professor of Religion Robert Morrison.

Pickard Theater, Memorial Hall. 12:30 p.m.

RELAXATION

Reading Period Massage Break

How's that for a happy ending? Conference Room, Smith Union. 12:30 p.m.

WEAR A CHASTITY BELT

Lax Bros and Freshman Hoes

All are welcome. Unless you're fat. Or ugly.

Boom-Boom Room, Crack House. 9 p.m. -?

H1N1

Swine and Dine

The last Taste for Change dinner of the year will feature appetizers and entrées of imported pork from Mexico and pork rinds. Proceeds will go to participants' medical bills. Ladd House. 5 p.m.

BOOBIES

"Photos of Skinny, Naked White Girls"

Come ogle the same naked chicks you saw last year. Leave feeling like a fat ass. Lamarche Gallery, Smith Union. 7 p.m.

SATURDAY

TAXIDERMY PARTY

Chickenstock

Kill your own bird. Learn to debone and stuff with Professor Richard Morgan. Hubbard Hall. 2 p.m.

CRATY MUSIC

The Wabanakis' Return

Remember that loud-ass drum circle that went on all Saturday about a month ago? They're back. Bring your earplugs or just steer well dear.

Morrell Lounge, Smith Union. 10 a.m. - 5 p.m.

SUNDAY

RELIGIOUS SERVICES

Church of Satan

While the Church of Satan does not have an official place of worship in the Brunswick area, adherents may choose to attend services at nearby institutions.

Bates College. 10 a.m. Colby College. 12 p.m.

NO, REALLY: With a remnant of green remaining on its slender stem and a few early spots down its perfectly curved length, a banana sits on the floor of Daggett Lounge.

MONDAY

ENVIRONMENTALISM

Sustainability Demonstration

Bowdoin is committed. Sustainable Bowdoin will showcase the team of cows it has purchased. The College plans to convert a boiler to "fart energy," saving about 10 percent on next year's energy costs. Entire Campus. 8 a.m.

....

Guide to Your Welfare Benefits

The Career Planning Center has given up on finding jobs for Bowdoin students. Come learn how to effectively live off the government!

Shannon Room, Hubbard Hall. 10 a.m.

TUESDAY

LECTURE AND WORKSHOP

Pubic Health

Julia Bond will lead a demonstration of how to keep your crotch coiffed. Bond corralled representatives from Downeast Maine's only sex shop to offer their wares at a reduced price to Bowdoin students.

Women's Resource Center. 3 p.m.

WEDNESDAY

CANDID CAMERA

Wave to Yo Mama

Moms worldwide watch the Hubbard and Thorne webcams. As a special post-Mother's Day treat, scare her shitless by running nude out on the Quad or, even better, through the dinner line at Thorne.

Quad. All Day.

Thorne Hall. 5 - 7:30 p.m.

BRAWL

Meddies and Longfellows Fist Fight

Rules:

- 1. Participants may compete shirtless or clothed.
- 2. Fight songs required.
- 3. Spectators may choose to fight, too.

Simpsons Point. 7 p.m.

THURSDAY

OPEN YOUR MOUTH

Pub-a-Dub-Dub

Foam party in the Pub. For once, you will be soaked in something other than your own sweat.

Jack Magee's Pub. 10 p.m.
